ANNEX 1: Statement of the Director in charge of Risk Management and Internal Control

I declare that in accordance with the Commission's communication on the internal control framework¹, I have reported my advice and recommendations on the overall state of internal control in the DG Communication to the Director-General.

I hereby certify that the information provided in the present Annual Activity Report and in its annexes is, to the best of my knowledge, accurate and complete.

Brussels, 24 March 2022.

Non-hazardous waste generation (tonnes / person): 0.24	-9.7%	-26% or 0.17 (tonnes / person)	0.10

² Baseline correction: In 2014, the Commission set up for the first time medium-term environmental performance targets for the period 2014-20, validated by the EMAS Steering Committee. During a middle-term review in 2019, the EMAS Steering Committee adopted even more ambitious environmental performance targets.

Specific objective 1: College and services use country specific intelligence, Eurobarometer results, media analysis and stakeholders'/citizens' feedback to inform political decision-making			Related to spending programme: NA

³ The survey was not conducted due to the recalibration of political reporting and launch of a modernised POLREP platform in 2021 (based on guidance from the Cabinet and DG Communication hierarchy), ongoing COVID-19 reporting and other workload. The new survey is planned to be undertaken by 31 October 2022. (This commitment however requires validation by DG Office).

⁴ Lower figure than before due to the pandemic (less travel to Member States) and in view of the new SG Country Fiche.

Media analysis reports on events linked to headline ambitions	Number of media analysis reports	20	14 ⁷

⁵ As European Semester Officers are attached to SG RECOVER as from 1 October 2020, their reports should no longer be counted as DG Communication, but as SG RECOVER reports. This indicator is included in the programme Statement of the Draft Budget 2023, see the programme statement for detailed information.

⁶ The third survey foreseen in 2021, the EB Standard Autumn/Winter 2021-22, has been conducted beginning of this year, therefore not added to the 2021 Annual Activity Report.

⁷ Number of reports on events linked to headline ambitions. This number does not contain the weekly vaccination reports provided until July and requested as reaction to the pandemic. In addition, weekly reports with focus on the European Green Deal have been provided from July onwards. In total, there were 100 analysis reports delivered.

Specific objective 2: College receives strategic advice on communicating the headline ambitions and on media landscapes in the Member States			Related to spending programme: NA

⁹ The result reached in 2021 represented an increase compared to 2020. The service believe the interim milestone will be reached in 2022.

¹⁰ This higher number responds to an increase in online activities.

¹¹ Due to the COVID-19 pandemic, the demand for audio-visual services and video productions replacing face-to-face meetings and events has increased. For instance, the use of the TV studios and video production at the Commission headquarters increased by over 200% in 2021.

¹² This indicator is included in the programme Statement of the Draft Budget 2023, see the programme statement for detailed information.

¹⁴ This percentage only keeps into account campaigns explicitly allocated under the policy objectives ‘A European Green Deal’ and ‘A Europe fit for the digital age’. Such a number would go over the 70% threshold if it kepts into account other campaigns in line with the corporate communication priorities but formally allocated under different policy objectives. The methodology for 2022 has been improved to address this issue.

¹⁵ Due to a very high number of requests – twice the target – there was no capacity to carry out a survey in 2021. A survey is planned for 2022.

¹⁶ Based on the 2021 survey results, DGCommunication continues to accompany, monitor and support Direstorates-General and Member States in the implementation of the communication and visibility rules with the aim to further improve the encouraging results of the survey. A COMMLab on 7 April 2022 will look at further qualitative progress and identify best practice. The 2021 survey might be repeated in 2023. An evaluation study is planned for 2024 in the context of the DG Communication evaluation plan.

²⁴ The smart recentralisation of the corporate communication framework contracts was established in the 2016 Synergies and Efficiencies Communication and was confirmed and reinforced following the audit and political stock-taking of the process in 2019. The number of these contracts was reduced from 58 on 1 January 2016 (baseline) to 23 by the end 2021.

²⁷ Media and public relations, Spokespersons and related services; Social media; Speechwriting and political communication; Visual Communication; Audiovisual production; Project management, governance and guidelines; Webmasters and web design; Communication procurement; and Monitoring and evaluation.

²⁸ The roll-out of tailored learning paths to the communities of practice in the external communication domain was delayed in 2021 by (1) delays in the development and roll-out of the associated functionality by the developer of EULearn, the Commission's central learning catalogue; and (2) the need to incorporate the vast learning offer available through LinkedIn Learning, licences for which were made available by DG Human Resources to all Commission staff members as of 1 October 2021.

