<sup>1</sup> The figures in this column correspond to those in the 2023 budget (OJ L 58, 23.2.2023, p. 1) plus amending budget No 1/2023 and draft amending budgets No 2 and 3/2023.

<sup>2</sup> The figures in this column correspond to those in the 2022 budget (OJ L 45, 24.2.2022, p. 1) plus amending budgets No 1/2022 to No 5/2022.

<sup>3</sup> The own resources for the 2023 budget are determined on the basis of the budget forecasts adopted at the 188th meeting of the Advisory Committee on Own Resources on 25 May 2023.

<sup>4</sup> The amount includes for 2023 EUR 1 309 775 000 in relation to liabilities of the Union resulting from the borrowing referred to in Article 5 of Decision (EU, Euratom) 2020/2053.

<sup>5</sup> Article 310(1), third subparagraph, TFEU reads: 'The revenue and expenditure shown in the budget shall be in balance'.

<sup>6</sup> The base to be used does not exceed 50 % of GNI.

### Remarks

The assignment of customs duties as own resource to the financing of common expenditure is the logical consequence of the free movement of goods within the Union. This article may comprise levies, premiums, additional or compensatory amounts, additional amounts or factors, Common Customs Tariff duties and other duties established or to be established by the institutions of the European Union in respect of trade with third countries and customs duties on products under the expired Treaty establishing the European Coal and Steel Community.

Figures are net of collection costs.

### Legal basis

### Remarks

The GNI-based resource is an ‘additional’ resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments, the plastic-based own resource and other revenue in any particular year. By implication, the GNI-based resource ensures that the budget is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (plastic-based own resource, VAT-based resource, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States’ GNI for the financial year 2023 is 0,5976 %.

#### Remarks

The Commission may impose fines, periodic penalty payments and other penalties on undertakings and associations of undertakings for not respecting bans or not carrying out their obligations under the Regulations enumerated below or under Articles 101 and 102 TFEU.

The fines must normally be paid within three months of the Commission decision being notified. However, the Commission will not collect the amount due if the undertaking has lodged an appeal with the Court of Justice of the European Union. The undertaking must provide the Commission with either a provisional payment or a financial guarantee covering both the principal of the debt and the interest or surcharges by the final date for payment.

#### Legal basis

9 823 608 467	-1 022 061 071	8 801 547 396

### Remarks

This item is intended to record the net contributions from the United Kingdom resulting from the payments made in accordance with Article 148 of the Agreement on the withdrawal of the United Kingdom of Great Britain and Northern Ireland from the European Union and the European Atomic Energy Community.

The net contributions correspond to the differences between the amounts due by the United Kingdom to the Union and the amounts due by the Union to the United Kingdom.

This item also accommodates the assigned revenue included in the United Kingdom contribution to the Union budget.

The reference dates for payments by the United Kingdom to the Union or by the Union to the United Kingdom made after 31 December 2020 shall be 30 June and 31 October of every year. Payments shall be made in four equal monthly instalments for payments that have a reference date of 30 June and in eight equal monthly instalments for payments that have a reference date of 31 October. All payments shall be made by the last working day of each month, starting on the reference date or, where the reference date is not a working day, the last working day before the reference date.

#### Remarks

The Commission may impose fines, periodic penalty payments and other penalties on undertakings and associations of undertakings for not respecting bans or not carrying out their obligations under the Regulations enumerated below or under Articles 101 and 102 TFEU.

The fines must normally be paid within three months of the Commission decision being notified. However, the Commission will not collect the amount due if the undertaking has lodged an appeal with the Court of Justice of the European Union. The undertaking must provide the Commission with either a provisional payment or a financial guarantee covering both the principal of the debt and interest or surcharges by the final date for payment.

#### Legal basis

Council Regulation (EC) No 1/2003 of 16 December 2002 on the implementation of the rules on competition laid down in Articles 81 and 82 of the Treaty (OJ L 1, 4.1.2003, p. 1).

