•Real-time streaming: Authorized users can listen to ongoing hearings live, via the case interface.
•Remote participation: Multiple users can join a hearing simultaneously from different locations across the country or abroad, as if physically present in the courtroom.
Access is strictly controlled, and these functionalities are used only by authorized judicial actors, in accordance with applicable procedural rules.

Q062-26 (2024): Audio streaming of recordings of proceedings and hearings for forensic prosecutors, on their interface, upon request and/or by action of the judicial secretariat.

Romania

Q062-26 (General Comment): In Romania’s judicial system, the integrated solution OPTIMUS has been implemented. Developed in-house, it manages audio recordings and automatic voice-to-text transcription. It is “cloud ready” and uses machine learning algorithms to identify speakers. The solution underwent a successful technological pilot that evaluated its performance in challenging acoustic environments. The project is continuing with integration into the national case management system, ECRIS V, as part of the PNRR investment titled “Development of integrated audio recording systems in courtrooms and automatic transcription components.”
1. Technical Clarifications Regarding Automatic Indexing
Automatic indexing of recordings is achieved through speaker change detection and automatic segmentation of the audio stream (diarization). Machine learning algorithms identify transitions between speakers and automatically mark key moments in the recording, generating time markers used for both audio navigation and alignment of sound segments with the transcribed text.
2. General Context Regarding Courtroom Session Recording
Audio recording of courtroom sessions is a standard component of judicial activity. The OPTIMUS solution streamlines the transcription process and helps reduce drafting time. The implementation uses dedicated equipment for audio capture, separate from general sound systems. Nationally, the project aims to acquire the necessary IT infrastructure and equip over 1,000 courtrooms with specific devices, with data processing and integration to be carried out through the centralized infrastructure of ECRIS V.

Slovak Republic

Q062-26 (General Comment): In 2015, courtrooms were equipped with recording technology. These recordings are part of the electronic court file. The application "Audiorecording" is used to process multimedia recordings created during hearings in individual courtrooms. The Audio Recordings Client application (formerly MonoReCourt) is used for processing multimedia recordings produced during hearings in individual courtrooms.

Slovenia

Q062-26 (General Comment): Systematic recording for all hearings: the decision to record or not is in the hands of an individual judge.
Possibility to request a copy of the recording: a party has a right to acces the recording, as well as to object the authenticity of the transcript.

Q062-26 (2024): Voice recording: available in all courtrooms. A new system for the central collection of recordings (ASOD II), which enables secure remote access to recordings and provides interoperability with the newly implemented speech-to-text system (TIPKO), is currently being implemented. By the end of 2024, 19 of approximately 350 hearing rooms had been equipped to support this functionality.

Spain

Q062-26 (2024): Textualized recordings allow the user to search the textualized text by keywords or interveners. All recordings are electronically signed by the Judicial Councillor (responsible for the judicial office) and can be visualize through the electronic judicial file

Indicator 7: Professionals of justice

- Professional Judges and Non-judge staff

- Public prosecutors and Non-prosecutor staff

- Court presidents and Heads of prosecution services

- Salaries of judges and public prosecutors

- Lawyers

- EC Templates

Professional judges and non-judge staff

Austria: The administrative courts were established in January 2014. Data on administrative justice was introduced for the 2016 cycle for the first time.

Belgium: Starting from 2021, data include also administrative judges (judges of the Council of State and the Aliens Litigation Council). The latter are counted as first instance judges, even though the Council of State intervenes also as last instance court.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Italy: The administrative courts' judges have been included since 2018.

Poland: Starting from 2020, the number of Supreme Court judges include also judges of the Supreme Administrative Court.

Austria: The administrative courts were established in January 2014. Data on administrative justice was introduced for the 2016 cycle for the first time.

Belgium: Starting from 2021, data include also administrative judges (judges of the Council of State and the Aliens Litigation Council). The latter are counted as first instance judges, even though the Council of State intervenes also as last instance court.

Bulgaria: Starting from 2020, judges who administer justice in the appelate panels of regional and administrative courts are counted as second instance judges.

Czech Republic: The country has a four-tier system and since 2013 have included the number of judges of the high courts in the number of the second instance judges.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Italy: Administrative justice is taken into account since 2018

Poland: Starting from 2020, the number of Supreme Court judges include also judges of the Supreme Administrative Court.

Romania: The judicial system has four levels of courts. Second-instance figures include judges from tribunals and courts of appeal. Differences between first and second-instance numbers result from changes in calculation methods.

Czech Republic: The country has a four-tier system and since 2013 have included the number of judges of the high courts in the number of the second instance judges.

Malta: The number of second instance judges for administrative cases is included in the number of second instance judges for civil and/or commercial cases.

Romania:The judicial system has four levels of courts. Second-instance figures include judges from tribunals and courts of appeal. Differences between first and second-instance numbers result from changes in calculation methods.

Slovak Republic: The distribution of administrative judges per instance is made based on the instance level of the court where they work and not based on the instance of the cases for which they are responsible.

Austria: The administrative courts were established in January 2014. Data on administrative justice was introduced for the 2016 cycle for the first time.

Belgium: Starting from 2021, data include also administrative judges (judges of the Council of State and the Aliens Litigation Council). The latter are counted as first instance judges, even though the Council of State intervenes also as last instance court.

Czech Republic: The country has a four-tier system and since 2013 have included the number of judges of the high courts in the number of the second instance judges.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Italy: Administrative justice is taken into account since 2018

Romania: The judicial system has four levels of courts. Second-instance figures include judges from tribunals and courts of appeal. Differences between first and second-instance numbers result from changes in calculation methods.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Italy: Administrative justice is taken into account since 2018

Romania: Since there are 4 level of courts in Romania, judges of 2nd instance are the sum up of the judges from tribunal and of court of appeals. The variation between first instance and second instance courts is the result of different methods of calculation. In 2013, in first instance judges from 1st instance courts and from tribunals were summed up together.

Austria: The administrative courts were established January 1st 2014. Data on administrative justice is introduced for 2016 cycle for the first time.

Finland: Since 2015, the number of lawyers provided includes both the number of lawyers working in the private sector and the number of lawyers working in the public sector. Before , the number included only the members of the Finnish Bar Association who are entitled to use the professional title “advokat” (advocate).

Italy: Administrative justice is taken into account since 2018.

Poland: In 2020, data includes also employees of the Supreme Administrative Court.

EC Templates - Professional judges and lawyers

Austria: The administrative courts were established January 1st 2014. Data on administrative justice is introduced for 2016 cycle for the first time.

Greece: Unlike 2014 and 2015 data, since 2016 data on number of professional judges includes all the ranks for second instance criminal as well as administrative judges.

Italy: The administrative courts' judges have been included since 2018.

Poland: Starting from 2020, the number of Supreme Court judges include also judges of the Supreme Administrative Court.

Table 7.9 (EC) Number of lawyers* per 100 000 inhabitants from 2014 to 2024 (Q1, Q146)

Finland: Since 2015, the number of lawyers provided includes both the number of lawyers working in the private sector and the number of lawyers working in the public sector. Before 2015 the number given only included the members of the Finnish Bar Association who are entitled to use the professional titles advokat (advocate).

Indicator 7: Professionals of justice

comments provided by the national correspondents

organised by country

Question 004. Average gross annual salary (in €) for the reference year

Question 046. Number of professional judges sitting in courts (if possible on 31 December of the reference year). (Please give the information in full-time equivalent and for posts actually filled for all types of courts - general jurisdiction and specialised courts)

Question 046-2. Number of judges (FTE) by case type:

Question 052. Number of non-judge staff who are working in courts (if possible on 31 December of the reference year) (this data should not include the staff working for public prosecutors; see question 60) (please give the information in full-time equivalent and for posts actually filled)

Question 052-1. Number of non-judge staff by instance (if possible, on 31 December of the reference year) (this data should not include the staff working for public prosecutors; see question 60) (please give the information in full-time equivalent and for posts actually filled).

Question 055. Number of public prosecutors (on 31 December of the reference year). (Please give the information in full-time equivalent and for posts actually filled.)

Question 056. Number of heads of prosecution offices.

Question 057. In your judicial system, do other persons have similar duties to those of public prosecutors?

Question 060. Number of staff (non-public prosecutors) attached to the public prosecution services, if possible, on 31 December of the reference year and without the number of non-judge staff, see question 52 (in full-time equivalent and for posts actually filled).

Question 132. Salaries of judges and public prosecutors on 31 December of the reference year:

Question 133. Do judges and public prosecutors have additional benefits?

Question 146. Total number of lawyers practising in your country:

Question 147. Does this figure include "legal advisors" who cannot represent their clients in court (for example, some solicitors or in-house counsellors)?

Question 148. Number of legal advisors who cannot represent their clients in court:

Austria

Q004 (General Comment): Since the 2010 evaluation, the provided figure corresponds to the average gross income including taxes and social expenses borne by the employee, but not employer's contribution for social insurance. This is in line with the figures given in question 132 (gross annual salary of judges and prosecutors).

Q004 (2022): Source: Statistik Austria

Q004 (2019): 2018 data has been communicated, pending 2019 data.

Q046 (General Comment): For the all exercises, data have been provided in full time equivalent. The first instance judges sit in District and partly regional courts as well as in administrative courts. The second instance judges sit in partly regional courts and Courts of appeal. The last instance includes judges sitting in the Supreme Court and the Supreme Administrative Court.

Q046 (2019): Data in full time equivalent
1.: district courts and partly regional courts + administrative courts 2.: courts of appeal and partly regional courts

Q046 (2018): Data in full time equivalent
1.: district and regional Courts + administrative court
2.: courts of appeal

Q046 (2017): The data also include those of administrative courts.

Q046 (2016): This cycle admnistrative courts were taken into account for the first time.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.
Q046 (2015): The right (not rounded) numbers are:

	Total	Males	Females
Total number of professional judges (1 + 2 + 3)	1620,65	790,52	830,13
1. Number of first instance professional judges	1222,95	559,08	663,87
2. Number of second instance (court of appeal) professional judges	330,35	187,75	142,60
3. Number of supreme court professional judges	67,35	43,69	23,66

Data in full time equivalent
1.: district and partly regional courts
2.: partly regional courts and courts of appeal

Q046 (2014): For 2014, the numerical values in the table have been rounded. The most exact replies would be: Total: 1 620,04 (789,68 Male, 830,36 Female); first instance professional judges: 1 224,36 (556,01 Male, 668,35 Female); second instance professional judges: 329,63 (190,78 Male, 138,85 Female); Supreme court professional judges: 66,05 (42,89 Male, 23,16 Female). In 2014, some judges entitled to adjudicate in different law fields have been counted twice.

Q046 (2013): In 2013, the different tasks had been assigned to the full time equivalent judges, distinguishing between dealing with first and second instance court proceedings on the one hand and administrative tasks on the other hand.

Q046-2 (General Comment): The decrease in the number of judges at the second instance is attributed to corrections made after discovering that some numbers were counted twice in previous evaluation cycles.
Q052 (General Comment): Starting from 2021, the “Kanzlei” who are responsible for handling of case files are no more counted as “other staff” but as “staff in charge of different administrative tasks and of the management of the courts”. Moreover, starting from 2021, “technical staff” also includes staff working at the courts‘ IT departments. “Other staff” only includes trainees (including trainees for Rechtspfleger) and staff representation. The trainees concerned are nearly all trained for the handling of case files. A small number of trainees is trained for IT-support. Generally speaking, in the last years, efforts were made to enhance the methodology of presentation of data for Q52 and ensure better compliance with the CEPEJ categorization.
Q052 (2023): 2. Non-judge (judicial) staff whose task is to assist the judges such as registrars (case preparation, assistance during the hearing, helping to draft the decisions) - The number is higher now because now case managers are counted within this category by the competent department (since this year). Until now they were hard to count, but now it is possible.
5. Other non-judge staff - The number of Rechtspfleger-candidates has increased significantly compared to the year before and a huge part of them is female.

Q052 (2021): Starting from 2021, the “Kanzlei” who are responsible for handling of case files are no more counted as “other staff”, but as “staff in charge of different administrative tasks and of the management of the courts”. “Other staff” only includes trainees (including trainees for Rechtspfleger) and staff representation. Moreover, starting from 2021, “technical staff” also includes staff working at the courts‘ IT departments, therefore the number is higher than in previous years.

Q052 (2020): "Other": Handling of case files (“Kanzlei”)
2. Non-judge (judicial) staff whose task is to assist the judges: the increased number concerns administrative courts.

Q052 (2019): Non-judge staff whose task is to assist the judges: more staff at the administrative courts
Staff in charge of different administrative tasks and of the management of the courts: more staff
Other: Handling of case files (“Kanzlei”)
Q052 (2018): Handling of case files (“Kanzlei”)

Q052 (2017): The data also include those of administrative courts.

Q052 (2016): This cycle admnistrative courts were taken into account for the first time.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.

Q052 (2015): The right (not rounded) numbers are:
Total non-judge staff working in courts (1 + 2 + 3 + 4 + 5) 4734,55 - 1407,08 - 3327,47
1. Rechtspfleger (or similar bodies) with judicial or quasi-judicial tasks having autonomous competence and whose decisions could be subject to appeal 798,11 - 331,63 - 466,48
2. Non-judge staff whose task is to assist the judges such as registrars (case file preparation, assistance during the hearing, court recording, helping to draft the decisions) 19,05 - 1 - 18,05
3. Staff in charge of different administrative tasks and of the management of the courts (human resources management, material and equipment management, including computer systems, financial and budgetary management, training management) 439,56 - 155,86 - 283,70
4. Technical staff 21,70 - 9,85 - 11,85
5. Other non-judge staff 3456,13 - 908,74 - 2547,39

Q052 (2014): The numerical values in the table have been rounded. The most exact replies for this period would be: total non-judge staff: 4 704,51 (1 388 Male, 3 316,51 Female); Rechtspfleger: 784,78 (320,21 Male, 464,57 Female); non-judge staff whose task is to assist the judges: 19,18 (1 Male, 18,18 Female); staff in charge of different administrative tasks: 438,97 (159,85 Males, 279,12 Females); technical staff: 23,05 (9,95 Males, 13,10 Females); other non-judge staff: 3 438,53 (896,99 Males, 2 541,54 Females).

Q055 (General Comment): Data is presented in full time equivalent.

Q055 (2014): The numerical values provided in the table are rounded. The accurate figures are: total – 344,83 (171,52 males and 173,31 females); prosecutors at first instance level – 308,69 (147,13 males and 161,56 females); prosecutors at second instance (court of appeal) level – 20,94 (13,04 males and 7,90 females); prosecutors at Supreme Court level – 15,20 (11,35 males and 3,85 females).

Q056 (General Comment): Data are presented in full time equivalent.

Q056 (2023): Starting from 2022, the data provided in the table correspond to persons who exercise the function of head of prosecution office. Previous data were expressed in FTE.

Q056 (2022): Starting from 2022, the data provided in the table correspond to persons who exercise the function of head of prosecution office. Previous data were expressed in FTE.

Q056 (2014): The numerical values provided are rounded. The accurate figures are: total – 26,64 (16,79 males/9,85 females); heads of prosecution offices at first instance level – 19,60 (12,50 males/7,10 females); heads of prosecution offices at second instance level – 6,49 (3,89 males/2,60 females); heads of prosecution offices at Supreme Court level – 0,55 (0,40 males/0,15 females).

Q057 (2023): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence); starting from 2022, agents of public prosecutor's offices in training are included in the frame of Q60.

Q057 (2022): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence); starting from 2022, agents of public prosecutor's offices in training are included in the frame of Q60.

Q057 (2020): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence); agents of public prosecutor's offices in training included

Q057 (2018): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence); agents of public prosecutor's offices in training included.

Q057 (2016): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence).

Q060 (2023): - Staff in charge of different administrative tasks and of the management of the prosecution offices
- Technical staff
- Trainees (including trainees for Bezirksanwälte) and staff representation

Q060 (2022): Staff in charge of different administrative tasks and of the management of the prosecution offices
Technical staff
Trainees (including trainees for Bezirksanwälte) and staff representation

Q132 (General Comment): Judges/prosecutors are first placed into a certain pay grade according to their position within the judiciary system (e.g. regional courts, supreme court, administrative courts, etc.), where they receive the according base salary (§ 66 RStDG / § 190 RStDG). Every four years the salary increases by a fixed amount up until a certain maximum. Judges and public prosecutors in certain senior positions, such as the head of a district court, the vice president or president of a court of first instance or the head of a senior public prosecutor's office/public prosecutor's office, are entitled to a service allowance (between EUR 201.40 and EUR 1560.60 as at 31 Dezember 2024). The service allowance is part of the monthly salary. The service allowance is part of the monthly payment together with the salary. In principle, it could be stated that the salary covers all additional work performed by judges and public prosecutors in terms of quantity and time. Administrative Courts: First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 86440 Net annual salary: EUR 55850 Judge of the Administrative Supreme Court: Gross annual salary: approx. EUR 150000

Q132 (2023): Judges/prosecutors are first placed into a certain pay grade according to their position within the judiciary system (e.g. regional courts, supreme court, administrative courts, etc.), where they receive the according base salary (§ 66 RStDG / § 190 RStDG). Every four years the salary increases by a fixed amount up until a certain maximum. Judges and public prosecutors in certain senior positions, such as the head of a district court, the vice president or president of a court of first instance or the head of a senior public prosecutor's office/public prosecutor's office, are entitled to a service allowance (between EUR 171.90 and EUR 1332.30 as at 31 Dezember 2022). The service allowance is part of the monthly salary. The service allowance is part of the monthly payment together with the salary.
In principle, it could be stated that the salary covers all additional work performed by judges and public prosecutors in terms of quantity and time. Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 86440 Net annual salary: EUR 55850
Judge of the Administrative Supreme Court: Gross annual salary: approx. EUR 150000

Q132 (2022): Judges/prosecutors are first placed into a certain pay grade according to their position within the judiciary system (e.g. regional courts, supreme court, administrative courts, etc.), where they receive the according base salary (§ 66 RStDG / § 190 RStDG). Every four years the salary increases by a fixed amount up until a certain maximum. Judges and public prosecutors in certain senior positions, such as the head of a district court, the vice president or president of a court of first instance or the head of a senior public prosecutor's office/public prosecutor's office, are entitled to a service allowance (between EUR 171.90 and EUR 1332.30 as at 31 Dezember 2022). The service allowance is part of the monthly salary. The service allowance is part of the monthly payment together with the salary.
In principle, it could be stated that the salary covers all additional work performed by judges and public prosecutors in terms of quantity and time. Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 78545
Net annual salary: EUR 49400
Judge of the Administrative Supreme Court: Gross annual salary: approx. EUR 142000

Q132 (2021): Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 75700
Net annual salary: EUR 46900
Judge of the Administrative Supreme Court: Gross annual salary: EUR 133000

Q132 (2020): Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 75000
Net annual salary: EUR 46600
Judge of the Administrative Supreme Court: Gross annual salary: EUR 130000
Q132 (2019): Administrative Courts - First instance professional judge at the beginning of his/her Career:
Gross annual salary, in €: 72.900 Net annual salary, in €: 45.100
Q132 (2018): Gross annual Salary in € on 31 Dec 2018 First instance professional judge at the beginning of his/her career 53 865
Judge of the Supreme Court or the Highest Appellate Court : 131 227,88
Public prosecutor at the beginning of his/her career: 57 158,80
Public prosecutor of the Supreme Court or the Highest Appellate Instance : 131 227,88
Administrative court:
first instance professional Judge at the beginning of his/her Career: 69 600,00
Judge of the Supreme Court or the Highest Appellate Court: 126 000

Q132 (2016): Because of the requirement of numerical values the numerical values in the table above are rounded. the correct and exact answer is:
Gross annual Salary in € on 31 Dec 2016 (= Gross annual Salary in local currency on 31 dec 2016):
First instance professional judge at the beginning of his/her career: 59 962,40
Judge of the Supreme Court or the Highest Appellate Court (please indicate the average salary of a judge at this level, and not the salary of the Court President): 126 594,16
Public prosecutor at the beginning of his/her career: 55 139
Public prosecutor of the Supreme Court or the Highest Appellate Instance (please indicate the average salary of a public prosecutor at this level, and not the salary of the Public prosecutor General): 126 594,16

Q132 (2014): For 2014, the numerical values in the table are rounded. The correct and exact reply concerning the gross annual salary in Euros on 31 December 2014 is: first instance professional judges at the beginning of their career: 50 402,80 Euros; judges of the Supreme Court or the Highest appellate Court: 121 651,25 Euros; public prosecutors at the beginning of their career: 53 485,60 Euros; public prosecutors of the Supreme Court or the Highest appellate instance: 121651,25 Euros.

Q133 (General Comment): Judges at Administrative Courts get the same benefits as functionaries (e.g. anniversary reward, child allowance, possibly cost of living bonus, travel fees of transportation allowance)
Q133 (2018): Judges at Administrative Courts get the same benefits as functionaries (e.g. anniversary reward, child allowance, possibly cost of living bonus, travel fees of transportation allowance)
Q133 (2016): Judges at Administrative Courts get the same benefits as officials (i.e. anniversary reward, child allowance, possibly costs of living Bonus, travel fees or Transportation allowance).
Q146 (2023): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31 December 2023 (available at www.oerak.at). The data only include lawyers registered in the list of Austrian lawyers, lawyers registered in the list of established European lawyers according to the Lawyers' Directives registered by 31 December 2023. It does not include legal advisors as such a professions/type of service provider does not exist in Austria.

Q146 (2021): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31 December 2021 (available at www.rechtsanwaelte.at). The data only include lawyers registered in the list of Austrian lawyers, lawyers registered in the list of established European lawyers according to the Lawyers' Directives registered by 31 December 2021. It does not include legal advisors as such a professions/type of service provider does not exist in Austria.

Q146 (2017): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2017 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.238), lawyers registered in the list of established European lawyers (87) registered by 31st of December 2017. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.
Q146 (2016): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2016 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.132), lawyers registered in the list of established European lawyers (84) registered by 31st of December 2016. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.
Q146 (2015): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2015 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.057), lawyers registered in the list of established European lawyers (81) registered by 31st of December 2015. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q146 (2014): The 2014 data includes lawyers registered in the list of Austrian lawyers (5940), lawyers registered in the list of established European lawyers (80) and trainee lawyers (2072) registered by 31 December 2014. It does not encompass solicitors or legal advisors as such professions do not exist in Austria.
Q147 (2017): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2017 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.238), lawyers registered in the list of established European lawyers (87) registered by 31st of December 2017. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.
Q147 (2016): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2016 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.132), lawyers registered in the list of established European lawyers (84) registered by 31st of December 2016. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q147 (2015): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2015 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.057), lawyers registered in the list of established European lawyers (81) registered by 31st of December 2015. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Belgium

Q004 (General Comment): Source: National Bank of Belgium, https://www.nbb.be

Q004 (2021): The average gross annual salary is 44022,8 euros, source National Bank of Belgium.

Q004 (2020):
Answer provided based on the latest data published by the National Accounts (April 2021).

Q004 (2019): Average gross annual salary for employees (both full-time and part-time).

Q004 (2016): Average gross salary for a full-time employee (without exceptional bonuses and vacation pay)

Q046 (General Comment): Since 2021, the table also includes data for the Council of State and the Aliens Litigation Council. Starting from 2024, judges of the Council of State (counselors) are counted in the category “Supreme Court professional judges.” Those of the Aliens Litigation Council are categorized as first instance judges.

Q046 (2022): Since 2021, the table also includes data for the Council of State and the Alien Litigation Council, counted as first-instance judges. Following a recent expansion of the framework, the number of judges at the Council of State has increased from 44 to 58 (Law of September 6, 2022). However, in 2022 there were only 30 men and 12 women serving as judges at the Council of State (totaling to 42), with some positions still vacant by late 2022. Therefore, only a total of 42 was accounted for in the table. The current established framework is set at 58 Council of State judges. In the Alien Litigation Council, there are 54 judges (including 33 women and 21 men).

Q046 (2021): Source: FPS Justice, Directorate-General for the Judiciary, HR Department Judiciary, Notaries and Enforcement agents.
Point 3 concerns judges of the Court of Cassation.
As for the previous cycles, the table contains data for the civil and criminal courts. For this cycle, the (administrative) judges of the Council of State and of the Aliens Litigation Council (41 and 55 judges respectively) have been added to the table. With regard to the administrative judges of the Council of State (as for the Aliens Litigation Council), it is decided to count them as first instance judges. It should be noted, however, that judges of the Council of State intervene both at first and last instance. The number of judges at the Council of State is 44 members and for the Aliens Litigation Council it is 55. For the Aliens Litigation Council, the total of 55 is broken down as follows: 32 female judges - 23 male judges, of whom the first president and the president are men. For the Council of State, the situation is as follows: in principle, the Council is composed of 44 members (1 first president, 1 president, 14 chamber presidents and 28 councillors of State); in practice, 41 members are currently in office (two recent retirements and one death); 20 Dutch-speaking and 21 French-speaking; 12 women and 29 men. It is worth mentioning that an extension of the framework of the Council of State is provided for by a law of 6 September 2022 (which amended article 69 of the laws on the Council of State, coordinated on 12 January 1973). The Council will now consist of 58 members. These new members have not yet been recruited.

Q046 (2020): "No particular reason for the increase in the number of female second instance judges; related to natural evolution (more women in the first degree means, after a while, a larger base for recruitment to the appellate degree).
As in previous cycles, the table contains data for the judicial courts. The number of judges in the Council of State is 44 members and for the Council of Foreigners' Disputes it is 54 judges. "

Q046 (2019): Number of judges in courts within the ambit of the Federal Public Service of Justice (ordre judiciaire)

Q046 (2018): As a result of the reform of the cantons of justice of the peace, the number of places for justices of the peace has decreased by 25.

Q046 (2014): For 2014, the number of professional judges includes presidents of courts.

Q046 (2013): The 2013 data on the number of professional judges reflects the situation as at 18 January 2014.

Q046-2 (General Comment): It should be noted that the Council of State (composed of 38 councilors in 2024) also rules in the last instance. It was decided under Q 46 and Q 46-2 to consider the Council of State (Conseil d'Etat) as a court of last instance (starting from 2024), and to count only judges of the Aliens Litigation Council (62 judges) as first instance administrative judges. The first column of the table (‘total’) includes civil and criminal judges as well as 99 administrative judges.

Q046-2 (2022): It is to be noted that the Council of State (comprising 42 judges in 2022, and whose framework was extended to 58 by a law in September 2022) also adjudicates as a court of last instance. It has been decided under Q46 and Q46-2 to consider the Council of State as a court of first instance. The Alien Litigation Council counts 54 judges considered as administrative judges of first instance.
Q046-2 (2020): The system does not allow part-time work for judges. Data by type of case are not known. Judges are appointed at the court level, and the head of the court assigns them to the different chambers of the court and allocates cases.

Q052 (2022): The variation in comparison to the 2020 data for points 2 and 3 stems from the fact that legal assistants supporting judges were previously categorized under point 3 (with administrative staff) rather than point 2.

Q052 (2019): "Technical personnel": the slight increase observed between 2018 and 2019 results from investments in personnel.
Q052 (2013): The number of women per category is as follows: Total: 3839,45; category 2: 1212,62; category 3: 2031,93; category 4: 594,90.
Q052-1 (2023): The lack of concordance between the total of Q 52 and the one of Q 52-1 is due to the fact that technical staff are not included in the table under question 52-1. These employees work at all three instances and their number (579) cannot be divided by instance.
Q052-1 (2022): The discrepancy between the totals of Q52 and Q52-1 is due to the technical staff not being included in the table uner question 52-1. These employees operate at all three instances, and their number (593) cannot be divided among these instances.
Q052-1 (2021): Source: Directorate P&O - HR Department Judicial staff - Directorate General Judicial Organisation, Federal Public Service Justice (FPS Justice)
Q052-1 (2020): Source: HR Service Judicial Personnel-Directorate General Judicial Organization, FPS Justice
Q055 (General Comment): Explanation of the table: 1. all prosecutors working in the labour auditor's offices, public prosecutors' offices of first instance, public prosecutor's office for road safety and the federal public prosecutor's office.
2.All prosecutors working in the public prosecutor's offices of the appeal courts and the public prosecutor's offices of the labour courts.
3.All prosecutors working in the public prosecutor's office at the Court of Cassation.

Q055 (2021): Source: FPS Justice - Directorate General for the Judiciary, HR Department of the Judiciary, Notaries and Enforcement agents
Q055 (2020): Support Service of the College of Public Prosecutors
Q055 (2014): In 2014, the number of professional prosecutors includes the heads of division of the 15 public prosecutors' offices and the heads of the 8 prosecution offices within labour courts.
Q056 (General Comment): The Prosecutor General Office and the Auditor General Office constitute the public prosecution services at the Court of Appeal and the Labor Court, respectively. The Attorney General heads both of them.

Q056 (2014): In 2014, the number of first instance prosecutors' offices and prosecution offices within labour courts was reduced, resulting in a decrease in the number of heads of prosecution services. The decrease between 2012 and 2014 in the number of court presidents and heads of prosecution offices in first instance (male and female) is due to the reform of the judicial map concerning first instance courts.
Q057 (General Comment): It should be noted that the competent prosecutor general may entrust permanently appointed lawyers at the prosecution services with prosecution before police courts in certain cases. This requires an individual order stating the reasons and the approval of the competent general prosecutor (see Article 162 § 2 of the Judicial Code). In addition to these lawyers, criminologists, trainee prosecutors, and candidate prosecutors have functions similar to those of public prosecutors.
Q057 (2023): It should be noted, however, that there are persons who have functions comparable to those of public prosecutors. This possibility is regulated by the Judicial Code. These persons may only carry out their duties on commission from the prosecutor general. They are (406) lawyers acting within public prosecution offices, trainee prosecutors and candidate prosecutors.
Q057 (2016): By a reasoned individual order and after a positive opinion has been given by the competent public prosecutor, permanently appointed public prosecutors may bring a public action before the police court, except in the case of involuntary death as a result of a traffic accident, in so far as they can prove at least two years' seniority as a lawyer in the judiciary.

Q060 (General Comment): These figures cover all grades of judicial staff, except for lawyers appointed at the public prosecution offices, prosecutors under training and candidate prosecutors.
These are: secretaries, non-prosecutor staff responsible for assisting prosecutors in the same way as secretaries, staff responsible for administrative tasks, technical staff. “Other staff” encompasses criminologists.
Q060 (2020): V: 1694
M: 730

Q132 (General Comment): The gross amount of 86,916 corresponds to the salary of a judge in a court of first instance at the start of their career (= between 3 and 6 years of seniority) and that of a deputy public prosecutor at the start of their career (= between 3 and 6 years of seniority).
The amount of 158,926 corresponds to the salary of a counselor at the Court of Cassation with the maximum length of service (given that appointment to the Court of Cassation is the final stage of a judicial career for each of them, they all receive the maximum). The salaries of administrative judges are not included in the table. Counselors to the Council of State are not part of the judicial system. Their salaries are also set by law.
Salary evolves according to financial seniority with an increase every three years. The calculation of net salary depends on individual parameters (based on the situation of the person concerned, married, number of dependent children etc.) and therefore cannot be described in general terms. The following are deducted from the gross salary: health insurance contributions, survivor's pension contributions, special social security contribution, withholding tax.

Q132 (2019): Judge at the court of first instance or deputy king's prosecutor, with three years of seniority (beginning of career) married and two dependent children.
Advisor to the Supreme Court with 24 years of seniority, married and no dependent children.
Advocate General at the Supreme Court, with 24 years of service and no dependent children.

Q132 (2016): Judge at the Court of First Instance or Deputy Crown Prosecutor, with three years seniority (beginning of career) married and two dependent children
Councillor at the Court of Cassation with 24 years seniority, married, no dependent children
Advocate General at the Court of Cassation, with 24 years seniority, no dependent children

Q133 (General Comment): Judges and prosecutors are subject to a specific pension scheme (with a retirement age limit of 67 years + preferential fraction). They may receive an “on-call allowance” (for work performed at night or on weekends).

Q133 (2023): Judges and public prosecutors have a specific pension scheme (age limit at 67 + preferential rate).

Q133 (2022): Judges and prosecutors are subject to a specific pension scheme (with a retirement age limit of 67 years + preferential fraction).

Q133 (2021): Judges and prosecutors have a specific pension scheme (age limit at 67 + preferential rate).

Q133 (2020): Magistrates have a specific pension scheme (age limit at 67 + preferential rate).

Q146 (General Comment): The latest barometers organised by the Flemish Bars Association (Orde van Vlaamse Balies) and the French- and German-speaking Bars Association (Ordre des barreaux francophones et germanophone) show that the lawyer profession is becoming increasingly feminised in Belgium. - Orde van Vlaamse Balies: according to the latest ‘Barometer of the profession’ (2020), carried out by the Flemish Bars Association in collaboration with Ghent University (UGent) and Leuven University (KUL), in December 2019, 64.8% of trainee lawyers were women. On the other hand, 57.6% of the lawyers registered on the roll, who therefore completed the traineeship, were men.
- French- and German-speaking Bars Association: according to the latest ‘Barometer of the profession’ (2022) carried out by AVOCATS.BE in collaboration with ULiège (University of Liège), the percentage of women has been rising steadily since 2007 and has exceeded 50% since 2018. This increase and the shape of the age pyramid point to a strong feminisation of the profession in the years to come.

Q146 (2023): Unfortunately, data by gender on 1 December 2023 are not available.

Q146 (2022): The total is composed as follows: 11 072 for the Order of Flemish Bars - Orde van Vlaamse Balies and 8 238 for the Order of French-speaking and German-speaking Bars (as of December 1st, 2022). It emerges from the latest barometers organized respectively by the Order of Flemish Bars - Orde van Vlaamse Balies and by the Order of French-speaking and German-speaking Bars that more women are working as lawyers in Belgium.

Q146 (2021): The figures are for the Orde Van Vlaamse Balies, 10 973, and for the Order of the French-speaking and German-speaking Bars, 8 188 as of 1 December 2021: a total of 19 161 lawyers.
Unfortunately, none of the Bars was able to provide figures by gender. The Bars report a stable annual increase. According to the latest "barometers of the profession" carried out by the Bar Associations (in 2018 and 2020), it seems that the legal profession is becoming more and more feminised, and the age pyramid suggests that this feminisation will increase in the years to come.

Q146 (2020): For the Order of the French- and German-speaking Bars: 8,160 and for the Orde van Vlaamse Balies (Order of the Flemish Bars) 10715--> total 18,875. According to a recent study (2020), in December 2019, 64.8% of trainee lawyers were women. On the other hand, 57.6% of the lawyers on the roll (who have completed the traineeship) were men. However, if these percentages are compared with those in previous similar studies, it must be concluded that the legal profession in Belgium is becoming more female.

Q146 (2019): The data correspond to the number of lawyers registered with the Belgian bars on September 1, 2019, therefore at the start of the judicial year 2019-2020. This number fluctuates during the judicial year.
Number of lawyers registered with Flemish bars: 10,862.
Number of lawyers registered with French and German speaking bars: 8,043.

Q146 (2018): 8002 for the French and German-speaking Bar Association
10656 for the Flemish Bar Association (OVB)
Q146 (2017): 7 939 lawyers for the French and German-speaking Bar Association on 1 December 2017
10 665 lawyers at the Flemish Bar (OVB)

Q146 (2016): 7,930 lawyers for the French- and German-speaking Bar Association on 1 December 2016
10,602 lawyers at the Flemish Bar (OVB)
Q146 (2015): As at 1 December 2015, there were 7,882 French-speaking and German-speaking lawyers (avocats.be) and 10,520 Dutch-speaking lawyers (Orde van Vlaamse balies).

Bulgaria

Q004 (2023): The final 2023 data is published on 29.11.2024. It is 24 485 Leva or 12 518 Euro

Q004 (2021): Preliminary data.
The minimum wage in the country has been risen with 6.6%. In section “Human health and social work activities” the average annual wage increased with 25.7% due to additional wage payments related with the health crisis. In section “Education” there was an increase of the teachers' wages and salaries and the increase in the section was 17.0%. High growth rate of wages and salaries in 2021 compared to 2020 (17.7%) was recorded in “Accommodation and food service activities” as the section started to recover after 2020 lockdowns.

Q004 (2018): NSI data

Q004 (2016): No explanation.

Q046 (General Comment): The number of first instance professional judges encompasses the judges of the first instance courts as follows - 113 district, 28 administrative, 3 military-district;
As well as the courts of second instance to be considered the 28 regional/provincial, 5 appellate and the Military Court of Appeal
Supreme Courts are the Supreme Court of Cassation and the Supreme Administrative Court
It is worth recalling that Regional courts have mixed competences as first and second instance for certain categories of cases, and for the purposes of the questionnaire, in view of the instructions for completing it and given their predominant competences, they are categorized as courts of second instance.

Q046 (2023): Regional courts have mixed competences as first and second instance for certain categories of cases, as for the purposes of the questionnaire, in view of the instructions for its completion and given their predominant competences, they are categorized as courts of second instance.

Q046 (2022): Regional courts have mixed competences as first and second instance for certain categories of cases, as for the purposes of the questionnaire, in view of the instructions for its completion and given their predominant competences, they are categorized as courts of second instance.
Q046 (2021): First instance courts – district, administrative, military district and Specialized Criminal Court.
Second instance courts (courts of appeal) – regional, appellate, Appellate Specialized Criminal Court and Military Appellate Court.
Supreme Courts – Supreme Court of Cassation and Supreme Administrative Court

Q046 (2020): Number of professional judges from district courts - 959, incl. men - 354 and women - 605. Annex: Summary information on the data as of 31.12.2020, received by all regional courts and all administrative courts, regarding the number of judges working in the first instance panels and the number of judges, who administer justice in the appellate / cassation panels, as well as data on how many of them are men and how many of them are women. It should be borne in mind that, according to the information received, in almost all courts, a large number of judges sit both at first instance and as second instance judges. Therefore, the sum of the number of first instance judges and the number of second instance judges should not give the total number of magistrates in the respective region/ administrative court. Number of professional judges from the Court of Appeal - 124, incl. men - 43 and women - 81.

Q046 (2019): 046/2. The indicated number of 134 judges refers only to the magistrates appointed and working in the 7 courts of appeal in Bulgaria. The calculation is made on the basis of the question itself, which draws attention only to the number of appellate judges (judges working in a court of appeal), as is evident from it - "professional judges of second instance / appellate court /". In almost all regional courts, most judges sit in both the first and second instance departments of the courts and this makes it difficult to differentiate them. This year all judges in regional courts are listed in 046/1 - Number of first instance professional judges.

Q046 (2017): P. 1 – The number of first instance professional judges consists of judges in 27 Regional courts within regional centres; 86 out of regional centres; 28 Administrative courts; 1 Specialized Criminal Court; 3 Military courts; and the number of the first instance judges in District courts has been added to them;
P.2 – The number of the second instance judges consists of judges in 27 District courts; Sofia City Court; 5 Courts of Appeal; 1 Military court of appeal and 1 Appealate Specialized Criminal Court. This number does not include the second instance judges who have adjudicated in first instance pannels.
P.3- The number of working judges in the Supreme Court of Cassation and Supreme Administrative Court at 31.12.2017

Q046 (2016): P. 1 – The number of first instance professional judges consists of judges in 27 Regional courts within regional centres; 86 out of regional centres; 28 Administrative courts; 1 Specialized Criminal Court; 3 Military courts; and the number of first instance judges in District courts has been added to them;
P.2 – The number of second instance judges consists of judges in 27 District courts; Sofia City Court; 5 Courts of Appeal; 1 Military court of appeal and 1 Appealate Specialized Criminal Court. This number does not include the second instance judges who have served in first instance courts. P.3- The number of working judges in the Supreme Court of Cassation and Supreme Administrative Court at 31.12.2016

Q046 (2015): 1. The figure 1760 includes the number of judges, employed at the 1st instance courts ((113 regional courts (27 Regional courts in the district centers and 86 regional courts outside the district centers); 28 Administrative courts; 1 Specialized criminal court; 3 Military courts) including the number of the first instance judges` (524) working in the first instance court formations in the District courts as from 31.12.2015. The number of Military courts has been reduced after decision under protocol ? 44/13.12.2013 of the Supreme Judicial Council from 5 to 3.

2. The number of judges, employed at the 2nd instance courts as from 31.12.2015 and the Courts of Appeal is 277. This figure is a result from the addition of the judges in the 28 District courts; 6 Courts of appeal and 1 Specialized criminal court of appeal – 801 judges in total, where the number of the first instance judges in the District courts (524) have been deducted.

3. The number of judges, employed in the Supreme Court of Cassation and the Supreme Administrative courts as from 31.12.2015 is 188.

Q046 (2014): In 2014, the number 1753 shows the number of judges employed in the first instance courts (113 regional, 28 administrative and 3 military courts) and 550 first instance judges, working in the district courts. The number of military courts was reduced from 5 to 3. The number of second instance judges is 277 and does not encompass first instance judges, working in the first instance chambers of the district courts.

Q046-2 (General Comment): Category "other": military judges

Q046-2 (2023): The total number of 1,282 judges of first instance includes 965 district judges for whom no information regarding specialization is available, and military judges are listed in the "Other" column.
The total number of 780 judges of the second instance includes 46 junior judges for whom no information regarding specialization is available, and the judges of the Military Court of Appeal are listed in the "Other" column.
Regarding the Supreme Court of Cassation, the total number of 172 judges also includes the president of the court, for whom no information is available regarding specialization.

Q046-2 (2022): The total number of 1230 first-instance judges includes 922 district judges for whom no information regarding specialization is available, and military judges are listed in the "Other" column.
The total number of 778 judges of the second instance includes 37 junior judges for whom no information regarding specialization is available, and the judges of the Military Court of Appeal are listed in the "Other" column.
Regarding the Supreme Court of Cassation, the total number of 180 judges also includes the president of the court, for whom no information is available regarding specialization.

Q046-2 (2021): The total number of first-instance judges is 1258. It includes 991 district (first instance) judges, for whom there is no available information regarding the specialization, 236 administrative, 10 other (military) and 21 - judges at first instance Specialized Criminal Court.
The total number of second-instance judges includes also 59 junior judges, adjudicating at regional courts (second instance), for whom information on specialization is not available. 5 other are military judges.
The total number of supreme judges includes the president of the Supreme Court of Cassation, for whom there is no available information regarding the specialization.

Q046-2 (2020): The column "others" in question 46-2 refers to the military judges - 12 regional/provincial and 5 appellate - a total of 17.
The total number of judges in the district courts is 959, and the same, with the exception of the Sofia District Court, are not divided by subject matter. Therefore, data related to the number of first instance judges dealing with civil / commercial and criminal cases are not available. Appendix: Summary information on the data as of 31.12.2020, received by all regional/provincial courts (first and second instance) regarding the number of judges in them, who work in the civil, commercial and criminal divisions. It should be borne in mind that, according to the information received, in almost all courts, a large number of judges sit in more than one division, therefore the summation of the number of judges from the three divisions should not give the total number of judges in the respective court. Total number of judges in the Court of Appeal (second instance) - 124, of which in the civil division - 36, in the commercial division - 38 and in the criminal division - 50.

Q052 (General Comment): Since 2012, the category “other” encompasses the number of non-judge staff employees working in the recreational field, while in 2010 it subsumes the number of court assistants. The Judicial Administration Commission does not keep statistics of those who are trained, as well as of trainee judges. There are junior judges in the courts in the country, for whom Judicial Administration Commission has no relation, no data. Accordingly, the total number of judicial employees in the courts does not include trainee judges. The Judges’ College of the Supreme Judicial Council does not maintain data on the gender distribution of the court clerks (non-judge staff) in the courts, since each court of the respective level (a total of 180 courts) is an independent legal entity and their employer is the president of the respective court.

Q052 (2019): Since 2012, the category “other” encompasses the number of non-judge staff employees working in the recreational field, while in 2010 it subsumes the number of court assistants.
Q052 (2017): These are the staff employed in the recreational establishments of the Supreme Administrative Court and the Supreme Court of Cassation such as: manager of the training center, chefs, worker in the kitchen, bartender, waiter, tendant.

Q052 (2015): Unlike the previous evaluation cycles, now we indicate the figure 502 – technical staff (it includes drives, cleaning staff, guards, etc.), which reduce the number of the employees engaged with administrative tasks and court management under number 3.
Other non-judge staff includes 55 court servants working in recreation department.
Q052 (2013): The number of non-judge staff assisting judges includes the number of all court staff from the so called specialized administration supporting judges, including court secretaries and court assistance, while for 2010 it subsumes only court secretaries. The category “staff in charge of different administrative tasks” subsumes the number of non – judge staff of general administration.
Q052-1 (General Comment): Item 1 "Total number of court employees working in the courts of first instance" includes all employees of the district and administrative courts. Item 2 "Total number of court employees working in the courts of second instance (appellate court)" includes all employees working in the regional courts and courts of appeal in the country.

Q052-1 (2021): 2. "Total non-judge staff working in courts at second instance": the increased number is due to newly opened vacancies for non-judge staff in view of strengthening the courts' activities.
Q052-1 (2020): It is noteworthy recalling the difficulty of determining the place of the regional/provincial courts in the "first instance" and "second instance (appellate)" columns. For the purposes of the CEPEJ survey, they are classified as "second instance (appellate)". Accordingly, item 1 "Total number of court employees working in the courts of first instance" includes all employees of the district and administrative courts, while item 2 "Total number of court employees working in the courts of second instance (appellate court)" includes all employees working in the regional courts and courts of appeal.

Q055 (General Comment): The provided data refers to the actual number of employed persons for the year of reference.

Q055 (2016): 1511 is the total number of working prosecutors at 31.12.2016; 888 prosecutors at first instance level includes – the prosecutors from 113 Regional Prosecutor`s Offices and 1 Specialized Prosecotr`s Office; 500 prosecutors work in 28 District Prosecutor`s Offices, 7 Appelate Prosecutor`s Offices and 3 Military District Prosecutor`s Offices; 123 are the prosecutors working in Supreme Prosecutor`s Office of Cassation and Supreme Administrative Prosecutor`s Office and 1 Prosecutor General. (The indicated numbers do not include the number of the investigative magistrates in the investigative departments at District Prosecutor`s Offices and National Investigation Service and their administrative heads.

Q055 (2014): For 2014, the number of prosecutors acting at 1st instance includes prosecutors of the regional prosecutor’s offices, specialized prosecutor’s offices and the military prosecutor’s offices. The number of prosecutors acting at 2nd instance includes prosecutors from district and appellate prosecutor’s offices. The number of prosecutors at Supreme Court level includes prosecutors from the Supreme Prosecutor's Office of Cassation, Supreme Administrative Public Prosecutor's Office, and the Prosecutor GeneralIn contrast with the 2012 evaluation, the number of investigators in the District Investigation Departments at the District Prosecutor’s Offices and the National Investigation Service is not taken into consideration for 2014.

Q056 (2023): The process of merging the district prosecutor's offices ended on July 27, 2022. Starting from this date the number of first instance public prosecution offices is 34.

Q056 (2020): In the provided in the previous cycle 2018-2020 the information on the total number of administrative heads, instead of the indicated figure 133 (one hundred and thirty-three), the figure should be 153 (one hundred and fifty-three). The difference is probably due to a technical error or to the provision of the actual number of incumbents, without reflecting the persons appointed to perform the functions of administrative heads. Due to the impossibility to establish the real cause, information on the data in the individual columns cannot be given.
The data provided (cycle 2020-2022) comply with the instructions on question № 056 in the explanatory note to the scheme for evaluation of judicial systems, ie. there are also the persons who have been appointed to perform the functions of administrative heads due to the lack of a holder of the position. The optimization performed under Art. 30, para. 2, item 7 of the JSA of the district prosecutor's offices, whereby with decisions of the Plenum of the SJC under protocol № 21 / 19.07.2018 and 20 / 29.07.2019 a total of 39 (thirty-nine) district prosecutor's offices were closed and transformed in territorial divisions as follows:
- 11 district prosecutor's offices, as of 01.01.2019;
- 28 district prosecutor's offices, as of 01.01.2020
Following this transformation, the total number of prosecutors at first instance, respectively their administrative heads, is now 74.
Thus, from the real number of administrative heads cycle (2018 – 2020) - 153, 39 (thirty-nine) administrative heads were removed from the closed district prosecutor's offices, in view of which the total number of heads of prosecutor's offices decreased to 114 (one hundred and fourteen), of which: the number of heads of prosecutor's offices at first instance is 74 (seventy-four), the number of heads of prosecutor's offices at second instance is 39 (thirty-nine), and at the supreme level - 1 (one).

Q056 (2016): 113 adminsitrative heads of Regional Prosecutor`s Offices and 1 Specialized Prosecutor`s Office; 38 are the administrative heads of 28 District Prosecutor`s Offices, 3 Military District Prosecutor`s Offices, 7 Appealte Prosecutor`s Offices; 1 Prosecutor General
Q056 (2014): For 2014, the figure 113 includes heads of regional prosecutors' offices. The figure 41 includes 29 district, 7 appellate and 3 military district prosecutors' offices, the Supreme Prosecutors Office of Cassation and the Supreme Prosecutors Office of Appellate.
Q060 (General Comment): The Prosecutors' College of the Supreme Judicial Council does not maintain data on the gender distribution of the prosecutor's office clerks (non-prosecutor staff) in the prosecutor's offices, since each prosecutor's office of the respective level is an independent legal entity and their employer is the administrative head of the respective prosecutor's office.
Q060 (2022): number of full-time positions for judicial officers in the general and specialized administration in all prosecutor's offices of the Republic of Bulgaria – 2901 /as of December 31, 2022/
- number of full-time employees in specific positions for judicial officers in the educational centers of the Prosecutor's Office of the Republic of Bulgaria – 55 /as of December 31, 2022/

Q060 (2021): The decrease in the number of staff (non-public prosecutors) in the prosecutor's offices is due to the closing of the majority of the first-instance prosecutor's offices and their merger with those in the regional centers. Thus, the managing and duplicating positions in the closed prosecutor's offices were cut.
Q060 (2014): For 2014, the number of actually working servants in the Prosecutors office at 31 December 2014 (2918,5) includes also 66 servants working in the field of recreational craft. The main source of this data is the establishment plan of the Prosecutors office of the Republic of Bulgaria for the number of prosecutors and investigators and a reference for the number of employees in the Prosecutors office of the Republic of Bulgaria at December 2014.

Q132 (General Comment): The gross salary of a Supreme court judge is formed as the sum of the Basic Monthly Salary for the Position of "supreme judge or prosecutor" (BMSP) + Rank + Additional remuneration for time served. The Rank and BMSP are determined according to the Classifier of Positions in the Administration of Courts and Prosecutors' offices, which are approved by decisions of the Judges' and the Prosecutors' College of the Supreme Judicial Council, respectively. The additional remuneration for time served is determined as 2% of (BMSP+Rank) is added for each year of service in the judicial system.
Q132 (2023): According to Art. 218, paragraph 3 of the Judiciary System Act (JSA), the remuneration of judges, prosecutors and investigators is determined by a decision of the General Assembly of the Supreme Judicial Council (SJC) and the Supreme Prosecutorial Council (SPC) that adopts "Table No. 1 - for determination of the maximum basic monthly salaries of judges, prosecutors and investigators", which is applicable for all magistrates equally. In this regard, data for judges and prosecutors match completely. The gross monthly remuneration of judges, prosecutors and investigators is formed by adding to the basic monthly remuneration the remuneration for rank (from Table No. 1) and time served (according to Article 219 of the JSA).

Q132 (2022): Data, provided by the Supreme Judicial Council. The increase of gross salaries (respectively net salaries) compared to the previous assessment cycle (2020-2022) is due to the increase in labour remuneration - 10% in 2021 and 10% in 2022, as well as the funds provided in the budget of the judiciary for additional remuneration in connection with Art. 233, paragraph 6 of the Judiciary System Act.
Comment from the Supreme Court of Cassation: The amount of maximum basic monthly remuneration of judges shall be determined by the Plenum of the Supreme Judicial Council. Judges shall receive additional remuneration for long service and professional experience, determined in relation to the basic remuneration at the rate of up to 40% (2% – for 1 calendar year for acquired service and professional experience in a judicial authority; 1.5% – for 1 calendar year for acquired service and professional experience outside a judicial authority, but in the same time, similar or the same nature of work, position or profession; 1% – for 1 calendar year for acquired service and professional experience outside a judicial authority and in another specialty). The maximum amount of 40% is set by the Judicial System Act, in force since 11.08.2007. Judges who reached a higher percentage before the amendment of the law shall retain the percentage reached in accordance with the decision of the Supreme Judicial Council under Protocol No.29/21.09.2007. In the Supreme Court of Cassation, 14 judges receive additional remuneration in excess of 40%. Judges don't get a 13th salary or bonuses paid regularly to everyone, regardless of their personal circumstances. By a decision of the Plenum of the Supreme Judicial Council, an additional remuneration may be paid to judges, but its receipt is not mandatory and unconditional. The entitlement to receive an additional remuneration is defined in the Rules for Determination and Payment of Additional Remuneration (adopted by a decision of the Plenum of the Suprem

e Judicial Council under Protocol No. 29/22.11.2018, amended and supplemented by a decision under Protocol No. 13/13.06.2019, amended and supplemented by a decision under Protocol No. 28/21.11.2019, amended and supplemented by a decision under Protocol No. 18/12.05.2022 and the Rules for Determination and Payment of Additional Remuneration to Judges pursuant to Article 233, paragraph 6, the first sentence of the Judiciary System Act (adopted by the Judicial Collegium of the Supreme Judicial Council by Decision under Protocol No. 24/22.06.2021, amended by Decision under Protocol No. 41/17.11.2021). In 2022 additional remuneration in the amount of 11,220 BGN or 5,736.69 EUR was paid to the judges of the Supreme Court of Cassation in accordance with the decision of the Plenum of the Supreme Judicial Council on the application of the Rules for Determination and Payment of Additional Remuneration. (Gross annual salary, in €= basic salary+ additional remuneration for seniority)

Q132 (2021): In the data for Q 132, the line "Prosecutor at the beginning of his/her career" is correct, but refers to the salaries of a district (first instance) prosecutor at the beginning of his/her career. The data for judges and prosecutors is calculated from the salary report collected and summarized by the Judiciary as of December 2021. The gross salary of the lowest judicial/prosecutor level, i.e. district judge and district prosecutor, is calculated. The system also has the position of "junior judge", but at the beginning of their career, they work in second-instance courts (regional courts), and based on the Questionnaire, information is requested about the lowest position in the first instance. The salary of a district judge and a district prosecutor according to "Table No. 1 of the SJC for Determining the Maximum Basic Monthly Salaries of Judges, Prosecutors and Investigators" is the same.
The data for question 132, line "Prosecutor of the Supreme Court or the Highest Appellate Instance" for the supreme judges and supreme prosecutors is calculated from the salary report provided by the supreme judicial bodies as of December 2021. The gross salary of a magistrate in the supreme judicial body was calculated. According to "Table No. 1 of the SJC for Determining the Maximum Basic Monthly Salaries of Judges, Prosecutors, and Investigators", the determined remuneration of a supreme judge and a supreme prosecutor is the same.

