#### 1. MISSION STATEMENT

The mission of the Directorate General for Agriculture and Rural Development ("DG AGRI") is to promote the sustainable development of Europe's agriculture and to ensure the well-being of rural areas.

#### 2. THIS YEAR'S CHALLENGES

2015 will be a challenging year for DG AGRI in several respects:

- ✓ Implementation of the CAP reform will be a key task across the DG! Colleagues dealing with direct payments will continue their efforts to proactively assist and offer guidance to Member States who have to turn new schemes such as greening, young farmers and small farmers into reality on the ground. Activity will also continue to be high for colleagues in the second pillar to meet the objective of ensuring as high a quality and as smooth an adoption as possible of the 118 rural development programmes for 2014-2020.
- ✓ DG AGRI will take part in **the Juncker Commission's priority actions**. Agriculture and Rural Development are indeed a key component of the number one priority of the Commission of "boosting jobs, growth and investment". In line with the mission letter from President Juncker to Commissioner Hogan, our main focus will be on how to ensure that 'rural development spending is well integrated into jobs- and growth-generating investment strategies at national and regional level', and how to renew efforts 'in the agricultural sector to contribute to energy efficiency and emissions reductions'.
- ✓ **Simplification and subsidiarity** represent another challenge for DG AGRI in 2015 and the following years. This will include a screening across the board of our legislation from a simplification and subsidiarity perspective as well as concrete initiatives in the areas of direct payments (in particular greening), quality policy, Common Market Organisation as well as rural development. Commissioner Hogan and DG AGRI will engage in a dialogue with stakeholders and other EU institutions as part of this exercise and encourage Member States to undertake broad consultation at national level.
- ✓ Opening up trade possibilities for agricultural products will continue to be high on the agenda. Apart from contributing to trade negotiations such as TTIP, Commissioner Hogan has announced that potential market opportunities outside EU should be identified and promoted with the aim of inter alia alleviating the consequences of the Russian ban on certain EU agricultural products.
- ✓ **Sound financial management** remains a key principle for DG AGRI. However, 2015 may well bring particular challenges for our budgetary management in light of the increasing gap between needs and resources available in the general EU budget. Our efforts to strengthen the financial management of the Common Agricultural Policy (CAP) are also on the rise with new tools for suspensions and interruptions and a new, legal requirement to speed up our audit procedures.

These challenges bear witness to the complexity in delivering on DG AGRI's mission statement and the policy objectives of the CAP. Assessing the performance of the CAP represents an additional challenge in 2015 and beyond. However, important progress is being made with the CAP reform which introduces a Common Monitoring and Evaluation Framework (CMEF), improving our capacity to assess to what extent results are achieved and impacts made. The CMEF consists of a large number of indicators covering issues as varied as e.g. the rural employment rate, EU agricultural exports, water quality, crop diversity, EU commodity price variability and emissions from agriculture.

For the purpose of the Management Plan, DG AGRI has selected four performance indicators covering the most critical aspects of CAP performance and one indicator related to the internal control.

The four key indicators which monitor the core aspects of our policy are:

- a) Agricultural factor income<sup>1</sup> (p. 6)
- b) EU commodity prices compared to world prices (p. 23)
- c) Minimum share of agricultural land with specific environmental practices/commitment<sup>2</sup> (p. 32 and 45)
- d) Rural employment rate (p. 8).

The key indicator linked to the achievement of the internal control objectives is:

e) Residual Error Rate and corrective capacity (p. 95)

For each indicator, monitoring data will be presented subsequently in the Annual Activity Report.

Through their diversity, the key indicators confirm that the CAP is not a simple business to manage – and DG AGRI's most important resource is therefore undoubtedly its staff! Without qualified and motivated staff we cannot deliver on our mission statement and policy objectives.

We are however also facing some challenges in the area of human resources in the near future due to issues of both a horizontal nature (staff reductions for the Commission as a whole; new rules directly affecting the career path and expectations of staff; meeting the Juncker Commission's objective of a 40% share of female senior and middle management) and specific to DG AGRI (ageing staff; loss of specialised profiles, notably agronomists). We will need to do more with less but also focus on the need to adapt quickly to the changing environment.

To address these challenges, DG AGRI has developed a Strategic Human Resources Plan setting out objectives, in particular for 1) Workforce planning, organisational structure and efficiency, 2) Learning and development, 3) Recruitment and 4) Career development. A broad range of possible actions have been identified and will be implemented by our HR unit in order to reach these objectives. I would like to use this opportunity to invite all colleagues in DG AGRI to reflect on how each of you can be ready for these challenges by e.g. further developing your skills and ability to move to new domains of interest, or helping new colleagues to settle in.

Let me end by expressing my sincere respect and gratitude to all of you for your professionalism and dedication to our common goal of a successful CAP. I am confident that we will also be successful in seeing our way through the challenges arising in 2015!

Jerzy PLEWA Director-General

\_

<sup>&</sup>lt;sup>1</sup> For the definititon of this indicator, see p. 6.

<sup>&</sup>lt;sup>2</sup> Combining the indicators "Share of eligible land under greening practices" for first pillar (the direct payment part can be included in the calculation of this indicator only when 2015 data are available) and "Share of agricultural land" indicators for second pillar specific objectives 4 and 5.

#### 3. GENERAL OBJECTIVES OF THE POLICY

#### 3.1 General objectives

The Common Agricultural Policy (CAP) is a genuinely European policy as Member States pool resources to operate a single European policy with a single European budget. The objectives of the CAP as laid out in the Treaty of the Functioning of the European Union (TFEU) Article 39 are to

- (a) increase agricultural productivity,
- (b) ensure a fair standard of living for the agricultural community,
- (c) stabilise markets,
- (d) assure the availability of supply and
- (e) ensure that supplies reach consumers at reasonable prices.

To reach the TFEU objectives, general objectives for the CAP were set out in the Regulation (EU) No 1306/2013<sup>3</sup>, Article 110(2), namely

- 1. Promoting a viable food production, with the focus on agricultural income, agricultural productivity and price stability;
- 2. Promoting sustainable management of natural resources and climate action, with a focus on greenhouse gas emissions, biodiversity, soil and water;
- 3. Promoting balanced territorial development, with a focus on rural employment, growth and poverty in rural areas.

Following the recent reform, the Commission will concentrate its efforts in 2015 on delivering tangible results for Europe's citizens. The new Common Agricultural Policy will significantly contribute to maintaining jobs in rural areas and generating growth along the food chain. The simplification of the CAP will also contribute to competitiveness: the reduction of the administrative burden will be positive for both farmers and national authorities. Over the next years, the European Commission will focus its efforts to guarantee an adequate implementation of the CAP as to maximize the contribution to growth and jobs agenda<sup>4</sup>.

The breakdown of the CAP objectives is further developed in the part on the intervention logic (see Part 3.2).

<sup>3</sup> Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy and repealing Council Regulations (EEC) No 352/78, (EC) No 165/94, (EC) No 2799/98, (EC) No 814/2000, (EC) No 1290/2005 and (EC) No 485/2008

<sup>4</sup> The general objectives contribute to the three priorities of smart, sustainable and inclusive growth of the Europe 2020 strategy (Communication from the Commission – Europe 2020 – A strategy for smart, sustainable and inclusive growth, COM(2010)2020 of 03 March 2010). In this context, the CAP promotes resource efficiency by maintaining a sustainable agriculture throughout the EU, addressing important cross border issues such as climate change and biodiversity and reinforcing solidarity among Member States.

| (index 2005 = 100)  | Article 39 (1)(a) TFEU ("to increase             |
|   | agricultural productivity")                      |
| Impact indicator: EU commodity price variability                  |  |

#### Impact indicator: EU commodity price variability

Definition: EU and world market commodity market price variability will be established for a number of selected agricultural commodities. It will be calculated on the basis of monthly commodity market prices. It is the coefficient of variation measuring the dispersion of commodity prices around the mean over the period of 3-5 years. The coefficient of variation will be calculated as standard deviation of a set of prices/mean average. The indicator will be calculated for EU and world prices.

|        | powder (SMP)                       | 10.0%                         | 8.0%                       |  |        |      |      |           |
|        | Whole milk                         |                               |                            |  |        |      |      |           |
|        | powder (WMP)                       | 11.0%                         | 7.2%                       |  |        |      |      |           |

<sup>&</sup>lt;sup>5</sup> Further details related to the measurement of the impact indicators are available in the following document: http://ec.europa.eu/agriculture/cap-post-2013/monitoring-evaluation/documents/impact-indicators\_en.pdf

<sup>&</sup>lt;sup>6</sup> Agricultural factor income represents income generated by farming activities (i.e. off-farm activities are not included), and is used to remunerate (1) borrowed/rented production factors (capital investment, wages for salaries and rented land), and (2) its own production factors (work and/or enterprise, own capital and owned land).

<sup>&</sup>lt;sup>7</sup> The annual working unit (AWU) is defined as full-time equivalent employment (corresponding to a full-time equivalent job), i.e. as total hours worked divided by the average annual number of hours worked in a full-time job within the economic territory. A distinction is drawn between non-salaried and salaried AWUs, which together make up total AWUs. One person cannot represent more than one AWU. The indicator uses total AWUs.

#### Planned evaluations:

- Framework contract for the evaluation of the contribution of the CAP to the general objective "viable food production" expiration in 2021
- Initial evaluation of the contribution of the CAP on "viable food production" start in 2016, completion in 2017. The scope is to provide a first analysis of the CAP impact.

|   | Article 110 (2)(c) of Regulation n° 1306/2013 |

#### Planned evaluations:

- Framework contract for the evaluation of the contribution of the CAP to the general objective "To promote a balanced territorial development" expiration in 2021
- Initial evaluation of the contribution of the CAP on "To promote a balanced territorial development" start in 2016, completion in 2017. The scope is to provide a first analysis of the CAP impact.
- Evaluation of the impact of the CAP on new marketing strategies start in 2017, completion in 2018. The scope is to provide an analysis of the impact on marketing strategies of the specific measures/instruments/policies aiming to contribute to the general objective "balanced territorial development".
- Evaluation of the impact of the CAP on local development—start in 2018, completion in 2019. The scope is to provide an analysis of the impact on local development of the specific measures/instruments/policies aiming to contribute to the general objective "balanced territorial development".

#### Planned evaluations for all three General Objectives:

- Mapping and analysis of the implementation of the CAP- completion in 2016
- Framework contract for synthesis and cross-thematic evaluations expiration in 2021
- Synthesis and cross-thematic evaluations start in 2016, completion in 2019. It serves to prepare synthesis reports, such as the reports to be submitted to the Council and the European Parliament by 31 December 2018 and 2021.

The CAP is financed through two funds, i.e. the European Agricultural Guarantee Fund (EAGF) and the European Agricultural Fund for Rural Development (EAFRD). Noteworthy, the EAFRD is part of the Common Strategic Framework<sup>9</sup> (CSF) where Rural Development (RD) priorities already translate and feed into the CSF thematic objectives. The CAP contributes to the **Instrument for Pre-accession assistance** (IPA II) for the part related to rural development (IPARD).

DG AGRI also participates in the implementation of **Horizon 2020 Framework Programme** for Research and Innovation for the part related to securing sufficient supplies of safe and high quality food and other bio-based products.

Deculation / FUN No. 1202/2012 of the Function Parliament and of the Council of 17 December 20

<sup>&</sup>lt;sup>9</sup>: Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006.

The strategic importance of the CAP for EU citizens 10 becomes apparent when considering the role that agriculture and its activities in rural areas (such as tourism, transport, local and public services) play in the European economy and society. Over 77% of the EU's territory is classified as rural<sup>11</sup> and is home to more than half of its population. The primary agricultural sector, i.e. agriculture, forestry, hunting and fishing, is naturally concentrated in rural areas and accounts for a 5.3% share in total employment, i.e. 11.9 million farmers, in 2011. Overall, agriculture and the agri-foods industry that receives its high quality, competitive and reliable raw material inputs from agricultural production, provide 46 million jobs, comprise 15 million businesses and account for 6% of the EU's GDP. Yet, the income per capita (on average) and the employment rate are significantly lower in predominantly rural regions compared to urban areas. However, GDP growth in predominantly rural areas was stronger (2.2% in 2008) than in intermediate (1.0%) and predominantly urban regions (-3.4%), indicating less volatility during the recent crisis. However, in the period 2000 to 2012, 4.8 million full-time jobs in the EU agriculture disappeared (70% of them in the new Member States). It must be noted that there are significant differences of the income per capita, the unemployment rate and the employment rate of the primary sector in the various rural areas of the EU. Significant differences in the agricultural sector compared to the rest of the economy are seen in gender equality and age classes of the labour force. Two out of three farmers on average are male, compared to 54% of male labour forces in the total economy. In 2010, 33% (44% for total employment) of the agricultural labour force was younger than 40 years, 57% (54%) was between 40 and 65 years and 10% (2%) were aged older than 65 years.

For a viable European economy and the European society, a functioning environment providing ecosystem services is crucial. This is acknowledged by the CAP as farmers are encouraged to comply with sustainable agricultural practices in order to safeguard the environment. An additional focus is laid on the preservation of rural communities and landscapes as they form a valuable part of Europe's heritage. Overall, the CAP can be seen as an overarching policy as it is inter-linked to many other European policies, notably socioregional, economic as well as environmental, climate and energy policies.

