## **ANNEX 1: IMPLEMENTATION OF COUNTRY-SPECIFIC RECOMMENDATIONS**

### Country-specific recommendation No.1: Financial stability

"Reinforce the budgetary measures for 2014 in the light of the emerging gap relative to the Stability and Growth Pact requirements, namely the debt reduction rule, based on the Commission 2014 spring forecast. In 2015, and thereafter significantly strengthen the budgetary strategy to ensure reaching the medium-term objective and compliance with the debt reduction requirements in order to keep the general government debt ratio on a sustained downward path. Ensure the binding nature of the medium-term budgetary framework through systematic ex-post monitoring of compliance with numerical fiscal rules and the use of corrective mechanisms. Improve the transparency of public finances, including through broadening the mandatory remit of the Fiscal Council, by requiring the preparation of regular macro-fiscal forecasts and budgetary impact assessments of major policy proposals."

Numbe r	Description of measure	Brief introduction of measure	Status of implementation	Further schedule of implementation - next 12 months	The relation of the implementation to any other CSR or Europe 2020 target	Resources of measure	Budgetary effect	European Union funds available for the implementation of the measure (where relevant)	Consistence with the programming period 2014-2020 (OP, description of the construction)	Description of expected effects
1.	Providing a sustainable and stable budgetary status	The government ordered to freeze HUF 110bn in the central budget in July 2014 in order to maintain the deficit target. Due to the economic growth in 2014 being faster than expected by both the government and the European Commission, the government in November and December released HUF 60bn.	in July 2014. Altogether HUF 60bn was released by the government in November and December							The growth of the Hungarian economy and the reduction of general government debt to a sustainable level.

2. Planning General government shall be reduced The budget deficit The central budget balances by the Fundamental Law and the Act wise in line with use in line with the act of 2015 is planning as well. Complying CVCV of 2010 no Economic Stability of Hungary (Est.). Moreover, Council as well. Set with the MTD requirements for budgetary as well. Complying with the det Directive 2011/35/LU (Directive) on requirements for budgetary transvorks of the Member Strate was a functioned by the fundamental Law and the transvork of the Member Strate was a functioned by which fulfit the end of December 2013. ## Country-specific recommendation No.2: Financial sector

"Help restore normal lending flows to the economy, inter alia by improving the design of and reducing the burden of taxes imposed on financial institutions. Adjust the financial transaction duty in order to avoid diverting savings from the banking sector and enhance incentives for using electronic payments. Investigate and remove obstacles to portfolio cleaning inter alia by tightening provisioning rules for restructured loans, removing obstacles to collateral foreclosure as well as increasing the speed and efficiency of insolvency proceedings. In this respect, closely consult stakeholders on new policy initiatives and ensure that these are well-targeted and do not increase moral hazard for borrowers. Further enhance financial regulation and supervision.".

Numbe r	Description of measure	Brief introduction of measure	Status of implementation	Further schedule of implementation - next 12 months	The relation of the implementation to any other CSR or Europe 2020 target	Resources of measure	Budgetary effect	European Union funds available for the implementation of the measure (where relevant)	Consistence with the programming period 2014-2020 (OP, description of the construction)	Description of expected effects
------------	---------------------------	-------------------------------	-----------------------------	---	--	-------------------------	------------------	--	--	---------------------------------

Increased credibility, transparency and efficiency of the budgetary framework.

4.	Decreasing bank levy to boost lending	According to the Memorandum of Understanding between the Government of Hungary and the EBRD, the banking tax will be calculated based on banks' balance sheets as of the end of 2014, with the current percentage applied being reduced from 53 bps to 31 bps from the beginning of 2016 and to 21 bps from the beginning of 2017. As a result of the measure the tax burden on the sector is expected to decrease by about HUF 60bn in 2016 and by further HUF 22bn from 2017. From 2019 the level of the banking tax will be further aligned with the prevailing European Union norms. The reduction of the banking tax significantly contributes to ensuring the profitability of the banking system. Therefore, the capital position of banks may improve, which may be an impetus for credit supply. However, sufficient demand is also needed for the recovery of bank lending. In line with the amendment of the legislation approved in November 2014, the transaction tax of the electronic payments was modified as of 1 <sup>st</sup> January 2015 so that only a lump-sum tax shall be paid annually on card transactions of the same card. The amount of tax has been distinguished between modern,	of Understanding between the Government and the EBRD about reducing the bank levy was signed in February 2015.	The Government of Hungary will take the necessary steps for developing and proposing appropriate legislation to its legislative body by June 2015.	As a result of the measure, revenue from the bank levy is expected to decrease by about HUF 60bn in 2016 and by further HUF 22bn in 2017. From 2019 some further decrease in revenue can be anticipated.	
		contactless cards (e.g. PayPass), with a lower charge (HUF 500), and traditional cards (HUF 800).				
6.	Facilitating the improvement of retail loan portfolio: active operation of the National Asset Management Ltd. (NET), settlement of retail loans, conversion of FX loans into forint Eacilitating the	In case of the retail loan portfolio the recent settlement and conversion of FX loans may contribute to better portfolio quality via decreasing debt and lending interest rates, hence eliminating exchange rate risk. Besides, the National Asset Management Ltd. (NET) plays an active role in reducing NPL rate for households (NPL rate).	has been in effect since 15 <sup>th</sup> October 2014. The FX-Forint Conversion Act has been in effect since 1 <sup>st</sup> February 2015. The "Fair Banking" Act has been in effect since 1 <sup>st</sup> February 2015.	Retail loans related settlement and forint conversion are going to be conducted until the summer of 2015. NET's purchase target of 25,000 real estates is expected to be achieved by the end of 2015.		
7.	Facilitating the improvement of corporate loan portfolio	MARK Hungarian Restructuring and Debt Management Ltd. (MARK) established by the MNB in November 2014, is going to target commercial real estate exposure with the aim of reaching a significant drop in corporate NPL	Restructuring and Debt Management Ltd. (MARK) was established in			

The reduction of the banking tax significantly contributes to ensuring the profitability of the banking system. Therefore, the capital position of banks may improve, which may be an impetus for credit supply.
Due to the measure, the cost of card payment has decreased (with the payment of lump-sum tax,, the marginal tax rate of card payment is 0%), therefore a faster increase in electronic payment can be expected.
The quality of retail loan portfolio improves.
Significant decrease of the corporate NPL rate.

### Country-specific recommendation No.3: Taxation

"Ensure a stable, more balanced and streamlined tax system for companies, including by phasing out distortive sector-specific taxes. Reduce the tax wedge for low-income earners, inter alia by improving the efficiency of environmental taxes. Step up measures to improve tax compliance — in particular to reduce VAT fraud — and reduce its overall costs.".

Routine use of EÉR means to ease the administrative burden, the review of auctioned assets and the comparison of prices. Under the liquidation process, such assets are sold at a reasonable price that serve as a beneficial purchasing opportunity for production and service companies, which indirectly has an impact on businesses to stimulate and support them, and also to promote investment and maintain jobs. The anonymity of the application/bidding is expected to increase the price of assets, and may lead to higher return ratio of creditor claims.
The resistence of the Hungarian financial sector increases.