Q132 (2020): In 2019, with a decision of the Plenum of the SJC under item 6 of Protocol № 2 / 24.01.2019, an updated Table № 1 of the SJC was approved to determine the maximum basic monthly salaries of judges, prosecutors and investigators pursuant to Art. 218, para 2 and para 3 of the JSA with an increase of 10%, as of 01.01.2019. With the same decision the ranks for magistrates were increased by BGN 100 per rank, as of 01.03.2019.
In 2020, with a decision of the Plenum of the SJC under item 2 of Protocol № 2 / 30.01.2020, an updated Table 1 of the SJC was approved for determining the maximum basic monthly salaries of judges, prosecutors and investigators on the grounds of Article 218. , para 2 and para 3 of JSA with an increase of 10%, as of 01.01.2020. With the same decision the ranks for magistrates were increased by BGN 50 per rank, as of 01.03.2020.

Q132 (2018): The sums shown do not include the amount of the social security contributions, in order to be made comparable to the data given in the previous assessment cycle when they were not included either in the amount of the gross salary for the relevant position. The source of the data was information summarized and analyzed in the “Financial planning and analysis” Department of Supreme Judicial Council of Bulgaria

Q132 (2016): Under the provisions of Art. 218 (2) of the Judiciary System Act, the basic monthly remuneration for the lowest judicial, prosecutorial or investigating magisterial position shall be set at the double amount of the average monthly salary of employees in the public-financed sphere according to data of the National Institute of Statistics.
The increase in the salaries of the magistrates that occupy the lowest position is in line with the increase of the average monthly salary of the employees in the public-financed sphere, according to data of the National Statistical Institute and the financial resources of the budget of the judiciary.
Under the provisions of Art. 218, (3) of the Judiciary System Act, the remuneration of the other positions, including judges and prosecutors in the Supreme Court / Supreme Prosecution Office in the bodies of the judiciary, shall be determined by a decision of the SJC Plenum and taking into account the financial possibilities on the budget of the judiciary.

Q132 (2014): For 2014, the indicated amounts do not include the insurance contributions for the purpose of data comparability in respect of the previous evaluation scheme, when these amounts have not also been taken into consideration.

Q133 (General Comment): On the basis of article 223 of the Judiciary System Act, while in office, judges and prosecutors may use housing belonging to the internal housing fund of the judicial system bodies.
Q133 (2023): On the basis of Art. 223 of the Judiciary System Act - judges and prosecutors can use housing from the departmental housing fund of the bodies of the judiciary.

Q133 (2022): On the basis of Art. 223 of the Judiciary System Act - judges and prosecutors can use housing from the departmental housing fund of the bodies of the judiciary.
Q133 (2021): Pursuant to Article 223 of the Judiciary System Act, judges and prosecutors may use dwellings from the institutional housing stock of the judiciary.

Q133 (2020): Pursuant to Article 223 of the Judiciary System Act, judges and prosecutors may use dwellings from the institutional housing stock of the judiciary

Q133 (2019): Persuant to art. 223 of the Judiciary System Act, judges and prosecutors may use housing of the departmental housing fund of the judicial authorities.
Q148 (2019): With a comment that legal advisors, other legal educated staff at institutions, businesses, legal entities and sole traders who are hired employees represent only their employer in court ("as a client")
Q148 (2018): With a comment that legal advisors, other legal educated staff at institutions, businesses, legal entities and sole traders who are hired employees represent only their employer in court ("as a client").

Croatia

Q004 (2023): Values for 2022 and prior years may differ from previous deliveries. The GDP for 1995-2023 was revised and published in 2023, including "Gross Domestic Product, Revised Data" (https://podaci.dzs.hr/media/r1dhalwf/msi-bruto-domaci-proizvod.xlsx) and "Annual Gross Domestic Product - Annual Calculation, Revised Data" (https://podaci.dzs.hr/media/c51dcmbr/bruto-domaci-proizvod-godisnji.xlsx).

Q004 (2022): will be explained later

Q004 (2021): Average monthly gross salary for 2021 for person in paid employment in legal entities in the Republic of Croatia is available at web page of the Croatian Bureau of Statistics (https://podaci.dzs.hr/2021/en/10583).
This monthly gross salary (9599 Croatian Kuna) has been multiplied by 12 and then divided by Croatian Kuna / Euro average annual medium exchange rate published by the Croatian National Bank (7,52418 Croatian Kuna for 1 Euro; this information is available at https://www.hnb.hr/temeljne-funkcije/monetarna-politika/tecajna-lista/tecajna-lista.)

Q046 (General Comment): In the total number of judges, only data on actually working judges is presented (the total does not include judges on unpaid leave; judges on maternity leave; judges suspended after disciplinary procedure; judges transferred to other State body- for example to Ministry of Justice or Judicial Academy).

Q046 (2023): The statistics apply to all judges:
-court presidents, judges, and judges with administrative authority.
Those lower the number are:
-Those who are absent without pay
-who are not actively seeking job
-who are taken off the rolls
-who are dispatched to work for the Ministry of Justice, the Judicial Academy, the State Judicial Council, foreign missions, or other state bodies or organizations outside the state service
-who are off for motherhood
-those on leave as fathers
-those who are on leave as parents
-Those who are absent due to adoption
-those who are on leave as parents
-who have a part-time job
-who, as a result of rising childcare costs, work half-time
-who are caring for a child with developmental difficulties while on leave or working a half-time schedule
-whose employment status is dormant until the child's third year of life

Q046 (2022): The data refer to all judges:
court presidents, judges authorized to perform court administration and judges.
The number does not include judges:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q046 (2018): Source: Ministry of Justice of the Republic of Croatia
The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

Q046 (2017): The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

Q046 (2016): Source: Ministry of Justice of the Republic of Croatia
The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

Q046 (2015): The Republic of Croatia submits now correct numbers of professional judges sitting in courts for previous cycles (2013 and 2014), because in the previous cycles this number did not include court presidents, while there were excluded in the separate questions. Therefore, the correct numbers for these cycles is now provided.

Q046 (2014): In 2014, the number of professional judges in first instance courts includes judges of municipal, commercial, administrative and misdemeanour courts. The number of judges in second instance courts includes judges of county courts, the High Commercial Court, the High Misdemeanour Court and the High Administrative Court. The number of 3rd instance judges refers to the Supreme Court. Four first instance administrative courts became operational in 2012, while the Administrative Court of the Republic of Croatia became the High Administrative Court.

Q046-2 (General Comment): The difficulty to provide the data lays in mixed specialization of judges in courts, so exact data cannot be extracted.
Q052 (General Comment): The total number of non-judicial staff is a result of a deduction and subsumes only actually working staff. Thus, the total does not include staff on unpaid leave; staff on maternity leave; staff suspended after disciplinary procedures; staff transferred to other State bodies (for example the Ministry of Justice or Judicial Academy). Besides, two non-judicial officials working half-time (for the reason of care for a child with special needs) are counted as 1 non-judicial official. The reason for fluctuation and differences in the number of Rechtpflegers in Republic of Croatia is that they work for 2 years, then prolonged 5 years and then they get a permanent post or not.

Q052 (2023): The figures include civil servants and personnel who have been employed for an undetermined period of time.
-Those who are absent without pay
-who are not actively seeking job
-who are taken off the rolls
-who are dispatched to work for the Ministry of Justice, the Judicial Academy, the State Judicial Council, foreign missions, or other state bodies or organizations outside the state service
-who are off for motherhood
-those on leave as fathers
-those who are on leave as parents
-Those who are absent due to adoption
-those who are on leave as parents
-who have a part-time job
-who, as a result of rising childcare costs, work half-time
-who are caring for a child with developmental difficulties while on leave or working a half-time schedule
-whose employment status is dormant until the child's third year of life

Q052 (2022): The data refer to civil servants and employees employed for an indefinite period.
The number does not include those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q052 (2015): The Republic of Croatia submits correct numbers of non-judge staff who are working in courts for previous cycles (2012, 2013 and 2014), because in the previous cycles this number included the staff working for public prosecutors. Therefore, the correct numbers for these cycles are now provided.
Q052 (2014): In 2013, the number of “Rechtspfleger” included judicial advisors because they work autonomously on cases, on the one hand, and staff who are not judges, but who can enact decisions (land registry officials and court registry officials), on the other hand. In 2014, the interpretation changed and judicial advisors were moved to the category “non-judicial staff whose task is to assist the judges”, since they work autonomously but their decision must be signed by a judge.

Q052 (2013): The variations between 2012 and 2013 in respect of certain sub-categories are due only to a different methodology of classification. The total is slightly different for the two years.

Q052-1 (2023): The figures include civil servants and personnel who have been employed for an undetermined period of time. (Data from Table 052.)
-Those who are absent without pay
-who are not actively seeking job
-who are taken off the rolls
-who are dispatched to work for the Ministry of Justice, the Judicial Academy, the State Judicial Council, foreign missions, or other state bodies or organizations outside the state service
-who are off for motherhood
-those on leave as fathers
-those who are on leave as parents
-Those who are absent due to adoption
-those who are on leave as parents
-who have a part-time job
-who, as a result of rising childcare costs, work half-time
-who are caring for a child with developmental difficulties while on leave or working a half-time schedule
-whose employment status is dormant until the child's third year of life

Q052-1 (2022): The data refer to officials and employees employed on an indefinite basis (data from table 052.)
The number does not include those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q055 (General Comment): The provided data encompasses all officials in the public prosecutors' offices, including heads of the public prosecutors' offices (the Public Prosecutor of the Republic of Croatia, county and municipal public prosecutors, the head of the Bureau for Combating Corruption and Organised Crime) and all public prosecutors deputies. The number of prosecutors at the first instance level includes all municipal public prosecutors, their deputies, as well as the head of the Bureau for Combating Corruption and Organised Crime and his deputies. The number of prosecutors at the second instance (court of appeal) level includes all county public prosecutors and their deputies. The number of prosecutors at the Supreme Court level includes the Public Prosecutor and his deputies.

Q055 (2023): The data refers to all state attorneys.
The State Attorney General, municipal/county state attorneys, deputy municipal/county state attorneys facilitated to authorization of municipal/county state attorney duties, deputy state attorneys, and municipal/county state attorneys.
-Those who are absent without pay
-who are not actively seeking job
-who are taken off the rolls
-who are dispatched to work for the Ministry of Justice, the Judicial Academy, the State Judicial Council, foreign missions, or other state bodies or organizations outside the state service
-who are off for motherhood
-those on leave as fathers
-those who are on leave as parents
-Those who are absent due to adoption
-those who are on leave as parents
-who have a part-time job
-who, as a result of rising childcare costs, work half-time
-who are caring for a child with developmental difficulties while on leave or working a half-time schedule
-whose employment status is dormant until the child's third year of life

Q055 (2022): The data refer to all state attorneys:
State Attorney General, municipal/county state attorneys, deputy municipal/county state attorneys authorized to perform duties of municipal/county state attorneys, deputy state attorneys and deputies of municipal/county state attorneys.
The number is reduced by those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q055 (2018): The above information includes all officials in the public prosecutor's offices – all public prosecutors (heads of prosecution offices) and public prosecutors' deputies (deputies of the Public Prosecutor, deputies of the Head of the Bureau for Combating Corruption and Organised Crime and deputies of the county and municipal public prosecutors).
The number of prosecutors at the first instance level includes all municipal public prosecutors (heads of municipal prosecution offices and Head of the Bureau for Combating Corruption and Organised Crime), their deputies, as well as the deputies of the Head of the Bureau for Combating Corruption and Organised Crime. The number of prosecutors at the second instance level (court of appeal) includes all county public prosecutors (heads of the county prosecutors' offices) and their deputies. The number of prosecutors at the supreme court level includes the Public Prosecutor General and his deputies.

Q056 (General Comment): The organisational structure of the public prosecution services comprises: the State Attorney of the Republic of Croatia, the Office for Combating Corruption and Organised Crime (USKOK), county State attorneys' offices and municipal State attorneys' offices. The number of public prosecutors' offices has been significantly rationalised. The number of Heads of the State attorneys' offices does not correspond to the number of municipal State attorneys' offices, because in some of these offices the Heads of offices were not appointed and, until such appointment is made, their duties are exercised by their deputies. The number of the first instance State attorneys' offices includes the number of the municipal State attorneys and Head of Office for Combating Corruption and Organised Crime (USKOK).

Q056 (2023): Q56 - The organisational structure of the public prosecution services comprises: the State Attorney of the Republic of Croatia, the Office for Combating Corruption and Organised Crime (USKOK), county State attorneys' offices and municipal State attorneys' offices. The number of public prosecutors' offices has been significantly rationalised.
The number is reduced by those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q056 (2022): The number is reduced by those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q056 (2020): In 2018, the number of Heads of the State attorneys' offices did not correspond to the number of municipal state attorneys' offices, because in some of these offices the Heads of offices were not appointed. By 2020, they were appointed. Additionally, since 1st of January 2019., 3 new first instance POs were established. The number of the first instance State attorneys' offices includes the number of the municipal state attorneys and Head of Office for Combating Corruption and Organised Crime.

Q056 (2018): In 2018, the organisational structure of the public prosecution in the Republic of Croatia is comprised of the State Attorney of the Republic of Croatia, the Office for Combating Corruption and Organised Crime, 15 county state attorneys' offices and 22 municipal state attorneys' offices. The number of Heads of the State attorneys' offices does not correspond to the number of municipal state attorneys' offices, because in some of these offices the Heads of offices were not appointed. The number of the first instance State attorneys' offices includes the number of the municipal state attorneys and Head of Office for Combating Corruption and Organised Crime.

Q056 (2016): In 2016, the organisational structure of the public prosecution in the Republic of Croatia is comprised of the State Attorney of the Republic of Croatia, the Office for Combating Corruption and Organised Crime, 15 county state attorneys' offices and 22 municipal state attorneys' offices. The number of Heads of the State attorneys' offices does not correspond to the number of municipal state attorneys' offices, because in some of these offices the Heads of offices were not appointed. The number of the first instance State attorneys' offices includes the number of the municipal state attorneys and Head of Office for Combating Corruption and Organised Crime.

Q056 (2014): On 31 December 2014, there were 10 vacancies opened for Heads of State attorneys' offices (2 at the county level, and 8 at the municipal level).

Q060 (2022): The data refer to civil servants and employees employed for an indefinite period.
The number does not include those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q132 (2023): Starting January 1, 2023, the official currency is Euro.

Q132 (2021): Salaries of judges and other judicial officials are determined by multiplying the base for calculating the salary by the coefficient for a particular official, which are proscribed by the Judges' and other Judicial Officials' Salaries Act (Official Gazette No. 10/99, 25/00, 01/01, 30/01, 59/01, 114/01, 116/01, 64/02, 153/02, 154/02, 17/04, 08/06, 142/06, 34/07, 134/07, 146/08, 155/08, 39/09, 155/09, 14/11, 154/11, 12/12, 143/12, 100/14, 147/14, 120/16, 16/19). Determined salaries are increased by 0.5% for each completed year of service, by a maximum of 20%.

Q132 (2020): Salaries of judges and other judicial officials are determined by multiplying the base for calculating the salary by the coefficient for a particular official, which are proscribed by the Judges' and other Judicial Officials' Salaries Act (Official Gazette No. 10/99, 25/00, 01/01, 30/01, 59/01, 114/01, 116/01, 64/02, 153/02, 154/02, 17/04, 08/06, 142/06, 34/07, 134/07, 146/08, 155/08, 39/09, 155/09, 14/11, 154/11, 12/12, 143/12, 100/14, 147/14, 120/16, 16/19). Determined salaries are increased by 0.5% for each completed year of service, by a maximum of 20%.

Q133 (General Comment): Prior to the decision of the promotion, the Council shall request from the competent judicial council the submission of a rating performance of judicial duties. Afterwards, the Council shall conduct a conversation with the candidates. Following the interview, the Council approaches a secret ballot and the points achieved during the interview are summed up to the points of the evaluation of the performance of judicial duties. The Council draws up a list of priority candidates and decides on the promotion of judges. The decision must be based on the total number of points and the established priority list of candidates which is published on the website of the Council.

Q133 (2019): Additional benefits was recently introduced by the Law amending the Law on Salaries of Judges and Other Judicial Officials (Official Gazette 16/19).
Q147 (2020): Not applicable

Q148 (2020): Not applicable

Cyprus

Q046 (General Comment): on the 1st of July the Supreme Court and the Supreme Constitutional Court of Cyprus were re established. An appeal court was also established.
Q046 (2023): "3. Number of Supreme Court judges": the data include the Supreme Court Judges (7) and the Supreme Constitutional Court Judges (9). On 1st of July 2023, an Appeal Court was established.
Q046 (2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.
Q046 (2015): From 2014, following the retirement of male judges at last instance, female judges were appointed.

Q046-2 (General Comment): on July 2023 as part of the judicial reform a Second instance appeal court was established. The Supreme Court and the Supreme Constitutional Court were also re established.
District judges deal with both criminal and civil cases. However they are assigned either civil or criminal jurisdiction for a specified period of time. The Appeal court is divided into chambers each one dealing with specific matters.

Q046-2 (2023): on July 2023 as part of the judicial reform a Second instance appeal court was established. The Supreme Court and the Supreme Constitutional Court were also re established. The Supreme court deals with Civil and Criminal cases. The Supreme Constitutional Court deals with constitutional cases and Administrative Case at a last instance.
The category "Other" refers to the military court.
District judges deal with both criminal and civil cases. However they are assigned either civil or criminal jurisdiction for a specified period of time. For 2023 the number listed above was the number of first instance district judges that deal solely for 2023 with criminal or civil cases accordingly.

Q046-2 (2021): All 13 Supreme court judges hear all cases. District court judges are dealing with criminal and civil cases, and they were previously included in the 'Other' cases. We have now limited this to judges of special jurisdiction courts.

Q046-2 (2020): This includes the supreme court judges who deal with all types of cases, first instance family court judges, labour court judges, rent control court judges and military court.
Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.
Q052 (General Comment): The total number of non-judge staff includes clerical staff and also court bailiffs.

Q052 (2023): The observed variation in the number of "4. technical staff" is due to the establishment of the Appeal court in 2023 and the employment of new staff.
The category "5. Other" includes court bailiffs.
Q052 (2022): court bailiffs
Increase in the needs of the court led to appointment of more employees.
Q052 (2021): court baillifs

Q052 (2020): Other non-judge staff includes court bailiffs. Differences in number of staff compared to previous year come from new appointments and retirements.
Q052 (2018): Court bailiffs are included in category Other.

Q052 (2017): court bailiffs

Q052 (2016): court bailiff
in 2014 the correct number for male no judge staff assisting the judge should be 9
Question 52: if we change the number of male non judge staff assisting the judge for 2014 from 23 to 9, we must also change the number of non-judge staff assisting judges from 143 to 129 and also the total from 462 to 448. Do you agree on up-dating in this way 2014 data in order to ensure the consistency of the table? the numbers for 2014 must also be changed

Q052 (2015): Between 2014 and 2015, there was a change in the distribution of non-judge staff. In 2014, in the category "staff in charge of administrative tasks", only the number of high-level administrative staff was included. The other administrative staff were included in the category "other non judge staff". Whereas in 2015, all administrative staff were included in the category "staff in charge of administrative tasks". This change of distribution leads to significant variations.

Q052 (2014): Variations concerning data on different categories of non-judge staff are due to different methodology of presentation of data used for 2014 and the previous evaluations.
Q052-1 (2022): Increase in the needs of the court led to appointment of more employees.

Q052-1 (2021): Positions that were vacant had been filled.

Q052-1 (2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.
Q052-1 (2018): The Court of Appeal is also the Supreme Court

Q055 (2023): The data should be interpreted in the light of the fact that in the Criminal section of the Legal Service of the Republic there are both counsels of the Republic as well as public prosecutors, who are in charge of handling criminal cases before the Criminal Courts. Only the number fo public prosecutors is communicated in the table.

Q055 (2022): More positions have been filled.

Q055 (2020): The number includes also legal advisors to the Attorney General's office.
The number increased because more positions of prosecutors were approved.
Q055 (2014): All prosecutors appear before all courts.

Q056 (General Comment): All heads of prosecution offices can appear before all courts.

Q056 (2023): In the previous cycles the numbers provided were for the whole legal service of the Republic. In this cycle it was possible to isolate the numbers solely for the public prosecution. The two heads of public prosecution services are the Attorney General and the Deputy Attorney General.
Q057 (2023): the Attorney General may assign to lawyers the prosecution of certain cases

Q057 (2016): the Attorney General can assign to lawyers the prosecution of certain cases.

Q060 (2021): In 2021, a significant number of public prosecutors were appointed, as new posts have been approved and vacant posts have been filled.
Q060 (2020): trainees are not included

Q147 (2018): This figure represents the Lawyers who are registered and have a license for registering practicing advocates

Q147 (2017): the lawyers who do not renew their license are not included in this number

Q148 (2023): The term legal advisor does not exist. Under Advocates Law a registry of practicing lawyers and a registry of non practicing lawyers is kept. The number described above is for practicing lawyers.
Q148 (2022): the Cyprus Bar Association regulates the Advocates who have a renewed practicing license.

Czech Republic

Q004 (2022): The gross salary is constantly growing + the impact of the exchange rate

Q004 (2021): The gross salary is constantly growing.

Q004 (2020): The gross salary is constantly growing.

Q004 (2019): Positive trends in Czech economy and the exchange rate have had an influence on the rise of average gross annual salary (in €).
Q004 (2016): The Czech economy is doing well + the exchange rate.

Q046 (General Comment): The Czech Republic has a four-tier system. The number of judges of the two High Courts is included in the number of second instance judges. This methodology of presentation of data is applied since 2013, while for the previous evaluations, magistrates of the High Courts were considered as third instance judges.

Q046 (2016): The Czech Republic has a four-tier system. The number of judges of the two High Courts is included in the number of second instance judges.
Q046-2 (2023): We know the number of first instance and highest instance judges, so 123 is the difference - the number of judges in administrative cases.
Q046-2 (2022): The category civil/commercial includes all proceedings except criminal and administrative.

Q046-2 (2021): Insolvency proceedings and Guardianship proceedings

Q046-2 (2020): Insolvency Proceedings

Q052 (General Comment): The category “other” encompasses judicial trainees or staff in charge of court documentation, as well as press center and telephone exchange staff.
The judicial trainee is entitled to perform the acts of the court under the conditions and to the extent specified in factual and time plan of the preparatory service which is compiled by the chairman of the regional court after consultation with the advisory board for the education of trainees. The plan must be focused in such a way that the training for the performance of the function of a judge serves in particular to:
a) deepening the trainee's professional knowledge of substantive and procedural law,
b) developing the trainee's ability to apply legislation in a specific matter,
c) gaining knowledge of individual agendas maintained by courts and their implementation,
d) acquisition of procedural procedures and habits necessary for the performance of the function of a judge,
e) acquaintance with ethical principles related to the performance of the function of a judge.
In accordance with the preparatory service plan, the trainee performs preparatory service at a district or regional court. The trainee is usually assigned to one judge. Familiarization with individual court agendas is ensured by the fact that the president of the court where the judicial trainee is currently located gradually assigns the trainee to individual court departments.
The preparatory service includes adaptation courses, seminars and lectures organized by the Judicial Academy and educational activities organized by court for at least 2 days per month.
Starting from 2022 the title of “judicial trainee” has been replaced with “judicial candidate”.

Q052 (2017): Other - judicial trainees, staff in charge of court documentation, press centre and telephone exchange.

Q052 (2016): Other - judicial trainees, staff in charge of court documentation, press centre and telephone exchange.

Q052 (2015): In 2015, compared to 2014, the number of non-judge staff increased due to a project financed from the European social fund and state budget: “Project on improvement of the efficiency of courts by strengthening of the administrative capacities”. The project is running until 30th December 2015.
Q052 (2014): In 2014, the number of non-judge staff increased due to a project financed from the European social fund and State budget: “Project on improvement of the efficiency of courts by strengthening of the administrative capacities”. The project is running until 30th December 2015.
Q055 (General Comment): The Czech Republic is endowed with a system of 4 levels of State prosecution offices: district, regional, high and supreme. The number of high public prosecutors is included in the number of prosecutors at second instance level.
Q056 (2023): The number of females heads of prosecution offices at second instance level has increased from 1 to 3 - it is a desirable trend.
Q056 (2022): The number of females heads of prosecution offices has decreased only from 2 to 1.
Q132 (2023): The Ministry of Justice has clarified that they cannot provide additional comments on the salary increases for judges in the Czech Republic. However, it is worth noting that judicial and prosecutorial salaries were previously frozen. This freeze was later deemed unconstitutional by the Constitutional Court, which led to a substantial increase in salaries, particularly for first-instance judges and public prosecutors, starting in 2023.
Q132 (2022): the impact of exchange rate
Q132 (2020): the salaries have risen generally + exchange rate
Q133 (2018): Judges and prosecutors are entitled to obtain housing only if they are temporarily transferred to another court/prosecution office.
Q133 (2016): Judges and prosecutors are entitled to obtain housing only if they are temporarily transferred to another court/prosecution office.
Q146 (2022): There is no special reason for the increase, the profession is open to everyone regardless of the gender.
Q146 (2020): Data to: 31.12.2020
Q146 (2018): Data to: 31.12. 2018
Q146 (2017): There are 11587 active lawyers and 1496 inactive.
Q146 (2015): From the above mentioned number of lawyers there are 11011 active practising and 1289 temporary inactive.
Q146 (2013): In 2013, 10 255 lawyers are practicing in an active manner, while 1 141 lawyers discontinued their practicing.
Q147 (2016): There are no legal advisors (as decribed in the question above) in the Czech Republic.
Q148 (2016): There are no legal advisors (as decribed in the question 147) in the Czech Republic.

Denmark

Q046 (2017): The figures above show the numbers of appointed judges in the Danish judicial system. Thus, the figures also include the Court of Greenland, the High Court of Greenland and the court of the Faroe Islands.
Q046-2 (General Comment): We cannot answer this question by case type as all judges make decisions in all types of cases in Denmark = NAP.
Q046-2 (2023): Judges in Denmark deal with all types of cases, including both civil, commercial and criminal cases.

Q052 (2023): The category "Other non-judge staff" covers kitchen assistants.

Q052 (2020): -

Q052 (2019): information NA

Q052 (2017): "other non judge staff" - in 2017 there was no staff to fit into this category.

Q052 (2016): The 2016 data on the number of rechtspflegers is correct. The discrepancy that occurs compared to 2014 data is due to a mistake in the 2014 numbers.
Q052-1 (2020): -

Q055 (2023): The number is the actual number of employees in fulltime equivalent as of December 2023. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number regarding December 31st. Therefore the number is drawn for December 1st 2023 and scaled up to a full year.
The data on the number of employees in The Danish Prosecution Service and how they are distributed, is registered through a database, Polpai, containing all employees in the Danish Police and The Danish Prosecution Service.

Q055 (2022): The number is the actual number of employees in fulltime equivalent as of December 2022. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2022 and scaled up to a full year.
Q055 (2021): The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire. This is why the total number of prosecutors does not add up when compared to the number of males and females.

Q055 (2016): The observed discrepancies are due to ordinary changes in staffing.

Q055 (2014): The variations over the period 2012-2014 are due to the fact that in 2012, information was missing about prosecutors engaged in tasks concerning administrative cases (Ledelsessekretatiat) and prosecutors employed by the national police (Rigspolitiet).
Q056 (2023): Please note that question 1 is counted as the director of the prosecution service in the 15 different police districts of Denmark, Greenland and the Faroe Islands. Question 2 is the heads of the 3 state prosecutors offices (Copenhagen, Viborg and State Prosecutor for Special Crime). Question 3 is the Director of Public Prosecutions (Rigsadvokaten).

Q056 (2022): Please note that number 1 is counted as the director of the prosecution service in the 15 different police districts of Denmark, Greenland and the Faroe Islands. 2 is the heads of the 3 state prosecutors offices (Copenhagen, Viborg and State Prosecutor for Special Crime). 3 is the Director of Public Prosecutions (Rigsadvokaten).

Q056 (2020): Please note that number 1 is counted as the director of the prosecution service in the 15 different police districts of Denmark. 2 is the heads of the 3 state prosecutors offices (Copenhagen, Viborg and State Prosecutor for Special Crime Unit) 3 is the Director of Public Prosecutions (Rigsadvokaten).
Q056 (2016): The observed discrepancies are due to ordinary changes in staffing.

Q057 (General Comment): Some police officers conduct cases pertaining to minor offences in court, but they carry out this function on behalf of the prosecution service.
Q057 (2018): There is a small number of police officers who conduct cases pertaining to minor offences in court behalf of the prosecution service, but it is only a small part of their normal tasks as a police officer.

Q060 (General Comment): In Denmark, the staff attached to the public prosecution service (non-public prosecutors) are shared between the police and the prosecution offices (first instance level).
Q060 (2023): All non-public prosecutor staff is included.

Q060 (2022): In the response from 2020, all employees of the prosecution, i.e. also prosecutors, were for unknown reasons included. In the 2021 data the number is 747 in relation to non-public prosecutors. And this year the number is 605 people. The decrease is due to, among other things, that police personnel employed by the prosecution were also included, and due to an organizational change in the public prosecution services.

Q060 (2021): The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire.

Q060 (2020): In 2020, lawyers and police personnel attached to the Prosecution Service are included in the figures.

Q060 (2018): The staff attached to the public prosecution service (non-public prosecutors) are shared between the police and the prosecution offices (first instance level).

Q132 (General Comment): We are not able to inform the net salary. The Danish tax system is progressive. That means that the percentage of tax depends on the income and the municipal tax varies from municipality to municipality. The employment of a new public prosecutor is covered by the collective agreement. In addition to the amount stated above, the public prosecutor in the beginning of his/her career is paid an annual supplement of 17.388 kr./2.330 €. This supplement covers the prosecutor's participation in The Local Prosecution Service's shift schedule (b-vagt). The public prosecutor is payed a basic salary, which is decided centrally in the collective agreement, based on years of working experience, qualifications, work assignments and responsibility in the specific position. In addition to the basic salary, the public prosecutor can be paid a locally negotiated supplement. The supplements depend on the qualifications and specific responsibilities in the position as a prosecutor. Public prosecutor are entitled to an annual salary negotiation.

Q132 (2023): The employment of a new public prosecutor is covered by the collective agreement. In addition to the amount stated above, the public prosecutor in the beginning of his/her career is paid an annual supplement of 17.388 kr./2.330 €. This supplement covers the prosecutor's participation in The Local Prosecution Service's shift schedule (b-vagt). The public prosecutor is payed a basic salary, which is decided centrally in the collective agreement, based on years of working experience, qualifications, work assignments and responsibility in the specific position. In addition to the basic salary, the public prosecutor can be paid a locally negotiated supplement. The supplements depend on the qualifications and specific responsibilities in the position as a prosecutor. Public prosecutor are entitled to an annual salary negotiation.

Q132 (2022): Regarding prosecutor: The employment of a new public prosecutor is covered by the collective agreement. In addition to the amount stated above, the public prosecutor in the beginning of his/her career is paid an annual supplement of 17.174 kr./€ 2.304. This supplement covers the prosecutor's participation in The Local Prosecution Ser-vice's shift schedule (b-vagt). The public prosecutor is payed a basic salary, which is decided centrally in the collective agreement, based on years of working experience, qualifications, work assignments and responsibility in the specific position. In addition to the basic salary, the public prosecutor can be paid a locally negotiated supplement. The supplements depend on the qualifications and specific responsibilities in the position as a prosecutor. Public prosecutor are entitled to an annual salary negotiation.
The Prosecution Service's Remuneration Policy states a maximum annual salary for the public prosecutors. The maximum annual salary for any Senior Prosecutor/Special Prosecutor, including the prosecutors at The Supreme Court Unit with the Director of Public Prosecutions is 714.000 DKKR/€ 95.829. The maximum annual salary for any Deputy State Prosecutor within the Danish Prosecution Service, including the Deputy State Prosecutor at The Supreme Court Unit with the Director of Public Prosecutions, is 942.000 DKKR/€ 126.430. The amounts are stated without pension as well as without remuneration for participation in shift schedules etc. Civil servants receive 16,8 % of the total salary as a pension contribution, and employees under the collective agreement receive 17,1 %. However, the pension contribution for the availability supplement (rådighedstillæg) is 12,5 %.

Q132 (2021): The annual salaries are specified without pension. The annual salary for a Public prosecutor of the Supreme Court or the Highest Appellate is specified based on the average salary for Senior Prosecutors, Special Prosecutors and the Deputy State Prosecutor at The Supreme Court Unit with the Director of Public Prosecutions.

Q133 (2023): However, professional judges are employed as "civil servants" who receive a lifelong pension.

Q133 (2022): However, professional judges are employed as "civil servants" who receive a lifelong pension.

Q146 (2023): The data from 2023 was also reported last year. Due to the implementation of a new member system at the Danish Bar and Law society, currently it is unfortunately not possible to access the total number of female/male lawyers practicing as of January 1st 2022.

Q146 (2021): The figures given above are the number of lawyers at the end of 2021.

Q146 (2013): The 2013 data corresponds to the statistical data for September 2014.

Q147 (2019): License to practice as an "advokat" is mandatory in Denmark.

Q148 (2019): This number include lawyers who have deposited their Danish license to practice as a lawyer. The number is limited to persons born after the 1st of October 1954. Please note that all lawyers have a degree in law (cand.jur), but to practice law in Denmark as an "advokat", lawyers need a license. Lawyers without a license are not included in the number.

Estonia

Q004 (2023): https://www.stat.ee/

Q004 (2022): Inflation

Q004 (2020): Inflation

Q004 (2018): There is no specific reason.

Q046 (2014): In 2014, one male judge left and a female judge was appointed.

Q046-2 (General Comment): Judges of 1st and 2nd instance are not olbliged to only be civil or criminal judges. It can change depending on the workload and wishes of the judge.
Q046-2 (2023): Since 2023 the first instance courts have criminal and civil divsions. If there's a need a criminal judge can still deal with civil cases and vice versa.
Q046-2 (2022): Judges of 1st and 2nd instance are not olbliged to only be civil or criminal judges. It can change depending on the workload and wishes of the judge. The number of civil judges within the courts has been increased in 2022 at the expense of administrative judges.
Q046-2 (2020): In the first instance we don't have judges formally seperated as criminal or civil judges.

Q052 (2023): No comment provided.

Q052 (2020): Trainees are not included in the numbers provided for Q52 and Q52-1.

Q052 (2019): Court interpreters are in the category "other non-judge staff".

Q052 (2018): Court interpreters are in the category "other non-judge staff".

Q052 (2017): The increase in the number of male staff in charge of administrative tasks is due to the general movement of personnel.
"Other non-judge staff": Court interpreters.
Q052 (2016): The observed variations in the numbers with regard to the different sub-categories are due to a general movement of staff.

In 2015, a reform of the Land Registry and Registration Department was carried out, during which the four districts were brought together registry and land registry departments to the Tartu County Court, thus establishing one land registry department and one registry office. The reform involved significant optimization of work processes and dossiers which resulted in the reduction of staff working in the registers. The objectives and results of the reform were largely achieved because registries are kept electronically, and individuals can largely interact with the registers, transmit and receive documents receive electronically.

Q052 (2015): The number of technical staff has been decreasing due to redundancies in the Registration and Land Registry Departments. The project of court lawyers was carried out having in mind that the Registration and Land Registry departments are fully digital. Therefore there is a possibility to decrease the number of technical staff.

Q052 (2014): A pilot project has been introduced in 2013 in one county court consisting in providing each judge with a personal legal assistant. After the first year of the pilot project, the average proceeding times in civil cases in that particular court dropped from 201 days to 160 days; after the second year the average proceeding times dropped further to 132 days. In 2015, the project has been extended to all first and second instance courts.
Q052 (2013): Since 2013, the second category includes a new position among court staff – judicial clerks. They assist judges in the administration of justice, participating in the preparation of court cases or in court proceedings. They replace step by step former consultants. There is one judicial clerk for every judge. In 2013, the reform was implemented in the largest court of general jurisdiction as a pilot (Harju County Court). In 2015,it was extended to all first and second instance courts.

Q052-1 (2022): Many of the non-judge staff is shared between courts, e.g translators. Main purpose is to cut costs and offer better service with the help of digitalisation.
Q055 (General Comment): The categorization of questions 55 and 56 regarding public prosecutors do not exist in Estonia.

Q056 (General Comment): The categorization of questions 55 and 56 regarding public prosecutors do not exist in Estonia.

Q056 (2020): .

Q057 (2018): We have assistant prosecutors who act under the guidance of the prosecutor.

Q057 (2016): We have assistant prosecutors who act under the guidance of the prosecutor.

Q060 (2020): More males have been hired.

Q132 (2020): Since 2010 the salary of prosecutors depends of the salary of the President and is indexed by 1 April of each calendar year. In 2018 the salary system of public prosecutors changed and with that the smallest salaries increased the most.

Q132 (2019): Since 2010 the salary of prosecutors depends of the salary of the President and is indexed by 1 April of each calendar year. In 2018 the salary system of public prosecutors changed and with that the smallest salaries increased the most.

Q148 (General Comment): Data on the number of legal advisors who cannot represent their clients in court is not collected.

Finland

Q004 (2023): Data from the year 2023. Calculation method for full-time employees' annual salary = monthly salary+ vacation pay + performance pay +lump sums + annual service allowance.
Q004 (2022): Final data for the year 2021. Calculation method for full-time employees' annual salary = Monthly salary + vacation pay + performance pay + lump sums + annual service allowance.
Q004 (2021): Preliminary information: salary in 2020 multiplied by the annual percentage change in the earnings level index 2021q4
Q004 (2020): In 2020, the average gross annual salary was EUR 3 595 per month.

Q004 (2019): In 2019, the average gross annual salary was EUR 3528 per month.

Q004 (2018): In 2018, the average gross annual salary was EUR 3465 per month. Correspondingly, the median was EUR 3079 per month. The most common monthly earnings of all full-time wage and salary earners was EUR 2600 per month.

Q046-2 (General Comment): We do not have statistic of the amount of the civil and/ or commercial and criminal judges in the general courts as in many courts judges work in both types of cases. In Market Court, there are 23 judges who are civil/commercial judges.
Q052 (General Comment): The Finnish court staff organisation does not correspond to the CEPEJ subcategories. Therefore, only the total of non-judge staff can be provided for the question 52. Office staff has tasks mentioned in the categories 2-5. Summoners' tasks are for example to serve summons, subpoenas and other documents. Trainee judges have the same responsibility as judges but they do not have competence to deal with difficult cases. They are always appointed for a fixed term period (one year). In the courts of appeal, the
administrative courts, the Supreme Court, the Supreme Administrative Court, the Labour Court and the Market Court
a referendary prepares and presents a case to the judges but the final judgment is decided by the judges. The tasks of trainee judges and referendaries correspond to the categories 1 and 2.
The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge's affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoin

t in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).
Q052 (2023): The total non-judge staff includes office staff 1537, summoners 273, trainee district judges 133 and referendaries 256.
Q052 (2022): The total non-judge staff includes office staff 1521, summoners 274, trainee district judges 135 and referendaries 264.

Q052 (2021): The total non-judge staff includes office staff 1530, summoners 269, trainee district judges 131 and referendaries 278. 1. “Rechtspfleger (or similar bodies)”: The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge’s affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff
has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoint in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).

Q052 (2020): The total non-judge staff includes office staff 1477, summoners/process serves 273, trainee district judges 137 and referendaries 275. 1. “Rechtspfleger (or similar bodies)”: The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge’s affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoint in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).

Q052 (2019): The total non-judge staff includes office staff 1455, summoners 267, trainee district judges 135 and referendaries 271
Q052 (2018): The total non-judge staff includes office staff 1435, summoners 263, trainee district judges 136 and referendaries 297.
Q052 (2017): Office staff 1440, summoners 263, trainee judges 122, referendaries 312
Q052 (2016): office staff 1473, summoners 248, trainee district judges 136, junior district judges 1, referendaries 312

Q052 (2015): office staff 1428, summoners 265, trainee district judges 138, junior district judges 5, referendaries 309

Q052 (2014): For the 2014 exercise the total of 2 161 subsumes 1 434 office staff, 266 summoners, 136 trainee district judges, 7 junior district judges and 318 referendaries.
Q052 (2013): For 2013, the total of 2 196 subsumes 1445 office staff, 265 summoners, 133 trainee district judges, 7 junior district judges, 346 referendaries.
Q055 (General Comment): The National Prosecution Authority comprises the Office of the Prosecutor General that acts as the general administrative unit, and five prosecution districts: Southern Finland, Western Finland, Northern Finland, Eastern Finland and Åland. The National Prosecution Authority has 34 offices around Finland. The Prosecutor General is the supreme prosecutor and the head of the prosecution service. The Prosecutor General directs and develops prosecutorial activity by issuing general instructions and guidelines to the prosecutors. She/he also appoints district prosecutors. The Prosecutor General may take over a case from a prosecutor, but cannot order a prosecutor to decide the case in any given manner. She/he can also self-decide on the bringing of charges and designate a prosecutor to pursue the case in the courts. The Deputy Prosecutor General decides the matters in his/her competence on the same authority as the Prosecutor General. He/she also acts as a deputy for the Prosecutor General when necessary. For regular prosecutorial tasks, the Office of the Prosecutor General has state prosecutors whose jurisdiction covers the entire country. Most criminal matters (about 91 3000 cases annually) are dealt with by the prosecution areas. The Office of the Prosecutor General deals mainly with criminal cases with wider significance to society as a whole, a few dozen every year. Prosecutors in Finland are not bound on Court instances, and every prosecutor is expected to, in a normal situation, to handle and prosecute the criminal case all the way to the Supreme Court, if needed.

Q055 (2023): All Finnish prosecutors have jurisdiction on first and second court instance. Only the Prosecutor General has jurisdiction on Supreme Court level and can assign a prosecutor to handle a case on Supreme Court level.

Q055 (2020): Prosecutors in Finland are not bound on Court instances.

Q056 (2023): The Prosecutor Authority is a singular organization headed by the Prosecutor General (one individual person). In the answer the Chief Prosecutors of the geographically defined are considered heads of prosecution office as these departments equate the former independent prosecution offices.
Q056 (2020): Prosecutors in Finland are not bound on Court instances.
This number includes the five prosecution districts, the The Prosecutor General and the Deputy Prosecutor General. The number of heads of prosecution offices decreased between 2018 and 2020 due to the re-organization of the prosecution.

Q056 (2018): The Prosecutor General, the Deputy Prosecutor General and 11 heads of the local prosecution offices.
New heads of prosecution offices have been appointed and more of them are females.

Q056 (2016): the Prosecutor-General, the Deputy Prosecutor-General and 11 heads of local prosecution offices

Q056 (2014): For 2014, the total referres to the Prosecutor-General, the Deputy Prosecutor-General and 11 heads of local prosecution offices.
Q057 (General Comment): The Chancellor of Justice of the Government and the Parliamentary Ombudsman may also prosecute or order that charges to be brought in matters falling within the scope of their supervisory authority. If a prosecutor has decided not to prosecute, the injured party has the right to him/herself bring a charge for the offence in order to have the case heard by a court.

Q057 (2018): If a prosecutor has decided not to prosecute, the injured party has the right to self bring a charge for the offence in order to have the case heard by a court. The Chancellor of Justice of the Government and the Parliamentary Ombudsman may also prosecute or order the charges to be brought in matters falling within the scope of their supervisory authority.

Q060 (2023): Prosecutors´secretaries and other specialist staff.

Q060 (2022): Prosecutor's secretaries and other specialist staff

Q060 (2021): In 2021, more staff was hired.

Q060 (2018): More staff has been recruited.
The number of males has increased.
Q132 (2022): In Finland, there are several salary categories for judges. The salary depends also on the years of work experience. At the end of 2022 first instance judge is in a salary category T11 in which the gross salary is from 4944,63 €/month to 6428,019€/month depending on his/her experience. A permanent first instance judge T13 has usually at least nine years of work experience which means the salary is 6036,7065 €/month. In Finland, the taxation is progressive so the information on net salary varies from person to person and is not available.
Prosecutors salaries are based on three components: task-specific , personal component and component based on the years of employment. At the start of the career prosecutors usually start at the lower levels of task-specific paylevels, as well as the component based on years of employment is lower. By your own capability you can rise your own personal component. Experienced professionals usually have higher levels in all three components.

Q132 (2020): Prosecutors in Finland are not bound on Court instances.

Q132 (2016): In Finland there are several salary categories for judges. The slary depends also on the experience. A first instance judge has a category of T 11 for which the gross salary is from 4501,79 €/month to 5627,24 €/month depending on his/her experience. A permanent 1st instance judge has usually at least 9 years experience which means the salary is 5177,06 €/month. In Finland we have progressive taxation so the information on net salary is not available.

Q146 (General Comment): As of 2014, only attorneys-at-law, public legal aid lawyers and licenced legal counsels are allowed to represent a client in court. In addition, in-house lawyers can represent their company in court. Lawyers working for trade unions can represent a client in a district court and in the Labour Court in disputes regarding employment relationship. Lawyers working for public authorities can represent the public authority in court.
In order to qualify as an attorney-at-law, a lawyer needs to have at least four years of work experience and must pass the demanding three-part professional qualification test known as the bar examination. The titles of attorney-at-law and attorney’s office are protected by law and can only be used by lawyers accepted into the Finnish Bar Association. Attorney's offices employ also associate lawyers, that is lawyers who are not yet members of the bar.

Q146 (2023): The number includes 2 300 attorneys (i.e. members of the Finnish Bar Association), 1 725 licensed trial counsels and 205 public legal aid attorneus. From the public legal aid attorneys 92 were simultaniously members of the Finnish Bar Association.

Q146 (2022): The number includes 2255 attorneys (i.e. members of the Bar Association), 1733 licensed trial counsels and 200 public legal aid attorneys. From the public legal aid attorneys 90 were also members of the Bar Association.

Q146 (2021): The total number of lawyers includes 2230 attorneys-at-law, 1738 licensed legal counsels and 205 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
The total number of in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

Q146 (2020): In 2020, the total number of lawyers includes 2211 attorneys-at-law, 1664 licensed legal counsels and 212 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
The total number of in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

Q146 (2019): It is estimated that there are 16.000 people with law degree in Finland – it is no possible to provide an exact number of "legal advisors".
Approx. 4.000 lawyers can represent their clients in Court. These consist of 1631 licensed legal councels, 2177 members of the Finnish Bar Association (attorneys-at-law) and 214 public legal assistants in state legal aid offices.
The Finnish Bar Association states that 66% are men and 34% women. However, 52% of their new members are women.

Q146 (2018): In 2018, the total number of 3965 lawyers includes 2143 attorneys-at-law, 1603 licensed legal counsels and 219 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
In addition, in-house lawyers can represent their company in court. Lawyers working for trade unions can represent a client in a district court and in the Labour Court in disputes regarding employment relationship. Lawyers working for public authorities can represent the public authority in court. The total number of these in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

Q146 (2017): The total number of lawyers 3,846 includes 2,137 members of the Finnish Bar Association, 1,588 licensed lawyers and 228 public legal aid lawyers. 107 legal aid lawyers were also members of the Finnish Bar Association.

Q146 (2016): The number of lawyers indicated for 2012, 2013 and 2014 refers to members of the Finnish Bar Association who are entitled to use the professional titles advokat (advocate). Law firms (firms owned by members of the Bar) employ also associates. Besides, legal aid offices employ also legal advisers who are not all members of the Bar Association. Till 2014, jurists (persons who have a Master's Degree in law) could offer similar legal services than members of the Bar. From the beginning of the year 2014, only advocates, public legal aid attorneys and counsels who have obtained the license referred to in the Licensed Counsel Act are allowed to represent a client in the court.
In 2016,the total number of lawyers 3,791 includes 2,119 members of the Finnish Bar Association, 1,540 licensed lawyers and 229 public legal aid lawyers (97 public legal aid lawyers are also members of the Finnish Bar Association). Only members of the Finnish Bar Association are entitled to use the professional title "advocate".

Q147 (2019): The Association of Finnish Lawyers, which is the only association in Finland for all lawyers, has approximately 16.000 members. 55% of their lawyer members are women, and 57% of the student members are women. (https://www.lakimiesliitto.fi/liitto/jasenet/)

Q148 (2018): The exact number of legal advisors who cannot represent their clients in court is not available.

France

Q004 (2022): Revised calculation method: payroll/headcount computed on a full-time equivalent basis.

Q004 (2021): The exact data are 37 742,7

Q004 (2020): The exact figure is 34,494.5_x000D_
Source INSEE

Q046 (2023): The data submitted for the administrative courts, the National Court of Asylum and the Court for disputes relating to paid parking (1) and the data submitted for the Litigation Division of the Council of State (3) are lower than those submitted for the previous cycle because they take into account the actual rate of assignment to the Litigation Division of the Council of State and not the number of individuals. This is because a member of the Council of State may be assigned simultaneously to the Litigation Division - and thus perform the duties of a judge - and to the Administrative division.
For information, the number of staff without taking into account the rate of assignment is as follows:
Total: 155
Men: 92
Women: 63

Q046 (2022): Data include judges from both orders: "ordre judiciaire" and "ordre administratif".

DSJ: Data extracted from the SIRH LOLFI - number of professional judges in service at the headquarters of judicial courts as of 31/12/2022. The values are expressed in Full time equivalent.

Q046 (2021): Data taken from an extraction of the LOLFI SIRH - Number of professional judges on 31/12/2021. The values are expressed in FTEs. Source DSJ

Administrative justice data: 1. total number of professional judges at first instance: 899(463 men, 436 women); 2) Number of professional judges in the courts of appeal (2nd instance): 304 (163 men, 141 women); 3. number of professional judges in the Supreme courts: 128 (81 men, 47 women). 1+2+3. Total number of professional judges: total 1331 (707 men, 624 women). The figures are expressed in physical numbers as at 31/12/2021. The members of the National Court of Asylum (CNDA) and the Paid Parking Litigation Commission (Commission du contentieux du stationnement payant) are counted under the first instance.

Source: Council of State

The gender distribution is based on the number available in FTE for all professional judges except for administrative judges for whom the distribution is available in FTE only for the total.

Q046 (2020): "Here are the details:

With respect to the judiciary. The data are expressed in full-time equivalent. These figures concern only judges (and not paralegals) who sit in court (magistrates seconded to the central administration are not counted). In the table above, the figures have been rounded up when the decimal is greater than or equal to 0.5:

Total number of professional judges: total 6177.9; men 1725.5; women 4452.4

1. Number of first instance professional judges: total 4378.6; men 1133.7; women 3244.9
2. Number of second instance professional judges : total 1577.8; men 503.8; women 1074
3. Number of Supreme Court professional judges : total 221.5; men 88; women 133.5

Source: LSB

For the administrative order, the data include the National Court of Asylum (CNDA) and the Commission du contentieux du stationnement payant (CCSP). In FTE, only the total is available. The detail in physical staff is as follows:

Total number of professional judges: total 1357; men 727; women 630

1. Number of first instance professional judges : total 920; men 487; women 433
2. Number of second instance professional judges : total 306; men 156; women 150
3. Number of Suprem Court professional judges : total 131; men 84; women 47

Source: EC

"

Q046 (2019): Data are presented in full time equivalent, part-time employees being counted, which explains the possible horizontal and vertical inconsistencies in the table. For information: number of judges from civil society (first instance): Total: 19,002 (489 temporary judges (MTT) + 13,277 labor judges (conseillers prud'hommes ((CPH) + 1,832 Assessors of the Social Centres (APS) + 3,404 Consular Judges of the Commercial Courts (JC) Men: 11,249 (243 MTT + 6,902 CPH + 1,294 APS + 2,810 JC); Women: 7,753 (246 MTT + 6375 CPH + 538 APS + 594 JC). Source: LOLFI. Number of judges on duty in the courts.

The data do not encompass "public prosecutors and their staff". All judges in courts are counted, including presidents of courts, as the latter perform judges' duties.

Q046 (2018): With regard to administrative justice, in 2018, it should be noted that the number of judges sitting in specialised courts increased due to the very sharp increase in the number of appeals to the National Court of Asylum (CNDA) and the creation of the Commission du contentieux du stationnement payant (CCSP).

In the area of judicial justice, the increase is due to the filling of vacancies in the courts and the decrease in the number of departures of judges.

Q046 (2014): The 2014 data on number of judges of courts of law subsumes also the presidents appointed by 31 December 2014.

Q046 (2013): In 2013, in first instance, there are 161 presidents of ordinary courts of law and 42 presidents of administrative courts. In second instance, there are 37 first presidents of courts of law and 8 presidents of administrative courts. They are encompassed in the indicated figures. However, presidents of administrative courts of appeal are not included (being members of the State Council, they are included within the number of Supreme court judges).

Q046-2 (2022): The increase in the number of judges at the Council of State between 2021 and 2022 is attributed to returns from mobility.

Q046-2 (2021): Non-specialised judges, who account for approximately 45% of the staff of the civil and criminal courts, are required to work in both criminal and civil matters. As a result, the distribution between the different types of litigation is not quantifiable, as these assignments fall within the organisational powers of the head of court.
Similarly, certain specialised judges (juvenile judges and liberty and custody judges) are also likely to intervene in both civil and criminal cases due to their areas of competence.
Source DSJ. Data have been rounded up from 0.5, down below. Source: Council of State for the administrative part (data have been rounded).

Q046-2 (2020): "The distinction by type of case is not possible in the justice of the judicial order.
Note: the distribution of the processing of civil and criminal cases within the tribunals and courts, which depends on the organization of the jurisdictions, does not allow us to fill in this table. For the administrative courts, the FTEs have been rounded up. The precise non-rounded data can be made available if necessary. "

Q052 (2023): “Other non-judge staff” include legal assistants and specialist assistants who do not work for the public prosecutor's office. The category “2. Non-judge (judicial) staff whose task is to assist the judges such as registrars” includes also A, B and C category contract staff recruited under the local justice support plan implemented from the second half of 2020 on the sole basis of article 7 bis of law no. 84-16 of 11 January 1984 on statutory provisions relating to the State civil service, created by the civil service transformation law of 6 August 2019 instituting the project contract. These contract staff are recruited for 3 years. The total number of non-judge staff working in the courts (1+2+3+4+5) increased by 564 actual staff between 31.12.2022 and 31.12.2023. This overall upward trend is made up of several contrasting dynamics within the different populations concerned.
For example, the number of “2. Non-judge (judicial) staff whose task is to assist the judges such as registrars” decreased by 451 actual staff numbers between 2022 and 2023. This reduction is mainly attributable to the fall in the number of local justice contract staff in all categories (-268 actual staff numbers) and administrative assistants (-192 actual staff numbers), a number of whose posts have nevertheless been converted into administrative secretary posts. The “3. Staff in charge of different administrative tasks and of the management of the courts” (excluding local justice contract staff) increased by 710 actual staff numbers between 2022 and 2023. This significant increase reflects the continued strengthening of regional administrative services, which has been underway for several years (+233 actual staffing levels between 2022 and 2023), which has led to the creation of contract B local IT technicians (contract B TIP, +126 actual staffing levels), administrative secretaries (+42 actual staffing levels) and psychologists (+18 actual staffing levels).
Similarly, the number of non-judg

e administrative staff in the courts has increased significantly (in particular +156 administrative secretarial posts between 2022 and 2023). Finally, the legal assistants and specialist assistants making up the other non-judge staff category increased by 301 real numbers between 2022 and 2023. As at 31/12/2023, 1 580 category A and B staff (including 1 291 women) were undergoing initial training at the National School for Court Registrars, most of them on practical training in the courts. These staff will join the courts in 2024 or 2025, which will significantly increase the number of staff working in the courts and regional administrative departments.
With regard to the administrative courts, the technical staff listed correspond to the staff employed and paid by the administrative court and not the people working under service contracts, managed locally by each court and paid for out of the latter's operating appropriations, for which we have no visibility.