## (1) Promoting a viable food production, with the focus on agricultural income, agricultural productivity and price stability

Guaranteeing food security, averting a slowdown in productivity growth, price/income volatility and facing the economic crisis are the main economic challenges that must be addressed by the CAP. To promote a viable food production the reform aimed to enhance competitiveness. This resulted in improved economic tools to address the income of farmers and market developments on a sound socio-economic and environmentally sustainable basis.

Market measures provide a safety net in order to react efficiently and effectively against threats of market disturbances or other events and circumstances significantly disturbing or

We are referring to both, the **predominantly rural** and **intermediate** classes of NUTS 3 regions, that are classified as regions where the share of population living in rural local administrative units is higher than 50% and where the share of population living in rural local administrative units is between 15 and 50%, respectively.

Page **9** of **131** 

Data retrieved from the <u>Statistical and economic information Report 2012</u> and a MEMO on CAP published by the Commission on 26 June 2013 (<u>European Commission. MEMO The common agricultural policy (CAP) and agriculture in Europe – Frequently asked questions. Press release database. 26 Jun 2013); Economic Briefs. N° 8: How many people work in agriculture in the European Union? June 2013; Eurostat Regional Yearbook 2013, Chapter 15</u>

threatening to disturb the market, and thus, maintaining market stability and meeting consumer expectations. Such measures may alsobe financed through a crisis reserve that will be created through the annual application of the financial discipline on direct payments. Furthermore, the activities for the common organisation of the markets in agricultural products include measures to foster producer organisation and interbranch organisation in order to improve competiveness of the agricultural sector and enhance its share in the food chain, the school milk and fruit scheme, as well as the wine national support programme and other regulatory measures. Besides, export refunds have literally vanished from the budget lines.

Direct payments support and stabilise farmers' income, but increasingly also contribute to the provision of environmental public goods. Indeed, the new CAP provides for a wide range of obligatory and voluntary instruments of direct payments for active farmers, such as basic payment, greening payment, young farmers scheme, small farmers scheme, redistributive payment, coupled support and support in areas facing natural constraints. Member States that currently maintain direct payment allocations based on historic references must move towards more similar levels of payment per hectare.

Pillar II also contributes to enhance the competiveness of all types of agriculture and improve the agricultural standing in the food chain. In particular, two of six Union priorities (specific objectives) for rural development explicitly aim at improving the competitiveness of the agricultural sector and farm viability, as well as at improving the integration of farmers into the food chain and management of risks. A number of specific instruments (or "rural development measures") are available in this respect. The new Rural Development Policy (2014-2020) will be a key driver to encourage investments in the rural areas and support business start-ups and innovation projects; this will be a key instrument to support job creation and stimulate economic activity beyond the agricultural sector with projects for the diversification of the economy in rural areas.

Horizontal and other instruments include cross compliance, quality policy, organic farming, promotion policy and research (under Horizon 2020), European Innovation Partnership for Agricultural Productivity and Sustainability, as well as the Farm Advisory Service (FAS). The FAS requires Member States to offer advice to farmers covering issues on cross-compliance, the green direct payments, the conditions for maintenance of land eligible for direct payments, the Water Framework and Sustainable Use of Pesticides Directives as well as to assist farmers, forest holders and SMEs operating in rural areas in order to improve the economic and environmental performance of their holdings through rural development measures.

### (2) Promoting sustainable management of natural resources and climate action, with a focus on greenhouse gas emissions, biodiversity, soil and water

Environmental challenges which must be addressed by the CAP include greenhouse gas (GHG) emissions, soil depletion, water and air quality, habitats and biodiversity and the impact of climate change in general. For reaching this general objective, different instruments and measures are provided in Pillar I and Pillar II, respectively.

For respecting certain agricultural practices which are beneficial for the climate and the

environment, farmers will receive a green payment. This new compulsory greening instrument will ensure that farmers are adequately remunerated for providing environmental public goods and pursue climate change mitigation and adaption, one of the specific objectives under Pillar I. In addition, the existing cross-compliance system links all direct payments, certain rural development payments and certain wine payments to a number of statutory requirements relating to environment, climate change, good agricultural condition of land, human, animal and plant health standards and animal welfare. Under Pillar II, relevant priorities in relation to this general objective of the CAP are the ones referring to restoring, preserving and enhancing ecosystems as well as to promoting resource efficiency and the shift towards a low carbon and climate resilient economy. The measures that will mostly contribute these priorities are agri-environment-climate payments, support for organic farming, strengthened and streamlined support through investments, grants and annual payments for forestry activities, and payments for mountain areas and other areas facing natural and other specific constraints. To be noted that, in the case of Pillar II, 30% of the EAFRD must be spent on measures related to land management and the fight against climate change. In addition, rural development measures related to knowledge transfer and innovation, will effectively contribute to the achievement of environmental priorities (as well as to the other priorities, given their horizontal nature). The European Innovation Partnership for Agricultural Productivity and Sustainability as well as the research activities under Horizon 2020, are also contributing to the achievement of this environmental-related general objective.

### (3) Promoting balanced territorial development, with a focus on rural employment, growth and poverty in rural areas

The territorial challenges that are to be addressed by Rural Development Programmes include the effective enhancement of the vitality of rural areas and effective promotion of the diversity of EU agriculture. Despite the fact that a growing number of rural areas are becoming increasingly driven by factors outside agriculture (such as socio-economic, sectorial and environmental conditions), agriculture still remains an essential driver for the rural economy in the EU. Agriculture generates additional economic activities with strong implications on the food processing, tourism and trade. In many regions, agriculture builds the foundation of local traditions and social identity.

The policy for rural development is unique in the sense that Member states or their regions design their own multi-annual programmes on the basis of the menu of measures available at EU level, whereas the programmes are co-funded from the national budget. A new element to the CAP brings higher flexibility for the Member States or regions, as measures will not be clustered into "axes" with associated minimum spending per axis anymore. Instead, the Member States or regions may decide which measures to be applied in order to reach targets set against six broad priorities, and 18 sub-priorities or so called focus areas. However, in order to boost bottom-up forms of territorial development in rural areas, at least 5% of the EAFRD will have to be devoted to the LEADER approach. Furthermore, the LEADER approach will be integrated within so called Community-Level Local Development (CLLD) Strategies,

which can be co-financed by the other ESI funds<sup>12</sup>, i.e. ERDF, ESF, CF and EMFF. This could further enhance a closer co-ordination between different policies of the Union, for example in the context of programmes for rural-urban cooperation at local level.

In addition, to boost the social and economic development of their rural areas, Member States or their regions will also have the possibility to design thematic sub-programmes focusing on particular sectors or beneficiaries, such as young and small farmers, mountain areas, women in rural areas, climate change mitigation and adaption, biodiversity and short supply chains.

Hence, Rural Development Programmes are designed in a way to make a vital contribution to the social, economic and environmental well-being of rural areas and the sustainable management of natural resources. Rural development thus promotes the competiveness of the agricultural and food processing sectors and inclusive and sustainable growth in rural areas without compromising the enhancement of a diverse EU agriculture and the safeguard of European heritage. For reaching this general objective, different instruments and measures are provided.

#### Implementation objectives

DG AGRI commits itself to achieving high standards in **implementing its objectives and policies**, and will in particular:

- Manage the Union Budget in accordance with high standards of financial management, ensuring value for money, properly designed management and control systems as well as transparency;
- b. Implement policy in an effective manner, in line with the Treaty and international obligations and the need to simplify legislation;
- c. Contribute to other Union policies, in the fields of cohesion, competitiveness, employment, research, environment including climate action, food safety and external policies (enlargement, trade and development).

\_\_

The new framework of the EU's rural development policy takes account for the coordination and complementarity with the European Structural and Investment (ESI) Funds. The Common Strategic Framework (CSF) aims at providing clear strategic direction to the programming process under the CSF Funds, including the European Regional Development Fund (EFRD), the European Social Fund (ESF), the Cohesion Fund (CF), the European Agricultural Fund for Rural Development (EAFRD) and the European Maritime and Fisheries Fund (EMFF), and is reflecting the Europe 2020 strategy through eleven common thematic objectives. The six RD priorities (specific objectives) as stated in the Programme Statement are linked to six common thematic objectives, namely

<sup>(1)</sup> Strengthening research, technological development and innovation,

<sup>(2)</sup> Enhancing the competiveness of the agricultural sector,

<sup>(3)</sup> Supporting the shift towards a low-carbon economy,

<sup>(4)</sup> Promoting climate change adaption, risk prevention and management,

<sup>(5)</sup> Protecting the environment and promoting resource efficiency and

<sup>(6)</sup> Promoting social inclusion and combating poverty.

### 3.2The intervention logic of the CAP and its relation to the **Monitoring and Evaluation Framework**

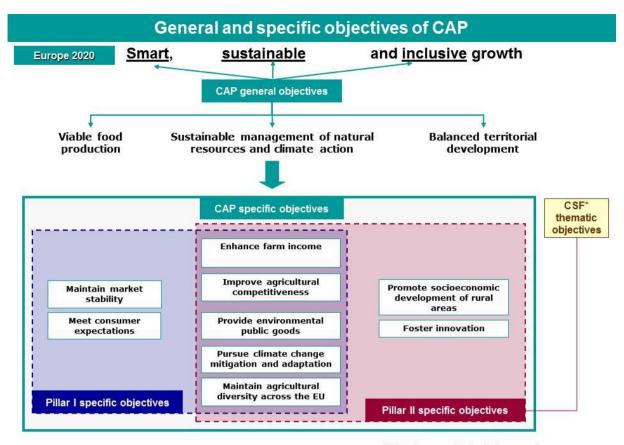

Overall, the CAP aims at achieving three general objectives, which together feed into the **Europe 2020** objectives of smart, sustainable and inclusive growth.

Both CAP pillars contribute to the general objectives. The general objectives are broken down into specific objectives, some of which are common to Pillar I (broadly, agricultural income and market support) and II (rural development), whereas others are linked either to Pillar I or to Pillar II. A graphical presentation of these general objectives and their breakdown into specific objectives and how the related Pillar I instruments and RD priorities ("specific objectives") and focus areas feed into them are presented below.

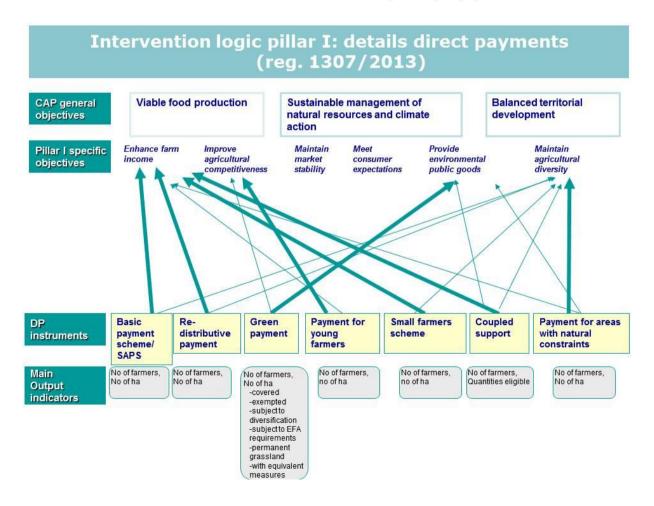

The CAP Monitoring and Evaluation Framework is a result of common work of DG AGRI and various stakeholders launched in 2010. Each of the elements of CAP intervention logic was discussed and agreed widely inside DG AGRI, and also on different occasions with the Member States, e.g. in the Rural Development Committee, the Evaluation Expert Network and a newly created expert group on monitoring and evaluation. Following the approval of the basic legislation for the CAP 2020, the mandatory elements of the system are incorporated into implementing acts<sup>13</sup>, including amongst others a list of the indicators to be used to monitor the performance of the policy (cf. part on the CAP performance measurement below). Additional help to the Member States is given via guidance documents, e.g. on ex-ante evaluation of 2014-2020 Rural Development Programmes.

<sup>13</sup> Commission Implementing Regulation (EU) No 808/2014 of 17 July 2014 laying down rules for the application of Regulation (EU) No 1305/2013 of the European Parliament and of the Council on support for rural development by the European Agricultural Fund for Rural Development (EAFRD) - Annex IV, OJ L 227, 31.7.2014, p. 18-68 Commission Implementing Regulation (EU) No 834/2014 of 22 July 2014 laying down rules for the application of the

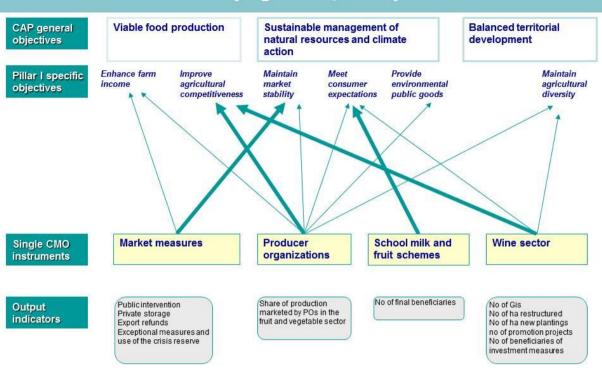

common monitoring and evaluation framework of the common agricultural policy, OJ L 230, 1.8.2014, p. 1-7.