²⁹ The 'Penmasters' community for speechwriters and writers of political content was launched in May 2021. The intended launch of the Evaluation network in 2021 for colleagues involved in the evaluation of the impact of communication actions, was delayed into 2022.

³⁰ Guidance presented; Monitoring delayed as DG Human Resources could not provide updated figures due to its reorganisation and improvement of its IT tools.

³² The figure sums the reach for all the awareness-raising activities related to disinformation: webpages, social media posts, download of toolkits, etc.

³³ Based on the new method of calculation of number of visits used by the Commission.

³⁴ The indicator measured the recall of the corporate campaigns messages of the audience reached. This is an average percentage cumulative number of all the different ongoing campaigns per calendar year.

³⁵ This figure refers to general asset recall, and not to message recall. Hence 47% of young respondents aged 16-34 stated that they have seen at least one of the NextGenerationEU campaign assets. This indicator is included in the programme Statement of the Draft Budget 2023, see the programme statement for detailed information.

³⁷ An array of activities have been implemented of which 9 (non-exhaustive list) referred to in the Annual Report, mainly in chapter ‘Specific objective 4’. The selection of joint projects are: Europe Day, Eurobarometer, crisis and recovery communication, fighting mis/disinformation, the launch of the revamped [interinstitutional EU website](#), Europe Direct, cooperation on the ground in Member States between EP Liaison Offices and Representations, European Year of Youth 2022, the Europa Experience.

³⁸ The baseline indicator, interim milestone and target were set in the first year of Learning Corner (only accounted for 20% of the publications and online materials). Learning Corner and its associated products now account for around 50% of the total. Whereas the satisfaction levels for general public products are close to or in several cases above the targets, children and teenagers tend to be more critical in their judgements while remaining overall very positive.

³⁹ The pop-up survey of the Audiovisual portal was planned at end of 2020. The results will be used as a baseline and only then, the service will be able to set up milestones and targets for 2022 and 2024.

⁴⁰ The survey was postponed due to a lack of resources and is now planned on first quarter 2022.

⁴² Due to the transitioning of this website to the new web publishing platform, only limited content updates and improvements have been made in 2021. As the transition was planned for November 2021, content updates on the old site were reduced to a minimum as of August.

⁴³ The internal tool for measuring the indicator was stopped in March 2019 and changed to AV metrics in 2020. With the new tool, DG Communication can provide the number as given for 2021.

⁴⁴ Number of contacts made in 2021 is lower than forecasted because NextGenerationEU campaign started on 11 May 2021, not 1 January 2021 as scheduled. Most contacts made through advertising. Organic social media posting and communication with UEFA on the Green Deal contributed to campaign output, too.

⁴⁵ A targeted campaign means a series of posts on the same topic, cross-platform, supported by an advertising budget.

⁴⁶ News articles represent multimedia content, tailored to convey messages and explain events or policies to non-expert audiences. Published on Europa website by the Spokesperson service, they are frequently used to highlight and promote President's activities and messages, and usually contain photos and videos. Some examples: https://ec.europa.eu/commission/presscorner/detail/en/AC_20_76
https://ec.europa.eu/commission/presscorner/detail/en/AC_20_1170

⁴⁷ All paper publications are printed on 100% recycled paper from 100% post-consumer waste, using a totally chlorine-free process. The total number of copies of publications printed will be significantly reduced in 2021 compared to 2020, while the readership of online publications and materials is expected to continue increasing, leading to a small net reduction in the overall target.

⁴⁸ This target needs to be updated at the end of last year. Last year, DG Communication reached 724 visuals, then DG Communication would like to set this target to 750.

⁴⁹ 'The Teachers' Testing Panel and Europe Direct Information Centres' Testing Panel are both coordinated by DG Communication. The Teachers' Testing Panel, comprising 54 primary and secondary school teachers, tests materials produced by DG Communication, other Directorates-General, and other EU Institutions for children, teenagers and their teachers. The feedback provided by the panel enables the services to optimise their materials for use in schools. The Europe Direct Information Centres' Testing Panel, comprising 27 managers of Europe Direct Information Centres, provides a similar service for materials produced for the general public.

