2013/CLIMA/022	Action pour le Climat	Commission proposal to the Council and the European Parliament for the establishment of a market stability reserve under the EU ETS	CLIMA	Adopté le 22 janvier 2014 [COM(2014)20];[PO/2014/184]	Traité sur le fonctionnement de l'Union européenne: 192(1)	procédure législative ordinaire (COD)	X X	<b>Programme de travail de la Commission / 2014 / CWP 2014</b>  The Commission in summer 2012 undertook steps to correct the shortcoming of the EU Emissions Trading System (ETS) and strengthen it based on a two-pronged approach. On the one hand, we should in the short-term slow down the increase of supply-demand imbalance by back-loading part of the auction supply. On the other hand, we should identify structural measures to enable the EU ETS to address the imbalance in a sustainable manner. Since then the Commission has conducted a public consultation on the basis of six options for structural measures set out in the Report on the state of the European carbon market. A rule-based mechanism to make supply more flexible has emerged as an additional option. The proposal reflects this last option.	
2014/ENV+/012	Environnement Recherche et Innovation	Towards a circular economy: a zero waste programme for Europe	ENV / RTD	Adopté le 1 juillet 2014 [COM(2014) 398; SWD(2014) 206; SWD(2014) 211]	Traité sur le fonctionnement de l'Union européenne: 192	procédure législative ordinaire (COD)	X	<b>Programme de travail de la Commission / 2014 / CWP 2014</b>  The initiative will build on progress in the implementation of the Roadmap to a Resource Efficient Europe and set out the key building blocks needed to unlock EU economic potential to be more productive whilst using fewer resources and advancing towards a circular economy. It will include conclusions drawn from the development of suitable indicators and targets; and the review of the key targets in EU waste legislation (in line with the review clauses in the Waste Framework Directive, the Landfill Directive and the Packaging Directive) and carry out an ex-post evaluation of waste stream directives, including an assessment of options to enhance coherence between them.

This could include strengthening the legal review of investigative measures through the new office of an independent Controller of procedural safeguards, and enhanced procedural safeguards for acts similar to searches and seizures carried out by OLAF in the institutions.

Recent studies that have become available since the Commission's reform CAP 2020 proposals were adopted, in particular the SFS evaluation and the special report of the European Court of Auditors, have identified the need to make further improvements to the school schemes to increase their efficiency and effectiveness. In order to ensure a long-term demand and market outlet for the EU farmers and reconnect consumers to agriculture, in particular children as future household managers, a broader and more unified policy response targeting children in schools might be required. 2014/MOVE/019	Transports	Directive of the European Parliament and of the Council facilitating the cross-border exchange of information on road safety related traffic offences	MOVE	Adopté le 18 juillet 2014 [COM(2014) 496]	Traité sur le fonctionnement de l'Union européenne: Article 91(1)(c)	procédure législative ordinaire (COD)	X	X	- The main objective of the proposed Directive is to put an end to the anonymity of non-resident drivers and to make sure that their road traffic offences would not go unpunished. For this reason the Directive provides the Member States with the mutual access to each other's vehicle registration data via an electronic data exchange network. This would allow them to identify drivers when they commit traffic offences abroad, thus ensuring equal treatment of non-resident and resident drivers. Once the vehicle owner's name and address are known, a letter to the presumed offender may be sent, on the basis of a model established by the Directive. The Member State of offence will have kept their right to decide on the follow up of the traffic offence.

2013/CLIMA/010	Action pour le Climat	Commission Regulation amending Regulation (EU) No 1031/2010 in particular to determine the volumes of greenhouse gas emission allowances to be auctioned in 2013-2020	CLIMA	Adopté le 25 février 2014 [C(2014)1143]				The Commission has presented the draft regulation to revise the auction time profile and postpone (backload) the auctioning of 900 million allowances in the third trading period of the EU Emissions Trading System (ETS) starting in 2013 as a first step to address the large and growing surplus of emission allowances in the system. In order to provide maximum legal certainty in relation to such a change, the Commission also considered it useful to clarify the ETS Directive and proposed such a clarifying amendment of the Directive in July 2012. The Commission adopted in November 2013 a report on the state of the European carbon market which sets out a range of possible structural measures that can be taken as a second step.	
2013/CLIMA/018	Action pour le Climat	Amendment of Commission Regulation (EU) No 601/2012 on the monitoring and reporting of greenhouse gas emissions pursuant to Directive 2003/87/EC of the European Parliament and of the Council as regards global warming potentials for non-CO2 greenhouse gases	CLIMA	Adopté le 4 mars 2014 [C(2014)1283]	Traité sur l'Union européenne: Art. 14 of Directive 2003/87/EC			Decision 15/CP.17 of the Conference of the Parties to the United Nations Framework Convention on Climate Change (UNFCCC) determines that from 2015 the global warming potential (GWP) used by the Parties to calculate the carbon dioxide equivalence of anthropogenic emissions of greenhouse gases should be those listed in Annex III to Decision 15/CP.17. In order to ensure consistency of the relevant Union legislation with the methodologies used in the context of the UNFCCC process, Annex VI to Commission Regulation 601/2012, that determines the global warming potentials for non-CO2 greenhouse gases to be used in the context of the EU Emission Trading System, should be amended accordingly.	
2013/CLIMA/019	Action pour le Climat	Commission Implementing Decision amending Commission Decision 2005/381/EC as regards the questionnaire for reporting on the application of Directive 2003/87/EC of the European Parliament and of the Council	CLIMA	Adopté le 21 mars 2014 [C(2014)1726]	Traité sur le fonctionnement de l'Union européenne: Article 21 of Directive 2003/87/EC			Article 21 of the European Union Emissions Trading System (EU ETS) Directive requires Member States to submit annual reports regarding the implementation of the Directive, using a questionnaire developed by the European Commission. The abovementioned questionnaire is contained in the Annex of Commission Decision 2006/803/EC. It is now necessary to amend this questionnaire to ensure it is in line with the new legislative landscape in relation to the EU Emission Trading System (for example Commission Regulation 600/2012 and 601/2012). To achieve this objective it is necessary to delete obsolete questions, to add new questions, to amend existing questions where relevant.