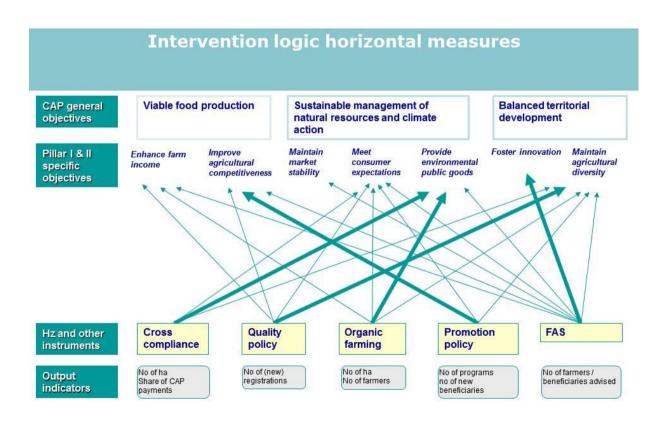

\*CSF: Common Strategic Framework including the EFRD, ESF, CF, EAFRD and EMFF

# Intervention logic pillar I: details market measures (reg. 1308/2013)

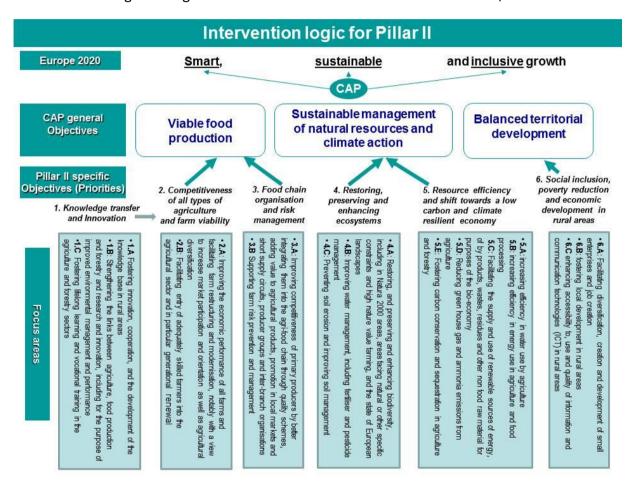

As shown in the graphs above, the **direct payments** support contribute to stabilise the farmers' income, improve competitiveness and support the provision of environmental public goods and climate change mitigation and adaptation. **Market measures** allow for a safety net in times of market disturbance or crisis, hence help maintain market stability and meet consumer expectations. A number of **horizontal instruments** support these objectives. Overall, these measures help to maintain a diverse agriculture in the EU.

A more detailed description of the reasoning behind the different instruments can be found in the impact assessment of the proposals for the CAP post 2013 which can be consulted online at <a href="http://ec.europa.eu/agriculture/policy-perspectives/impact-assessment/cap-towards-2020/index">http://ec.europa.eu/agriculture/policy-perspectives/impact-assessment/cap-towards-2020/index</a> en.htm

The Financial Programming for 2014 to 2020 amounts to a total of 312 383, 1 Million EUR.

The above graph gives an overview of the intervention logic of Pillar II. Overall, there are **six priorities** (**specific objectives**) **for Rural Development**, each broken down into a number of **focus areas** (with target indicators). Five priorities directly feed into the CAP general objectives. Two priorities aim at improving competitiveness and farm viability, improving the position of the primary producers in the food chain and management of risks. In this way they contribute to the general objective of viable food production. Two other priorities (one focussing on restoring, preserving and enhancing ecosystems and one focussing on resource efficiency and a shift towards a low carbon and climate resilient economy) contribute to the general objective of sustainable management of natural resources and climate action. One priority focusses on social inclusion, poverty reduction and economic development in rural areas, thereby contributing to the general objective of a balanced territorial development.

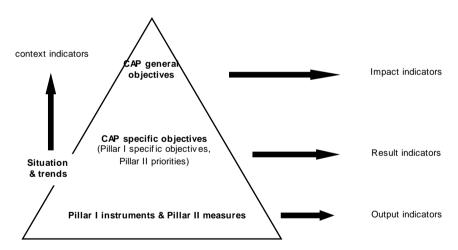

These five priorities are supported by one overall priority, i.e. knowledge transfer and innovation, which contributes to the general CAP objectives via the five other priorities.

The Financial Programming for 2014 to 2020 amounts to a total of 95 915, 8 Million EUR.

#### Measuring the CAP performance

The performance of the CAP will be measured at different levels. Measurement of impacts is done at the level of the general objectives, results at the level of specific objectives and outputs at the level of instruments/measures. It is important to acknowledge that often it is not a single instrument that contributes to reaching an objective, but multiple instruments together contribute to reaching the objectives. Similarly, a single measure can contribute to different objectives. On the same note, some indicators can contribute to describe progress of achieving different (related) objectives.

Moreover, while the contributions of the policy at the level of output can be determined relatively reliably, the influence of external factors (see point 3.3) becomes more important at the level of results and particularly at impact level. This implies that the output, result and impact indicators cannot be looked at in isolation, but instead require interpretation within their context. In agriculture, a wide range of factors such as climatological and meteorological circumstances, agronomic conditions, world market prices, economic developments etc. influence the impact of the policy. For this reason, the framework also includes a number of socio-economic, sectorial and environmental indicators that describe this general context in which the CAP operates.<sup>14</sup>

The CAP is implemented in shared management. Member States authorities are involved in all steps of the policy cycle – from design, management, control to monitoring and evaluation. Shared management also implies that the information used is largely obtained from Member States. When designing the monitoring and evaluation framework, particular attention was paid to the issues of proportionality, simplification and administrative burden reduction. As a result, the total number of indicators has been limited, the use of indicators

<sup>&</sup>lt;sup>14</sup> The complete list of impact, result, output and context indicators is provided in Annex 6.

based on existing, well-established data sources is encouraged as well as reuse of information already provided by Member States, e.g. via communications or Eurostat. The use of these well-established data sources also contributes to the reliability of the indicators.

#### **Evaluation of the spending programmes**

At EU level, the contributions of the policy towards the three general objectives will be evaluated in line with Article 30 of the Financial Regulation, Article 18 of the Rules of Application and the Commission guidelines for evaluations (efficiency, effectiveness, relevance, coherence, EU value added). To this aim, calls for tenders for a number of framework contracts will be published during 2015. More details of the evaluation planning can be found in the DG AGRI evaluation plan annexed to this document. The results of these evaluations will serve as input to the reporting on the results and impact of the policy, and where necessary, adaptations to the policy implementation and/or design.

Additionally, specific evaluation requirements are laid down for each Rural Development Programme.

### Monitoring and Evaluation Framework 2014-2020 and its link to the Management Plan 2015

The Monitoring and Evaluation Framework covers in the MP 2014 three main ABBs: ABB 02 (interventions on the agricultural markets), ABB 03 (direct aid) and ABB 04 (rural development). For the financial year 2015 which is a transitional year (payments for 2014) for direct payments (ABB 03), the framework used as a basis for MP 2015 was the 2007-2013 monitoring framework (i.e. used in the MP 2013 and 2014). Still, for this ABB a link of the specific objectives of the 2007-2013 programming period to the general objectives of the new programming period 2014-2020 is indicated.

Where relevant, the framework in the 2015 MP is based on the outcome of the agreement reflected in the programme statements.

#### 3.3 External factors influencing the CAP reaching its objectives

Agriculture, being the primary sector responsible for the production of food, feed and biomass, takes place in a context that reflects the wide reach of agriculture. Agriculture depends on economic developments, as every economic sector; it interacts with nature and its production potential depends on natural resources such as soil, water and biodiversity; and agricultural activity is closely interlinked with the wider rural economy and its development. These external interactions are reflected in the three CAP general objectives. External factors have an effect on all three CAP objectives. The relative importance of the external factors differs from objective to objective, across sectors within agriculture, and geographically.

The CAP general objective of viable food production can be essentially considered as summarising the specific "economic" objectives of the CAP. Viable food production and related specific objectives such as farm income, competitiveness, and market stability depend very much on harvests, or more generally, agricultural production in the EU and other main producing areas. This in turn is influenced by natural factors such as meteorological conditions or the occurrences of pests, but also other developments influencing prices for agricultural products and inputs such as high energy or fertiliser prices might play a role (geopolitical and macroeconomic developments). Similarly, factors that influence demand for agricultural products (speculation, food scares...) can play an important role in the attainment of the objectives. In this context the impact of political decisions should not be underestimated, such as the recent Russian ban on some EU agricultural products amply demonstrates.

The general objective of sustainable management of natural resources and climate action essentially covers the ecological specific objectives of the CAP. For the attainment of these, basically the same external factors as mentioned for viable food production apply. While the CAP includes a set of actions beneficial for the climate and environment, their impact strongly depends on local conditions (eg. appropriateness of water use, measures combating soil erosion etc.) and on potential ad-hoc adverse weather events (droughts and floods) or other intervening factors (e.g. pests). In addition, the CAP instruments alone are not sufficient to counterbalance the overall negative trend for water quality, soil organic matter and biodiversity. Moreover, also here an important role is played by economic factors that influence the production- and investment decisions by farmers and behaviour of consumers.

Finally, reaching the objective of balanced territorial development depends very much on the way existing governance structures in Member States/Regions manage to use the possibilities offered by the CAP into addressing local needs, taking into account the aforementioned external factors of human or natural origin. Evidently, the challenges are not the same across the EU and also existing cultural, political, geographical or historical factors can influence the attainment of objectives. For this reason, at the level of Rural Development Programmes, a detailed ex-ante evaluation and SWOT analysis are required before the RDPs can be implemented.

To be able to better interpret the impact and result indicators of the CAP, as part of the monitoring and evaluation framework a set of context indicators have been developed. These can be found in **annex 6** and give a more elaborated picture on potential influencing factors.

#### 4. SPECIFIC OBJECTIVES FOR OPERATIONAL ABB ACTIVITIES

#### 4.1 ABB 02 – Interventions on the agricultural markets

The Common Market Organisation (CMO) of Agricultural Markets Regulation lays down provisions on support measures for agricultural markets, aid schemes for certain sectors/uses, the encouragement of producer cooperation and competition, marketing standards and trade in agricultural products. The added value of the intervention of the EU where it does not have exclusive competences is an improved market orientation, strengthening of the safety net for farmers and a better standing for producer cooperation. The EU competence for ensuring the proper functioning of the single market, notably for agricultural products, is based on Article 39 TFEU. When application of a market measure is at choice of the Member State, e.g. school milk, school fruit, certain wine support measures, the EU competence is based on the provisions in the basic act of the CMO, the delegated and implementing acts based on them, and the conditions for co-financing. When application of a market measure is at choice of operators (for example creating a producer organisation), and the operators decide for financial EU support (only for the fruit and vegetables or milk sector) and/or for exemption of certain competition rules, the EU competence is also laid down in the basic act.

The CMO provides for different types of EU interventions, of regulatory character:

- Public intervention (purchase and resale of goods of specific sectors)
- Private storage aid (payment for the temporary storage of goods of specified sectors)
- School fruit schemes (co-funding) and school milk scheme (flat-rate funding based on a maximum of quantity of milk per child per day)
- Operational funds in fruit and vegetables, and in the olive sector
- National Support programmes in the wine sector including mainly promotion, innovation, restructuring of vineyards, harvest insurance, and investment aids.
- Management of vine planting
- Support programmes in the apiculture and hops sectors
- Marketing standards, wine labelling and quality
- Temporary measure for sugar quotas (until 2017)
- Import and export rules for agricultural products
- Exceptional measures covering market disturbance, loss of consumer confidence after animal or plant health risks and measures to resolve specific problems
- Certain reporting requirements of the Commission covering milk, apiculture, and competition

The Commission prepares and adopts the delegated and implementing acts for these measures. In addition, the Commission is responsible towards the budget authority for the management of the EAGF, whereas, according to the principle of shared management, the payments to the beneficiaries are made by the Member States who themselves work through national or regional paying agencies accredited on the basis of a set of criteria laid down by the Commission.

#### Planned evaluation:

- Beef labelling rules completion in 2015.
- Evaluation of the milk package completion in 2017.
- Evaluation of the impact of the CAP measures towards the viable food production in the cereals sector completion in 2018.
- Evaluation of the impact of the CAP measures towards the viable food production in fruits and vegetables completion in 2019.

## External factors affecting the Specific objective 1: To improve the competitiveness of the agricultural sector and enhance its value share in the food chain

Exchange rate EUR/\$US- As the European Union's agricultural markets are increasingly integrated in the global markets, the competitiveness of the sector lies not only in its productivity and profitability, but also in the macroeconomic climate. The potential strengthening of the Euro vis-à-vis other currencies in which commodities are traded (especially US dollar) would make EU products more expensive, thus less price competitive.

|---|-----------------------------------|--------|
| Description   | Indicator                         | Target |
| Market measures   | Regulatory adoptions              | 2015   |
| Exceptional measures with a particular emphasis on the follow-up of the Russian embargo. In particular, with the opening of intervention for butter and SMP on 1 January, it is possible that some quantities of these products are brought in. In such a case, the necessary measures will have to be put in place to secure the smooth release of these quantities back into the market when the situation would make this advisable. | Quick reaction whenever necessary | 2015   |

#### External factors affecting the Specific objective 2: To maintain market stability

- Exchange rate EUR/\$US As the European Union's agricultural markets are increasingly integrated
  in the global markets, the competitiveness of the sector lies not only in its productivity and
  profitability, but also in the macroeconomic climate. The potential strengthening of the Euro visà-vis other currencies in which commodities are traded (especially US dollar) would make EU
  products more expensive, thus less price competitive.
- 2. Russian ban for some EU products As the exports of EU agrifood products steadily increase, the changing trade policies of partner countries can impact market stability by closing a certain export outlet and leading to oversupply on the internal market. Russia, one of the main export destination of EU agricultural exports, imposed a ban on imports of certain agricultural products from the EU (dairy, meats and fruits and vegetables) in August 2014, thus creating market uncertainty about possible new outlets for products traditionally exported to Russia and anticipation of oversupply on the EU market, especially for the perishable products (fresh fruits and vegetables) but also dairy products, destabilising internal EU market.