⁵⁰ Due to the change in methodology (and as one can hardly see more than 15-20 journalists at a press event), the correct estimated target should have been 25 (combining both physical and online presence) instead of 75, as previously indicated in the Annual Management Plan 2020.

⁵¹ The number of press events organised annually depends on numerous factors, including the agenda of the President and the College, as well as annual holidays. In 2021 it was also highly influenced by succeeding pandemic waves

⁵² The targets being exceeded can be attributed to the increasing popularity of the President combined to a series of events on which she actively communicated.

⁵³ The sanitary situation increased the demand for video production to replace face-to-face meetings and events. The communication to the general public via videos and social media increased then considerably (highlight videos, snippets, Instagram stories, reels...). Moreover, the NextGenerationEU tour by the President was also covered extensively.

⁵⁴ See previous footnote.

⁶¹ Further to the decision of the governing bodies 1/3 of participants were young people (aged 16-25). The other criteria – gender, age, socio-economic background and geographical origin of Panel members – were generally met.

⁶² The Centre was not open in 2021 as planned due to the pandemic crisis's repercussions on the building fit out works and in particular significant delays related to social distancing for workers, reduced number of workers and delays with services providers. In addition to this, an accident with a bus also provoked damages in the façade. It opened in February 2022.

⁶³ The engagement rate on Twitter is calculated based on Twitter Analytics as follows: Engagements/ Impressions x100 OR directly: the indicated engagement rate x 100.

⁶⁴ The engagement rate on Facebook is calculated via Facebook insights as follows: number of unique users that engaged with a post/the number of unique users that have seen the post x 100. Calculated for organic posts only.

⁶⁵ The engagement rate on Instagram is calculated by all engagements on a post (= likes + comments)/the number of impressions on that post x 100.

Main outputs in 2021:			
Other important outputs			
Output description	Indicator	Target	Latest known results (situation on 31/12/2021)
Events organised by Representations	Number of outreach activities (physical and online)	6 000	7 047 ⁶⁹
	Number of participants at events and actions	400 000	492 464 ⁷⁰
Information events organised by Europe Direct Information Centres	Number of events ⁷¹	3 500 ⁷²	8 000
	Percentage of users who would recommend the Europe Direct Information Centres service	90%	93%

⁶⁶ The engagement rate on LinkedIn is calculated based on LinkedIn analytics via ((‘Total Interactions’ on all posts + ‘Clicks’) / Impressions on all posts) x 100.

⁶⁷ The engagement rate on Youtube is calculated based on Youtube Analytics: ‘Average view duration’. Estimated average minutes watched per view. YouTube has optimized its algorithm to promote videos with a high average view duration, this indicator is thus an important metric to track. This indicator is included in the programme Statement of the Draft Budget 2023. See the programme statement for detailed information.

⁶⁸ Given its peculiarity, less resources have been invested in managing the Youtube account of the Commission.

⁶⁹ Due to COVID- 19 restrictions, Representations have organized less events, and it noticed an increase of online and hybrid events with higher number of participants. This potential increase due to online participation was already highlighted in the Management Plan with a target of 400 000 participants.

⁷⁰ See previous footnote.

⁷¹ This indicator is included in the programme Statement of the Draft Budget 2023, see the programme statement for detailed information.

⁷² The current Europe Direct Information Centres generation’s ‘shelf life’ was extended until 30 April 2021. The next generation EUROPE DIRECT (note change of name) started operations on 1 May 2021. The management process of the next generation hinges upon the organisation of events with long-lasting impact, targeting wider sub-sets of the population. Higher quality, involving significant organisation efforts, will inevitably lead to fewer events as compared to the numbers produced by the current generation on yearly basis. In addition, the unprecedented sanitary situation will result in fewer events staged by the current generation as compared to previous reference periods. The 2021 target figure is therefore combining the targets set for the two generations (generation ending the operations end of April 2021 and next generation starting beginning of May).

Assist the Conference's governance structures in setting up European Citizens' Panels	Number of panels that have been set up by the end of 2021	5	4 ⁸⁷

⁷³ Due to the uncertainty of the pandemic, physical visits were not carried out in the same way during 2021 with a significant impact on the number of groups and visitors. Upon resuming in September 2021, physical visits must respect the social distancing measures that further affected the size of the groups.

⁷⁴ This indicator is included in the programme Statement of the Draft Budget 2023, see the programme statement for detailed information.

⁷⁶ The 'Experience Europe' centre in Rond-Point Schuman 14 is scheduled to open in 2021.