11.	Family							1
	contribution							1
	allowances							

Within the framework of the Job Protection Act, in the cases of the most disadvantaged employees from a labour market perspective (workers under 25 years and over 55 years, people with jobs requiring no qualification, longterm unemployed , employees returning after childcare leave) full or 50% allowance on ) full or 50% relief on public imposition related to employment is provided for the employers (27% from the social contribution tax and 1.5% from the vocational contribution), which are applicable to monthly gross income not exceeding HUF 100.000. The reliefs have general force, they do not depend on the employer's size or scope of activity.

	a) Broad ening the scope of peopl e entitl ed to family contri butio n allow ance, increa sing its amou nt	The scope of people entitled to family contribution allowance was further broadened from 1 <sup>st</sup> January 2015. As a result, the spouse not entitled to the child benefit of a private person entitled to child benefit is entitled to the allowance, (the spouse of the foster parent or legal guardian may also be entitled). From 2016 the amount of family contribution allowance will gradually increase for parents with two children so that it doubles by 2019.	Family contribution allowance came into effect at the beginning of 2014. If private people cannot use the total amount of family tax benefit possible because their tax base is not large enough, they may deduct the allowance not applicable through personal income tax from their contributions (pension contribution, health care contribution). The scope of people entitled to family contribution allowances was broadened as of 1 <sup>st</sup> January 2015.	According to plans, from 2016 the amount of family contribution allowance will double for parents with two children between 2016- 2019, which will affect about 300,000 families		As a result of the planned increase of the allowance, the amount of benefits for families with children will increase by HUF 200bn in five years.	
	b) Introd ucing first marri age tax allow ance	From 2015, newly-wed couples – if it is the first marriage for at least one of the parties – may claim first marriage tax allowance for two years, which means the possibility to decrease the tax base (it is half the amount of the family allowance upon one child).	From 2015 newly wed couples may claim first marriage tax allowance for two years.			HUF 1bn in 2015, HUF 3bn in 2016, HUF 4.5bn from 2017	
12.	Reduction of personal income tax	Reduction of personal income tax by 1 percentage points (from 16% to 15%) from 2016		The reduction is expected to carried out in 2016.			
13.	Expanding the range of products under environmental and public health taxes	product fee is imposed on some further new products (other plastic products such as artificial flowers, and other products of the chemical		Measures came into effect on 1 <sup>st</sup> January 2015.		As revenue HUF 16bn.	

As a result, the spouse (not entitled to child benefit) of a private person entitled to child benefit became also entitled to the allowance, (the spouse of the foster parent or legal guardian may also be entitled).
From 2016 the amount of family contribution allowance will gradually increase for parents with two children so that it doubles by 2019.
From 2015 newly-wed couples – if it is the first marriage for at least one of the parties – may claim first marriage tax allowance for two years, which means the possibility to decrease the tax base (it is half the amount of the family allowance upon one child).
Cause more dynamic rise of net wages and more restricted rise of gross wages.
From 2015 the environmental product fee is imposed on some further new products (other plastic products such as artificial flowers, and other products of the chemical industry such as detergents, shower gels; office paper; and also on electrical and electronic equipment that are not involved in the current regulation such as industrial size equipment).

14. VAT "whitening" measures						
a) Expanding the use of online cash registers	From 2015, the use of online cash registers is expanded to the majority of the service sector. According to plans, it is going to be expanded to other service sectors – hairdressing, beauty care, improving physical condition, medical, other human health care, animal health care, market trade, physical training, other entertainment, sport facility operation, restaurant, other personal services, photography.	register system was operating in 2013,	From 2015 the use of online cash registers is expanded to the majority of the service sector.	VAT revenue in ESA terms is estimated to have grown by 11.8% (HUF 318bn) in 2014 compared to the previous year		As a result, around 184,000 online cash registers operated at the end of 2014.
b) Establishin g the Electronic Public Road Trade Control System (EKÁER <b>)</b>	The Government introduced the Electronic Public Road Trade Control System (EKÁER). Transport- related data (name and quantity of goods, consignee, consignor, registration number of vehicle, etc.) has to be entered in a central electronic system before transport starts, thus transport-related VAT fraud becomes almost impossible after the introduction of the system.	EKÁER introduced from 2015 finished		HUF 60bn VAT revenue surplus	Modifications in the detailed regulation head to simplification and the reduction of the administrative burden. The new regulations bring change in people with data submission obligation, and also in the type of data beyond expanding exemptions.	Control function of the tax authority becomes more efficient, which reduces the black market. The effects due to their escalation can be seen on other types of taxes, besides increased VAT revenue. Between 20 <sup>th</sup> December and 4th March 2015 around 37,000 taxpayer and 4,900 transporters registered on EKÁER.
was decreased to 5% on	VAT rate applicable to the sale of other big-bodied live animals (cattle, sheep, goat) and animal carcass classified as intermediary products was decreased to 5%.				The measure promotes reduction of VAT fraud.	Reduced VAT fraud.
d) Expanding cases of reverse VAT	Reverse VAT can be applied for certain steel industry products, and hired workforce services of construction services without mandatory building authority permit. The latter eases administration, thus taxable persons do not need to examine if they hire workforce for work subject to permit.	into effect on 1 <sup>st</sup>		Due to the nature of reverse VAT, there is a small- scale loss in the year of the introduction, which may be compensated by reduced VAT fraud.	The measure promotes reduction of VAT fraud.	Reduced VAT fraud.

## **Country-specific recommendation No.4: Employment**

"Strengthen well-targeted active labour market policy measures, inter alia by accelerating the introduction of the client profiling system of the Public Employment Service. Put in place the planned youth mentoring network and coordinate it with education institutions and local stakeholders to increase outreach. Review the public works scheme to evaluate its effectiveness in helping people find subsequent employment and further strengthen its activation elements. Consider increasing the period of eligibility for unemployment benefits, taking into account the average time required to find new employment and link to activation measures. Improve the adequacy and coverage of social assistance while strengthening the link to activation. In order to alleviate poverty, implement streamlined and integrated policy measures to reduce poverty significantly, particularly among children and Roma."

Numbe r	Description of measure	Brief introduction of measure	Status of implementation	Further schedule of implementation - next 12 months	The relation of the implementation to any other CSR or Europe 2020 target	Resources of measure	Budgetary effect	European Union funds available for the implementation of the measure (where relevant)	Consistence with the programming period 2014-2020 (OP, description of the construction)	Description of expected effects
15.	Measures improving the targeting of public work and strengthening its activation elements									
	a) Increasing T the share in of people w receiving p employme re nt b substitutio in n benefit d in public re work m programm re	The measure contributes to mproving the targeting of public vork by increasing the participantion rate of people eceiving employment substitution benefit. Due to their reintegration into the labour market, the most leprived, inactive groups receive egular labour income. The neasure corresponds to the eform of the social benefit system tarting in 2015.		From July 2015	Raising the employment rate (Eu2020-1) Fighting poverty (Eu2020-5)	With the provision of 6- month, long- term public work support HUF 20.7bn				The measure helps the reintegration of those furthest from the labour market by increasing economic activity, involving the long-term unemployed in employment, and also by strengthening the role of activation elements. The importance of employment and social policy is expected to change, and the income structure of the target group is to be transformed; these reduce the risk of poverty. Related measures need to be gradual.

c)	the open labour market Trainings and services	development, promote reintegration into the open labour market (Act IV of 1991, Act CVI of 2011, and Gov. Decree of 2010 (XII. 31.). The person in public work: (1) is obliged to accept the job offered on the primary labour market. Its conditions are a unified register, and the development of mediation activity of the branch offices. (2) is exempt from work obligation for the time of the job interview; (3) for people under 25 public work does not account for a suitable job offer (see Youth Guarantee). The amendment of Gov. Decree of 375/2010 (XII. 31.) promotes the strengthening of self-sustainability of social cooperatives, upon which local governments provide financing for cooperatives based on the number of employees in the sample programmes. Training possibilities are offered for the low-skilled, for those without qualification, or with an out-dated	came into effect as of 1 <sup>st</sup> January 2015. Improved access of working-age population, especially the low- skilled to formal training opportunities improving labour market competencies. Scheme: training of the low-skilled and those in public work (EDIOP 6.1.1); training programme of HDOP targeting the Roma and people with disabilities (development of basic competencies, catch-up training programmes).	learning to acquire relevant sk required by the labour market is key tool to tackle unemployme poverty and social exclusion. Around 170,000 people in put work will have been involved
	Public work of the homeless	The measure facilitates the integration of the homeless, with the countrywide expansion of the previous pilot programme. The comprehensive programme complements employment with mentor service based on constant presence, accredited lifestyle training and healthcare service.		From March-April 2015	Raising employment (Eu2020-1) Fighting po (Eu2020-5)		Budget: HUF 1bn from Public Work Start budget (for 700 people, depending on the number of people taken by public employers).				Labour market, social and mer situation of homeless job seek involved in public work improve which may facilitate employm on the open labour market. Some other services may necessary due to the specialities the target group (e.g. was clothing, permanent medical cas hot meals etc.).