#### Remarks

Horizon Europe – the Framework Programme for Research and Innovation aims at delivering scientific, technological, economic and societal impact from the Union's investments in research and innovation so as to strengthen the scientific and technological bases of the Union and foster its competitiveness in all Member States including in its industry, deliver on the Union's strategic priorities, contribute to the realisation of Union objectives and policies, contribute to tackling global challenges, including the Sustainable Development Goals by following the principles of Agenda 2030 and the Paris Agreement, and strengthen the European Research Area. Horizon Europe shall thus maximise Union added value by focusing on objectives and activities that cannot be effectively realised by Member States acting alone, but in cooperation.

Horizon Europe shall:

- develop, promote and advance scientific excellence, support the creation and diffusion of high-quality new fundamental and applied knowledge, skills, technologies and solutions, training and mobility of researchers, attract talent at all levels and contribute to full engagement of the Union's talent pool in actions supported under Horizon Europe,
- generate knowledge, strengthen the impact of research and innovation in developing, supporting and implementing Union policies and support the access to and uptake of innovative solutions in European industry, notably in SMEs, and in society to address global challenges, including climate change and the Sustainable Development Goals,
- foster all forms of innovation, facilitate technological development, demonstration and knowledge and technology transfer, strengthen deployment and exploitation of innovative solutions,
- optimise Horizon Europe's delivery for strengthening and increasing the impact and attractiveness of the European Research Area, to foster the excellence-based participations from all Member States, including low R&I performing Member States, in Horizon Europe and to facilitate collaborative links in European research and innovation.

Horizon Europe shall ensure the effective promotion of equal opportunities for all and the implementation of gender mainstreaming, including the integration of the gender dimension in R&I content.

Horizon Europe shall be implemented in synergy with other Union programmes while aiming for maximal administrative simplification.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue give rise to the provision of appropriations for this programme under this title for a total amount of EUR 5 412 000 000 in commitments. The amounts indicated in the budget remarks of the relevant budget lines under this title provide information about the expected amount of legal commitments in 2022.

Regulation (EU) 2021/2115 of the European Parliament and of the Council of 2 December 2021 establishing rules on support for strategic plans to be drawn up by Member States under the common agricultural policy (CAP Strategic Plans) and financed by the European Agricultural Guarantee Fund (EAGF) and by the European Agricultural Fund for Rural Development (EAFRD) and repealing Regulations (EU) No 1305/2013 (EU) No 1307/2013 (OJ L 435, 6.12.2021, p. 1).

## Article 01 02 02 — Global Challenges and European Industrial Competitiveness (Pillar II)

### Remarks

This pillar is intended to support the creation and better diffusion of high-quality new knowledge, technologies and sustainable solutions, reinforce the competitiveness of European industry, strengthen the impact of research and innovation in developing, supporting and implementing Union policies, and support the uptake of innovative solutions in industry, notably in SMEs and start-ups, and in society to address global challenges.

To maximise impact flexibility and synergies, research and innovation activities shall be organised in six clusters, interconnected through pan-European research infrastructures, which individually and together will incentivise interdisciplinary, cross-sectoral, cross-policy, cross border and international cooperation.

This pillar consists of the following six clusters:

- Health,
- Culture, Creativity and Inclusive Society,
- Civil Security for Society,
- Digital, Industry and Space,
- Climate, Energy and Mobility,
- Food, Bioeconomy, Natural Resources, Agriculture and Environment,

and the non-nuclear direct actions of the Joint Research Centre.

Social sciences and humanities shall be fully integrated across all clusters, including specific and dedicated activities. Activities from a broad range of Technology Readiness Levels, including lower Technology Readiness Levels, will be covered in this pillar of Horizon Europe. Each cluster contributes towards several Sustainable Development Goals; and many of those goals are supported by more than one cluster. Gender equality is a crucial factor in order to obtain sustainable economic growth; it is therefore important to integrate a gender perspective in all global challenges.

### Remarks

This appropriation is intended to respond to the challenges arising from persistent security threats, including cybercrime, as well as natural and man-made disasters. Research and innovation activities under this cluster will have an exclusive focus on civil applications. Coordination with Union-funded defence research will be sought in order to strengthen synergies, recognizing that there are areas of dual-use technology. Due attention will be given to the human understanding and perception of security. Security research responds to the commitment of the Rome Agenda to work towards "a safe and secure Europe", contributing to a genuine and effective Security Union.