<sup>&</sup>lt;sup>15</sup> In commitment appropriations

<sup>&</sup>lt;sup>16</sup> The figure relates to commitment appropriations and does not include the estimated assigned revenue to be available to this budget item at EUR 362.4 million.

17 Outputs are based on the 2013 budget, pending the notification of Member States' programmes.

Outputs are based on the 2013 budget, pending the notification of Member States' programmes.

<sup>19</sup> The figure relates to commitment appropriations and does not include the estimated assigned revenue to be available to this budget item at EUR 14.3 million.

Figure for 2013.

Based on the analysis of monitoring reports 2012/2013: 61 000 schools and around 8.6 million children; 24 Member States participating in 2012/2013; School year 2011/2012: 55 000 schools, around 8.1 million children.

#### 4.2 ABB 03 - Direct Aids

Article 39(1)b of the Treaty on the Functioning of the European Union (TFEU) lays down that one of the objectives of agricultural policy is "to ensure a fair standard of living for the agricultural community, in particular by increasing the individual earnings by persons engaged in agriculture". This objective is to be reached by a common policy, whose justification at EU level is detailed under general objectives.

By providing a basic support for agricultural income, direct aids also contribute to the objective of a regional balance in land use and agricultural activities. As main user of land, agriculture has a unique role to play in the management of natural resources and as a provider of public and largely non-marketable goods and services, preserving biodiversity and landscapes, as well as contributing to the provision of clean water, soil and air.

By means of their high transfer efficiency direct aids support and stabilise farmers' incomes and allow a socially acceptable adaptation process towards a more competitive European agriculture in the face of new challenges.

The responsibilities of the Commission are to ensure proper interpretation and implementation of the rules by Member States by providing adequate support and information through Management Committees, Experts Groups meetings, bilateral meetings and written replies to Member States representatives, organisations, stakeholders, etc.

Management and implementation of the direct support system as set out in Council Regulation (EC) No 73/2009 requires the administration of various Commission Regulations laying down detailed implementing rules as well as their adaptation over time, notably within the framework of the Management Committee for "Direct Payments". This also includes the provision, by the Commission, of the legislative framework with regard to the Integrated Administration and Control System (IACS), in particular with regard to the Land Parcel Identification System (LPIS).

The management and implementation of the direct support system requires the transmission by the Member States of data (communications) and assessment of a number of payments by the Commission (as for instance the specific support under Article 68 of Council Regulation (EC) No 73/2009). This is the purpose of the ISAMM<sup>22</sup> system.

The new Regulation on Direct Payments<sup>23</sup> and the new Horizontal Regulation<sup>24</sup> on the financing, management and monitoring of the CAP were adopted in December 2013 by the Council and the EP.

The regulations include a new architecture of direct payments with a Basic Payment Scheme plus mandatory additional layers consisting of the Payment for agricultural practices beneficial for the climate and the environment ("greening") and the Young Farmers Scheme. Furthermore, optional schemes may be introduced by Member States, such as the Small Farmers' Scheme, Payment for Areas with Natural Constraints, or Voluntary Coupled Support. The new regulation reinforces the definition of an "active farmer".

<sup>23</sup> Regulation (EU) No 1307/2013 of the European Parliament and of the Council of 17 December 2013 establishing rules for direct payments to farmers under support schemes within the framework of the common agricultural policy and repealing Council Regulation (EC) N° 637/2008 and Council Regulation (EC) N° 73/2009, OJ L 347 of 20.12.2013

<sup>&</sup>lt;sup>22</sup> Information System for Agricultural Market Management and Monitoring

Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy and repealing Council Regulations (EEC) No 352/78, (EC) No 165/94, (EC) No 2799/98, (EC) No 814/2000, (EC) No 1290/2005 and (EC) No 485/2008, OJ L 347 of 20.12.2013

The reformed system of direct support will become applicable from 1 January 2015. To ensure the transition for the year 2014, a Regulation<sup>25</sup> of the European Parliament and of the Council laying down certain transitional provisions and amending Council Regulation (EC) No 73/2009 as regards its application in the year 2014 was adopted in December 2013. The Commission delegated Regulation (EU) No 639/2014 and the Commission Implementing Regulation (EU) No 641/2014 supplementing the basic act for direct payments were adopted by the Commission and published on 20 June 2014. Detailed provisions regarding the Integrated Administration and Control System (IACS) are set out in the Commission delegated Regulation No 640/2014 and in the Commission Implementing Regulation No 639/2014.

The direct support system is financed by the EAGF under the shared management mode. The Commission maintains a robust system of control and monitoring to ensure the sound and efficient shared financial management and the monthly reimbursement of the eligible expenditure and to account for it.

#### **External factors**

Some external factors beyond the control of the Commission could affect the achievement of the 5 specific objectives linked to direct support. They can be summarised as follows:

- The projected macro-economic environment characterised by a very slow economic growth and a declining euro on the currency markets could significantly affect the perspectives for the domestic agricultural markets in 2015 and for the income situation of farmers. It could also directly impact, through the budgetary policy at Member State level and the resulting resource conditions for public administration, the implementation of the new direct support system.
- The short-term perspectives for world commodity markets (both agricultural and non-agricultural) could significantly influence EU agricultural markets and short-term developments in farm income;
- Finally other external factors of differing nature (e.g. political environment such as the Russian embargo, climatic conditions) could influence to a certain degree the projected trend on farmers' income and the effectiveness of the direct support instrument.

Regulation (EU) No 1310/2013 of the European Parliament and of the Council of 17 December 2013 laying down certain transitional provisions on support for rural development by the European Agricultural Fund for Rural Development (EAFRD), amending Regulation (EU) No 1305/2013 of the European Parliament and of the Council as regards resources and their distribution in respect of the year 2014 and amending Council Regulation (EC) No 73/2009 and Regulations (EU) No 1307/2013, (EU) No 1306/2013 and (EU) No 1308/2013 of the European Parliament and of the Council as regards their application in the year 2014

| Planned evaluation:   |  |                       |  |  |

This specific objective will be evaluated under the framework contract for the evaluation of the contribution of the CAP to the general objective "viable food production"

 ${f 26}$  The calculation is based on 2013 budget execution data and 2013 farm income data

28 Execution for the Budget 2014 (calendar year 2013)

The wording of this objective was adapted to take into account the provisions of the Regulation (EU) No 1307/2013 of the European Parliament and of the Council of 17 December 2013 establishing rules for direct payments to farmers under support schemes within the framework of the common agricultural policy and repealing Council Regulation (EC) No 637/2008 and Council Regulation (EC) No 73/2009, as regards their application as of 2015.

| 83% support the reduction of direct payments to farmers not complying with environmental rules 84% support the reduction for non-compliance of animal welfare rules   | Maintain the positive opinion  With the cross compliance the CAP is more sustainable and more compatible with the society's expectations. Therefore if cross compliance shows an important support by the |  |  |

<sup>29</sup> The wording of this objective was updated to reflect the phasing in of certain measures of the 2014-2020 CAP.

New indicator, contributing to the KPI presented in Part 2.

In view of the payment profile for rural development, the percentage of payments covered by cross compliance was higher in the earlier part of the programming period 2007-2013. This reflects the fact that the rural development measures that are not falling under cross compliance have a different payment profile than the ones falling under cross compliance: measures not under cross compliance tend to have an increasing execution over the period and thus the % covered by cross-compliance will decrease over the programming period.

| 86% support the reduction of direct payment to  | public opinion, its impact will be significant. |  |  |

\_

<sup>&</sup>lt;sup>37</sup> In their annual implementation reports for 2012, the Member States concerned (except Greece) have communicated data related to the common performance indicators as requested by the Commission services. However, the provided data may not be fully in line with the requirements of the Commission services and thus not mutually comparable. Therefore, these indicators shall be evaluated with due caution.

The data provided by the French authorities on the SAU in 2011 was only provisional. It was corrected in the annual report for the year 2012. This explains the differences among the data for 2011 and 2012. The variation shown in the present document is calculated on the latest data provided by the French authorities for 2011.

<sup>&</sup>lt;sup>39</sup> In the annual reports for 2010, 2011 and 2012 the Portuguese authorities have only communicated data concerning 2009.
<sup>40</sup> The Greek authorities have not communicated any data related to the common performance indicators requested by the Commission services in its last annual reports for 2010, 2011 and 2012. In 2010 for the first time, a budget line for technical assistance was foreseen in the programme with a view to compiling a report including the agreed indicators. Nevertheless, the Greek authorities did not manage to complete the tender procedure on time, failing to provide a report with the requested elements.

# 4.3 ABB 04 - Rural development

#### **Objectives**

As Pillar II of the CAP, rural development policy will – together with direct payments and the market measures of Pillar I – help to achieve the CAP objectives laid down in the Treaty on the Functioning of the European Union (TFEU).

In so doing it will help to deliver smart, sustainable and inclusive growth – the goals of the *Europe 2020* strategy - in coherence with the general objectives for economic and social cohesion policy laid down in the TFEU.

Under these general objectives, the long-term objectives specific to rural development policy concern: the competitiveness of the farm sector; sustainable management of natural resources, and climate action; and balanced territorial development.

These are further detailed in six "Union priorities for rural development" which relate to:

- 1. knowledge transfer and innovation in agriculture, forestry and rural areas;
- 2. farm viability and competitiveness, innovative farm technologies and sustainable management of forests;
- 3. food chain organisation, animal welfare and risk management in agriculture;
- 4. restoration, preservation and enhancement of agricultural and forest ecosystems;
- 5. resource efficiency and a low-carbon and climate-resilient economy in the agriculture, food and forestry sectors;
- 6. social inclusion, poverty reduction and economic development in rural areas.

#### Co-ordination with other EU funds

In the period 2014-2020, the European Agricultural Fund for Rural Development (EAFRD — which finances rural development policy) will operate in more effective co-ordination with the other European Structural and Investment Funds (ESI Funds) - i.e. the European Regional Development Fund, the Cohesion Fund, the European Social Fund and the European Maritime and Fisheries Fund.

This improved co-ordination will be achieved through (inter alia):

- a Common Provisions Regulation<sup>45</sup> setting out certain harmonised implementation rules for all the ESI Funds;
- Partnership Agreements submitted by each MS, which show how a given MS will use the ESI Funds together to help achieve the objectives of the Europe 2020 strategy.

Delivery mechanisms: rural development programmes

Regulation (EU) No 1303/2013 of the European Parliament and of the Council of 17 December 2013 laying down common provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund, the European Agricultural Fund for Rural Development and the European Maritime and Fisheries Fund and laying down general provisions on the European Regional Development Fund, the European Social Fund, the Cohesion Fund and the European Maritime and Fisheries Fund and repealing Council Regulation (EC) No 1083/2006.

Rural development policy will achieve its objectives essentially through seven-year national and /or regional rural development programmes (RDPs) — drawn up by Member States / regions and approved by the Commission, according to the principle of subsidiarity.

In general, RDPs must address at least four of the Union priorities for rural development, on the basis of a thorough analysis of the specific needs of each programming area. In this way, rural development policy will build a bridge between EU-level objectives and the very particular features of the EU's diverse individual rural areas.

RDPs will address the priorities in question through a selection of rural development measures which are chosen and adapted from a "menu" set out in the Rural Development Regulation<sup>46</sup>.

The available measures offer various types of support. These include funding for investments, areabased payments, agricultural and rural business start-up, and operating costs - related to human capital, physical capital, infrastructure, land management, experimentation / development and various forms of co-operation.

A range of these measures can be used to support the European Innovation Partnership (EIP) for Agricultural Productivity and Sustainability, which will help to bridge the gap between researchers and farmers for the sake of a more profitable and resource-efficient agricultural sector.

For the sake of sustainable development, at least 30% of each RDP's EAFRD budget must be spent on specific environment- and climate-related measures.

Similarly, in order to promote bottom-up local development strategies, at least 5% of the EAFRD contribution to rural development programmes must be spent on the LEADER approach for local development - which also offers the opportunity to realise joint transnational co-operation projects between rural areas. Community-Led Local Development (CLLD) strategies can also be co-funded by the EAFRD and the other ESI Funds, for example to strengthen rural-urban interlinks and cooperation.

#### Delivery mechanisms: other elements

To ensure that EAFRD funding delivers maximum value for money, Member States must demonstrate that certain "ex ante conditionalities" (i.e. important general pre-conditions for funding) are met – or else submit action plans explaining how they will be met by a certain deadline. In serious cases of non-fulfilment, some payments could be suspended.

Another new responsibility for Member States is to demonstrate that rural development measures as they have programmed them are verifiable and controllable.

A performance framework system has been established to link the use of a RDP's full budget to sufficient performance levels in the implementation of that RDP.

RDPs will be aimed squarely at delivering measurable results, through the establishment of *ex ante* targets (based on a set of common result indicators) in relation to all the priorities and focus areas (sub-priorities) addressed by the programmes. A Common Monitoring and Evaluation Framework (CMEF) will provide the basis for regular follow-up of RDPs' performance.

Page **39** of **131** 

<sup>46</sup> Regulation (EU) No 1305/2013 of the European Parliament and of the Council of 17 December 2013 on support for rural development by the European Agricultural Fund for Rural Development (EAFRD) and repealing Council Regulation (EC) No 1698/2005

Finally, rural development policy's effectiveness will be underpinned by networking — including exchanges of ideas on good practice - between various interested parties. The main vehicle for networking is the European Network for Rural Development, interfaced with national networks. There will also be a dedicated EIP network at EU level to support the EIP approach (see above).