16.	Measures promoting youth employment									
	a) Youth Guarantee - active labour market programm e (EDIOP 5.2.1)	The system of Youth Guarantee is gradually introduced in Hungary, based on the previously gained experience from programmes aiming at the youth. "Youth Guarantee, active labour market programme" (EDIOP 5.2.1 and CCHOP 8.2.1), which promotes labour market integration of the youth and is implemented by the public employment service, serves as the first step of the introduction. Part of the programme aims at establishing a country-wide mentor-coordinator network (within the public employment service), while also training and employment support programmes, apprenticeship programmes and programmes to support the youth to become entrepreneurs are to be established. Youth Guarantee also improves cooperation between employment, educational, social policies and organisations.	Preparation started in 2014. EDIOP 5.2.1 under implementation, CCHOP 8.2.1 under planning.	The implementation of the first active labour market programme (EDIOP) is between January 2015 and December 2017, further programmes to succeed.	employment rat (Eu2020-1) CSR6		the programme is covered by the NEF budget	CCHOP 8.2.1 (ESF)	Priority No.5 of EDIOP investment priority No.2, as well as priority No.8 of CCHOP investment priority No.2.	
	b) Supporting youth entrepren eurship	scheme, the programme primarily aims to provide support for young job seekers to become entrepreneurs. In the first phase of the programme, young people	phase was	Call for the second phase is planned for December 2015, planned to finish in 2017 (with maintenance until 2019).	-	e HUF 4bn (first e phase: HUF 1.1bn, second phase: HUF 2.9bn)		EDIOP 5.2.2 (EDIOP- 5.2.2-14 Supporting youth entrepreneurship) EDIOP 5.2.3 (ESF).	Priority No.5 of EDIOP Employment; Investment priority No.2: Sustainable integration of the youth into the labour market; EDIOP 5.2.2 Supporting youth entrepreneurship and EDIOP 5.2.3 Supporting the costs of starting a business	

	c) Apprentice ship programm e for supporting career starters	The aim of the apprenticeship program is to support the projects of micro, small and medium-sized enterprises if they employ career starters with secondary qualification under the age of 25, who received their first qualification in full-time education. The programme supports the establishment of conditions for practical training by compensating for the extra costs of apprentices' employment and training (wages of apprentices, fees of mentors, equipment necessary for the work station of the apprentice).	none	Call for application is planned for September 2015, implementation of supported programmes is planned to finish in December 2017.	Raising employment (Eu2020-1)	the rate		EDIOP 5.2.4 (ESF)	Priority No.5 of EDIOP Employment; Investment priority No.2: Sustainable integration of the youth into the labour market; EDIOP 5.2.4 Apprenticeship programme for supporting career starters.	As a result of the programme, participation of young people in apprenticeship programmes increases, their qualification and professional practical knowledge improves and they gain work experience. Therefore, their labour market possibilities and employment improve. The apprenticeship programme builds a direct relationship between dual vocational training and the labour market.
17.	Active labour market programme for the disadvantaged	The measure aims to promote the employment of disadvantaged people on the open labour market by providing tailor made, personalised tools (e.g. targeted labour market trainings, labour market services, temporary wage		SROP 1.1.2: until October 2015 EDIOP 5.1.1: Implementation of the three-year long measure is expected to start in the first half of 2015.	employment (Eu2020-1),		The budget of SROP 1.1.2 was increased by HUF 5.4bn. Planned resources forEDIOP 5.1.1: HUF 102bn.	EDIOP 5.1.1 (ESF)	The mirror project of the measure in CHR is implemented under priority No.8 of CCHOP.	The measure contributes to reducing the number of unemployed and registered job seekers, and broadening employment on the open labour market.
18.	Country-wide implementatio n and operation of job seekers' profiling system	Prior to the measure, a profiling system recording the characteristics of the job seeker (motivation level, labour market situation, other features) was set up. After its countrywide introduction, each (new) client using the services of the public employment service is has an individual action plan (defining the most efficient labour market services and supporting tools) drawn up. By 30th June 2015 the training of the new client development model methodology will have been held for the branch office administrators (methodological training of 280 people, altogether 740, which adds up to 70% of the profiling staff); the new client development model (including profiling) will have been tested in a pilot (analysing results, fine-tuning methodology); the IT system (EIFA) supporting the operation of the profiling system will have been developed.	740 people, which is 70% of the profiling staff, pilot programme, development of the supporting IT system (EIFA): until	Countrywide introduction: on- going from 1 <sup>st</sup> January 2016.	Raising employment (Eu2020-1)		SROP 1.3.1-12/1- 2012-0001 project	SROP 1.3.1-12/1-2012- 0001 (ESF)	SROP 1.3.1	The measure helps achieve the objectives regarding youth unemployment and public work. Services and support tailored to individual needs and the labour market situation are provided, therefore their labour market and employment opportunities improve. The system facilitates more efficient use of services and support tools, more efficient targeting of the public work programme. Sufficient number of experts who are able to use the profiling system efficiently, constant provision of professional and IT background, fine-tuning of the system if necessary are needed to introduce the system uniformly countrywide.

19.	Introduction of the Hungarian Qualification Framework (HQF)	The inter-ministerial Professional Workgroup has accepted the HQF, HQF levels are to be fixed in a Government decree, and the official documents recording results are to contain the levels.	none	Coming into effect in 2015	CSR6, Raising the employment rate (Eu2020-1)	none	none	none	none	The education and training system becomes more transparent and interoperable, it promotes life- long learning. The dynamics of the labour market is expected to improve; dual training to be strengthened, transition between different stages of education to be facilitated. An ex ante condition gets completed.
20.	Measures promoting life- long learning									
	a) Reducing the digital gap	The measure aims to develop digital competency of disadvantaged adults as a key labour market competency ( targeted adult training labour market program, disadvantaged target group capable of work, encouraging the use of the internet and e-administration).	none	The announcement is planned for spring 2015, implementation is planned to finish in December 2017.	Raising the employment rate (Eu2020-1), CSR6	Estimated resource need: HUF 8.95bn (announcement in 2015).		EDIOP 6.1.2 (ESF)	Priority No.6 of EDIOP: Competitive Workforce; Investment Priority No.1.	Digital illiteracy of disadvantaged citizens decreases .
	b) Improving foreign language skills	The programme aims at the (disadvantaged) adult population to improve their foreign language skills (reach a level of A1-A2 at least.)	none	The announcement is planned for spring 2015, implementation is planned to finish in December 2017.	Raising the employment rate (Eu2020-1), CSR6	Planned resources: HUF 4bn (announcement in 2015).		EDIOP 6.1.3 (ESF)	Priority No.6 of EDIOP: Competitive workforce; Investment priority No.1: Improving the accessability of life-long learning opportunities. EDIOP 6.1.3 Improving foreign language skills	Number of people with no or poor foreign language skills decreases in the target group.
	Programm e of Internatio nal Assessmen t of Adult Competen cies	PIACC (Programme of International Assessment of Adult Competencies) of OECD is a data collecting and analysing programme that focuses on the competencies of the adult population (aged 16-64), and assessing their labour market and social situation regularly. The survey concentrates on employee competencies at work (assessing knowledge, acquiring skills, new challenges of the knowledge-based society; development of basic competencies).	none	The announcement is planned for spring 2015, implementation of the supported project is planned to finish in December 2020.	Raising the employment rate (EU2020-1), CSR6	Planned resources: HUF 1.1bn (out of which HUF 0.302bn CHR)		EDIOP 6.2.1 (ESF) CCHOP 8	-	The survey enables better foundation and targeting of training-related (labour market) measures. Databases based on PIAAC survey are public, significant conclusions can be drawn upon the analyses based on them on education policy (especially adult training) and employment policy.

		jurisdiction.								

The number of people earning their living by public work or employment instead of HUF 22,800 employment substitution benefit increases further in 2015. Benefit-related tasks of the state and local governments will be separated, jurisdictions become uniform countrywide. The range of mandatory allowances according to the social act will be modified. Flexibility of the local governments in determining allowances provided by them will grow (mandatory: settlement allowance.) Regular social benefit to working-age people will be replaced by health damage and childcare allowance.

"Stabilise the regulatory framework, and in order to enhance market competition, firstly eliminate obstacles in the service sector. Take more efficient steps to enhance competition on the public procurement market and make them more transparent through the application of electronic public procurement to a greater extent; furthermore, tackle corruption and reduce the overall administrative burden."

