of investment and reforms per NUTs 2 regions?								
Summary of the consultation process in the plan ²	YES/NO	YES	YES	YES	YES	YES	YES	YES
	Brief description	The consultation process included the <i>Länder</i> , cities, municipalities, social partners, NGOs, youth organisations and other relevant representatives of civil society. These were invited to submit their project proposals in advance. Overall, the Austrian government received project proposals amounting to EUR 56 billion and some of these proposals have been taken up in the plan. Some measures proposed by the <i>Länder</i> and municipalities have been included in the plan, notably investment support measures and measures in education, both contributing to social and territorial cohesion. The plan states that the measures related to the labour market incorporate inputs and suggestions from the social partners.	The different Belgian entities (federal government, the three regions and the linguistic communities) have defined autonomously the arrangements for involving a wide range of stakeholders. The federal government set up an advisory committee, consisting of the Central Economic Council (with the support sometimes of the National Labour Council) and the Federal Council for Sustainable Development, bringing together social partners and civil society that provided advice at different stages in the plan's preparation process. Moreover, the Institute for the Equality of Women and Men was consulted to assess the impact of the plan on gender equality and formulate recommendations. Regional and community governments consulted social partners on their respective reform and investment projects, and also exchanged with regional parliaments.	Between January and May 2021, the authorities held more than 15 meetings with different stakeholders where it presented the Plan's opportunities for Croatia, its structure, criteria, process and complementarities with other EU funds. The summary of the plan was published and presented to the media ahead of the adoption on 1 April 2021. After the adoption, the summary of the plan was posted on the Government's website and discussed in the Parliament on 14 April 2021.	Relevant stakeholders such as social partners, civil society organisations and youth organisations have been consulted in the preparation phase of the plan in accordance with the national legal framework and their input has been duly considered. Within the scope of their responsibilities, the different Ministries, governmental services and local authorities have been involved at an early stage in the elaboration of the plan. The Parliament has been regularly informed about the content of the plan. Furthermore, the Cyprus Economy and Competitiveness Council, equivalent to a national productivity board, has been consulted.	Under the coordination of the Ministry of Industry and Trade, the plan underwent a consultation process prior to submission of the plan, involving a variety of relevant stakeholders and in particular the tripartite forum with representatives of the social partners. The plan has also been subject to inter-ministerial consultation and a parliamentary debate, and was adopted by the government on 17 May.	Stakeholders were consulted at several stages. Most of the consultation processes took place prior to the drafting of the plan and in the context of the national 'restart teams' and climate partnerships. Their initiatives were fed into government initiatives that were then the subject of political agreement in the Danish Parliament. During the drafting of the recovery and the resilience plan, the Danish authorities consulted individual stakeholders and social partners directly and participated in an event with stakeholders and social partners that was hosted by the local Commission Representation	During the preparation of the plan, Finnish authorities consulted stakeholders and interest groups. These included social partners, NGOs, representatives of regional councils, cities, regional administration, industry and business organisations, NGOs and educational institutions. The consultations were arranged in various formats including regional and thematic events. In addition, large number of written statements and other proposals were received from both individuals and organisations. The objective of these stakeholder meetings was to inform about the preparation of the program and to hear the views of stakeholders regarding the content and preparation of the program.