Q052 (2022): The "other non-judge staff" correspond to legal assistants and specialised assistants who do not work for the prosecution services, while for the other subcategories it is not possible to distinguish between staff working for the courts and those working for the public prosecution services.

The category "non-judge (judicial) staff whose task is to assist the judges such as registrars" includes the category B contractual staff created by the law on the transformation of the civil service of 6 August 2019, which institutes the project contract. They have been recruited under the support plan for justice implemented since the second half of 2020, for 3 years term of office. The significant increase in the number of these contractual staff, combined with the increase in the number of court clerks and the increase in the number of other non-judge staff, contributes to the increase in the overall figures communicated for the year 2022.

As at 31/12/2022, 1 549 category A and B staff (including 1 066 women) were undergoing initial training at the École nationale des greffes, most of them within the courts (practical training). These staff will join the courts in 2023 or 2024, which will significantly increase the number of staff working in the courts and regional administrative departments (RAD).

With regard to "staff in charge of administrative tasks", the increase observed is linked to the implementation of a proactive policy to reinforce the SARs and the secretariats of the court presidents (increase in the number of directors of registry services in the SARs, increase in the number of administrative secretaries, etc.).

Q052 (2021): Concerning the total of 22 115, it should be noted that this figure includes 597 legal assistants and specialised assistants working for the courts and 939 contractual staff recruited in the framework of local justice. The "other non-judge staff" correspond to legal assistants and specialised assistants who do not work for the prosecution services. The category "non-judge (judicial) staff whose task is to assist the judges such as registrars" includes the category B contractual staff recruited under the support plan for justice implemented since the second half of 2020 on the sole basis of Article 7 bis of Law No. 84-16 of 11 January 1984 on the statutory provisions relating to the State civil service, created by the law on the transformation of the civil service of 6 August 2019, which institutes the project contract. These contractual employees are recruited for three years. The significant increase in the number of these contractual staff (240 more than in 2020), combined with the increase in the number of court clerks (+221 compared to last year) and the increase in the number of other non-judge staff (+210 compared to last year), contributes to the increase in the overall figures communicated for the year 2021. As on 31 December 2021, 1 666 category A and B staff (including 1 383 women) were undergoing initial training at the “École nationale des greffes”, most of them on practical training in the courts. These staff will join the courts in 2022 or 2023, which will significantly increase the number of staff working in the courts and the regional administrative services.
Source DSJ

Q052 (2020): "Non-judge staff" correspond to legal assistants and specialized assistants who do not work for the prosecution service. Unlike in previous years, this distinction could be made for the numbers in 2020, which explains the decrease in the figures provided compared to the previous year. The category "Non-judicial staff responsible for assisting judges, like registrars" includes the category B contractual employees recruited under the plan to support justice, implemented since the second half of 2020 on the sole basis of article 7bis of the law n°84-16 of January 11, 1984, concerning statutory provisions relating to the State civil service, created by the law on the transformation of the civil service of August 6, 2019, instituting the project contract. These contract employees are hired for 3 years.
As of 12/31/2020, 1,699 category A and B agents (including 1,388 women) were undergoing initial training at the National School of Clerks, most of whom were on practical training in the courts. These personnel will join the courts during 2021 or 2022, which will significantly increase the number of agents working in the courts and regional administrative services.
The data compiles data from the judicial and administrative justice systems. Interns are not included. "

Q052 (2019): As of 31/12/2019, 1,693 category A and B staff (including 1,408 women) were undergoing initial training at the “Ecole nationale des greffes”, most of them on practical training courses in the courts. These staff will join the courts in 2020 or 2021, which will significantly increase the number of staff working in the courts and regional administrative departments.
Other non-judge staff includes specialised assistants (106, 48 men and 58 women) and legal assistants (422, 93 men and 329 women) working in the civil and criminal courts. The increase in the number of legal assistants between 2018 and 2019 is due to the creation of new budgetary posts obtained.

Q052 (2018): With the exception of heading 5 "Other non-judge staff", the distinction between staff attached to judges and staff attached to prosecutors is not possible
At the date of 31/12/2018, 1,173 category A and B staff (including 1,003 women) were in initial training at the National School of Registries, most of whom were on practical training in the courts. These staff will join the courts in 2019 or 2020, which will significantly increase the number of staff working in the courts and regional administrative services.
"Other non-judge staff" includes specialised assistants and assistant lawyers who assist non-judge prosecutors in their duties.
The detail by function and gender is as follows:
Categories Total Male Female
Specialized assistants 23 13 10 10
Assistant lawyers 245 53 192
Total 268 66 202

Q052 (2017): The distinction between staff attached to judges and staff attached to prosecutors is not possible. Namely, the sub-category 2 encompasses specialised assistants (31) and assistant lawyers (242), who assist civil and penal judges or prosecutors in the preparation of case files.
Q052 (2016): No distinction is possible between staff attached to courts and staff attached to public prosecution services. The category “Other non-judge staff” refers to specialized assistants (18) and legal assistants (111) who work in civil and penal courts.
Q052 (2015): It should be noted that as of 31 December 2015, 1013 categories A and B staff (including 886 women) were in initial training at the Ecole nationale des greffes (French National School for Registrars), most of them in practical training in courts. This high volume of staff has joined the courts in 2016 or will do so in 2017, which will increase the number of staff actually working in the courts and regional administrative offices.

The distinction between staff in charge of assisting judges and staff in charge of assisting prosecutors is not possible. The latter are therefore part of the figures provided.

Q052 (2013): The 2013 data encompasses non-judge staff appointed to judges and public prosecutors. On 31 December 2013, 1064 agents were in initial training. They joined courts of law in 2014 or will do in 2015. Among the 21946 non-judge staff, 1911 were appointed to administrative courts. The 274 agents of the State Council counted in 2012 were appointed to a support function and are therefore excluded from the 2013 figures. The size of the litigation section of the State Council represents 87 FET. The staff of the National Court for asylum right has also been taken into account in categories 2, 3 and 4 for a total of 325 FET (not counted until 2013). In 2013, the State Council distributed non-judge staff which was before included in the category "other" in the proposed categories.

Q052-1 (2023): As in the previous year, staff working in regional administrative departments are not included in this census of staff working in courts only. This explains the difference between the totals for questions 52 (23 258) and 52.1 (21 757). Also included in the number of staff working in the courts are the ‘local justice’ contract staff whose recruitment has been authorised from 2020 onwards on the basis of the project contract (see comment to question 52).
The increase of 495 real staff between 2022 and 2023 for these court staff is mainly due to the increase in the number of legal assistants and specialist assistants (+462 posts). It should be noted that, unlike in question 52, it has not been possible to exclude legal assistants and specialised assistants working for the public prosecutor's office when breaking down the data provided in the table above (1 538 in total for courts of first instance, courts of appeal and supreme courts).

Q052-1 (2022): It has not been possible to exclude the legal assistants and specialized assistants working for the public prosecutor's office from the breakdown of data provided in the frame of Q52-1 (1076 in total for first instance courts, appellate courts, and Supreme courts). Also included in these figures are contractual staff whose recruitment was authorized as of 2020 under project-based contracts (see comments to question 52). The difference between the total of Q52 and the total of Q52-1 is once again explained this year by the non-inclusion in question Q 52-1 of personnel working in SAR: indeed, since question Q52-1 only concerns non-judicial staff working in first instance courts, appellate courts, and Supreme courts, SAR staff are not counted therein.

Q052-1 (2021): It has not been possible to exclude the legal assistants and specialised assistants working for the public prosecution services for the breakdown of the data provided in the table above (359 in total for the First instance courts, Courts of appeal and Supreme courts, at national level). Also included in these numbers are the 'justice de proximité' contract staff whose recruitment has been authorised from 2020 onwards on the basis of the project contract (see comment of Q52). On the other hand, staff working in the SAR are excluded (contrary to Q52), i.e. 1 766 staff.
Source DSJ

Q055 (2023): These figures correspond to all public prosecutors in the public prosecution services, excluding court presidents and heads of court.
In first instance courts, the total is 1 892 (843 men / 1 049 women). At first instance, 430 “délégués du procureur”, including 72 women and 358 men, carry out functions comparable to those of public prosecutors. The increase in the number of first instance prosecutors compared with 2022 is due to the inclusion of the “délégués du procureur” in 2023.

Q055 (2021): Data taken from an extraction of the LOLFI SIRH - Number of public prosecutors on 31/12/2021. The values are expressed in FTEs.
Source DSJ
The data have been rounded upwards from 0.5 and downwards below, with the exception of the data relating to the number of male prosecutors at the Courts of appeal (the exact figure is 249.6) in order to ensure vertical consistency.

Q055 (2020): Only the judicial order is concerned

Q055 (2014): For 2014, State prosecutors, heads of public prosecution services, are included.

Q057 (General Comment): In France there are other persons having similar duties to those of public prosecutors, namely the so called "délégués du procureur". The latter carry out certain tasks of the public prosecutor: implementing alternative measures to criminal prosecution, notifying measures proposed as part of a penal composition, notifying convicted offenders of penal orders, monitoring the implementation of probationary sentences, monitoring the enforcement of penalty sentences, receiving payment of fines imposed by penal order, representing the public prosecutor in territorial bodies.

Q057 (2023): The ”délégués du procureur” carry out functions comparable to those of public prosecutors. They intervene to implement alternative measures to prosecution decided by the public prosecutor for minor offences (reminder of obligations under the law, conditional discontinuation, penal composition). They may also be tasked with issuing summonses to appear in court or criminal orders. They carry out their duties within the premises of first instance courts, courts of appeal or any place of justice designated by the public prosecutor (points of justice, police stations, etc.). As key players in the local justice system, their duties have been extended and diversified as part of the reform to make criminal proceedings more efficient, as set out in decree no. 2020-1640 of 21 December 2020. They can now hold office hours, represent the public prosecutor at meetings of partnership bodies or receive payment of fines.

Q057 (2022): In France there are other persons having similar duties to those of public prosecutors, namely the so called "délégués du procureur". The latter carry out certain tasks of the public prosecutor: implementing alternative measures to criminal prosecution, notifying measures proposed as part of a penal composition, notifying convicted offenders of penal orders, monitoring the implementation of probationary sentences, monitoring the enforcement of penalty sentences, receiving payment of fines imposed by penal order, representing the public prosecutor in territorial bodies.

In 2022, there were 1 004 "délégués du procureur". The number in full time equivalent is 400 and it has been calculated approximately, as they work on a sessional basis.

Q057 (2016): No other person has functions comparable to those of the public prosecutor, the latter being sole in charge of the public prosecution. On the other hand, certain powers may be delegated on an ad hoc basis within a specific framework. Thus, before the police court and the local court which are competent to try contraventions of the first four levels, the functions of the public prosecutor are carried out by an officer of the public prosecutor's office (OMP) in the person of the competent police commissioner in the jurisdiction of these courts.
The prosecutor of the Republic may also designate a representative of the public prosecutor to intervene in the procedure of criminal composition or to remind the perpetrator of the obligations resulting from the law, to direct the perpetrator to a health, social or professional structure or to ask the perpetrator to regularise his/her situation or to compensate the damage resulting from the offence. The prosecutor's delegates may be natural persons or associations. They are empowered to do so by the public prosecutor, must take an oath before the court and are bound by professional secrecy. They submit an annual activity report to the prosecutor.
The prosecutor's delegates are not members of the public prosecutor's office and are not in charge of initiating public prosecutions, unlike the officers of the public prosecutor's office mentioned above. Indeed, the prosecutor's delegates are only competent within the framework of the mission assigned to them for an alternative measure to prosecution in a specific case.

Q057 (2014): Data in FTE is not available for two reasons. On the one hand, deputy prosecutors (about 950) and criminal mediators are involved as delivery agents and not employees. On the other hand, associations, to the number of 155, are also entitled to fulfill these missions, but it is still not possible to determine the number of FTE devoted to these specific missions, among other socio-judicial missions.
Q060 (2023): The categories of staff taken into account correspond to legal assistants and specialist assistants working for the public prosecutor's office.
The increase in the number of non-prosecutor staff attached to the Public Prosecutor's Office in 2023 compared with 2022 occurs in the context of the strengthening of the justice budget, in particular by providing for the creation of a large number of posts for legal assistants (300 in 2023), these criteria have made it possible to consolidate the assignment of legal assistants to the Public Prosecutor's Office on a long-term basis.
In accordance with the note from the Directorate of Judicial Services dated 30 January 2023 on the distribution and recruitment of legal assistant staff for the year 2023, the following were taken into account: the support for the activity of the public prosecutors' offices, the ratio of the number of legal assistant staff jobs per localised prosecutor’s position so that it is between 1 for 6 and 1 for 7 for all metropolitan jurisdictions, the specificities of overseas jurisdictions and jurisdictions hosting specialized interregional jurisdictions (JIRS) or national centers. In addition, the distribution of the posts of legal assistant officers was linked to an action plan to reduce stocks and improve the quality of processing of proceedings. Similarly, the need to support the public prosecutors' offices, particularly within the JIRS or national centres, in the characterisation and processing of complex offences has led to the assignment of specialised assistants within these courts.

Q060 (2022): This figure includes legal assistants and specialised assistants working in the public prosecutor's office.

Q060 (2021): 359 = legal assistants and specialised assistants
Source DSJ
Q060 (2016): It should be recalled that court staff are assigned to the services of judges and public prosecutors, and details of this breakdown are not available. For very specific staff, the data are nevertheless known: 60 specialised assistants and 49 legal assistants.

Q060 (2014): Staff assisting the public prosecution office are comprised in the whole of the registry staff under the direction of a registry director. The latter works closely with the chairman of the court and the public prosecutor at the court. Therefore, data on staff of the public prosecution office are, to this date, indistinct from those of court staff (question 52). Moreover, some very specialised public prosecution services can be assigned to specialised assistants, sometimes from other jurisdictions, to help them deal with the most complex proceedings. These specialised assistants are at number 44 (including 23 women) in 2014.

Q132 (General Comment): Administrative courts:
First-instance professional judge at the beginning of their career: the data mentioned in the first line corresponds to the average salary of a junior advisor at the first-grade level.
Judge of the Supreme Court or final appellate court: this refers to the average salary of deputy presidents of the litigation section. The salary primarily consists of: base salary: this depends on the increased index held by the civil servant in their grade and step within the grade, and it progresses with seniority according to an index scale. This index is multiplied by the value of the public service point to calculate the base salary; additional remuneration components: paid based on personal circumstances (e.g., dependents, location of the administrative residence, allowances for assignments in certain overseas territories, etc.); allowances: either paid on a fixed basis depending on the various functions that may be held during the career or based on the significance and quality of the service rendered, and the achievement of quantitative objectives.

Civil and criminal courts:
The average salary of a first-instance professional judge at the beginning of their career corresponds to the entry-level salary upon starting their position after completing the National School for the Judiciary (ENM).
The average salary of a first-instance prosecutor at the beginning of their career corresponds to the entry-level salary upon starting their position after completing the ENM.
The average salary of judges at the Court of cassation (the methodology used in previous years is applied): it is more relevant to take the average cost of judges at the Court of Cassation, as it should reflect the highest salary of a judge/prosecutor in the highest judicial instance, rather than the salary of the president of the court or the Attorney General.
Prosecutor at the Supreme Court or final appellate court: same as above.

Q132 (2023): As regards the salary of a first instance professional judge at the beginning of his/her career, the salary scale for judges at the beginning of their career has been upgraded.
Q132 (2022): According to the administrative court judges' annual salary, it amounts to 57,400 euros gross and 48,700 euros net. As for the Council of State judges, their annual remuneration stands at 190,000 euros gross and 161,000 euros net.

The administrative judges in France are subject to another salary regim. The gross annual salary of administrative judges is 57 400 Euro and 48 700 Euro net. For the judges of the Council of State (Conseil d'Etat), the annual salary is 190 000 Euros gross and 161 000 Euros net.

Q132 (2021): The data filled in the table are those of the civil and criminal justice, source DSJ.
Concerning the administrative justice, the data are as follows: professional judge of first instance, beginning of career: 50 200, 41 300; judge of the Supreme court or of the last instance of appeal: 95 100, 76 900. Source – Council of State

Q132 (2020): "The completed table concerns only magistrates of the judicial order.
For the administrative order: -gross annual salary in euros of a professional judge of 1st instance at the beginning of his career: 47,100 euros
-gross annual salary in euros of a Supreme Court judge: 94,000 euros
-net annual salary in euros of a professional judge of first instance at the beginning of his career: 38,700 euros
-net annual salary in euros of a supreme court judge: 76,000 euros.
sources DSJ and CE."

Q132 (2014): In 2014, the annual gross salary of administrative judges was 42,615€ and the annual net salary was 36,318€. At the State Council, the annual gross salary was 108,881€.
Q133 (2020): Pursuant to the provisions of the order of April 5, 2017, establishing the lists of functions of the State services of the Ministry of Justice provided for in Articles R. 2124-65 and R. 2124-68 of the General Code of the Property of Public Persons that may give rise to the granting of a concession of housing by absolute necessity of service or of a precarious occupation agreement with penalty, certain heads of courts and jurisdictions benefit from a precarious occupation agreement with penalty._x000D_
A fee is charged to the beneficiary of this agreement. It is equal to 50% of the real rental value of the occupied premises._x000D_

Q148 (2018): There is no regulated profession in France for lawyers who cannot represent clients in court.

Germany

Q004 (2023): The figure represents the average gross annual salary of employees working in full time including special payments (without special payments: 53 620 EUR)
Special payments are any payments outside of the regular remuneration. Typical examples of such payments are Christmas bonuses/end-of-the year bonuses, holiday bonuses, payments for jubilees, bonuses for the fulfilment of target agreements.

Q004 (2022): The figure represents the average gross annual salary of employees working in full time including special payments (without special payments: 50 805 EUR)
Special payments are any payments outside of the regular remuneration. Typical examples of such payments are Christmas bonuses/end-of-the year bonuses, holiday bonuses, payments for jubilees, bonuses for the fulfilment of target agreements.

Q004 (2021): The figure represents the average gross annual salary of employees working in full time including special payments (without special payments: 49 202 EUR)
Special payments are any payments outside of the regular remuneration. Typical examples of such payments are Christmas bonuses/end-of-the year bonuses, holiday bonuses, payments for jubilees, bonuses for the fulfilment of target agreements.

Q004 (2020): figure represents the average gross annual salary of employees working in full time

Q004 (2019): With regard to this question, no data are available for 2019. The data from 2018 have therefore been included.

Q004 (2018): With regard to this question, no data are available for 2018. The data from 2017 have therefore been included.

Q004 (2016): The circumstances have changed since the last campaign

Q046 (General Comment): 1. There is a "court-staff statistic" ("Personalbestand") of the federal states that reports the number of judges in full-time equivalent as of 31 December of the reference year. This statistic also shows the number of female judges but it is not possible to allocate the judges to the different instances/stages of appeal. This statistic does not include the judges at the Federal Courts ("Supreme Courts").
2. The "staff-assignment statistic" ("Personalverwendung") of the federal states basically reports the average number of personnel actually deployed during the reference year (full-time equivalent). For example, employees who were not present for more than 20 working days during a quarter for reasons other than holiday and/or training are excluded. The staff- assignment statistic offers the possibility to allocate the judges to the different instances but it does not show the number of female judges. It does not include the federal judges either.
3. The "judiciary-staff statistic" ("Richterstatistik") combines the number of the judges of the federal states from statistic No 1 (court staff statistic) with the number of judges at the Federal Courts (full-time equivalent as of 31 December). This statistic is not published every year but every two years. It differentiates between the judges of the federal states and the judges of the Federal Courts (highest instance) and includes the number of female judges.
Regarding Q46 the figures under "1. Number of first instance professional judges" and "2. Number of second instance (court of appeal) professional judges" were taken from statistic No 2 (staff-assignment) because statistic No 1 does not offer the possibility to allocate personnel to the different instances. The figures under "3. Number of Supreme Court professional judges" were taken from statistic No 3 because the federal judges only appear in that statistic.

Q046 (2023): 1. and 2.: Data was taken from the "staff-assignment statistic 2023" of the federal states. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training) in FTE. The staff-assignment statistic does not distinguish between male and female judges. The "court-staff statistic" of the federal states on the other hand distinguishes between "total" and "female" but does not allow for a differentiation between the instances. According to the court-staff statistic as of 31 December 2023 there were 21 882 judges (FTE) in total, among them 10 929 female and 10 953 male.
3: Figures represent the number of judges at the Federal Courts in FTE as of 31 December 2022. The number of judges at the Federal Courts is published every second year (please refer to the general comment).

Q046 (2022): 1. and 2.: Data was taken from the "staff-assignment statistic" of the federal states. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistic does not distinguish between male and female jugdes. The "court-staff statistic" of the federal states on the other hand distinguishes between "total" and "female" but does not allow for a differentiation between the instances. According to the court-staff statistic as of 31 December 2022 there were 22 027 judges (FTE) in total, among them 10 813 female and 11 214 male.
3: Figures represent the number of judges at the Federal Courts in FTE as of 31 December 2022. The number of judges at the Federal Courts is published every second year (see General Comment).

Q046 (2021): 1. and 2.: Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female jugdes. The "regular" court-staff statistics of the Länder distinguish between "total" and "female" but do not allow for a diffentiation between the instances. According to the regular court-staff statistics as of 31 December 2021 there were 22 006 judges in total, 10 626 female and 11 380 male (full-time equivalents).
3: Figures represent the number of judges at the Federal Courts in full time equivalents as of 31 December 2020. The number of judges at the Federal Courts is published every second year (see General Comment).

Q046 (2020): 46.1 and 46.2: Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female jugdes. The "regular" court-staff statistics of the Länder distinguish between "total" and "female" but do not allow for a diffentiation between the instances. According to the regular court-staff statistics as of 31 December 2020 there were 21.944 judges in total, 10.418 female and 11.526 male (full-time equivalents)
46.3: Figures represent the number of judges at the Federal Courts in full time equivalents as of 31 December 2020.
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
These numbers will not be reflected directly in the data given above, because the figures represent the average value of the actual personnel deployed during the reference year (in full-time equivalents).
It should also

be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q046 (2019): The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2018).
Q046 (2018): The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2018).

Q046 (2017): Comment - Please provide any useful comment for interpreting the data above: The information provided counts the number of full-time equivalent staff. There are no absolute figures for the number of persons making up this staff. A judge working full hours is counted as a full-time equivalent (i.e. 1). A judge working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a judge working half the usual number of hours). Re 1 and 2: Information based on staffing overviews. These data are ascertained according to a complex calculation mechanism as an annual average of the actual personnel deployed (for example: minus the number of staff absent for more than 20 working days in a single quarter for reasons other
than vacation and/or further-training). Re 3: The number of supreme court professional judges is based on judicial statistics. These data
are collected and collated every two years (last updated 31/12/2016).

Q046 (2016): The information provided counts the number of full-time equivalent staff. There are no absolute figures for the number of persons making up this staff. A judge working full hours is counted as a full-time equivalent (i.e. 1). A judge working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a judge working half the usual number of hours). Re 1 and 2: Information based on staffing overviews. These data are ascertained according to a complex calculation mechanism as an annual average of the actual personnel deployed (for example: minus the number of staff absent for more than 20 working days in a single quarter for reasons other than vacation and/or further-training). Re 3: The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2016).

Q046 (2015): The data refer to the year 2014. At present, no more recent data are available.

Sources: Federal Office of Justice (Bundesamt für Justiz), Schöffenstatistik (statistical information on lay judges) as per 31 December 2014 as well as information provided by the Federal Länder
Q046-2 (2023): "Other" includes judges handling family cases and labour law cases.
"First instance" and "Second instance": Data is taken from the "staff-assignment statistic 2023" of the federal states. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training) in FTE.
"Supreme Court": the figures are taken from the "court-staff statistic" and represent the number (FTE) of judges at the federal courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Constitutional Court, Military Disciplinary Courts) as of 31. December 2022. It shows the number of judges (FTE) at the Federal Court of Justice (154) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 114 judges (headcount) assigned to the civil panels and 47 to the criminal panels.

Q046-2 (2022): "Other" includes judges handling familiy cases and labour law cases. In previous cycles, this category also included judges handling cases at the financial and social courts. In accordance with the classification of cases used for question 91, these judges are now allocated to the category "administrative".
"First instance" and "Second instance": Data is taken from the "staff-assignment statistic" of the federal states. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the "court-staff statistic" and represent the number (FTE) of judges at the federal courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2022. It shows the number of judges (FTE) at the Federal Court of Justice (154) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 114 judges (headcount) assigned to the civil panels and 47 to the criminal panels.

Q046-2 (2021): "Other" includes: familiy cases (at the Local and Higher Regional Courts), cases at the Labour Courts, Social courts, Finance courts
"First instance" and "Second instance": Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the court-staff statistics and represent the number (FTE) of judges at the Federal Courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2020. The statistic is published every second year. It shows the number of judges (FTE) at the Federal Court of Justice (152) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 113 judges (headcount) assigned to the civil panels and 46 to the criminal panels.

Q046-2 (2020): "Other" includes: familiy cases (at the Local and Higher Regional Courts), cases at the Labour Courts, Social courts, Finance courts
"First instance" and "Second instance": Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the court-staff statistics and represent the number (FTE) of judges at the Federal Courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2020. The statistic shows the number of judges (FTE) at the Federal Court of Justice (152) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 114 judges (headcount) assigned to the civil panels and 47 to the criminal panels.
Slight horizontal and vertical inconsistencies are caused by rounding.

Q052 (General Comment): Data is taken from the "staff-assignment statistic" of the federal states and represents an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistic do not distinguish between male and female staff.
Q052 (2023): "Other non-judge staff" represents:
- staff on the basic level career track as far as not allocated to categories 1 - 4 (including motor-pool staff, staff at court cashiers' offices, internal mail and file delivery service, maintenance etc.)
- staff in staff representation bodies, as representatives for staff with disabilities and as gender equality commissioners

Q052 (2022): "Other non-judge staff" represents:
- staff on the basic level career track as far as not allocated to categories 1 - 4 (including motorpool staff, staff at court cashiers' offices, internal mail and file delivery service, maintenance etc.)
- staff in staff representation bodies, as representatives for staff with disabilities and as gender equality commissioners
Discrepancies of technical staff and other non-judge staff:
The categorisation of staff allocated to "other non-judge staff" was revised and corrected in comparison to previous cycles. Staff on unpaid leave for training purposes was removed. Reception and security services were formerly allocated to "other staff". In alignment with the Explanatory Note, reception and security services are now allocated to the category "technical staff". Other potentially "technical" staff such as motorpool or maintenance staff are not recorded seperatly in the "staff-assignment statistic" but only together with other lines of work as "staff at basic level career track together".

Q052 (2021): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2020): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2019): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2017): This figures denotes the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2016): This figures denotes the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel
Comments:
These are personnel-deployment figures denoting the number of full-time equivalent employees not exercising judicial office. Personnel-deployment figures are not collected according to reference date. Instead, an annual average is calculated over four quarters. There are no absolute figures for the number of persons making up this staff. An employee working full hours is counted as a full-time equivalent (i.e. 1). An employee working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for an employee working half the usual number of hours). Figures for the federal courts are not included.

Q052 (2014): The 2013 and 2014 data are the same due to the impossibility to obtain data for 2014. The trend observed since 2010 reveals stable figures.
Q052-1 (2023): While the staff-assignment statistic allocates judges to instances, non-judge staff is not allocated to instances.

Q052-1 (2022): While the staff-assignment statistic statistic allocates judges to instances, non-judge staff is not allocated to instances.
Q052-1 (2021): Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances in the staff-assignment statistics of the Länder.
Q052-1 (2020): Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances in the staff-assignment statistics of the Länder.
Q052-1 (2018): Differentiating non-judge staff at first and second instance level based on their gender is not possible since the ordinary court system in Germany consists of three instances (local courts, regional courts and higher regional courts). At the same time, regional courts function as a court of appeal on fact and law but can also hear cases at first instance. Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances.

Q055 (General Comment): The information relates to the number of job shares for public prosecutors. The information on the job shares count a public prosecutor working full-time as 1. A public prosecutor working part-time is counted as the fraction of 1 which corresponds to the proportion of his/her working hours to full-time (e.g. 0.5 for a public prosecutor working half the usual number of hours).

Q055 (2023): 1.: Data is taken from the court staff statistic of the federal states and represents the number of public prosecutors (FTE) at the regional courts as of 31. December 2023
2. Data is taken from the court staff statistic of the federal states and represents the number of public prosecutors (FTE) at the higher regional courts as of 31. December 2023
3. Data is taken from the biannual juducial statistic and represents number of public prosecutors (FTE) at the Federal Court of Justice as of 31. December 2022

Q055 (2022): 1.: Data is taken from the court staff statistic of the federal states and represents the number of public prosecutors (FTE) at the local and regional courts as of 31. December 2022
2. Data is taken from the court staff statistic of the federal states and represents the number of public prosecutors (FTE) at the higher regional courts as of 31. December 2022
3. Data ist taken from the court staff statistic and represents number of public prosecutors (FTE) at the Federal Court of Justice.

Q055 (2021): Figures represent full-time equivalents as of 31. December 2021
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
It should be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q055 (2020): Figures represent full-time equivalents as of 31. December 2020
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
It should be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q055 (2016): Figures indicate the number of full-time equivalent staff (not the number of individuals). A prosecutor working full hours is counted as a full-time equivalent (i.e. 1). A prosecutor working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a prosecutor working half the usual number of hours).

Q056 (General Comment): The total number of heads of the public prosecution offices is at least the number of Regional Courts (115) plus the number of Higher Regional Courts (24) at which the chief public prosecution offices are located.

Q056 (2023): The figures were calculated based on the number of public prosecution offices (115 public prosecution offices at the Regional Courts, 24 prosecutor general's offices at the Higher Regional Courts, 1 Federal Prosecutor General`s office at the Federal Court of Justice). Generally, each public prosecution office has one head. Nevertheless, this is merely an approximated value, especially since some posts may be vacant. The federal states have reported a total of 136 heads of prosecution offices. Reports on their allocation to gender and to the first and second instance are not yet conclusive.

Q056 (2022): There are no statistics specifically on the number of the heads of public prosecution offices. The figures were calulated based on the number of public prosecution offices (115 public prosecution offices at the Regional Courts, 24 prosecutor general's offices at the Higher Regional Courts, 1 Federal Prosecutor General`s office at the Federal Court of Justice). Generally, each public prosecution office has one head but there might be cases in which two persons working in part time share the position or in which one person (temporarily) is the head of two public prosecution offices.

Q056 (2020): There are no statistics specifically on the number of the heads of public prosecution offices. The figures were calulated based on the number of public prosecution offices (115 public prosecution offices at the Regional Courts, 24 prosecutor general's offices at the Higher Regional Courts, 1 Federal Prosecutor General`s office at the Federal Court of Justice). Generally, each public prosecution office has one head but there might be cases in which two persons working in part time share the position or in which one person (temporarily) is the head of two public prosecution offices.

Q056 (2018): There is no evidence of how many heads of prosecutors there are.
However, since the structure of the public prosecutor's offices (public prosecutor's offices, Attorney General's Office and General
Prosecutor's Office) is the same as that of the courts (District Court, Higher Regional Court, Federal Supreme Court), there are at least as many senior prosecutors as there are courts. The total number of heads of the public prosecution offices is at least the number of Regional Courts plus the number of Higher Regional Courts at which the chief public prosecution offices are located.

Q056 (2016): There is no evidence of how many heads of prosecutors there are. However, since the structure of the public prosecutor's offices (public prosecutor's offices, Attorney General's Office and General Prosecutor's Office) is the same as that of the courts (District Court, Higher Regional Court, Federal Supreme Court), there are at least as many senior prosecutors as there are courts. The total number of heads of the public prosecution offices is at least the number of Regional Courts (116) plus the number of Higher Regional Courts (24) at which the chief public prosecution offices are located.These are currently 140.

Q057 (General Comment): Section 142 of the Courts Constitution Act (GVG) provides for the function of an official of the public prosecution office with a right of audience before the local courts. In Germany, an official of the public prosecution office is a civil servant in a special career of the higher judicial service who performs certain tasks of a public prosecutor. In principle, they can perform prosecutorial duties before local courts without restriction. However, the federal states have enacted orders on the organisation and operation of the public prosecutor's offices. These orders regularly limit the activities of the officials of the public prosecution office to an enumerative catalogue of offences to be tried before the criminal judge. Officials of the public prosecution office cannot perform prosecutorial duties before regional, higher regional or federal courts. In addition, section 142 of the Courts Constitution Act (GVG) provides that trainee jurists may be entrusted with the performance of prosecutorial duties. These trainee jurists are persons who have completed their law studies with the first state examination and are in a two-year preparatory service, the completion of which is intended to qualify them for the judicial office. Within the scope of the assignment of duties, the trainee jurist has the same procedural powers as an official of the public prosecution office.

Q057 (2023): Please refer to the general comment

Q057 (2016): The number cited concerns exclusively associate public prosecutors at a local court (Amtsanwälte). This figure as well reflects job shares (not a number of heads). Besides these associate public prosecutors, there are trainee jurists, civil parties to criminal proceedings, and revenue authorities. However, their number is not known (NA) and therefore was not included in the answer to question 57.
Officials of the public prosecution office:
The office of the public prosecution office at the Local Courts can also be exercised by officials of the public prosecution office with a right of audience before the local courts (section 142 (2) of the Courts Constitution Act). The jurisdiction of the officials of the public prosecution office does not encompass preparing public charges in local court proceedings in criminal matters falling under the jurisdiction of courts other than the local courts. In accordance with the Order regarding the Organisation and Service Operations of the Public Prosecution Offices (Anordnung über Organisation und Dienstbetrieb der Staatsanwaltschaft, OrgStA) issued by some Land administrations of justice, officials of the public prosecution office are only assigned criminal matters in which the criminal court judge rules, and then only the criminal matters designated in a list. Trainee jurists:
Responsibility may be assigned to trainee jurists for discharging the duties of an official of the public prosecution office with a right of audience before the local courts and, in an individual case, for discharging the duties of a public prosecutor under the latter’s supervision (section 142 (3) of the Courts Constitution Act).
Civil party to criminal proceedings:
Under certain preconditions, some criminal offences can be prosecuted by aggrieved per-sons by means of a private charge without needing to first call on the public prosecution office. A private charge can also be filed by someone who is entitled to file a request to prosecute in addition to o

r in place of the aggrieved person.
Revenue authorities:
Tasks comparable to those of the public prosecution office are performed by the revenue authorities in the fiscal criminal proceedings: If the revenue authority conducts the investiga-tion independently in accordance with section 386 (2) of the Fiscal Code (Abgabenordnung, AO), it has the same rights and obligations as the public prosecutor's office has in an investigation (section 399 (1) of the Fiscal Code).

Q060 (2023): Figures include officials of the public prosecution office referred to in question 57.

Q060 (2022): Figures include official solicitors ("Amtsanwälte") referred to in question 57.

Q060 (2021): This figure includes:
- The number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte"), the staff at the public prosecution offices and associate prosecutors' offices based at the Regional Courts as well as the staff at the public prosecution offices based at the Higher Regional Courts (full-time equivalent staff as of 31. December 2021)
- The staff (222 in total, 140 female) at the Office of the Federal Prosecutor General (headcount as of 31. December 2021).

Q060 (2020): This figure includes:
- The number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte" – see question 57), the staff at the public prosecution offices and associate prosecutors' offices based at the Regional Courts as well as the staff at the public prosecution offices based at the Higher Regional Courts (full-time equivalent staff as of 31. December 2020)
- The staff (207 in total, 135 female) at the Office of the Federal Prosecutor General (headcount as of 31. December 2020).

Q060 (2018): This figure indicates the number of full-time equivalent staff (not the number of individuals).
- It includes the number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the
Local Courts – in German: "Amtsanwälte" – see question 57).
- It covers the public prosecution offices and associate prosecutors' offices based at the Regional Courts (1st instance), the public prosecution offices based at the Higher Regional Courts (2nd instance), and the Office of the Federal Prosecutor General (in this case:
number of individuals).

Q060 (2016): This figure indicates the number of full-time equivalent staff (not the number of individuals).
- It includes the number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte" – see question 57).
- It covers the public prosecution offices and associate prosecutors' offices based at the Regional Courts (1st instance), the public prosecution offices based at the Higher Regional Courts (2nd instance), and the Office of the Federal Prosecutor General (in this case: number of individuals).

Q060 (2014): According to 2014 data, the indicated figure reflects job shares (not a number of heads). The data submitted relate to the cut-off date of 31 December 2013. No figures are available that are more up-to-date. The number refers to the staff of the public prosecutor's offices and the offices of associate public prosecutors at the local courts (courts of first instance), of the public prosecutor's offices at the higher regional courts (courts of second instance), and of the office of the federal prosecutor (Public Prosecutor General at the Federal Court of Justice; in the latter case, the figure reflects the number of heads).

Q132 (General Comment): The salaries of judges and public prosecutors are determined by remuneration laws ("Besoldungsgesetze") which exist in each federal state as well as on the federal level. These laws define the remuneration based on different pay-groups, pay-grades and experience levels. Judges and public prosecutors belong to pay-group "R" that has several pay-grades ("R1", "R2", "R3"...). The allocation to the pay-grades depends on the kind of court, position at the court and size of the court. The number of available pay-grades and the details of allocation differ among the remuneration laws. In simplified terms, judges at local courts, regional courts, labour courts, social courts and administrative courts are allocated to pay-grade "R1" according to the remuneration laws of the federal states. Judges at higher regional courts, regional labour courts, regional social courts, regional administrative courts and finance courts as well as judges with an outstanding position (e.g. director, presiding judge) at the courts mentioned for pay-grade "R1" are allocated to pay-grade "R2" according to the remuneration laws of the federal states. Higher pay-grades according to the remuneration laws of the federal states are reserved for judges in outstanding positions (e.g. presidents, presiding judges). Pay-grades R1 and R2 have several experience levels. Generally, judges will climb to the next experience level after a period of two years from the beginning of their career and then climb further every two or three years (details may differ among the federal states and also with regard to the Federal Courts). The Federal Remuneration Law applies to judges and public prosecutors at the federal courts. With regard to the Federal Remuneration Law, judges at the Federal Patent Court and Military Disciplinary Courts are allocated to pay-grade "R2". Judges at the highest federal courts (Federal Court of Justice, Federal Labour Court, Federal Social Court, Federal Administrative Court, Federal Finan

ce Court) are allocated to pay-grade "R6", presiding judges to pay-grade “R8”. Federal Public Prosecutors at the Federal Court of Justice are allocated to pay-grade “R6”.

Q132 (2023): First instance judge or public prosecutor at the beginning of their career:
Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the federal states. The average was calculated unweighted. The monthly base-salaries of the federal states were added up and divided by the number of federal states, regardless of how many judges and prosecutors with the respective pay-grades work in a federal state (number unknown). Gross base-salaries range from approx. 52 737 to 58 298 EUR per year.
Judge of the Supreme Court or Highest Appellate Court:
Data represents the base-salary of presiding judges at the Federal Court of Justice, Federal Administrative Court, Federal Labour Court, Federal Social Court and Federal Finance Court according to the Federal Remuneration Law (“Bundesbesoldungsgesetz”). This is the highest base-salary that a judge can achieve (excluding the court presidents and judges at the Federal Constitutional Court).
Public Prosecutor of the Supreme Court or Highest Appellate Court:
Data represents the base-salary of the Federal Public Prosecutors at the Federal Court of Justice according to the Federal Remuneration Law (“Bundesbesoldungsgesetz”). This is the highest base-salary that a public prosecutor can achieve (excluding the Federal Prosecutor General).
Judges and public prosecutors are entitled to additional payments depending on 1) their individual familial situation (married/partnership, children); 2) their position and function at the court (eg. judges with administrative tasks)
Calculations were made on the following basis:
1) judge/public prosecutor at the beginning of their career: pay-grade "R1" (remuneration laws of the federal states) , lowest level of experience, unmarried, no children, no special tasks
2) judges at the supreme courts: pay-grade "R8" (Federal Remuneration Law), unmarried, no children, no special tasks.
3) public prosecutors at the supreme court: pay-grade “

R6” (Federal Remuneration Law), unmarried, no children, no special tasks

Q132 (2022): First instance judge or public prosecutor at the beginning of their career:
Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the federal states. The average was calculated unweighted. The monthly base-salaries of the federal states were added up and divided by the number of federal states, regardless of how many judges and prosecutors with the respective pay-grades work in a federal state (number unknown).
Judge of the Supreme Court or Highest Appellate Court:
The calculation method was changed in comparison to previous years, causing high discrepancies. Data represents the base-salary of presiding judges at the Federal Court of Justice, Federal Administrative Court, Federal Labour Court, Federal Social Court and Federal Finance Court according to the Federal Remuneration Law ("Bundesbesoldungsgesetz"). This is the highest base-salary that a judge can achieve (excluding the court presidents and judges at the Federal Constitutional Court).
Public Prosecutor of the Supreme Court or Highest Appellate Court:
The calculation method was changed in comparison to previous years, causing high discrepancies Data represents the base-salary of the Federal Public Prosecutors at the Federal Court of Justice according to the Federal Remuneration Law ("Bundesbesoldungsgesetz"). This is the highest base-salary that a public prosecutor can achieve (excluding the Federal Prosecutor General).
Judges and public prosecutors are entitled to additional payments depending on 1) their individual familial situation (married/partnership, children); 2) their position and function at the court (eg. judges with administrative tasks)
Calculations were made on the following basis:
1) judge/public prosecutor at the beginning of their career: pay-grade "R1" (remuneration laws of the federal states) , lowest level of experience, unmarried, no children, no special tasks
2) judges at the supreme courts: pay-grade "R8" (Fed

eral Remuneration Law), unmarried, no children, no special tasks.
3) public prosecutors at the supreme court: pay-grade "R6" (Federal Remuneration Law), unmarried, no children, no special tasks

Q132 (2021): Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the Länder. Judges and public prosecutors may be entitled to additional payments depending on -
their individual familial situation (married/partnership, children)
- position and function at the court (eg. judges with administrative tasks)
The conditions and amount of any additional payments are determined by the remuneration laws of the Länder.

Q132 (2020): Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the Länder. Judges and public prosecutors may be entitled to additional payments depending on -
their individual familial situation (married/partnership, children)
- position and function at the court (eg. judges with administrative tasks)
The conditions and amount of any additional payments are determined by the remuneration laws of the Länder.

Q132 (2016): The salaries calculated were based on the following assumptions:
Outset of the career (judge / public prosecutor): remuneration pursuant to R1, salary bracket 1, single, no children
The average was formed as a simple average of the Länder, without weighting the numbers based on the number of judges active in them, since the corresponding data are not known. The figure given as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.
No Information on annual net salary is available on the Basis of the personal circumstances of judges and public prosecutors.

Q132 (2014): The salaries calculated for 2014 were based on the following assumptions: outset of the career (judge/public prosecutor): remuneration pursuant to R1, salary bracket 1, single, no children. The figure given as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.

Q146 (2023): number of lawyers as of 1 January 2024

Q147 (General Comment): All lawyers in Germany are empowered to plead before court. No distinction is made between different groups of lawyers in Germany, such as between solicitors and barristers. The stated within question 146 include in-house lawyers according to section 46 para. 2 of the Federal Code for Lawyers (Bundesrechtsanwaltsordnung – BRAO). These are persons, who exercise their profession as salaried employees of persons or companies other than lawyers or patent attorneys or in a company for the joint practice of law or patent law. They shall be deemed to be practising as a lawyer if they are working as a lawyer for their employer under an employment agreement. The conditions to be met with regard to the requirement “working as a lawyer” are set out in section 46 para. 3. Compared to lawyers, their powers to provide for legal advice and representation in court are restricted according to section 46 para. 5 (restriction to the employer’s legal affairs) and according to section 46c para. 2 BRAO. Like lawyers, in-house lawyers have to be admitted to the legal profession by the competent regional bar association. There are 27 789 in-house lawyers admitted to the legal profession in Germany. In addition to lawyers, certain other individuals may also appear in court as legal advisers but there are no statistical data on these individuals.

Q147 (2023): please refer to the general comment

Q147 (2022): see General Comment

Q147 (2021): See the general comments

Q147 (2020): See the general comments

Q147 (2019): See the general comments

Greece

Q004 (General Comment): The survey based on which data on average national salary are established is conducted on a four-year basis. The most recent data are for 2022 and they became available at the end of 2024.

Q004 (2023): The most recently available data are 2022 data.
According to the Structure and Distribution of Earnings Survey for 2022, the average annual gross earnings are as follows: Total/Avg. Male: 21 947 Female: 17 361. The CEPEJ uses as an estimation the average value of these two figures.
https://www.statistics.gr/el/statistics/-/publication/SJO47/-

Q004 (2022): Our service has the data of the structure and distribution of Remuneration Survey in enterprises on the structure of
remuneration of employees(having a dependent employment relationship) in enterprises by Sector (B-S branches), excluding X (Public
Administration and Defense, compulsory Social Security) based on the NACE Rev. 2. The survey is conducted on a four-year basis.
Therefore, the latest available figures are of the year 2018. The results o of the survey will be published in late 2024 to early 2025.

Q004 (2021): Our service has the data of the structure and distribution of Remuneration Survey in enterprises on the structure of remuneration of employees(having a dependent employment relationship) in enterprises by Sector (B-S branches), excluding X (Public Administration and Defense, compulsory Social Security) based on the NACE Rev. 2. The survey is conducted on a four-year basis. Therefore, the latest available figures are of the year 2018. The results of the of the survey will be published in late 2024 to early 2025.

Q004 (2020): The data come from the Survey of the Structure and Distribution of Remuneration in Greece for the year 2018, from which the sector X is excluded (Public Administration and Defense, Compulsory Social Security) based on the classification of activities NACE Rev. 2 and relate to the average annual gross earnings in euros. Data is available by gender.The only one available at the moment.
Men 19 234 Average Women 15 947 Average

Q004 (2019): The competent authority for this data (see Hellenic Statistical Authority) provides the relevant numbers. The competent authority did not provide any numbers for this section.

Q004 (2016): The data provided correspond to those of 2014, since the statistics on this point are carried out every four years. Therefore, they are not absolutely accurate.

Q046 (General Comment): Starting from 2021, the judges of the Court of Audit are included in the table as third instance judges alongside with judges of the Supreme court (Areios Pagos) and the Council of State.
First instance judges - judges of the 56 first instance courts of general jurisdiction and the 30 administrative courts
Second instance judges - judges of the 19 Courts of appeal and the 9 Administrative courts of appeal

Q046 (2023): Judges of local courts and district criminal courts are included in the number of first instance judges.

Q046 (2022): The answer came after the cooperation of the Directorate for the organization and operation of Justice with Juststat. The discrepancy has been analyzed to last year questionnaire.

Q046 (2021): The answer came after the cooperation of the Directorate for the organization and operation of Justice with Juststat. The increase in the number of Supreme Court professional judges is explained by the fact that, the judges of the Court of auditors, who are all supreme, had not been previously counted, but now they are included.

Q046 (2020): Gender statistics are not kept. -Number of first instance professional judges :593 first-instance administrative judges,1167 first instance judges,916 judges of local courts and District Criminal Courts.
- Number of second instance (court of appeal) professional judges:336 second-instance administrative judges,598 second instance judges
- Number of Supreme Court professional judges:170 administrative judges of Council of State,5 of the General Committee of the Ordinary and Administrative Courts,76 judges of Areios Pagos(Supreme Court),
The methodology of replying changed. Differences in numbers with previous years cannot be explained as we don't have enough information about previous data.

Q046 (2018): There is not a specific reason for the discrepancy of point 3. The number 243 is a result of the subtraction of points 1 and 2 from the total number of professional judges (1+2+3), just as last year.
Q046 (2016): Previous data concerning the number of second instance judges did not, inadvertently, include all the ranks for penal, political and administrative justice. Accordingly, this year the number is higher and explains also the variation in the total.
It should be mentioned that the number of judges at the courts of Peace, which on 31/12/2016 was 880, is not taken into consideration since they have a separate procedure entering the judiciary and they are a separate category within it.

Q046 (2014): The decrease in the number of second instance judges between 2013 and 2014 is due to the fact that administrative judges are not counted in this category for 2014.
Q046 (2013): In 2013, justices of peace are included, while Court of Auditors' judges are not considered in the total.

Q046-2 (General Comment): Starting from 2024, judges of the Court of Audit, a specialised administrative court having the statute of a Supreme court, are categorised as third instance administrative judges.
Q046-2 (2023): Same judges (2713)intervene in both civil and criminal matters in the Greek judicial system.

Q046-2 (2022): There are two categories of judges, those dealing with criminal and civil justice and administrative judges. There is no data on the separation of cases.For the Council of State(Supreme Administrative Court) in administrative cases the judges are 166.
Q046-2 (2020): There are two categories of judges, those dealing with criminal and civil justice and administrative judges. There is no data on the separation of cases
Q052 (2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration
Q052 (2016): Previous data did not, inadvertently, exclude staff working for the public prosecution services.

Q052-1 (2022): The explanation was given in last year's questionnaire.

Q052-1 (2021): At the highest level there is the Court of auditors, whose judicial officials have been included above, the total number of them is 637 and consists of 219 men and 418 women. The above data were provided by the Directorate of judicial officials with the cooperation of Juststat of the Ministry.
Q052-1 (2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration
Q055 (2021): The above data are given by the Directorate of organization and operation of Justice with the cooperation of JUSTSTAT.
Q055 (2020): Positions by law have increased.Gender data are not kept.

Q056 (2020): Gender data are not kept.

Q056 (2016): The previous data given referred to the heads of prosecution offices, which in Greece is a title (rank) and not to those who are actually in charge of the organization and the management of a Prosecution Office. This year's data are the correct ones.
Q056 (2014): The 2014 data concerns all prosecutors that possess the rank of "prosecutors", and not only those who are in charge of each prosecutor's office. The total number of prosecutors in charge of each prosecutor's office (heads) is 83.

Q057 (General Comment): Deputy Prosecutors and members of the prosecution(is the first degree after graduation from the National School of Judges) have related duties to prosecutors.
Q060 (2022): The majority is the category of Secretaries , the other categories are court bailiffs, typists, It clerks and two public prosecutor's offices have one security clerk each.
Q060 (2021): The modified response came after the cooperation of the Directorate of judicial officials with Juststat.

Q060 (2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration.
Q132 (2016): Data on net annual salaries of judges and prosecutors is not available. In fact, after subtracting from the gross salary the insurance contribution, the amount is still subject to further taxation (22%-35%), depending on the family status of each judge and prosecutor.

Q133 (2021): judges, except salary, receive two allowances (Article 30 of N.3205/2003), the faster processing allowance and attendance costs. These are not taxed.Article 6, paragraph 6 subparagraph 4, of the decision numbered A.1275 (B ´6375/31.12.2021) indicating what is not included in the certificates of remuneration(page 81063 of the decision).However, if we are to be legally precise, the correct answer to the Cepej question is no. It is not a reduced taxation,but for sums granted, as to other classes of wage-earners, and they face expenses to which they are subjected for the exercise of their work.

Q146 (2019): The number is indicative and constantly changing, in the absence of restrictions on the number of positions. Source: Plenary Session of the Presidents of Hellenic Bar Associations

Q146 (2018): The number is indicative and constantly changing, in the absence of restrictions on the number of positions. Source: Plenary Session of the Presidents of Hellenic Bar Associations

Q146 (2013): The 2013 data corresponds to the total number in the end of December 2013.

Q147 (2022): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q147 (2021): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q147 (2020): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q148 (2019): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Q148 (2018): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Q148 (2016): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Hungary

Q004 (2023): In comparison to the previous year, the average gross annual salary increased due to the raising of the minimum wage, and of course the forint exchange rate change.
The above data is based on the labour market data (614,426 HUF/month) published on the website of the Hungarian Central Statistical Office (https://www.ksh.hu/stadat_files/mun/en/mun0001.html) and the average EUR currency rate (381.95 HUF/EUR) published on the website of the National Bank of Hungary (http://mnbkozeparfolyam.hu/arfolyam-2023.html). The relevant data of the Hungarian Central Statistical Office is currently still in “preliminary” status, therefore it cannot be considered final. It is unknown when the preliminary data will be revised and finalised.

Q004 (2022): In comparison to the previous year, the average gross annual salary increased due to the general development of Hungarian
economy, to the increase in our GDP, as well as to the raising of the minimum wage.
See the most important annual data on the labour market on the website of the Hungarian Central Statistical Office: https://www.ksh.hu/stadat_files/mun/en/mun0001.html

Q004 (2021): In comparison to the previous year, the average gross annual salary increased due to the general development of Hungarian economy, to the increase in our GDP, as well as to the raising of the minimum wage.
See the most important annual data on the labour market on the website of the Hungarian Central Statistical Office: https://www.ksh.hu/stadat_files/mun/en/mun0001.html

Q046 (General Comment): Since 2012 and the establishment of the National Office for the Judiciary, the data collection methodology is the same. Accordingly, the number of first instance professional judges includes judges of the District Courts. As second instance judges are counted judges of the Regional Courts and the Regional Courts of Appeal. As concerns the Regional Courts, the distribution of first and second instance cases is based on the bylaws which are renewed every year by the president of each court after consultation with the judicial council and the professional department of the court. The number of Supreme Court judges is indicated in item 46.3.

Q046 (2019): There are additional 54 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration) and to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.
Q046 (2018): There are additional 48 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration) and to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.

Q046 (2017): There are additional 34 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration), and 4 judges assigned to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases during their assignment.
Q046 (2016): There are additional 35 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration), and 9 judges assigned to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.
Q046 (2014): In 2014, 26 judges were assigned to the National Office for the Judiciary and 7 judges were assigned to the Ministry of Justice. These judges do not hear cases when carrying out their specific missions within the NOJ and the Ministry of Justice.
Q046 (2013): The number of Supreme Court female judges decreased between 2010 and 2012, while the number of Supreme Court male judges increased between 2012 and 2013. There is no specific reason in this respect, as the vacant positions are filled through an open application process, where the gender of the applicants is not taken into consideration in any way.

Q052 (General Comment): • Court secretaries („bírósági titkár") are employees of the court that are similar to Rechtspfleger. They are lawyers, who after acquiring a degree at a law faculty have made the bar exam (which requires at least 3 years professional practice). They are enabled to perform duties of judges in cases specifically defined by law.
According to the Constitution when a court secretary is dealing with a case he/she has the same independence as a judge. In criminal cases they can make out of trial decisions (e.g. order an expert to be included in the case), or they can hear witnesses on request of another court. This practically means they assist the judges in pre-trial phase of the case. In misdemeanour cases they adjudicate the case - this is an area of law in which mostly court secretaries deal with cases of first instance. In civil and labour cases they can make any decision that can be made without hearing the case. This practically means they assist the judges in pre-trial phase of the case. In administrative non-litigious cases they can make any decision that can be made without hearing the case. In company registry cases they can make every decision, as well in insolvency cases (with some exceptions).
• From 2012, the category "non-judge staff assisting judges" includes only staff directly assisting judges. • Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2022): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2021): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2020): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2018): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2017): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2016): Other non-judge staff includes Staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2015): For the gender ratio we are only able to provide the total figures.