	1	1		,				
	1							
	1							
L	1			1		1	1	

The number of the group of which the qualification is proposed to be abolished can be estimated between 10 and 15 thousand. Presuming a 5% annual growth in number, about 500-700 people are exempt from the requirement for the qualification subject to the position they want to fill. Supposing an average of HUF 200,000 training cost it results in a saving of about HUF 100 -150 million directly for the enterprises. The irritation decreasing effect of the qualification requirements, which were proposed to be repealed in order to increase the transparency of the legal environment, is added to the above.
Renewing civil procedure involves comprehensive advantages by settling disputes faster and more efficiently.
Due to the measure, court proceedings become faster and more up-to-date, communication with clients becomes faster and more efficient.

	d) More efficient return of creditor claims and public depts	From 2015 a central electronic online sales system was introduced in winding-up procedures. The Ministry of National Development carried out the development of the electronic sales system within the framework of a state investment, the system is also run by the ministry.	The audited sales system was established at the beginning of January, 2015.	The aim of the amendment is to supervise the requirements set by the legislation regarding insolvency experts involved in the work of the court in liquidation and winding-up procedures, and also to increase their professional level.		
	e) Insolvency experts	Stricter control and reporting system of insolvency experts have been set up. Their mandatory internal audit and regular professional further training in the fields of law, finance and economics have been introduced. The latter ensures increased professional level and information about changes and jurisprudence of legal and financial regulators.	Amendment to the Act XLIX of 1991 on Liquidation and Winding-up Procedures came into effect on 1 <sup>st</sup> January 2015.			
23.	Strengthening market competition through public procurement					

	The advantages of online sales are already visible: fiercer price competition, higher revenue from sales, which can be divided among the creditors, hence higher return rate, and lower loss in winding-up procedures. The online sales system shortens the duration of selling assets in winding-up procedures, this way promotes their faster completion. Due to the audited IT system, opportunities for abuse have been eliminated during winding-up sales, sales process has become more transparent and controllable.
	Due to the measure, court procedures become faster and more up-to-date, communication with clients becomes faster and more efficient.

 •		•	•	•	•	•	•	•

	As a result of the measures, transparency improves, market competition is enhanced, corruption decreases.

b) Promoting smooth procedure	In public procurement procedures the possibility of so-called "self-cleaning" makes the competition smooth. It means that enterprises which are subject to exclusion may prove that their measures sufficiently justify their reliability despite the relevant grounds for exclusion. According to Section (7) 92. § of the Public Procurement Act, the final tenders shall be submitted concurrently in writing in case of competitive procedures with negotiation, this way excluding the possibility of abuse on the negotiation earlier arisen regarding the tender. Section (8) 67. § of the Public Procurement Act offers the possibility of error correction of the itemized schedule of works and costs (detailed budget) in the case of fixed sum construction works, which prevents the exclusion of tender in case of a large-scale construction investment because one single item (e.g. a tap) is not priced in the itemized schedule of works and costs (detailed budget).	The concept of transposing the new public procurement directives was finalised by autumn 2014, which contains the draft of "self-cleaning". The regulations of the public procurement act for written and concurrent submission of tenders in competitive procedures with negotiation have been in effect since 15 <sup>th</sup> March 2014. The regulations of the public procurement act for mistake correction have been in effect since 15 <sup>th</sup> March 2014.	The preparation of the new public procurement act is in progress. The new act is expected to come into effect by the end of 2015. The concept of "self-cleaning" will be included in the bill.	The measures aim to improve transparency of the procedures significantly and enhance market competition. Moreover, they also establish a legal framework promoting transparency and enhanced market competition by transposing EU directives; they promote adequate application of legislations.	The measures indirectly contribute to spending public funds more efficiently.
c) Increasing transpare ncy	Practical guidelines by the Prime Minister's Office are to be published in order to increase transparency, which ensure the adequate application of public procurement regulations in effect while using EU funds. The content of the guidelines will be finalised after consultation with the European Commission. Besides, a summary regarding quality and regularity control and orderliness is prepared for the experts controlling public procurement procedures; therefore transparency and the enforceability of effective competition principles improve. The Public Procurement Authority has been operating a Public Procurement Database since 1 July 2013. Thus the public procurement plans, contracts and data on contract performance are available in one place, so that it is easy to find. The Public Procurement Database provides the better monitoring of the publication obligation as well. The amendment increases the transparency of public procurements. The database is available for anybody without any limitation: it is free and no registration is required. The database is available on the following link: http://kba.kozbeszerzes.hu/apex/f?p=103:35:1119322936065 <u>33</u> The Public Procurement Authority prepares and publishes guidelines on its website to promote law application, available here: http://www.kozbeszerzes.hu/jogi-hatter/a-hatosag- utmutatoi/ The guideline on amending and complying with public contracts is being prepared currently, which may also promote the enforceability of the transparency principle by elaborating on related regulations. Joint resolutions of the organisations playing an important role in public procurement legislation (PPA-DGAEF-PMO earlier MND legislation, currently PMO) have been published on the website of the Public Procurement Authority, which promote uniform interpretation of law in domestic public procurement. They are available here: http://www.kozbeszerzes.hu/jogi-hatter/kozos-allaspontok/	The Public Procurement Database has been operating since 1 July 2013. On the website of the Public Procurement Authority 19 different guidelines are available that help law application. The website of the Public Procurement Authority includes joint resolutions of the organisations involved in 12 topics.	and summary by the Prime Minister's Office are expected to be prepared in the first half of 2015. The operation of the Public Procurement Database is continuous. New guidelines are	The measures aim to improve the transparency of the procedures significantly and enhance market competition. Moreover, they also establish a legal framework promoting transparency and enhanced market competition by transposing EU directives; they promote adequate application of legislations.	The measures indirectly contribute to spending public funds more efficiently.

	As a result of the measures, transparency improves, market competition is enhanced and corruption decreases.

	decreases.

24.	Anti- corruption measures a) Managing corruption risks	The positions and types of positions which are increasingly prone to corruption risks will be mapped at the state administrative bodies In order to harmonize the internal control system of the state administrative bodies under the governance of the Government and the internal measures preventing corruption the relevant laws are going to be reviewed. The internal regulations of the ministries and the state administrative bodies under their governance or supervision will be reviewed in terms of corruption risks. Using the audit experieces of the State Audit Office, controls of preventing corruption in the course of the enforcement of thecorruption controls will be evaluated in the annual reports on control activities. A regulation is going to be developed which provides that the body vested with governance and supervisory rights is to review the decisions on administrative cases not affected by legal remedy, within the the scope of the city/town clerk in which there is no other party. In the course of reviewing the legislation on conflict of interest the relevan laws will be reviewed in order to expand the employer's rights related to the report and control of the conflict of interest.		The budget of the training of the integrity consultants for the first two years was provided by the ROP 1.1.21 entitled "The prevention of corruption and the review of public administration development".	The organisational management of corruption risks is supported by the review of the internal regulations and the control activities complemented by corruption prevention. The mapping of the groups of positionss particularly affected by corruption helps optimizing the control activity, and contributes to the better understanding of risks.
	b) Expanding the Integrity Survey	The organisations of the pubic sector participate in the Integrity Survey of the State Audit Office, and the Integrity Survey is going to be extended to the companies in state ownership.	The first pilot survey is going to be carried out by the end of 2015. The survey will continue at least for three years.		By expanding the Integrity Survey the efficiency of the survey of corruption risks will increase.