2014/COMP/001	Concurrence	Review of Commission Regulation (EC) 906/2009 on the application of Article 81(3) of the Treaty [now Article 101(3) of the Treaty on the Functioning of the European Union] to certain categories of agreements, decisions and concerted practices between liner	COMP	Adopté le 24 juin 2014 [C(2014) 4141]	Législation secondaire: Article 101.3, Enabling Council Regulation 246/2009			A consortium is a co-operation of shipping lines to provide joint maritime cargo transport services. Such agreements usually allow shipping lines to jointly rationalise their activities and achieve economies of scale. If consortia are faced with sufficient competition, the users of the transport services provided by consortia usually benefit from improvements in productivity, quality of service and higher coverage of ports. The Consortia BER clarifies under which conditions consortia can be presumed to produce efficiencies which outweigh their anticompetitive effects. The Commission has adopted a BER for Consortia since 1995 which, according to Article 2 of the Council's Enabling Regulation, shall apply for five years. The upcoming expiry of the existing Consortia BER is the reason for the Commission to carry out the present review.	
2014/COMP/002	Concurrence	Technical revision of the antitrust De Minimis Notice	COMP	Adopté le 25 juin 2014 [C(2014) 4136]	Traité sur le fonctionnement de l'Union européenne: 101			The main objective is to ensure that the De Minimis Notice reflects appropriately the development of the case law from the European Court of Justice (the Expedia case). In this jurisprudence the ECJ has now established that the concept of appreciable impact on competition does not apply when the agreement in question contains a so called by object restriction (which is a severe restriction presumed to be anticompetitive as such and which does therefore not have to be individually assessed). Therefore, the De Minimis Notice needs to be updated to ensure that no agreements with by object restrictions can benefit from the safe harbour of the De Minimis Notice. From a pure technical perspective the revision will also ensure that the De Minimis Notice does not need to be updated every time another competition law regulation is revised.

The initiative, as set out in more detail in the Staff Working Paper "Towards more effective EU merger control", which was published for comments on 20 June 2013, consists in addressing the following issues regarding the application of the Merger Regulation: - whether to apply the Merger regulation to a new category of transactions, namely acquisitions of non-controlling minority shareholdings, in order to capture anti-competitive effects stemming from such acquisitions; - the effectiveness and smoothness of the case referral system to transfer cases from Member States to the Commission both before and after notification; - several possible further technical improvements to the Merger Regulation.

2013/TRADE/024	Commerce	Commission Recommendation and Council Decision approving the modification of Annex XII to the EU-Chile Association Agreement specifying the list of public entities committed under the Government Procurement chapter	TRADE	Adopté le 8 janvier 2014 [COM(2013)942]	Traité sur l'Union européenne: Article 3 and Article 207			The Chilean authorities wish to modify the list of Chilean public entities committed under the Government Procurement chapter. Their proposal consist in simplifying the list of public entities to a generic reference, that would cover all the entities currently listed, and eliminate the need for future changes to the Annex should entities change. In practice, the Annex would be cut down from the current 12 pages to a few paragraphs. Since Chile's coverage under the Government Procurement Title remains unchanged, DG TRADE considers this change as uncontroversial and no compensatory adjustments are necessary. On the contrary, it introduces a sensible improvement to the structure of the Agreement. In terms of procedure, each party to the Agreement would have to follow the internal procedure for the determination of its position.

2013/EEAS/013	relations extérieures	Joint HR-Commission Communication to the Council on EU strategy for public security in Central America and the Caribbean	EEAS	Adopté le 19 mai 2014 [JOIN(2014) 21]				In Central America and the Caribbean, state institutions remain weak and levels of violence (fuelled by organised crime and the drug trafficking) are among the highest in the world.