Other non-judge staff (5) includes Staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).
Q052 (2014): In 2014, the category "other" includes "staff in charge of different administrative tasks", "technical staff" and some of those judicial employees who in 2012 were counted as "non-judge staff whose task is to assist judges".

Q052 (2013): The methodology of presentation of data used in 2013 is different. Some of those judicial employees who in 2012 were included in the category "non-judge staff whose task is to assist judges" were taken into account in the category "other". The latter includes in 2013 the total number of "staff in charge of different administrative tasks" and "technical staff" because these numbers could not be separated within the national database.

Q055 (2023): On 31 December 2023 2 prosecutors (1 male and 1 female) were working temporarily in the Ministry of Justice. These two persons were also included in the total number of prosecutors, but they were not taken into consideration when looking at the number of prosecutors working at each/different level.
All prosecutors are appointed to work full-time, but it may occur that a prosecutor temporarily works part-time, for child care reasons for example.
As far as prosecutors at first instance level are concerned, the table contains the number of prosecutors working for district and district level prosecution offices together with the number of prosecutors working for chief prosecution offices. Out of this number, the number of prosecutors working at chief prosecution offices is 544 (239 men and 305 women), the number of prosecutors working for district (district level) prosecution offices is 1,166 (408 men and 758 women).
As to the number of prosecutors at second instance, the table includes only the number of prosecutors working at the appellate chief prosecution offices.
The reason for this is that no exact answer can be given to the question. In the Prosecution Service of Hungary, prosecutors working at district and district-level prosecution offices only proceed with first instance cases. Prosecutors of chief prosecution offices working at county (or county-level) prosecution offices handle first instance cases which fall into the jurisdiction of regional/county courts, but part of the prosecutors of chief prosecution offices handle cases at second instance or at second instance, as well in cases initiated at first instance by district or district prosecution offices. Our personnel database, however, does not contain information on the number of such prosecutors of chief prosecution offices.
Prosecutors of the appellate chief prosecution offices handle second instance cases or, in specific circumstances, they proceed at third instance.
Discrepancy explanation:
The explan

ation for the increase in the number of female prosecutors serving in the Chief Prosecution Offices of Appeal, which can be considered significant in percentage terms, is the overall low number of prosecutors in the Chief Prosecution Offices of Appeal, with a small increase in numbers resulting in a large change in percentage terms. The increase in the number of staff was justified by the evolution of the workload in the relevant Chief Prosecution Offices of Appeal, as well as by the need to recruit new colleagues in the Chief Prosecution Offices of Appeal due to retirements and transfers. The proportion of women among prosecutors serving at the Prosecution Service of Hungary is already high, 61.3% in 2023. In these circumstances, there is no particular reason why more women were successful in applying for or being seconded to posts as prosecutors in the Chief Prosecution Offices of Appeal in 2023.

Q055 (2022): On 31 December 2022 2 prosecutors were working temporarily in the Ministry of Justice. These two persons were also included in the total number of prosecutors, but they were not taken into consideration when looking at the number of prosecutors working at each/different level. One of the two public prosecutors assigned to the Ministry of Justice is male and the other one is female. All prosecutors are appointed to work full-time, but it may occur that a prosecutor temporarily works part-time, for child care reasons for example. As far as prosecutors at first instance level are concerned, the table contains the number of prosecutors working for district and district level prosecution offices together with the number of prosecutors working for chief prosecution offices. Out of this number, the number of prosecutors working at chief prosecution offices is 534 (236 men and 298 women), the number of prosecutors working for district (district level) prosecution offices is 1203 (421 men and 782 women).
As to the number of prosecutors at second instance, the table includes the number of prosecutors working at the appellate chief prosecution offices. The reason for this is that no exact answer can be given to the question. In the Hungarian Prosecution Service, prosecutors working at district and district-level prosecution offices only proceed with first instance cases. Prosecutors of chief prosecution offices working at county (or county level) prosecution offices handle first instance cases which fall into the jurisdiction of regional/county courts, but part of the prosecutors of chief prosecution offices handle cases at second instance or at second instance as well in cases initiated at first instance by district or district prosecution offices. Our personnel database, however, does not contain information on the latter group of cases. Prosecutors of the appellate chief prosecution offices handle second instance cases or, in specific circumstances, they proceed at third in

stance. I wish to inform you that prior to 2022 we only indicated among the data the number of prosecutors of dictrict prosecution offices at first instance and the number of prosecutors of chief prosecution offices and appellate chief prosecution offices at second instance. According to this method of calculation, the current data (for 31 December 2022) include the following:
Total number of prosecutors (1 + 2 + 3):
Total: 1874
Males: 727
Females: 1147
1. Number of prosecutors at first instance level:
Total: 1203
Males: 421
Females: 782
2. Number of prosecutors at second instance (court of appeal) level:
Total: 562
Males: 251
Females: 311
3. Number of prosecutors at Supreme Court level:
Total: 107
Males: 54
Females: 53

Q055 (2021): On 31 December 2021, two prosecutors were serving in the Ministry of Justice, on a temporary basis. They are included in the total number of prosecutors; however, they are not taken into account when giving the number of prosecutors serving at different instances (court levels). All prosecutors are appointed to a full-time job; however, it occurs that some prosecutors perform part-time service on a temporary basis for various reasons, such as raising children.
The 'number of prosecutors at first instance level' is an aggregate of the number of prosecutors serving at district-level prosecution services and other prosecution services equivalent to that level, as well as the number of prosecutors serving at high prosecution services. A part of the prosecutors serving at high prosecution services proceed also at second instance (high court) level. The number of prosecutors serving at high prosecution services is 520 (226 males, 294 females), while the number of prosecutors serving at district-level prosecution services (other prosecution services equivalent to that level) is 1210 (439 males, 771 females).
The 'number of prosecutors at second instance (court of appeal) level' means the number of prosecutors serving at appellate prosecution services.

Q055 (2016): Another 9 prosecutors were temporarily serving in the Ministry of Justice. They are included in the total number of prosecutors, but we did not take them into account at each level.
Q056 (2023): The table contains the following heads/senior leaders of prosecution offices: the prosecutor general; prosecutors who are heads of departments at the Office of the Prosecutor General and prosecutors who are heads of autonomous divisions at the Office of the Prosecutor General (the latter two groups of employees consist of 14 persons who are exercising employer’s powers with respect to subordinate prosecutorial employees at the Office of the Prosecutor General); appellate chief prosecutors (where there was no appointed or acting appellate chief prosecutor, the head of division at the appellate chief prosecution office in charge of the appellate chief prosecution office); chief prosecutors; prosecutors who are heads of district (or district-level) prosecution offices (in a district prosecution office, there was temporarily no appointed or acting head of district prosecution office, therefore this structural unit was headed by the deputy head prosecutor).
Within the data relating to the Office of the Prosecutor General, the heads of structural units with functional responsibilities (e.g. IT Department, Autonomous Administrative Division) are also indicated.

Q056 (2022): The table contains the following heads/senior leaders of prosecution offices:
the Prosecutor General; appellate chief prosecutors (if there is no appellate chief prosecutor appointed or assigned, then the head of division at the appellate chief prosecution office who leads the appellate chief prosecution office); chief prosecutors (if there is no chief prosecutor appointed or assigned, then the deputy chief prosecutor who leads the chief prosecution office); prosecutors who are heads of district prosecution offices (if there is no leading prosecutor appointed or assigned, then the deputy head of the district prosecution office who leads the organizational unit).
The heads of organizational units with operational responsibilities (such as Information Technology Department and Independent Administrative Unit) are also included in the data of the Office of the Prosecutor General.
As previously indicated, prior to 2022, only the number of public prosecutors at district prosecution offices who handle first-instance cases and the number of public prosecutors at chief prosecution offices and appellate chief prosecution offices who handle second-instance cases were included in the database. According to this calculation method, the data for prosecution leaders as of 31 December 2022 are as follows:
Total number of heads of prosecution offices (1 + 2 + 3 level of jurisdiction)
Total: 151
Males: 91
Females: 60
1. Number of heads of prosecution offices at first-instance level
Total: 124
Males: 70
Females: 54
2. Number of heads of prosecution offices at second-instance (courts of appeal) level
Total: 26
Males: 20
Females: 6
3. Number of heads of prosecution offices at Supreme Court level
Total: 1
Males: 1
Females: 0

Q056 (2013): The number of heads of prosecution offices corresponds to the number of courts of appeal (5) and the number of district courts intervening in second instance (21).
Q057 (2022): According to the Criminal Procedure Code a victim may act as a private prosecutor and a substitute private prosecutor in criminal proceedings, but private prosecutors and substitute private prosecutors are not part of the administration of justice.
Q060 (2023): The above data include junior prosecutors, trainee prosecutors, paralegals, prosecution officials, clerks and blue-collar employees.
Q060 (2022): The above data include junior prosecutors, trainee prosecutors, officers doing semi-prosecutorial tasks, officers, clerks and blue-collar employees.
Q132 (2023): Judges:
Compared to the 2022 data, the decrease in starting (beginning of the career) salary resulted from a change in the calculation method. In previous years, we gave the average salary of the appointed judges, which depends on the length of service and this year the hypothetical lowest salary available at the beginning of the career. The starting salary was calculated according to the above-mentioned calculation method (1 EUR = 382,78 HUF).
The highest salary received at the Supreme Court was defined without any leadership allowances, which is why it is less than the average salary was in the 2022 data.

Q132 (2022): During the career/career progression of prosecutors, salaries are determined as follows.
The prosecutor's salary consists of a basic salary and the supplement determined in the Prosecution Employment Status Act Based on Article 66 (2) of Act XC of 2021 on the Central Budget of Hungary for 2022 and pursuant to Article 59 (3) of Act CLXIV of 2011 on the Status and Career Path of the Prosecutor General, Prosecutors and other Prosecution Employees, the basic salary of a prosecutor in 2022 was HUF 566660.
The basic salary of the prosecutor shall be determined on the basis of the length of service calculated in accordance with this Act, multiplied by the salary base and the multiplying factors specified in this Act for each grade.
Prosecutors who do not yet have any service time upon their appointment or whose accepted service time upon their appointment does not exceed three years shall be classified into pay grade 1. Prosecutors shall proceed one pay grade up on the scale upon the completion of every three years of service time. The length of service shall be calculated from the date of appointment of the prosecutor. However, time spent as a prosecutor before the appointment in the prosecution service and in the judiciary, as well as the time spent in other legal employment or activities requiring a completed bar exam or requiring a completed bar exam according to the rules applicable by the person exercising the employer's rights upon authorization by law shall be taken into account as time included in the length of service.
According to the Prosecution Employment Status Act, the basic salary of a prosecutor is 1.25 times the salary base in grade 1 of the prosecutor's salary scale, and 2.10 times the salary base in grade 14, which is the highest grade.
Prosecutors shall be entitled to a position supplement monthly, the amount of which is
a) twenty per cent of the pay base in the case of prosecutors working in district prosecution offices (113332 HUF in 2022), b) forty

per cent of the pay base in the case of prosecutors working in chief prosecution offices (226664 HUF), c) seventy per cent of the pay base in the case of prosecutors working in appellate chief prosecution offices (396662 HUF), d) hundred and twenty per cent of the pay base in the case of prosecutors working in the Office of the Prosecutor General 679992 HUF).
In general, judges' salaries increase automatically with length of service after every 3 years. In addition, they receive a surplus allowance at all levels of jurisdiction (higher bonus on higher levels), and court executies also receive a management bonus. In addition, there are various allowances which may be granted to eligible judges (e.g. language allowance). From 1 January 2020, judges' salaries increased by an average of 32 percent. In 2021 by another 12 percent of the salary base and by a further 13 percent in 2022.

Q132 (2020): At its December 2019 session, the National Assembly passed a law increasing the salaries of judges by 32 percent and that of prosecutors by 21 percent.
Q132 (2018): The reason for the increase of judicial salaries is the increase of the base salary of judges by 15% in 2017-2018.

Q146 (General Comment): We would like to clarify that the above total figure includes attorneys, in-house counsels, registered legal advisors, junior attorneys, European community lawyers and foreign legal advisors.
In Hungary, those lawyers who work as employees of a company are called "in-house counsels". They have the right to represent their employers in any proceedings, the limitation is that they can only act on behalf of their employers and can't have any other clients. There is another category, "registered legal advisors", who carry out their work under the control of an in-house counsel and have not passed the bar exam yet. Such registered legal advisors have the same representation rights before the court as junior attorneys explained below.
Junior attorneys and registered legal advisors may represent the parties before the District Court only (including appeals and extraordinary revisions in such cases), where legal representation is not mandatory.
European community lawyers and foreign legal advisors do not have representation rights before court (however, the number of such lawyers is insignificant, for 2024 it was 74).
We would also like to note that the above total figure also contains those who are currently suspending their lawyer practice. The total number of active (non-suspended) attorneys, in-house legal counsels, registered legal advisors and junior attorneys is: 18,165.

Q146 (2023): As per the received question regarding our response to Q146 of the CEPEJ questionnaire (2023 data), we would like to clarify that the respective statistical register of the Hungarian Bar Association has changed recently, due to which the data on the separate numbers of female and male lawyers is no longer available to us. We have received data only for the total number of lawyers practicing in Hungary; hence, this is the reason why the number of female and male lawyers were marked with NA in our answer for the first time in contrast to previous years.

Q146 (2022): The number of lawyers in 2022 includes the number of legal advisors.

Q146 (2020): A new act on the attorneys (Act LXXXVIII of 2017) entered into force on 1 January 2018.
https://njt.hu/translated/doc/J2017T0078P_20180101_FIN.pdf

Q146 (2018): A new act on the attorneys (Act LXXXVIII of 2017) entered into force on 1 January 2018. https://njt.hu/translated/doc/J2017T0078P_20180101_FIN.pdf
Q146 (2017): A new act on the attorneys entered into force, as of January 1, 2018. The next year's report will reflect the changes.

Q146 (2016): A new act on the attorneys will enter into force, as of January 1, 2018. The next year's report will reflect the changes.

Q147 (General Comment): Legal advisors (jogtanácsos) facilitate the functioning of the organisation by which they are employed. They conduct legal representation within the organisation, provide legal advice and information; prepare applications, contracts and other documents; participate in organising legal work. As a general rule, legal advisors, in contrast to attorneys, discharge their duties (which are not as extensive as those of attorneys) as employees. Their compensation is based on the regulations concerning employment. Any person entered in the register maintained by the county court in Budapest can become a legal advisor. Besides, applicants must hold citizenship in one of the member States participating in the Agreement on the European Economic Area; have no criminal record; hold a university degree; have passed the Hungarian professional examination in law.

Q147 (2022): Types of lawyers in Hungary
In Hungary "attorneys" are those legal professionals who hold a degree in law and have passed the BAR exam and registered by and members of the local bar association. There is no distinction between Hungarian attorneys, such as solicitors and barristers in the UK, any Hungarian attorney can represent a client before the court. An attorney, however, may practise either as an individual attorney, or as a member of a law firm. In other words, he/she can't be an employee. Please see below the number of attorneys practicing in Hungary (i.e., excluding legal advisors, junior lawyers, EU lawyers):
Number of attorneys (i.e., figures excluding legal advisors)
Total: 11,615
Males: 6,440
Females: 5,175
Those lawyers who work as employees of a company are called "legal advisors" (i.e. in-house counsels). They have the right to represent their employers in any proceedings, the limitation is that they can only act on behalf of their employers and can't have any other clients. There is a special category of legal advisors (in-house counsels) who are members of the local bar association as "registered legal advisors".
Moreover, there are "employed attorneys" (whose employer is limited to a lawyer or law firm), European legal counsels (under the EU Directives as implemented by Hungarian legislation), and employed European legal counsels.
All different categories described above are subordinated to the profession of a lawyer and legal advisor.
Monopoly
Lawyers (attorneys), and to a certain extent registered and non-registered legal advisors are the only professionals who are entitled to represent an individual and/or legal entity in legal matters. So, from this point of view there is a monopoly, since no one else is allowed to fulfil the role of legal representative as a professional, for consideration.
There is no general requirement to have legal representation in court or administrative cases, this is only mandatory in certain proceedings, so from this

point of view there is no monopoly (please see the detailed list of the cases below, where legal representation is mandatory). Attorneys have a monopoly of representation of defendants in criminal cases during the whole length of criminal proceedings. Victims of criminal cases may also be represented by their family members.
In administrative proceedings, legal representation is not mandatory, and in general any person can represent a party who has the mandate to do so (but the limitation still applies that professionally only an attorney can represent parties in these proceedings too). Section 45 of the Code of Criminal Procedure (Act XC of 2017) prescribes the presence of a defence attorney in the following cases:
a) a criminal offence for which the law prescribes five or more years of imprisonment,
b) the accused is subject to a coercive measure affecting a person's personal freedom, or in another matter is subject to arrest, preliminary involuntary treatment in a mental institution, or is placed under imprisonment, custodial arrest or educational training;
c) the accused is deaf, mute, blind or – regardless of his/her legal capacity – mentally incompetent,
d) the accused does not know the Hungarian language or the language of the proceedings,
e) the accused is not able to personally defend himself/herself for other reasons,
f) the court, the public prosecutor's office or the investigating authority assigned a defence attorney upon the request of the defendant or due to considering it necessary for other reasons,
g) it is especially prescribed by law (e.g. in case of an accused minor).
According to the Code of Civil Procedure (Act CXXX of 2016), in the case of civil cases, there is compulsory legal representation in all types of cases with the exception of lawsuits where the District Courts are competent including the appeals and extraordinary revisions in such cases.

Q147 (2020): Legal advisors (jogtanácsos) facilitate the functioning of the organisation by which they are employed. They conduct legal representation within the organisation, provide legal advice and information; prepare applications, contracts and other documents; participate in organising legal work. As a general rule, legal advisors, in contrast to attorneys, discharge their duties (which are not as extensive as those of attorneys) as employees. Their compensation is based on the regulations concerning employment. Any person entered in the register maintained by the county court in Budapest can become a legal advisor. Besides, applicants must hold citizenship in one of the member States participating in the Agreement on the European Economic Area; have no criminal record; hold a university degree; have passed the Hungarian professional examination in law.

Q148 (2023): Types of lawyers in Hungary
Section 4 of the Act on Legal Practice determines comprehensively who is entitled to practise as a lawyer:
a) attorneys,
b) European community lawyers,
c) foreign legal advisors,
d) bar association legal counsel,
e) employed attorneys,
f) employed European community lawyers,
g) junior attorney and
h) legal advisors registered by the bar association.
In Hungary "attorneys" are those legal professionals who hold a degree in law and have passed the BAR exam and registered by and members of the local bar association. There is no distinction between Hungarian attorneys, such as solicitors and barristers in the UK, any Hungarian attorney can represent a client before the court. An attorney, however, may practise either as an individual attorney, or as a member of a law firm. In other words, he/she can't be an employee. Please see below the number of attorneys practicing in Hungary (i.e., excluding in-house counsels, junior lawyers, EU lawyers):
Number of attorneys (i.e., figures excluding in-house counsels)Total:13,348
Males: NA
Females: NA
Those lawyers who work as employees of a company are called “in-house counsels”. They have the right to represent their employers in any proceedings, the limitation is that they can only act on behalf of their employers and can't have any other clients. There is another category, “registered legal advisors”, who carry out their work under the control of an in-house counsel and have not passed the bar exam yet. Such registered legal advisors have the same representation rights before the court as junior attorneys explained below.
Moreover, there are "employed attorneys" (whose employer is limited to a lawyer or law firm), European legal counsels (under the EU Directives as implemented by Hungarian legislation), and employed European legal counsels.

Ireland

Q004 (2022): Year 2022 is the latest year for which data are available.

Q004 (2021): Year 2021 is the latest data available. The figure of €44,912.24 was taken from Q4 but it should be noted that the annual gross salary fluctuated during the course of 2021.
https://www.cso.ie/en/releaseandduplications/en/elcq/earningsandlabourcostsq42021final/2022premliminaryestimates.
According to preliminary estimates of the Earnings and Labour Costs Quarterly release, the average weekly earnings were €880.3 in Q1 2022, an increase of 2.3% from €860.19 one year earlier and an increase of 10.0% from the same period in 2020. This represents average earnings of those in employment in the Irish economy in Q1 2022, including those supported by the Employment Wage Subsidy (EWSS).
https://www.cso.ie/en/releaseandduplications/en/elcq/earningsandlabourcostsq42021final/2022premliminaryestimates.

Q004 (2020): Year 2019 is latest data available

Q004 (2019): Comments Taken from Earnings and Labour Costs Annual 2019 release of 26 June 2020
https://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2019/
Q004 (2018): Taken from Earnings and Labour Costs Annual 2018 release of 11 June 2019
https://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2018/

Q004 (2016): Average annual earnings increased by 1.1% to €36,919 in 2016, from €36,519 in 2015.
Taken from CSO release of 29 June 2017 - Earnings and Labour Costs Annual 2016. See link
http://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2016/

Q046 (2023): On 31 December 2023, there were 198 judicial posts, with two judicial vacancies, namely, one vacancy in the Supreme Court and one vacancy in the Circuit Court (a first instance court). Court Presidents work as judges and these numbers include Court Presidents of first instance, second instance and Supreme Court.

Q046 (2022): As of 31 December 2022, the number of male judges in the Court of Appeal had dropped from 8 to 6 in comparison to 2020 due to the elevation of two male judges from the Court of Appeal to the Supreme Court and the subsequent new appointment of two new Court of Appeal judges one of whom was male and the other female (-1 male judge of the Court of Appeal).
Q046 (2021): Figures as of 31/12/2021.
At that time there were 6 vacancies in total.
First Instance Courts – District Court, Circuit Court, High Court = total 3
Second Instance Court – Court of Appeal = total 1
Highest Instance Court – Supreme Court = total 1

Q046 (2020): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the circuit court and ordinary judges of the High Court - including Court Presidents.
An amendment was made in 2019 to the number of judges in the court of appeal due to workload of the court.

Q046 (2019): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents.
An amendment was made to the number of judges in the court of appeal due to workload of the court.

Q046 (2018): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents.

Q046 (2017): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents. As at 31 December 2017 there were three serving female Supreme Court judges.
Q046 (2016): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents. As regards the number of Supreme Court judges, the figures reflect a reduction in the actual number of judges compared to the number reported in the previous reporting cycle.
Q046 (2015): The discrepancy between the total figures and the figures for gender is explained by vacancies in the judiciary's establishment, as follows: Supreme Court: 1; High Court: 1; Circuit Court: 2.

First instance judges are judges of the High Court, Circuit Court and District Court. The High Court and Circuit Court also exercise appellate jurisdiction.

Numbers above include Court Presidents.

Q046 (2014): In 2014, data on 2nd instance judges is available, since the new Court of Appeal was established only in 2014.

Q046-2 (2023): In all courts, (First Instance, Second Instance and Supreme Court) judges are empowered to deal with all case types within their court jurisdiction. While in some courts, most notably the High Court and the Circuit Court, judges may be assigned to specific cases for a period, nonetheless, all judges can deal with all types of cases within their jurisdiction

Q046-2 (2022): In all courts, (First Instance, Second Instance and Supreme Court) judges are empowered to deal with all case types within their court jurisdiction. While in some courts, most notably the High Court and the Circuit Court, judges may be assigned to specific cases for a period, nonetheless, all judges can deal with all types of cases within their jurisdiction.

Q046-2 (2021): Judges can be assigned to both criminal and civil cases. Although in some jurisdictions, mainly the High Court and Circuit Court, Judges might specialise for a period (sometimes for a period of years) in criminal and civil matters. All Judges can administer all types of cases within their jurisdiction. Administrative cases are not a separate category in Ireland.

Q046-2 (2020): Judges deal with both criminal and civil and commercial proceedings. Number of Judges would be the same across all headings (except administrative as already explained) - Court Service
Q052 (General Comment): Staff numbers in the Irish Courts Service are computed on the basis of "Full-time equivalent" resources, requiring that staff numbers include decimal points, reflecting part-time, work-sharing and other reduced time working arrangements. As decimal points are not imputtable to this question in the data base, it has been necessary to round up or round down figures.
Q052 (2023): Other non-judge staff includes Service Officers, Tipstaff, Court Messengers 2. Non-judge (judicial) staff whose task is to assist the judges such as registrars (case preparation, assistance during the hearing, helping to draft the decisions) includes staff in Court offices, court going staff including Judicial Assistants and staff in Court Operational Directorates.
ICT staff for this cycle and for the 2022 cycle are included in 4. Technical Staff.

Q052 (2022): 2. Non-judge (judicial) staff whose task is to assist the judges such as registrars (case preparation, assistance during the hearing, helping to draft the decisions): In 2020 the following were counted: staff in Court offices, court going staff including Judicial Assistants and Tipstaff - District, Circuit & High Court including Judicial Assistant and Tipstaff, Court of Appeal including Judicial Assistant, Supreme Court Judicial Assist and Tipstaff. In 2022, Court Operational Directorates/Regional/Judicial Assistants staff are included in this figure. It also includeds Tipstaff/Service Officers and Court Messengers.
3. Staff in charge of different administrative tasks and of the management of the courts (human resources management, material and equipment management, including computer systems, financial and budgetary management, training management): for 2020 ICT Staff were including in this figure. In 2022 ICT Staff are not included in this figure.
4. Technical staff: for 2022, ICT Staff and Cleaning Staff are included in this figure.

Q052 (2021): The discrepancies with previous data are explained by staffing fluctuations.

Q052 (2017): As concerns the increase observed in the number of female staff in charge of different administrative tasks, additional staff have been employed since the last reporting cycle.
Q052 (2016): With regard to the category "staff in charge of different administrative tasks", additional staff have been employed since the last reporting cycle.
Q052 (2015): Figures have rounded up or down to adjust for the fact that actual personnel resource numbers are calculated to decimal points to reflect employment of part of a full-time personnel resource (e.g. where work-sharing arrangements are in place).
Q052 (2013): The reduction in the number of Rechtspfleger since 2012 reflects in part the appointment of number of County Registrars falling within the Rechtspfleger category as Specialist Judges of the Circuit Court. There were also a number of vacant posts at the end of 2013.
Q052-1 (2022): The total non-Judge staff working in the courts includes staff of the Office of the CEO, Corporate Services staff, Strategy and Reform staff, ICT staff, Regions & C&D Operations, Superior Court Operations staff, as well as quasi-judicial and technical staff. These staff members work throughout the system, and not just in one of the district, circuit, high or supreme courts. 1. Total non-judge staff working in courts at first instance level: The FTE for 2022 is up on 2020, this figure is total staff minus staff in Court of Appeal and Supreme Court.
2. Total non-judge staff working in courts at second instance (court of appeal) level: In 2020 this included Court of Appeal staff including Judicial Assist and Tipstaff. In 2022 this includes Court of Appeal staff only.
3. Total non-judge staff working in courts at Supreme Court level: In 2020 this included Supreme Court staff including Judicial Assistants and Tipstaff. In 2022 this includes Supreme Court staff only, as Judicial Assistants are included in figure for 52/Q2 and Tipstaff are included in figure 52/Q5.

Q052-1 (2021): The discrepancies with previous data are explained by staffing fluctuations.

Q052-1 (2020): The total non-Judge staff working in the courts includes staff of the Office of the CEO, Corporate Services staff, Strategy and Reform staff, ICT staff, Regions & C&D Operations, Superior Court Operations staff, as well as quasi-judicial and technical staff. These staff members work throughout the system, and not just in one of the district, circuit, high or supreme courts.

Q052-1 (2018): Question 52 - 1 was answered to provide a breakdown of staff working as registrars and in offices and other support staff in those offices. The reason the figures would not add up to the total is because the figures exclude administrative staff who are employed by the Courts Service in administrative areas away from front line offices, and who cannot be distributed between instances. The wording in the column for the total of such staff (1049) was given on the basis that this column used the same wording as the previous table which presumably covered all Courts Service staff.

Q055 (General Comment): Allocation of prosecutors work is not in all instances divided as per the questions above. The sub-categories at 1, 2 and 3 of the question posed do not apply in the Irish system.The total figure includes the head of the Prosecution Office provided in Q056 as the Director can assume the role and functions of prosecutors in his/her office.

Q055 (2023): The Office has a number of grades for prosecutors which are different from the categories above, they include Prosecutor, Senior Prosecutor, Principal Prosecutor, Senior Principal Prosecutor, Assistant Director of Public Prosecutions and Deputy Chief Prosecutor. There is one Director of Public Prosecutions and one Deputy Director of Public Prosecutions. The total figure of 156 includes the head of the Prosecution Office provided in Q056 as the Director can assume the role and functions of prosecutors in her office.

Q055 (2022): The Office has a number of grades for prosecutors which are different from the categories above, they include Prosecutor, Senior Prosecutor, Principal Prosecutor, Senior Principal Prosecutor, Assistant Director of Public Prosecutions, Deputy Chief Prosecutor. There is one Director of Public Prosecutions and one Deputy Director of Public Prosecutions

Q055 (2020): Our court going staff number at the 31st December 2020 is 128 - (50 male / 78 female). This figure includes our Prosecutors and Technical staff - Legal Executive. It also includes 1 Trainee Solicitor. In our Office our Technical Staff and Trainee Solicitors are court going staff and manage the running of a prosecution at trial in the same manner as some of our Prosecutors. In relation to the increase in staff resources for the ODPP, and the context for same, please see the forewords of our Annual Report 2020 and our Annual Report 2019 available at https://www.dppireland.ie/publication-category/annual-reports/.

Q055 (2018): There were 108.7 fulltime equivalent lawyers (fte) (headcount 111) on the payroll of the Office of the Director of Public Prosecutions at 31 December 2018 – 65.6 fte (67 headcount) of these were female and 43.1 fte (44 headcount) were male.

Q055 (2016): Of the staff complement in the Office of the Director of Public Prosecutions at the end of the reference year, 102 were of professional or technical grade at Prosecutor equivalent level or above.

Q055 (2014): Parts' of Full Time Equivalents were counted in decimal figures and have been rounded up. The total represents the number of qualified Solicitors and Barristers employed directly in the Office of the Director of Public Prosecutions (DPP). A proportion of these lawyers represent the DPP in the District Court. Members of the police force also prosecute in this court within a prescribed 'delegated authority' from the DPP. Members of the independent Bar act on behalf of the DPP, on a self-employed basis, in first instance and appellate courts. There are a further 32 State Solicitors contracted to provide a solicitor service to the DPP in cases heard outside of the capital.

Q056 (General Comment): There is only one Office of Public Prosecution in Ireland and the Director of Public Prosecutions is the head of that office.
In fact, the effect of Section 3 (1) of the Prosecution of Offences Act 1974 is to make the Director of Public Prosecutions the prosecuting authority in relation to criminal matters (apart from a very limited number of functions retained by the Attorney General).The daily management of the services are ensured by the Director, the Deputy Director and the Heads of the three Legal Divisions of the Office.

Q056 (2023): For further information regarding the structure of the Office, please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 2.8 to 2.10. (https://www.dppireland.ie/app/uploads/2023/01/Guidelines-for Prosecutors-5th-Edition-eng.pdf)

Q056 (2022): Please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 2.4 to 2.10. (https://www.dppireland.ie/app/uploads/2023/01/Guidelines-for-Prosecutors-5th-Edition-eng.pdf).

Q056 (2020): Please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 2.4 to 2.10.

Q057 (General Comment): For completeness, it should be noted that Section 8 (2) of the Garda Síochána Act 2005 provides that any member of the police service (An Garda Síochána) may institute and conduct prosecutions in a court of summary jurisdiction (the District Court which is the court of first instance in criminal prosecutions) in the name of the Director of Public Prosecutions. The DPP has issued a number of general directions concerning the institution and conduct of prosecutions by members of the police service (Gardaí) who are required by Section 8 (3) of the 2005 Act to comply with such directions in deciding whether to institute and in instituting or conducting a prosecution. 14,191 Garda Members were in service at the end of 2024. In this jurisdiction also, there are a number of specialised investigating authorities in relation to certain particular categories of crime or offending, including breaches of the tax code, provisions for safety and welfare at work, and company or competition law. Many investigative agencies have the power to prosecute summarily (in the District Court) without reference to the DPP.

Q057 (2023): Local State Solicitors who provide a solicitor service in the areas outside Dublin; Prosecution Counsel, who are instructed to act for the Director on a case by case basis; County Prosecutors, who are instructed to prosecute cases in the Circuit Court in their respective County; and members of the Garda Síochána who have authority to prosecute certain summary offences (see general comments). State Solicitors are solicitors in private practice who are employed on a contract basis to act on behalf of the Director of Public Prosecutions. Outside the Dublin area, local State Solicitors provide a solicitor service for the Director in Circuit Courts and some District Court matters. There is generally one State Solicitor per county but in certain counties, State Solicitor areas have been split to take account of factors such as population.
The conduct of trials on indictment is handled by independent counsel practising at the Bar who are engaged to represent the Director of Public Prosecutions on a case-by-case basis. Counsel prosecute in accordance with the Director's instructions and in compliance with the Guidelines for Prosecutors. Retention on any panel is at the discretion of the Director and is subject to satisfactory performance of work on the Director's behalf, as will be determined by the Director. For further details please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 1.5 and 2.13 to 2.15.(https://www.dppireland.ie/app/uploads/2023/01/Guidelines-for-Prosecutors-5th-Edition eng.pdf) and Prosecution System in Ireland (chapters 4 and 5)

Q057 (2022): Please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 1.5 and 2.13 to 2.15. (https://www.dppireland.ie/app/uploads/2023/01/Guidelines-for-Prosecutors-5th-Edition-eng.pdf).
Q057 (2020): Please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 1.5 and 2.13 to 2.15.
Q057 (2016): There are 32 State Solicitors contracted to provide a solicitor service to the Director of Public Prosecutions in cases to be heard outside Dublin. Serious criminal offences, with the exception of certain criminal mattes having an international dimension, are prosecuted in the name of the DPP. Much of the work of the DPP is carried out by barristers in private practice rather than by barristers in the employment of the State. Therefore, there is no equivalent to the salaried official known as a public prosecutor in other member states.
Q060 (2023): The non-public prosecutors include specialists in the following areas: Human resources and organisational development, finance, ICT, facilities, media and communications, corporate governance, procurement, strategic management including risk management, Freedom of Information, quality assurance and audit. There is a Policy and Research Unit supported by knowledge management and research function and librarian. All legal sections are supported by a team of administrative staff who are considered to be generalist.
Our overall sanction headcount increased from 260 in 2022 to 301 in 2023 which resulted in a headcount increase for non-public prosecutors.

Q060 (2022): The non-public prosecutors include specialists in the following areas: Human resources and organisational development, finance, ICT, facilities, media and communications, corporate governance, procurement, strategic management including risk management, Freedom of Information, quality assurance and internal audit. There is a Policy and Research Unit supported by knowledge management and research function and librarian. All legal sections are supported by a team of administrative staff who are considered to be generalist.

Q060 (2018): There were 95.25 fulltime equivalent (fte) administrative/technical staff (headcount 102) on the payroll of the Office of the Director of Public Prosecutions at 31 December 2018 – 54.85 fte (61 headcount) of these were female and 40.40 fte 41 headcount) were male.
Q060 (2016): Of the staff complement in the Office of the Director of Public Prosecutions at the end of the reference year, 77 were administrative grades.
Q060 (2014): In the frame of the 2014 exercise, parts of Full Time Equivalents were counted in decimal figures and have been rounded up or down as appropriate.
Q132 (2023): It is not possible to provide a net annual salary as each person's tax credits/deductions are personal to them and their circumstances. Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will be charged in accordance with the relevant statutory provisions.
The judicial salary reflects that of a judge of the District Court (new entrant) and a judge of the Supreme Court (highest point on the pay scale) as at 31 December 2023.Judges appointed post 1 January 2012 are placed on a three-point pay scale.
Within the Office we have Prosecutors at various different grade levels which are equivalent to general Civil Service grades and the rate of pay applicable to those grades are applied to our Prosecutors. The rate of pay per grade are in line with Government pay policy.

Q132 (2022): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2022.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will be charged in accordance with the relevant statutory provisions.
Judges appointed post 1 January 2017 are placed on a three-point pay scale.
Reason for Discrepancy: The question asked in this year's survey is slightly different than the one asked in the previous survey. This means that the replies should not be compared directly. The 2021 survey asked for "Judge of the Supreme Court or the Highest Appellate Court (please indicate the average salary of a judge at this level, and not the salary of the Court President) as at 31 December 2020".
The figure provided for this in 2021 – €208,854.00 – corresponded to the salary for a newly appointed Judge with less than 1 year of experience in the Supreme Court.
The current survey asked for the salaries of judges and public prosecutors on 31 December 2022, specifically, the salary for "Judge of the Supreme Court or the Highest Appellate Court (please indicate the highest salary of a judge at this level, excluding the salary of the Court President)".
The figure provided in this year's survey – €257,872.00 – corresponded to the highest salary point on the scale for Judge of the Supreme Court.
It should further be noted, that since 2020, the members of the judiciary had a number of pay increases in Ireland which included the restoration of pay to pre-austerity levels on 1 July 2022.
The salary of the Director of Public Prosecutions (the most senior person in the Irish Prosecution service) is linked to Irish Civil Service Secretary General Grade II. This salary is currently €243,600. As with all civil service salaries, this is subject to pension (individual and spouse and dependent contributions) and tax related deductions such Income Tax, Universal Social Charge and Pay Rel

ated Social Insurance.

Q132 (2021): The information you are seeking has been retrieved from sources which are available to the public. For figures relating to judicial remuneration please see Association of Judges Ireland and for figures relating to the salaries of other civil servants which includes prosecutors see publicjobs.ie
Q132 (2020): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2020.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will
be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade

Q132 (2019): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2019.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will
be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade
Q132 (2018): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2018.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade
Q132 (2016): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2016.

Q132 (2014): The Judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court at December 2014 who were appointed to that courts on or after 1 January 2012. It is noteworthy that following a constitutional amendment in 2011, legislation was passed to allow for the reductions in the remuneration of judges. The Financial Emergency Measures in the Public Interest legislation refers.
Q132 (2013): There is no equivalent of a public prosecutor of the Supreme Court and so a summary of all lawyer grade salaries are provided below: Director of Public Prosecutions (€176,350); Deputy Director of Public Prosecutions (€156,380); Head of Directing Division (€142,199 (modified scale)); Professional Officer Grade II (€119,572); Professional Officer Grade III (€81,080); Professional Officer Grade IV (€67,434); Chief Prosecution Solicitor (€149,499); Principal Prosecution Solicitor (€85,127); Senior Prosecution Solicitor (€79,401); Prosecution Solicitor AP1 (€67,434); Prosecution Solicitor (€30,218 (new entrant from 1 January 2013)).
Q133 (2023): Judges receive an annual allowance as well as travel (mileage) and subsistence (hotels).
Q133 (2022): Judges receive an annual allowance as well as travel (mileage) and subsistence (hotels).

Q146 (2023): The above figures represent members of the Law Library (barristers) and members of the Law Society (solicitors). Of the 11,871 solicitors, 37 were unclassified i.e solicitors who did not identify as either male or female. They are included in the total figure. As of 31 December 2023, there were also an additional 912 barristers on the 'Roll of Practising Barristers' who were not members of the Law Library. These were not included in last years figures and are, likewise, not included in the total figure for this round. This figure can not be broken down into males and females as that data is not requested on the Legal Services Regulatory Authority's application form. You can find further information regarding the Law Library on the Bar of Ireland website at https://www.lawlibrary.ie/about/.

Q146 (2022): The above figures represent members of the Law Library (barristers) and members of the Law Society (solicitors)
Q146 (2021): As of 31 December 2021, there were 11,316 practicing solicitors in Ireland. 5,319 male, 5971 female and 26 undefined. For the undefined classification, this is due to the Society not being provided with information on the solicitor's gender. These statistics include solicitors with a practicing certificate in the Republic of Ireland, including practicing solicitors employed by the State. Reply from the Law Library: total n: 2118; males 1354; female 764. Please note that the numbers above are as at June 2021 and per our Annual Report https://www.lawlibrary.ie/about/governance/annual-report/ The figures only relate to barristers who are members of the Bar of Ireland, and do not include barristers operating outside of the Bar of Ireland. The Roll of Barristers, held by the LSRA, contain that list. Further the above does not include solicitor numbers, which are available via the Law Society of Ireland and the LSRA.

Q146 (2020): The above figure is the sum membership of the Bar of Ireland and the Law Society. Total figure includes 24 lawyers with a gender reported as "Unknown".
Q146 (2019): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

Q146 (2018): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

Q146 (2017): This figure represents the total number of barristers practising as members of the Law Library/Bar of Ireland and the total number of solicitors who held practising certificates for 2017.
Q146 (2016): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

Q146 (2014): The number of lawyers comprises Solicitors and Barristers in the end of December 2014.

Q147 (2023): Data only relates to those with a practising certificate

Q147 (2022): Practicing solicitors are entitled to represent their clients in court. More information is available here:
•https://mcmahonsolicitors.ie/parties/#:~:text=Originally%2C%20only%20barristers%20had%20rights,majority%20of%20Circuit%20Court%20cases
•https://www.citizensinformation.ie/en/justice/courtroom/solicitors.html

Q147 (2021): Traditionally, solicitors in Ireland could only represent their clients at the District Court and Circuit Court and would be required to engage a barrister to advocate on behalf of their clients at the higher courts. However, this has changed in recent years, and practicing solicitors are now entitled to a rights of audience and may argue cases at all courts. More information is available here:
https://mcmahonsolicitors.ie/parties/#:~:text=Originally%2C%20only%20barristers%20had%20rights,majority%20of%20Circuit%20Court%20cases.
https://www.citizensinformation.ie/en/justice/courtroom/solicitors.html

Q148 (2021): Solicitors may represent their clients in all court. However, many prefer to engage a barrister to do so on behalf of their client particularly in the higher courts. The Society is not aware of any exact figure of legal advisors who are prevented from representing their clients in court.

Italy

Q046 (General Comment): Judges serving in specialized first-instance courts, such as regional audit commissions, local tax commissions, and military courts, which operate independently and are financially autonomous from the Ministry of Justice, are not included in the scope of question 46.
Q046 (2018): Since 2018, the figures have also included judges belonging to Administrative Justice. The above figures include 6634 ordinary judges and 381 administrative judges.

Q046 (2017): An upward trend in respect of the number of female judges in the Supreme Court: in Italy, the High Council of the Judiciary is competent for the transfers of judges from one office to another. This transfer procedure generally takes place once or twice a year. The number of open positions for each court is proportional to the percentage of vacancies in that particular court. During the last few years, there were occasions where the positions made available at the court of cassation were a bit higher than number one would have expected according to the percentage of vacancies. Hence, more judges applied for the vacancies at the court of cassation compared to other courts. To date the vacancies at the court of cassation are about 4% of the total number of positions. As a matter of fact the penetration of female judges shows a positive trend. In first and second instance courts the penetration is already over 50%. At court of cassation level there is much room for improvement.

Q046 (2015): The overall reduction of judges between 2014 and 2015 is partly due to the effect of the recent labor reform that lowered the mandatory retirement age for judges from 75 to 70.
Q046 (2013): In the last few competitive exams held in Italy, the percentage of female candidates was higher than this of male candidates. Accordingly, a positive variation can be observed in respect of the number of female judges between 2010 and 2013.
Q046-2 (2023): Judges who do not specifically deal with any of these types of cases, and judges with coordination and management duties.
Q046-2 (2022): Judges who do not specifically deal with any of these types of cases, and judges with coordination and management duties.
Q052 (General Comment): Drivers and receptionists are included in the category "Staff in charge of different administrative task" . The specialized first instance courts that are not administered and financed by the Ministry of Justice (regional audit commissions, local tax commissions and military courts) are not taken into consideration at question 52.

Q052 (2023): Within the framework of the National Recovery and Resilience Plan (PNRR), the Ministry of Justice has carried out an extraordinary recruitment process to strengthen the so-called "Trial Office". This is an organisational tool consisting in the creation or the reinforcement of support teams for judges, with fixed-term employment and with the aim of reducing the backlog and the disposition time. This measure also improved the quality of justice by supporting judges in their normal activities of study, legal research, drafting documents, organising documents and thus allowing judges to concentrate on more complex tasks.
Q052 (2022): Within the framework of the National Recovery and Resilience Plan (PNRR), the Ministry of Justice has carried out an extraordinary recruitment process to strengthen the so-called "Trial Office". This is an organisational tool consisting in the creation or the reinforcement of support teams for judges, with fixed-term employment and with the aim of reducing the backlog and the disposition time. This measure also improved the quality of justice by supporting judges in their normal activities of study, legal research, drafting documents, organising documents and thus allowing judges to concentrate on more complex tasks.
Q052 (2021): The number of staff has increased due to the hiring of new personnel through public competition.
Q052 (2018): Since 2018, the figures have also included court staff belonging to Administrative Justice.
Q052 (2016): According to the data provided for 2014, 2015 and 2016, we can notice a downward trend as concerns the number of technical staff (a decrease of 28% between 2014 and 2015 and a decrease of 26% between 2015 and 2016), especially the number of female staff (a decrease of 33% between 2014 and 2015 and of 32% between 2015 and 2016). An explanation of these variations is not available at this stage.
Q052 (2015): 'Other non-judge staff' includes: assistants, receptionists, porters and other judicial staff.
The high percentage of “other non judge staff” in Italy is due to a very strict interpretation of the definition of the main categories.
Q052-1 (2022): See comment at Q.52
Q052-1 (2018): Since 2018, the figures have also included court staff belonging to Administrative Justice.
Q055 (2016): There is no specific explanation concerning the increase in the total number of prosecutors at Supreme Court level. However, numbers are small and therefore percentage changes vary more harshly.
Q056 (2022): The percentage of discrepancies is high due to the small absolute value.
Q057 (General Comment): In Italy lay magistrates are also members of the public prosecution. They are called “Vice Procuratori Onorari”. After a period of training, they can assist the professional public prosecutors to deal with a variety of different functions such as representing the public prosecution office during hearings regarding misdemeanour criminal cases or studying jurisprudence and case-law, or helping professional public prosecutors in drafting procedural acts.

Q057 (2023): In Italy, lay magistrates, known as "Vice Procuratori Onorari," play a unique role as members of the public prosecution system. Following a period of training, they are authorized to support professional public prosecutors in a range of capacities. These responsibilities include: Representation in Court: Lay magistrates can represent the public prosecution office during hearings related to misdemeanor criminal cases. Legal Research and Analysis: They engage in the study of jurisprudence and case-law, contributing to a deeper understanding of legal precedents. Procedural Assistance: Lay magistrates provide valuable assistance to professional public prosecutors in drafting procedural documents and acts.

Q057 (2020): In Italy this figure is called “Vice Procuratore Onorario”. After a period of training, they can assist the public prosecutors. They can be employed in a variety of different tasks: hearings of misdemeanor criminal cases, jurisprudence studies, preparation of the request to discontinue cases, etc.
Q057 (2018): In Italy this figure is called “Vice Procuratore Aggiunto”. After a period of training, they can assist the public prosecutors. They can be employed in a variety of different tasks: hearings of misdemeanour criminal cases, jurisprudence studies, preparation of the request to discontinue cases, etc.
Q060 (2021): The number of staff has increased due to the hiring of new personnel through public competition.
Q132 (General Comment): It is noteworthy that the salaries of judges and public prosecutors do not depend on the position held but rather on the experience (i.e. years of service). This means that the salary of a judge working in the lowest courts can be the same as the salary of a judge working in the Supreme Court of Cassation. The salaries of administrative judges are not included in the data provided.
Q146 (2013): For 2013, the number of practicing lawyers was not available. The provided figure corresponds to the number of lawyers in 2012, assuming that data should be almost the same for both years.

Latvia

Q004 (General Comment): After 2012, the minimum monthly salary increased, which had an effect on the average gross annual salary.
Q004 (2023): The changes in the average salary in 2023 were influenced by the increase of the national minimum wage, as well as the increase of the maximum non-taxable minimum and the coefficient applied in the calculations of the differentiated non-taxable minimum.
Q004 (2022): The average wage in Latvia continues to rise for several years in a row. In 2022, the increase in average wages was influenced by several factors: the lifting of the restrictions of COVID-19, which boosted economic activity, a low unemployment rate, which created the conditions for a small increase in wages.
Q004 (2021): The data provided by the Central Statistical Bureau.
Q004 (2020): The data provided by the Central Statistical Bureau.
Q004 (2016): on 2016
Q046 (2017): The changes in the number of judges at the Supreme Court are the outcome of the court reform developing pure three instance level court system. Until 2014 there were both appellate and cassation courts within the Supreme Court. Until end of 2014 and 2016 respectively there were additional appellate chambers dealing with criminal and civil cases. Since beginning of 2017 the number of judges at Supreme Court (cassation instance) is stable – 36.

Q046 (2014): The number of male judges in the Supreme Court decreased per 5 judges between 2012 and 2014 due to various reasons: three male judges retired; two male judges returned to regional courts (because they worked in the Supreme Court temporarily); one male judge passed away in 2014; one new male judge came to work in the Department of Civil Cases of the Supreme Court.
Q046-2 (General Comment): The courts of first instance of general jurisdiction do not explicitly distinguish between the specialization of judges on the basis of the main types of cases, therefore there is not possible to distinguish number of judges by case type (civil and/or commercial cases and criminal cases). Although there is a separate group of judges in the district (city) courts, which primarily hear cases of certain categories.
Q046-2 (2023): Comment on Supreme Court total number of judges. The difference between Q46 and Q46-2 is becauce the chief justice is not included in any of court departments.
Q046-2 (2021): For Supreme Court - within the number of judges is not indicated number of President of the Supreme Court.

Q046-2 (2020): The courts of first instance of general jurisdiction do not explicitly distinguish between the specialisation of judges on the basis of the main types of cases, therefore there is not possible to distinguish the data between civil and or commercial cases and criminal cases.
Q052 (General Comment): The work of the Judicial Council is ensured by the secretariat of the Judicial Council which is a division of the Supreme Court. This means that the activities of the Council for the Judiciary are provided from the resources of the Budget of the Supreme Court.
Q052 (2023): Other - Supreme Court: Division of case-law and research, Division of provision regime of secrecy, Staff of secretariat of the Council for the Judiciary.
The observed variations in the different categories are due to changes in court staff.
Q052 (2022): Other non-judge staff - Supreme court: division of case-law and research, division of provision regime of secrecy, staff of secretariat of the Council for the Judiciary.
The observed variations in the different categories are due to changes in court staff.
Q052 (2021): Other non-judge staff: Supreme Court - Division of case-law an research, Division of provision of regime of secrecy, Staff of secretariat of the Council for the Judiciary.
In general at the end of 2021, there were many vacancies for court staff for the first and second instance courts, therefore also there are differencies in the number of court staff. In the previous cycles, the numbers for court staff for the first and second instance courts were calculated a little bit different, there were included also vacancies.

Q052 (2020): The observed variations in the different categories are due to changes in court staff.
Other for Supreme Court - Division of case-law and research, Division of provision of regime of secrecy, Staff of the Secretariat of the Council for the Judiciary. Trainees are not included in the number provided of the non-judicial staff.

Q052 (2019): Other non - judge staff: Staff of the Division of case-law and research, Division of provision of regime of secrecy and Secretariat of the Council for the Judiciary, as well consultants (desk officers) of the Supreme Court of Latvia.
The overall discrepancies starts from 2018 due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate). The data between 2018 and 2019 are very similar.

Q052 (2018): Discrepancy due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate).
Q052 (2017): Other non-judge staff- this satff is for Supreme Court - Staff of Division of case-law and research staff, Division of provision of regime of secrecy staff, the Supreme Court of Latvia consultants and Secretariat of the Council for the Judiciary

Starting from 2015 till March, 2018 there were introduced court reform where the judicial map was revised. In the course of the court reform, several courts were merged, legally creating one larger court. On the other hand, in this new territory, the existing courts continue operating as the new body of the joint court, providing the opportunity for citizens to submit the documents at any place of the court. The court reform affected also the changes in the number of court staff, some positions were combined, some positions changed.

Q052 (2014): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings. For 2014, it also subsumes consultants of the Supreme Court.

Q052 (2013): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings.

Q052-1 (2023): The observed variations in the different categories are due to changes in court staff.

Q052-1 (2022): The observed variations in the different categories are due to changes in court staff.

Q052-1 (2021): In general, at the end of 2021, there were many vacancies for court staff for the first and second instance courts, therefore also there are differences in the number of court staff. In the previous cycles, the numbers for court staff for the first and second instance courts were calculated a little bit different, there were included also vacancies.

Q052-1 (2018): Discrepancy due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate)
Q055 (2023): Data corresponds to the actual situation. The data are correct for 2023. The mistake is in the data for 2022. The number of prosecutors at SC level for 2022 are 51 (27 males and 24 females).
Q055 (2020): The increase in the number of prosecutors in court district level prosecutor's offices is related to the imposition of an obligation on the prosecutor of the court district level prosecutor's office, and not on the chief prosecutor of the district (city) prosecutor's office to perform the duties of a higher prosecutor.
Regarding the decrease in the number of women working in the Prosecutor General's Office, it must be concluded that in total the number of women working has decreased by 8 persons. One of the reasons could be reaching the maximum age for performing the duties prescribed by law or the death of a person.

Q056 (2022): At the end of 2020, a reorganization was launched in the prosecutor's office with the aim of ensuring rational use of state budget funds, as well as creating a more even distribution of prosecutors' workload. During the reform, which also continued in 2021, the work of individual district-level prosecutor's office units was optimized (reduced number of prosecutors offices and number of heads of offices), at the same time prosecutors were also specialized in criminal offenses committed in the service of state institutions, including those related to corruption.

Q056 (2020): The data provides information only about persons performing the duties of head of prosecution office.

Q056 (2018): Data includes the position of the deputy Head Prosecutor, who is also the position of a higher prosecutor in the Prosecutor's Office.
Q056 (2016): Data includes the position of the deputy Head Prosecutor, who is also the position of a higher prosecutor in the Prosecutor's Office.

Q056 (2014): The provided data includes the number of deputy heads of prosecution offices, who are also occupying the higher prosecutor position within the structure of the public prosecution services. The total number of heads of prosecution offices for 2014 is 61 (8 deputy heads), 36 males (3 deputy heads), 25 females (5 deputy heads). The total number of heads of prosecution offices at first instance level is 41 (4 deputy heads), 24 males (2 deputy heads), 17 females (2 deputy heads). The total number of heads of prosecution offices at second instance level is 10 (4 deputy heads), 6 males (1 deputy head), 4 females (3 deputy heads).

Q060 (General Comment): Total number of staff- 390 that consists of- 121 - non prosecutor stuff (whose task is to assist the prosecutor such as registrars (case preparation, assistance during the hearing, helping to draft the decisions); 178 in charge of different administrative tasks and of the management of the prosecution offices; 91 technical staff.
Discrepancy comment: Data for 2023 is correct related to the number of males and females. In 2022 there was typing mistake and females should be 268, males 109.

Q060 (2023): Total number of staff- 390 that consists of- 121 - non prosecutor stuff (whose task is to assist the prosecutor such as registrars (case preparation, assistance during the hearing, helping to draft the decisions); 178 in charge of different administrative tasks and of the management of the prosecution offices; 91 technical staff.
Discrepancy comment: Data for 2023 is correct related to the number of males and females. In 2022 there was typing mistake and females should be 268, males 109.