# Nr.6 Country specific recommendation: Education

"Implement a national strategy on early school leaving prevention with a focus on drop-outs from vocational education and training. Put in place a systematic approach to promote inclusive mainstream education for disadvantaged groups, particularly the Roma. Support the transition between different stages of education and towards towards the labour market, closely monitor the implementation of the vocational education reform. Implement a higher education reform that enables greater tertiary attainment, particularly by disadvantaged students"

	a) Arany János programmes (Arany János Talent Fostering Programme,	The key aim of the programmes is to prevent dropout by providing complex – pedagogical, social, cultural and health care – tailored development. More than 4000 students take part in the three programmes in 2015. In 2015 within the framework of the cooperation between the Arany János Fostering Boarding Facility Programme and the higher education college for advanced studies career orientation activities are implemented which aim to strengthen further studies in higher education. The	programmes is ongoing	The implementation of the programmes is ongoing	Reducing the share of early school leavers (EU2020-4) Fighting poverty (EU2020-5)				Rate of dropout below the national average, rate of studying further above the average, dissemination of pedagogic- methodological development

	measure is connected to the Youth Guarantee.							
b) Pedagogical System for Integration (PSI)	for disadvantaged students such as individual development and participating in disadvantage compensating programmes, which directly contribute to their school success. Areas supported by the measure: cooperative education, institution development pedagogical renewal, tailor- made learning support, cooperation with the social environment of the school and keeping contact with the parents.	institutions participated in the PSI programme, with 75779 students and 25260 kindergartners.	Deadline: May 2015	Reducing the share of early school leavers (EU2020-4) Fighting poverty (EU2020-5)	regions: HUF 4.2 bn Central Hungarian Region: HUF 0.1 bn	Convergence regions: HUF 4.2 bn Central Hungarian Region: HUF 0.1 bn	3. Growing knowledge capital Thematic objective: 10. Investment priority: 10.ii Objective: B. Measure: 3.3. CCHOP	In the 2013/2014 schoolyear, 1788 public education institutions participated in the PSI programme, with 75779 students and 25260 preschool children. The impact assessment on the PSI shows that the programme has resulted in a general improvement in the development of the participating students. Through the PSI programme the integration of the participating students is increasing; the competencies of the disadvantaged children/students have been improving; the transition from kindergarten to school becomes easier; the pedagogical culture of the institutions implementing the programme renews; communication is created between the public institutions implementing the programme, and with other sectors and the parents of the children or students concerned.
c) Scholarship and support for mentoring for disadvantaged students "Útravaló" Scholarship Programme	aims to promote the primary school success of the disadvantaged students, to decrease their dropout, to prepare them for studying in a secondary school providing a school leaving exam, and for the successful completion of secondary	In the 2013/2014 school year more than 14000 children and students obtained scholarship and mentor service in the programme. Their progress was helped by 7600 mentor teachers. In the 2014/2015 school year altogether 12679 pupils/students have obtained support so far, 6522 mentors participate in the programme. # **Nr.7** Country specific recommendation: Energy and transport

"Review the impact of energy price regulation on incentives to invest and on competition in the electricity and gas markets. Take further steps to ensure the autonomy of the national regulator in establishing network tariffs and conditions. Take measures to increase energy efficiency in particular in the residential sector. Further increase the sustainability of the transport system, inter alia by reducing operating costs and reviewing the tariff system of state owned enterprises in the transport sector.""

	1						I	1

The increase of energy efficiency significantly contributes to the decrease of GGE emission, thus it has a key role in achieving the environmental and climate protection objectives. Additionally, increasing energy efficiency is one of the most effective and energy saving methods of decreasing our energy dependence, thus contributing to the increase of the security of supply.
The non-refundable support makes it possible for condominiums to start energy efficient investments with subsidy. The energy usage of households is further decreasing, thus the energy dependence is decreasing, which contributes to the implementation of the climate policy commitments at the same time.

43. Transposing the Directive 2012/27/EU on "energy efficiency" 44. Reorganisation	The transposition of the Directive 2012/27/EU – the new Energy Efficiency Directive – into national law is in progress, through which the increase of energy efficiency may get new impetus. The transposition of the Directive regarding the energy sector to be regulated needs a multi-tiered law- making activity. The amendment of the sectoral acts and the laws on their execution provides the appropriation of the effective regulation to the EU criteria. The new energy efficiency act extending beyond the frameworks of certain sectoral acts was crucial to be created due to the single energy efficiency rules to be displayed in international law.	Professional concultations regarding the Directive 2012/27/EU on Energy Saving are in progress; the whole legislative package regarding the Directive is planned to be proclaimed by the end of the first half of 2015. The time horizon of the Directive: 2014- 2020	Europe 2020 targets for energy and climate policy	From 2014, the following resources are available for the implementation of the envisaged developments: EEOP, priority axis 5: building the energy development of the population, central budgetary organs and the non-profit sector, energy efficienct modernisation of district heating systems, in the Central- Hungarian Region: building energy developments of local government buildings; TOP: energy efficienct development of local governments with the exception of the Central Hungarian Region; EDIOP: energy efficienct development of local governments with the exception of the Central Hungarian Region; EDIOP: energy efficienct development of enterprises, energy R+D+I, financial means of energy efficiency with the exception of the Central Hungarian Region; CCHOP: energy efficienct development of enterprises, energy R+D+I, financial means of energy efficiency in the Central Hungarian Region;	EEOP, prio energy de population, organs and energy effi of district h Central-Hur building en local govern TOP: developmen governmen regions; EDIOP: developmen energy R+D energy effic enterprises, related to the Central

energy efficienct pments of local ments in the areas of the

: energy efficienct pment of enterprises, R+D+I, financial means of efficiency; CCHOP: energy nct developments of rises, financial means to energy efficiency in ntral Hungarian Region

climate Environmental and protection impacts: The increase of energy efficiency significantly contributes to the decrease of GGE emissions, thus it has a key role in achieving the environmental and climate protection objectives. Security of supply: The increase of energy efficiency is one of the most effective and energy conserving methods to decrease our energy dependence, thus contributing to the increase of the security of supply. Impacts on population: Due to the energy savings of the establishing energy developments, the energy expenses of the population are decreasing. Additionally, further positive effects can be expected, such as the increase of amenities, lower noise, the decrease of the maintenance costs inside the buildings and the increase of domestic real property value. By modernising the district heating systems, the district-overheads, or the extent of its increase, can be mitigated.

a)	Reorganisa tion of MÁV	In the framework of the reorganisation, the new, integrated passenger transport organisation has been created, in which the activities of traction (MÁV-TRAKCIÓ Zrt.) and of repair (MÁV-GÉPÉSZET Zrt.) have been integrated into MÁV-START Zrt. responsible for the smooth execution of railway passenger transport. The further integration of the companies forming the MÁV Group was carried out in 2014 thus the number of the subsidiaries	The reorganisation was carried out in 2014. The debt of MÁV Zrt. without overdrafts decreased from HUF 163 bn of 31.12.2013 to HUF 105 bn of 31.12.2014, i.e. by 36%, out of which HUF 35 bn was performed by state	In 2015 the debt of MÁV Zrt. is expected to decrease by 40%, to HUF 63 bn, out of which HUF 23 bn is state debt assumption.	From the debt of MÁV Zrt., HUF 35 bn was assumed by the state in 2014. In 2015 a further HUF 35 bn will be assumed. The state compensation of MÁV-START decreased from HUF 16 bn of 2011 to HUF	
		decreased. The claim for state reimbursement of costs of the passenger transport service providers is continuously decreasing in accordance with the restructuring. The debt of the MÁV Group, compared with the end of 2010, has decreased by half (to HUF 153 billion) by the end of 2014. The Nemzeti Vasúti Pályaműködtető Zrt. (NVP) established in 2013 – in case of the state decision being made in the future depending on the debt consolidation – will carry out the operation of railway network.	debt assumption.		150 bn in 2013, and in 2014 to HUF 146.8 bn. The state compensation for 2015 is HUF 144 bn. The state compensation of GYSEV Zrt. is expected to decrease from HUF 10.5 bn of 2014 to HUF 10.4 bn in 2015.	
b)	Merging Volán- companies into 7 regional companies	By merging the Volán-companies into 7 regional companies the significant decrease of the numbers of management levels and the parallel organisational units, the further utilisation of economic benefits originating from common procurement applications have been made possible. As a result of the merger the competitiveness and cost efficiency of the companies have been improving.	The integration was implemented on 1 <sup>st</sup> Januray 2015.		The state compensation of the companies decreased from HUF 44 billion of 2013 to HUF 42.3 billion in 2014.	
c)	Express train ticket supplemen t in order to increase revenues.	The revenue from the express train ticket supplement introduced in 2013 reached HUF 1.076 bn in 2013, and HUF 1.652 bn in 2014. The MÁV-START plans a revenue of HUF 1.7 bn in 2015.

