IT Rule of Law Virtual Country Visit - March, 20th, 2023– Contribution by Department of Public Administration

In 2022 Department for Public Administration continued to manage ad utilize the ParteciPa portal, the online tool developed together with the Department for Institutional Reforms to support public administrations in public consultation activities.

Particularly, in the May-July period, we launched a new consultation called "Facciamo semplice l'Italia. Le tue idee per una PA amica" dedicated to citizens, enterprises and other public administrations in order to collect both experiences about administrative burden and simplification proposals. It was carried out within the milestones M1C1-60, 61 and 63 of the Italian recovery and resilience plan, to support the simplification and digitization of 200 administrative procedures by 2024 and of 600 procedures by 2026. The public consultation asked a large variety of stakeholders to submit contributions: it was designed as a "call for ideas" consultation, consisting of four different online forms and an e-mail channel. Each online form had been dedicated to a specific type of stakeholder: citizens, businesses, civil servants and public administrations. Filling out the online forms, the participants could describe a burdensome procedure and suggest how to simplify it.

Overall, the initiative collected 955 filled forms and 20 position papers. The Department for public administration published the report about the public consultation results at the beginning of August 2022.

The Department for public administration is now taking into consideration the contributions and the simplification proposals to identify the most critical administrative procedures that need to be simplified..