Q060 (2022): Total number of staff working at the Prosecution Office is 377 (268 male employees, 109 female employees). Of this number, qualified (judicial) support for prosecutors in the performance of their functions, such as assistance during the hearing, helping to draft the decisions (category 2 of the question 52) is provided only by 14 employees. Prosecution Office has 105 prosecutor assistants who provide only technical assistance, they do not provide qualified (judicial) assistance (the functions of prosecutor assistants correspond to those described under category 3 of the question 52). There are also 159 employees that perform different administrative and management tasks. Therefore, the total number of employees in charge of administrative and management tasks is 264. And finally, we have 99 employees that perform technical duties.
Changes on proportion of gender of employees are connected with the changes in the number of employees.

Q060 (2021): Total number of staff working at the Prosecution Office is 357 (103 male employees, 254 female employees): 187 employees (35 male and 152 female) are staff in charge of administrative functions and management of Prosecution Office. 75 employees (40 male and 35 female) perform technical duties. 95 employees are prosecutor assistants (28 male and 67 female). We would like to emphasize that in Latvia assistant prosecutors do not perform the functions of drafting procedural documents. Main duties of assistant prosecutors are preparation of criminal case material copies; drawing up of the case list documents, sewing and numbering of the case materials; preparation of materials to be issued to the process participants; certification of the correctness of document derivatives; delivery of the prepared materials to the addressees and reception of the documents.

Q060 (2014): The 2014 data encompasses the administrative director, deputies of the administrative director and other staff of the administrative director office – staff of the Chancellery, interpreters, IT specialists, personal specialists, car drivers, auditors (in total 318 employees, among which 232 women), as well as prosecutors' assistants (in total 74 assistants, among which 55 women). Assistants to prosecutors have no prosecutorial procedural powers. Their competence and jurisdiction are strictly limited. For example, an assistant is entitled to receive visitors, to take action in connection with the preparation of the case (prepare copies of criminal case materials, to produce the list of documents) etc.

Q132 (General Comment): The salary of Supreme Court judges or prosecutors does not depend on the judge's / prosecutor`s seniority in the Supreme Court or Prosecutor Office. All judges of the Supreme Court, with the exception of the chairman of the court and the Chairperson of a department of the Supreme Court, receive the remuneration as stipulated in the Law on Remuneration of Officials and Employees of State and Local Government Authorities.

Q132 (2023): If a judge has received a positive statement in the regular assessment of the professional activity of a judge, a service supplement to the monthly salary shall be determined for the judge, except for a judge of the Constitutional Court, in the following amount:
1) after six years worked in the office - 5 per cent of the monthly salary;
2) after 10 years worked in the office - 10 per cent of the monthly salary.

Q132 (2022): Data on net annual salary, in EUR for first instance professional judges differs from previous period due the raise of gross annual salary.

Q132 (2020): Prosecutors shall be entitled to a supplement for the ranking of the public prosecutor, depending on the degree of office assigned. The ranking of a public prosecutor shall be assigned according to the position, professional knowledge, qualifications and experience of work.
Question 132 indicates the minimum gross and net public remuneration.
Discrepancies with data from the previous cycle are connected with changes in the Law On Remuneration of Officials and Employees of State and Local Government Authorities. Between 2019 and 2020 a gradual increase in salary has been introduced, the gross salary has been increased per EUR 1764 and the net annual salary increase per EUR 1203. The salaries for judges are reviewed annually according to the law.

Q132 (2019): Discrepancies with data from the previous cycle are connected with changes in the Law On Remuneration of Officials and Employees of State and Local Government Authorities.
Comments on salaries of prosecutors: The increase in salaries is related to changes in the regulatory framework for prosecutors remuneration, which entered into force on 01.01.2019. The discrepancies in the section of salary for public prosecutor at the beginning of his or her career is connected to that in previous cycle the maximum salary was indicated which first instance prosecutor could get, but now it is indicated the salary at the beginning of the career.

Q132 (2018): The changes are related to the Law On Remuneration of Officials and Employees of State and Local Government Authorities, which increased the judge's monthly salary to EUR 1966, and the salaries of judges increased significantly in 2018 compared to 2016. Same for prosecutors.
Comment for prosecutors: Prosecutors shall be entitled to a supplement for the ranking of the public prosecutor, depending on the degree of office assigned. The ranking of a public prosecutor shall be assigned according to the position, professional knowledge, qualifications and experience of work. Question 132 shows the maximum gross and net public remuneration.

Q132 (2016): Prosecutors, depending on the grade assigned, are provided with an allowance for a post of prosecutor from 7 to 35 percent of the monthly salary. The position of a prosecutor is assigned according to the occupation, professional knowledge, qualification and work experience.
In above stated amount special additional payment to judges depending of their time of service (starting from 7% after 3 years of service, until 35% - after 20 years of service) is already included.

Q146 (2017): This number includes sworn advocates and assistants to sworn advocates.

Q146 (2013): There were 1 336 sworn lawyers in Latvia on December 31, 2013, of which 70 - assistants to lawyers and 13 - lawyers from other countries. 116 State legal aid providers have been concluded contracts with the Legal Aid Administration about State-guaranteed legal assistance in civil cases, administrative cases, cross-border disputes and provision of out of court legal assistance. State provided legal assistance in criminal matters in Latvia is provided by sworn lawyers, not by legal aid providers.

Q147 (2017): According to Advocacy Law of the Republic of Latvia in accordance with the procedures specified by this Law, the following persons may work as advocates in Latvia:
1) sworn advocates;
2) assistants to sworn advocates;
3) citizens of European Union Member States who have obtained the qualification of an advocate in one of the European Union Member States (hereinafter - advocates of European Union Member States).
Foreign advocates, except for advocates of European Union Member States, may practice in Latvia in accordance with the international agreements on legal assistance binding to the Republic of Latvia. Solicitors, in-house counsellors and others is an unregulated profession in Latvia and consequently is not counted, controlled or otherwise supervised.

Q148 (2017): Solicitors, in-house counsellors and others is an unregulated profession in Latvia and consequently is not counted, controlled or otherwise supervised. Also, for example, Civil Procedure Law provides that in some case categories/the Supreme Court persons can conduct cases by themselves or with the intermediation of an advocate. Due to this it is not possible to count persons who cannot represent their clients in court.

Q148 (2016): There was a mistake in last cycle. Not all legal advisors can represent their clients in court, for instance, in criminal cases only sworn advocate can represent their clients in court.

Lithuania

Q004 (General Comment): According to data from the State Data Agency, wage changes were influenced by the increase in the minimum monthly wage from January 1, 2024, the increase in the minimum salary coefficients for employees of budgetary institutions, changes in the calculation of the non-taxable income amount, and other reasons.

Q004 (2023): Increase in earnings was influenced by increased basic wages for politicians, judges, civil servants, public service employees and employees of budgetary institutions, increased minimum monthly wage and other reasons.

Q004 (2022): Changes in wages were affected from 2022 January 1 as the minimum monthly salary was increased, the basic salary of state politicians, judges, state officials, civil servants and employees of budgetary institutions was increased, the procedure for calculating the amount of tax-free income was changed.
It should be noted that from 2019 January 1 the rates of state social insurance contributions paid by the employer and the employee have been changed. gross wages indexed 1.289 times.

Q004 (2021): From the 1st January, 2021 the minimum monthly salary was increased, the base salary of state politicians, judges, state officials, civil servants and employees of budgetary institutions was increased, the procedure for calculating the amount of tax-free income was changed and other reasons.
https://osp.stat.gov.lt/informaciniai-pranesimai?articleId=9732032

Q004 (2020): Annual salary growth has been affected by the increase in the minimum monthly salary since the beginning of the reference year, the base salary of state politicians, judges, state politicians, judges, civil servants, civil servants and employees of budgetary institutions, changes in the procedure for calculating tax-free income and other reasons.

Q004 (2019): The increase in wages in 2019 was caused by changes in the tax system: an increase in the basic salary of politicians, judges, civil servants, civil servants and employees of budgetary institutions, an increase in the minimum monthly salary, a revision of the new salary system for civil servants, a change in the procedure for calculating exemptions and other reasons.

Q004 (2018): The state budget and salary increased due to the growth of the economy.

Q004 (2016): The state budget and salary increased due to the growth of the economy (after recovering from crisis before).

Q046 (General Comment): The methodology of presentation of data reflects the peculiarities of the Lithuanian court system. Namely, as the regional courts function not only as courts of appeal, but also as courts of first instance (Article 19 of the Law on Courts of the Republic of Lithuania), the number of judges of these courts is included in the 1st section. Accordingly, the latter indicates the number of judges of district courts, regional courts and regional administrative courts. Likewise, given that the Supreme Administrative Court is the court of appeal (although the rulings of the Supreme Administrative Court of Lithuania are final and not subject to appeal) the number of judges of this court is encompassed in the 2nd section. The latter indicates the number of judges of the Court of Appeal of Lithuania and the Supreme Administrative Court of Lithuania. The 3rd section indicates the number of judges of the Supreme Court of Lithuania.

Q046 (2022): In 2022 the corps of judges was supplemented by 30 judges, which is significantly more than in 2021 and slightly more than in 2020 (12 in 2021, 26 in 2020).
In 2022 27 persons were appointed as district court judges.

Q046 (2017): Please see general comments.

Q046-2 (2020): the first instance indicates the number of judges of district courts, regional courts and regional administrative courts. Likewise, given that the Supreme Administrative Court is the court of appeal (although the rulings of the Supreme Administrative Court of Lithuania are final and not subject to appeal) the number of judges of this court is encompassed in the 2nd instance. The latter indicates the number of judges of the Court of Appeal of Lithuania and the Supreme Administrative Court of Lithuania.

Q052 (General Comment): The category “other” includes translators, court psychologists, it encompasses also other helping staff (civil servants and working under the labour agreement).

Q052 (2023): Other staff – translators and psychologists

Q052 (2022): Other staff – translators and psychologists.

Q052 (2021): Psychologists and translators.

Q052 (2020): Other staff – translators and psychologists.
There is no such a position as trainee judges in the Lithuanian court system.

Q052 (2019): Other staff - translators and psychologists.

Q052 (2018): Other non-judge staff – translators and psichologists.

Q052 (2017): Other staff – translators and psychologists.

Q052 (2016): In 2015 the number of technical staff has decreased while at the same time the number of staff assisting judges has increased.

Q052 (2014): The National Courts Administration has never collected data on statistics of court personnel according to the gender. The data, which was provided in earlier evaluation cycles, was preliminary data, manually gathered.

Q055 (2020): After the reorganization of the prosecution service in 2011, 5 second instance prosecutors' offices were merged with 51 separate first instance prosecutor's office in their area of operation, and thus 5 regional first-second instance prosecutor's offices were established.

Q055 (2014): In 2012, the 56 territorial prosecutor’s offices have been reorganised into 5 regional prosecutor’s offices with 10 district prosecutor’s offices functioning inside them (first instance and second instance levels have been combined). Currently, only two instances exist.

Q056 (2022): In 2022, structural changes were implemented (merging of some departments), resulting in a reduction of 10 managerial positions (Chief Prosecutors, Deputy Chief Prosecutors). The number of men and women changes for natural reasons and depends on the gender of the applicants for the position of the Chief / Deputy Chief Prosecutor.

Q056 (2014): In 2012, the 56 territorial prosecutor's offices have been reorganised into 5 regional prosecutor's offices with 10 district prosecutor's offices functioning inside them (first instance and second instance levels have been combined). Currently, only two instances exist. The total number of heads of prosecution offices evolved in the following manner: 2010 – 190; 2011 – 187; January 2012 – 145; May 2012 – 126; September 2012 – 93, December 2013 – 90, December 2014 – 89.

Q060 (2023): assistants of prosecutors, lawyers, other administrative staff.

Q060 (2022): The number of women in staff (non-public prosecutors) attached to the public prosecution services tends to be higher. Total number of staff changed due to natural changes in human resources and as a result of the optimisation processes within the Public Prosecutor's Office.

Q060 (2021): The decrease in staff numbers is due to:
- natural rotation of human resources (various reasons: career, dissatisfaction with salary or duties, etc.);
- implementation of changes in work organisation;
- a higher number of persons left the institution than were recruited.

Q060 (2020): Number of staff does not include trainee prosecutors, only assistants, specialists and other employees. A person, who has been admitted to the service as prosecutor, must complete an assigned traineeship of up to two years. During the traineeship, the trainee prosecutor performs all duties of a prosecutor, but is obliged to coordinate draft procedural decisions and resolutions with the internship supervisor.

Q060 (2016): The provided data on the number of prosecution staff includes assistants and lawyers who work directly with prosecutors (total 363: 81 males and 282 females).

Q132 (General Comment): Thus, the budget increased and was approved and executed by 40 percent, mainly because from July 1, 2023, judges' salaries were increased (judges' salaries increased almost 2 times). In 2023, they were only uploaded from July. and for a year and a half, which is why they are not visible in the approved budgets. In 2024, additional appropriations were allocated for the entire year, so both the wage fund and the total budget increased by about 38 percent in 2 years compared to the budgets approved in 2024 and 2022. And since salaries are really paid, execution has also increased. The same goes for prosecutors' salaries.

Q132 (2023): From the 2023 July 1 after the amendments to the Law of Remuneration of Judges came into force, the coefficient and the base amount applied in calculating the remuneration of judges has been changed. The coefficient of judges' salary increased about 2,03 times (evaluating the changes of base amount and recalculation). Also, with the changes from July 1, no left extra payment for work experience calculating the judge salary, so there is no difference between the judge in the beginning of his career and the judge with long work experience. Because of that, the change in first instance judge salary is bigger (discrepancy ratio approx. 55 %) than in Supreme Court judge salary (discrepancy ratio approx. 32 %).

Q132 (2022): The Law on Judges' Remuneration of the Republic of Lithuania establishes, that the salary of judges of general competence and specialized courts consists of:
1) official salary;
2) supplement for length of service to the State of Lithuania (one percent of the official salary of a judge for each year of service to the State of Lithuania, but not more than 30 percent);
3) payment for work and duty on rest days and holidays, substitution;
4) premium for increased workload (the amount of the premium for the increased workload, but not more than 30 percent of his official salary, is determined by the president of the court in accordance with the procedure established by the Juditial Council.

Q132 (2020): From the 1 January 2019 the official salary ratio of district court judges was increased. In 2019 and in 2020 a higher base amount of official salary (salary) was also applied, which is used to calculate the remuneration of judges and public procesutors (2018 - 132,5; 2019 - 173, 2020 - 176)

Q132 (2019): From 2019 January 1 the salaries of district court judges increased due to an increase in their official salary coefficients (the official salary ratio of the president of the court increased from 0.5 to 1.5 basic amounts; deputy chief judge - from 1.2 to 1.9 basic amounts, judge - by 2 basic amounts).
From 2019 January 1 the basic amount of the official salary, which is used to calculate the salaries of both prosecutors and judges, was also increased: in 2018 this basic amount was 132.5 euros, in 2019 - 173 euros.

Q132 (2018): In 2017 prosecutors' salaries were increased.

Q132 (2016): The salary of public prosecutors at the beginning of the carrier was increased.

Q133 (2019): no other financial bennefit.

Q146 (2019): There are also 1008 lawyers' assistants (449 males, 559 females). They can provide some legal service but are not included in the number of lawyers above.

Q146 (2018): There are also 943 lawyers' assistants. They can provide some legal service but are not included in the number of lawyers above.
Q146 (2017): The number is provided by the Lithuanian Bar Association (the number of practising lawyers (advocats) - 2207. Also there are 925 lawyers' assistants who provide legal service).
Q146 (2016): The number is provided by the Lithuanian Bar Association (the number of practising lawyers (advocats). Also there are 870 lawyers' assistants who provide legal service also.
Q146 (2015): Numbers are taken from the List of Practising Advocates of Lithuania. The list is regulated by the Law on the Bar and administered by Lithuanian Bar Association. The assistants of advocates is not presented in the data.

Q147 (2015): Numbers are taken from the List of Practising Advocates of Lithuania. The list is regulated by the Law on the Bar and administered by Lithuanian Bar Association. The assistants of advocates is not presented in the data.

Luxembourg

Q004 (2023): Average gross annual earnings by economic activity - Full-time workers (in EUR) NACE Rev.2: Industry and services (B-S)
(https://lustat.statec.lu/vis?fs[0]=Th%C3%A8mes%2C1%7CConditions%20social%23C%23%7CConditions%20de%20vie%23C1%23&fs[1]=Th%C3%A8mes%2C0%7CConditions%20social%23C%23&fs[2]=NACE%20Rev.2%2C0%7CActivit%C3%A9s%20financi%C3%A8res%20et%20d%27assurances%20%28K%29%23SL09%23&pg=0&fc=NACE%20Rev.2 &df[ds]=ds-release&df[id]=DF_C1202&df[ag]=LU1&df[vs]=1.0&pd=2015%2C&dq=L01%2BSL09..A&ly[rw]=NACE_REV2%2CGENDER&ly[cl]=TIME_PERIOD ; consulté le 01.07.2024)

Q004 (2022): Average annual gross incomes by economic activity - Full-time workers (in EUR) NACE Rev.2: Industry and services (B-S). https://lustat.statec.lu/vis?pg=0&df[ds]=ds-release&df[id]=DF_C1202&df[ag]=LU1&df[vs]=1.0&pd=2016%2C2022&dq=L01..A&ly[rw]=GENDER&ly[cl]=TIME_PERIOD&lc=en
Q004 (2020): The 2019 data has been tentatively provided, pending the official release of the 2020 data.
Q004 (2019): This figure represents the average gross salary for the "Industry and Service" sector, according to the NACE Rev 2 code.
(https://statistiques.public.lu/stat/ReportFolders/ReportFolder.aspx?IF_Language=fra&MainTheme=3&FldrName=1&RFPath=30).
Q004 (2016): The variation between the different cycles (44% between 2014 and 2016) comes from a difference between gross salary (which was given for this cycle) and net salary (which was given for the previous cycles).
Q046 (General Comment): Section 1: Number of professional judges at first instance includes district court judges, justices of the peace and administrative court judges.
Section 2: Number of professional judges in courts of appeal (2nd instance) includes the court of appeal of the superior court of justice and the administrative court.
section 3: Number of professional judges in the supreme courts includes only the judges of the court of cassation.

Q046 (2018): The staff of the judicial and administrative courts has grown steadily in the recent years, as established by the amended law of 7 March 1980 on judicial organization. This explains the significant variations observed between 2016 and 2018 in the judiciary and non-judge staff. According to the judicial organisation of Luxembourg, there is a Superior Court of Justice, composed of the Court of Cassation and the Court of Appeal. The judges of the Superior Court of Justice belong to both the Court of Cassation and the Court of Appeal. If, legally speaking, these are separate positions, in practice the five judges of the Superior Court of Justice occupy two positions and they are therefore counted among the judges of the Court of Appeal as well as at the level of the Superior Court of Justice .
The figures differ from those indicated in the last data collection campaigns on two points. 1) concerning the number of judges at the highest level: starting with 2016, we have distinguished between the judges sitting at the court of appeal and those of the Cour de cassation, which is the highest court in Luxembourg. Until 2016, and as the two courts taken together form the Cour supérieure de Justice (which as such has some very specific competences), we indicated only the total of the judges affected to the Cour supérieure. It might be useful for statistical purposes to distinguish between the two levels. 2) concerning the number of judges at the first level: the figures indicated until 2016 were superior to the real figures, as, erroneously, the prosecutors (which by law are also magistrates affected to these courts) had been included. We corrected this error in 2016.
There has been a major modification in june 2017, by the law of 27th of June 2017 adopting a multiannual program of recruitment into the judiciary and amending the amended law of 7th of March 1980 on judicial organisation, programming the future changes in the staff at the different entities. This law provides for

a multiannual program of recruitment of judges and prosecutors during the years 2017-2020. It entered into force in july 2017.

Q046 (2017): The Act of 27 June 2017 introducing a multiannual programme for recruitment to the judiciary and amending the amended Act of 7 March 1980 on the organisation of the judiciary, defines the number of posts in the various instances.
The indicated data correspond to the number of permanent positions actually held in 2017.

Q046 (2016): The figures differ from those indicated in the last data collection campaigns on two points.
1) concerning the number of judges at the highest level: starting with 2016, we have distinguished between the judges sitting at the court of appeal and those of the Cour de cassation, which is the highest court in Luxembourg. Until 2016, and as the two courts taken together form the Cour supérieure de Justice (which as such has some very specific competences), we indicated only the total of the judges affected to the Cour supérieure. It might be useful for statistical purposes to distinguish between the two levels.
2) concerning the number of judges at the first level: the figures indicated until 2016 were superior to the real figures, as, erroneously, the prosecutors (which by law are also magistrates affected to these courts) had been included. This error has now been corrected.

Q046 (2015): In 2014, the judges of the Administrative Court were included in the number of judges in the Supreme Court but in 2015 these judges were accounted as second instance judges.
Q046 (2014): In 2014, the judges of the Administrative Court were included in the number of judges in the Supreme Court but in 2015 these judges were accounted as second instance judges.
Q046 (2013): To the total number of judges, should be added 4 trainees ("attachés de justice"). The increase in the number of female judges at all instances between 2010 and 2013 is explained by the special attraction for a profession that allows to combine work and family life. Judges of second instance and those of the Court of Cassation are all part of the Superior Court of Justice.
Q046-2 (2023): The 6 judges of the Supreme Court, i.e. the Court of Cassation, deal with criminal, civil and commercial cases.

Q046-2 (2022): The 5 justices of the Supreme Court, namely the Court of Cassation, deal with criminal, civil and commercial matters.
Q052 (2023): Other non-judge staff consists of legal secretaries and a data protection compliance officer from the administrative courts.
Q052 (2022): In the realm of non-judicial personnel, there are referendaries and a data protection compliance officer within the administrative jurisdictions.

The increase in "other non-judge staff" was elucidated during the 2021 Scoreboard cycle and remains applicable: seen relatively, the number of other non-judge staff has risen by 175% between 2020 and 2022. In absolute terms, this equates to an increase of seven individuals since 2020, encompassing seven positions for referendaries. Both judicial and administrative jurisdictions are increasingly turning to referendaries to relieve magistrates of certain tasks.

Q052 (2021): The category “other non-judge staff” refers to the “référendaires” and the data protection compliance officer of the administrative courts.
The number of “other non-judge staff” has increased by 125% in absolute terms, which corresponds in fact to an increase of 5 persons, representing 5 posts of “référendaires”. Judicial and administrative courts are making greater use of “référendaires” to relieve judges of certain tasks.
Q052 (2020): The other non-judicial staff consists of three legal secretaries and a data protection compliance officer from the administrative courts.
Q052 (2018): Regarding the category "other non-judge staff", it includes non-judge staff working for administrative courts. The increase of the non-judge staff is due to the fact that we no longer distinguish between the staff in charge of administrative tasks and the staff assisting the judges as court clerks, since all the non-judge staff is in charge of assisting the judges. We interpreted this differently in the previous years. Previously some of the staff was considered as not assisting the judges, because of their statute, this appeared as not correct since none of them is limited to administrative tasks, except at the administrative courts, where six persons are in charge of purely administrative tasks. The revised 2017 data shows an increase of the total non-judge staff assisting the judges of 9.95%.

Q052 (2017): With regard to question 52, all the non-judge staff is in charge to assist the judges (except at the administrative courts). Therefore for the year 2017, we did no longer distinguish between staff of administrative tasks and the staff assisting the judges. Only at the administrative courts are 6 persons not assisting the judges.

Q052 (2016): Last year the separation of the sections 1, 2 and 3 was not done correctly. This year this task was made by the parquet general RH office.

Q052 (2014): The overall administrative tasks concerning ordinary courts are centralized at the level of the Prosecutor General Office. The same applies to technical staff. Among the 192 non-judge staff assisting judges, 117 are women. The category "staff in charge of different administrative tasks" (3 women, 2 men) and the category "technical staff" (1) refer exclusively to the Administrative Court (which was not the case for 2012). The 2014 data reflects the administrative reality, the staff that cannot be categorized to one specific task being attached to the State Prosecutor General. The total remains stable; slight variations are due to temporary replacements. The category "other" does not subsume external staff hired on contractual basis, e.g. in IT matters (as in 2012).

Q052 (2013): The overall administrative tasks concerning ordinary courts are centralized at the level of the Prosecutor General Office. The same applies to technical staff. Among the 192 non-judge staff assisting judges, 117 are women. The category "staff in charge of different administrative tasks" (3 women and 2 men) and the category "technical staff" (1) refer exclusively to the Administrative Court staff. The 2013 data reflects the administrative reality, the staff that cannot be categorized to one specific task being attached to the State Prosecutor General. The total remains stable; slight variations are due to temporary replacements. The category "other" does not subsume any more external staff intervening on contractual basis, for example in IT matters.

Q052-1 (2021): The 27% increase in the number of second instance non-judge staff is explained in particular by the hiring of additional “référendaires”. At the Supreme Court, the number of non-judge female staff decreased by 50% in relative terms; in absolute terms, this corresponds to one woman being replaced by a male member of staff.

Q055 (General Comment): The figure in point 3 includes both second instance and Supreme Court prosecutors, as they are grouped together in the Superior Court of Justice, which is subdivided into the Court of Appeal and the Court of Cassation.

Q055 (2022): Since the 2020-2022 Evaluation, the General Prosecutor's Office has seen an increase of two female prosecutors and a male prosecutor has been replaced by a female prosecutor following retirement. The decrease of -28.57% in male prosecutors at the Supreme Court and the 50% increase in female prosecutors at the Supreme Court can be attributed to this.

Q055 (2018): Le personnel des juridictions judiciaires et administratives a connu une croissance soutenue ces dernières années, tel que prévu par la loi modifiée du 7 mars 1980 sur l'organisation judiciaire. Ceci explique les variations importantes observées entre 2016 et 2018 au niveau du personnel de la magistrature et du personnel non-juge. Les magistrats appartenant à la cellule de renseignement financier (CRF) sont dorénavant exclus de la question 55.1 (suite au détachement de la CRF du Parquet de Luxembourg) puisqu’ils n’exercent plus de fonction juridictionnelle proprement dite. Au total, la CRF compte 4 magistrats et un attaché de justice en 2018. L’effectif du Parquet d’arrondissement reste toutefois inchangé suite à la création des nouveaux postes affectés à la CRF
Les magistrats du pool de complément sont inclus dans les chiffres de la question 55.3.

Q055 (2016): The number of prosecutors indicated here as working at the Supreme Court corresponds to the number of prosecutors working at the Superior Court of Justice (which includes prosecutors intervening at the Court of Appeal and Court of Cassation level).

Q055 (2014): The number of male public prosecutors decreased between 2012 and 2014, while the number of female public prosecutors increased for the same period. These variations have for sole explanation the normal progress of career of magistrates of the public prosecution office at first instance.

Q056 (General Comment): The General Prosecution Office at the level of the Superior Court is headed by one General State Prosecutor. There are also two district prosecution offices (Luxembourg and Diekirch), so there are two district prosecutors.

Q056 (2016): 56.1 to 56.3: the heads referred to therein are also taken into account for items 55.1 to 55.3
The number of prosecutors indicated here as working at the Supreme Court corresponds to the number of prosecutors working at the Superior Court of Justice (which includes prosecutors intervening at the Court of Appeal and Court of Cassation level).

Q060 (2022): The staff of the judicial and administrative jurisdictions has experienced sustained growth in recent years, as provided for by the amended law of 7 March 1980 on judicial organization, as we had previously explained during the evaluation period of 2020-2022. The variation in total non-judicial staff between 2020 and 2022 is 25.33%. An increase of 9% was observed between 2021 and 2022.

Q060 (2020):
"The staff of the judicial and administrative jurisdictions has grown steadily in recent years, as provided for by the amended law of March 7, 1980 on judicial organization. This explains the significant variations observed between 2018 and 2020 at the
judicial and non-judicial personnel.
In 2018, the FIU was administratively attached to the Parquet Général du Luxembourg. Due to the FIU's functional independence, analysts (13 positions) and administrative staff (6 positions) are no longer counted among the staff of the public prosecutor's office."

Q060 (2018): Le personnel des juridictions judiciaires et administratives a connu une croissance soutenue ces dernières années, tel que prévu par la loi modifiée du 7 mars 1980 sur l'organisation judiciaire. Ceci explique les variations importantes observées entre 2016 et 2018 au niveau du personnel de la magistrature et du personnel non-juge. En 2018, la CRF a été rattachée administrativement au Parquet général du Luxembourg. En raison de l'indépendance fonctionnelle de la CRF, les analystes (8 postes) et le personnel administratif (5 postes) ne sont dorénavant plus comptés parmi le personnel du ministère public. L'effectif du Parquet d'arrondissement reste toutefois inchangé, par rapport à 2017, suite à la création des nouveaux postes remplaçant les postes auparavant affectés à la CRF auprès du Parquet.

Q132 (General Comment): For the starting salary of a professional judge or a public prosecutor at first instance, we consider the salary of judicial attachés after their first appointment. The magistrates' salary scale provides a base of 380 index points; any prior professional experience may be added, but is not taken into account in our calculations.

For the theoretical maximum salary of a judge or prosecutor at the Court of Appeal, we consider grade M6, step 7, which corresponds to 647 points; an additional 25 points are added for managerial duties. To calculate the annual salary, these points must be multiplied by the value of the index point.

Q132 (2023): As the salary at the start of the career (professional judge of 1st instance or public prosecutor), we consider the salary of the attachés de justice after their first appointment. The salary scale for magistrates is based on 380 index points; any professional experience may be added to this, but is not taken into account in our calculations.
As the theoretical maximum salary for a judge or prosecutor at the Court of Appeal, we consider grade M6, step 7, which corresponds to 647 points, plus 25 points for management duties. To calculate the annual salary, these points must be multiplied by the value of the index point. In 2023, the value of the index point changed three times, namely on 1 February to 21.7301, on 1 April to 22.2733 and on 1 September to 22.8300. Taking these indices into account, a salary over 12 months corresponds to €101,592 gross for a professional judge of first instance, or a maximum salary of €179,657 for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned. Further explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the Civil Service website (https://fonctionpublique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html).

Q132 (2022): As a starting treatment for early career (professional judge or prosecutor), we consider the salary of "attachés de justice" after their initial appointment. The judge's salary scale provides for a base of 380 index points, with potential professional experience that may be added but is not taken into account in our calculations.

For the theoretical maximum salary of a judge or prosecutor at the Court of Appeal, we consider grade M6, step 7, which corresponds to 647 points; an additional 25 points are added for managerial functions. To calculate the annual salary, these points must be multiplied by the value of each index point. Between January and March 2022, the value was set at 20.6831871 per index point; after April 1st, 2022 it increased to 21.2002547 per index point. Taking these indices into consideration yields an annual gross salary equivalent to €96,084 for a professional judge at first instance and up to a maximum salary of €169,916 for a judge or prosecutor at Supreme Court level.

These figures do not include any potential bonuses or allowances that may supplement the basic salary according to each individual judge's circumstances."

For further details on calculating civil servant payments applicable also to magistrates' Grade M careers can be found on Public Service website: https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html

Q132 (2021): As a starting salary (professional judge of first instance or prosecutor) we consider the salary of the “attachés de justice” after their first appointment. The salary scale of the magistrates provides for 380 index points as a basis, a possible professional experience can be added to it but is not taken into account by our calculations.
As a theoretical basic salary for a judge or prosecutor at the Court of Appeal we consider the grade M4, level 4, which corresponds to 455 points and to the average seniority of a magistrate appointed to the Court (Court and General Prosecutor's Office). However, it should be taken into account that this salary is strongly influenced by the family situation of the person concerned.
To calculate the annual salary, these points must be multiplied by the value of the index point. Between January and September 2021, the value of the index point for a civil servant was 20.17893; after 1 October, the value of the index point was 20.6831871. Taking into consideration these elements, a 12-month salary corresponds to 92 591€ for a first instance professional judge, respectively a salary of 110 865€ for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the civil service website (https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html).

Q132 (2020): "As a starting salary (professional judge of first instance or prosecutor) we consider the salary of the judicial attachés after their first appointment. The salary scale of the magistrates provides for 380 index points as a basis, a possible professional experience can be added to it but is not taken into account by our calculations.
As a theoretical basic salary for a judge or prosecutor at the Court of Appeal we consider the grade M4, step 4, which corresponds to 455 points and to the average seniority of a magistrate appointed to the Court (seat and General Prosecutor's Office). However, it should be taken into account that this salary is strongly influenced by the family situation of the person concerned.
To calculate the annual salary, these points must be multiplied by the value of the index point. In December 2020, the value of the index point for a civil servant was 20.17893, which corresponds to a 12-month salary of 92.016€ for a professional judge of first instance, respectively a salary of 110.177€ for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the civil service website (https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html)."

Q132 (2019): As a salary at the beginning of the career (first instance professional judge or prosecutor) we consider the salary of the “attachés de justice” after their first appointment. The salary scale for judges and prosecutors is based on 380 points, any professional experience can be added but is not taken into account in our calculations. To calculate the annual salary, these points must be multiplied by the value of the index point. In December 2019, the value of the index point of a civil servant was 20,17893, which corresponds to a salary of €92,016 over 12 months. In 2016, this figure corresponded to €84,185 and in 2018 to €89,771. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates (judges and prosecutors), can be found on the civil service website: https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html.

Q132 (2016): The salary are those of the Court President and the Prosecutor General as no average salary can be calculated.

Q146 (2023): At the Luxembourg Bar, the number of individual lawyers (3,377) includes the ‘individual’ lawyers who represent legal entities. The number of corporate lawyers (216) includes the number of law firms registered with the Bar. The Diekirch Bar currently has 54 ‘natural person’ lawyers and 6 law firms represented by natural persons. In total, therefore, in 2023 there will be 3431 lawyers who are natural persons, including the lawyers who represent the 222 legal entities. Since the entry into force of the law of 16 December 2011 concerning the practice of the legal profession in the form of a legal entity (article 8 (10) and (11) of the law on the legal profession of 10 August 1991), a natural person (a lawyer registered on list I or IV, i.e. a natural person) may practice the legal profession through a legal entity (registered on list V or VI).

Q146 (2022): The number of individual lawyers, amounting to 3202, includes those individual lawyers who represent legal entities. The number of law firms, totalling 207, encompasses the registered law firms listed in the Bar Association's registry. Presently, the Diekirch Bar has 53 individual lawyers and 4 law firms (4 from list V and 1 from list VI) represented by individual lawyers. Therefore, in 2022, there was a total of 3255 individual lawyers including those representing the 211 legal entities.

An individual (lawyer listed on lists I or IV as an individual) may practice law through a legal entity (listed on lists V or VI) since the entry into force of the Law of December 16th 2011 concerning the exercise of lawyer profession in form of a legal entity (article8(10)and(11) of the Law on the Lawyer Profession of August 10th 1991).

Q146 (2021): The Diekirch Bar did not provide details on the breakdown of the number of lawyers by gender. Among lawyers registered at the Luxembourg Bar, who represent 98% of the lawyers registered at the two Luxembourg Bars, 52% were male and 48% were female.

Q146 (2015): The number indicated includes the number of lawyers, trainee lawyer, lawyers practising under their home-country professional titles and independent lawyers at September 1st, 2016.

Malta

Q004 (2023): Data provided by the NSO

Q004 (2022): This is the data provided and verified with the National Statistics Office

Q004 (2021): The figure quoted above relates specifically to the Average Annual BASIC salary as provided by the National Statistics Office of Malta. The NSO do not collect the Average Annual Gross salary.

Q004 (2018): This data has been provided by NSO based on as yet provisional estimates.

Q046 (General Comment): In Malta there is no Supreme Court, the Court of Appeal being the Court of second instance. The Constitutional Court, then, is presided over by the 3 judges who compose the Court of second instance also known as the Court of Appeal in its Superior Jurisdiction. The number of 1st Instance 'judges' also includes magistrates that preside over 1st Instance Courts.

Q046 (2023): Over 2023, the judicial complement was increased by 4 new members that have been appointed to the bench.

Q046 (2021): During 2021, 4 new magistrates and 2 new judges were appointed to the bench, thereby increasing the judicial complement by the same number. 2 judges were also appointed to the bench, but given that they were previously magistrates, their appointment did not increase the judicial complement.

Q046 (2019): For Number of first instance professional judges, the difference in nominal figures is of 4 male magistrates compared to previous cycle. This is mainly due to retirement and the appointment of 2 male magistrates to judges. 3 new magistrates have been appointed in 2019, only 1 of which is male.
For the Number of second instance professional judges, Madame Justice Lorraine Schembri Orland has been appointed Judge elect in respect of Malta on the European Court of Human Rights. Given that she did not serve in Malta at the end of 2019, she does not feature in the above data.

Q046 (2017): Despite the categorical manner in which the Maltese judiciary have been classified for the purpose of this exercise, it is important to note that the roles of some of the judges are very fluid. Hence, some of the 1st Instance judges preside, when the need arises, over 2nd Instance courts, whilst 2nd Instance judges hear cases at 1st Instance such as at the Civil Court, First Hall or the Civil Court, Family Section.
Throughout 2017, 1 male 1st Instance Judge passed away at the beginning of the year, whilst another 2nd Instance Judge retired towards the end of the year. 1 female Magistrate has been appointed. Care is being taken in order to ensure an equal gender representation in the appointments of the judiciary.

Q046 (2016): Despite the categorical manner in which the Maltese judiciary have been classified for the purpose of this exercise, it is important to note that the roles of some of the judges are very fluid. Hence, some of the 1st Instance judges sit, when the need arises, in 2nd Instance courts, whilst 2nd Instance judges hear cases at 1st Instance such as at the Civil Court, First Hall or the Civil Court, Family Section.
There has been an increase of 3 female judges at 1st instance since 2014. There was an increase from 15 to 17 female judges at 1st instance in 2015 and a further increase of 1 female judge at 1st instance in 2016. Care is being taken in order to ensure an equal gender representation in the appointments of the judiciary.

Q046 (2015): Regarding the number of judges, the high percentage variations that might be observed results from the small absolute number of judges that Malta has. Malta has been trying, and there are still on-going efforts, at increasing the number of judges. If between 2010 and 2015 the number of male judges decreased (by 1), this was complemented by an increase in the number of female judges (also by 1).

Q046-2 (2022): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed from a number of first instance courts (not only the Administrative Review Tribunal). Given that these cases constitute only a fraction of the caseload of this judge, it would be misleading to indicate him as a 2nd Instance judge over appeals from administrative cases.

Q046-2 (2021): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed from a number of first instance courts (not only the Administrative Review Tribunal). Given that these cases constitute only a fraction of the caseload of this judge, it would be misleading to indicate him as a 2nd Instance judge over appeals from administrative cases.

Q046-2 (2020): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed form a number of first instance courts (not only the Administrative Review Tribunal).

Q052 (2023): The distribution of gender by category listed above is a reflection of the changes resulting from the recruitment process. The Court Services Agency is an impartial employer and is constantly seeking to recruit additional staff to support the increasing number of the judiciary, and functions/ operations in court. Fluctuations in the gender ratio are purely incidental.

Q052 (2022): The increase in the number of non-judge staff when compared to the previous evaluation results from an increase in the staff making up the judicial teams of new judges. In addition, there has also been an increase in the number of technical staff with a new grade entitled 'Other industrial grades' being inserted for the first time in this evaluation.

Q052 (2019): For Technical Staff: This is an issue of recruitment and given the change from a Department to an Agency, the Court Services will be issuing new calls in line with the requirements of the Agency.
Q052 (2018): Other non-judge staff include:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti Personnel

Q052 (2017): Other non-judge staff includes:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti staff

Q052 (2016): Other non-judge staff includes:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti staff

Concerning "Technical Staff", 2 technical staff were employed. Between 2014 and 2015, there was a decrease in the number of tradesman employed with the court administration.

Q052 (2015): In the 2015 data, the category 'Non-judge staff whose task is to assist the judges' includes 13 Court Attorneys that have been introduced for the first time in October 2015. This staff is meant to assist the judges in the drafting of the sentences and other related matters. However the Court Attorneys are not autonomous and the responsibility for the sentences that they draft ultimately lies with the presiding judge.
The differences noted between 2014 and the previous regarding the categories "staff in charge of administrative tasks" and "other non-judge staff" is due to a change in the distribution. After 2014, some non-judge staff who were included in the category "staff in charge of administrative tasks" were integrated in "other non-judge staff".
The decrease between 2014 and 2015 in the number of "technical staff" is due to a decreases in the number of tradesman.

Q052 (2014): The differences noted between 2014 and the previous regarding the categories "staff in charge of administrative tasks" and "other non-judge staff" is due to a change in the distribution.

Q052 (2013): In 2013, the number of non-judge staff was detailed as follows: staff assisting judges – deputy registrars (67), court messengers (19), judicial assistants (30), clerical staff (141), ushers (25), senior court recorders (12), court recorder in charge (1), and Children's advocate (2); staff in charge of administrative tasks – Directorate Support Services (86), Directors and staff (12), Asset Management unit (3), Archives (3), one stop shop (7), Subasti (3), Library (1), Publications (3) technical staff – tradesmen (7), Bookbinder (1);
"other" – cleaners (8), Chief Marshal (1), Marshals (20). An exercise at beefing up the Court administration staff was undertaken by the Government in 2013, fas a result of which, the figures for different sub-categories have increased considerably.

Q052-1 (2020): It is not possible to differentiate the non-judge staff according to these criteria.

Q052-1 (2018): It is not possible, at the moment, to differentiate the staff working at first instance from that working at second instance.

Q055 (General Comment): All the lawyers working in the Office of the AG prosecute cases in the criminal courts, but it is not possible, to distinguish between 1st and 2nd Instance Courts. All full-time lawyers have been included in the above figure except the AG herself.

Q055 (2023): The increase in the number of prosecutors follows a recruitment drive throughout 2023

Q055 (2022): The increase in the number of prosecutors is the result of a recruitment drive that was carried out in 2022.

Q055 (2020): The increase in the number of lawyers working at the Office of the AG follows the reform in 2020 whereby the AG has taken up exclusively the role of prosecutor general (the advisory role to government has been vested in the State Advocate). Given this special focus, the Office of the AG has been recruiting more lawyers in order to meet the case demands of the courts.

Q055 (2016): All the lawyers at the Office of the Attorney General work both in Court as well as advisers to the various Ministries and Departments. All prosecuting officers at the Office of the Attorney General act at all court levels. Thus, prosecutors are not classified according to the case instance.

Q055 (2014): These past few years there has been an increase in the number of female law graduates, which will definitely reflect in the employment trends within this sector.

Q056 (General Comment): The Attorney General is the head of the Office of the Attorney General and her role as Head of Prosecution is defined in the Constitution of Malta.

Q056 (2018): The Attorney General is the head of the Office of the Attorney General. He enjoys the support of 2 Deputy Attorney Generals, one dedicated to civil law and the other dedicated to criminal law.

Q056 (2016): The Attorney General is the head of the Office of the Attorney General. His role is that of head of the prosecution as well as principal legal advisor to the government (and its various Ministries and Departments).

Q057 (General Comment): Police had the authority to investigate and initiate prosecutions before the Court of Magistrates. The Office of the AG prosecutes trials by jury and appeals therefrom and also files and prosecutes appeals from the decisions of the Court of Magistrates. Following the reform in 2020 in which the Office of the AG became Chief Prosecutor, a number of cases previously prosecuted by the police are being gradually handed over to the lawyers working at the Office of the AG.

Q057 (2018): Police have the authority to initiate prosecutions and to prosecute cases before the Court of Magistrates. If cases are serious enough to go to trial by jury (theoretically any case liable by imprisonment for more than 2 years can got to trial by jury, but cases in which trial by jury is mandatory are those in which the charge is liable to imprisonment for 12 years or more. In practice, most trials by jury deal with these kind of serious offences). The prosecution from the Office of the Attorney General prosecute trials by jury and appeals therefrom and also files and prosecutes appeals from the decisions of the Court of Magistrates.

Q057 (2016): In Malta, the police have the authority to prosecute a case in court, unless the nature of the offence is serious enough to merit prosecution in the higher courts by the lawyers working at the Office of the AG. The figure presented above reflects the number of Police Inspectors and Police Superintendents whose duties include prosecution in court.

Q060 (2022): Like in previous evaluations, the number of non-judge staff includes legal procurators working at the Office of the Attorney General.

Q060 (2016): This data relates specifically to the staff working int he Office of the AG.

Q060 (2014): The number of non-public prosecutors staff declared for 2014, is categorised as follows: supporting paralegal clerical staff – 17 (6 Male/11 Female); civil lawyers acting as attorneys – 13 (11Female/2 Male), legal prosecutors – 3 Female.

Q132 (2023): The increase in the gross and net wages are the result of a recalculation of the wage after adjusting for NI and tax in the 3 tax rates (Single / Parent / Married). Please also note that there was a revision in the salaries backdating to 2023.

Q132 (2022): Following the newly signed collective agreement the Office of the Attorney General, the new salary package commensurate to the different positions within the Office have changed since those provided in previous submissions. The salary package provided above within the field 'Public prosecutor at the beginning of his/ her career' refers to the salary package of Lawyer III.

Q132 (2020): Wages for the lawyers of the AG were improved following a revision of salaries.

Q132 (2019): Public prosecutor at the beginning of his/her career: Actually there was an increase in the gross annual salary which is also reflected in the net annual salary. The difference in the net annual salary is then due to the different tax brackets that apply.

Q132 (2018): In 2018, following discussions with the Judiciary Association, the Ministry substantially increased the wage package of the members of the judiciary across all grades (Magistrates, Judges and Chief Justice). The agreement saw an increase in the basic salary and allowances received by the judiciary, with further increases planned over the coming 3 years. This improvement in the wage package reflects the commitment of the current administration to improve the working conditions of the judiciary, and continues to build on the reforms already brought into effect by the Constitutional Reforms (Justice Sector) Act of 2016.

Q132 (2014): The 2014 figures include the allowances over and above the 'basic' wage. A Magistrate has competence to hear all civil cases up to a value of €11,650 and criminal cases up till an imprisonment of 10 years whilst Judges hear all the other cases. The data provided relates to the salary of a Magistrate (in respect of first instance professional judge) and a Judge (in respect of Judge of the Supreme Court). The Net Annual Salary varies according to the Income Tax Bands announced, from time to time, and therefore it is not possible to indicate the amounts. The figures provided for as net income were calculated on the salary above-indicated for a married person.

Q133 (General Comment): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through he introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

Q133 (2022): In respect of 'Special Pension' for Public Prosecutors, The Pensions Ordinance, Chp 93 of the Laws of Malta, stipulates a special pension for the Attorney General only.

Q133 (2020): In respect of 'Special Pension' for Public Prosecutors, The Pensions Ordinance, Chp 93 of the Laws of Malta, stipulates a special pension for the Attorney General only.

Q133 (2018): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through he introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

Q133 (2016): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through he introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

Q146 (2021): The answer to Q146 represents the warranted lawyers who have registered themselves in the Register of Legal Professionals and Law Firms as per Act XIX of 2021. As from this evaluation onwards, the number of lawyers quoted will always be sourced from this official register.

Q146 (2017): The number of lawyers quoted in this answer refers to the number of warranted lawyers at the end of 2017. This data is based on a list of warranted lawyers practicing in Malta, compiled by the Department of Justice. Work on this list is ongoing but it is important to note that the figure quoted above, reflects a more faithful representation of the number of warranted lawyers in Malta.

Q146 (2016): The number of lawyers quoted in this answer refers to the number of warranted lawyers who are also members of the Chamber of Advocates, at the end of 2016. Throughout 2016, the Chamber of Advocates has been updating their list of members in order to clear the names of the lawyers who have either retired or have passed away. Furthermore, it is important to note that at present membership with the Chamber of Advocates, which is the sole Bar Association in Malta, is not mandatory. Hence over the past few months, the Department of Justice is drawing up the first complete list of warranted and non-warranted lawyers in Malta. Work is still underway so it is important to note that the figure quoted above, which is less than that submitted in the previous evaluation, reflects a more faithful representation of the number of warranted lawyers in Malta.

Q146 (2015): The number of lawyers quoted in this answer refers to the number of warranted lawyers on the list of advocates at the end of 2015. It is possible that some of these lawyers have retired so whilst the warrant remains valid, it does not necessarily mean that all 1569 lawyers are practising the profession. At present there does not exist any mechanism wherein lawyers register once they are given the Warrant to practice, and membership with the Chamber of Advocates, which is the sole Bar Association in Malta, is not mandatory to practice as a lawyer.

Q148 (General Comment): This data was not available prior to 2014. It started being collected by the Department of Justice in 2015.

Q148 (2021): Throughout 2021, 4 new applications have been submitted out of which 3 were accepted.

Q148 (2019): Throughout 2019, only 5 EU legal professionals were granted the respective certificate of registration with the limitation that they cannot represent their clients in court. Many more applications are pending evaluation.

Q148 (2018): The figure of 135 legal advisors is derived form the composite of 101 legal advisors at the end of 2017 and 34 new applications throughout 2018. hence at the end of 2018, there were 135 legal advisors who could practice with an established lawyer in Malta but cannot represent clients in court.
Q148 (2017): In 2017, there have been 25 newly registered legal advisors.

Netherlands

Q004 (General Comment): Average gross annual salary is based on provisional numbers, definitive numbers (usually available in the next year) may differ slightly from those provided here.
Salary is defined as 'reward per working year'. This reward consists of salary (gross salary, including taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances tied in with work (e.g. travel allowances), and social premiums for the employer (payments for lawful and contractual social security, like pension contributions). The CBS has somewhat different numbers available than those used by Eurostat, therefore, numbers presented here might differ from those in Eurostat.

Q004 (2020): These are provisional numbers and the definitive numbers (available in 2022) may differ slightly from these provided here. The data specifies ‘reward per working year’ as salary. The reward consists of salary (gross salary, as it includes taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances that tie in with work (like travel allowances that cover costs to and from work), and social premiums that are for the employer (payments for lawful and contractual social security, like pension contributions).

Q004 (2019): The Statistics Bureau only had numbers for 2018. 2019 data was not available at the moment of data collection.

Q004 (2018): This is average salary of all employees; the number includes money that employers pay for pension plans, social security (money that is paid directly to employees). The statistic does not include the income of people who are not employees (people without work, employers).
Q004 (2016): Compared to previous questionaires (before 2014) these figures have been adjusted according to new rules of the european system of national accounts (illegal activities are now included)
Q046 (General Comment): Since 2020, new methodology of presentation of data is used, allowing distinguishing between first and second instance for the specific group of judges who were previously all counted as first instance judges ('overig RA'). For all cycles, court presidents are taken into consideration in the figures. Numbers for first and second instance are on posts filled, not fte. We cannot provide more detailed information. For the Supreme Court, fte and posts filled are the same.

Q046 (2023): Total fte for first and second instance is 2 477. For the Supreme Court, fte and posts filled are the same.

Q046 (2022): Numbers for first and second instance are on posts filled, not fte. Total fte for first and second instance together is 2 451. We cannot provide more detailed information. For the Supreme Court, fte and posts filled are the same.

Q046 (2021): Numbers are on posts filled, not fte. Total fte is 2416.
Total fte for first and second instance was given in 2021, but information on fte was NA for the rest of the categories and the detail required cannot be provided.
For the Supreme court, fte and posts filled are the same.

Q046 (2020): These numbers are on posts filled, not fte. The total fte for first and second instance together is 2372, but information on fte is NA for the rest of the categories and detail required for this question. These numbers include court presidents.
In the previous cycles, due to an inability to differentiate between first or second instance for a certain group of judges, they were counted as first instance judges. This inflated the first instance numbers and underreported the second instance numbers. This problem was present in the data up until the 2019 survey. For the 2020 data, this problem has been solved, and the data is now correct.

Q046 (2018): We did not receive information on the number of judges (in fte) working at the High Court. There are 33 judges at the High Court (people, not fte), 20 male / 13 female. Since this concerns only 1% of all judges, we'd suggest to work with these numbers (and accept the small deviation in the calulated total number)
Q046 (2017): these are number of people (posts); the total number of fte is 2315, this can not be separated for 1st and 2nd instances
NB: data on the number of Supreme Court judges is provided in fte. More precisely, according to the annual report of the Council of State https://jaarverslag.raadvanstate.nl/2017/ the number was 37.9 fte in 2017.
Q046 (2016): All data in number of persons. FTE data are only available for the total: 2148.
Supreme Court NA

Q046 (2015): Number of deputy judges courts in 2015 = 1.100
The numbers provided in the table are posts. The FTE is avaialble only for the total and it is 2.169. Other categories are NA.

Q046 (2014): In 2014, the number of first instance judges does not include judges of the Trade and Industry Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.

Q046 (2013): In 2013, the total in fte is 2 181. This was excluding the Supreme Court. The number of first instance judges excludes judges of the Trade and Industry Appeals Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.

Q046-2 (General Comment): Numbers for first and second instance are on posts filled, not fte. For the Dutch Supreme Court, fte and posts filled are the same.
Note that the judges under the category 'Administrative' (Supreme Court) refer to the judges in the tax chamber of the Dutch Supreme Court. With regard to administrative law, the Dutch Supreme Court only handles tax cases and some social security cases. There is no third instance court for other administrative cases in the Netherlands.
Judges in first and second instance often work more than one case type. There is a large overlap, but in the administrative system, only one sector can be registered. Therefore, making a distinction would not be a fair reflection of the true situation and the information is not easily available.

Q046-2 (2023): Total fte for first and second instance is 2 477.

Q046-2 (2022): Numbers are on posts filled, not fte. Fte for first and second instance is 2 451.

Q046-2 (2021): Numbers are on posts filled, not fte. FTE for first and second instance is 2416.
For SC fte and posts filled are the same. Note that the 11 judges under the category 'Administrative' (Supreme Court) refer to the judges in the tax chamber of the Dutch Supreme Court. With regard to administrative law, the Dutch Supreme Court only handles tax cases and some social security cases. There is no third instance court for other administrative cases in The Netherlands.

Q046-2 (2020): Judges often work with more than one case type. There is a large overlap, but in the administrative system, only one sector can be registered. Therefore, while this information is not easily available, making this distinction would also not be a fair reflection of the true situation.
These are positions filled, not fte (like Q46).

Q052 (General Comment): Only the total of non-judge staff working in first and second intance courts is available.

Q052 (2023): The Council of the Judiciary is not able to make a distinction between different types of non-judge staff working in courts, and thus, the entry is NA (total fte =7 762, number of posts filled: 8 769). The Supreme Court can make the distinction between the number of non-judge staff whose task it is to assist judges (fte=110) and staff in charge of different administrative tasks (fte= 100).

Q052 (2022): The Council of the Judiciary is not able to make a distinction between different types of non-judge staff working in courts, and thus, the entry is NA (total fte = 7 477). The Supreme Court can make the distinction between the number of non-judge staff whose task it is to assist judges (fte= 101) and staff in charge of different administrative tasks (fte= 158).

Q052 (2021): The Council of the Judiciary is not able to make a distinction between different types of non-judge staff working in courts, and thus, the entry is NA. The Supreme Court can make a distinction for the number of non-judge staff whose task is to assist the judges (fte = 110), and staff in charge of different administrative tasks (fte = 148). The first and second instance court cannot (total fte = 7395).

Q052 (2017): the number given is the number of people (posts), the fte is 6719; these can not be separated by gender or line in the table

Q052 (2016): Number of FTE = 6530.

