

The European Commission has made it a priority to create a Digital Single Market by breaking down barriers for citizens and businesses. In order to achieve this, the Digital Single Market Strategy is built on three pillars:

- 1. Better access for consumers and businesses to digital goods and services across Europe
- 2. Creating the right conditions for digital networks and services to flourish
- 3. Maximising the growth potential of the Digital Economy

#### **KEY FACTS AND FIGURES**

1. Better access for consumers and businesses to digital goods and services across Europe

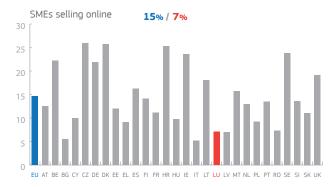

## LU Digital Single Market - country sheet

Problems for selling online:

Delivery costs are too high

Guarantees and returns

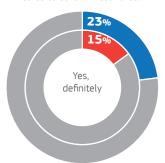

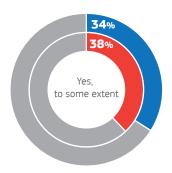

Don't know the rules

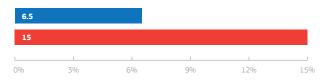

If eCommerce rules were the same throughout the EU....

#### SMEs selling online cross-border

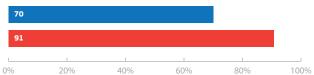

#### 2. Creating the right conditions for digital networks and services to flourish

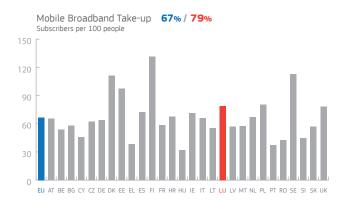

#### CONNECTIVITY

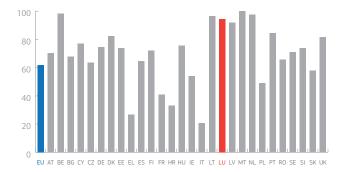

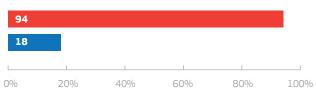

### Fast Broadband (Next-Generation Access) Rural Coverage % households (rural = below 100 people per km2)

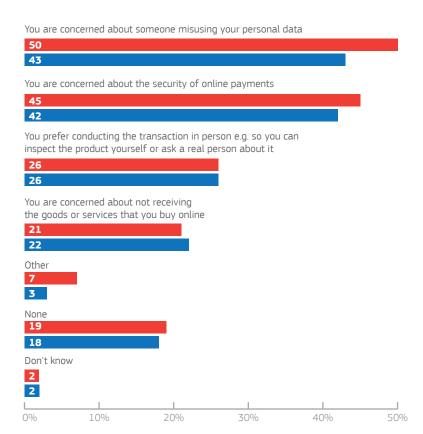

# LU Digital Single Market - country sheet

#### TRUST AND SECURITY

What concern do you have when using the Internet for things like banking or shopping online?

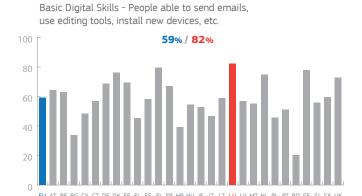

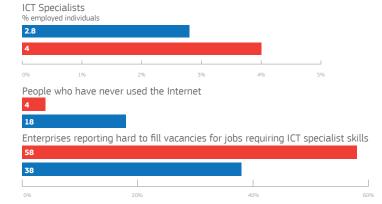

#### 3. Maximising the growth potential of the Digital Economy

#### **DIGITAL SKILLS AND JOBS**

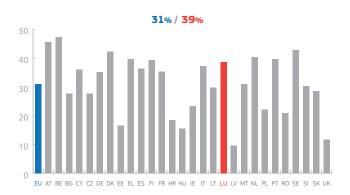

#### **BUSINESSES USING ICT**

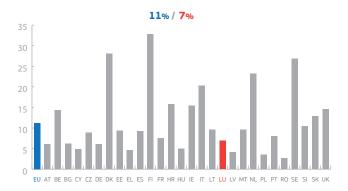

EU

Businesses that use an Enterprise Resource Planning (ERP) software package, to share information between different functional areas (e.g. accounting, planning, production, marketing)

Businesses that purchase cloud computing services, to host the enterprise's database or for accounting software applications for example

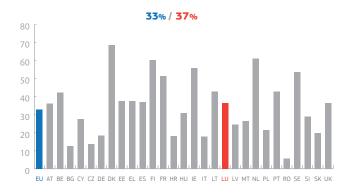

#### **PUBLIC SERVICES**

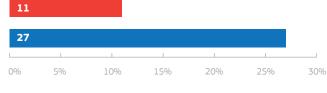

eGovernment Users returning filled forms to public authorities, out of Internet users

General practitioners who use electronic networks to transfer prescriptions to pharmacists

#### Pre-filled Forms

Amount of data that is pre-filled in public services' online forms (notably on the basis of information already submitted by users)