#### The responsibilities of the Commission

Rural development policy is based on shared management. Member State authorities therefore have a crucial role in ensuring sound financial management and implementing RDPs effectively in order to achieve the policy's objectives.

However, the Commission also has substantial responsibilities.

When RDPs are negotiated (or subsequently modified), the Commission will play an essential role in ensuring that what Member States / regions propose in their programmes is in line with the relevant legislation and the policy's strategic framework, within the limits of subsidiarity.

The Commission has already made a contribution in this area, for example by providing a comprehensive set of guidance documents. This work will continue. A dedicated management committee will provide a forum for regular dialogue between the Commission and Member States.

In the interests of sound financial management, and in accordance with Article 317 of the Treaty, the Commission will carry out the measures and controls laid down in the new Horizontal Regulation<sup>47</sup>. This includes audits, management and control procedures, and annual clearance of accounts and conformity audits, which could lead to financial corrections.

In the period 2014-2020, the Commission has new powers in the area of financial management – the right to suspend payments to a Member State if systemic deficiencies are found in that Member State's control systems.

Finally, the Commission is closely involved in the process of monitoring and evaluation mentioned above. Two major monitoring milestones will come in 2017 and 2019, linked to the performance framework.

#### Horizontal issues under the CAP: protecting geographical indications and organic farming

The EU's policy instruments concerning geographical indications and organic farming are closely linked to rural development policy, but also to Pillar I of the CAP.

With respect to Protected Designations of Origin (PDO), Protected Geographical Indications (PGI) and Traditional Specialties Guaranteed (TSG) for foodstuffs, wines, aromatised wines and spirit drinks, the Commission manages the registration of new names for such products, registers of existing names, and supervises related control systems put in place by Member States. Registered names enjoy a high level of protection against all kinds of misuse. It has been shown that protection of such names can help maintaining production and jobs in rural areas. The right to sell products with a protected geographical indication can also allow producers to obtain a better price. At the same time, consumers have assurance that a product is actually coming from a given region, and has special characteristics because of this origin. Managing the rules for organic farming in the framework of the

-

Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy and repealing Council Regulations (EEC) No 352/78, (EC) No 165/94, (EC) No 2799/98, (EC) No 814/2000, (EC) No 1290/2005 and (EC) No 485/2008, OJ L 347 of 20.12.2013

CAP is the second big chapter of EU agricultural quality policy. The Commission is responsible for the European Union's legal framework for organic agricultural production, including EU-wide harmonised rules on organic production, as well as rules on labelling, controls and imports. It is the Commission's role to ensure effective supervision of the organic production system. The 2014 "Action Plan for the future of Organic Production in the European Union" aims to further develop the EU organic sector, to ensure consumer confidence in the EU organic production scheme and to reinforce the external dimension of EU organic production.

N.B. Baseline, milestones and targets for all indicators will be provided once the programming is finalised.

#### Planned evaluations for ABB 04:

- Ex-ante evaluation synthesis of RDPs 2014-2020 completion in 2015.
- Technical assistance for RD evaluation 2014-2020 (Helpdesk) annual from 2015.
- Synthesis of Rural Development 2007-2013 ex-post evaluations completion in 2017.

# 4.4ABB 05 – Instrument for Pre-Accession Assistance for Rural Development Programmes under the Agriculture and Rural Development Policy Area

This activity is an integral part of the broader EU pre-accession strategy under the Instrument for Pre-Accession Assistance (IPA I and IPA II) to support the Enlargement policy of the Union in Croatia (phasing –out), the Candidate Countries (Turkey, Serbia, the former Yugoslav Republic of Macedonia and Montenegro) and in the potential Candidate Countries (Bosnia and Herzegovina, Kosovo<sup>52</sup> and Albania). Enlargement policy itself is part of the external action of the Union and contributes to meeting the common objectives in terms of global challenges, global response and global leadership. The Enlargement policy contributes to ensuring stability, security and prosperity in the immediate neighbourhood of the Union.

The successive enlargement of the EU is by its very nature a common task which can be pursued only at EU level. Only the Member States acting together can decide on the accession requests by new candidates and give thus value-added to the enlargement process. Granting pre-accession assistance under one single IPA instrument on the basis of a single set of criteria is more efficient than granting assistance from multiple sources (including the national budgets of the Member States) following different procedures and priorities.

Pre-accession assistance in the field of agriculture and rural development will be implemented under multi-annual programs which are based on the basic principles and rules applied for rural development programs for Member States. This is required as beneficiary countries need to be supported to prepare for the implementation of the CAP upon accession and to develop and adapt their farming, food production and rural development structures in a sustainable way as well as to upgrade to EU standards. Their national administrations also need support to develop the capacity required for the effective and efficient management and control of policies and programmes in the field of CAP and rural development.

Thus activity ABB 05 is contributing to the development of the human and physical capital, by increasing food-safety and the ability of the agri-food sectors to cope with competitive pressure and market forces as well as to progressively align with the Union standards, while pursuing economic, social and environmental goals in balanced territorial development of rural areas. Additionally investment support is channelled through management and control systems which correspond to the good governance standards and the principles of modern and efficient public administration, and resemble the respective structures with functions of a similar nature in the EU Member States.

Assistance under these programmes is based on the condition that the beneficiary countries have set up the required institutions and management and control systems for the implementation of IPARD. IPARD provides support to the beneficiary countries' national administrations to implement certain types of rural development measures and approaches, including agri-environmental schemes and LEADER type measures. Operationally, this is ensured through the conclusion of Framework, Sectoral and Financing Agreements for the decentralised management of IPARD programmes in accordance with financial management and control rules of the EU and through the approval, monitoring and evaluation of IPARD programmes in partnership with the beneficiary countries.

The activity also includes the follow-up of the implementation of IPARD I programmes for Turkey, the

Page **49** of **131** 

<sup>&</sup>lt;sup>52</sup> This designation is without prejudice to positions on status, and is in line with UNSCR 1244 and the ICJ Opinion on the Kosovo declaration of independence.

former Yugoslav Republic of Macedonia and the new Member State Croatia and the closure of the former Special Accession Programme for Agriculture and Rural Development (SAPARD) programmes for Romania, Bulgaria and Croatia for which the final balance of the EU funds still has to be settled in 2014. Finally, under this activity input and advice is provided to beneficiary countries in the framework of programming under the institution building part of the IPA policy area "agriculture and rural development".

This activity contributes to achieving all three general objectives of the CAP.

#### 4.5 ABB 06 - External Relations

In accordance with Articles 206 and 207 of the Treaty on the Functioning of the European Union, the Union establishes a customs union and a common commercial policy. The Union has exclusive competence in this area (Article 3(e) TFEU). In accordance with Article 8 TEU the Union also develops a neighbourhood policy. Finally, in accordance with Article 49 TEU the Commission has an important function in relation to negotiations with European States applying for admission to the Union.

The Commission conducts negotiations in this context. To this end, DG AGRI contributes to the negotiation of international agreements touching upon areas of agricultural policy (trade in agricultural products, quality policy, food security, etc). DG AGRI also deals with the implementation of such international agreements and manages the relations with third countries related to agriculture.

The overall objectives of these external relations activities of DG AGRI are to promote and defend the Union's agricultural sector internationally in a changing world trade environment, to preserve and adapt the European model of agriculture, and to contribute to sustainable economic development.

This activity covers participation and negotiations in various multilateral for a, including the WTO, OECD, G7 and G20, the FAO and other UN agencies, as well as in bilateral relations with various third countries, regions or key regional groupings (e.g. the African Union). It also comprises agricultural relations with European Neighbourhood countries and candidate or potential candidate countries, and coordination of the enlargement process in relation to agriculture. This activity also includes economic analysis of trade, agricultural policy in third countries and other international matters in agriculture.

#### Planned evaluation:

An evaluation on the preferential agricultural trade regimes has been finalised in November 2014. Currently no new specific evaluation is foreseen for this ABB, but a study on the impact of free trade agreements is scheduled. Moreover, the international aspects of the CAP are assessed in the context of the framework contracts on the evaluation of CAP general objectives.

Relevant general objectives: The activity contributes to achieving all three general objectives of the CAP. Specific objective 1: To promote the EU agricultural sector by ☐ Programme-based contributing to successful negotiation and cooperation within the ☑ Non-programme-based World Trade Organisation (WTO) and other multilateral organisations such as the Organisation for Economic Co-operation Development (OECD) and the Food and Agriculture Organisation (FAO). Result indicator: Timely contribution to negotiations and other ongoing processes in multilateral fora Source: DG AGRI Target (mid-term) Baseline 100% of contributions in time. 100% contributions of in time. Better Examples: understanding and support for EU positions and Provision of negotiating lines to take in the policies in international fora. context of WTO Agricultural negotiations under the Doha Development Agenda (DD) running up This target was agreed within DG AGRI and is to and at the 10<sup>th</sup> WTO Ministerial Conference reflected by relevant procedures for conducting scheduled for late 2015. negotiations. Provision of negotiating lines to take in the context of negotiations on the proposed revision of the WIPO Lisbon Agreement for the protection of appellations of origin running up to and at the Diplomatic Conference scheduled for May 2015. Relevant input to agriculture-related FAO activities. Main outputs in 2015 Description Indicator **Target** WTO Agricultural negotiations Contributions made to the work Throughout 2015 under the Doha Development post-Bali running up to and at Agenda (DDA) running up to and the 10<sup>th</sup> Ministerial Conference at the 10<sup>th</sup> WTO Ministerial Conference scheduled for late 2015 Negotiations in the WTO on Contributions made Throughout 2015 compensatory adjustments for negotiations other WTO Members in respect of Croatia's accession to the EU (Article XXIV:6 GATT) Negotiations on the proposed Contributions made to the Throughout Jan-May 2015 revision of the WIPO Lisbon negotiations running up to and Agreement for the protection of at the Diplomatic Conference to appellations of origin amend the Lisbon Agreement, scheduled for May 2015 Promotion of EU agenda on Extent to which agriculture and EU agenda and objectives on agriculture and food security in food and nutrition policy is agriculture and its contribution the FAO and other international reflected in the outcomes of the to food security reflected in the fora, including post 2015 agenda principal multilateral processes outcomes major of all as well as in Expo Milano 2015 processes in 2015 and beyond multilateral and events in 2015

#### External factors affecting the Specific objective 1

In multilateral fora the EU's ability to shape outcomes is subject to external factors such as the extent to which the Commission can exercise its competences in certain multilateral fora, the positions or strength of opposition of other countries or regions because of their different levels of development or because they have different political priorities. Geopolitical developments outside the EU's control can also influence outcomes. On some FAO issues competence is shared with EU member states. This can affect its ability to ensure its position is understood and taken up by the FAO membership. To take another example, in the G7 or G20 different presidencies have different priorities and agriculture and food security is not always a priority. And in the WTO the EU while being a determining actor cannot by itself secure outcomes in line with its interests. It needs the cooperation and common understanding of other major trading partners and blocs who may have different policy objectives.

#### Relevant general objectives: The activity contributes to achieving all three general objectives. Specific objective 2: Improve market access for agricultural products ☐ Programme-based negotiating or revising bilateral agreements; resolving ☒ Non-programme-based trade irritants; securing protection for EU geographical indications in third countries via negotiating relevant provisions within Free Trade or Association Agreements or stand-alone agreements; carrying out dialogues with strategic partners in agriculture and cooperation activities; and contributing to sustainable economic development in particular in developing countries. Result indicator: Timely preparation of and contribution to bilateral negotiations: leading to the achievement of the objectives set out in the negotiating mandates set by the Council. improving the level of market access to third country markets for EU exports, increasing in absolute or relative terms agricultural trade; securing better legal protection for EU GIs in other markets. Source: DG AGRI Baseline Target (mid-term) 100% of timely contributions. Examples: 100% of contributions in time. Improved market Contributing to negotiations with the United access including better GI protection. Reduction of trade irritants and Extent to which obstacles are Reduce obstacles to export for reduced or removed major agricultural commodities obstacles in third country markets and products in key overseas markets, including north and Latin America, E Asia and the

European neighbourhood.

#### External factors affecting the Specific objective 2

Agriculture in most cases is only one component of the EU's bilateral trade agreements. Extent to which objectives are achieved may in some cases therefore be dependent on outcomes in other areas under negotiation. Geopolitical developments can also affect achievement of specific objectives: for example the recent Russian ban of several EU agricultural sectors has an impact on the objective to improve market access and reduce barriers in third markets. Similarly, political developments in partner countries such as changes of government can affect partners' readiness or capacity to negotiate and conclude free trade agreements.

| Relevant general objectives: The activity contributes to achieving all three general objectives.   |                  |   |  |  |  |  |
|--|------------------|---|--|--|--|--|
| Specific objective 3: To promote the EU interests and positions on ☐ Programme-based agriculture and rural development in the relations with ☒ Non-programme-based enlargement countries and to assist the enlargement countries in their alignment to the CAP |                  |   |  |  |  |  |
| Result indicator: Timely contributi<br>Source: DG AGRI   | on to the Commis | sion's work in the  | area of enlargement  |  |  |  |
| Baseline (2013)  |                  | Target (mid-tern  | n)   |  |  |  |
| 100% of timely contributions Example: Preparation of screening report fo   | r Montenegro.    | 100% of contributions in time  This target was agreed within DG AGRI and is reflected by relevant procedures for conducting negotiations. |  |  |  |  |
| Main outputs in 2015   |                  |   |  |  |  |  |
| Description  | Indicator        |   | Target   |  |  |  |
| Assisting candidate countries to align themselves to the Common Agricultural Policy in the framework of accession negotiations and preparatory processes   | countries align  | nich candidate<br>themselves to<br>the field of<br>and rural  | All candidate countries to make measurable progress in aligning to the CAP |  |  |  |

#### External factors affecting the Specific objective 3

The principal external factors that can affect the achievement of Specific Objective 3 are the level of technical preparedness of the accession countries to adopt the acquis in the agriculture and rural development sector; and the countries' overall political commitment to making the necessary changes in view of enlargement, some of these changes requiring reform or liberalisation in agricultural trade to take place at an early stage in the alignment process.