Q052 (2015): FTE in 2015 is 6.497

Q052 (2014): The figure 7 287 pertains to persons; data in FTE is 6 495.

Q052 (2013): According to 2013 data, the figure 7.287 pertains to persons, data in fte is 6.495.

Q052-1 (General Comment): Comments from the SC:
1.Note that the above also includes the judicial and other staff working for the office of the Procurator General and Advocates General at the Dutch Supreme Court (who are not part of the Dutch public prosecution office).
2.Note that the Dutch Supreme Court has outsourced various tasks such as building maintenance, technical services, facility management, reception, security, cleaning, and catering. The individuals performing these services are therefore not included in the numbers above.

Q052-1 (2021): Comments from the SC:
1.Note that the above also includes the judicial and other staff working for the office of the Procurator General and Advocates General at the Dutch Supreme Court (who are not part of the Dutch public prosecution office).
2.Note that the Dutch Supreme Court has outsourced various tasks such as building maintenance, technical services, facility management, reception, security, cleaning and catering. The individuals performing these services are therefore not included in the numbers above.

Q052-1 (2018): The total of non-judge staff does not include staff of the High Court.

Q055 (General Comment): The Dutch Supreme Court does not have public prosecutors. The office of the Procurator General and Advocates General at the Dutch Supreme Court is separate from Dutch public prosecution and the Ministry of Justice. They have a different function.
Q055 (2020): The Supreme Court does not have (public) prosecutors. The office of the procurator general and attorneys general that the Supreme Court houses, is separate from the public prosecution and does not function as prosecution. They have a different function.
Q055 (2016): total 927,5 358,12 569,38
1 842,25 312,72 529,53
2 85,25 45,40 39,85
Q055 (2014): For 2014, the number of prosecutors at first instance level includes 8 prosecutors who are still in education (7 females; 1 male). Prosecutors at Supreme Court level are not employees of the National Prosecution Service and therefore not included in the total.
Q056 (2016): total 61,44 44,1 17,34
1 59,32 41,98, 17,34
2 2,12 2,12 0
Q056 (2014): The number of heads of prosecution offices at first instance level in 2014 includes 19,77 substitutes (14,54 male/5,23 female). Prosecutors at Supreme Court level are not employees of the National Prosecution Service and therefore they are not included in the total.
Q057 (General Comment): In 2018, the function of assistant-public prosecutor (now: deputy public prosecutor) was introduced. They are mandated to act as public prosecutors in parts of the caseload that are high-volume and less complex. In such cases, they have the same powers as a Public Prosecutor: to decide on the type of settlement the Prosecution Service will pursue (afdoeningsbeslissingen), and to represent the prosecution in court as acting Public Prosecutor in single-judge hearings (plaatsvervangend officier enkelvoudige zittingen), independently. It is a permanent position requiring a law degree with a specialisation in criminal law.
Q057 (2020): Assistant-Public prosecutor
Since the previous cycle, the function of assistant - public prosecutor has been introduced.
Q060 (2023): Administration, business operations, policy, management, management support, project managers, secretary, trainees.
Q132 (General Comment): Numbers include a vacation stipend and 13th month (together 16.3% of the annual salary). Please refer to legislation (https://wetten.overheid.nl/BWBR0006530/2023-07-01#Hoofdstuk2b) on this subject.
Salary of a judge / prosecutor ‘at the beginning of their career’: the salary used is the one for a starting judge/prosecutor, after finishing a training period of several years. During the training there is a separate salary, which is lower than the salary of a fully functional judge/prosecutor.

Q132 (2022): Discrepancy comment: In 2021 we needed to look for a different methodology to calculate the net annual salary for a public prosecutor. This year, we believe we have found a reliable simulation method, and using this, we came to this answer. Using this methodology, answers for previous years would be:
2020: 84.058 (B) en 49.185 (N)
2021: 85.195 (B) en 50.175 (N)
2022: 87.637 (B) en 51.555 (N)

Q132 (2021): Public prosecution: Numbers are including a vacation stipend and 13th month. There is no new collective labour agreement as of yet, so these numbers are the same as last year. As soon as a new agreement is reached, the salary may change retroactively.
Concer
Courts: Salary of a judge / prosecutor ‘at the beginning of career’: the salary used is one for a starting judge / prosecutor, after finalizing a training period of several years. During the training, there is a fixed salary, lower than the salary of a fully functional judge/prosecutor. Salary includes a holiday stipend, as well as a 13th month.
Supreme Court: the above amount is the average gross salary (11.163,63 euro per month) for a regular Supreme Court judge and includes a holiday allowance (8% of annual salary) and a so-called 13th month (8.3% of annual salary). Please refer to legislation (https://wetten.overheid.nl/BWBR0008365/2021-07-01) on this subject as well as the salary scheme (https://nvvr.org/uploads/documenten/Salaristabellen-RM-juli-2021.pdf).

Q132 (2016): The discrepancy of the answers for gross salary is not clarified.

Q133 (2021): SC: Other financial benefits for a regular Supreme Court judge would be a tax free monthly allowance for expenses of 1.502 euro. Please refer to the legislation (https://wetten.overheid.nl/BWBR0008365/2021-07-01) and regulation (https://wetten.overheid.nl/BWBR0031765/2021-01-23) on this subject.

Q146 (2021): On 1-1-2021: 17 964 (9 837 male, 8 127 female)

Q146 (2020): This is the number of lawyers on 1-1-2021
Number of lawyers on 1-1-2020: 17.829 (total), 9867 (males), 7962 (females)

Q146 (2019): Numbers on 1/1/2020

Q146 (2017): Annual report NOVA 2017

Q147 (2017): NA

Q147 (2016): NA.

Poland

Q004 (2021): data source - Central Statistical Office
The wage increases linked to economic changes.
Q004 (2016): NA

Q046 (General Comment): The Polish court structure is characterized by four levels of courts but only three instances. Basically, there are district courts which are first instance courts, regional courts which are first and second instance courts, and appellate courts which are second instance courts. The highest instance courts are the Supreme Court, the Supreme Administrative Court and the Constitutional Tribunal. Owing to this peculiarity, some judges sit as first and second instance magistrates. According to the methodology of presentation of data that has been chosen, judges of regional courts are counted as first instance judges together with judges of district courts and judges of first instance administrative courts. Only judges of appellate courts are considered as second instance magistrates. The Supreme Court operates under the Constitution of the Republic of Poland and the Supreme Court Act. It is established to:
- exercise supervision over the activities of common and military courts in the area of adjudication - this is the so-called judicial supervision (Article 183(1) of the Constitution). The means used to exercise such supervision include:
- recognition of extraordinary complaints, cassations and other appeals (instance supervision),
passing resolutions resolving legal issues (extra-institutional supervision) Resolutions of the entire chamber or a larger body of judges have the force of law and are binding on all Supreme Court formations. A panel of 7 judges may decide to give the resolution the force of legal principle.
Competence of the Constitutional Tribunal
The Constitution of 2 April 1997 includes four areas within the jurisdiction of the Constitutional Tribunal:
1) control of norms (abstract and concrete; a posteriori and a priori - Art. 188 items 1-3, Art. 122 items 3 and 4, Art. 133 item 2 of the Constitution); a special procedure for the control of norms is the consideration of constitutional complaints (Art. 79 and Art. 188 item 5 of the Constitution)
2) adjud

ication of competence disputes between central constitutional organs of the state (Article 189 of the Constitution);
3) adjudicating on the compatibility with the Constitution of the objectives or activities of political parties (Article 188, item 4 of the Constitution)
4) recognising the temporary inability of the President of the Republic to discharge his office (Article 131, paragraph 1 of the Constitution).
Of the four areas of the jurisdiction of the Tribunal indicated above, the control of norms is undoubtedly a fundamental task.
Court assesors:
A person may be appointed to the position of assessor if he or she fulfils the conditions laid down in Article 61 § 1 points 1-4 of the Act on the Common Courts System and, moreover, has completed training at the National School of the Judiciary and Public Prosecution and passed a judge's or prosecutor's exam. Court assessors are appointed by the President of the Republic of Poland for an indefinite period of time, at the request of the National Council of the Judiciary. In the exercise of his or her office, a judicial assessor is independent and subject only to the Constitution and the laws. Assessors who are entrusted with the duties of a judge perform adjudicatory functions in district courts alongside judges. However, they may not: apply pre-trial detention to a detainee handed over to the court's disposal with a request for pre-trial detention, hear complaints against decisions on refusal to initiate an investigation or enquiry, against decisions on discontinuance of an investigation or enquiry, or against decisions on discontinuance of an enquiry and entry of a case in the register of offences, and adjudicate family and guardianship law cases. After 36 months, an assessor can be appointed as a judge by the President of the Republic.
Not all professional judges are assessors first. Those who, prior to their appointment, may also apply for the position of judge:
1) occupied the position of a judge of an administrative court or military court;
2) held the position of a prosecutor;
3) worked at a Polish higher education institution, the Polish Academy of Sciences, a research institute or other scientific institution and has the academic title of professor or the academic degree of doctor habilitowany in legal sciences;
4) Has practised as an advocate, legal adviser or notary public for at least three years;
5) has held the position of president, vice-president or counsel of the General Prosecutor's Office of the Republic of Poland - for at least three years.
The position of an assessor is not then required. In 2021 and 2022, Question 46 always included the number of district court judges, circuit court judges and assessors adjudicating at first instance.

Q046 (2023): Common courts:
1. The number of judges of district, regional courts + court assessors: 9444 (5963 women, 3481 men)
2. The number of judges of the appeal courts: 484 (240 women, 244 men)
Administrative Courts - first instance= Voivodship Administrative Courts - 422 judges (226 women, 196 men); Supreme Administrative Court 108 judges (37 women, 71 men) Supreme court – 95 judges (22 women, 73 men)

Q046 (2022): Common courts:
1. The number of judges of district, regional courts + court assessors: 9403 (5904 women, 3499 men)
2. The number of judges of the appeal courts: 469 (238 women, 231 men)
The numbers are higher because the president appointed a lot of court assessors as judges in 2022. In addition, there were more appointments to the regional and appeal courts than retirements of judges from these courts.
Administrative courts:
1. The number of judges of district + court assessors: 491 (275 women, 216 men)
2. The number of judges of the Supreme Administrative Court : 107 (37 women, 70 men)

Q046 (2021): Common courts:
The number of judges of district courts: 6046 (3938 women, 2108 men)
The number of judges of regional courts : 2684 (1550 women, 1134 men)
The number of judges of the appeal courts: 459 (239 women, 220 men)
The numbers are higher because the president appointed a lot of court assessors as judges in 2021. In addition, there were more appointments to the regional and appeal courts than retirements of judges from these courts.
The Supreme Court : 93 (73 men, 20 women)
The Administrative Supreme Court: 102 (62 men, 40 women);
Administrative courts first instance: 431 (192 men, 239 women);

Q046 (2020): The number of judges of district courts: 6036 (3922 women, 2114 men)
The number of judges of regional courts : 2544 (1462 women, 1082 men)
The number of judges of the appeal courts: 417 (220 women, 197 men)
The number of judges of the first instance administrative courts : 454 (260 women, 194 men)
Supreme courts:
The number of judges of the Supreme Administrative court: 102 (62 men, 40 woman).
The number of judges of the supreme court: 97 (75 men, 22 woman).
Military courts:
The number of judges of district military courts: 18 (1 woman, 17 men)
The number of garrison judges: 27 (5 women, 22 men).
*Starting from 2020 the number of Supreme court judges include also judges of the Supreme Administrative Court

Q046 (2019): Compared to the previous edition, the number of judges of the supreme court was also given.
The number of Supreme court is 99: 25 (civil chamber), 27 (criminal chamber) 14 (labour law and social security chamber), 20 (extraordinary control and public affairs chamber), 13 (disciplinary chamber).
Females: 21 (total)
11(civil chamber)
3 (criminal chamber)
3 (labour law and social security chamber)
3 (extraordinary control and public affairs chamber)
1 (disciplinary chamber)
Males: 78 (total)
14 (civil chamber)
24 (criminal chamber)
11 (labour law and social security chamber)
17 (extraordinary control and public affairs chamber)
12 (disciplinary chamber)

Q046-2 (2023): In case of the Supreme Court “Other” refers to”
-16 judges sitting in the Labour and Social Security Law Chamber dealing with the labour law and social security law cases;
-18 judges sitting in the Extraordinary Review and Public Affairs Chamber dealing, inter alia, with the extraordinary appeals in the civil and criminal law cases, the safeguard of the fundamental rights and freedoms, competition and consumer protection cases, some registration cases as well as election protests and protests concerning the validity of a national referendum, cases concerning the regulation of energy, telecommunications and postal services, rail transport, as well as the regulation of the water and sewage market or complaints concerning the excessive length of proceedings. From the whole number of 90 Supreme Court Judges, 11 Supreme Court Judges are randomly chosen to adjudicate in the Professional Liability Chamber.

Q046-2 (2022): In case of the Supreme Court “Other” refers to”
-17 judges sitting in the Labour and Social Security Law Chamber dealing with the labour law and social security law cases;
-17 judges sitting in the Extraordinary Review and Public Affairs Chamber dealing, inter alia, with the extraordinary appeals in the civil and criminal law cases, the safeguard of the fundamental rights and freedoms, competition and consumer protection cases, some registration cases as well as election protests and protests concerning the validity of a national referendum, cases concerning the regulation of energy, telecommunications and postal services, rail transport, as well as the regulation of the water and sewage market or complaints concerning the excessive length of proceedings. From the whole number of 90 Supreme Court Judges, 11 Supreme Court Judges are randomly chosen to adjudicate in the Professional Liability Chamber.

Q046-2 (2020): 1. Supreme Court - the 13 judges of the Supreme Court Chamber of Labour Law and Social Insurance appear in the column “other” together with the 18 judges of the Extraordinary Review and Public Affairs Chamber and the 13 judges of the Disciplinary Chamber.

Q052 (2023): 1. registrars.
2. clerks within the judicial area + assistants.
3. administrative clerks.
4. other employees designated in the Law on Court and Prosecution Staff.
5. specialists from the opinion teams + probation officers.
Supreme court:
Other non-judge staff include:
Supreme Court Research and Analysis Office staff, Supreme Court Information Centre (Press Centre) staff, Supreme Court Correspondence Team staff, Supreme Court Library staff, Visitor Services Team staff, Text-processing specialists, Chief Medical Officer, H&S/Defence Specialist, Internal Audit Officer, Data Protection Officer.

Q052 (2022): The presented data does not include court assessors (trainee judges). The question should only indicate the number of court employees
who are not judges. According to Article 2 § 1a of the Act of 27 July 2001. Law on the Common Court System (Journal of Laws of 2023, item 217), in district courts, tasks related to the administration of justice are also performed by court assessors/trainee judges, with the exception of:
1) applying temporary detention in pre-trial proceedings in relation to a detainee handed over to the court's disposal together with a request to apply temporary detention;
2) examining complaints against decisions on refusal to initiate an investigation or enquiry, decisions to discontinue an investigation or enquiry and decisions to discontinue an enquiry and on decisions to discontinue an investigation and enter the case in the register of crimes
3) deciding family and juvenile cases.

Q052 (2021): •Members of the Research and Analyses Office of the Supreme Court (Biuro Studiów i Analiz SN);
Data also includes staff from The Supreme Administrative court and The Supreme court of justice
Q052 (2020): probation officers, Specialists of Opinion Teams of Forensic Specialists
*the presented data does not include court assessors (trainee judges). The question should only indicate the number of court employees who are not judges. According to Article 2 § 1a of the Act of 27 July 2001. Law on the Common Court System (Journal of Laws of 2020, item 2072), in district courts, tasks related to the administration of justice are also performed by court assessors/trainee judges, with the exception of:
1) applying temporary detention in pre-trial proceedings in relation to a detainee handed over to the court's disposal together with a request to apply temporary detention;
2) examining complaints against decisions on refusal to initiate an investigation or enquiry, decisions to discontinue an investigation or enquiry and decisions to discontinue an enquiry and on decisions to discontinue an investigation and enter the case in the register of crimes
3) deciding family and juvenile cases.
Since in the remaining scope court assessors perform tasks related to the administration of justice - just like judges - they should be deemed to belong to the professional group of judges. At the same time I would like to inform you that as at 31 December 2020 there were 486 trainee judges employed in district courts, including 317 women and 169 men. 1. number of rechtspflegers of 16 voivodeship administrative courts included (males 23, females 34);
2-4. - In 2020 data include also employees of the Supreme Administrative Court;

Q052 (2019): - professional probation officers;
- employed in Consultative Team of Judical Specialist
Q052 (2018): Other non-judge staff:
- professional probation officers
- employed in Consultative Team of Judical Specialists

Q052 (2017): Other non-judge staff -5790
of which:
Professional probation officers - 5188
Employed in Consultative Team of Judicial Specialists - 602.
Q052 (2016): Other non-judge staff - 5859
of which:
Professional probation officers - 5212
Employed in Consultative Team of Judical Specialists - 647.
Q052-1 (2020): Data from the supreme court's human resources Department.
In 2020 data include also employees of the Supreme Administrative Court
Q055 (General Comment): The general organisational units of the public prosecutor's office are: National Prosecutor's Office , regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices.

Q055 (2023): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. In contrast, under item 3 is the number of prosecutors in the position of prosecutor of the National Prosecuting Authority. The total is higher than the sum of the sub-categories, as it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 420 prosecutors (158 women and 262 men), as pursuant to Article 16 of the Act of 28 January 2016 - Law on Public Prosecutor's Office (Journal of Laws of 2024, item 390), the common organisational units of the public prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices. All items (1 - 3) include military prosecutors, of whom 90 are employed at the district prosecutor's office level, including 67 men and 23 women; at the regional prosecutor's office level, 50, including 39 men and 11 women; and at the National Prosecutor's Office, 19 military prosecutors (13 men and 6 women). In regional prosecutors' offices, prosecutors for military affairs do not perform official duties.
The table in question does not, therefore, provide an opportunity to illustrate the full structure of the public prosecutor's office in Poland, which, in accordance with the above-mentioned provision of the Law on the Public Prosecutor's Office, consists of four levels. In regional prosecutors' offices, prosecutors for military affairs do not perform official duties.

Q055 (2022): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. In contrast, under item 3 is the number of prosecutors in the position of prosecutor of the National Prosecuting Authority. The total is higher than the sum of the subcategories because it includes the number of prosecutors employed in regional prosecutor's offices - a total of 399 prosecutors (156 women and 243 men), as, pursuant to Article 16 of the Act of 28 January 2016 - Law on the Public Prosecutor's Office (Journal of Laws of 2023, item 1360), the common organisational units of the public prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices.
The table in question does not, therefore, provide an opportunity to illustrate the full structure of the public prosecutor's office in Poland, which, in accordance with the above-mentioned provision of the Law on the Public Prosecutor's Office, consists of four levels. All items (1 - 3) include military prosecutors, of whom 86 are employed at the district prosecutor's office level, including 61 men and 25 women; 48 at the circuit prosecutor's office level, including 38 men and 10 women; and 16 military prosecutors (12 men and 4 women) at the National Prosecutor's Office. In regional prosecutors' offices, prosecutors for military affairs do not perform official duties.

Q055 (2021): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. In contrast, under item 3 is the number of prosecutors in the position of prosecutor of the National Prosecuting Authority. The total is higher than the sum of the sub-categories, as it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 402 prosecutors (154 women and 248 men), as, pursuant to Article 16 of the Act of 28 January 2016 - Law on the Public Prosecutor's Office (Journal of Laws of 2022, item 1247), the common organisational units of the public prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices.
All items (1 - 3) include military prosecutors, of whom 77 are employed at the district prosecutor's office level, including 19 women and 58 men; at the regional prosecutor's office level, 45 military prosecutors, including 9 women and 36 men; and at the National Prosecutor's Office, 17 military prosecutors (4 women and 13 men).

Q055 (2020): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. Whereas under item 3 is the number of prosecutors in the position of a prosecutor of the National Prosecutor's Office. The total is higher than the sum of the subcategories because it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 391 prosecutors (151 women and 240 men), since according to Article 16 of the Law of 28 January 2016 - Law on Prosecutor's Office (Journal of Laws of 2021, item 66) the common organizational units of the prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices. For 2020, all items (1-3) include prosecutors for military matters, who at the level of the district prosecutor's office are employed by 85, including 22 women and 63 men; at the level of the regional prosecutor's office - 38 prosecutors for military matters, including 8 women and 30 men, and at the National Prosecutor's Office - 13 prosecutors for military matters (2 women and 11 men).

Q055 (2018): Within the organizational structure of general organizational units of the prosecution office, there are Appellate Public Prosecutor’s Offices, which function as a third rank and employ altogether 367 prosecutors (149 women and 224 men). Additionally, 65 prosecutors of military affairs (including 16 women and 49 men) are employed at the level related to the Regional Public Prosecutor’s Office; 30 prosecutors of military affairs (including 6 women and 24 men) - at the level related to the District Public Prosecutor’s Office, and 5 prosecutors of military affairs (5 men) - in the National Public Prosecutor’s Office.

Q056 (2023): Comment refers to the description of structure given in Q055. The table takes into account the heads of regional prosecutor's offices, whose number is 11, including 9 men and 2 women. The figures indicated in the table do not take into account the number of persons serving as deputy heads of prosecution offices at the above levels.

Q056 (2022): Due to the impossibility of filtering the data as at 31.12.2022, the status as at 21.07.2023 r.
The table takes into account the heads of regional prosecutors' offices, whose number is 11, including nine men and two women.
The figures indicated in the table do not take into account the number of persons serving as deputy heads of prosecution offices at the above levels.

Q056 (2020): The sum is higher than the sum of the subcategories because it takes into account the number of heads of regional prosecutor's offices, (whose number is 11, including 9 men and 2 women), since according to Article 16 of the Law of January 28, 2016 - Law on Prosecutor's Office (Journal of Laws of 2021, item 66) the common organizational units of the prosecutor's office are: National Prosecutor's Office, regional prosecutors' offices, circuit prosecutors' offices and district prosecutors' offices. The figures indicated in the table do not take into account the number of persons serving as deputy heads of prosecution offices at the above levels.

Q056 (2018): Universal prosecutorial bodies are: the National Public Prosecutor’s Office, appellate public prosecutor’s offices, regional public prosecutor’s offices and district public prosecutor’s offices. Numerical data determined in the table does not include the number of deputy chief prosecutors related to the prosecution offices at the aforementioned levels.

Q056 (2016): There are several differences between data which were sent in previous campaigns (2014) and above table. Differences could be caused by indicating in previous cycles also vice heads of prosecution offices.

Q056 (2014): Figures provided for 2014 encompass deputy-heads of prosecution offices.

Q057 (2023): prosecuting assessors

Q057 (2022): The above figures show the status as at 31.12.2022 and also include assessors in the Military Affairs Departments, of which there are 14 in total.
The provisions concerning prosecution assessors are set out in Section V of the Act - Law on the Public Prosecutor's Office.
Pursuant to Article 173 of the Act - Law on the Public Prosecutor's Office, the Public Prosecutor General may entrust an assessor of the public prosecutor's office, for a specified period of time, not exceeding 3 years, with the performance of prosecutorial activities without the right to:
1) participation in the proceedings before the court of appeal and in the proceedings before the district court, with the exception of proceedings at first instance in cases in which he has conducted pre-trial proceedings;
2) to appear before the Supreme Court, to draw up appeals and motions to the Supreme Court.
An assessor of the public prosecutor's office who is not authorised to perform prosecutorial activities may act as a public prosecutor in cases in which an investigation has been conducted.
In addition, the provisions relating to public prosecutors (pursuant to Article 174 § 1 of the Act - Law on Public Prosecution) apply accordingly to prosecution assessors.

Q057 (2020): Pursuant to Article 173 § 1 of the Act on the Public Prosecutor's Office of 28 January 2016 (Journal of Laws of 2021, item 66), the Public Prosecutor General may entrust an assistant prosecutor (assessor) for a fixed period, not exceeding 3 years, with the performance of prosecutorial activities without the right:
1)to participate in proceedings before the Court of Appeal and in proceedings before the Circuit Court, with the exception of proceedings at first instance in cases where he or she has conducted the pre-trial proceedings;
appearing before the Supreme Court, preparing appeals and applications to the Supreme Court.

Q057 (2018): Pursuant to art. 173 § 1 of the Law on Prosecution Act of 28th January 2016 (published in the Journal of Laws 2017, item 1767 and later amendments), Public Prosecutor General can entrust prosecution’s assessor (for a specified period of time, not exceeding 3 years) with performance of prosecutor’s activities, without the right to:
1)participation in the appeal proceedings, as well as participation in proceedings before the District Court - except for proceedings of a first instance, in cases related to preparatory proceedings conducted by this court;
2)act before the Supreme Court, as well as prepare appeals and motions to the Supreme Court.

Q060 (2023): The table provides data on the actual employment of clerks, assistant prosecutors and other employees in common organisational units of the prosecutor's office.

Q060 (2022): The table provides data on the actual employment of clerks, assistant prosecutors and other employees in the common organisational units of the public prosecutor's office.

Q060 (2020): The table presents information available at the National Public Prosecutor's Office Human Resources Office [Biuro Kadr] and contains the numbers of persons actually employed in universal prosecutorial bodies of the public prosecution services, without conversion into full-time equivalents.
The Human Resources Office does not have detailed data on the number of employees in the universal prosecutorial bodies of the public prosecution service who are employed on an indefinite or fixed-term basis. Organisational units of the public prosecution service provide the Human Resources Office with data on employees of the public prosecution service (military part is provided separately) in the following groups:
1)ETE [full time employment] limits,
2)use of the FTE limits (not counted in full-time equivalents and not broken down between men and women) rounded to two decimal places, the actual number of employees (broken down into male and female employees).
The data provided doesnt include trainee prosecutors.

Q060 (2018): In the table, were presented total numbers of employees. Personnel's Office does not have detailed data connected with differentiation the number of workers per part time or full-time basis. The Personnel's Office also does not have detailed data connected with the number of workers employed in general organizational units of the prosecution office, for an unspecified or specified period of time.
Q132 (General Comment): Judges: The basic salary of a judge is determined in rates, the amount of which is determined using multipliers of the basis for determining basic salary. The rates of basic salary in particular judge's positions and multipliers, used for determination of basic salary of judges in particular rates, are specified in the appendix to the Act.
A judge is entitled to a function-related allowance in connection with the performance of his duties.
Judges' remuneration is also differentiated by a long service bonus, amounting, beginning with the sixth year of service, to 5% of basic salary and increasing after each year by 1% until it reaches 20% of basic salary. No social security contributions are payable on judges' salaries. Prosecutors:
The base salary for public prosecutors of universal prosecutorial bodies of the public prosecution services shall be determined based on the table of base salary scale for public prosecutors of universal prosecutorial bodies of the public prosecution services Pursuant to Article 123 of the Act on the Public Prosecutor's Office of 28 January 2016, the basis for determining the base salary of a public prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Main Statistical Office "Statistics Poland" [GUS]. At the same time, according to Article 124 § 11 of the quoted Act on Public Prosecutor's Office, a public prosecutor is entitled to an supplement for long-time service amounting to 5% of the base salary currently received by the public prosecutor, beginning from the 6th year of his/her employment, and increasing after each successive year of his/her employment by 1% of this salary, until reaching 20% of the base salary. After 20 years of service the long-service supplement shall be paid, irrespective of the length of service beyond that period, at the rate of 20% of the p

ublic prosecutor's current base salary.
Supreme court and Main Public Prosecutor Office: Pursuant to Article 124 § 1 of the above-mentioned Act, the base salary of public prosecutors of the National Public Prosecutor's Office is equal to the base salary of judges of the Supreme Court. Pursuant to Article 48 of the Act on the Supreme Court [Ustawa o Sądzie Najwyższym] of 8 December 2017 (Journal of Laws of 2021, item 154, as amended), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The promotion rate is 115% of the base rate. Upon taking up his/her post, a judge of the Supreme Court receives base pay at the basic rate. After 7 years of service in the Supreme Court, the base salary of a judge of the Supreme Court shall be increased to the promotion rate.

Q132 (2023): The increase in judges‘ and prosecutors’ salaries was 7.8% over 2022. The amount of the increase of more than 7.8% is due to the unlocking of the salaries frozen in 2020-2023. It must also be taken into account that the month of November and December 2023 was paid with compensation after the wage unfreeze.
The basic remuneration for prosecutors of common organisational units of the public prosecutor's office shall be determined on the basis of the table of basic remuneration rates for prosecutors of common organisational units of the public prosecutor's office and the Institute of National Remembrance - Commission for the Prosecution of Crimes against the Polish Nation and the multipliers used to determine this remuneration, which constitutes Annex No. 1 to the Regulation of the Council of Ministers of 29.02.2016. (Journal of Laws of 2023, item 1656) on the basic remuneration of prosecutors and the amount of function allowances to which prosecutors are entitled. The said table sets out the rates of basic remuneration for individual prosecutor positions and the corresponding multiplier, which is used to determine the amount of basic remuneration for that position.
Pursuant to Article 123 of the Act of 28 January 2016 - Prosecution Law, the basis for determining the basic salary of a prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland ‘Monitor Polski’ by the President of the Central Statistical Office.
Pursuant to Article 124 § 1 of the aforementioned Act, the basic salary of prosecutors of the National Prosecuting Authority is equal to the basic salary of judges of the Supreme Court. Pursuant to Article 48 of the Act of 8 December 2017 on the Supreme Court (Journal of Laws of 2024, item 622), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The 5 promotion rate is 115% of the

basic rate. On assuming office, a judge of the Supreme Court shall receive basic salary at the basic rate. After 7 years of service in the Supreme Court, the basic salary of a judge of the Supreme Court shall be increased to the promotion rate. At the same time, in accordance with Article 124 § 11 of the cited Act - Prosecution Law, a prosecutor is entitled to an allowance for long service amounting, starting from the 6th year of service, to 5% of the basic salary currently received by the prosecutor and increasing after each subsequent year of service by 1% of this salary, until reaching 20% of the basic salary. After 20 years of service, the allowance shall be paid, irrespective of length of service beyond that period, at 20% of the prosecutor's current basic salary.

Q132 (2022): The salary increase for judges and prosecutors at the beginning of their careers was 4.4% by 2021.

Q132 (2021): Judges: The basic salary of a judge is determined in rates, the amount of which is determined using multipliers of the basis for determining basic salary. The rates of basic salary in particular judge's positions and multipliers, used for determination of basic salary of judges in particular rates, are specified in the appendix to the Act.
A judge is entitled to a function-related allowance in connection with the performance of his duties.
Judges' remuneration is also differentiated by a long service bonus, amounting, beginning with the sixth year of service, to 5% of basic salary and increasing after each year by 1% until it reaches 20% of basic salary. No social security contributions are payable on judges' salaries. Prosecutors:
The base salary for public prosecutors of universal prosecutorial bodies of the public prosecution services shall be determined based on the table of base salary scale for public prosecutors of universal prosecutorial bodies of the public prosecution services Pursuant to Article 123 of the Act on the Public Prosecutor’s Office of 28 January 2016, the basis for determining the base salary of a public prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Main Statistical Office “Statistics Poland” [GUS]. At the same time, according to Article 124 § 11 of the quoted Act on Public Prosecutor's Office, a public prosecutor is entitled to an supplement for long-time service amounting to 5% of the base salary currently received by the public prosecutor, beginning from the 6th year of his/her employment, and increasing after each successive year of his/her employment by 1% of this salary, until reaching 20% of the base salary. After 20 years of service the long-service supplement shall be paid, irrespective of the length of service beyond that period, at the rate of 20% of the p

ublic prosecutor's current base salary.
Supreme court and Main Public Prosecutor Office: Pursuant to Article 124 § 1 of the above-mentioned Act, the base salary of public prosecutors of the National Public Prosecutor’s Office is equal to the base salary of judges of the Supreme Court. Pursuant to Article 48 of the Act on the Supreme Court [Ustawa o Sądzie Najwyższym] of 8 December 2017 (Journal of Laws of 2021, item 154, as amended), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The promotion rate is 115% of the base rate. Upon taking up his/her post, a judge of the Supreme Court receives base pay at the basic rate. After 7 years of service in the Supreme Court, the base salary of a judge of the Supreme Court shall be increased to the promotion rate.

Q132 (2020): Judges: The basic salary of a judge is determined in rates, the amount of which is determined using multipliers of the basis for determining basic salary. The rates of basic salary in particular judge's positions and multipliers, used for determination of basic salary of judges in particular rates, are specified in the appendix to the Act.
A judge is entitled to a function-related allowance in connection with the performance of his duties.
Judges' remuneration is also differentiated by a long service bonus, amounting, beginning with the sixth year of service, to 5% of basic salary and increasing after each year by 1% until it reaches 20% of basic salary. No social security contributions are payable on judges' salaries. Prosecutors:
The base salary for public prosecutors of universal prosecutorial bodies of the public prosecution services shall be determined based on the table of base salary scale for public prosecutors of universal prosecutorial bodies of the public prosecution services Pursuant to Article 123 of the Act on the Public Prosecutor's Office of 28 January 2016, the basis for determining the base salary of a public prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Main Statistical Office "Statistics Poland" [GUS]. At the same time, according to Article 124 § 11 of the quoted Act on Public Prosecutor's Office, a public prosecutor is entitled to an supplement for long-time service amounting to 5% of the base salary currently received by the public prosecutor, beginning from the 6th year of his/her employment, and increasing after each successive year of his/her employment by 1% of this salary, until reaching 20% of the base salary. After 20 years of service the long-service supplement shall be paid, irrespective of the length of service beyond that period, at the rate of 20% of the p

ublic prosecutor's current base salary.
Supreme court and Main Public Prosecutor Office: Pursuant to Article 124 § 1 of the above-mentioned Act, the base salary of public prosecutors of the National Public Prosecutor's Office is equal to the base salary of judges of the Supreme Court. Pursuant to Article 48 of the Act on the Supreme Court [Ustawa o Sądzie Najwyższym] of 8 December 2017 (Journal of Laws of 2021, item 154, as amended), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The promotion rate is 115% of the base rate. Upon taking up his/her post, a judge of the Supreme Court receives base pay at the basic rate. After 7 years of service in the Supreme Court, the base salary of a judge of the Supreme Court shall be increased to the promotion rate.

Q132 (2019): The base salary for public prosecutors of common organisational units of the prosecutor's office is determined on the basis of the table of base salary for prosecutors of common organisational units of the prosecutor's office and the Institute of National Remembrance - Commission for the Prosecution of Crimes against the Polish Nation, and the multipliers used to determine this salary, which constitutes appendix no. 1 to the Regulation of the Council of Ministers of 29 February 2016 on the base salary of the prosecutors and the amount of functional allowances to which the prosecutors are entitled. The above table sets out the rates of base salary for different prosecutorial positions and the corresponding multiplier, which is used to determine the base salary for this position.
Pursuant to Article 123 of the Act of 28 January 2016 – The Prosecutor's Office Law, the basis for determining the base salary of a prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, published in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Central Statistical Office. Pursuant to Article 124 § 1 of the abovementioned Act, the base salary of prosecutors of the National Prosecutor's Office is equal to the base salary of the Supreme Court judges. Pursuant to Article 48 of the Act of 8 December 2017 on the Supreme Court (Journal of Laws of 2018, item 5, as amended), the salary of a judge of the Supreme Court is determined at the base rate or the promotion rate. The promotion rate is 115% of the base rate. A judge of the Supreme Court, taking up a position, receives the base salary at the base rate. After 7 years of service in the Supreme Court, the base salary of a Supreme Court judge is increased to the promotion rate.
At the same time, pursuant to Article 124 § 11 of the quoted Act – The Prosecutor's Office Law, a prosecutor is entitled to an allowance for long-term work amountin

g to, starting from the 6th year of work, 5% of the base salary currently earned by the prosecutor and increasing after each consecutive year of work by 1% of this salary, until 20% of the base salary is reached. After 20 years of work, the allowance is paid, irrespective of the length of service beyond that period, in the amount of 20% of the base salary currently earned by the prosecutor.
Moreover, pursuant to Article 124 § 10 of the quoted Act – The Prosecutor's Office Law, in connection with the function of a prosecutor, the prosecutor is entitled to a functional allowance, which results from appendix no. 2 Table of functions and multipliers used to determine the amount of functional allowances to the Ordinance of the Council of Ministers of 29 February 2016 on the base salary of the prosecutors and the amount of functional allowances to which the prosecutors are entitled..
Additionally, pursuant to Article 111 § 2 and 4 of the abovementioned Act, due to the nature of work and the scope of tasks performed, a special bonus may also be granted to the prosecutor of the National Prosecutor's Office, in the amount not exceeding 40% of the total base salary and the functional allowance. The allowance shall be granted for a fixed period, and in justified cases - also for an indefinite period.

Q132 (2018): Base salary for prosecutors related to general organizational units of the prosecution office is determined by virtue of the Table regarding rates, connected with the base salary for prosecutors related to general organizational units of the prosecution office and for prosecutors related to the Nation's Memory Institute - Commission for the Prosecution of Crimes against Polish Nation. The aforementioned table also includes multipliers used for determining the aforementioned salary and it constitutes Schedule No 1 enclosed to the Regulation of the Council of Ministers of 29th February 2016 on the base salary for prosecutors and the amount of extra duty allowance for prosecutors. The aforementioned table determines rates of the base salary related to particular prosecutor's position and appropriate multiplier used for determining the amount of base salary connected with this position. Pursuant to art. 123 of the Law on Prosecution Act of 28th January 2016 (published in the Journal of Laws 2017, item 1767 and later amendments), the basis of the prosecutor's base salary in a given year shall be - so called - base amount, that is average salary related to second quarter of the previous year, published in the Official Journal of the Republic of Poland by the Chairman of the Central Statistics Office.
Pursuant to art. 124 § 1 of the aforementioned Act, base salary for prosecutors related to the National Public Prosecutor's Office is equal to base salary for the Supreme Court judges.
Pursuant to art. 48 of the Supreme Court Act of 8th December 2017 (published in the Journal of Laws 2018, item 5 and later amendments) salary for the Supreme Court judge is determined at the basic rate or promotion rate. The amount of a promotion rate constitutes 115% of a basic rate. The Supreme Court judge, while taking over the post, acquires base salary related to the basic rate. After seven years of duty connected with the Supreme Court, base salary for the Supreme Court judge is raised up

to the promotion rate. At the same time, pursuant to art. 124 § 11 of the aforementioned Law on Prosecution Act, prosecutor is entitled to allowance connected with a long-term service. This allowance constitutes, starting with the 6th year of service, 5% of the base salary currently received by the prosecutor and it rises - after each following year of service - by 1% of the base salary, until it reaches the level of 20% of the base salary. After twenty years of service, the allowance constitutes, independently on the period of service exceeding this time, 20% of the base salary currently received by the prosecutor.
What is more, pursuant to art. 124 § 10 of the aforementioned Law on Prosecution Act, in connection with certain position, prosecutor in entitled to extra duty allowance, which stems from Schedule No 2 of the Table regarding positions and multipliers used for determining the amount of extra duty allowance, enclosed to the Regulation of the Council of Ministers of 29th February 2016 on the base salary for prosecutors and the amount of extra duty allowance for prosecutors.
Additionally, pursuant to art. 111 § 2 and 4 of the aforementioned Act, the National Public Prosecutor - due to the character of service and the scope of duties - can be entitled to the special allowance as well. The amount of the special allowance shall not exceed 40% of base salary and extra duty allowance altogether. The special allowance is granted for a specified period of time or - under particularly justified circumstances - for an unspecified period of time. Salaries of judges and public prosecutors of the Supreme Court or the Highest Appellate Instance - we indicated average salary which contains base salary, allowance connected with a long-term service and allowance connected with occupying post.

Q133 (General Comment): 1.A judge/prosecutor who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
2) Financial support. A judge/prosecutor may be granted financial support, in the form of a loan, to satisfy their residential needs.
3) Paid health leave. A judge/prosecutor may be granted paid health leave to undergo the prescribed treatment if the treatment requires to refrain from carrying out service. The health leave cannot exceed six months ..
3) Annual additional leave. A judge/prosecutor is entitled to annual additional leave of:
–six business days – after ten years of work,
–twelve business days - after fifteen years of work.
4) Jubilee award. A judge/prosecutor is entitled to a jubilee award . 5) If a judge/prosecutor is posted to a locality other than the locality in which the judge's place of work is located, which is not the judge's place of permanent residence, the judge posted during the period of posting, as an employee on a business trip, is entitled to the following dues, compensating for the inconveniences resulting from the posting outside the permanent place of service: 1) the right to accommodation, free of charge; ; - a monthly lump sum - in an amount not exceeding 78% of the judge's basic salary; - reimbursement of costs of the first journey from the place of permanent residence to the place of secondment, reimbursement of costs of the last journey from the place of secondment to the place of permanent residence and reimbursement of the costs of journeys made not more often than once a week to the place of permanent residence and back under conditions' - a lump sum to cover the costs of travel by means of local transport, - reimbursement of costs incurred for the use of vehicles owned by the employee for business purposes, - reimbursement of costs of daily commuting to the place of delegation;

Q133 (2021): 1.A judge/prosecutor who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
2) Financial support. A judge/prosecutor may be granted financial support, in the form of a loan, to satisfy their residential needs.
3) Paid health leave. A judge/prosecutor may be granted paid health leave to undergo the prescribed treatment if the treatment requires to refrain from carrying out service. The health leave cannot exceed six months ..
3) Annual additional leave. A judge/prosecutor is entitled to annual additional leave of:
–six business days – after ten years of work,
–twelve business days - after fifteen years of work.
4) Jubilee award. A judge/prosecutor is entitled to a jubilee award . 5) If a judge/prosecutor is posted to a locality other than the locality in which the judge's place of work is located, which is not the judge's place of permanent residence, the judge posted during the period of posting, as an employee on a business trip, is entitled to the following dues, compensating for the inconveniences resulting from the posting outside the permanent place of service: 1) the right to accommodation, free of charge; ; - a monthly lump sum - in an amount not exceeding 78% of the judge's basic salary; - reimbursement of costs of the first journey from the place of permanent residence to the place of secondment, reimbursement of costs of the last journey from the place of secondment to the place of permanent residence and reimbursement of the costs of journeys made not more often than once a week to the place of permanent residence and back under conditions' - a lump sum to cover the costs of travel by means of local transport, - reimbursement of costs incurred for the use of vehicles owned by the employee for business purposes, - reimbursement of costs of daily commuting to the place of delegation;

Q133 (2020): 1.A judge/prosecutor who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
2) Financial support. A judge/prosecutor may be granted financial support, in the form of a loan, to satisfy their residential needs.
3) Paid health leave. A judge/prosecutor may be granted paid health leave to undergo the prescribed treatment if the treatment requires to refrain from carrying out service. The health leave cannot exceed six months ..
3) Annual additional leave. A judge/prosecutor is entitled to annual additional leave of:
–six business days – after ten years of work,
–twelve business days - after fifteen years of work.
4) Jubilee award. A judge/prosecutor is entitled to a jubilee award . 5) If a judge/prosecutor is posted to a locality other than the locality in which the judge's place of work is located, which is not the judge's place of permanent residence, the judge posted during the period of posting, as an employee on a business trip, is entitled to the following dues, compensating for the inconveniences resulting from the posting outside the permanent place of service: 1) the right to accommodation, free of charge; ; - a monthly lump sum - in an amount not exceeding 78% of the judge's basic salary; - reimbursement of costs of the first journey from the place of permanent residence to the place of secondment, reimbursement of costs of the last journey from the place of secondment to the place of permanent residence and reimbursement of the costs of journeys made not more often than once a week to the place of permanent residence and back under conditions' - a lump sum to cover the costs of travel by means of local transport, - reimbursement of costs incurred for the use of vehicles owned by the employee for business purposes, - reimbursement of costs of daily commuting to the place of delegation;

Q133 (2019): retirement
Pursuant to Article 127 § 1 of the Act of 28 January 2016 – The Prosecutor’s Office Law in connection with Article 69 -71 and Article 100 of the Act of 27 July 2001 - Law on the system of common courts (Journal of Laws of 2020, item 365, as amended), the prosecutor shall retire when they reach the age of 65, unless, not later than six months and not earlier than twelve months before reaching this age, they declare to the General Prosecutor their willingness to continue holding the position and present a certificate stating that they are able, due to their health condition, to perform their prosecutorial duties, issued on the terms specified for a candidate for the prosecutor's position. A prosecutor shall, at their request, retire, with the right to the emolument referred to in Article 100 § 2 - in the amount of 75% of the base salary and the length of service allowance earned on their last position - after the age of 55 for a woman, if she has worked for not less than 25 years in the position of a judge or a prosecutor, and the age of 60 for a man, if he has worked for not less than 30 years in the position of a judge or a prosecutor. A prosecutor who is a woman shall, at her request, retire after reaching the age of 60, regardless of the period of service as a prosecutor or judge. A prosecutor who retires or is retired due to age, illness or loss of ability shall be entitled to an emolument of 75% of the base salary and the length of service allowance earned on their last position. The emolument shall be increased in accordance with changes in the base salary of active prosecutors. In addition, a retired prosecutor shall be entitled to a one-time severance payment of six months' salary.
Judges and prosecutors are not given housing, but have, for example, the possibility to apply for financial support - in the form of a loan - to meet possible housing needs.

Q133 (2016): A judge who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
The emolument is icresed in line with changes of the basic solaries of active judges. A judge who retires is entitled to a one-off severance payment in the amount of six months' remuneration.
Q146 (2022): Number of advocates: total: 21 447, male- 11 343, female - 10 104
Number of legal counsels: total: 40 107, male - 18 725 , female - 21 382
It is noteworthy that legal advisers have the same powers as advocates.
Q146 (2020): Number of advocates: total: 19954, male- 10513, female - 8845
Incomplete data: No information on sex of 596 advocates;
Number of legal counsels: total: 37411, male - 17746, female - 19665
It is noteworthy that legal advisers have the same powers as advocates.
Q146 (2019): It is the total number of legal advisers and advocates.
It is noteworthy that legal advisers have the same powers as advocates.
Q148 (2019): "0" in principle, however: 4078 advocates and 10449 legal advisers - because of their non-practition.
Non-practitioners who have not lost their qualifications but who are registered on the list of non-practitioners, cannot provide services to clients, including representation in courts.

Portugal

Q004 (2023): The increase reflects the inflation
This is the provisional value for year 2022.
Data for 2023 is still not available.
Q004 (2022): This value is for year 2021.
Data for 2022 is still not available.
Q004 (2016): In the present questionnaire we used another "concept" of gross anual salary that we believe is closer to the objectives of this question.
We opted for the category of "payments and salaries" instead of "remunerations" of the national budget because "remunerations" also includes social contributions by the employer which constitue wage costs and not salary.
Q046 (General Comment): The total includes judges from courts of 1st, 2nd and 3rd instances, except the Constitutional Court.
Q046 (2020): 3. We are dealing with small numbers, therefore the dicrepancy ratio is big. In addition, with time female judges, that are the majority of judges, are getting to the top of their professional career.
Q046 (2019): In absolute terms the increase is only 5 persons. The numbers are small, therefore in relative terms it appears to be relevant.
Q046 (2018): The number of Supreme Court Judges has been decreasing since 2015. In absolute terms the decrease from 2016 to 2018 is from 82 to 71 judges, which is not significative in absolute terms, but acquires a more relevant expression in relative terms.
Q046 (2017): As concerns the increase in the number of female Supreme Court judges: the numbers are small, therefore the variation seems important.
Q046 (2014): The increase in the number of Supreme Court female professional judges is due to the general tendency of increase of female judges in the last decade at first instance courts.
Q046-2 (General Comment): As there are judges who have civil and criminal competences at the same time, it is not possible to discriminate judges by civil and commercial matters. Therefore, the judges of the judicial courts were all included in the column “other”. It is also not possible to distinguish by court, which ones are responsible for civil/commercial or criminal proceedings, because of the existence of courts of general and mixed jurisdiction.

Q046-2 (2023): See general comment.

Q046-2 (2022): As there are judges who have civil and criminal competences at the same time, it is not possible to discriminate judges by civil and commercial matters. Therefore, the judges of the judicial courts were all included in the column “other”.

Q046-2 (2021): As there are judges who have civil and criminal competences at the same time, it is not possible to distinguish judges by civil and comercial matters. Therefore, the judges of the judicial courts were all included in the column “other”.

Q046-2 (2020): As there are judges who have civil and criminal competences at the same time, it is not possible to distinguish judges by civil and comercial matters. Therefore, the judges of the judicial courts were all included in the column “other”.

Q052 (General Comment): The variations in the number of non-judge staff over the different evaluation cycles seem high due to the small numbers.

Q052 (2023): The data for the year 2023 reflects a change in the criteria for recording data on non-judge staff by the courts. The personnel working in the central units of the courts began to be registered in the court's common services personnel area. Thus, since 2023 the personnel in the common services have been included in this table.

Q052 (2022): The variations in the number of non-judge staff over the different evaluation cycles seem high due to the small numbers. Included in the "Other non-judge staff" category are professionals not included in the other specific categories, such as senior technical staff who mainly provide support to the higher courts.
Q052 (2020): 52-3-In absolute terms, the increase between 2018 and 2020 in the category "Staff in charge of different administrative tasks and of the management of the courts" for women is from 94 to 104. Since we are dealing with small absolute values, the identified variation, despite not representing a significant difference in absolute terms, acquires a more relevant expression in terms of relative variation.
52-4- We confirm the increase in the number of "technical staff" in the courts between 2018 and 2020. No specific explanation.

Q052 (2019): In 2019, as in previous years there was no other non-judge staff.

Q052 (2018): In 2018, as in 2017 there were no other non-judge staff.

Q052 (2017): "other non judge staff" - this category includes all staff with a non-specified category or non-specific functions. As this is a residual category, the numbers tend to be small.
Q052 (2014): The decrease in the number of staff in charge of administrative tasks is due to retirements that have not been replaced and to the continuous IT modernization.
Q052 (2013): The number of judicial staff is decreasing on account of retirements that have been occurring since 2010. In addition, due to the reform of the Public Administration that is taking place since 2009 and the financial constraints of the past few years, the number of public servants has decreased.
Q052-1 (2023): The data for the year 2023 reflects a change in the criteria for recording data on non-judge staff by the courts. The personnel working in the central units of the courts began to be registered in the court's common services personnel area. Thus, since 2023 the personnel in the common services have been included in this table.

Q052-1 (2022): the data in question 52-1 has also been updated, due to a small error in the accounting of the different categories included in it." Compared to the figures we sent initially, the correction was very small in percentage terms (36 more employees were added, out of a total of 5412).
The amended figures in table 52.1 referred to a specific category of STJ/STA officials who have now been added, as they were not accounted for previously by mistake (neither in the version initially sent with 2022 data, nor in the previous edition with 2021 data).

Q052-1 (2020): We confirm the increase in 2020 in the category of non-judge staff working in courts at Supreme Court level in the Supreme Court of Justice and the Supreme Administrative Court, with a special focus on the administrative and tax courts.

Q052-1 (2018): Since 2016 there has been an increase of non-judge staff to meet the needs of additional staff. There were no legislative or other changes that could directly justify the increase.
Q055 (General Comment): The communicated data encompasses the number of magistrates of the Public Prosecution Service in courts of first instance, second instance and high superior courts, except the Constitutional Court.

Q055 (2023): Q55.2. The increase in the number of female prosecutors in 2023 compared to 2022 is in line with the steady growth in the number of female prosecutors in recent years.
Q055 (2022): The discrepancy rate is due to small numbers

Q055 (2020): No specific explanation for the numbers above.

Q055 (2018): In absolute terms the decrease from 2016 to 2018 is from 7 to 5 female prossecutors, which is not significative in absolute terms, but acquires a more relevant expression in relative terms.
Q056 (2023): At the first instance level, the following were counted:
- County District Prosecutors Coordinators (23)
- Director of the Central Department of Criminal Investigation and Prosecution (1)
- Directors of Regional Departments of Criminal Investigation and Prosecution (3)
- Directors of Departments of Criminal Investigation and Prosecution (11)

At the second instance level, the following were counted:
- Regional Prosecutors General (4)
- Administrative and Tax State Prosecutors Coordinators (2)
- Coordinator of the Public Prosecutor’s Office at the Guimarães Court of Appeal (1)

At Supreme Court level, the following were counted the Coordinators of the Public Prosecutor’s Office at the Supreme Court of Justice, at the Administrative Court and at the Court of Audit.

Q056 (2016): Portuguese Official Justice Statistics do not colletct these data.

Q132 (General Comment): The net annual salary depends on various factors: personal tax situation; other personal revenues. It would not be accurate to provide a number under this category.
Q132 (2020): Source of data: Directorate-General for the Administration of Justice and the High Council for the Judiciary
The increase of salaries resulted from the revision of the statute of judges and prossecutors.

Q132 (2019): The increase of the Public Prosecutors' salary in the Supreme Court was due to the revision of the Statute of Judicial Magistrates
Q133 (General Comment): Special pension: In Portugal, Jubilation (Jubilação) is the name given to a special retirement scheme which, in addition to the title of honour, allows that emeritus judges shall continue to be bound by their statutory duties and attached to the court of which they were a member. They shall enjoy the titles, honours, privileges and immunities corresponding to their category and may attend the solemn ceremonies held in the said court in professional dress, taking their seats to the right of the magistrates on active service. The pension of the retired judge under this special scheme is calculated and updated based on the remuneration of the magistrate in active service, as it is considered that he or she somehow continues to have a connection to the service.
Housing: The salary of a judge includes an annual gross amount of €xxxxx (€xxxx x 14) as a compensation allowance. An 11% tax is deducted from this amount as a contribution to the general pension fund / social security. This allowance is of a mixed nature, between compensation for the specific nature of the job (working on call and on an exclusive basis) and an allowance comparable to subsistence allowance (due to not being given adequate housing). At the judge's request, he or she may be assigned a residence if one of the properties available for this purpose is available. These properties belong to the State, under the management of the Ministry of Justice.

Q148 (2021): We do not have this figure in Portugal.

Q148 (2020): We do not have this figure in Portugal.

Romania

Q004 (General Comment): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated on the basis of the monthly average gross salary at an average monthly value of the euro calculated by the National Bank of Romania for the reference year concluding in the average gross annual salary (as the sum of monthly average salary).

Q004 (2022): The difference can be explained based on salary increases and an upward trend can be observed continuing from 2018.
Q004 (2020): The difference can be explained based on salary increases, and an upward trend can be observed continuing from 2018.
Q004 (2018): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated by request by the National Institute of Statistics on the basis of the monthly average gross salary at an average annual value of the euro calculated by the National Bank of Romania for the reference year 2018
According to the provisions of the national legislation in force (GEO no. 79/2017 with subsequent amendments and completions), the social insurance contributions, respectively those of social health insurance that fell to the employer, were transferred to the employee's responsibility and, starting with 2018, are fully supported by the employee, being reflected in the gross amount of the earning.
Consequently, the indicator "monthly gross average wage" produced and disseminated from 2018 is no longer comparable with the previous data series.
These legal provisions do not influence the data comparability for the series of "average monthly net earnings."

Q046 (General Comment): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). Only judges of the „judecatorii" are counted as first instance judges. In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q046 (2023): There were some fluctuations due to a number of retirements and new contests for occupying the vacant positions.

Q046 (2022): Only judges of the „judecatorii" are counted as first instance judges.