*New item*

The Chips Joint Undertaking shall contribute to the implementation of Horizon Europe, in particular cluster ‘Digital, Industry and Space’ with the aim of supporting:

- large-scale capacity building throughout investment into cross-border and openly accessible research, development and innovation infrastructure set up in the Union to enable the development of cutting-edge and next-generation semiconductor technologies that will reinforce the Union’s advanced design, systems integration, and chips production capabilities, including emphasis on start-ups and scale-ups;
- key digital technologies that encompass electronic components, their design, manufacture and integration in systems and the software that defines how they work. The overarching objective of this partnership is to support the digital transformation of all economic and societal sectors, make the transformation work for Europe and support the European Green Deal.

#### Remarks

Appropriations under this chapter are intended to cover actions focused on reinforcing Europe's capacities in high performance computing, artificial intelligence, cybersecurity and advanced digital skills, development and deployment of cutting-edge and next generation semiconductor and quantum technologies and ensuring their wide use across the economy and society. Fostered simultaneously, these will help create a thriving data economy, promote inclusiveness and equal opportunities for all and ensure value creation. Most importantly, the programme will concentrate on the areas where no single Member State alone can ensure the level required for digital success. Focus will also be placed on those areas where public spending has the highest impact, notably on improving efficiency and quality of services in areas of public interest such as health, environment, climate, mobility and public administrations, and helping small and medium-sized enterprises (SMEs) to adapt to digital change.

The Digital Europe Programme will also consider the added value of combining digital with other enabling technologies in order to maximise benefits from digitisation.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines

Remarks

The European defence industry Reinforcement through common Procurement Act (EDIRPA) has the following objectives:

- to foster the competitiveness and efficiency of the European defence technological and industrial base for a more resilient Union, in particular by speeding up, in a collaborative manner, the adjustment of industry to structural changes, including the ramping-up of its manufacturing capacities;
- to foster cooperation in the defence procurement process between participating Member States contributing to solidarity, interoperability, prevention of crowding-out effects, avoiding fragmentation and increasing the effectiveness of public spending.

The objectives shall be pursued with an emphasis on strengthening and developing the Union defence industrial base to allow it to address in particular the most urgent and critical defence product needs, especially those revealed or exacerbated by the response to the Russian aggression against Ukraine, taking into account the work of the Defence Joint Procurement Task Force.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

### Remarks

This appropriation is intended to cover actions of an operational nature, more specifically, directly linked to the achievement of the objectives of the European defence industry Reinforcement through common Procurement Act (EDIRPA).

In particular, the EU financial support and actions brought through EDIRPA stimulate common procurement (defined as cooperative procurement jointly conducted by at least three member states and associated third countries) by Member States and associated third countries and benefit the European defence technological and industrial base, while ensuring EU Member States' armed forces' ability to act, security of supply and increased interoperability.

### Remarks

### New Chapter

The Defence Industrial Reinforcement Instrument established by the Act in Support of Ammunition Production (ASAP) aims at strengthening the responsiveness and ability of the European Defence Technological and Industrial Base (EDTIB) to ensure the timely availability and supply of relevant defence products in the Union. It has the following main objectives pursued through its two pillars:

- to support the industrial reinforcement, the competitiveness and resilience of EDTIB notably through investments in relevant defence products manufacturing capacities, cross-border industrial partnerships and collaboration of relevant companies in a joint industry effort;
- to identify, map and continuously monitor the availability of the relevant defence products, their components and the corresponding inputs, and measures to establish requirements to secure the timely and lasting availability of the relevant defence products in the Union.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, in case of agreement on their participation, contributions received from EEA-EFTA countries for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Reference acts

Remarks

New Article

This appropriation is intended to cover actions of an operational nature, more specifically, directly linked to the achievement of the objectives of the Defence Industrial Reinforcement Instrument established by the Act in Support of Ammunition Production (ASAP).

In particular, the EU financial support and actions brought through the Defence Industrial Reinforcement Instrument will ramp-up the production capacities of the European Defence Technological and Industrial Base (EDTIB) and facilitate investment throughout the supply chain. It will contribute to reducing lead time for the production of the relevant defence products while facilitating investment to allow EDTIB to produce more and faster. It will also encourage the EDTIB's resilience through cross-border industrial partnerships and collaboration of relevant companies in a joint industry effort.
