2009/TREN/019	Energie	Draft Proposal for a Council Regulation on notification of investment into EU energy infrastructure and repealing Council Regulation (EC) N° 736/96	TREN	Adopté le 16 juillet 2009 [COM(2009)361; SEC(2009)971; SEC(2009)972];[2009/0106 (CNS)]	Traité instituant la Communauté européenne: Article 284 TCE Article 187 Traité Euratom	codécision (COD)			The proposal strengthens the collection of appropriate data on future investment projects into an updated range of energy infrastructure (including new ones such as Carbon transport and storage). At the same time, the proposal simplifies the regulatory environment (proposal is aligned with the third Internal Market Package and Climate/energy package) and eases the administrative burden for Member States and companies with a less frequent reporting (every two years) and possible exemptions to the reporting obligations. The proposal also sets up a mechanism for sharing the resulting analysis of collected data with Member States and stakeholders and for increasing transparency on the evolution of the energy sector

2009/TREN/050	Energie	COUNCIL REGULATION on the implementation of Article 30 of the Protocol concerning the conditions and arrangements for admission of the Republic of Bulgaria and Romania to the European Union on Units 1 to 4 of the Kozloduy nuclear power plant in Bulgaria "Kozloduy Programme"	TREN	Adopté le 27 octobre 2009 [COM(2009)581]	Traité Euratom: Article 203	Adoption simple par le Conseil (ADO)	O		Bulgaria decided to continue decommissioning of Soviet design reactors such as the VVER 440/230 types (more economic than deferring these activities). It implies further timely funding. Bulgaria has therefore required for additional support between 2010-2013. The final amount for additional financial support would be €300M, out of which €180M (60%) would cover the needs for the implementation of decommissioning projects and €120M (40%) for measures in the energy sector. The preferred financing option is to continue EU funding via the EBRD thus securing a high level of safety, keeping expertise on site, ensuring de-fuelling, preventing re-opening. It would allow for a start of actual dismantling works while guaranteeing seamless financing.	Yes