⁷⁷ Due to the uncertainty of the pandemic, the target is subject to change.

⁷⁸ The 'Experience Europe' centre in Rond-Point Schuman 14 was not open in 2021.

⁷⁹ The mission letters of President von der Leyen call upon all Members of the Commission to visit the Member States and participate in Citizens' Dialogues, in particular under the umbrella of the Conference on the Future of Europe. Hence, a part of Citizens' Dialogues will be considered also as actions of the Conference, in particular when Members of the College are involved.

⁸⁶ Figure from Eurobarometer showed that 31% of the population have seen the Conference in the media.

⁸⁷ The Conference's governing bodies have agreed upon the organisation of 4 European Citizens' Panels.

	Number of meetings for each panel by the end of 2021	2	2 meetings for Panels 1, 3 and 4, and 3 meetings for Panel 2
Social media engagement with citizens (Community management)	Number of social media replies published ⁸⁸	25 000	15 242 ⁸⁹

⁸⁸ Number of social media messages (Facebook comments and private messages + Instagram comments + LinkedIn comments) not including Instagram private messages or comments on Instagram Reels.

⁸⁹ In 2021 the Social media team has been constantly increasing its community management team and capacity in order to increase the quantity and quality of its replies, and this growth will bring results in 2022.

It should be noted that the balance sheet and statement of financial performance presented in Annex 3 to this Annual Activity Report, represent only the assets, liabilities, expenses and revenues that are under the control of this Directorate General. Significant amounts such as own resource revenues and cash held in Commission bank accounts are not included in this Directorate General's accounts since they are managed centrally by DG Budget, on whose balance sheet and statement of financial performance they appear. Furthermore, since the accumulated result of the Commission is not split amongst the various Directorates General, it can be seen that the balance sheet presented here is not in equilibrium.

Additionally, the figures included in tables 4 and 5 are provisional since they are, at this date, still subject to audit by the Court of Auditors. It is thus possible that amounts included in these tables may have to be adjusted following this audit.

The accounting situation presented in the Balance Sheet and Statement of Financial Performance does not include the accruals and deferrals calculated centrally by the services of the Accounting Officer

ANNEX 4: Financial Scorecard

DG Communication

The Annex 4 of each Commission service summarises the annual result of the standard financial indicators measurement. Annexed to the Annual Activity Report 2021, ten standard financial indicators are presented below, each with its objective and result for the Commission service and for the Commission as a whole (for benchmarking purposes)⁹⁰:

<ul style="list-style-type: none"> - Commitment Appropriations (CA) Implementation - CA Forecast Implementation - Payment Appropriations (PA) Implementation - PA Forecast Implementation - Global Commitment Absorption 	<ul style="list-style-type: none"> - Timely Payments - Timely Decommitments - Invoice Registration Time - Accounting Data Quality - Management Data Quality
--	---

For each indicator, its value (in %) for the Commission service is compared to the common target (in %). The difference between the indicator's value and the target is colour coded as follows:

- 100 – >95% of the target: dark green
- 95 – >90% of the target: light green
- 90 – >85% of the target: yellow
- 85 – >80% of the target: light red
- 80 – 0% of the target: dark red

COMM Indicator Scores 2021

For each indicator the light blue bar denotes the EC Score.

⁹⁰ If the EC service did not perform any transaction in the area measured by the indicator or the information is not available in the central financial system, the indicator is not calculated (i.e. displayed as “-”) in this Annex.