#### 4.6 ABB 07 - Audit

Since agricultural expenditure is mostly implemented under shared management, the Commission's responsibility for the implementation of the budget under Article 317 of the Treaty on the Functioning of the European Union and the need for effective protection of the EU's financial interests require that the Commission verifies the conditions under which payments and controls have been carried out by the Member States.

This activity concerns the audit of agricultural expenditure through clearance of accounts procedures, mainly by means of system controls in the Member States, in order to protect the financial interests of the EU.

The Financial Regulation provides that the Commission and the Member States shall fulfil their respective control and audit obligations and assume the resulting responsibilities laid down in that Regulation. The Commission is also required by the Financial Regulation to make financial corrections on Member States in order to exclude from Union financing expenditure incurred in breach of applicable Union Law.

The legal framework for the CAP is laid down Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy (the "horizontal regulation"), and covers expenditure under both the European Agricultural Guarantee Fund (EAGF) and the European Agricultural Fund for Rural Development (EAFRD). This expenditure may only be covered by EU financing if executed by accredited paying agencies, which are subject to the conditions laid down in the above—mentioned regulation.

The audit work comprises an annual financial clearance and a multiannual conformity clearance. Both types may lead to financial corrections whereby expenditure which does not comply with the EU rules is disallowed and recovered from the Member States. A similar procedure applies under the IPARD programmes.

On the basis of Article 43 of Regulation (EU) No 1306/2013, financial corrections under conformity clearance decisions as well as irregularities are designated as revenue assigned to the financing of EAGF and EAFRD expenditure.

| ABB activity: ABB 07                                    |   |                         |                 |                             |  |        |  |

# 4.7 ABB 09 - Framework Programme for Research and Innovation (Horizon 2020) - Research and innovation related to agriculture

Horizon 2020 ('H2020') is the EU financial instrument for research and innovation for the period 2014-2020. It contributes to achieving the goals of Europe 2020 and the Innovation Union. A main objective is to strengthen the EU's position in science as well as in industrial leadership in innovation and to address major societal challenges. Within H2020 DG AGRI's competence focuses on implementing Societal Challenge 2 "Food security, sustainable agriculture and forestry, marine and maritime and inland water research and the bioeconomy" ('SC2').

Public research and innovation funding in Europe is primarily organised at the national level (up to 90-95%), which leads potentially to duplication and fragmentation of research efforts. Actions at EU level provide added value to national funding in particular with regard to promoting transnational research. The Union level is also necessary to ensure coherence in addressing societal challenges across sectors and links to relevant Union policies. Coordination of research and innovation at Union level will stimulate and help to accelerate the required changes across the Union, and thus provide the opportunity to generate greater efficiencies and impact.

'H2020' is implemented under direct management. Overall, DG AGRIs intervention will be based on providing financial support<sup>67</sup> (through spending programmes) to research, innovation and coordination actions under the following areas of SC2:

- 2.1 Sustainable agriculture and forestry;
- 2.2 Sustainable and competitive agri-food sector for a safe and healthy diet;
- 2.4 Sustainable and competitive bio-based industries and supporting the development of a European bio-economy.

In doing so, DG AGRI will closely liaise with DG RTD and the Research Executive Agency.

Funding for research projects under Horizon 2020 is organised in cycles of two years. Research funding is channelled to certain focus areas to optimise the European value added and to achieve the Horizon 2020 objectives. In this process stakeholders – both the providers of research and the users of research – are extensively consulted. Based on these focus areas calls for proposals are established covering a two year work programme.

The 2014 and 2015 calls for proposals have been established already. The programming cycle for the 2016 and 2017 calls for proposals has started.

The types of action to be used in 2015 include:

- Research and Innovation actions aiming at supporting the development of new Scientific and Technological knowledge as well as its deployment to the market and for the society.
- *Coordination and support actions* supporting strategic research partnerships and better coordination of agricultural research.

In comparison to the previous research programme, FP7, Horizon 2020 gives more importance to the use of the outcomes of research which should lead to innovation. The EIP network is meant to facilitate the dissemination of research results and the involvement of the wider agriculture sector in research projects in order to allow a quicker take up of research results and a better targeting of research questions.

Page **67** of **131** 

# **Responsibilities of the Commission**

The Commissions prepares proposals for focus areas and research topics following extensive consultation in the sector. Subsequently, the Commission is responsible for the management of the Research budget and its execution via the yearly calls for proposals.

#### Planned evaluation:

Given that the programme has just started, the evaluation of impact can only take place towards the end or after the completion of the programme, hence it has not yet been included in the 2015-2018 programme.

The reference for all the targets is the year when the last actions financed under H2020 will be finished, i.e. several years after the formal end of the programming period.

From the launch of the programme and until a critical mass of finished projects (ca. 10 % of all funded projects) has been reached, information about the two indicators below will be provided in the form of absolute number by the funded projects. On the basis of FP7 data it is considered that this critical mass of finished projects should be reached by 2019.

The result indicator was aligned with the respective indicator provided for in the Management Plan 2014 of DG RTD, i.e. reporting on *patent applications* only but not on *patents awarded* (as stated in the Programme Statement DB2014) since no meaningful information (or none at all) can be expected before 2019-2020.

**<sup>71</sup>** See footnote 50.

#### 5. HORIZONTAL ACTIVITIES

# 5.1 ABB 08 – Policy Strategy and Coordination

The ABB Activity "Policy Strategy and Coordination" aims at supporting policy making and promotes the development of a strategic planning culture within the DG in accordance with the Commission Strategic Planning and Programming cycle so that legislative proposals and non-legislative acts pass smoothly and efficiently through the institutional system. It aims at the development of an administrative culture of better regulation by screening existing policies and proposals for simplification where appropriate, and the use of evaluation and impact assessment as valuable policy instruments for shaping policy. With the introduction of the ordinary legislative procedure for the CAP under the Lisbon Treaty on 1 December 2009, the European Parliament is on an equal footing with the Council as a co-legislator on the CAP. A major activity of DG AGRI is the preparation of reform proposals, taking into account the envisaged new simplification and subsidiarity strategy announced by Commissioner Hogan, the negotiation of these proposals with the other institutions and the continuing monitoring of their implementation to ensure a harmonised application. The continued dialogue with the agricultural non-governmental organisations also plays an increasingly important role. The set-up of this dialogue has been reviewed in the sense that 13 civil dialogue groups have been created with a new composition based on an open call for applications to ensure a balance between economic and non-economic non-governmental organisations. The activity includes matters relating to the correct application of agricultural law and the internal market. Active promotion of the policies of the DG through provision of information, communication, awareness rising with media and general public and dialogue with decision-makers and other key stakeholders, brings its contribution to the successful implementation of DG AGRI's main policies. Sound coherence of the different activities within the DG, efficient and effective liaison internally and with the horizontal services, the Cabinet and the other institutions involved, are essential to strengthen and further support DG AGRI's policy strategy.

#### The areas covered are:

- Overall policy conception and formulation of the CAP on the basis of policy analysis, micro/macro-economic and quantitative analysis, including the Farm Accountancy Data Network (FADN), impact assessments and evaluation of present policy instruments;
- Co-ordination with other policy areas;
- Legal affairs, simplification and subsidiarity as well as decision making procedures, state aid/competition and infringements, control of implementation of the acquis, complaints, Ombudsman inquiries;
- Information and communication policy, relations with the other institutions and stakeholders, strategic planning and programming;
- Evaluations and studies carried out following calls for tenders in accordance with the multiannual DG AGRI Evaluation Plan (annex 4) and the Studies and Data Purchase Plan, which are regularly reviewed and updated.

The above activities entail only administrative expenditure. In terms of operational expenditure for the Union Budget the following parts of the activity are concerned:

- The Farm Accountancy Data Network (FADN);
- The surveys on the structure of agricultural holdings;
- Information activities, including grants to those parties carrying out CAP information actions;
- EAGF operational technical assistance.

This activity contributes to achieving all three general objectives.

Specific objective 1: To inform and increase awareness of the CAP by maintaining an effective and regular dialogue with stakeholders, civil society, and specific target audiences based on two key messages below:

- (1) The CAP has provided 50 years of service to European citizens, going beyond food production into public goods delivery.
- (2) The CAP is a living policy, evolving with society's needs and expectations:

Information policy – completion in 2015

- meeting the challenges of food security, climate change, sustainable use of natural resources and balanced territorial development,
- increasing the competitiveness of the farming sector, both economic and ecologically,
- contribute to smart, sustainable and inclusive growth in rural Europe in line with "Europe 2020" strategy.

<sup>&</sup>lt;sup>79</sup> RAD ("Recommendations/Actions/Discharge") is a DG BUDG database to monitor the implementation of European Court of Auditors, Council and European Parliament recommendations.

# 5.2 AWBL 01 – Management of the DG

This activity covers the work of the horizontal services: Human Resources Management, Training and Logistics within AGRI, Budget management and Finance, Information and Communication Technologies, Internal Control and Risk Management, Document management, Security and data protection. These services provide high quality administrative support, advice, assistance and control and monitoring of resource use of the DG AGRI.

This activity contributes to achieving all three general objectives.

| ABB activity: AWBM 01   |                                   |                       |            |                          |                       |       |

 Final figures taking account of initial budget, transfers and amending budgets.

Specific objective 2: To define, plan, set-up, maintain and develop high quality Information Technology (IT) infrastructures, tools and services so that (i) the staff is adequately supported in their operation, with the appropriate levels of training and security, and so that (ii) a high quality information system life cycle is assured in support of DG AGRI's activities. Indicator: Implementation of the relevant parts of the Schéma Directeur (ICT Investment Plan of DG AGRI). Source: Financial execution Baseline (2013) Target 100 % 95 % (unforeseen circumstances lead can to decommitments) Indicator: Servers' availability (averaged over one year) Source: Baseline (October 2012) Target >99 % ≥99 % (It takes into account critical systems which need to be restored within 1-2 days). Indicator: Information Systems User Satisfaction Source: Survey DG AGRI Baseline (October 2014) Target (mid-term) 81% >/= 80 %, to be progressively increased standard of (high quality with margin improvement)

IT enables DG AGRI to pursue its mandate and to adapt to the future new CAP. The role of the IT regarding the mission of the DG is:

- to make available a high quality and secure Information and Communication Technology environment (infrastructure, support and training), in co-operation with DG DIGIT, to support the DG in fulfilling its targets;
- to deliver and maintain up-to-date information and communication systems and services in support of the DG's activities, in line with the political priorities.

#### IT is fulfilling its role by:

- Providing IT instruments to support the business complying with the CAP regulatory framework and in implementing of the CAP Reform, including the control and mitigation of the related risks:
  - AGREX developments continue, taking into account the new CAP instruments (management of suspensions...) and the new ABAC architecture.
  - RDIS system will cover the closure and ex-post evaluation of the 2007-2013 period. The development of RDIS II covering the 2014-2020 period will continue, line with the various programming period deadlines. An update of

- the convergence plan towards a single common Programme Management back-office will be prepared by the business domain leader (DG REGIO).
- In support of the agricultural products quality regulation, the development of e Ambrosia continues, with the progressive phasing-out of e-Bacchus/e-SpiritDrinks, the integration of DOOR in the same IT system and the enrichment with additional workflows for processing new applications, objections, amendments and cancellation for wines, foodstuff and spirits, towards a unified IT instrument to support the agricultural quality products policy.
- CATS/COMBO functionalities will be extended with, among other features, additional functionalities for the financial correction module, adaptation of the audit deadlines and the multi-annual risk management.
- OFIS (Organic Farming Information System) provides and will continue to be extended to support to the action plan on the risk related to the supervision and control system of organic products, including the TRACES module for electronic certificates.
- Leveraging IT to promote innovation and simplify the administrative processes and procedures in order to increase their efficiency and effectiveness:
  - The ISAMM (Information System for Agricultural Market Management)
     Communication Module has attained a cruise speed, all remaining notification should be digitized during 2015-16. In parallel, the reporting and data analysis capabilities will be extended.
- Enabling a knowledge-based administration by facilitating the access to the information and promoting the linkage between IT systems and underlying processes:
  - The AGRIVIEW datawarehouse which provides DG AGRI with a single repository of integrated and consolidated data accompanied by reporting tools, in order to facilitate and support analysis, evaluation and decisionmaking provides now support to the preparation of the annual statistical agricultural reports of DG AGRI. In the pipeline there are the update of the Rural Development module and the CAP monitoring and evaluation indicators (CMEF).
  - The capabilities offered by the collaborative workspaces will be further exploited to increase co-operative activities and sharing of information

Almost 100% of development activities related to information systems are now provided through "Time&Means" contracts, given the proven better efficiency of this model. The agile development methodology (SCRUM) has also been introduced and leads to the delivery of systems better aligned with the expectations of the Project Owners. Activities will continue in this direction.