Q046 (2020): Only judges of the „judecatorii" are counted as first instance judges.

Q046 (2019): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q046 (2018): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q046 (2017): The number of professional judges sitting in second instance courts (point 2) includes both the number of judges within the courts of appeal and the number of judges within the tribunals.
Q046 (2016): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In the table above the judges from tribunals are included in the category "second instance professional judges".
Q046 (2014): For 2014, judges mentioned at 46.1 are judges within first instance courts, while judges mentioned at 46.2 are judges within tribunals and courts of appeal.
Q046 (2013): Judges mentioned at 46.1 are judges within first instance courts and tribunals, while judges mentioned at 46.2 are judges within courts of appeal. In 2012 and 2013, the Superior Council of Magistracy brought important changes to the Regulation for the promotion of judges to the High Court of Cassation and Justice and 19 judges were promoted.

Q046-2 (General Comment): The statistical system does not collect information regarding a breakdown in the number of judges based on the different legal matters.
Q046-2 (2023): The statistical system does not collect information regarding a breakdown in the number of judges based on the different legal matters.
Q046-2 (2022): The statistical system does not collect information regarding a breakdown in the number of judges based on the different legal matters.
Q046-2 (2020): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q052 (General Comment): The number indicated for the category “non-judge staff assisting judges” encompasses clerks with judicial tasks; the number indicated for “staff in charge of administrative tasks” concerns registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; the number indicated for “technical staff” includes IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents etc.). The category “other” subsumes assistance magistrates, judicial assistants, probation counselors and judge's assistants. o Assistance magistrates work only within the High Court of Cassation and Justice. They participate in the trial sessions, have a consultative vote in deliberations and write the minutes of the sessions, as well as the decisions. o Judicial assistants work only within tribunals and are part, together with the judges, of the panels which judge, in first instance, cases regarding labor and social insurances litigations (the panel is composed of 1 judge and 2 judicial assistants; the latter participate in the deliberations with a consultative vote and sign the decisions). o The probation counselors have, in principle, the following attributions: support the activity of judges by elaborating certain evaluation documents in criminal cases with juvenile offenders; support the activity of the judge delegated with enforcing decisions in criminal matters; cooperate with public institutions in order to execute the measure to force a minor to carry out an unpaid activity in an institution of public interest; initiate and carry on special programs of social reinsertion for persons convicted to prison and for minors who committed offences provided by the criminal law; carry out, at request, activities of individual counseling of offenders, with regard to the social, group and individual behavior; initiate and carry out special programmes of protection, social and judicial assistance of minors and youngsters who committed offences. o T

he position of "judge's assistant" was established by Law no. 393/2023 on the status of the judge's assistant, entered into force on December 17, 2023. Judge's assistants work in courts of appeal, courts of first instance and specialized courts. Judge's assistants perform the following main duties: (a) assist the judge in carrying out specific procedures prior to the setting of the first date of the trial; (b) carry out documentation, verification and presentation of the documents and papers in the case-file and of the facts and points of law relevant to the case (c) draft, under the judge's direction, judgments or other procedural documents.

Q052 (2023): Other: assistance magistrates, judicial assistants, probation counselors and judge's assistants. It should be noted that the position of "judge's assistant" was established by Law no. 393/2023 on the status of the judge's assistant, entered into force on December 17, 2023.

Q052 (2022): Other: assistance magistrates, judicial assistants and probation counselors.

Q052 (2021): 6.665 represents the number of clerks with judicial tasks (- 170 work only within the High Court of Cassation and Justice); 1.701 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 38 work only within the High Court of Cassation and Justice); 1.723 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (–100 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (1055): a higher percentage of occupation of vacant positions.
Assistance magistrates: 130 Judicial assistants: 176 Probation counselors: 749

Q052 (2019): 6437 represents the number of clerks with judicial tasks (- 169 work only within the High Court of Cassation and Justice); 1646 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 16 work only within the High Court of Cassation and Justice); 1750 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents..... (– 6 IT staff works only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (867):
Assistance magistrates: 116 Judicial assistants: 177 Probation counselors: 574

Q052 (2018): 6402 represents the number of clerks with judicial tasks (- 163 work only within the High Court of Cassation and Justice); 1645 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 17 work only within the High Court of Cassation and Justice); 1772 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (–101 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (843):
Assistance magistrates: 110 Judicial assistants: 176 Probation counselors: 557

Q052 (2017): Other categories of personnel which function within the Romanian courts (852): Assistance magistrates: 112 Judicial assistants: 176 Probation counselors: 564
The increase observed in the category "other" between 2016 and 2017 is explained by the employment of the respective number of probation counselors.

Q052 (2016): 6191 represents the number of clerks with judicial tasks (- 165 work only within the High Court of Cassation and Justice); 1621 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 9 work only within the High Court of Cassation and Justice); 1822 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (– 109 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (663):
Assistance magistrates: 113 Judicial assistants: 173 Probation counselors: 377

Q052 (2015): 6149 represents the number of clerks with judicial tasks (- 149 work only within the High Court of Cassation and Justice); 1615 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 9 work only within the High Court of Cassation and Justice); 1844 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (– 109 work only within the High Court of Cassation and Justice).

Other categories of personnel which function within the Romanian courts: Assistance magistrates: 115 ; Judicial assistants: 176 ; Probation counselors: 352

Q052 (2014): In 2014, there were 6072 clerks with judicial tasks (153 within the High Court of Cassation and Justice); 1585 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (9 within the HCCJ); 1854 IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (96 within the HCCJ). The category “other” subsumes 101 Assistance magistrates, 175 Judicial assistants and 360 Probation counselors.

Q052 (2013): In 2013, there were 5743 clerks with judicial tasks; 1563 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; 1784 IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents). The category “other” subsumes 92 Assistance magistrates, 176 Judicial assistants and 281 Probation counselors.

Q052-1 (2023): 3. The difference between the data communicated in 2022 and 2023 is primarily due to changes in the methodology used by the High Court of Cassation and Justice for reporting data on civil servants and contractual staff.

Q052-1 (2021): A higher percentage of occupation of vacant positions for total non-judge staff working in courts at Supreme Court level.
Q052-1 (2020): 3. Total non-judge staff working in courts at Supreme Court level-
The difference between 2018 (comunicated data) and 2020 is pointedly given by the difference in the methodology for reporting data within the human resources sector. Thus, for 2018, in the total number of auxiliary staff (non-judge staff working at Supreme Court level) was not included the number of staff represented by ushers, procedural agents, drivers. Also, rechecking the communicated data for 2018 on this point (point. 3), it is confirmed that the total number of auxiliary staff (occupied positions) at the High Court of Cassation and Justice is 230 (2018 data, including the staff represented by the professional categories mentioned above).

Q055 (General Comment): In Romania there are four level of courts/prosecution offices attached to these courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q055 (2023): 3. The vacancies caused by retirements were followed by a series of competitions for positions in PICCJ, DNA, and DIICOT. As a result of these competitions, the gender balance shifted.
Q055 (2018): In Romania there are four level of courts/prosecution offices attached to these courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q055 (2014): The prosecutor’s offices are established in the following hierarchy: the prosecutor’s offices attached to the courts of law (point 1 of the table), the prosecutor’s offices attached to tribunals and prosecutor’s offices attached to the courts of appeal (point 2), and the Prosecutor’s Office attached to the High Court of Cassation and Justice (point 3).

Q056 (2022): In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q056 (2020): In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".
The discrepancies in terms of number of heads within the prosecution offices compared to the previous campaign are due to the fact that the leading position mandates have expired within the current period and because of the pandemic situation competitions for filling in these positions could not be organised.

Q056 (2018): In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q056 (2016): As regards the total number of heads of prosecution offices that went from 277 in 2014 to 426 for 2016 data, this may be generated by the fact that the specialised prosecution units (such as the anticorruption and anti organised crime structures) might have not been taken into account. Data may therefore not be comparable.

Without taking into calculation the specialised structures as mentioned above, the number of heads prosecution offices of the Supreme court is 13; if adding the number of heads of prosecution offices of the specialised structures, the number will be as follows: DNA (anticorruption unit) 15 out of which 10 male and 5 female; DIICOT (anti organised crime structure) 51 out of which 28 male and 23 female.

Q060 (2023): Of the 1 810 filled positions in prosecution offices nationwide, 1 803 are held by clerks, while the remaining 7 are occupied by procedural agents (responsible for tasks such as delivering summons and other courier duties) and other staff, including drivers.
Q060 (2022): Out of the total of 2089 filled in positions in the prosecution offices country wide, 1761 are occupied by clerks and the rest of
328 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as
drivers.
Q060 (2020): Out of the total of 2408 filled in positions in the prosecution offices country wide, 1997 are occupied by clerks and the rest of 411 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as drivers.
Q060 (2018): Out of the total of 2468 filled in positions in the prosecution offices country wide, 2044 are occupied by clerks and the rest of 424 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as drivers.

Q060 (2016): The numbers include the clerks, forensics, auxiliary staff, public servants and contract staff

Q132 (2023): For entry-level salaries, the decline is attributed to legislative changes and a shift in recruitment trends, with preference now given to candidates from the National Institute of Magistracy, without prior seniority. Previously, data included individuals with at least five years of legal experience, resulting in higher average salaries. Conversely, the significant increase in end-of-career salaries stems from adjustments in salary structures, influenced by court rulings and administrative acts recognizing outstanding rights. These changes introduced a broadly applicable benchmark for salary calculations across the justice sector.

Q132 (2016): The increase between 2014 and 2016 is resulting from legislative changes, including the way in which specific legislation is applied in the light of the jurisprudence of the Constitutional Court. The calculation method did not change, but the base of the monthly salaries has grown during the last two years, according to the legislation concerning the public remuneration, as it was interpreted by the Constitutional Court and the ordinary courts of law. Currently, the differences between salaries in the judicial system are eliminated. Since 2000 to the present, the magistrates' salaries have risen steadily, including the latest law on salaries in the public domain (Law no. 153/2017) has set a has set a salary level for magistrates well above the average of the budgetary staff. This law will have its full effect until 2022.

Q133 (2021): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q133 (2020): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q133 (2019): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q133 (2018): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q146 (2020): There is no official explanation due to legal norms, in principle such fluctuations can be registered within the profession, as long as the total number has not registered significant fluctuations.

Slovak Republic

Q004 (2023): High rise in salaries (based on high inflation - similar to the other EU countries)
https://slovak.statistics.sk/wps/wcm/connect/efd89ec1-751c-4692-8a7d-2ba94b2532f6/Priemerna_mesacna_mzda_zamestnanca_hospodarstva_SR_v_roku_2023.pdf?MOD=AJPERES&CVID=oUj0XlA&CVID=oUj0XlA&CVID=oUj0XlA&CVID=oUj0XlA&CVID=oUiz2Xu

Q004 (2021): http://datacube.statistics.sk/#!/view/en/VBD_INTERN/pr0204qs/v_pr0204qs_00_00_00_en

Q004 (2020): Ministry of Finance did not offer closer explanation. Source: https://www.statista.com/statistics/419502/average-annual-wages-slovak-republic-slovakia-y-on-y-in-euros/

Q046 (General Comment): Supreme Administrative Court is calculated together with Supreme Court.

Q046 (2023): 3. Number of Supreme Court professional judges: Supreme Administrative Court: 25 - 12 - 13
Supreme Court: 54 - 24 - 30

Q046 (2021): Number of Supreme Administrative Court professional judges are included in the Q. 46 line 3. (8 males, 13 females; total 21).

Q046 (2019): The Number of Supreme Court professional judges is 77 for the full time judges. There are 7 temporarily assigned judges as well (2 women and 5 men).

Q046 (2018): The provided total corresponds to the number of judges actually performing their functions. Put differently, judges
who are temporary assigned to other institutions (Ministry of Justice, Judicial Academy, other judicial institutions including international courts), judges granted maternity leave etc. are not considered in the provided figures. Total number including judges temporary not performing their functions is 1427 (521 men, 906 women).

Q046 (2017): The increase in the total number of judges is caused by filling the previously designed vacant posts of judges.

Q046 (2015): The decrease in the number of judges in comparison with the previous cycle has been caused by the retirement of the judges whose posts have not been filled yet. The selection procedures for the vacant posts are under way.

Q046 (2014): In 2014, the total number of judges in the records of the Ministry of justice was 1366 (503 males, 863 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.

Q046 (2013): In 2013, the total number of judges in the records of the Ministry of justice was 1385 (511 males, 874 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.

Q046-2 (2023): family, enforcement and reminder departments, visiting judges, judges in evaluation committees, court presidents

Q046-2 (2022): For example hosting judges - can not be involved in one case type, presidents of the courts.
The distribution of administrative judges per instance is made based on the instance level of the court where they work and not based on the instance of the cases for which they are responsible.
When comparing the data presented in the table right above with the question Q046, a discrepancy of 11 judges in the overall count comes to light. It is imperative to clarify that Slovak Republic used a different methodology for these two questions. Here in the question Q046-2, it involved calculating an annual average for the number of judges per matter, instead of the critical moment of 31st of December as for Q046-2.

Q046-2 (2021): The Supreme Administrative Court had 21 administrative judges in 2021, included in Second instance.

Q052 (2023): Q052: Rechtspfleger: In connection with the EU project, project positions of "senior judicial officer - coordinator" were created in the courts, which were financed from EU funds and were kept separately in the records. Currently, these positions are financed from the budget of the Ministry of Justice of the Slovak Republic, and therefore the registered number is significantly higher than in the previous year.
Q052 (2022): The judiciary, especially the non-judges' positions, are probably not attractive for the males because of the salary.Another possible explanation is that the position of Rechtspfleger is a starting position before judicial exams and subsequent application for the position of judge, which could have caused an outflow of male employees.

Q052 (2021): The number of technical staff is included in category 3 (staff in charge of administrative tasks).
The position in line 2. is not atractive for males.
Q052 (2020): The number of technical staff and other non-judge staff are included in category 3 (staff in charge of administrative tasks)
Q052 (2018): See general comment.
There are no special explanation related to discrepancies in gender composition of court staff
Q052 (2017): The slight increase in the number of male non-judge staff originates at the Supreme court of the Slovak republic. The position of the "Judicial assistant" has been established and filled. The assistant helps the judge with legal research, drafting of decisions etc. Out of 86 assistants there are 29 male.
Q052 (2014): In 2014, the category "Rechtspfleger" subsumes 967 higher judicial officers and 63 mediation and probation officers. The category "staff assisting judges" includes assistants of judges and court secretaries. The category "staff in charge of different administrative tasks" encompasses court staff responsible for court administration, contact with the public (information centre, filing office), archives and technical staff. It was not possible to extract the accurate number of "technical staff" and "other non-judge staff" from the overall data on "staff in charge of different administrative tasks".

Q052 (2013): In 2013, the category "Rechtspfleger" includes 975 judicial officers, 45 legal assistants at the Supreme Court and 63 mediation and probation officers. The category "non-judge staff assisting judges" includes 1348 assistants and 752 judicial secretaries. The rest of the non-judge staff is subsumed in the category "other". In 2011 and 2012, the Ministry of Justice decided to increase the total number of the judicial officers with the intention to improve the disposition of certain court agendas.
Q052-1 (2021): Total non-judge staff working in courts at Supreme Administrative Court level - 59 total; 18 males and 41 females, included in line 3.. Some of the staff moved to the Supreme Administrative Court and some left the judicial system.

Q052-1 (2018): All data were provided by the central institution for the court management, The Department of Human Resources Development of the Ministry of Justice
Q056 (2014): For 2012 and 2014, only the number of heads of prosecution offices was indicated. There is one head prosecutor for every District prosecution office (54), every Regional prosecution office (8) and the General Prosecutor Office (1). However, on 1 January 2015, there were two vacant positions of heads of district prosecution offices.Besides the head of the prosecution office, the post of chief prosecutor implies also the deputies of every prosecution office, the specialised prosecutor and his/her deputies, the directors and the deputies of sections and departments of the General prosecution Office. For example, in 2014, the total number of prosecutors in chief position was 200 (119 men, 81 women).

Q057 (2022): Judicial assistants of the prosecutor's office and assistant prosecutors.

Q057 (2020): Other persons with similar duties as prosecutors are the legal attendants of the prosecutor's office and the assistant prosecutors. As for the different answer in the previous cycle, in that time the institute of assistant prosecutors did not yet exist yet.

Q060 (2022): The dicrepacy ratio was caused mainly by the resolution of the Govermnet of the Slovak republic, which ordered the state authorities to reduce the number of state employees by 10 %.
Q060 (2020): Staff increased for natural recruitment procedure

Q132 (General Comment): The stated sums represent the basic gross salary of judges/prosecutors without bonuses and supplements. According to the Act on Judges (No. 385/2000 Coll.) the average monthly salary of the judge equals the monthly salary of the Member of Parliament. The monthly salary of the judge at the beginning of the career is 90% of this salary. The monthly salary of the judge of the Supreme Court is 130 % of the monthly salary of the Member of Parliament. The judge is entitled to have 2 additional monthly salaries (in May and in November) unless he/she do not meet the conditions stipulated in law. The sum of annual average salary stated in this questionnaire counts 14 months salaries.
All bonuses and supplements are stipulated by law. Specific supplement belongs to the judges of the Specialized Criminal court and to the judges of the Supreme court deciding on the remedies against the decisions of that court. The value of the net salary depends on several individual criteria, e. g. the number of children, the voluntary pension security scheme etc. Similar rules govern the salaries of prosecutors (Act on Prosecutors and Trainee Prosecutors No.154/2001 Coll.). The average salary of the prosecutor equals the average salary of the judge. The salary of the beginning prosecutor is 85% of this salary, the salary of the prosecutor at the General Prosecutors office is equal to the salary of the Supreme Court judge. Prosecutors are also entitled to 2 additional monthly salaries. Supplements for the heads of the prosecutor offices are similar to supplements of the court presidents at the same level.The prosecutors of the Special Prosecutor´s Office are entitled to same supplement as the judges of the Specialized Criminal Court.

Q132 (2019): The stated sums represent the basic gross salary of judges/prosecutors stipulated by law without supplements (methodology comparable to previous years data in the questionnaire). See general comment for details.

Q132 (2018): The stated sums represent the basic gross salary of judges/prosecutors stipulated by law without supplements. See general comment for details.
Q132 (2014): The salaries of judges and prosecutors in 2014 were at the same level as in 2012. The adjustments of salaries for all State officials (Members of Parliament, Government, judges) were stopped in the years 2013 and 2014 due to State expenditures restrictions.
Q133 (2023): Prosecutors: Prosecutors are paid a pension supplement by the Prosecutor General's Office of the Slovak Republic, which in previous years was reported in "Special pension" and in 2023 was already reported in "Other financial benefits"
Q133 (2020): The regulation about housing was included in the Decree of the Ministry of Justice of the Slovak Republic no. 293/2019
Coll., which lays down the conditions and scope of reimbursement of increased expenses for traveling of the hosting judge, or the hosting court can offer accommodation for the judge.
Q133 (2019): The regulation about housing is newly included in the Decree of the Ministry of Justice of the Slovak Republic no. 293/2019 Coll., which lays down the conditions and scope of reimbursement of increased expenses for traveling of the hosting judge, or the hosting court can offer accommodation for the judge.
Q146 (2016): The number represents all lawyers registered in the list of the Slovak Bar Association.
Out of this number 848 lawyers have their practise suspended.
Q148 (2018): Slovak legal order does not regulate this type of legal advisors.
Q148 (2017): The Slovak legal system does not recognize this kind of legal advisors.

Slovenia

Q004 (2020): Annual average gross salary is increasing (increase by 4% from 2018 to 2019 and by 6% from 2019 to 2020).

Q004 (2016): Average monthly gross earnings for 2016.

Q046 (General Comment): The provided total number of judges corresponds to the number of de facto occupied judicial posts performing their functions. Some judges are assigned to other duties (eg. seconded to the Judicial council, Ministry of Justice, Supreme court) and are not included in the reported numbers. The information on actual presence (excluding e.g. seconded judges, the maternity or sick leave, but including the annual leave) is also available.
Judges at the Administrative Court (first instance court, see Q44) and higher judges at local and district courts (first instance courts) are reported as according to their courts (first-instance judges) and not according to their rank (higher-court judges).

Q046 (2023): At the end of 2023, 861 judicial posts were formally occupied, although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 845 professional judges (FTE) sit in courts (perform judicial function), since the rest of the judges (16 judges - difference to the total of 861 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The data on actual presence of judges in courts is also collected; the number of judges in the Slovenian judicial system in 2023 was 79,09 according to actual presence calculations.

Q046 (2022): At the end of 2022, 878 judicial posts were formally occupied, although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 862 professional judges (FTE) sit in courts (perform judicial function), since the rest of the judges (16 judges - difference to the total of 878 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The data on actual presence of judges in courts is also collected; the number of judges in the Slovenian judicial system in 2022 was 767,15 according to actual presence calculations.
Discrepancies (compared to 2020 data): Until 2021, approx. 30 judges at the Administrative Court (first instance court, see Q44) and approx. 50 higher judges at local and district courts (first instance courts) were reported as second-instance judges (accoriding to their rank: higher judge); from 2021 they are reported according to their court (first-instance judges).

Q046 (2021): At the end of 2021, 880 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 860 professional judges sit in courts (perform judicial function), since the rest of the judges (20 judges - difference to the total of 880 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The data on actual presence of judges in courts is also collected; the number of judges in the Slovenian judicial system in 2021 was 802,84 according to actual presence calculations.
Until 2021, approx. 30 judges at the Administrative Court (first instance court, see Q44) and approx. 50 higher judges at local and district courts (first instance courts) were reported as second-instance judges (accoriding to their rank: higher judge); from 2022 they are reported according to their court (first-instance judges).

Q046 (2020): At the end of 2020, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 875 professional judges sit in courts (perform judicial function), since the rest of the judges (15 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave).
The number of judges in the Slovenian judicial system in 2020 was 805,5 according to actual presence calculations.

Q046 (2019): At the end of 2019, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave).
Nevertheless, we report that 873 professional judges sit in courts (perform judicial function), since the rest of the judges (17 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.
The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave). The number of judges in the Slovenian judicial system in 2019 was 797 according to actual presence calculations.

Q046 (2018): At the end of 2018, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 867 professional judges sit in courts (perform judicial function), since the rest of the judges (23 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave).
The number of judges in the Slovenian judicial system in 2018 was 796 according to actual presence calculations.

Q046 (2017): At the end of 2017, 889 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 869 professional judges sit in courts (perform judicial function), since the rest of the judges (20 judges - difference to the total of 889 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.
The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave)
The number of judges in the Slovenian judicial system in 2016 was 795,54 according to actual presence calculations.

Q046 (2016): At the end of 2016, 897 judicial posts were formally occupied (full-time equivalent method), although some post were de facto vacant (e.g. judge absent due to maternity leave). The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave). The number of judges in Slovenian judicial system in 2016 was 811,52 according to actual presence calculations.
Nevertheless, we report that 880 professional judges sit in courts (perform judicial function), since the rest of the judges (17 judges - difference to the total of 897 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.

Q046 (2015): At the end of 2015, 912 judicial posts were formally occupied (FTE), although some post were de facto vacant (e.g. judge absent due to maternity leave).
Nevertheless, 897 professional judges sit in courts (perform judicial function), since
some judges were assigned to other duties (at the Supreme Court; different projects ;appointed to the Judicial Council and appointed to the Ministry of Justice.

We reported the Administrative court as the first instance court (Q42 and Q91). However, the law requires for the Administrative court judge to be a higher judge (2nd instance judge), therefore the Administrative court judges are included as the 2nd instance professional judges

Q046-2 (General Comment): Since 2021, data on judges classified by legal fields is collected by approximating the time an individual judge is working on a certain type of cases. The data is collected only as actual presence (not occupied posts/FTE). The category “Other” corresponds to “Other cases” at Q91: free legal aid at district courts, labour courts and at the Administrative court, enforcement cases on the basis of authentic document in civil matters before the writ for the execution became final (all cases processed at the Central Department for Authentic Document at the Local Court of Ljubljana – exclusive jurisdiction), international attestations at district courts, attestations according to the Hague convention at district courts.
The category "Other" does not include judges involved in the court management as they are partially or entirely relieved from adjudicating cases.

Q046-2 (2023): The data does not include judges involved in the court management (additional 42 judges).
The data for 2023 is reported as FTE (previous years: actual presence) to be compatible with CEPEJ specification. The data is actually collected as actual presence and is converted to FTE according to general ratio of actual presence/occupied posts in judiciary.
The data is only approximate - please see general comment.

Q046-2 (2022): The data is only approximate - please see general comment. The data is reported as actual presence (not FTE) and therefore not compatible with Q46. As already mentioned in the frame of Q46, the number of judges in the Slovenian judicial system in 2022 was 767,15 according to actual presence calculations.
The category "Other" does not include judges involved in the court management (additional 39 judges).

Q046-2 (2021): The data is only approximate - please see general comment. The data is reported as actual presence (not FTE) and therefore not compatible with Q46.
Q046-2 (2020): There is no data for 2020. In 2021, the data on judges by legal fields was collected for the first time (by approximating the time and workload an individual judge is working on a certain type of cases). Since the metodology of reporting is yet to be revised and elaborated, we can only report approximate numbers. For distinction on Civil and/or Commercial/Criminal/Administrative/Other please see comments to Q91, 93 and 94.
First instance judges: Civil and/or commercial: 62% (approx. 396 judges); Criminal: 33% (approx. 214 judges); Administrative: 4% (approx. 28 judges), Other: 1% (approx. 5 judges)
Please note: the judges at the Administrative Court that resolve administative cases at first instance have the rank of a higher judge.
Second instance judges: Civil and/or commercial: 66% (approx. 77 judges); Criminal: 34% (approx. 39 judges); Administrative: /, Other: /
Supreme court judges: Civil and/or commercial: 57% (approx. 16 judges); Criminal: 18% (approx. 5 judges); Administrative: 25% (approx. 9 judges), Other: /

Q052 (General Comment): Data is not collected in a way to allow reporting in CEPEJ categories above. Court staff is employed by courts to work on work posts as defined by the government regulation. Generally, work posts in public administration are divided on "expert-technical" staff and "officials". The Courts Law explicitly provides typical profiles of non-judge staff: judicial assistants, higher and independent judicial assistants and judicial advisers (comparatively they can also perform some typical Rechtspflegers tasks in civil enforcement, land registry, business registry and insolvency cases). The law also provides for judicial trainees. Other typical profiles in courts include: typists, registrars (case management systems) as well as employees in court management and general services (e.g. accounting, HR, archives, general maintenance, cleaning) and IT staff (system administrators/engineers).

Q052 (2023): The number of court staff is reported according to court management reporting standard (occupied work posts), while the number of males/females is calculated according to human resources records.
Break down by some typical profiles (number of occupied posts):
Court directors: 15
Judicial advisers: 617
Judicial assistants: 588
Court registrars: 498
Typists:881
Judicial trainees: 120

Q052 (2022): Approx. 3,5% of all court staff (120 persons) are judicial trainees (counted under “2. Non-judge (judicial staff”).

Q052 (2021): Approx. 3% of all court staff (115 persons) are judicial trainees (reported under “2. Non-judge (judicial staff”).

Q052 (2020): Approx. 3% of all court staff (109 persons) are judicial trainees (counted under “2. Non-judge (judicial staff”). No particular explanation can be given regarding the increase in the number of “3. Staff in charge of different administrative tasks and of the management of the courts” / Males.

Q052 (2017): Differences with previous evaluation cycles within categories (including male/female ratio):
The number of court staff is reported according to the actual work tasks of the staff. Between years, court staff can be assigned to different departments and tasks and therefore the variation of Rechtspfleger/Non-judge/Administrative staff categories and male/female ratio within categories can change, even though no major hiring or letting go for different categories of court staff had occurred. The relative differences in the Technical staff category are due to the small (absolute) number of staff.

Q052 (2016): Differences with previous evaluation cycles within categories (including male/female ratio):
The number of court staff is reported according to the actual work tasks of the staff. Between years, court staff can be assigned to different departments and tasks and therefore the variation of Rechtspfleger/Non-judge/Administrative staff categories and male/female ratio within categories can change, even though no major hiring or letting go for different categories of court staff had occurred. The relative differences in the Technical staff category are due to the small (absolute) number of staff.

Q052 (2015): The difference between 2014 and 2015 data is due to the methodology of gathering the data. In this cycle, all the courts were asked to provide the additional data to assure the accuracy of the answer. The reporting method was further improved and some adjustments were made according to the definition of “Rechtspfleger”, “Non-judge staff” and „Administrative staff“ categories.

Q052 (2014): In courts, there were 14,55 % of males and 85,45 % of females (judges included) on 31. 12. 2014. In this cycle the reporting method was further improved. The Supreme Court's strategic orientation according to this matter is to decrease the number of judges, while increasing the number of non-judge staff. The Supreme Court can, in order to ensure timeliness of proceedings, distribute additional finances for temporary employment of additional staff to individual courts.

Q052 (2013): The category 1 - "Rechtspfleger" includes court clerks, independent and higher judicial advisors in the field of commercial (court) register, land register and civil enforcement procedure, as they have the competence to decide on certain cases, judicial advisers in the field of civil enforcement, who have even slightly broader competences than judicial assistants. The category 2 includes judicial advisers and the remaining judicial assistants. The category 3 includes administrative support to the judge and court management – court director, human resources office, financing-accounting office. The category 4 refers to cleaning, security, system administration, drivers, etc.

Q052-1 (General Comment): Besides profiles typically working in courts, the court staff at second instance include judicial trainees (formally employed by higher courts, while doing internship at first instance courts). At third instance the staff at the Supreme court Centre for Informatics is included - mostly system administrators/engineers and project managers.

Q052-1 (2023): The number of court staff is reported according to court management reporting standard (occupied work posts), while the number of males/females is calculated according to human resources records (by instance).
The figures include: 120 judicial trainees at the second instance (formally employed by higher courts, while doing internship at first instance courts), and approx 20 employees of Centre for Informatics at third instance.

Q052-1 (2020): No particular explanation can be given regarding the increase in the number of “3. Total non-judge staff working in courts at Supreme Court level” / Males.

Q055 (General Comment): The number is reported in FTE.
Selection process in the procedure for appointing state prosecutors with the formation of a final opinion is in the competence of the State Prosecutor's Council (an independent state body). State prosecutors are appointed by the government.
In Slovenian criminal justice system state prosecutors are exclusively authorized to conduct public prosecution in criminal matters on behalf of society and in the public interest. The Constitution and law guarantee autonomy in status and functioning of state prosecutors. Decisions made by the state prosecutor shall not be interfered with, except by way of general instructions and assigning of a case in the manner determined by the law. Slovenian state prosecutors perform their function in 13 organizational units – prosecution offices. There are 11 District State Prosecutor's Offices and one Specialized State Prosecutor's Office of The Republic of Slovenia, where local, district and senior state prosecutors are positioned. At The Office of the Prosecutor General of the Republic of Slovenia supreme state prosecutors and State Prosecutor General perform their functions. Here are also some state prosecutors of lower ranks assigned to perform demanding professional tasks.
There are no higher state prosecutor's offices as the proceedings before the courts of appeal are governed by the district prosecutor's offices. According to the State Prosecution Service Act prosecutors with the rank of at least local state prosecutor may represent a case before local courts, prosecutors with the rank of at least district state prosecutor may represent a case before district courts, prosecutors with the rank of at least senior state prosecutor may represent a case before higher courts and only supreme state prosecutors may represent a case before the supreme court. Local state prosecutors may also appear before district courts if authorized by the head of state prosecutor's office for certain categories of matters, fo

r a particular matter, for certain categories of procedural acts or for a particular procedural act. Local and district prosecutors may in their cases appear along with a senior prosecutor before the courts of appeal if authorized by the head of an appellate division of the state prosecutor's office for a particular case. Senior and supreme state prosecutors are competent to represent a case also before first instance courts.
In the context of question 55 we counted local and district prosecutors as prosecutors at first instance level, senior prosecutors as prosecutors at second instance level and supreme prosecutors as prosecutors at Supreme Court level without regard of the rang of court before they perform their function in fact or if they are assigned to other institution for a limited period of time (e.g for the administration of State Prosecutorial Council).

Q055 (2023): Numbers are reported in FTE and rounded-up to whole numbers.

Q055 (2022): The number is reported in FTE format. The total gross number of state prosecutors is 210.
An increase in number of higher and supreme state prosecutors is due to the slow/stalled procedures for appointment of candidates at the government in 2020 and 2021 (in 2022, some candidates that applied in 2018, 2019 and 2020 were appointed.)

Q055 (2021): Before 2021, data was reported in gross numbers. For 2021 data, the FTE format is observed.
The above data does not include six State prosecutors who perform other duties (assigned to The Council of State Prosecutors, appointed to Eurojust, the European Public Prosecutor and the European Delegate Prosecutor).

Q055 (2020): The information is in form of gross data. According to the methodology used for reporting judges and court staff (FTE) – by which part-time employees are converted to full-time time by the calculation of working hours, the number amounts to 193, as a number of prosecutors are not working full time.

Q055 (2016): Slovenian state prosecutors perform their function in 13 organizational units. There are 11 district prosecutor's offices and one Specialised State Prosecutor's Office of The Republic of Slovenia, where local, district and higher state prosecutors are positioned. At The Office of the Prosecutor General of the Republic of Slovenia supreme state prosecutors and State Prosecutor General perform their functions. Here are also some state prosecutors of lower ranks assigned to perform demanding professional tasks.
There are no higher state prosecutor's offices as the proceedings before the courts of appeal are governed by the district prosecutor's offices. According to the State Prosecutor Act prosecutors with the rank of at least local state prosecutor may represent a case before local courts, prosecutors with the rank of at least district state prosecutor may represent a case before district courts, prosecutors with the rank of at least higher state prosecutor may represent a case before higher courts and only supreme state prosecutors may represent a case before the supreme court. Local state prosecutors may also appear before district courts if authorized by the head of a state prosecutor's office for certain categories of matters, for a particular matter, for certain categories of procedural acts or for a particular procedural act. According to amendment of legislation in 2015 local and district prosecutors may in their cases appear along with a higher prosecutor before the courts of appeal if authorized by the head of an appellate division of the state prosecutor's office for a particular case. Higher and supreme state prosecutors are competent to represent a case also before first instance courts.
In the context of question 55 we counted local and district prosecutors as prosecutors at first instance level (164), higher prosecutors as prosecutors at second instance level (42) and supreme prosecutors as prosecutors at Supreme Court level (11) without regard of the r

ang of court before they perform their function in fact or if they are assigned to other institution for a limited period of time (e.g for the administration of State Prosecutorial Council). The information is in form of full-time equivalent.

Q055 (2014): In November 2011, the new State Prosecutor Act came into force. It dissolved the special department of the Office of the State Prosecutor General, responsible for the 2d instance level. Proceedings before courts of appeal are now governed by the 4 State circuit prosecutor offices in towns where the higher courts are located. Prosecutors are organised in 12 offices (11 circuit offices and one Specialised State Prosecutor's Office, where circuit and higher prosecutors work) and the Supreme State Prosecutor Office (where supreme State prosecutors and the general State prosecutor work). The function "assistant State prosecutor" changed in "local State prosecutor". The Specialised State Prosecutor's Office for dealing with the most severe criminal offences was established.

Q056 (General Comment): We considered heads of District State Prosecutor's Offices and Specialized State Prosecutor's Office of The Republic of Slovenia as heads of prosecution office at first instance level. There is no organizational counterpart in the structure of prosecution office to courts of second instance, so the answer is NAP. We considered prosecutor general as the head of prosecution office at supreme court level.

Q056 (2020): The difference is due to small absolute number.

Q056 (2016): The position of the Supreme Court president was not filled on 31. 12. 2016 . The term of the previous president ended during 2016 and new president was not elected until 2017. The new president for the next 6-years-term is male.

Q060 (General Comment): The information is in FTE. Staff attached to the public prosecution service are civil servants at state prosecutor's offices (state prosecutorial personnel). Staff includes the director general, directors, judicial advisors, trainees, administrators, registrars and other civil servants from state prosecutor's offices. Trainees typically do not perform a significant amount of work as their role is to learn; however they participate in hearings and drafting of court decisions in some cases.

Q060 (2022): The number is reported in FTE format. The total gross number of staff is 309.

Q060 (2021): Before 2021, data was reported in gross numbers. For 2021 data, the FTE format is observed.

Q060 (2020): The information is in form of gross data. According to the methodology used for reporting judges and court staff (FTE) – by which part-time employees are converted to full-time time by the calculation of working hours, the number amounts to 298, as a number of staff are not working full time.

Q060 (2016): The information is in form of full-time equivalent.

Q060 (2014): The substantial increase of employments in state prosecutor's offices in 2014 is a result of Government's decision to strengthen the fight against corruption and other fields of criminality defined in the Prosecution Policy. In the year 2014, 40 Senior Judicial Advisers took up their post, as well as 7 other types of civil servants. In the year 2015 the employment procedures were concluded for admitting 15 trainees.

Q132 (General Comment): The basic salary for judges and prosecutors is regulated by law, as well as promotion. The salary of the prosecutor is determined on the same basis, with the same supplements and in the same way as the salary of the judge. All employees in the country (including judges and public prosecutors) are also entitled to the supplement for the period of employment. As the calculation of the average pay would be too complicated, we report figures calculated from above criteria. Please note all figures reported include the supplement for the period of employment.
Judge/prosecutor at the beginning of the career: starting salary for local court judge and for local state prosecutor (without promotion), including the supplement for the period of employment (5 years) - approx. 1-2% of the reported amount.
Judge/Prosecutor at the highest instance: salary of a supreme court judge and supreme state prosecutor – counselor (not president of the Supreme Court or State Prosecutor General) including the supplement for the period of employment (44 years) - approx 15% of the reported amount.

Q132 (2023): In June 2023 the Constitutional Court decided on a request of the Judicial Council to review the constitutionality of the statutory regulation on judges' salaries (Case No. U-I-772/21). The predominant part of the consideration of this case involved the review of the constitutionality of the regulation of judges' basic salaries (regulated in the Public Sector Salary System Act).
The Constitutional Court held that the regulation of judges' basic salaries was inconsistent with the constitutional principle of judicial independence, as it did not comply with the constitutional requirement that judges' salaries be relatively stable. Judges' salaries have namely very significantly lost real value in just over ten years. The Constitutional Court further held that, with regard to the principle of judicial independence, the following allegations may, in principle, also be relevant, namely that the growth of judges' salaries lags behind the growth of the average salary in the state, or in a certain narrower employment segment that is more closely related to judges; that the ratio between judges' salaries and other salaries is inappropriate; that the (excessively) low salaries of judges affect the (un)attractiveness of the judicial profession; and, under certain conditions, the allegations concerning the entitlement of judges to social transfers may also be relevant.
In the context of the review of the consistency of the regulation of judges' basic salaries with the principle of the separation of powers, the Constitutional Court reiterated its position that the three branches of power must also be equal with regard to the financial status of their officials, and that this requirement is not one of perfect uniformity, but of relative comparability. In this regard, taking into account the applicable normative regulation of the entitlement of deputies of the National Assembly to a set monthly allowance for covering the expenses incurred in relation to the performance of their wor

k in a constituency, and taking into account the fact that deputies may be placed into higher salary grades than the starting salary grade, the Constitutional Court established that the regulation of judges' basic salaries, as regards the salary ratio between deputies and the lowest-ranked judges, is inconsistent with the principle of the separation of powers. The Constitutional Court added, however, that it cannot be held that the challenged salary ratios between Supreme Court judges and ministers are unconstitutional.
In the light of the above, the Constitutional Court held that the Public Sector Salary System Act, insofar as it refers to judges's salaries and it's revalorisation procedure, was inconsistent with the Constitution. However and set a deadline for the law-maker to remedy the incompliance with the Constitution. The ruling has not been implemented yet despite protests as the government has been insisting it will tackle judiciary pay as part of comprehensive salary reform in the entire public sector, which is yet to be finalised.
Following up on its earlier decision, the Constitutional Court has decided in May 2024 (U-I-8/24) that judges' pay be raised by an amount corresponding to the total rise in consumer prices in the past decade. The judges will receive higher salaries in September 2024, when they receive their monthly pay for August, along with the difference in back pay starting from 3 January 2024. The Constitutional court's decision determines that salaries should be raised in a way that takes the pay brackets valid on 1 June 2012 and adjusts them for inflation recorded between that day and 31 December 2023. A calculation on the website of the national Statistical Office website shows this amounts to 26.2%.

Q133 (General Comment): There is a possibility for judges, public prosecutors and state attorneys (as well as other public servants in judiciary) to apply for a non-profit tenancy in an apartment, owned by the Ministry of Justice. However, the number of available apartments is very low (less than 0,5% of all functionaries and public servants in judiciary).

Q133 (2018): There is a possibility for judges, public prosecutors and state attorneys (as well as other public servants in judiciary) to apply for a non-profit tenancy in an apartment, owned by the Ministry of Justice. However, the number of available apartments is very low (less than 0,5% of all functionaries and public servants in judiciary).

Q146 (2017): (Male: 939, 798: female).

Q147 (General Comment): Persons entered in the directory of the Bar Association of Slovenia are only lawyers (and not other legal experts, in-house counsellors etc.)

Spain

Q004 (2023): The gross annual salary of Spanish workers grew by 4.7% in 2023, to 26.555,89 euros, according to the data published by the National Statistics Institute (INE) in the annual labour cost survey.
Q004 (2022): The increase can be explained by increase of minimum legal salary.

Q052 (General Comment): The Spanish judicial system distinguishes between three categories of non-judicial staff: Gestor Procesal, Tramitador Procesal and Auxilio Judicial. The sum of these bodies, destinated to Courts, is the response to Q.52.5 'Other non judge staff'.

Q052 (2023): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts: 45.544
In adition to that, there are 1.161 Forensic Doctors.
Regarding the distribution males / females: This distribution can only be given from the Autonomous Regions of the direct competence of the Ministry of Justice (5 of 17). In these Autonomoues Regions the proportion of females within the civil servants in Courts is
72% (therefore, 28% of males and 72% females). This proportion is possibly applicable to the whole national system.

Q052 (2022): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:45332
In adition to that, there are 1155 Forensic Doctors.
Regarding the distribution males / females: This distribution can only be given from the Autonomous Regions of the direct competence of the Ministry of Justice (5 out of 17). In these Autonomoues Regions the proportion of females within the civil servants in Courts is
71% (therefore, 29% of males). This proportion is possibly applicable to the whole national system.

Q052 (2021): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:44651
In adition to that, there are 1147 Forensic Doctors.

Q052 (2020): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:44289
In adition to that, there are 1144 Forensic Doctors.
Regarding the distribution males / females: This distribution can only be given from the Autonomous Regions of the direct competence of the Ministry of Justice (5 out of 17). In these Autonomoues Regions the proportion of females within the civil servants in Courts is 71'76% (therefore, 28'23% of males). This proportion is possibly applicable to the whole national system.

Q052 (2019): The data indicated in the chart as 'other non judge staff' (43556) includes the three kinds of civil servants that work in Courts (Gestión procesal, Tramitación procesal, Auxilio judicial). In addition to that, there are other 1122 Forensic Doctors.
Q052 (2018): 1121 Forensic Doctors
Q052 (2017): The figure for other non judge staff includes judicial civil servants who are in charge of the processing of files, communication acts, and other tasks, and are distributed in three categories (called Auxilio Judicial,Tramitación Procesal, Gestión Procesal). Forensic Doctors are a special body (not included in the figure provided in this question). Their total number (Forensic Doctors) at 4 April 2018 is 1003.
For 2017, in contrast with previous cycles, data on number of “other non-judge staff” excludes the civil servants that work in Prosecution Offices.

Q052 (2016): The figure for other non judge staff includes judicial civil servants who are in charge of the processing of files, communication acts, and other tasks, and are distributed in three categories (called Auxilio Judicial, Tramitación Procesal, Gestión Procesal). Forensic Doctors are a special body (not included in the figure provided in this question). Their total number (Forensic Doctors) at 4 April 2018 is 1003.
Q052 (2014): In 2014, there are 44 896 other non-judge staff (judicial clerks) and 3 667 judicial counsellors (this is the new name for the secretario judiciales since October 1st).
Q052-1 (2018): These figures include the number of "letrados de Administración de Justicia", which are the CEPEJ equivalent of "Rechtspfleger".
Q055 (General Comment): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'. However, it distinguishes three categories.
Article 34 of Law 50/1981, (Organic Statute of the Public Prosecutor's Office) distinguishes three categories:
1st Chamber Prosecutors of the Supreme Court, equal to Magistrates of the High Court. The Deputy Prosecutor of the Supreme Court will be considered the President of the Chamber.
2nd Prosecutors, equated to Magistrates.
3. Lawyers-Prosecutors, equated to Judges.

Q055 (2023): As mentioned in previous exercises, the structure of the Prosecution service does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First category ("Fiscales de Sala") Prosecutor of Chamber: Total 36, Males 21, Females 15(this category includes the Prosecutors of chamber of Supreme Court).
Second category: "Fiscal": Total 1944, Males 706, Females 1238 Third category: "Abogado-Fiscal": Total 770, Males 183, Females 587
Source: Ministry of Presidency, Justice and Relations with the Parliament.

Q055 (2022): As mentioned in previous exercises, the structure of the Prosecution service does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category ("Fiscales de Sala") Prosecutor of Chamber: Total 40, Males 26, Females 14 (this category includes the Prosecutors of chamber of Supreme Court).
Second. "Fiscal": Total 1908, Males 704, Females 1204
Third: "Abogado-Fiscal": Total 771, Males 187, Females 584

Q055 (2021): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category ("Fiscales de Sala") Prosecutor of Chamber: Total 32, Males 21, Females 11 (this category includes the Prosecutors of chamber of Supreme Court).
Second. "Fiscal": Total 1825, Males 701, Females 1124
Third: "Abogado-Fiscal": Total 774, Males 178, Females 596

Q055 (2020): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category ("Fiscales de Sala del Tribunal Supremo") Supreme Court Prosecutor of Chamber: Total 33, Males 26, Females 7
Second. "Fiscal": Total 1830, Males 700, Females 1130
Third: "Abogado-Fiscal": Total 681, Males 158, Females 523

Q055 (2018): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, Total 33, Males 26, Females 7
Second) Total 1779, Males 696, Females 1083
Third) Total 653, Males 161, Females 492

Q055 (2016): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First) Total 25, Males 19, Females 6
Second) Total 1826, Males 738, Females 1088
Third) Total 622, Males 155, Females 467

Q056 (General Comment): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
So it is not applicable the cathegories designed by the questionnaire. The Spanish structure distinguishes Heads of offices of the Autonomous Region, Heads of offices of Province, Heads of offices of area.

Q056 (2023): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
Number of Heads of offices of the Autonomous Región: Total 16 (Males 9, Female 7)
Number of Heads of offices of Province: Total 43 (Males 24, Female 19)
Number of Heads of offices of Area: Total 24 (Males 11, Females 13)

Q056 (2022): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
Number of Heads of offices of the Autonomous Región: Total 17 (Males 9, Female 8)
Number of Heads of offices of Province: Total 44 (Males 25, Female 19)
Number of Heads of offices of Area: Total 26 (Males 11, Females 15)

Q056 (2020): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
Number of Heads of offices of the Autonomous Región: Total 17 (Males 12, Female 5)
Number of Heads of offices of Province: Total 44 (Males 27, Female 17)
Number of Heads of offices of Area: Total 27 (Males 8, Females 19)

Q056 (2018): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
Number of Heads of offices of the Autonomous Región: Total 17
(Males 11, Female 6)
Number of Heads of offices of Province: Total 44 (Males 30, Female 14)
Number of Heads of offices of área: Total 26 (Males 11, Females 15)

Q056 (2016): Number of Heads of offices of the Autonomous Región: Total 17 (Males 13, Female 04)
Number of Heads of offices of Province: Total 44 (Males 30, Female 14)
Number of Heads of offices of área: Total 27 (Males 10, Females 17)

Q057 (General Comment): Police officers can present a police report directly to the Criminal Investigation Courts.

Q132 (General Comment): Judicial and Prosecutorial careers - The regulation of the remuneration system for members of the judicial and prosecutorial careers is contained in Law 15/2003 of 26 May regulating the remuneration system of the judicial and prosecutorial careers and is based on the principles of objectivity, fairness, transparency and stability. The remuneration system for judicial and prosecutorial careers is generally made up of a fixed component and a variable component based on objectives, the quantification elements of which are detailed in the law.
The fixed component rewards the category and seniority in the judicial career, as well as the objective characteristics of the positions held. Fixed remuneration is divided into two categories: basic remuneration and additional remuneration. The basic salary is made up of salary (it remunerates the category held within the judicial career and is fixed) and seniority (it is remunerated by a successive increase of five per cent of the initial salary corresponding to the category of entry for every three years of active service or in other administrative situations in which time is recognised for this purpose). Salaries and seniority objectively reflect the category within the judicial career and the successive proportional increase on the initial salary, fixed at five per cent every three years. Judges and magistrates are entitled to two additional payments per year, each equal to one month's salary and recognised seniority, and, if applicable, a proportional amount for the destination allowance under the conditions established by law for the entire State public sector, paid in June and December.
The additional remuneration is made up of the allowance for each post and the specific allowance. The allowance corresponding to each post of judge or magistrate is quantified according to the following criteria The population group to which it belongs; the objective conditions of representation linked to the position held and other specifi

c circumstances linked to the post. The amount of the special allowance for each post of judge or magistrate is set out in Annex II to the Act. The special allowance compensates for the special conditions of certain posts of particular responsibility, complexity or difficulty. The posts benefiting from the special allowance and the amount of the special allowance are listed in Annex III to the Act.
The variable remuneration based on objectives is based specifically on the individual performance of each judge in the performance of his or her judicial and professional duties, as certified by the system of dedication modules. The objective for each assignment in the judicial career is set by the General Council of the Judiciary in accordance with the modules of dedication or other technical criteria it deems appropriate. The variable remuneration works by modulating the amount of the fixed remuneration in parallel with the performance of the previous six-month period. If the members of a court achieve a particularly noteworthy individual performance, i.e. if they exceed the objective assigned to the post by 20 percent, an increase of between five and 10 percent of the fixed remuneration is applied. In cases where, for reasons directly attributable to the judge, the individual performance is insufficient and does not reach 80 percent of the target, the fixed remuneration is automatically reduced by five percent of its amount. Under no circumstances can variable remuneration for targets be consolidated.
The following shall have the status of special remuneration: those corresponding to the performance of on-call duties; those derived from the performance of extraordinary duties without relief from judicial functions; those corresponding to substitutions involving the joint performance of another function, provided that they are in all cases compatible with the other remuneration concepts regulated by law and that their accrual and amount are adapted to the regulatory scheme approved by the Government.
Final comment: Special mention should be made of the recent updating of the amounts of the representation allowance for members of the judicial and prosecutorial professions, which have been subject to an increase in remuneration of between 440 and 450 euros, depending on the type of body and post, by virtue of Royal Decree 775/2023 of 3 October updating the remuneration system for the judicial and prosecutorial professions, in accordance with Law 15/2003 of 26 May regulating the remuneration system for the judicial and prosecutorial professions. These increases are made ex officio by the administration and are retroactive to 1 January 2023.

Q132 (2023): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Judges 7.154.057,70 euros, Prosecution 3.607.755,10 euros.
Professional substitutions: Judges 8.899.597,45 euros. Prosecution 1.094.364,54 euros,

Q132 (2022): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.462.886,71 euros, Judges 6.889.266,33 euros.
- Professional substitutions. Prosecution 1.014.132,71 euros, Judges 10.489.137,61 euros.
Q132 (2021): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.391.688,99 euros, Judges 6.719.737,10 euros.
- Professional substitutions. Prosecution 596.210,59 euros, Judges 7.666.770,44 euros.
Q132 (2020): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.364.701,68 euros, Judges 6.760.485,89 euros.
- Professional substitutions. Prosecution 624.438,54 euros, Judges 8.852.605,61 euros.

Q132 (2019): Other two concepts have to be taken into account:
- Remuneration for objectives. (For 2019, Judges 6.560.790,81, Prosecutors 3.298.733,53)
- Professional substitutions. (For 2019, Judges 6.028.864,05; Prosecutors 726.720,41)
Remuneration according to objectives can be considerable in both cases.Substitution refers to cases in which, according to the law, one judge substitutes another, thereby accruing an increase in remuneration, depending on the circumstances and duration of that substitution.

Q132 (2018): Other two concepts have to be taken into account:
- Remuneration for objectives. (For 2018, Judges 6.474.050,91, Prosecutors 3.220.851,03)
- Professional substitutions. (For 2018, Judges 3.220.851,03; Prosecutors 646.740,23)

Q146 (2023): Lawyers 'census' [Abogacía en datos] (Spanish General Bar Association website): Information on practicing and resident lawyers. Percentage of women and men (45 and 55% aprox.)

Q146 (2022): Lawyers 'census' [Abogacía en datos] (General Bar Association website): Information on practicing and resident lawyers. Percentage of women and men (45 and 55% aprox.)

Q146 (2021): The data are obtained through the General Bar Association Annual Report 2021. On practicing and resident lawyers.

Q146 (2020): The data are obtained through the General Bar Association Annual Report 2020. On practicing and resident lawyers.

Q146 (2017): Resident Lawyers (Memory of the General Bar Association 2017)

Q146 (2016): Resident Lawyers (31 December 2016)

Q146 (2015): In civil cases, mainly the legal representation is for Procuradores. In criminal cases, lawyers can assume legal representation until a Procurador is appointed for the case. In administrative cases legal representation is mostly assumed by lawyers. Graduados sociales' (consultants on labour and social security matters) may represent the parties in labour law proceedings. The responses above are given is on the basis that lawyers have a monopoly on practising the defence at Court which, in Spain, is not equivalent to “legal representation”.

Indicator 7: Professionals of justice

comments provided by the national correspondents

organised by question no.

Question 004. Average gross annual salary (in €) for the reference year

Question 046. Number of professional judges sitting in courts (if possible on 31 December of the reference year). (Please give the information in full-time equivalent and for posts actually filled for all types of courts - general jurisdiction and specialised courts)

Question 046-2. Number of judges (FTE) by case type:

Question 052. Number of non-judge staff who are working in courts (if possible on 31 December of the reference year) (this data should not include the staff working for public prosecutors; see question 60) (please give the information in full-time equivalent and for posts actually filled)

Question 052-1. Number of non-judge staff by instance (if possible, on 31 December of the reference year) (this data should not include the staff working for public prosecutors; see question 60) (please give the information in full-time equivalent and for posts actually filled).

Question 055. Number of public prosecutors (on 31 December of the reference year). (Please give the information in full-time equivalent and for posts actually filled.)

Question 056. Number of heads of prosecution offices.

Question 057. In your judicial system, do other persons have similar duties to those of public prosecutors?

Question 060. Number of staff (non-public prosecutors) attached to the public prosecution services, if possible, on 31 December of the reference year and without the number of non-judge staff, see question 52 (in full-time equivalent and for posts actually filled).

Question 132. Salaries of judges and public prosecutors on 31 December of the reference year:

Question 133. Do judges and public prosecutors have additional benefits?

Question 146. Total number of lawyers practising in your country:

Question 147. Does this figure include “legal advisors” who cannot represent their clients in court (for example, some solicitors or in-house counsellors)?

