

LUXEMBOURG

	Key steps since 2011	Assessment
Education	Roma can benefit from mainstream educational policies. Reforms to improve educational quality and performance, including the participation of (migrant) youth, are on the policy agenda. Training on the reception and integration of Roma children at school was organised for teachers during the school year 2011-2012 and welcoming classes (separated: "classes étatiques" or integrated: "cours d'accueil") exist for newcomers. Intercultural mediation is offered in several languages.	<i>Measuring the impact of mainstream educational policies on Roma should be considered.</i>
Employment	Roma can benefit from mainstream employment measures. Many initiatives have been taken to increase the employability of jobless people, including through job integration programmes and subsidised employment.	<i>Measuring the impact of mainstream employment policies on Roma should be considered.</i>
Health	Roma can benefit from mainstream health policy measures. Two measures could be of specific importance for Roma youth – preventing early pregnancy and promoting sexual health, facilitating access to dental services.	<i>Measuring the impact of mainstream health policy measures on Roma should be considered. Awareness-raising measures aimed both at Roma and health professionals could be considered.</i>
Housing	Early 2013 Luxembourg government adopted a national strategy against homelessness and housing exclusion.	<i>Measuring the impact of planned mainstream housing measures on Roma should be considered.</i>
Anti-discrimination	Newly established Welcome and Integration Contract (Contrat d'Accueil et d'Intégration – CAI).	<i>A systematic approach to tackle prejudices against the Roma, including working with the media should be developed.</i>
Funding	No specific amount has been allocated exclusively for Roma integration. However, Roma inclusion has been supported by national and EU funds under various types of mainstream measures, including social inclusion measures. In the 2007-2013 financial period, Luxembourg has allocated 9,6 % (~€ 2 million) of its total ESF budget for integrating disadvantaged people.	<i>Further use of existing possibilities under the EU funds to support Roma inclusion should be considered.</i>
Structural priorities that should be considered	<i>Measuring the impact of mainstream measures on Roma should be considered.</i>