In terms of infrastructure and in line with the IT rationalisation, the IT support has been transferred to DG DIGIT (ITIC) since 2013. As regards to DG AGRI Data Centre, a scenario for a possible progressive migration of all DG AGRI information systems to DG DIGIT Data Centre will be prepared, taking into account expected costs and benefits. In the meantime, the Disaster Recovery Infrastructure in place will be maintained and periodically tested. Security Plans have been established for the main IT systems, additional ones are under evaluation.

The information systems will continue to be aligned with the recommendations of the new EC IT governance bodies. Reusing modules (e.g. DG DIGIT Reference architecture for information system development) and information systems (e.g. State Aids tools provided by DG COMP), collaborating and sharing of resources with other DGs (DG EMPL, DG REGIO, DG HOME, DG SANCO) will be the main aspects in this strategic axis.

| Specific objective 3: To attract, deploy, develop and retain highly qualified staff and provide them with working conditions that support them in the accomplishment of their tasks |   |  |

#### HR strategy in support of the business operations

#### I. HR gaps and challenges

#### General trends:

Three major trends have been identified in DG AGRI's HR plan that will have an impact on the shape and future evolution of the workforce:

- 1) Staff reduction: the Commission has decided to cut staff by 5% over the period 2013-2017 without reducing the scope of activities or the number of priorities.
- 2) Ageing: DG AGRI's staff isageing, with almost one quarter of the officials and temporary agents over the age of 55.
- 3) Changing career patterns and expectations: the new staff regulations in force since 1st January 2014 have introduced new rules that affect directly the career path and the expectations of the staff.

#### The operational context:

Operational priorities of DG AGRI and other externally driven decisions also impact on its workforce and structures:

1) The focus on sound financial management of the CAP expenditure and further reduction of residual rates of error justify the need to further invest in the professionalisation of staff working as external auditors.

- The revised policy of promotion of agricultural products includes the delegation of programme management tasks to the executive agency CHAFEA and the phasing out of the corresponding tasks in DG AGRI.
- 3) The delegation of programme management tasks to the Research Executive Agency (REA) requires keeping adequate staffing and expertise in DG AGRI for policy development and coordination with the other DGs of the Research family.
- 4) The start of a new programming period for rural development programmes will need to be accompanied by reflections on adequate staffing and efficient processes in geographical and RD coordination units.
- 5) The Commission decision to transfer the IAC to IAS needs to be implemented taking into account the interest of the service and individual's preferences.

#### Evolution of work force – Gap analysis

DG AGRI's basic job quota has been/will be reduced as a result of the following elements:

- a) 1% staff reduction levy
- b) Up to 1% redeployment tax
- c) Delegation of the management of the promotion programmes to the executive agency CHAFEA
- d) Others (transfer of ex-D posts into credits, transfer of IAC to IAS)
- e) DG RTD Common Support Centre (CSC)

For the moment we do not know how many posts will be lost for the transfer of the IAC, and whether we will receive additional posts for research as requested in the context of the 2015 final allocation decision. If the current redeployment tax is kept at its current level, DG AGRI will lose at least another 71 posts from 2015 to 2017 and the total job quota would fall to under 933 posts.

Based on figures provided to us by DG HR early 2014, the total number of outflows for permanent staff and temporary agents will reach 224 by 2017 in DG AGRI. These outflows will mainly affect the following three profiles: Law making, monitoring and enforcement, Policy making and Budgetary management and anti-fraud.

Given that the outflows are spread throughout the period 2014-2017, the volume of departures as well as their pace will not create any critical gap. Part of the outflows will be used to cope with the challenges posed by staff cuts. The remaining number of vacant posts will be filled by external recruitment. In this sense, a specific external competition for agronomists is being considered.

Even if DG AGRI is not affected by a shortage of skills or work profiles, the human resources policy will need to ensure that certain HR processes – recruitment, learning & development, mobility – are best implemented in order to ensure that the right person is at the right place at the right time.

#### II. Strategic HR objectives

In a context where the efficiency and effectiveness in the use of administrative appropriations takes an ever-increasing importance, human capital is by far the most important resource, and strategic HR planning becomes a pre-condition for the achievement of operational objectives.

The DG AGRI HR plan identifies and develops strategic objectives for all 8 HR processes of which only a selection is briefly mentioned here below:

#### 1) Workforce planning, organisational structure and efficiency

Given the generalised staff reduction, workforce planning becomes more than ever crucial. Staff cuts will lead to non-replacement of part of the retiring staff. Anticipation of these natural departures will be necessary to ensure business continuity in the sensitive areas. This will also require redeployments according to political and operational priorities. An efficient staff allocation will be crucial given the limited available resources: the task mapping methodology and better workload assessment tools will help improving management decisions in this area.

In DG AGRI, the proportion of ADs is 56%, lower than the ratio of the family (58%). This small gap will be reduced thanks to the transformation of a limited number of AST posts into AD posts in the context of the annual budgetary procedures, and the primary use of AST posts to return to the central services in the context of the staff reduction and redeployment exercises.

Similarly, the effect of staff cuts on the organisational structure will have to be closely monitored as they could trigger the need for new organisational adjustments.

#### 2) Learning and development

In order to attract talents and ensure they are operational as quickly as possible, DG AGRI will continue investing in its learning culture. The last staff survey supports the need to further discuss training needs with the managers. Special attention will also be paid to newcomers (induction process) and to staff members leaving their current position (handover process).

DG AGRI's population is ageing. Given the more limited possibilities for replacing retiring staff due to the staff cuts, DG AGRI also needs to reflect on current processes that ensure business continuity (meaningful objectives, quality job descriptions, detailed handover files, induction programmes, mentoring and tutoring schemes, pool of internal trainers, etc.).

The ability to adapt quickly to the changing environment will be essential. Geared training actions can help facilitate this change process and career guidance counsellors will give special attention to this dimension during their interventions.

#### 3) Recruitment

In the current context of budget and staff reduction, we need "to do more with less". Besides current actions focusing on the quality of the selection process, on the transparency of the job market, and on providing substantial help to the recruiting heads

of unit, it will also become very important to optimise our tools and methods.

DG AGRI will continue its efforts to find the right profiles through internal mobility, and to attract new talents through external recruitments or inter-DG mobility. To this end, DG AGRI could establish closer cooperation with family DGs (i.e. EMPL, MARE, REGIO) or DGs dealing with related matters (e.g. SANCO, TRADE, COMP) through exchanges of staff interested in mobility or by advertising relevant vacancies on their intranet.

Following the introduction of new types of posts in the new staff regulations, DG AGRI will have to deal with the timely recruitment on AST/SC posts and the selection of Senior Assistants and Senior Experts.

#### 4) Career development

In the context of staff cuts, DG AGRI will need to focus even more on the efficient management of the available resources. The needs of DG AGRI in terms of competencies, knowledge and expertise, while addressing new political and operational objectives in the future, will be covered by a smaller number of existing staff, with less new talents recruited from the outside. Managing longer careers of the officials and helping them to steer their development in order to ensure that they continue to make a valuable contribution from recruitment to retirement will be a critical component of HR management, especially if one considers the impact of the new staff regulations on the career path of existing staff.

A reduced workforce also means that we need to make best use of all available talents in the DG. Further targeted measures will have to be developed and implemented in DG AGRI to contribute to achieving the objective that the President Juncker has set the Commission: to achieve 40% of female senior and middle management in the Commission by the end of its mandate.

#### III. Follow up and specific actions

The HR plan of DG AGRI identifies some key priorities in terms of HR management for the years to come and develops corresponding actions that are summarised in an action plan. Grouped by responses to the three trends mentioned in part I, they can be presented as follows:

#### Staff cuts

- ✓ Analysis of the age pyramid and staff turnover so as to plan and prepare DG AGRI's response to staff reduction obligations
- ✓ Need to earmark posts to cover staff cuts
- ✓ Analyse vacant posts prior to any publication or redeployment
- ✓ Encourage redeployments from overhead tasks to operational activities
- ✓ Since staff reduction will further decrease the size of some entities, the organisation structure might need to be further adapted in the future
- ✓ Optimise further processes and procedures

- ✓ Adjust working models to help staff to cope with the increased workload, stress at work and work-life balance
- ✓ Deal with a smaller Commission job market, which will create a fiercer competition to attract and retain talents

#### Ageing staff

- ✓ Anticipate natural departures to organise business continuity (e.g. agronomists, specialists)
- ✓ Develop succession planning, also for management functions
- ✓ Analyse factors preventing women to apply for management positions
- ✓ Identify key functions in close cooperation with services
- ✓ Need for a more comprehensive reflection on career prospects for 55+ and how to best value/make use of their experience and expertise
- ✓ Monitor the effect of retirements on the gender balance

#### New staff regulations

- ✓ Align grades with the level of responsibilities/duties whenever possible
- ✓ Consider new career paths in the review of the mobility policy
- ✓ Guarantee equity of the performance management system
- ✓ Support staff members having difficulties in attaining their objectives

Specific objective 4: To maintain effective document management system; ensure compliance with personal data protection rules in force, and ensure a high level of transparency and security in DG AGRI.

#### Indicators:

1. Percentage of filing of documents in DG AGRI

2. % percentage of files in NOMCOM where no documents are filed within the last 12 months from the total number of active files in AGRI (including subfiles)<sup>85</sup>

Specific objective 6: To implement and develop the DG AGRI Anti-fraud Strategy by

- Raising awareness for fraud against the CAP budget and sharing intelligence on fraud cases, their detection and among staff of the DG,
- Sharing intelligence on fraud cases, their detection and prevention with the relevant authorities in Member States,
- Maintaining operational contacts with the European Anti-fraud Office (OLAF) and disseminate the relevant reports within DG AGRI as appropriate.

*Indicator:* Development and implementation of DG AGRI's anti-fraud strategy *Source:* DG AGRI Anti-fraud Strategy

# 5.3 Examples of specific efforts to improve economy and efficiency of financial and non-financial activities

#### Dissemination of answers to MS questions through CIRCA

With the reform of Direct Support, Member States had to make major policy choices in a very short time span. The many questions (+/- 45 so far) are systematically replied in written and, after their validation by our legal advisors, published on CIRCA and made available to all authorised MS delegates. The replies are also widely circulated internally. This system could significantly reduce the number of similar questions asked by other MS.

#### Simplification of the EAGF monthly payments system

In 2012, taking advantage from the ongoing changes in the agricultural legislative framework, DG AGRI examined both internally and with Member States how to improve the procedures of the monthly payments in order to boost the efficiency and economy of the allocated resources without neglecting the effectiveness of the essential financial controls.

The most significant results of this simplification exercise in unit D4 were reflected in the Commission implementing regulation (EU) No 908/2014. A new system for the EAGF declaration of expenditure will enter into force as of financial year 2015.

In practical terms, instead of declarations on the 3rd, 10th and 20th of each month, each one with an increasing level of detail, the latter two declarations will be merged into one that will be received for the 12th of each month. This deadline is necessary to allow time to prepare the EAGF payments to Member States by Commission decision at the start of the following month. In addition, since this new declaration will be already submitted at the level of the budget sub item, the eligibility controls will be applied on it (taking also the place of the two current declarations which arrive the 20th of each month).

Most Member States welcomed the proposal even though some were concerned they will be required to prepare their detailed expenditure declarations sooner each month and would have less time to prepare forecasts of future expenditure. This difficulty is mitigated by the integrated accounting systems that allow a much faster or even immediate reconciliation. Forecasts of future expenditure will be available sooner to the Commission services, allowing time to seek clarification from certain Member States if necessary.

Besides this improvement, further procedural and a number of IT modifications were put in place in order to save resources by improving the exchange of information between units, reallocating tasks and decreasing the manual treatment of files. A further advantage is that this approach is more compatible with the Commission accounting system as regards ABAC invoice.

# **ANNEXES**

# **Annex 1. Prioritised internal control standards for effective management**

## **Annex 3. Communication strategy**

An "External communication strategy for the CAP", under Council Regulation (EC) No 814/2000<sup>91</sup>, was agreed between DG AGRI and the cabinet in 2010 for the period 2010 – 2015. Its main objective is to inform the public (including key opinion leaders, decision makers and agricultural stakeholders) on the CAP post 2013 reform process and its contribution to the "Europe 2020" strategy. 2015 corresponds to the second period as indicated in our strategy, started in 2014 with the adoption of the legislative package on CAP post 2013, where our primary target audience will be the general public in particular young people (less than 40 years old) in urban areas.

A new strategy covering the period 2016-2020 will be elaborated in 2015 in particular in the light of the results and recommendations of the evaluation of the overall communication activities conducted for the period 2010-2014 (expected by mid-2015).

Our communication strategy is implemented through annual action plans, setting out the communication activities to be developed during each year.

The 2015 action plan builds on the activities developed and lessons learned in 2014 and takes on board the CAP related policy initiatives foreseen, Commission's corporate communication priorities, the needs of DG AGRI services in terms of external communication and the priority themes and actions for 2015 indicated by the Cabinet. As agreed in the note ARES (2014)2365480 of 16/07/2014, our intention is to articulate the 2015 action plan around the following three axes:

- A communication campaign on the CAP, under the signature "Europe's Common Agricultural Policy: Taking care of our roots" was launched in October 2013 following the decision on the CAP reform. The campaign promotes the importance of sustainable farming among the EU citizens (in particular urban dwellers). 2015 will be the last year of implementation of this campaign, in particular with the development and distribution of an edutainment pack for school teachers.
- The **World Expo 2015** will take place in Milano from 1 May until 31 October 2015 on the theme "Feeding the Planet: Energy for Life". DG AGRI's will organise up to 30 events at this Expo.
- DG AGRI will further develop in 2015 the networking approach consisting in engaging others (journalists, stakeholders and MS) to communicate on farming and the CAP given their important multiplication potential. The networking approach with media will adapt to the new structure and rules of the Commission/SPP.