Indicator	Objective	Comment ⁹¹	COMM Score	EC Score
1. Commitment Appropriations Implementation	Ensure efficient use of commitment appropriations expiring at the end of Financial Year		100%	67%
2. Commitment Forecast Implementation	Ensure the cumulative alignment of the commitment implementation with the commitment forecast in a financial year		91%	88%
3. Payment Appropriations Implementation	Ensure efficient use of payment appropriations expiring at the end of Financial Year	*PA Implementation higher than 100% is a result of DG COMM consuming payment appropriations of a different DG under a co-delegation, which were not transferred to DG COMM.	101%	97%
4. Payment Forecast Implementation	Ensure the cumulative alignment of the payment implementation with the payment forecast in a financial year	The payment forecast initially estimated was a bit delayed due to some large payments for Corporate campaigns that took place later than foreseen.	93%	98%
5. Global Commitment Absorption ⁹²	Ensure efficient use of already earmarked commitment appropriations (at L1 level)		98%	98%
6. Timely Payments	Ensure efficient processing of payments within the legal deadlines	The reasons behind this result are that 10 out of the 12,649 payments made in 2021 by DG Communication account for a third of this late payment rate. By comparison to 2020, DG Communication has improved the execution from 96% to 97% of payments operations in the foreseen delay and the average payment time has been maintained (13.4 days). Finally, most of the late payments registered carried no or very low interest payments.	97%	98%
7. Timely Decommitments	Ensure efficient decommitment of outstanding RAL at the end of commitment life cycle	The COMM score is the result of a regular follow up made on monthly basis of this indicator	96%	76%
8. Invoice Registration Time	Monitor the accounting risk stemming from late registration of invoices in the central accounting system ABAC		97%	94%
9. Accounting Data Quality	Ensure the good data quality of ABAC transactions with the focus on fields having a primary impact on the accounts		99%	99%
10. Management Data Quality	Ensure the good data quality of ABAC transactions with the focus on fields having a primary impact on the management decisions		94%	96%

⁹¹ An explanation behind the indicator result can be provided, e.g. the comment about the achievement itself, reference to the whole Commission performance (better or worse), reasons behind this achievement. The comment is mandatory for the 'Timely payments' indicator. For the rest of indicators the comment is mandatory only if the score is equal or below the target of 80%.

⁹² Due to technical limitation, the indicator does not take into account the Com L1 Consumption between the FDC ILC date and the FA FDI allowed as an exception in the external actions for Com L1 of type GF, i.e. with Financing Agreement, under the FR2018 Article 114.2. As a result, the actual Indicator score may be slightly higher than the one reported for DGs using the GF commitments.

ANNEX 5: Materiality criteria

One of the five internal control objectives defined in the Financial Regulation (Art. 36.2) is legality and regularity. In the context of this objective, the Authorising Officer by Delegation needs to define specific management targets and, in particular, needs to have objective criteria for determining which weaknesses should be subject to a formal reservation to her declaration (cf. Financial Regulation Art. 74.9).

For the DG Communication, the **materiality** of residual weaknesses identified (i.e. 'net' after mitigating and corrective measures have been taken) is assessed on the basis of qualitative and/or quantitative criteria, in line with the Instructions for the preparation of the Annual Activity Report. The materiality criteria are defined for each significant budget area in coherence with the Control system based on the differentiation between Procurements and Grants,

The **qualitative assessment** includes an analysis of the causes and the types of errors (including whether they are repetitive and/or systemic) to conclude on the nature, scope and reputational impact of the weaknesses identified, as well as the verification of existence of compensatory measures (mitigating controls which reduce the impact of the weakness) and effective corrective actions. This may refer to significant control system weaknesses or critical issues reported by the authorising officers by sub-delegation, the European Court of Auditors, the Internal Audit Service, the DG Budget and the European Anti-Fraud Office. The quantitative assessment aims at estimating any financial impact ('amount at risk') resulting from the errors detected. As regards legality and regularity, the weakness is considered material if the estimated error rate (related to authorise financial operations not complying with the contractual or regulatory provisions) exceeds the materiality threshold of 2 % of total annual expenditure.

Both qualitative and quantitative assessments are based on the following evidence:

- results of the analysis of exception and non-compliance cases falling under Internal Control Principle 12 (including judgment on potential reputational risk, and check if repetitive and uncorrected);
- results of ex-post, on-the-spot controls and errors detected ex-post by other means;
- weaknesses identified during the assessment of the internal control systems;
- results of audits performed by the European Court of Auditors and the Internal Audit Service;
- monitoring of available indicators related to financial management.

Since 2019⁹³, a 'de minimis' threshold for financial reservations has been introduced. Quantified Annual Activity Report reservations related to residual error rates above the 2% materiality threshold, are deemed not substantial for segments representing less than 5% of a Directorate-General's total payments and with a financial impact below EUR 5 million. In such cases, quantified reservations are no longer needed.

⁹³ Agreement of the Corporate Management Board of 30.4.2019.

	checked by second-level ex-ante financial verification in headquarters.		
The contract is not awarded to the most economically advantageous offer due to an inaccurate evaluation process.	Ex-ante control by central team ensures compliance with rules and procedures throughout the tendering process, from publication until the final evaluation, before award: grounds for exclusion and selection; consistency and quality of evaluation reports; correctness of financial offers and award formula, etc.	All procurement procedures over EUR 139,000 ⁹⁵	Effectiveness: Numbers of rightful complaints or litigation Number and value of files checked Efficiency and economy: Estimate of costs of staff involved in the activity

1.2. Financial transactions

Main control objectives: Ensuring legality, regularity, effectiveness and fraud protection of financial transactions.

