

2023 Rule of Law Report - targeted stakeholder consultation

Fields marked with * are mandatory.

Introduction

The annual Rule of Law Report lies at the centre of the European rule of law mechanism, which acts as a preventive tool, deepening multilateral dialogue and joint awareness of rule of law issues. So far, three editions of the Rule of Law Report have been published in 2020, 2021 and 2022.

In the preparation of the first three editions of the Rule of Law Report, the Commission has relied on a diversity of relevant sources, including from Member States, country visits, and stakeholders' contributions collected through the targeted stakeholder consultation [1]. The information provided has informed the Commission's country-specific assessments in preparing the Report. Building on the positive experience from the first three editions of the Rule of Law Report, the Commission is now inviting stakeholders to provide written contributions for the preparation of the 2023 Rule of Law Report through this targeted consultation.

The contribution to be provided should include (1) information on measures taken to implement the recommendations addressed to the Member State in the 2022 Rule of Law report, as well as developments with regard to the points raised in the respective country chapter and (2) any other significant developments since January 2022 [2] falling under the 'type of information' outlined in the next section.

The input should be short and concise and summarise information related to one or more of the areas referred to in the template. You are invited to focus on the areas that relate to the scope of work and expertise of your organisation. Existing reports, statements, legislation or other documents may be referenced with a link (no need to provide the full text). Stakeholders are encouraged to make references to any contributions already provided in a different context or to Reports and documents already published. Contributions should focus on significant developments both as regards the legal framework and its implementation in practice.

If you wish to submit information concerning several Member States, you will have to fill-in the questionnaire separately for each Member States (due to the size of the questionnaire). There is no limit to the number of contributions submitted by a single participant. In such cases, you are not required to repeat the information in the section "about you" that is non-mandatory nor the information on horizontal developments.

Please provide your contribution by **20 January 2023**. Should you have any requests for clarifications or encounter difficulties in filling in the questionnaire, you can contact the Commission at the following email

address: rule-of-law-network@ec.europa.eu.

Any other relevant developments

Questions on horizontal developments

In this section, you are invited to provide information on general horizontal developments or trends, both positive and negative, covering all or several Member States. In particular, you could mention issues that are common to several Member States, as well as best practices identified in one Member State that could be replicated. Moreover, you could refer to your activities in the area of the four pillars and sub-topics (an overview of all sub-topics can be found below), and, if you represent a Network of national organisations, to the support you might have provided to one of your national members.

The work with the preparations to reform the Act on the Openness of Government Activities continues at the moment of this writing and is likely to be concluded during the course of year 2023.

A. Media authorities and bodies

3000 character(s) maximum

The Council for Mass Media (CMM) is a self-regulating committee established by publishers and journalists in the field of mass communication for the purpose of interpreting good professional practice and defending the freedom of speech and publication.
At the moment of this writing the Council is working on the renewal of the journalistic guidelines. This is due to the changes in the media environment. The renewal process will start in the autumn.

B. Safeguards against government or political interference and transparency and concentration of media ownership

Measures taken to ensure the fair and transparent allocation of state advertising (including any rules regulating the matter)

3000 character(s) maximum

Safeguards against state / political interference, in particular:

- safeguards to ensure editorial independence of media (private and public)
- specific safeguards for the independence of heads of management and members of the governing boards of public service media (e.g. related to appointment, dismissal), safeguards for their operational independence (e.g. related to reporting obligations and the allocation of resources) and safeguards for plurality of information and opinions
- information on specific legal provisions and procedures applying to media service providers, including as regards granting/renewal/termination of licenses, company operation, capital entry requirements, concentration and corporate governance

3000 character(s) maximum

There are no legal safeguards against concentration of media ownership. The independence of public broadcaster Yle is guaranteed in law about public broadcasting and private media is protected by general legal framework concerning business and entrepreneurship. There are some legal restrictions in written contents of the public broadcaster due to an EU decision.

What is of notice here is the lack of consistent media policy that would include support mechanisms for private media, financial incentives included. Finland and Iceland are the only Nordic countries that do not have a media support mechanism for private outlets.

Transparency of media ownership and public availability of media ownership information, including on direct, indirect and beneficial owners, as well as any rules regulating the matter

No changes since 2022. The ownership information of companies is available for the public. The Limited Liability Companies Act states that the companies need to disclose the information about ownership if asked. Also the Act on the public disclosure and confidentiality of tax information was recently amended so that the changes made to taxation afterwards are also made public.

C. Framework for journalists' protection, transparency and access to documents

Rules and practices guaranteeing journalist's independence and safety, including as regards protection of journalistic sources and communications

3000 character(s) maximum

The protection of journalistic sources and communication has been discussed recently as a part of the Helsingin Sanomat trial concerning disclosing security secrets. The Supreme Court decided that the journalist was obliged to answer the questions of the police despite the fact that the journalist found the questions being protected by the principles of source protection and right to anonymous expressions. In general, however, the Supreme Court has outlined that the principle of protection of sources needs to be interpreted broadly. The aim of the principle is to protect the sources rather than journalists in cases where journalist is a suspect in a court process.

Law enforcement capacity, including during protests and demonstrations, to ensure journalists' safety and to investigate attacks on journalists

3000 character(s) maximum

There is some communication with journalists and the police regarding protests and demonstrations, however since the problem of the safety of journalists during these events has not been a big one, this dialogue is irregular at the moment. It needs to be said, however, that during the so-called Convoy demonstrations in February 2022 several journalists were harassed. The criminal code amendment mentioned in the previous report has not yet been in use when it comes to journalists.

Access to information and public documents (incl. transparency authorities where they exist, procedures, costs/fees, timeframes, administrative/judicial review of decisions, execution of decisions by public authorities, possible obstacles related to the classification of information)

3000 character(s) maximum

The Government Openness Act is still under review. In practice the journalists are often obliged to file complaints to administrative courts about non-disclosure of public documents. This makes the processes long and costly for journalists.

Lawsuits (incl. SLAPPs - strategic lawsuits against public participation) and convictions against journalists (incl. defamation cases) and measures taken to safeguard against manifestly unfounded and abusive lawsuits

3000 character(s) maximum

There are few SLAPP cases in Finland. The Johanna Vehkoo defamation case mentioned in the 2022 report lead to supreme court overturning the defamation verdict, which is an important legal precedent in Finland.

Other - please specify

3000 character(s) maximum

IV. Other institutional issues related to checks and balances