## ANNEX 2: MEASURES TAKEN IN ORDER TO ACHIEVE THE EUROPE 2020 TARGETS

## 1. Employment target

Numbe r	Description of measure	Brief introduction of measure	Status of implementation	Further schedule of implementations – next 12 months	The relation of the implementation to any other CSR or Europe 2020 target	Resources of measures	Budgetary effects	European Union funds available for the implementation of the measure (where relevant)	Consistence with the programming period 2014-2020 (OP, desciption of scheme)	Description of expected effects
45.		The measure contributes to the creation of developed production technology with investments in modern technologies and machinery, and with supporting job creation. Support is provided for enterprises operating in free entrepreneurial zones and in deprived areas.	none	The planned date of announcement: first quarter of 2015; The implementation of the supported projects is planned for the first quarter of 2018.	CSR4	EDIOP 1.2.1 planned resource: HUF 80 bn, out of which the support for job creating investments is HUF 5 bn		EDIOP 1.2.1 (ERDF)	EDIOP priority 1 (EDIOP 1.2.1); EDIOP priority 8: financial instruments TOP priority 1: strengthening local economy, supporting the investments of enterprises	The share of SMEs of low competitiveness, struggling with out-of- date equipment and lack of capital, decreases (primarily in the processing industry). The competitveness, effectiveness, efficiency, employment and growth potential of this sector improves. Based on the previous NEF tender experiences, 3,730 SMEs received support for job creation on a budget of HUF 41.3 bn between 2010 and 2014, the enterprises created 21,730 new jobs, and assumed to employ 16 461 job seekers for a period of two years. The support contributed to preserving 45,524 jobs.

46.	Encouraging Social Enterprises	The measure aims to sustainably strengthen the employment capacities of social enterprises (on the basis of development programme), encouraging to produce marketable products and services.		The implementation starts in the 2 <sup>nd</sup> half of 2015 and lasts until the 2 <sup>nd</sup> half of 2018.	CSR4, Fighting poverty (EU2020-5)	Planned budget: HUF 7 bn (publishing in 2015)	EDIOP 5.1.3. (ESF)	EDIOP priority 5: Employment; investment priority 1	Self-sustainability of social enterprises strengthens, which can contribute to the expansion of employment in case of regions and groups in disadvantaged labour market situation. It contributes to the improvement of general social situation and to reducing poverty.
47.	Supporting service provision aimed at lawful employment			The tender is planned to be published in April 2015 (The planned length of the projects is 48 months.)	CSR4	Planned budget: HUF 5.5 bn (to be published in 2015)	EDIOP 5.3.3 (ESF)	EDIOP priority 5 Employment; Investment priority 3; EDIOP 5.3.3 Supporting service provision aiming at lawful employment	
48.	Supporting the reconciliation of work and family related tasks, and helping the children in deprived settlements at the earliest age possible.	The aim is the targeted further development of day care services (nursery, family day cares). The measure consists of two parts. On the one hand the further development of the day care of children, on the	none	Planning and the preparation of the professional concept is in progress, it is expected to be published at the end of 2015, or the first half of 2016. The deadline for the feasibility test of differentiated financing is 2017.	, CSR4	TOP 1.4. resource: HUF 60.64 bn TOP 6.2 resource: HUF 30.04 bn CCHOP 6.1 resource: HUF 7.9 bnBudgetary demand is not known, it car be quantified in 2017, because the develoments wil be implemented only in the future.			Supports a more increased labour market participation for women, and contributes to decreasing child poverty and social exclusion. The day care of the children enhances the reconciliation of work and family related tasks. The target number of the measure for the day care of the children (nursery, family day care) is 60,000 places; with creating nearly 17,000 new places.

The R+D Competitiveness and Excellence Agreements programme is in compliance with the priorities of the EDIOP.	The tender aims to support research-development activities of strategic importance which contribute to the encouragement of the R+D activities of the enterprises, the creation of research workplaces, to the encouragement of R+D cooperations setting the direction for the R+D activity of public funded research institutions, to the development of new, marketable products and technologies with significant added value.
The Momentum programme is in compliance with the EDIOP priorities.	The tender aims to provide subsidy for groups to research new topics in the host research centres/institutes for a period of 5 years.

							I	
53.	National Programme for Brain Research (NPBR)	In 2014, on the basis of governmental decision in the framework of call for tender HUF 12 bn was appropriated for the support of the National Programme for Brain Research (NPBR). The NPBR consists of two subprogrammes. The "A" subprogramme managing a budget of HUF 6.4 billion aims to strengthen the research centres/institutes already in the international front line with supporting outstanding researchers who are able to provide significant prospects with their work by introducing new research topics and technologies. The support can be carried out within consortium frameworks, and can be used until 31 <sup>st</sup> December 2017. The base for the "A" subprogramme has a total budget of HUF 5.6 billion, which aims to reverse and balance brain-drain by inviting and employing researchers working abroad. According to the plans of the Consortium, about 25-30 research groups are expected to	In progress, the consortium launched the work of 25 research groups from March 2014 until 11 <sup>th</sup> February 2015.	The NPBR programme is expected to last until 31 <sup>st</sup> December 2017.	Increasing research and development expenditure (EU2020-2) In addition the measure is related to the reform proposals drafted by the Commission in the Annual Growth Survey 2015 (6. Improving the research and innovation (R+D) investment quality)	governmental decision in the framework of call for tender, HUF 12 bn was appropriated for the support of the National Programme		
54.	Supporting individual R+D+I activities of the companies	be set up. The support aims that the enterprises (including suppliers) further develop their already existing, marketable products (including spare parts and/or partial units), their services or technologies, launch the production of the further developed products, and introduce their further developed products in the market.		Date of call: August 2015 for financial intermediaries	Increasing research and development expenditure (EU2020-2) In addition, the measure is related to the reform proposals drafted by the Commission in the Annual Growth Survey 2015 (6. Improving the research and innovation (R+D) investment quality)	2015-2016: HUF 20 bn Non-refundable		EDIOP priority 2 EDIOP priority 8
55.	Supporting R+D+I activities of companies carried out in cooperation	The support aims to encourage the competitiveness and R+D activities of enterprises through cooperations in order to increase the prototype, product, technological and service development activities of innovative enterprises.	Implementation of the activities is ongoing	Date of call: end of 2015	Increasing research and development expenditure (EU2020-2) In addition, the measure is related to the reform proposals drafted by the Commission in the Annual Growth Survey 2015 (6. Improving the research and innovation (R+D) investment quality)	HUF 25 bn We calculate with an average of HUF 200,000,000 support demand, so we plan to grant support for 125		EDIOP priority 2

The NPBR programme is in accordance with the EDIOP priorities.	Due to the effect of the National Programme for Brain Research approximately 25- 30 research groups are expected to be set up and launched. The Office for Subsidised Research Units (OSRU) launched the work of 25 research groups from March 2014 until 11 <sup>th</sup> February 2015, the number of which is going to be 32 within a month.
The measure is implemented within the framework of EDIOP priority 8 and 2.	The planned intervention contributes to the R+D+I company activity growth.
The measure is implemented within the framework of EDIOP priorities 8 and 2.	The planned intervention contributes to the R+D+I company activity growth.

56.	Innovation Ecosystem	In addition to setting up technological incubators and filtering the ideas, the programme grants direct support in order for the start-up technological enterprises to solve the problems characteristic to the phases built upon each other. The state assumes the majority of the first investments of start-up technological enterprises which are too risky for private investors in the form of subsidy. The programme intends to create the opportunity for higher education and academic incubation as well, for the market and business utilisation of their knowledge base. The "Technological start-up ecosystem (Start-up_13)" – pilot – call for tender on a budget of HUF 2.1 bn can be considered as the antecedent of the programme of a much narrower focus, in which the exploitation of the research centre/institute's knowledge base was not included in the fields to be supported directly.	Implementation of the activities is ongoing	Date of call: October 2015	Increasing research and development expenditure (EU2020-2) In addition, the measure is related to the reform proposals drafted by the Commission in the Annual Growth Survey 2015 (6. Improving the research and innovation (R+D) investment quality)	We calculate with an average of HUF 20 m support demand in 4 steps, presuming that not every project reaches all the phases, we intend to enhance the support of establishing 300 enterprises.	EDIOP priority 2
57.	Innovation voucher	The tender supports the implementation of technological innovation projects. The projects being awarded aim to apply some research-development (R+D) result unknown so far, and to develop a new technology, product or service, either not known on the market so far, or significantly modified compared with the knowledge so far, with more favourable features, and to find the base for market success thereof.	Implementation of the activities is ongoing	Date of call: December 2015	Increasing research and development expenditure (EU2020-2) In addition, the measure is related to the reform proposals drafted by the Commission in the Annual Growth Survey 2015 (6. Improving the research and innovation (R+D) investment quality)	HUF 3 bn – the number of enterprises obtaining support: 450 enterprises	EDIOP priority 2
58.	R+D Competitiveness and Excellence Cooperations – integrated projects	The scheme aims to enhance these cooperations in both quantity and quality. Within the framework of the sub-programmes, the primarily top-down initiated, built and coordinated tenders of national significance, with key importance for the research- development and the industry may receive support.	Implementation of the activities is ongoing	Date of call: June 2015	Increasing research and development expenditure (EU2020-2) In addition, the measure is related to the reform proposals drafted by the Commission in the Annual Growth Survey 2015 (6. Improving the research and innovation (R+D) investment quality)	support. Relating to the sectors in S3 we aim to	EDIOP priority 2