Main risks – it may happen (again)	Mitigating controls	Coverage, frequency and depth	Cost-effectiveness indicators
The supplies, services or works are not, totally or partially, provided, and/or the amounts to be paid exceed the due amount.	Operational check of transactions by units and Representations. Headquarters: the financial unit verifies transactions with strict segregation of duties between financial agents, using checklists and providing guidance and reports to units.	All financial transactions. All financial transactions.	Effectiveness: % error rate prevented (amount of errors over total payments).
Financial transactions are not correctly registered in the accounting system (ABAC)	Financial transactions on administrative budget lines other than support of operational lines are verified by the initiating units according to the same standards. Representations: financial verification by each Representation according to the same standards. Second-level verification by the central financial unit.	All financial transactions. All financial transactions.	Efficiency/Cost-Effectiveness: Average time to pay. % of payments made on time. Efficiency and economy: Estimate of costs of staff involved in the activity.

⁹⁵ Threshold from the Directive 2014/24/EU of the European Parliament and of the Council of 26.2.2014 on public procurement and repealing Directive 2004/18/EC.

1.3. Supervisory measures (ex-post controls)

Main control objectives: Measuring the effectiveness of ex-ante controls; detecting and correcting any error or fraud remaining undetected after implementation of ex-ante controls (legality and regularity, anti-fraud strategy); identifying and addressing possible systemic weaknesses in the ex-ante controls (sound financial management).

Main risks – it may happen (again)	Mitigating controls	Coverage, frequency and depth	Cost-effectiveness indicators
An error or non-compliance with regulatory and contractual provisions, including technical specifications, or a fraud is not prevented, detected or corrected by ex-ante control, prior to payment.	<p>‘On-the-spot’ ex-post control by central unit on payments as well as underlying commitments and procurement procedures.⁹⁶</p> <p>Decentralised decision by Authorising Officer by Subdelegation on the financial effect of the controls.</p> <p>Review of exceptions and non-compliance reports.</p> <p>Review of incidents occurred during procurement procedures.</p>	<p>Risk-based selection of entities to be controlled, with about one third of Representations and 20-25 % of units covered per year.</p> <p>Risk-based sample of payments.</p> <p>Correction as appropriate.</p>	<p>Effectiveness: Estimated amounts affected by errors, detected error rate.</p> <p>Number and value of procurement files controlled on the spot.</p> <p>Number and value of recovery orders issued in the year.</p> <p>Number of non-compliance events.</p> <p>Efficiency/economy: Estimate of costs of staff involved in the activity.</p>

⁹⁶ The COVID-19 pandemic impacted the ‘On-the spot’ control capability, notably in the confinement periods. To compensate, DG Communication launched a targeted survey to assess potential risks for the assurance building process in the context of the COVID-19 pandemic.

2. Grants (direct management)

2.1. Programming, selection, award and monitoring the execution

Main control objectives: Ensuring legality, regularity, effectiveness and efficiency of procedures.

Main risks – it may happen (again)	Mitigating controls	Coverage, frequency and depth	Cost-effectiveness indicators
The eligibility, selection and award criteria are not adequate to meet the policy objectives and ensure the successful evaluation of the proposals.	Representations initiate and verify all procurement files. A centralised helpdesk function provides advice to units and Representations before launch of procedures. Ex-ante revision of calls for proposals is carried out by a central team prior to the launch of calls.	All calls for proposals On request for all calls for proposals. All calls for proposals over EUR 60,000	Number of questions replied. Number and value of files revised. Efficiency/economy: Estimate of costs of staff involved in the activity
The evaluation is not carried out in accordance with rules and procedures, and the criteria set in the call for proposals. Funding is not provided to the best ranked proposals.	Ex-ante control by central team ensures compliance with rules and procedures throughout the process, from publication until the final evaluation, before award: eligibility, grounds for exclusion and selection; consistency and quality of evaluation reports; correctness of financial offers and award formula, etc.	All calls for proposals over EUR 60,000 Control of all non-selected proposals, all budget estimates of proposals selected for award, and a risk-based sample of technical proposals selected for award.	Effectiveness: Numbers of rightful complaints or litigation. Number and value of files checked. Efficiency and economy: Estimate of costs of staff involved in the activity. Time to inform and time to grant.
The actions foreseen are not carried out by beneficiaries in accordance with the terms of the grant agreement	Representations check implementation of the actions (generating event, output and results) against the proposal via regular reporting and consolidation of data submitted by beneficiaries on an online platform.	All grant agreements of the European Direct Information Centres (99 % of all grants).	Effectiveness: Number of actions and events carried out in accordance with the grant agreement. Number of terminated grant agreements.

