Remarks

The assignment of customs duties as own resource to the financing of common expenditure is the logical consequence of the free movement of goods within the Union. This article may comprise levies, premiums, additional or compensatory amounts, additional amounts or factors, Common Customs Tariff duties and other duties established or to be established by the institutions of the European Union in respect of trade with third countries and customs duties on products under the expired Treaty establishing the European Coal and Steel Community.

Figures are net of collection costs.

Remarks

The GNI-based resource is an ‘additional’ resource, providing the revenue required to cover expenditure in excess of the amount yielded by traditional own resources, VAT-based payments, the plastic-based own resource and other revenue in any particular year. By implication, the GNI-based resource ensures that the budget is always balanced *ex ante*.

The GNI call rate is determined by the additional revenue needed to finance the budgeted expenditure not covered by the other resources (plastic-based own resource, VAT-based resource, traditional own resources and other revenue). Thus a call rate is applied to the GNI of each of the Member States.

The rate to be applied to the Member States’ GNI for financial year 2026 is 0,6896 %.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

Remarks

This appropriation is intended to cover actions to contribute to the development of projects of common interest relating to efficient, interconnected and multimodal networks and infrastructure for smart, interoperable, sustainable, inclusive, accessible, safe and secure mobility. Those projects will be implemented mainly through calls for proposals under multiannual work programmes constituting financing decisions within the meaning of Article 110 of the Financial Regulation.

This appropriation will support actions that take into account the long-term decarbonisation commitments of the Union. The implementation will take the form of studies, works and other accompanying measures necessary for the management and delivery of the CEF, in line with the sector specific guidelines, i.e. the TEN-T Guidelines.

Eligible actions will relate to the development of efficient, interconnected and multimodal networks in railways, inland waterways, maritime ports and road infrastructure along the TEN-T core network and for cross-border links, maritime ports and inland ports located on the TEN-T comprehensive network. Moreover, support will be provided to smart, interoperable, sustainable, multimodal, inclusive, accessible, safe and secure mobility, such as Motorways of the Sea, telematics application systems for all transport modes, new technologies and innovation with a specific focus on alternative fuels infrastructures, actions to remove interoperability barriers and actions improving transport infrastructure accessibility and resilience.

Assigned revenue received may give rise to additional appropriations under this budget line in accordance with Article 22(1) of the Financial Regulation.

Remarks

ERA contributes to the further development and effective functioning of a single European railway area without frontiers, by guaranteeing a high level of railway safety and interoperability, while improving the competitive position of the railway sector. In particular, the ERA contributes, on technical matters, to the implementation of Union legislation by developing a common approach to safety on the Union rail system and by enhancing the level of interoperability on the Union rail system. Further objectives of the ERA are to follow the reduction of national railway rules in order to support the performance of national authorities acting in the fields of railway safety and interoperability, to promote the optimisation of procedures, to monitor national safety authorities and conformity assessment bodies and to manage and keep up-to-date a number of registers, which is vital for the smooth operation of the European railway area.

The entry into force of the technical pillar of the Fourth Railway Package designated ERA as the Union authority responsible for issuing authorisations for placing railway vehicles on the market, single safety certificates for railway undertakings and track-side approvals of the European Rail Traffic Management System.

Remarks

Appropriations under this chapter are intended to contribute to the good functioning of the single market for goods and services, including financial services, anti-money laundering and the free movement of capital, and to provide high quality European statistics on all Union policies, as per the purpose of the Programme for the single market, competitiveness of enterprises, including small and medium-sized enterprises, and European statistics ('Single Market Programme'). In particular, the programme will support the design, implementation and enforcement of the Union legislation underpinning the proper functioning of the single market for goods and services, including financial services, anti-money laundering and the free movement of capital, as well as capacity building, coordination of joint actions between Member States and the Commission, and the international dimension of the internal market. It will also support women's participation and contribute to the empowerment of all actors of the single market: businesses, citizens including consumers, civil society and public authorities. The Single Market Programme brings together six preceding programmes from different policy areas, notably the grants and contracts part of the Programme for the Competitiveness of Enterprises and small and medium-sized enterprises (COSME), programmes on consumer protection, enhancing the participation of consumers and other end users in financial services policymaking, the development of international financial, auditing and corporate reporting standards, measures to contribute to a high level of health for humans, animals and plants along the food chain and in related areas, and European statistics. In addition, the programme includes several other budgetary lines concerning, in particular market surveillance, company law, contract and extra-contractual law, standardisation and support for competition policy, customs and taxation. The impact assessment showed that one single programme will create synergies contributing to more agile and efficient budgetary spending.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes, and any other assigned revenue, entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

New article

Having regard to the TFEU, and in particular Article 114 thereof, as well as to Regulation (EU) No 952/2013, the European Customs Authority will contribute to a more effective and efficient operational management of the customs union. It will develop and manage the EU Custom Data Hub and perform EU level risk management, crisis management and performance measurement activities. It will provide operational coordination and support to national customs authorities to ensure a more harmonized application of customs controls and a uniform application of customs legislation. It will not only make the customs union stronger to better target illicit and non-compliant goods and ‘bad’ supply chains in close cooperation with other authorities and agencies, it will also make customs simpler by drastically simplifying customs processes for trade through the Data Hub.

