

# The EU's Bioeconomy Strategy

A policy framework for sustainability

## The EU's Bioeconomy Strategy aims to:

## Bioeconomy Strategy Progress Report 2022

The report has identified positive trends in the following areas

**More private investment has been unlocked** – EUR 2.73 billion to the Bio-based Industries Joint Undertaking by 2024

**Organic farming and forest** growing stock is increasing

**Employment** is increasing in emerging sectors – e.g. bio-based chemicals, pharmaceuticals, plastics and rubber

**Technologies** for sustainable and circular bio-based value chains have been developed and demonstrated

**Central and Eastern European countries** have made progress on bioeconomy deployment with EU support

Yet, pressure on ecosystems is increasing – **more action is needed!**

## Our future bioeconomy actions need to:

- increase focus on how to better manage land and biomass demands
- make consumption patterns more sustainable