In addition, DG AGRI will continue co-financing CAP related information actions, being present at agricultural fairs and organising conferences on key issues, being involved in DG COMM's corporate communication priorities and campaign, better integrate the Green Team activities with the newly established "country intelligence network" providing communication services to accompany when appropriate any major policy initiative and of course, providing service on external communication to DG AGRI units .

A Eurobarometer survey on agriculture and the CAP will be conducted in the last quarter of 2015 to keep track of EU public opinion on a range of issues relevant to the Commission's

\_

<sup>&</sup>lt;sup>91</sup> Repealed by Regulation (EU) No 1306/2013 of the European Parliament and of the Council of 17 December 2013 on the financing, management and monitoring of the common agricultural policy and replaced by article 45 of the same Regulation.

work with a view to better target the Commission's communication actions in relation with the CAP.

According to article 45.5 of Council Regulation (EU) No 1306/2013, DG AGRI will present in 2015 a report on the implementation of the CAP information measures to the European Parliament and the Council.

This Action Plan reflects the position as in December 2014. Following the entry into function of the new Commission on the 1st of November, the Action Plan is being reviewed to see whether any new or additional actions might be envisaged for 2015<sup>92</sup>. Arising from the outcome of that review, the Action Plan may be updated during the update of the Management Plan to take account of any new requirements or actions identified.

<sup>&</sup>lt;sup>92</sup> Actions referring to the mandate of the Commissioner for Agriculture and Rural Development (Mission letter from Jean-Claude Juncker to Phil Hogan on 10/09/2014):

<sup>-</sup> Contribution of CAP to the jobs, growth and investment package

<sup>-</sup> Implementation of the recently agreed CAP reform

<sup>-</sup> Simplification in the areas of direct payments and in particular as regards greening, rural development, quality policy and the implementation of the CMO regulation.

<sup>-</sup> Contribution of the agricultural sector to energy efficiency and emissions reductions

## **Annex 4. List of Indicators**

#### Types of indicators:

- Impact indicators: outcome of intervention beyond immediate effects
- Result indicators<sup>93</sup>: direct and immediate effect of intervention
- Output indicators: activities directly realised by interventions
- Common context indicators: general contextual trends.

| IMPACT INDICATORS <sup>94</sup>           |
|---|
| Agricultural entrepreneurial income       |
| Agricultural factor income                |
| Total factor productivity in agriculture  |
| EU commodity price variability            |
| Consumer price evolution of food products |
| Agricultural trade balance                |
| Emissions from agriculture                |
| Farmland bird index                       |
| High Nature Value (HNV) farming           |
| Water abstraction in agriculture          |
| Water quality                             |
| Soil organic matter in arable land        |
| Soil erosion by water                     |
| Rural employment rate                     |
| Degree of rural poverty                   |
| Rural GDP per capita                      |

#### **RESULT INDICATORS**

## Pillar I Result indicators 95

Share of direct support in agricultural income

Variability of farm income

- by type of farm
- by economic size

Value added for primary producers in the food-chain

EU agricultural exports

- share of EU agricultural exports in world exports
- share of final products in EU agricultural exports

Public intervention: % volume of products bought in intervention storage out of total EU production

For Pillar II, certain indicators are used to set targets at Focus Area level. These indicators are referred to as "target indicators" and usually correspond to result indicators. However, as some targets are not set at result level, there are also target indicators that are not at the same time result indicators. Furthermore, there are result indicators that are not used

for target setting, these are referred to as "complementary result indicators".

94 Commission Implementing Regulation (EU) No 834/2014 of 22 July 2014 laying down rules for the application of the common monitoring and evaluation framework of the common agricultural policy, OJ L 230, 1.8.2014, p. 1-7.

<sup>&</sup>lt;sup>95</sup> Commission Implementing Regulation (EU) No 834/2014 of 22 July 2014 laying down rules for the application of the common monitoring and evaluation framework of the common agricultural policy, OJ L 230, 1.8.2014, p. 1-7

Private storage: % volume of products exported with export refunds out of total EU production

**Export refunds** 

EU commodity prices compared to world prices (broken down by product)

Value of production under EU quality schemes compared to total value of agricultural and food production

Importance of organic farming

- share of organic area in total utilised agricultural area (UAA)
- share of organic livestock in total livestock

#### Crop diversity

- on farm (number of farms by number of crops and size)
- in a region

Share of grassland in total UAA

Share of ecological focus area (EFA) in agricultural land

Share of area under greening practices

Net greenhouse gas emission from agricultural soils

Structural diversity

- in absolute terms
- in relative terms

## Pillar II Result and complementary result indicators <sup>96</sup>

percentage of agricultural holdings with RDP support for investments in restructuring or modernisation (focus area 2A)

Change in Agricultural output on supported farms/AWU (Annual Work Unit) (focus area 2A) (\*) percentage of agricultural holdings with RDP supported business development plan/investments for young farmers (focus area 2B)

percentage of agricultural holdings receiving support for participating in quality schemes, local markets and short supply circuits, and producer groups/organisations (focus area 3A)

percentage of farms participating in risk management schemes (focus area 3B)

percentage forest or other wooded area under management contracts supporting biodiversity (focus area 4A)

percentage agricultural land under management contracts supporting biodiversity and/or landscapes (focus area 4A)

percentage of agricultural land under management contracts to improve water management (focus area 4B)

percentage of forestry land under management contracts to improve water management (focus area 4B)

percentage of agricultural land under management contracts to improve soil management and/or prevent soil erosion (focus area 4C)

percentage of forestry land under management contracts to improve soil management and/or prevent soil erosion (focus area 4C)

percentage of irrigated land switching to more efficient irrigation systems (focus area 5A)

Increase in efficiency of water use in agriculture in RDP supported projects (focus area 5A) (\*)

Increase in efficiency of energy use in agriculture and food-processing in RDP supported projects (focus area 5B) (\*)

Ommission Implementing Regulation (EU) No 808/2014 of 17 July 2014 laying down rules for the application of Regulation (EU) No 1305/2013 of the European Parliament and of the Council on support for rural development by the European Agricultural Fund for Rural Development (EAFRD) - Annex IV, OJ L 227, 31.7.2014, p. 18-68

Renewable energy produced from supported projects (focus area 5C) (\*)

percentage of LU (Live-stock Unit) concerned by investments in live-stock management in view of reducing GHG (Green House Gas) and/or ammonia emissions (focus area 5D)

percentage of agricultural land under management contracts targeting reduction of GHG and/or ammonia emissions (focus area 5D)

Reduced emissions of methane and nitrous oxide (focus area 5D) (\*)

Reduced ammonia emissions (focus area 5D) (\*)

percentage of agricultural and forest land under management contracts contributing to carbon sequestration or conservation (focus area 5E)

Jobs created in supported projects (focus area 6A)

percentage of rural population covered by local development strategies (focus area 6B)

percentage of rural population benefiting from improved services/infrastructures (focus area 6B)

Jobs created in supported projects (Leader) (focus area 6B)

percentage of rural population benefiting from new or improved services/infrastructures (Information and Communication Technology - ICT) (focus area 6C)

Indicators in italics are also target indicators.

(\*) Complementary result indicators

## Pillar II Target indicators 97

percentage of expenditure under Articles 14, 15 and 35 of Regulation (EU) No 1305/2013 in relation to the total expenditure for the RDP (focus area 1A)

Total number of cooperation operations supported under the cooperation measure (Article 35 of Regulation (EU) No 1305/2013) (groups, networks/clusters, pilot projects...) (focus area 1B)

Total number of participants trained under Article 14 of Regulation (EU) No 1305/2013 (focus area 1C)

percentage of agricultural holdings with RDP support for investments in restructuring or modernisation (focus area 2A)

percentage of agricultural holdings with RDP supported business development plan/investments for young farmers (focus area 2B)

percentage of agricultural holdings *receiving support for participating in* quality schemes, local markets and short supply circuits, and producer groups/organisations (focus area 3A)

percentage of farms participating in risk management schemes (focus area 3B)

percentage of forest/other wooded areas under management contracts supporting biodiversity (focus area 4A)

percentage of agricultural land under management contracts supporting biodiversity and/or landscapes (focus area 4A)

percentage of agricultural land under management contracts improving water management (focus area 4B)

percentage of forestry land under management contracts to improve water management (focus area 4B)

percentage of agricultural land under management contracts to improve soil management and/or prevent soil erosion (focus area 4C)

percentage of forestry land under management contracts to improve soil management and/or prevent soil erosion (focus area 4C)

percentage of irrigated land switching to more efficient irrigation system (focus area 5A)

<sup>97</sup> Commission Implementing Regulation (EU) No 808/2014 of 17 July 2014 laying down rules for the application of Regulation (EU) No 1305/2013 of the European Parliament and of the Council on support for rural development by the European Agricultural Fund for Rural Development (EAFRD) - Annex IV, OJ L 227, 31.7.2014, p. 18-68

Total investment for energy efficiency (focus area 5B)

Total investment in renewable energy production (focus area 5C)

percentage of LU concerned by investments in live-stock management in view of reducing GHG and/or ammonia emissions (focus area 5D)

percentage of agricultural land under management contracts targeting reduction of GHG and/or ammonia emissions (focus area 5D)

percentage of agricultural and forest land under management contracts contributing to carbon sequestration or conservation (focus area 5E)

Jobs created in supported projects (focus area 6A)

percentage of rural population covered by local development strategies (focus area 6B)

percentage of rural population benefiting from improved services/infrastructures (focus area 6B)

Jobs created in supported projects (Leader) (focus area 6B)

percentage of rural population benefiting from new or improved services/infrastructures (ICT) (focus area 6C)

#### **OUTPUT INDICATORS**

## Direct payments<sup>98</sup>

#### Basic payment scheme

Number of farmers

Number of hectares

#### **Single Area Payment Scheme**

Number of farmers

Number of hectares

#### Transitional national aid (TNA)

Number of farmers

Number of units for which TNA is granted (hectares / animals / other)

#### Redistributive payment

Number of farmers

Number of hectares

#### Greening

Total number of farmers who have to apply at least one greening obligation

Total number of hectares declared by these farmers

#### **Greening exemptions**

Number of farmers exempted by: organic farmers / exempted from crop diversification / exempted from EFA obligation

Number of hectares declared by these farmers (organic farmers, exempted from crop diversification, exempted from EFA obligation)

### **Crop diversification**

Number of beneficiaries subject to crop diversification (with 2 crops; with 3 crops)

Number of hectares of arable land declared by farmers subject to crop diversification (with 2 crops; with 3 crops)

### Permanent grassland

Number of farmers with permanent grassland counting for the ratio

Ommission Implementing Regulation (EU) No 834/2014 of 22 July 2014 laying down rules for the application of the common monitoring and evaluation framework of the common agricultural policy, OJ L 230, 1.8.2014, p. 1-7

Number of hectares covered by permanent grassland declared by the farmers counting for the ratio

Number of farmers with permanent grassland in designated environmentally sensitive areas

Number of hectares covered by environmentally sensitive permanent grassland declared by these farmers

Number of hectares of designated as environmentally sensitive permanent grassland (total)

### **Environmental Focus Area**

Number of farmers subject to EFA requirements

Number of hectares of arable land declared by farmers subject to EFA

Number of hectares declared by farmers as EFA, broken down by EFA type

### **Equivalence**

Number of farmers applying equivalent measures (certification schemes or agri-environment-climate measures)

Number of hectares declared by farmers implementing equivalent measures (certification schemes or agri-environment-climate measures)

### Payment for young farmers

Number of farmers

Number of hectares

## Small farmers' scheme

Number of farmers

Number of hectares

### **Voluntary coupled support**

Number of beneficiaries of voluntary coupled support (broken down by sector)

Quantities eligible (number of hectares/ number of animals broken down by sector)

Number of hectares

Number of animals

### Payment for areas with natural constraints

Number of farmers

Number of hectares

## National programmes for the cotton sector

Number of farmers

Number of hectares

## Market measures<sup>99</sup>

#### **Public intervention**

Volume

Duration

### **Private storage**

Volume

Duration

### **Export refunds**

Volume of products exported with export refunds

### **Exceptional** measure

[as appropriate]

### **Producer organisations**

% of production marketed by producer organisations and associations of producer organisations

#### School schemes

Number of final beneficiaries of school milk scheme

Number of final beneficiaries of school fruit scheme

#### Vine sector

Number of hectares of new vine plantings

Number of hectares of restructured vineyards

Number of promotion projects in the wine sector

Number of projects of investment and innovation measures

## Horizontal aspects<sup>100</sup>

#### **Cross compliance**

Number of hectares subject to cross-compliance

Share of CAP payments subject to cross-compliance

## **Quality policy**

Geographical indications in the wine sector

Number of new protected designations of origin, protected geographical indication and traditional speciality guaranteed by sector

### **Organic farming**

Number of hectares (total and under conversion)

Number of certified registered organic operators

### **Promotion policy**

Number of programmes (in and outside the EU)

Number of new proposing organisations

## Farm Advisory system

Number of farmers advised

## Rural development<sup>101</sup>