Remarks

This appropriation is intended to cover the operational expenditure under the EU4Health Programme. Its objective is to protect people in the Union from serious cross-border threats to health; to improve the availability, accessibility and affordability, in the Union, of medicines, medical devices and crisis-relevant products, and to support innovation regarding such products; to strengthen health systems and the healthcare workforce, including by digital transformation and by increased integrated and coordinated work among the Member States, sustained implementation of best practice and data sharing; and to increase the general level of public health.

The EU4Health Programme is to cater for a solid legal and financial framework for health crisis prevention, preparedness and response in the Union. This programme is to reinforce national and Union capacity for contingency planning and enable Member States to jointly cope with common health threats, in particular cross-border threats, where Union intervention can add tangible value. The programme complements health policies of the Member States and supports a 'One Health' approach, where applicable, in improving health outcomes through resilient, resource-efficient and inclusive health systems across the Member States, through better disease prevention and surveillance, health promotion, access, diagnosis and treatment, including the fight against cancer as well as cross-border collaboration in health. This programme is to also address non-communicable diseases, which have been shown to be a strong determinant of mortality from COVID-19.

Remarks

In order to promote the protection of human and animal health and of consumers of medicinal products throughout the Union, and in order to promote the completion of the internal market through the adoption of uniform regulatory decisions based on scientific criteria concerning the placing on the market and the use of medicinal products, the objective of the European Medicines Agency (EMA) is to provide the Member States and the institutions of the Union with the best possible scientific advice on any question relating to the evaluation of the quality, safety, and efficacy of medicinal products for human and veterinary use, in accordance with the provisions of the Union legislation relating to medicinal products.

Regulation (EU) 2022/123 strengthened the role of the EMA in crisis preparedness and the management of medicinal products and medical devices, allowing the EMA to closely monitor and mitigate shortages of medicines and facilitate the faster approval of medicines that could treat or prevent a disease causing a public health crisis. After an initial transition period, the EMA will also coordinate responses of the Member States on shortages of critical medical devices in the event of a crisis.

Remarks

Appropriations under this chapter are intended to cover expenditure to support Member States to achieve high employment levels, fair social protection and a skilled and resilient workforce ready for the future world of work, as well as expenditure to support, complement and add value to the policies of the Member States to ensure equal opportunities, access to the labour market, fair working conditions, social protection and inclusion.

In accordance with Articles 21, 22 and 24 of the Financial Regulation, contributions received from third countries (EFTA States pursuant to the Agreement on the European Economic Area, candidate countries and, if applicable, the Western Balkan potential candidates, or other third countries) for participating in Union programmes and any other assigned revenue entered in the statement of revenue give rise to the provision of corresponding appropriations and to implementation under this chapter.

The related estimated amounts as well as the corresponding article or item of the statement of revenue are indicated, wherever possible, in the relevant budget lines.

In addition, and in accordance with Regulation (EU) 2020/2094, external assigned revenue resulting from proceeds of the European Union Recovery Instrument entered in the statement of revenue gives rise to the provision of appropriations for programmes financed under REACT-EU under Titles 05 and 07 for a total amount of EUR 50 620 000 000 in commitments. Such amounts had to be legally committed before the end of 2023, with the exception of administrative expenditure, for which the amounts are indicated in the budget remarks of the relevant budget lines under this title.

Remarks

This appropriation is intended to cover expenditure aiming to reduce the economic, social and territorial disparities, which have arisen, particularly in countries and regions whose development is lagging behind, in connection with the speeding-up of economic and social restructuring, clean energy transition, digitalisation of the workplace, growing skills and labour shortages and the implications and impact of demographic change, including population ageing, in order to create a more social Europe. This is to be done in line with the principles of the European Pillar of Social Rights.

It will cover the following three categories of regions:

- less developed regions, with a GDP per capita less than 75 % of the average GDP of the Union,
- transition regions, with a GDP per capita between 75 % and 100 % of the average GDP of the Union,
- more developed regions, with a GDP per capita above 100 % of the average GDP of the Union.

Promotion of equality between women and men horizontally and through specific actions should be part of the support provided by the ESF+ in order to increase the participation of women in employment as well as conciliation between working and personal life and combat the feminisation of poverty and gender discrimination in the labour market and in education and training.
