Commission

AN ENHANCED **INVEST EU** **PROGRAMME** AND **NEW STRATEGIC** **INVESTMENT FACILITY** TO HELP KICK-START THE ECONOMY

#EUSolidarity #StrongerTogether

The EU needs to strengthen the resilience and the autonomy of its strategic sectors if it wants to achieve a sustainable recovery from the coronavirus pandemic and ensure the long-term competitiveness of its economy.

The enhanced InvestEU programme will provide crucial support to companies in the recovery phase and to support the EU in its long-term green and digital transition.

WHAT ARE THE MAIN CHANGES IN THE PROPOSAL?

The new proposal increases both the size and the scope of InvestEU, thanks to two key changes:

- ▶ **Financial firepower:** a boost to respond to the higher investment needs
- ▶ **New strategic European investment window** to address the future needs of the European economy and to ensure its strategic autonomy in key sectors

WHAT WILL THE NEW STRATEGIC EUROPEAN INVESTMENTS WINDOW FINANCE?

-  Building stronger value chains within the EU
-  Supporting critical infrastructure
-  Developing nascent technologies
-  Supporting new ecosystems of entrepreneurs
-  Cross-border strategic projects