2.3. Supervisory measures (ex-post)

Main control objectives: Measuring the effectiveness of ex-ante controls; detecting and correcting any error or fraud remaining undetected after implementation of ex-ante controls (legality and regularity; anti-fraud strategy); identifying and addressing possible systemic weaknesses in the ex-ante controls (sound financial management).

Main risks – it may happen (again)	Mitigating controls	Coverage, frequency and depth	Cost-effectiveness indicators
<p>An error or non-compliance with regulatory and contractual provisions, including technical specifications, or a fraud is not prevented, detected or corrected by ex-ante control, prior to payment.</p>	<p>On-the-spot ex-post control by central unit on payments as well as underlying commitments and procurement procedures.</p> <p>Decentralised decision by Authorising Officer by Subdelegation on the financial effect of the controls.</p> <p>Review of exceptions and non-compliance reports.</p> <p>Review of incidents occurred during procurement procedures.</p>	<p>Risk-based selection of entities to be controlled, with about one third of Representations and 20-25 % of units covered per year.</p> <p>Risk-based sample of 20 payments with 20 related commitments.</p> <p>Correction as appropriate.</p>	<p>Effectiveness: Estimated amounts affected by errors, detected error rate.</p> <p>Number and value of procurement files controlled on the spot.</p> <p>Number and value of recovery orders issued in the year.</p> <p>Number of non-compliance events.</p> <p>Efficiency/economy: Estimate of costs of staff involved in the activity.</p>

⁹⁷ Since the detected errors were procedural related to procurement, for which the financial impact cannot be quantified, the financial exposure of the budget is considered to be 'zero'. No errors were detected ex-post in grants. However, an average error rate of 0.5% has been used as a conservative estimate for the purpose of the calculation of the average error rate for both procurement and grants.

Notes to the table X

- (1) Relevant Control Systems differentiated per relevant portfolio segments and at a level which is lower than the Directorate-General total
- (2) Payments made or equivalent, e.g. expenditure registered in the Commission's accounting system, accepted expenditure or cleared pre-financing. In any case, this means after the preventive (ex-ante) control measures have already been implemented earlier in the cycle.
- (3) New pre-financing actually paid by out by the department itself during the financial year (i.e. excluding any pre-financing received as a transfer from another department). As per note 2.5.1 to the Commission annual accounts thus excluding "Other advances to Member States" which are covered on a purely payment-made basis (note 2.5.2). Pre-financing paid/cleared" are always covered by the Delegated DGs, even for Cross-SubDelegations.
- (4) Pre-financing actually cleared during the financial year (i.e. their 'delta' in the Financial Year 'actuals', not their 'cut-off' based estimated 'consumption').
- (5) For the purpose of equivalence with the ECA's scope of the EC funds with potential exposure to legality & regularity errors (see the ECA's Annual Report methodological Annex 1.1), our concept of "relevant expenditure" includes the payments made, subtracts the new pre-financing paid out, and adds the pre-financing actually cleared during the FY. This is a separate and 'hybrid' concept, intentionally combining elements from the budgetary accounting and from the general ledger accounting.
- (6) In this column, we disclose the detected error rates or equivalent estimates.
- (8) The adjusted average recovery and corrections percentage is to some extent based on the 7 years historic Average of Recoveries and financial Corrections (ARC), which is the best available indication of the corrective capacity of the ex-post control systems implemented by the DG over the past years. The AOD *has adjusted* this historic average *from 1.2% to 0%* to taking account of the fact that ex post controls in 2017-2020 did not result in any recovery order, with financial errors being mostly avoided at ex ante level. Any ex ante elements, one-off events, (partially) cancelled or waived Recovery Orders, and other factors from the past years that would no longer be relevant for current programmes (e.g. higher ex post corrections of previously higher errors in earlier generations of grant programmes, current programmes with entirely ex ante control systems) *have been adjusted* in order to come to the best but conservative estimate of the ex post future corrections to be applied to the reporting year's relevant expenditure for the current programmes. The estimated future corrections are therefore re-evaluated at € 0.0 (zero).

