1. Introduction

This working document accompanies the Draft Budget 2021. Its purpose is to provide information on funding made available to international organisations during the reporting year 2019, and to present the reasons why it was more efficient for the Union to implement projects through international organisations rather than to act directly.

2. Definition of International Organisation

Article 62(1) (c) (ii) of the Financial Regulation¹ lays down the definition of international organisations. Based on these texts the Commission's definition of an international organisation includes:

- international public-sector organisations set up by intergovernmental agreements, and specialised agencies set up by such organisations;
- the International Committee of the Red Cross;
- the International Federation of National Red Cross and Red Crescent Societies;
- other non-profit organisations assimilated to international organisations by a Commission decision.

3. Overview of EU Budget implementation through international organisations

In accordance with article 41(3) (g) of the Financial Regulation, the Commission should attach to the draft budget a working document showing funding to international organisations, which should contain:

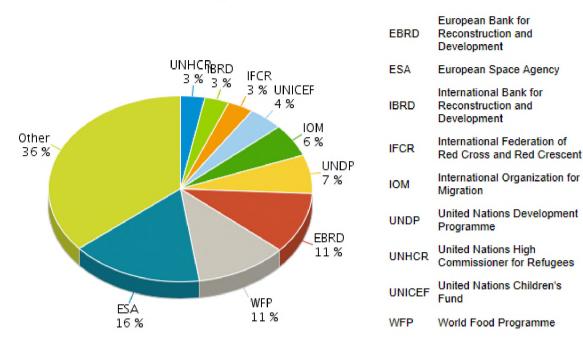

- a summary of all contributions, with a breakdown per Union programme or fund and per international organisation,
- a statement of reasons explaining why it was more efficient for the Union to fund those international organisations rather than to act directly.

The pie charts in the sections below show the amount of all commitments concluded with international organisations during 2019 reporting year. The total amount of these commitments made in 2019 from the EU budget was EUR 4,8 billion².

 $^{^2}$ Compared with data reported last year, the basis for the EU contribution to International Organisations has been widened to include all commitments registered in the budgetary accounts during the reporting year. This includes not only the commitments made from the approved budget 2019, but also the ones following global commitments from previous years.

3.1. International organisations to which commitments were made

The pie chart³ below presents the commitments broken down by international organisation. The 'top ten' were together provided with EUR 3,2 billion to implement EU policies, accounting for 67,5 % of all commitments to international organisations in 2019. The organisation receiving more than any other recipient was the European Space Agency, accounting for 16 % of the commitments, in order to implement the European Geostationary Navigation Overlay Service (EGNOS), Galileo and Copernicus.

³ International organisations under the section 'Other' in the pie chart is displayed in Annex (Tables) I Commitments to international organisations.

3.2. Reasons for implementing EU funded activities through international organisations

The pie chart below presents, by order of magnitude, the main reasons why it was more efficient to implement through international organisations than to act directly.

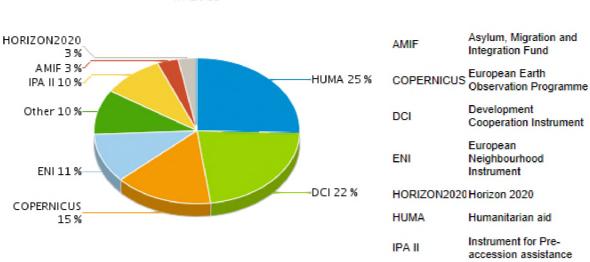

The most common reason for choosing to implement projects through an international organisation is for the organisation's specific expertise (42 % of funding), for example, for a unique capacity to deliver space related services for the EGNOS, Galileo and Copernicus programmes. In addition, 27 % of funding went to international organisations, notably to the United Nations and Red Cross families, due to their unique capacities, privileges and access, notably for the effective delivery of humanitarian aid.

Main reasons for implementing EU-funded activities through international organisations in 2019

3.3. EU Programmes contracting with international organisations

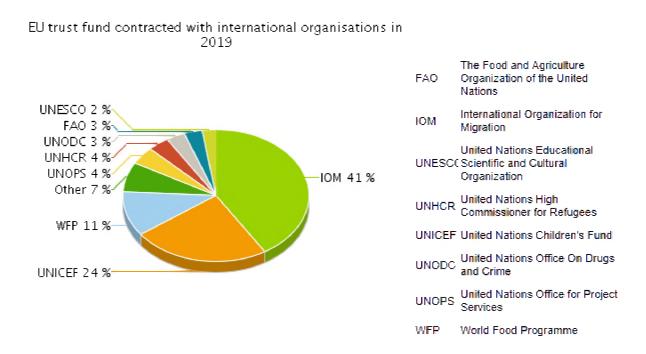

The pie chart below presents the commitments by Union programme. The three programmes committing most funds to international organisations were Humanitarian Aid (25 %), Development Cooperation Instrument (22 %) and Copernicus (15 %).

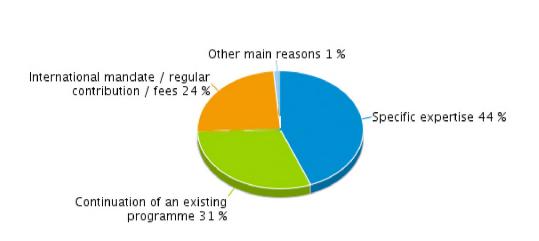

4. Overview of EU Trust Funds contracting with international organisations

In addition to the funding described in the earlier sections, the EU Trust Funds have also provided funding to international organisations. The EU Budget, the European Development Fund, EU Member States and other donors together fund the EU Trust Funds. The pie chart below covers the year 2019, indicating that the top three receiving international organisations were the International Organization for Migration (41 %), United Nations Children's Fund (24 %) and the World Food Programme (11 %).

The second pie chart shows that the three main reasons for implementing the EU Trust Funds' activities through international organisations were related to the organisations' specific expertise (44 %), to the continuation of existing programmes (31 %) and to contributions agreements linked to international mandates (24 %).
