Subject: Suggestion from the Slovak Republic

Dear Sir/Madam,
This website is not working properly.

<https://ec.europa.eu/eusurvey/runner/ruleoflawreportstakeholderconsultation2021>

I am sending you my suggestion by e-mail:

I. Justice System A. Independence: appointment on order, allocation of cases in courts according to „correct“ judges to get the „correct“ results, independence of services not provided (judges can be punished for their decisions and many of them are criminalised) B. Quality of justice: Less and less courts, court fees high to be paid in advance, digital technology far from real usage (the simple Extract from the Commercial Registry you need to go to Post Office or to Court, not available online) C. Efficiency: Length of proceeding is abnormally long running from one court to another (from county to district, to country) and back without clear decision, people have been sitting in prison for one year without any court decision. Impossible for an individual to act in the cases against humanity and personal freedom. Or in cases of non-legal acts.

II. Anti-corruption framework: too many people are trying to manipulate the judge, cases in media with judgments before the real case starts at the Court, information is manipulated, presumption of innocence is not known in this country. Cases are politicized.

III. Media pluralism: In this country not journalist, but the judge has to be protected to stay independent and safe!

IV. Other issues: A. The process: without a good lawyer no chance to apply. NHRIs seem not to exist in Slovakia, ombudsman is sleeping somewhere. Our human rights are systematically violated, we have to pay big penalties for not wearing dangerous face masks based on some nullity decree by some officer from Health Office, we can go nowhere without paper from useless test, we live in the emergency based on nothing, just decision of few government people and we can do NOTHING as individuals. The Constitutional Court is doing NOTHING to protect the human rights, General Prosecutor is doing NOTHING. This IS NOT the democracy!

Yours faithfully