¹⁰¹ The European Commission Digital Strategy (C(2018)7118) calls on Commission services to digitally transform their business processes by developing new innovative digital solutions or make evolve the existing ones in line with the principles of the strategy. At the beginning of the year N+1, the Solution Owner and IT Investments Team will assess the progress made based on the proposed modernisation plan. For each of the three solutions, a table will reflect – per principle - the progress achieved during the last year.

¹⁰² A key data asset is defined as any entity that comprises a source of data based on projects or administrative processes, structured or semi-structured in an information system, a database or a repository of data or corpora of text. A data asset can include multiple datasets or files somehow linked, e.g. by common codes or metadata. Commission key data assets have been documented in the data inventory.

¹⁰³ This indicator follows up on the progress of services in implementing corporate data governance and data policies for their key data assets included in the EC data inventory (see the [DataStrategy@EC action plan](#)). In summary, this means that for each key data asset, services should assess if the following principles have been respected: Identify and designate the data owner and the data steward(s); instruct their data stewards to share the metadata of their data assets in the Commission's data catalogue and to keep them up to date; design and document processes for data collection/creation, acquisition, access, sharing, use, processing preservation, deletion, quality, protection and security. Information concerning these processes should be made available to anyone interested, as long as any confidentiality restrictions are respected; make any necessary changes and updates to the IT systems used for storing, managing and disseminating these data assets to implement the aforementioned requirements and processes.

A data governance hub will shortly offer a single point of access on the intranet for related guidance and information. It will be complemented by further practical guidance.

Description	Indicator	Target	Latest known results
Paperless DG Communication	Reduction of the average number of printed pages per user against the 2019 baseline	10%	58% ¹¹⁰
Greening of the car fleet in the Representations	Percentage of new cars purchased that are electric or plug-in hybrid ¹¹¹	50% of new cars purchased in 2020 are electric or plug-in hybrid ¹¹²	100% ¹¹³
Green public procurement for supplies and services	Percentage of relevant ¹¹⁴ high-value calls for tender incorporating green	50%	100% ¹¹⁵

¹⁰⁸ In anticipation of the Communication on the Greening of the Commission, a draft Green DG Communication Action Plan was prepared in 2020 on the basis of the Green Talks staff consultation, with the intention of reviewing it and adopting once the Communication is published, in order to align it with the greening objectives. Many key initiatives (8 out of 23) are meanwhile already being implemented in the three identified key areas: mobility, day-to-day activity, meetings and events.

¹⁰⁹ The scope and pace of the audits was to be determined by the results of a gap analysis in two pilot Representations, eventually performed in 2021. On this basis DG Communication decided, together with the European Parliament, to limit the initial scope of EMAS roll-out to the 8 owned buildings (excluding Belgium and Luxembourg already in the EMAS perimeter), with a foreseen pace of 2 Representations per year. Auditing activity started in autumn 2021 with internal audits in two pilot Representations.

¹¹⁰ Pro-rata calculation based on available data for 2021 from contractor's invoices. The result is an underestimation because the 2019 baseline does not fully account for printing in Representations (data not available due to progressive transition to new, networked devices).

¹¹¹ In consideration of current market conditions, the purchase of electric or hybrid plug-in cars will initially focus on official cars (saloon type), which represent 50% of the Representations' fleet.

¹¹² See previous footnote.

¹¹³ The outcome is the result of prioritisation of replacements of official cars with plug-in hybrid models. The first fully electric official car was procured by the Representation in Belgium using operational leasing.

¹¹⁴ Depending on the nature of supplies and services, relevant calls for tender are those where green criteria can and should be used.

¹¹⁵ % of high-value contracts identified as relevant for Green Public Procurement (GPP) in 2021 through their CPV code and have indeed incorporated GPP criteria

Reduction of emissions caused by missions	Reduction of the number of missions performed by DG Communication staff against the 2019 baseline	10%	61% ¹¹⁶

¹¹⁶ Due COVID-19 pandemic and related travel restrictions during 2021, only a limited number of missions could take place. These were, for the most part, essential missions according to the Commission's internal rules ([Tentative plan for a gradual return to the office](#)).
