Notes

Notation: t signifies the first future year ending with 0 or 5 immediately following the reporting year

(1) Consistency with the data reported under Article 8 of this Regulation is encouraged.

(2) Use of notation keys: as regards the terms of use defined in the 2006 IPCC Guidelines for National Greenhou:

(3) Unspecified mix of HFCs and PFCs is to be reported only if emissions are projected, for which it is not possible

(4) Emissions in the scope of Directive 2003/87/EC

(5) Emissions in the scope of Regulation (EU) 2018/842.

(6) It shall be reported to which inventory submission the base year was calibrated.

(7) Values for t-5 shall only be provided when t-5 is after the projection base year.

(8) ODS – ozone depleting substances.

(9) For the purposes of reporting, the signs for removal shall always be negative (-) and the signs for emissions shall

(10) Projected indirect CO₂ emissions reported in this Table are part of the projected **Total** greenhouse gas emissions

Sum Check

This sheet provides the result of the sum checks for the WEM scenario.

1. Check **Reported Total GHGs - Aggregate GHGs = 0**

2. Check **Total GHGs - (ETS + non-ETS + CO₂ Domestic aviation + NF₃) = 0**

Values for CH₄, N₂O, SF₆ and NF₃ have been converted to CO₂e (using the GWPs data in the 'Index' sheet)
See column CB for notes on data for ETS split sum check and cell BC9 for guidance on reporting ETS and

A summary of the results is provided in row 4.

Notes: where check "1. Check Reported Total GHGs - Aggregate GHGs" cannot be completed because no numeric Total is shown. All checks are rounded to 6 decimal places.

Potential errors are highlighted in pink in columns AL: DB

Sector Sum Check

This sheet provides the result of the sector sum checks for the WEM, WOM and WAM scenarios.

1. Check Sector Totals = sum of sub-sectors

Errors occur where the sector total values do not equal the sum of the sub-sectors.

A summary of the results is provided in cells C1:U10.

Note: All checks are rounded to 6 decimal places.

Completeness Check

This sheet provides the result of the completeness check for all scenarios. Errors occur where:

- Blank cell:** Mandatory cells (filled in yellow) are blank
- 0 value:** Zero value has been entered (applies to mandatory and non-mandatory cells)

Non-mandatory cells which are blank are shown but not highlighted (**Blank cell, reporting not mandatory**).

A summary of the submission completeness by scenario is provided in cells F4:P7.

Sum Check

This sheet provides the result of the sum checks for the WEM scenario.

Check **Reported Total GHGs - Aggregate GHGs = 0**

A summary of the results is provided in row 2, Column AC.

Notes: where check "1. Check Reported Total GHGs - Aggregate GHGs" cannot be completed because no numeric to the notation key is shown. All checks are rounded to 6 decimal places.

Potential errors are highlighted in pink in columns AL:BS

Notes:

(1) The accounting categories for LULUCF are defined in Regulation (EU) 2018/841.

(2) Accounted LULUCF emissions for Managed Forest Land are reported emissions/removals in comparison to Article 8 of Regulation (EU) 2018/841. Reporting such accounted values is only mandatory when applying to Forest reforestation pursuant to Article 8(8) and 8(9) of Regulation (EU) 2018/841, for the given time-span (2021-2025, 2026-2030).

(3) Emissions within the scope of Regulation (EU) 2018/842.

(4) Accounting of this category for the 2026-2030 commitment period will be possible only with availability of final Forest Management Plans.

(5) Accounting of this category is mandatory starting from 2026, notwithstanding any potential postponement under States not intending to select this category for accounting in the 2021-2025 period shall use the notation key “not sel
