

Dear Madam or Sir,

My name is Pietro Mezzano, and I work for OGCI in the Strategy and Policy team, under the aegis of Julien Perez, VP Strategy and Sustainability.

We would like to contribute to the upcoming June 09th, 2020 webinar with a 3' presentation of the soon to be launched "Recommended Practices for CH4 emissions detection and measurement-based quantification technologies" activity, under the leadership of IOGP, and collaboration of IPIECA, OGCI and support from a number of independent experts.

The recommended practices will be developed in a phased approach and should provide the user with a framework on how to incorporate and apply different combinations of detection (in phase 1) and measurement-based quantification (in a phase 2) technologies to:

In a first phase (2020):

1. Achieve more effective mitigation action,
2. Improve the robustness of identifying frequency and persistence of large methane emissions,

In a future second phase (2021+):

3. Improve the quantification of methane emissions

IOGP / IPIECA / OGCI Recommended Practices for CH4 emissions detection and measurement-based quantification technologies		
Scope Provide the user with a framework on how to incorporate and apply different combinations of detection and measurement-based quantification technologies to: <ol style="list-style-type: none">1. Achieve more effective mitigation action,2. Improve the robustness of identifying frequency and persistence of large methane emissions,3. Improve the quantification of methane emissions	Perimeter Upstream O&G Global, all types of assets	
Timeline Following a phased approach Q2 20' to Q1 21' Detection technologies Q2 21' onwards Measurement-based quantification technologies	Governance Steerco: IOGP, IPIECA, OGCI Task Force: IOGP (lead), IPIECA, OGCI, others Consultant – driving force to manage the project Independent experts to provide additional technical support	

This effort is significant, as aligns 3 organisations' efforts to come up with a quantitative-driven recommended practice, with global focus.

We attach a 1 slide presentation, that we would use to present the activity to the other participants in the webinar.

Do let us know what would be the next steps,

We look forward to supporting the EC in this stakeholder meeting,

Best regards,

Pietro Mezzano