The measure is implemented within the framework of EDIOP priority 2.	The planned intervention contributes to the R+D+I company activity growth.
The measure is implemented within the framework of EDIOP priority 2.	The tender supports the implementation of technological innovation project. The planned intervention directly contributes to the company R+D+I activity growth. The measure directly contributes to the improvement of the innovation skills of SMEs, and to the elimination of congestion limiting the performance of enterprises through providing and replacing missing competencies.
The measure is implemented within the framework of EDIOP priority 2.	Increase in the rate of innovative enterprises cooperating with public financed research institutions or with the government.

59.	Competitiveness and Excellence Cooperations –	Supporting the elaboration of complex solutions for the future by focusing on the solution of certain (global) social problems,	Implementation of the activities is ongoing	Date of call: June 2015	development expenditure (EU2020-2) In addition, the measure	HUF 15 bn	EDIOP priority 2
	social challenges	alongside the directions appearing in the National Smart Specialisation Strategy, applying the scientific, research and technological resources of the sectors concerned in synergy, which may provide entry opportunity for international market participation. Further aim of the top-down coordinated projects is that the R+D+I activity carried out in wide cooperation complemented by the creation of competitive R+D capacities shall enhance the establishment of national start-ups, which can compete successfuly for the tenders of Horizon 2020, presuming international excellence even as project leaders.			is related to the reform proposals drafted by the Commission in the Annual Growth Survey 2015 (6. Improving the research and innovation (R+D) investment quality)		
60.	Strengthening R+D infrastructure	The support to be awarded primarily aims at the development of research infrastructure. The focus areas of the call are as follows: 1. Procurement, modernisation of individual R+D infrastructure in order to strengthen the provision of services, and the position of national R+D, focus: enabling Horizon 2020; 2. Building, procuring, and testing R+D infrastructure equipment that can also be used in connection with the international R+D infrastructure; 3. Enabling R+D infrastructure to participate in international R+D infrastructure.	Implementation of the activities is ongoing	Date of call: June 2015	Increasing research and development expenditure (EU2020-2) In addition, the measure is related to the reform proposals drafted by the Commission in the Annual Growth Survey 2015 (6. Improving the research and innovation (R+D) investment quality)	HUF 25 bn	EDIOP priority 2

The measure is implemented within the framework of EDIOP priority 2.	
The measure is implemented within the framework of EDIOP priority 2.	The general aim of the support is to develop R+D infrastructure so that it is able to provide competitive services in the European and global terms meeting the requirements of the knowledge-based society and the economy.

61.	Developing International R+D relationships	The programme elaborated in order to develop International R+D Relationships contributes to the travel expenses of the researcher participating in the research within the framework of the international bilateral TÉT cooperation, to the support of the Hungarian partner of a project, to cover the expenses of the preparations of the projects in the HORIZON 2020 programme and other joint EU initiations, and to the support of the Hungarian participation in certain international EU programmes and joint initiations as a member or leader of the consortium.			Increasing research and development expenditure (EU2020-2) In addition, the measure is related to the reform proposals drafted by the Commission in the Annual Growth Survey 2015 (6. Improving the research and innovation (R+D) investment quality)	HUF 3.5 bn	EDIOP priority 2	The measure is implemented within the framework of EDIOP priority 2.	The general aim of the support is to develop the international R+D relationships.
62.		The aim is to establish research groups within the higher education framework, forming their dynamic renewal by taking the burden of lectures off the researchers with outstanding performance, and the outstanding young talents, calling them back from abroad and keeping them in the country. In order to establish and strengthen excellence centres, it is crucial to take the burden of lectures off the researchers and young talents, and to employ new researchers. Thus it can be provided, that research may dominate in some excellent research groups against the predominance of teaching obligation. At the same time, in order to create excellence, it is essential to replace the missing elements of R+D infrastructure and to provide the resources necessary for the research.	of the activities is ongoing	Date of call: June 2015	is related to the reform proposals drafted by the Commission in the	A strategic R+D workshop can count on a support of HUF 300- 400 million on average, so we are going to contribute to the support of the research work of 25-50 pcs of existing or newly	EDIOP 2. priority	The measure is implemented within the framework of EDIO priority 2, (EDIOP 2.3.2)	The research groups being established or becoming stronger this way have a good chance to become an integral part of the international research sphere, the H2020 synergies become exploitable. The intervention intends to contribute to the increase in the numbers of the Hungarian participants who have been awarded in the international programmes, in particular in the Horizon 2020 framework programme. The number of the new researchers increases at the supported institutions, and the number of the researchers working in facilities equipped with better research infrastructure also increases.

research.			research.					

The measure is being implemented within the framework of EDIOP priority 2, (EDIOP 2.3.4)	The centres would provide equipment and research help for the R+D activity of the local SME sector; they would enable the more intensive knowledge flow ("quadruple helix") between the actors of the given sectors (S3); the harmonisation of the training and R+D activities, their development alongside the economic interests; the more intensive involvement into the international programmes. The intervention intends to contribute to the increase of the number of the Hungarian participants in international programmes, in particular in Horizon 2020. The number of the new researchers increases at the supported organisations, and the number of the researchers working in facilities equipped with better research infrastructure also increases.
The measure is being implemented within the framework of EDIOP priority 2, (EDIOP 2.6.3)	As the project is implemented, Hungary and Central and Eastern Europe may finally be part of the "ERA map" and can contribute to increase the role of Europe in the global R+D sector. The successful implementation of the project is of major importance for the whole Hungarian research- development ecosystem.

		research institutes join the NAIC					
		established with a seat in					
		Gödöllő.					

The compilation of the roadmap will be in compliance with the Research-development and Innovation (RDI) Strategy's objectives and priorities (in particular with the Smart Specialisation Strategy), and is in accordance with the international trend of the development of science and research infrastructures, primarily with the 2016 roadmap of ESFRI currently being prepared.	The compilation and implementation of an appropriate roadmap can significantly improve the extent of the linkage to international research infrastructures, the development focusing on the international standard of outstanding research centres/institutes can be implemented, the capacity utilisation of research infrastructures and the number of publications increases.
The measure is in accordance with the priorities of the Rural Development Programme, the implementation is carried out from the resources of the Ministry of Agriculture.	The established integrated agriculture research network is able to increase the competitiveness of the Hungarian agriculture at high level, and to elaborate and implement the practice oriented research development and innovation programmes enhancing its sustainable development.

67.	National Environmental Technology Innovation Strategy 2011–2020	The Government adopted the National Environmental Technology Strategy (NETIS) under the Government Decision 1307/2011. (IX. 6) for the period of 2011-2020. Every two years a report is made on the situation of the National Environmental Technology Innovation Strategy – the first report on the result of the strategy of the first two years was delivered in 2013. The measure, interventions planned for 2015: - Eco-innovation conference - Measures being implemented within the framework of EDIOP: the EDIOP supports the shift to the economy structure of low carbon dioxide emission, the preservation and protection of the environment, and the increase of the resource efficiency, so it is closely connected to the objectives of the NETIS (e.g. SMEs can compete for waste recycling in the tender for the "Support of instrument procurement and entering the foreign market") - Measures being implemented in the framework of ITOP - (EEOP) sanitation and wastewater purification, wastewater treatment: the general aim of the scheme is to support the canalisation tasks, wastewater treatment, and the display of liquid waste in wastewater treatment, and the display of liquid waste in wastewater treatment plants in the agglomerations above 2000 PE (population equivalent). - The investments improve the marketability of the innovative wastewater treatment technologies	Implementation of the activities is ongoing	The time horizon of the strategy: the period of 2011-2020. Several measures are being implemented within the framework of the strategy in 2015.	The measure contributes to the "sustainable growth" priority, to the implementation of a more resource-efficient, more environmentally friendly and more competitive economy. At the same time it has several direct linkages to the "smart growth" priority, mainly through innovation. It is mainly indirectly linked, but linked to the inclusive growth objective of the EU 2020 Strategy.		

