Methodical

-AGILE/SCRUM -DevOps

Vision

-based on Open Source & standards

Digital Transformation Services Company

Consulting & conception:

 existing system analysis, market research, data and process analysis, target definition, system trajectory, specifications

Your**projects** realisation, from the need to the solution

 estimation, planning, methodology, coordination, quality, delivery

Run & monitor your system, measure and improve its performances

 hosting, maintenance (corrective and evolutionary), continuous improvement, positioning analysis

History of Al -nonyme Platform

2012:

"The Conseil d'Etat" publicly calls for tenders to implement an anonymisation solution for unstructured data⇒ Our prototype, built in only 3 months, wins the tender with an 87% successful rate

2013:

Al-nonyme v1.0 starts managing existing stock (3M judicial decisions) with a 95% success rat

2014:

 Al-nonyme v2.0 improves success rate (to 97%) and increases performance (2000 document hourly per server)

2016:

Lextenso Editions, a French publishing house specialized in law, chooses Adyme for anonymizing the case law database

Today:

Al-nonyme is in production for more than 7 years, currently running on Kubernetes (on Microsoft Azure Cloud & OVH)

What AI -n on ym e does

Anonymization of:

- patronymic names
- o rare first names
- addresses of private persons
- names of legal entities where a private person's name appears elsewhere in the document that designates a private person

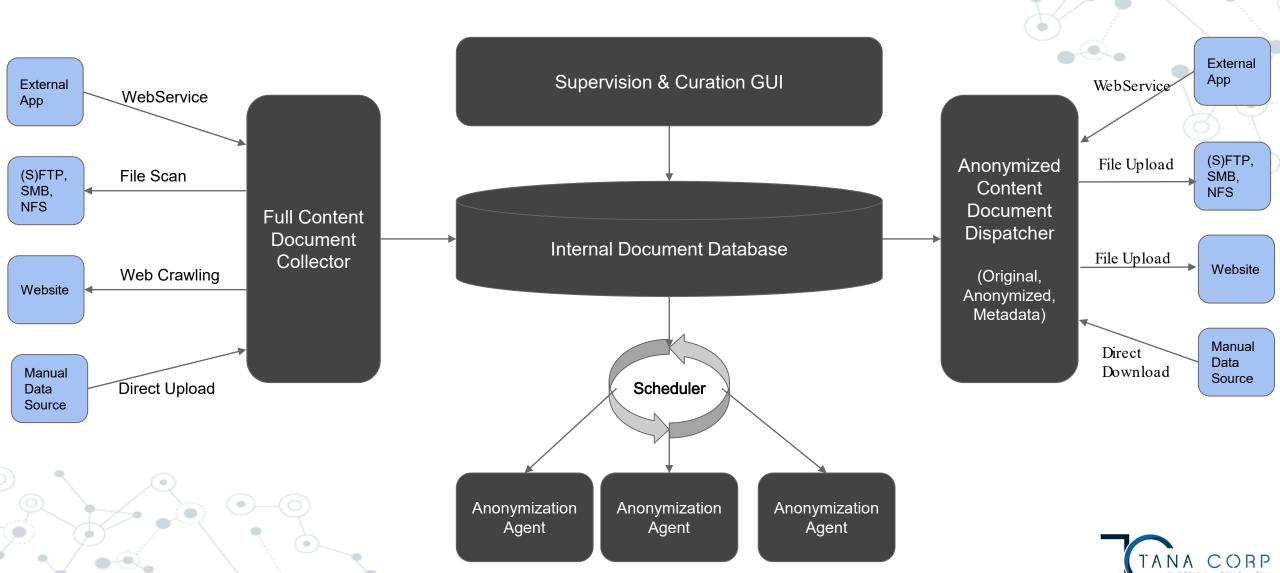

The following is not anonymized (as specified by french CNIL-Commission Nationale de l'Informatique et des Libertés) :

- The members of the judgment panel
- The clerk or secretary of the section
- The lawyers
- The other agents of the parties
- Legal entities and their addresses