The objectives drafted in NETIS were considered in the course of planning the EU resources for the 2014- 2020 programming period, its aims have been built in the operational programmes (EEOP, EDIOP). (EEOP, EDIOP).	The strategy, with special attention to eco-innovation, aims to enhance the implementation of the measures necessary for the harmonised achievement of the governmental aims related to environmental technology. Besides environmental objectives, another objective of the strategy is to exploit the Hungarian economic and knowledge potential in the competition aiming at the development of new processes and technologies, especially of environmental technologies, and at enhancing the increase of opportunities to find a job.

#### 4. Education target

Every relevant measure is included in the table describing the measures taken for the implementation of the country specific recommendation 6.

## 5. Social inclusion target

Numbe r	Description of measure	Brief introduction of measure	Status of implementation	Further schedule of implementation - next 12 months	The relation of the implementation to any other CSR or Europe 2020 target	Resources of measures	Budgetary effects	European Union funds available for the implementation of the measure (where relevant)	Consistence with the programming period 2014-2020 (OP, description of scheme)	Description of expected effects
72.	<ul> <li>the Roma's training</li> </ul>	The scheme aims to improve the social inclusion and employment of unemployed Roma (primarily women) suffering social prejudice and labour market discrimination. As a result of the development, 450 Roma (primarily women) are expected to be employed and to acquire vocational qualification related to their jobs – in particular in public services. Built on the experiences of the Social Renewal OP, the intervention will be restructured beyond the employment programme linked to wage subsidies, the employer is expected to enrol the employee in a training linked to his/her job requirements, and mentoring is also provided in the workplace.		The measure is expected to be launched in November 2015.	Fighting poverty (EU2020-5) CSR4	CONVERGENCE: HUF 2 bn Central Hungarian Region: HUF 0.25 bn		HDOP, priority axis: 1. Cooperative society Thematic objective: 9. Investment priority: 9.i Objective: A. Measure: 1.1	ССНОР	Supported employment of the target group is being implemented in public services (e.g. in social, child welfare, health care, public education institutions). Supported training of the target group to qualify them for the job requirements. Mentoring at the workplace. The number of Roma employed in public services increases by about 450 persons (out of which 50 persons in the Central Hungarian region). The ability of public services to reach the most disadvantaged groups improves.
73.	Roma mentor network development	The scheme helps in that the programmes for creating opportunities and mitigating disadvantages reach the Roma, Roma communities get access to information, which makes them participate actively in the programmes. It supports the civil grouping of Roma women, and their more active and conscious role in social and public life.		June 2015	CSR4	CONVERGENCE: HUF 2 bn		HDOP, priority axis: 1 Cooperative society Thematic objective: 9 Measure: 1.3	HDOP	As a result of the intervention, 80 Roma mentors start to work. Following their activity the rate of the Roma participating in the different (in particular employment) programmes is increasing, and at least one Roma woman organisation is being established per county. The number of persons reached by the mentors: 50 000 persons The number of mentored people

74.	Support regional cooperation in order to coordinate local equal opportunity programmes at district level	The scheme 1/A 3 of the State Reform OP was launched in 2014 targeting problems emerging in some settlements' local equal opportunity programmes that could be tackled more efficiently by the cooperation of several municipalities. The aim is to support cooperative pilot programmes between settlements of one district and the local actors, to establish and strengthen regional cooperation of activities – provided by district seat settlements – related to the implementation of programmes enhancing social inclusion and local equal opportunity programmes.	The call for proposals was published on 04.08.2014, the number of applications received is 94, out of which 73 applications were successful. The conclusion of grant agreements is in progress. The implementation of the projects will last until 30.09.2015.	CSR4	EU co-financed programme: budget is HUF 1,85 bn	State Reform OP
75.	Programmes for disadvantaged and multiple disadvantaged children					
	a) Integrated regional child programmes in disadvantag ed regions	The aim is to prevent the reproduction of child poverty and to increase the opportunities of children, including the further development and extension of the integrated regional child programmes launched in 2007-2013. Activities: make services available that are important for children and their families, expanding their capacity, introducing innovative, local solutions, early development of skills, activities encouraging learning outside school, youth work, supporting career orientation, leisure time	October 2015	CSR4	CONVERGENCE: HUF 3 bn	HDOP

	(person): 10 000 The number of cooperation agreements concluded with the potential employers (pcs): 160 Established Roma woman civil organisations (pcs): 20 Programmes organised by the Roma woman civil organisations: 320 pieces. The cooperation between the municipalities, the civil and religious institutions is to be improved at local and district level in order to create opportunities for the disadvantaged groups. The interventions inefficient at local level are going to be available at district level.
	Deprivation of children decreases, the rate of children between the ages of 14 and 18 participating in secondary education increases (10%) and the rate of children being mature for school/kindergarten increases (15%) in the environment of the programme.

	activities, camps, improving living conditions, preventive activities, screenings, school and kindergarten social work, operating professional and interprofessional networks, increasing the efficiency of the child protection warning system, strengthening civil and church cooperation.				
b) Professional and methodologi cal support of local and regional programmes enhancing children's chances	nature, need permanent professional support. Activities: network building within the framework of methodological and professional support, implementing trainings, awareness raising, process support, mentoring of Sure Start Children Houses (Biztos Kezdet Gyerekházak), carrying out assessments and researches related to local projects.	September 2015	CSR4	CONVERGENCE: HUF 3 bn	HDOP
c) Operating the Sure Start Children's Houses	The Sure Start Children's Houses, developed from EU funds, provide services fighting against child poverty and intervene at as early age as possible. After the completion of the EU programme, the maintenance of the Houses will be provided by the central state budget, taking into account the budgetary possibilities.	ongoing	CSR4	In 2015, resources are available in the central state budget for the entry of new Children's Houses.

79.	Further development primary care	of	The further development of primary care aims to make the general practitioner profession attractive, to take the burden off from the higher levels of care, and to enhance prevention efficiency . Establishing the functional integration of primary and outpatient care, determining the competencies and capacities of general practitioners and paediatricians according to health needs by considering the regional inequalities, restructuring the financing system in order to strengthen the gatekeeper function and quality expectations, improving the human resource situation and providing technological developments. It is the harmonised, joint, system- levelled programme involvinge primary care and different specializations.	<ul> <li>Establishing a performance based finance system, the first step of which has been the introduction of indicators that help to assess standards of care provided by general practitioners, thus enhancing the gatekeeper function</li> <li>Taking over the responsibility of inpatient care by the state so that the institutions concerned got under state ownership, only primary care has been left in the duty of the local governments.</li> </ul>	Adopted Government Decision on the supervision of the primary care system and the directions of its restructuring is expected in the first half of 2015.			In the central budget of 2015 Chapter LXXII Health Insurance Fund 3, Title 1, Subtitle 22: Renewal of the primary system schedule 1 HUF 10 bn	
80.	Superfast Internet project		The Superfast Internet Project (SIP) aims to provide the building of infrastructure covering the whole country with broad band (at least 30 Mbps) at the forefront in the Euopean Union, which is made possible by the building of the New Generation Access Networks (NGA). The network coverage over the area capable of this speed is 75.7%.	The findings on NGA coverage with the help of the mapping has been recently done thus it will give a more precise picture of the coverage of the households with the new generation network.	The period of the project is 2015-2018 The call for application is going to be published in June 2015.	Digital Agenda	HUF 150-210 bn		EDIOP 3.4.1 2015- HUF 68 bn EDIOP 8 2015-2020: 47.4 bn (financial mean

		Within the framework of the primary care competency, the general practitioners are able to treat patients as widely as possible, the expansion of definitive care is implemented thus taking the burden off from the in- and outpatient institutions.
015-2020: 020: HUF neans)	EDIOP 3.4.1 EDIOP 8	The Super-Fast Internet project being implemented as the network development part of the National Digital Development Programme approximately 1 million households have to be supplied with new generation access network by 2018.