Question 148. Number of legal advisors who cannot represent their clients in court:

Question 004

Austria

Q004 (General Comment): Since the 2010 evaluation, the provided figure corresponds to the average gross income including taxes and social expenses borne by the employee, but not employer’s contribution for social insurance. This is in line with the figures given in question 132 (gross annual salary of judges and prosecutors).

Q004 (2022): Source: Statistik Austria

Q004 (2019): 2018 data has been communicated, pending 2019 data.

Belgium

Q004 (General Comment): Source: National Bank of Belgium, https://www.nbb.be

Q004 (2021): The average gross annual salary is 44022,8 euros, source National Bank of Belgium.

Q004 (2020):
Answer provided based on the latest data published by the National Accounts (April 2021).

Q004 (2019): Average gross annual salary for employees (both full-time and part-time).

Q004 (2016): Average gross salary for a full-time employee (without exceptional bonuses and vacation pay)

Bulgaria

Q004 (2023): The final 2023 data is published on 29.11.2024. It is 24 485 Leva or 12 518 Euro

Q004 (2021): Preliminary data.
The minimum wage in the country has been risen with 6.6%. In section “Human health and social work activities” the average annual wage increased with 25.7% due to additional wage payments related with the health crisis. In section “Education” there was an increase of the teachers' wages and salaries and the increase in the section was 17.0%. High growth rate of wages and salaries in 2021 compared to 2020 (17.7%) was recorded in “Accommodation and food service activities” as the section started to recover after 2020 lockdowns.

Q004 (2018): NSI data

Q004 (2016): No explanation.

Croatia

Q004 (2023): Values for 2022 and prior years may differ from previous deliveries. The GDP for 1995-2023 was revised and published in 2023, including "Gross Domestic Product, Revised Data" (https://podaci.dzs.hr/media/r1dhalwf/msi-bruto-domaci-proizvod.xlsx) and "Annual Gross Domestic Product - Annual Calculation, Revised Data" (https://podaci.dzs.hr/media/c51dcmbr/bruto-domaci-proizvod-godisnji.xlsx).

Q004 (2022): will be explained later

Q004 (2021): Average monthly gross salary for 2021 for person in paid employment in legal entities in the Republic of Croatia is available at web page of the Croatian Bureau of Statistics (https://podaci.dzs.hr/2021/en/10583).
This monthly gross salary (9599 Croatian Kuna) has been multiplied by 12 and then divided by Croatian Kuna / Euro average annual medium exchange rate published by the Croatian National Bank (7,52418 Croatian Kuna for 1 Euro; this information is available at https://www.hnb.hr/temeljne-funkcije/monetarna-politika/tecajna-lista/tecajna-lista.)

Q004 (2019): With regard to this question, no data are available for 2019. The data from 2018 have therefore been included.

Q004 (2018): With regard to this question, no data are available for 2018. The data from 2017 have therefore been included.

Q004 (2016): The circumstances have changed since the last campaign

Greece

Q004 (General Comment): The survey based on which data on average national salary are established is conducted on a four-year basis. The most recent data are for 2022 and they became available at the end of 2024.

Q004 (2023): The most recently available data are 2022 data.
According to the Structure and Distribution of Earnings Survey for 2022, the average annual gross earnings are as follows: Total/Avg. Male: 21 947 Female: 17 361. The CEPEJ uses as an estimation the average value of these two figures.
https://www.statistics.gr/el/statistics/-/publication/SJO47/-

Q004 (2022): Our service has the data of the structure and distribution of Remuneration Survey in enterprises on the structure of
remuneration of employees(having a dependent employment relationship) in enterprises by Sector (B-S branches), excluding X (Public
Administration and Defense, compulsory Social Security) based on the NACE Rev. 2. The survey is conducted on a four-year basis.
Therefore, the latest available figures are of the year 2018. The results o of the survey will be published in late 2024 to early 2025.

Q004 (2021): Our service has the data of the structure and distribution of Remuneration Survey in enterprises on the structure of remuneration of employees(having a dependent employment relationship) in enterprises by Sector (B-S branches), excluding X (Public Administration and Defense, compulsory Social Security) based on the NACE Rev. 2. The survey is conducted on a four-year basis. Therefore, the latest available figures are of the year 2018. The results of the of the survey will be published in late 2024 to early 2025.

Q004 (2020): The data come from the Survey of the Structure and Distribution of Remuneration in Greece for the year 2018, from which the sector X is excluded (Public Administration and Defense, Compulsory Social Security) based on the classification of activities NACE Rev. 2 and relate to the average annual gross earnings in euros. Data is available by gender.The only one available at the moment.
Men 19 234 Average Women 15 947 Average

Q004 (2019): The competent authority for this data (see Hellenic Statistical Authority) provides the relevant numbers. The competent authority did not provide any numbers for this section.

Q004 (2016): The data provided correspond to those of 2014, since the statistics on this point are carried out every four years. Therefore, they are not absolutely accurate.

Hungary

Q004 (2023): In comparison to the previous year, the average gross annual salary increased due to the raising of the minimum wage, and of course the forint exchange rate change.
The above data is based on the labour market data (614,426 HUF/month) published on the website of the Hungarian Central Statistical Office (https://www.ksh.hu/stadat_files/mun/en/mun0001.html) and the average EUR currency rate (381.95 HUF/EUR) published on the website of the National Bank of Hungary (http://mnbkozeparfolyam.hu/arfolyam-2023.html). The relevant data of the Hungarian Central Statistical Office is currently still in “preliminary” status, therefore it cannot be considered final. It is unknown when the preliminary data will be revised and finalised.

Q004 (2022): In comparison to the previous year, the average gross annual salary increased due to the general development of Hungarian
economy, to the increase in our GDP, as well as to the raising of the minimum wage.
See the most important annual data on the labour market on the website of the Hungarian Central Statistical Office: https://www.ksh.hu/stadat_files/mun/en/mun0001.html

Q004 (2021): In comparison to the previous year, the average gross annual salary increased due to the general development of Hungarian economy, to the increase in our GDP, as well as to the raising of the minimum wage.
See the most important annual data on the labour market on the website of the Hungarian Central Statistical Office: https://www.ksh.hu/stadat_files/mun/en/mun0001.html

Ireland

Q004 (2022): Year 2022 is the latest year for which data are available.

Q004 (2021): Year 2021 is the latest data available. The figure of €44,912.24 was taken from Q4 but it should be noted that the annual gross salary fluctuated during the course of 2021.
https://www.cso.ie/en/releaseandduplications/en/elcq/earningsandlabourcostsq42021final/2022premliminaryestimates.
According to preliminary estimates of the Earnings and Labour Costs Quarterly release, the average weekly earnings were €880.3 in Q1 2022, an increase of 2.3% from €860.19 one year earlier and an increase of 10.0% from the same period in 2020. This represents average earnings of those in employment in the Irish economy in Q1 2022, including those supported by the Employment Wage Subsidy (EWSS).
https://www.cso.ie/en/releaseandduplications/en/elcq/earningsandlabourcostsq42021final/2022premliminaryestimates.

Q004 (2020): Year 2019 is latest data available

Q004 (2019): Comments Taken from Earnings and Labour Costs Annual 2019 release of 26 June 2020
https://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2019/

Latvia

Q004 (General Comment): After 2012, the minimum monthly salary increased, which had an effect on the average gross annual salary.

Q004 (2023): The changes in the average salary in 2023 were influenced by the increase of the national minimum wage, as well as the increase of the maximum non-taxable minimum and the coefficient applied in the calculations of the differentiated non-taxable minimum.

Q004 (2022): The average wage in Latvia continues to rise for several years in a row. In 2022, the increase in average wages was influenced by several factors: the lifting of the restrictions of COVID-19, which boosted economic activity, a low unemployment rate, which created the conditions for a small increase in wages.

Q004 (2021): The data provided by the Central Statistical Bureau.

Q004 (2020): The data provided by the Central Statistical Bureau.

Q004 (2016): on 2016

Lithuania

Q004 (General Comment): According to data from the State Data Agency, wage changes were influenced by the increase in the minimum monthly wage from January 1, 2024, the increase in the minimum salary coefficients for employees of budgetary institutions, changes in the calculation of the non-taxable income amount, and other reasons.

Q004 (2023): Increase in earnings was influenced by increased basic wages for politicians, judges, civil servants, public service employees and employees of budgetary institutions, increased minimum monthly wage and other reasons.

Q004 (2022): Changes in wages were affected from 2022 January 1 as the minimum monthly salary was increased, the basic salary of state politicians, judges, state officials, civil servants and employees of budgetary institutions was increased, the procedure for calculating the amount of tax-free income was changed.
It should be noted that from 2019 January 1 the rates of state social insurance contributions paid by the employer and the employee have been changed. gross wages indexed 1.289 times.

Q004 (2021): From the 1st January, 2021 the minimum monthly salary was increased, the base salary of state politicians, judges, state officials, civil servants and employees of budgetary institutions was increased, the procedure for calculating the amount of tax-free income was changed and other reasons.
https://osp.stat.gov.lt/informaciniai-pranesimai?articleId=9732032

Q004 (2020): Annual salary growth has been affected by the increase in the minimum monthly salary since the beginning of the reference year, the base salary of state politicians, judges, state politicians, judges, civil servants, civil servants and employees of budgetary institutions, changes in the procedure for calculating tax-free income and other reasons.

Q004 (2019): The increase in wages in 2019 was caused by changes in the tax system: an increase in the basic salary of politicians, judges, civil servants, civil servants and employees of budgetary institutions, an increase in the minimum monthly salary, a revision of the new salary system for civil servants, a change in the procedure for calculating exemptions and other reasons.

Q004 (2018): The state budget and salary increased due to the growth of the economy.

Q004 (2016): The state budget and salary increased due to the growth of the economy (after recovering from crisis before).

Luxembourg

Q004 (2023): Average gross annual earnings by economic activity - Full-time workers (in EUR) NACE Rev.2: Industry and services (B-S)
(https://lustat.statec.lu/vis?fs[0]=Th%C3%A8mes%2C1%7CConditions%20social%23C%23%7CConditions%20de%20vie%23C1%23&fs[1]=Th%C3%A8mes%2C0%7CConditions%20social%23C%23&fs[2]=NACE%20Rev.2%2C0%7CActivit%C3%A9s%20financi%C3%A8res%20et%20d%27assurances%20%28K%29%23SL09%23&pg=0&fc=NACE%20Rev.2 &df[ds]=ds-release&df[id]=DF_C1202&df[ag]=LU1&df[vs]=1.0&pd=2015%2C&dq=L01%2BSL09..A&ly[rw]=NACE_REV2%2CGENDER&ly[cl]=TIME_PERIOD ; consulté le 01.07.2024)

Q004 (2022): Average annual gross incomes by economic activity - Full-time workers (in EUR) NACE Rev.2: Industry and services (B-S). https://lustat.statec.lu/vis?pg=0&df[ds]=ds-release&df[id]=DF_C1202&df[ag]=LU1&df[vs]=1.0&pd=2016%2C2022&dq=L01..A&ly[rw]=GENDER&ly[cl]=TIME_PERIOD&lc=en

Q004 (2020): The 2019 data has been tentatively provided, pending the official release of the 2020 data.

Q004 (2019): This figure represents the average gross salary for the "Industry and Service" sector, according to the NACE Rev 2 code.
(https://statistiques.public.lu/stat/ReportFolders/ReportFolder.aspx?IF_Language=fra&MainTheme=3&FldrName=1&RFPath=30).

Q004 (2016): The variation between the different cycles (44% between 2014 and 2016) comes from a difference between gross salary (which was given for this cycle) and net salary (which was given for the previous cycles).

Malta

Q004 (2023): Data provided by the NSO

Q004 (2022): This is the data provided and verified with the National Statistics Office

Q004 (2021): The figure quoted above relates specifically to the Average Annual BASIC salary as provided by the National Statistics Office of Malta. The NSO do not collect the Average Annual Gross salary.

Q004 (2018): This data has been provided by NSO based on as yet provisional estimates.

Netherlands

Q004 (General Comment): Average gross annual salary is based on provisional numbers, definitive numbers (usually available in the next year) may differ slightly from those provided here.
Salary is defined as 'reward per working year'. This reward consists of salary (gross salary, including taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances tied in with work (e.g. travel allowances), and social premiums for the employer (payments for lawful and contractual social security, like pension contributions). The CBS has somewhat different numbers available than those used by Eurostat, therefore, numbers presented here might differ from those in Eurostat.

Q004 (2020): These are provisional numbers and the definitive numbers (available in 2022) may differ slightly from these provided here. The data specifies ‘reward per working year’ as salary. The reward consists of salary (gross salary, as it includes taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances that tie in with work (like travel allowances that cover costs to and from work), and social premiums that are for the employer (payments for lawful and contractual social security, like pension contributions).

Q004 (2019): The Statistics Bureau only had numbers for 2018. 2019 data was not available at the moment of data collection.

Q004 (2018): This is average salary of all employees; the number includes money that employers pay for pension plans, social security (money that is paid directly to employees). The statistic does not include the income of people who are not employees (people without work, employers).

Q004 (2016): Compared to previous questionaires (before 2014) these figures have been adjusted according to new rules of the european system of national accounts (illegal activities are now included)

Poland

Q004 (2021): data source - Central Statistical Office
The wage increases linked to economic changes.

Q004 (2016): NA

Portugal

Q004 (2023): The increase reflects the inflation
This is the provisional value for year 2022.
Data for 2023 is still not available.

Q004 (2022): This value is for year 2021.
Data for 2022 is still not available.

Q004 (2016): In the present questionnaire we used another "concept" of gross anual salary that we believe is closer to the objectives of this question.
We opted for the category of "payments and salaries" instead of "remunerations" of the national budget because "remunerations" also includes social contributions by the employer which constitue wage costs and not salary.

Romania

Q004 (General Comment): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated on the basis of the monthly average gross salary at an average monthly value of the euro calculated by the National Bank of Romania for the reference year concluding in the average gross annual salary (as the sum of monthly average salary).

Q004 (2022): The difference can be explained based on salary increases and an upward trend can be observed continuing from 2018.

Q004 (2020): The difference can be explained based on salary increases, and an upward trend can be observed continuing from 2018.

Q004 (2018): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated by request by the National Institute of Statistics on the basis of the monthly average gross salary at an average annual value of the euro calculated by the National Bank of Romania for the reference year 2018
According to the provisions of the national legislation in force (GEO no. 79/2017 with subsequent amendments and completions), the social insurance contributions, respectively those of social health insurance that fell to the employer, were transferred to the employee's responsibility and, starting with 2018, are fully supported by the employee, being reflected in the gross amount of the earning.
Consequently, the indicator "monthly gross average wage" produced and disseminated from 2018 is no longer comparable with the previous data series.
These legal provisions do not influence the data comparability for the series of "average monthly net earnings."

Slovak Republic

Q004 (2023): High rise in salaries (based on high inflation - similar to the other EU countries) https://slovak.statistics.sk/wps/wcm/connect/efd89ec1-751c-4692-8a7d-2ba94b2532f6/Priemerna_mesacna_mzda_zamestnanca_hospodarstva_SR_v_roku_2023.pdf?MOD=AJPERES&CVID=oUj0XlA&CVID=oUj0XlA&CVID=oUj0XlA&CVID=oUj0XlA&CVID=oUiz2Xu

Q004 (2021): http://datacube.statistics.sk/#!/view/en/VBD_INTERN/pr0204qs/v_pr0204qs_00_00_00_en

Q004 (2020): Ministry of Finance did not offer closer explanation. Source: https://www.statista.com/statistics/419502/average-annual-wages-slovak-republic-slovakia-y-on-y-in-euros/

Slovenia

Q004 (2020): Annual average gross salary is increasing (increase by 4% from 2018 to 2019 and by 6% from 2019 to 2020).

Q004 (2016): Average monthly gross earnings for 2016.

Spain

Q004 (2023): The gross annual salary of Spanish workers grew by 4.7% in 2023, to 26.555,89 euros, according to the data published by the National Statistics Institute (INE) in the annual labour cost survey.

Q004 (2022): The increase can be explained by increase of minimum legal salary.

Question 046

Austria

Q046 (General Comment): For the all exercises, data have been provided in full time equivalent. The first instance judges sit in District and partly regional courts as well as in administrative courts. The second instance judges sit in partly regional courts and Courts of appeal. The last instance includes judges sitting in the Supreme Court and the Supreme Administrative Court.

Q046 (2019): Data in full time equivalent
1.: district courts and partly regional courts + administrative courts 2.: courts of appeal and partly regional courts

Q046 (2018): Data in full time equivalent
1.: district and regional Courts + administrative court
2.: courts of appeal

Q046 (2017): The data also include those of administrative courts.

Q046 (2016): This cycle admnistrative courts were taken into account for the first time.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.

Q046 (2015): The right (not rounded) numbers are:

	Total	Males	Females
Total number of professional judges (1 + 2 + 3)	1620,65	790,52	830,13
1. Number of first instance professional judges	1222,95	559,08	663,87
2. Number of second instance (court of appeal) professional judges	330,35	187,75	142,60
3. Number of supreme court professional judges	67,35	43,69	23,66

Data in full time equivalent
1.: district and partly regional courts
2.: partly regional courts and courts of appeal

Q046 (2014): For 2014, the numerical values in the table have been rounded. The most exact replies would be: Total: 1 620,04 (789,68 Male, 830,36 Female); first instance professional judges: 1 224,36 (556,01 Male, 668,35 Female); second instance professional judges: 329,63 (190,78 Male, 138,85 Female); Supreme court professional judges: 66,05 (42,89 Male, 23,16 Female). In 2014, some judges entitled to adjudicate in different law fields have been counted twice.

Q046 (2013): In 2013, the different tasks had been assigned to the full time equivalent judges, distinguishing between dealing with first and second instance court proceedings on the one hand and administrative tasks on the other hand.

Belgium

Q046 (General Comment): Since 2021, the table also includes data for the Council of State and the Aliens Litigation Council. Starting from 2024, judges of the Council of State (counselors) are counted in the category “Supreme Court professional judges.” Those of the Aliens Litigation Council are categorized as first instance judges.

Q046 (2022): Since 2021, the table also includes data for the Council of State and the Alien Litigation Council, counted as first-instance judges. Following a recent expansion of the framework, the number of judges at the Council of State has increased from 44 to 58 (Law of September 6, 2022). However, in 2022 there were only 30 men and 12 women serving as judges at the Council of State (totaling to 42), with some positions still vacant by late 2022. Therefore, only a total of 42 was accounted for in the table. The current established framework is set at 58 Council of State judges. In the Alien Litigation Council, there are 54 judges (including 33 women and 21 men).

Q046 (2021): Source: FPS Justice, Directorate-General for the Judiciary, HR Department Judiciary, Notaries and Enforcement agents.
Point 3 concerns judges of the Court of Cassation.
As for the previous cycles, the table contains data for the civil and criminal courts. For this cycle, the (administrative) judges of the Council of State and of the Aliens Litigation Council (41 and 55 judges respectively) have been added to the table. With regard to the administrative judges of the Council of State (as for the Aliens Litigation Council), it is decided to count them as first instance judges. It should be noted, however, that judges of the Council of State intervene both at first and last instance. The number of judges at the Council of State is 44 members and for the Aliens Litigation Council it is 55. For the Aliens Litigation Council, the total of 55 is broken down as follows: 32 female judges - 23 male judges, of whom the first president and the president are men. For the Council of State, the situation is as follows: in principle, the Council is composed of 44 members (1 first president, 1 president, 14 chamber presidents and 28 councillors of State); in practice, 41 members are currently in office (two recent retirements and one death); 20 Dutch-speaking and 21 French-speaking; 12 women and 29 men. It is worth mentioning that an extension of the framework of the Council of State is provided for by a law of 6 September 2022 (which amended article 69 of the laws on the Council of State, coordinated on 12 January 1973). The Council will now consist of 58 members. These new members have not yet been recruited.

Q046 (2020): "No particular reason for the increase in the number of female second instance judges; related to natural evolution (more women in the first degree means, after a while, a larger base for recruitment to the appellate degree).
As in previous cycles, the table contains data for the judicial courts. The number of judges in the Council of State is 44 members and for the Council of Foreigners' Disputes it is 54 judges. "

Q046 (2019): Number of judges in courts within the ambit of the Federal Public Service of Justice (ordre judiciaire)

Q046 (2018): As a result of the reform of the cantons of justice of the peace, the number of places for justices of the peace has decreased by 25.

Q046 (2014): For 2014, the number of professional judges includes presidents of courts.

Q046 (2013): The 2013 data on the number of professional judges reflects the situation as at 18 January 2014.

Bulgaria

Q046 (General Comment): The number of first instance professional judges encompasses the judges of the first instance courts as follows - 113 district, 28 administrative, 3 military-district;
As well as the courts of second instance to be considered the 28 regional/provincial, 5 appellate and the Military Court of Appeal
Supreme Courts are the Supreme Court of Cassation and the Supreme Administrative Court
It is worth recalling that Regional courts have mixed competences as first and second instance for certain categories of cases, and for the purposes of the questionnaire, in view of the instructions for completing it and given their predominant competences, they are categorized as courts of second instance.

Q046 (2023): Regional courts have mixed competences as first and second instance for certain categories of cases, as for the purposes of the questionnaire, in view of the instructions for its completion and given their predominant competences, they are categorized as courts of second instance.

Q046 (2022): Regional courts have mixed competences as first and second instance for certain categories of cases, as for the purposes of the questionnaire, in view of the instructions for its completion and given their predominant competences, they are categorized as courts of second instance.

Q046 (2021): First instance courts – district, administrative, military district and Specialized Criminal Court.
Second instance courts (courts of appeal) – regional, appellate, Appellate Specialized Criminal Court and Military Appellate Court.
Supreme Courts – Supreme Court of Cassation and Supreme Administrative Court

Q046 (2020): Number of professional judges from district courts - 959, incl. men - 354 and women - 605. Annex: Summary information on the data as of 31.12.2020, received by all regional courts and all administrative courts, regarding the number of judges working in the first instance panels and the number of judges, who administer justice in the appellate / cassation panels, as well as data on how many of them are men and how many of them are women. It should be borne in mind that, according to the information received, in almost all courts, a large number of judges sit both at first instance and as second instance judges. Therefore, the sum of the number of first instance judges and the number of second instance judges should not give the total number of magistrates in the respective region/ administrative court. Number of professional judges from the Court of Appeal - 124, incl. men - 43 and women - 81.

Q046 (2019): 046/2. The indicated number of 134 judges refers only to the magistrates appointed and working in the 7 courts of appeal in Bulgaria. The calculation is made on the basis of the question itself, which draws attention only to the number of appellate judges (judges working in a court of appeal), as is evident from it - "professional judges of second instance / appellate court /". In almost all regional courts, most judges sit in both the first and second instance departments of the courts and this makes it difficult to differentiate them. This year all judges in regional courts are listed in 046/1 - Number of first instance professional judges.

Q046 (2017): P. 1 – The number of first instance professional judges consists of judges in 27 Regional courts within regional centres; 86 out of regional centres; 28 Administrative courts; 1 Specialized Criminal Court; 3 Military courts; and the number of the first instance judges in District courts has been added to them;
P.2 – The number of the second instance judges consists of judges in 27 District courts; Sofia City Court; 5 Courts of Appeal; 1 Military court of appeal and 1 Appealate Specialized Criminal Court. This number does not include the second instance judges who have adjudicated in first instance pannels.
P.3- The number of working judges in the Supreme Court of Cassation and Supreme Administrative Court at 31.12.2017

Q046 (2016): P. 1 – The number of first instance professional judges consists of judges in 27 Regional courts within regional centres; 86 out of regional centres; 28 Administrative courts; 1 Specialized Criminal Court; 3 Military courts; and the number of first instance judges in District courts has been added to them;
P.2 – The number of second instance judges consists of judges in 27 District courts; Sofia City Court; 5 Courts of Appeal; 1 Military court of appeal and 1 Appealate Specialized Criminal Court. This number does not include the second instance judges who have served in first instance courts. P.3- The number of working judges in the Supreme Court of Cassation and Supreme Administrative Court at 31.12.2016

Q046 (2015): 1. The figure 1760 includes the number of judges, employed at the 1st instance courts ((113 regional courts (27 Regional courts in the district centers and 86 regional courts outside the district centers); 28 Administrative courts; 1 Specialized criminal court; 3 Military courts) including the number of the first instance judges` (524) working in the first instance court formations in the District courts as from 31.12.2015. The number of Military courts has been reduced after decision under protocol ? 44/13.12.2013 of the Supreme Judicial Council from 5 to 3.

2. The number of judges, employed at the 2nd instance courts as from 31.12.2015 and the Courts of Appeal is 277. This figure is a result from the addition of the judges in the 28 District courts; 6 Courts of appeal and 1 Specialized criminal court of appeal – 801 judges in total, where the number of the first instance judges in the District courts (524) have been deducted.

3. The number of judges, employed in the Supreme Court of Cassation and the Supreme Administrative courts as from 31.12.2015 is 188.

Q046 (2014): In 2014, the number 1753 shows the number of judges employed in the first instance courts (113 regional, 28 administrative and 3 military courts) and 550 first instance judges, working in the district courts. The number of military courts was reduced from 5 to 3. The number of second instance judges is 277 and does not encompass first instance judges, working in the first instance chambers of the district courts.

Croatia

Q046 (General Comment): In the total number of judges, only data on actually working judges is presented (the total does not include judges on unpaid leave; judges on maternity leave; judges suspended after disciplinary procedure; judges transferred to other State body- for example to Ministry of Justice or Judicial Academy).

Q046 (2023): The statistics apply to all judges:
-court presidents, judges, and judges with administrative authority.
Those lower the number are:
-Those who are absent without pay
-who are not actively seeking job
-who are taken off the rolls
-who are dispatched to work for the Ministry of Justice, the Judicial Academy, the State Judicial Council, foreign missions, or other state bodies or organizations outside the state service
-who are off for motherhood
-those on leave as fathers
-those who are on leave as parents
-Those who are absent due to adoption
-those who are on leave as parents
-who have a part-time job
-who, as a result of rising childcare costs, work half-time
-who are caring for a child with developmental difficulties while on leave or working a half-time schedule
-whose employment status is dormant until the child's third year of life

Q046 (2022): The data refer to all judges:
court presidents, judges authorized to perform court administration and judges.
The number does not include judges:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q046 (2018): Source: Ministry of Justice of the Republic of Croatia
The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

Q046 (2017): The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

Q046 (2016): Source: Ministry of Justice of the Republic of Croatia
The number of court presidents is included in the number of judges provided, but the data does not include the number of judges who are on unpaid leave, judges who are in non-active status, judges who work part-time in accordance with the Maternity and Parental Benefits Act, judges who are on maternity leave or on parental leave, judges suspended after disciplinary proceedings, judges working part time in order to time care for a child with special needs, judges transferred in another state body (Ministry of Justice, Judicial Academy, State Judicial Council) and international institutions and missions.

Q046 (2015): The Republic of Croatia submits now correct numbers of professional judges sitting in courts for previous cycles (2013 and 2014), because in the previous cycles this number did not include court presidents, while there were excluded in the separate questions. Therefore, the correct numbers for these cycles is now provided.

Q046 (2014): In 2014, the number of professional judges in first instance courts includes judges of municipal, commercial, administrative and misdemeanour courts. The number of judges in second instance courts includes judges of county courts, the High Commercial Court, the High Misdemeanour Court and the High Administrative Court. The number of 3rd instance judges refers to the Supreme Court. Four first instance administrative courts became operational in 2012, while the Administrative Court of the Republic of Croatia became the High Administrative Court.

Cyprus

Q046 (General Comment): on the 1st of July the Supreme Court and the Supreme Constitutional Court of Cyprus were re established. An appeal court was also established.

Q046 (2023): "3. Number of Supreme Court judges": the data include the Supreme Court Judges (7) and the Supreme Constitutional Court Judges (9). On 1st of July 2023, an Appeal Court was established.

Q046 (2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.

Q046 (2015): From 2014, following the retirement of male judges at last instance, female judges were appointed.

Czech Republic

Q046 (General Comment): The Czech Republic has a four-tier system. The number of judges of the two High Courts is included in the number of second instance judges. This methodology of presentation of data is applied since 2013, while for the previous evaluations, magistrates of the High Courts were considered as third instance judges.

Q046 (2016): The Czech Republic has a four-tier system. The number of judges of the two High Courts is included in the number of second instance judges.

Denmark

Q046 (2017): The figures above show the numbers of appointed judges in the Danish judicial system. Thus, the figures also include the Court of Greenland, the High Court of Greenland and the court of the Faroe Islands.

Estonia

Q046 (2014): In 2014, one male judge left and a female judge was appointed.

France

Q046 (2023): The data submitted for the administrative courts, the National Court of Asylum and the Court for disputes relating to paid parking (1) and the data submitted for the Litigation Division of the Council of State (3) are lower than those submitted for the previous cycle because they take into account the actual rate of assignment to the Litigation Division of the Council of State and not the number of individuals. This is because a member of the Council of State may be assigned simultaneously to the Litigation Division - and thus perform the duties of a judge - and to the Administrative division.
For information, the number of staff without taking into account the rate of assignment is as follows:
Total: 155
Men: 92
Women: 63

Q046 (2022): Data include judges from both orders: "ordre judiciaire" and "ordre administratif".

DSJ: Data extracted from the SIRH LOLFI - number of professional judges in service at the headquarters of judicial courts as of 31/12/2022. The values are expressed in Full time equivalent.

Q046 (2021): Data taken from an extraction of the LOLFI SIRH - Number of professional judges on 31/12/2021. The values are expressed in FTEs. Source DSJ
Administrative justice data: 1. total number of professional judges at first instance: 899(463 men, 436 women); 2) Number of professional judges in the courts of appeal (2nd instance): 304 (163 men, 141 women); 3. number of professional judges in the Supreme courts: 128 (81 men, 47 women). 1+2+3. Total number of professional judges: total 1331 (707 men, 624 women). The figures are expressed in physical numbers as at 31/12/2021. The members of the National Court of Asylum (CNDA) and the Paid Parking Litigation Commission (Commission du contentieux du stationnement payant) are counted under the first instance.
Source: Council of State
The gender distribution is based on the number available in FTE for all professional judges except for administrative judges for whom the distribution is available in FTE only for the total.

Q046 (2020): "Here are the details:
With respect to the judiciary. The data are expressed in full-time equivalent. These figures concern only judges (and not paralegals) who sit in court (magistrates seconded to the central administration are not counted). In the table above, the figures have been rounded up when the decimal is greater than or equal to 0.5:
Total number of professional judges: total 6177.9; men 1725.5; women 4452.4
1. Number of first instance professional judges: total 4378.6; men 1133.7; women 3244.9
2. Number of second instance professional judges : total 1577.8; men 503.8; women 1074
3. Number of Supreme Court professional judges : total 221.5; men 88; women 133.5
Source: LSB
For the administrative order, the data include the National Court of Asylum (CNDA) and the Commission du contentieux du stationnement payant (CCSP). In FTE, only the total is available. The detail in physical staff is as follows:
Total number of professional judges: total 1357; men 727; women 630
1. Number of first instance professional judges : total 920; men 487; women 433
2. Number of second instance professional judges : total 306; men 156; women 150
3. Number of Suprem Court professional judges : total 131; men 84; women 47
Source: EC
"

Q046 (2019): Data are presented in full time equivalent, part-time employees being counted, which explains the possible horizontal and vertical inconsistencies in the table. For information: number of judges from civil society (first instance):
Total: 19,002 (489 temporary judges (MTT) + 13,277 labor judges (conseillers prud'hommes ((CPH) + 1,832 Assessors of the Social Centres (APS) + 3,404 Consular Judges of the Commercial Courts (JC) Men: 11,249 (243 MTT + 6,902 CPH + 1,294 APS + 2,810 JC); Women: 7,753 (246 MTT + 6375 CPH + 538 APS + 594 JC). Source: LOLFI. Number of judges on duty in the courts.
The data do not encompass "public prosecutors and their staff". All judges in courts are counted, including presidents of courts, as the latter perform judges' duties.

Q046 (2018): With regard to administrative justice, in 2018, it should be noted that the number of judges sitting in specialised courts increased due to the very sharp increase in the number of appeals to the National Court of Asylum (CNDA) and the creation of the Commission du contentieux du stationnement payant (CCSP).
In the area of judicial justice, the increase is due to the filling of vacancies in the courts and the decrease in the number of departures of judges.

Q046 (2014): The 2014 data on number of judges of courts of law subsumes also the presidents appointed by 31 December 2014.

Q046 (2013): In 2013, in first instance, there are 161 presidents of ordinary courts of law and 42 presidents of administrative courts. In second instance, there are 37 first presidents of courts of law and 8 presidents of administrative courts. They are encompassed in the indicated figures. However, presidents of administrative courts of appeal are not included (being members of the State Council, they are included within the number of Supreme court judges).

Germany

Q046 (General Comment): 1. There is a "court-staff statistic" ("Personalbestand") of the federal states that reports the number of judges in full-time equivalent as of 31 December of the reference year. This statistic also shows the number of female judges but it is not possible to allocate the judges to the different instances/stages of appeal. This statistic does not include the judges at the Federal Courts ("Supreme Courts").
2. The "staff-assignment statistic" ("Personalverwendung") of the federal states basically reports the average number of personnel actually deployed during the reference year (full-time equivalent). For example, employees who were not present for more than 20 working days during a quarter for reasons other than holiday and/or training are excluded. The staff- assignment statistic offers the possibility to allocate the judges to the different instances but it does not show the number of female judges. It does not include the federal judges either.
3. The "judiciary-staff statistic" ("Richterstatistik") combines the number of the judges of the federal states from statistic No 1 (court staff statistic) with the number of judges at the Federal Courts (full-time equivalent as of 31 December). This statistic is not published every year but every two years. It differentiates between the judges of the federal states and the judges of the Federal Courts (highest instance) and includes the number of female judges.
Regarding Q46 the figures under "1. Number of first instance professional judges" and "2. Number of second instance (court of appeal) professional judges" were taken from statistic No 2 (staff-assignment) because statistic No 1 does not offer the possibility to allocate personnel to the different instances. The figures under "3. Number of Supreme Court professional judges" were taken from statistic No 3 because the federal judges only appear in that statistic.

Q046 (2023): 1. and 2.: Data was taken from the "staff-assignment statistic 2023" of the federal states. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training) in FTE. The staff-assignment statistic does not distinguish between male and female judges. The "court-staff statistic" of the federal states on the other hand distinguishes between "total" and "female" but does not allow for a differentiation between the instances. According to the court-staff statistic as of 31 December 2023 there were 21 882 judges (FTE) in total, among them 10 929 female and 10 953 male.
3: Figures represent the number of judges at the Federal Courts in FTE as of 31 December 2022. The number of judges at the Federal Courts is published every second year (please refer to the general comment).

Q046 (2022): 1. and 2.: Data was taken from the "staff-assignment statistic" of the federal states. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistic does not distinguish between male and female jugdes. The "court-staff statistic" of the federal states on the other hand distinguishes between "total" and "female" but does not allow for a differentiation between the instances. According to the court-staff statistic as of 31 December 2022 there were 22 027 judges (FTE) in total, among them 10 813 female and 11 214 male.
3: Figures represent the number of judges at the Federal Courts in FTE as of 31 December 2022. The number of judges at the Federal Courts is published every second year (see General Comment).

Q046 (2021): 1. and 2.: Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female jugdes. The "regular" court-staff statistics of the Länder distinguish between "total" and "female" but do not allow for a diffentiation between the instances. According to the regular court-staff statistics as of 31 December 2021 there were 22 006 judges in total, 10 626 female and 11 380 male (full-time equivalents). 3: Figures represent the number of judges at the Federal Courts in full time equivalents as of 31 December 2020. The number of judges at the Federal Courts is published every second year (see General Comment).

Q046 (2020): 46.1 and 46.2: Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistics do not distinguish between male and female jugdes. The "regular" court-staff statistics of the Länder distinguish between "total" and "female" but do not allow for a diffentiation between the instances. According to the regular court-staff statistics as of 31 December 2020 there were 21.944 judges in total, 10.418 female and 11.526 male (full-time equivalents) 46.3: Figures represent the number of judges at the Federal Courts in full time equivalents as of 31 December 2020.
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a ‘Pact for the Rule of Law’. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
These numbers will not be reflected directly in the data given above, because the figures represent the average value of the actual personnel deployed during the reference year (in full-time equivalents).
It should also

be noted that one of goals of the ‘Pact for the Rule of Law’ is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q046 (2019): The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2018).

Q046 (2018): The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2018).

Q046 (2017): Comment - Please provide any useful comment for interpreting the data above: The information provided counts the number of full-time equivalent staff. There are no absolute figures for the number of persons making up this staff. A judge working full hours is counted as a full-time equivalent (i.e. 1). A judge working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a judge working half the usual number of hours). Re 1 and 2: Information based on staffing overviews. These data are ascertained according to a complex calculation mechanism as an annual average of the actual personnel deployed (for example: minus the number of staff absent for more than 20 working days in a single quarter for reasons other
than vacation and/or further-training). Re 3: The number of supreme court professional judges is based on judicial statistics. These data
are collected and collated every two years (last updated 31/12/2016).

Q046 (2016): The information provided counts the number of full-time equivalent staff. There are no absolute figures for the number of persons making up this staff. A judge working full hours is counted as a full-time equivalent (i.e. 1). A judge working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a judge working half the usual number of hours). Re 1 and 2: Information based on staffing overviews. These data are ascertained according to a complex calculation mechanism as an annual average of the actual personnel deployed (for example: minus the number of staff absent for more than 20 working days in a single quarter for reasons other than vacation and/or further-training). Re 3: The number of supreme court professional judges is based on judicial statistics. These data are collected and collated every two years (last updated 31/12/2016).

Q046 (2015): The data refer to the year 2014. At present, no more recent data are available.

Sources: Federal Office of Justice (Bundesamt für Justiz), Schöffenstatistik (statistical information on lay judges) as per 31 December 2014 as well as information provided by the Federal Länder

Greece

Q046 (General Comment): Starting from 2021, the judges of the Court of Audit are included in the table as third instance judges alongside with judges of the Supreme court (Areios Pagos) and the Council of State.
First instance judges - judges of the 56 first instance courts of general jurisdiction and the 30 administrative courts
Second instance judges - judges of the 19 Courts of appeal and the 9 Administrative courts of appeal

Q046 (2023): Judges of local courts and district criminal courts are included in the number of first instance judges.

Q046 (2022): The answer came after the cooperation of the Directorate for the organization and operation of Justice with Juststat. The discrepancy has been analyzed to last year questionnaire.

Q046 (2021): The answer came after the cooperation of the Directorate for the organization and operation of Justice with Juststat. The increase in the number of Supreme Court professional judges is explained by the fact that, the judges of the Court of auditors, who are all supreme, had not been previously counted, but now they are included.

Q046 (2020): Gender statistics are not kept. -Number of first instance professional judges :593 first-instance administrative judges,1167 first instance judges,916 judges of local courts and District Criminal Courts.
- Number of second instance (court of appeal) professional judges:336 second-instance administrative judges,598 second instance judges
- Number of Supreme Court professional judges:170 administrative judges of Council of State,5 of the General Committee of the Ordinary and Administrative Courts,76 judges of Areios Pagos(Supreme Court),
The methodology of replying changed. Differences in numbers with previous years cannot be explained as we don’t have enough information about previous data.

Q046 (2018): There is not a specific reason for the discrepancy of point 3. The number 243 is a result of the subtraction of points 1 and 2 from the total number of professional judges (1+2+3), just as last year.

Q046 (2016): Previous data concerning the number of second instance judges did not, inadvertently, include all the ranks for penal, political and administrative justice. Accordingly, this year the number is higher and explains also the variation in the total.
It should be mentioned that the number of judges at the courts of Peace, which on 31/12/2016 was 880, is not taken into consideration since they have a separate procedure entering the judiciary and they are a separate category within it.

Q046 (2014): The decrease in the number of second instance judges between 2013 and 2014 is due to the fact that administrative judges are not counted in this category for 2014.

Q046 (2013): In 2013, justices of peace are included, while Court of Auditors’ judges are not considered in the total.

Hungary

Q046 (General Comment): Since 2012 and the establishment of the National Office for the Judiciary, the data collection methodology is the same. Accordingly, the number of first instance professional judges includes judges of the District Courts. As second instance judges are counted judges of the Regional Courts and the Regional Courts of Appeal. As concerns the Regional Courts, the distribution of first and second instance cases is based on the bylaws which are renewed every year by the president of each court after consultation with the judicial council and the professional department of the court. The number of Supreme Court judges is indicated in item 46.3.

Q046 (2019): There are additional 54 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration) and to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.

Q046 (2018): There are additional 48 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration) and to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.

Q046 (2017): There are additional 34 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration), and 4 judges assigned to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases during their assignment.

Q046 (2016): There are additional 35 judges assigned to the National Office for the Judiciary (for work in accordance with judicial administration), and 9 judges assigned to the Ministry of Justice (to help the legislative work of the ministry). These judges do not hear cases while they are assigned.

Q046 (2014): In 2014, 26 judges were assigned to the National Office for the Judiciary and 7 judges were assigned to the Ministry of Justice. These judges do not hear cases when carrying out their specific missions within the NOJ and the Ministry of Justice.

Q046 (2013): The number of Supreme Court female judges decreased between 2010 and 2012, while the number of Supreme Court male judges increased between 2012 and 2013. There is no specific reason in this respect, as the vacant positions are filled through an open application process, where the gender of the applicants is not taken into consideration in any way.

Ireland

Q046 (2023): On 31 December 2023, there were 198 judicial posts, with two judicial vacancies, namely, one vacancy in the Supreme Court and one vacancy in the Circuit Court (a first instance court). Court Presidents work as judges and these numbers include Court Presidents of first instance, second instance and Supreme Court.

Q046 (2022): As of 31 December 2022, the number of male judges in the Court of Appeal had dropped from 8 to 6 in comparison to 2020 due to the elevation of two male judges from the Court of Appeal to the Supreme Court and the subsequent new appointment of two new Court of Appeal judges one of whom was male and the other female (-1 male judge of the Court of Appeal).

Q046 (2021): Figures as of 31/12/2021.
At that time there were 6 vacancies in total.
First Instance Courts – District Court, Circuit Court, High Court = total 3
Second Instance Court – Court of Appeal = total 1
Highest Instance Court – Supreme Court = total 1

Q046 (2020): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the circuit court and ordinary judges of the High Court - including Court Presidents.
An amendment was made in 2019 to the number of judges in the court of appeal due to workload of the court.

Q046 (2019): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents.
An amendment was made to the number of judges in the court of appeal due to workload of the court.

Q046 (2018): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents.

Q046 (2017): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents. As at 31 December 2017 there were three serving female Supreme Court judges.

Q046 (2016): Number of first instance professional judges refers to ordinary judges of the District Court, ordinary and specialist judges of the Circuit Court and ordinary judges of the High Court - including Court Presidents. As regards the number of Supreme Court judges, the figures reflect a reduction in the actual number of judges compared to the number reported in the previous reporting cycle.

Q046 (2015): The discrepancy between the total figures and the figures for gender is explained by vacancies in the judiciary's establishment, as follows: Supreme Court: 1; High Court: 1; Circuit Court: 2.

First instance judges are judges of the High Court, Circuit Court and District Court. The High Court and Circuit Court also exercise appellate jurisdiction.

Numbers above include Court Presidents.

Q046 (2014): In 2014, data on 2nd instance judges is available, since the new Court of Appeal was established only in 2014.

Italy

Q046 (General Comment): Judges serving in specialized first-instance courts, such as regional audit commissions, local tax commissions, and military courts, which operate independently and are financially autonomous from the Ministry of Justice, are not included in the scope of question 46.

Q046 (2018): Since 2018, the figures have also included judges belonging to Administrative Justice. The above figures include 6634 ordinary judges and 381 administrative judges.

Q046 (2017): An upward trend in respect of the number of female judges in the Supreme Court: in Italy, the High Council of the Judiciary is competent for the transfers of judges from one office to another. This transfer procedure generally takes place once or twice a year. The number of open positions for each court is proportional to the percentage of vacancies in that particular court. During the last few years, there were occasions where the positions made available at the court of cassation were a bit higher than number one would have expected according to the percentage of vacancies. Hence, more judges applied for the vacancies at the court of cassation compared to other courts. To date the vacancies at the court of cassation are about 4% of the total number of positions. As a matter of fact the penetration of female judges shows a positive trend. In first and second instance courts the penetration is already over 50%. At court of cassation level there is much room for improvement.

Q046 (2015): The overall reduction of judges between 2014 and 2015 is partly due to the effect of the recent labor reform that lowered the mandatory retirement age for judges from 75 to 70.

Q046 (2013): In the last few competitive exams held in Italy, the percentage of female candidates was higher than this of male candidates. Accordingly, a positive variation can be observed in respect of the number of female judges between 2010 and 2013.

Latvia

Q046 (2017): The changes in the number of judges at the Supreme Court are the outcome of the court reform developing pure three instance level court system. Until 2014 there were both appellate and cassation courts within the Supreme Court. Until end of 2014 and 2016 respectively there were additional appellate chambers dealing with criminal and civil cases. Since beginning of 2017 the number of judges at Supreme Court (cassation instance) is stable – 36.

Q046 (2014): The number of male judges in the Supreme Court decreased per 5 judges between 2012 and 2014 due to various reasons: three male judges retired; two male judges returned to regional courts (because they worked in the Supreme Court temporarily); one male judge passed away in 2014; one new male judge came to work in the Department of Civil Cases of the Supreme Court.

Lithuania

Q046 (General Comment): The methodology of presentation of data reflects the peculiarities of the Lithuanian court system. Namely, as the regional courts function not only as courts of appeal, but also as courts of first instance (Article 19 of the Law on Courts of the Republic of Lithuania), the number of judges of these courts is included in the 1st section. Accordingly, the latter indicates the number of judges of district courts, regional courts and regional administrative courts. Likewise, given that the Supreme Administrative Court is the court of appeal (although the rulings of the Supreme Administrative Court of Lithuania are final and not subject to appeal) the number of judges of this court is encompassed in the 2nd section. The latter indicates the number of judges of the Court of Appeal of Lithuania and the Supreme Administrative Court of Lithuania. The 3rd section indicates the number of judges of the Supreme Court of Lithuania.

Q046 (2022): In 2022 the corps of judges was supplemented by 30 judges, which is significantly more than in 2021 and slightly more than in 2020 (12 in 2021, 26 in 2020).
In 2022 27 persons were appointed as district court judges.

Q046 (2017): Please see general comments.

Luxembourg

Q046 (General Comment): Section 1: Number of professional judges at first instance includes district court judges, justices of the peace and administrative court judges.
Section 2: Number of professional judges in courts of appeal (2nd instance) includes the court of appeal of the superior court of justice and the administrative court.
section 3: Number of professional judges in the supreme courts includes only the judges of the court of cassation.

Q046 (2018): The staff of the judicial and administrative courts has grown steadily in the recent years, as established by the amended law of 7 March 1980 on judicial organization. This explains the significant variations observed between 2016 and 2018 in the judiciary and non-judge staff. According to the judicial organisation of Luxembourg, there is a Superior Court of Justice, composed of the Court of Cassation and the Court of Appeal. The judges of the Superior Court of Justice belong to both the Court of Cassation and the Court of Appeal. If, legally speaking, these are separate positions, in practice the five judges of the Superior Court of Justice occupy two positions and they are therefore counted among the judges of the Court of Appeal as well as at the level of the Superior Court of Justice .
The figures differ from those indicated in the last data collection campaigns on two points. 1) concerning the number of judges at the highest level: starting with 2016, we have distinguished between the judges sitting at the court of appeal and those of the Cour de cassation, which is the highest court in Luxembourg. Until 2016, and as the two courts taken together form the Cour supérieure de Justice (which as such has some very specific competences), we indicated only the total of the judges affected to the Cour supérieure. It might be useful for statistical purposes to distinguish between the two levels. 2) concerning the number of judges at the first level: the figures indicated until 2016 were superior to the real figures, as, erroneously, the prosecutors (which by law are also magistrates affected to these courts) had been included. We corrected this error in 2016.
There has been a major modification in june 2017, by the law of 27th of June 2017 adopting a multiannual program of recruitment into the judiciary and amending the amended law of 7th of March 1980 on judicial organisation, programming the future changes in the staff at the different entities. This law provides for

a multiannual program of recruitment of judges and prosecutors during the years 2017-2020. It entered into force in july 2017.

Q046 (2017): The Act of 27 June 2017 introducing a multiannual programme for recruitment to the judiciary and amending the amended Act of 7 March 1980 on the organisation of the judiciary, defines the number of posts in the various instances. The indicated data correspond to the number of permanent positions actually held in 2017.

Q046 (2016): The figures differ from those indicated in the last data collection campaigns on two points.
1) concerning the number of judges at the highest level: starting with 2016, we have distinguished between the judges sitting at the court of appeal and those of the Cour de cassation, which is the highest court in Luxembourg. Until 2016, and as the two courts taken together form the Cour supérieure de Justice (which as such has some very specific competences), we indicated only the total of the judges affected to the Cour supérieure. It might be useful for statistical purposes to distinguish between the two levels.
2) concerning the number of judges at the first level: the figures indicated until 2016 were superior to the real figures, as, erroneously, the prosecutors (which by law are also magistrates affected to these courts) had been included. This error has now been corrected.

Q046 (2015): In 2014, the judges of the Administrative Court were included in the number of judges in the Supreme Court but in 2015 these judges were accounted as second instance judges.

Q046 (2014): In 2014, the judges of the Administrative Court were included in the number of judges in the Supreme Court but in 2015 these judges were accounted as second instance judges.

Q046 (2013): To the total number of judges, should be added 4 trainees ("attachés de justice"). The increase in the number of female judges at all instances between 2010 and 2013 is explained by the special attraction for a profession that allows to combine work and family life. Judges of second instance and those of the Court of Cassation are all part of the Superior Court of Justice.

Malta

Q046 (General Comment): In Malta there is no Supreme Court, the Court of Appeal being the Court of second instance. The Constitutional Court, then, is presided over by the 3 judges who compose the Court of second instance also known as the Court of Appeal in its Superior Jurisdiction. The number of 1st Instance 'judges' also includes magistrates that preside over 1st Instance Courts.

Q046 (2023): Over 2023, the judicial complement was increased by 4 new members that have been appointed to the bench.

Q046 (2021): During 2021, 4 new magistrates and 2 new judges were appointed to the bench, thereby increasing the judicial complement by the same number. 2 judges were also appointed to the bench, but given that they were previously magistrates, their appointment did not increase the judicial complement.

Q046 (2019): For Number of first instance professional judges, the difference in nominal figures is of 4 male magistrates compared to previous cycle. This is mainly due to retirement and the appointment of 2 male magistrates to judges. 3 new magistrates have been appointed in 2019, only 1 of which is male.
For the Number of second instance professional judges, Madame Justice Lorraine Schembri Orland has been appointed Judge elect in respect of Malta on the European Court of Human Rights. Given that she did not serve in Malta at the end of 2019, she does not feature in the above data.

Q046 (2017): Despite the categorical manner in which the Maltese judiciary have been classified for the purpose of this exercise, it is important to note that the roles of some of the judges are very fluid. Hence, some of the 1st Instance judges preside, when the need arises, over 2nd Instance courts, whilst 2nd Instance judges hear cases at 1st Instance such as at the Civil Court, First Hall or the Civil Court, Family Section.
Throughout 2017, 1 male 1st Instance Judge passed away at the beginning of the year, whilst another 2nd Instance Judge retired towards the end of the year. 1 female Magistrate has been appointed. Care is being taken in order to ensure an equal gender representation in the appointments of the judiciary.

Q046 (2016): Despite the categorical manner in which the Maltese judiciary have been classified for the purpose of this exercise, it is important to note that the roles of some of the judges are very fluid. Hence, some of the 1st Instance judges sit, when the need arises, in 2nd Instance courts, whilst 2nd Instance judges hear cases at 1st Instance such as at the Civil Court, First Hall or the Civil Court, Family Section.
There has been an increase of 3 female judges at 1st instance since 2014. There was an increase from 15 to 17 female judges at 1st instance in 2015 and a further increase of 1 female judge at 1st instance in 2016. Care is being taken in order to ensure an equal gender representation in the appointments of the judiciary.

Q046 (2015): Regarding the number of judges, the high percentage variations that might be observed results from the small absolute number of judges that Malta has. Malta has been trying, and there are still on-going efforts, at increasing the number of judges. If between 2010 and 2015 the number of male judges decreased (by 1), this was complemented by an increase in the number of female judges (also by 1).

Netherlands

Q046 (General Comment): Since 2020, new methodology of presentation of data is used, allowing distinguishing between first and second instance for the specific group of judges who were previously all counted as first instance judges ('overig RA'). For all cycles, court presidents are taken into consideration in the figures. Numbers for first and second instance are on posts filled, not fte. We cannot provide more detailed information. For the Supreme Court, fte and posts filled are the same.

Q046 (2023): Total fte for first and second instance is 2 477. For the Supreme Court, fte and posts filled are the same.

Q046 (2022): Numbers for first and second instance are on posts filled, not fte. Total fte for first and second instance together is 2 451. We cannot provide more detailed information. For the Supreme Court, fte and posts filled are the same.

Q046 (2021): Numbers are on posts filled, not fte. Total fte is 2416.
Total fte for first and second instance was given in 2021, but information on fte was NA for the rest of the categories and the detail required cannot be provided.
For the Supreme court, fte and posts filled are the same.

Q046 (2020): These numbers are on posts filled, not fte. The total fte for first and second instance together is 2372, but information on fte is NA for the rest of the categories and detail required for this question. These numbers include court presidents.
In the previous cycles, due to an inability to differentiate between first or second instance for a certain group of judges, they were counted as first instance judges. This inflated the first instance numbers and underreported the second instance numbers. This problem was present in the data up until the 2019 survey. For the 2020 data, this problem has been solved, and the data is now correct.

Q046 (2018): We did not receive information on the number of judges (in fte) working at the High Court. There are 33 judges at the High Court (people, not fte), 20 male / 13 female. Since this concerns only 1% of all judges, we'd suggest to work with these numbers (and accept the small deviation in the calulated total number)

Q046 (2017): these are number of people (posts); the total number of fte is 2315, this can not be separated for 1st and 2nd instances
NB: data on the number of Supreme Court judges is provided in fte. More precisely, according to the annual report of the Council of State https://jaarverslag.raadvanstate.nl/2017/ the number was 37.9 fte in 2017.

Q046 (2016): All data in number of persons. FTE data are only available for the total: 2148.
Supreme Court NA

Q046 (2015): Number of deputy judges courts in 2015 = 1.100
The numbers provided in the table are posts. The FTE is avaialble only for the total and it is 2.169. Other categories are NA.

Q046 (2014): In 2014, the number of first instance judges does not include judges of the Trade and Industry Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.

Q046 (2013): In 2013, the total in fte is 2 181. This was excluding the Supreme Court. The number of first instance judges excludes judges of the Trade and Industry Appeals Tribunal, the Supreme Court and the Council of State. The number of second instance judges includes magistrates of the Trade and Industry Appeals Tribunal and the Administrative High Court, excluding these of the Supreme Court and the Council of State.

Poland

Q046 (General Comment): The Polish court structure is characterized by four levels of courts but only three instances. Basically, there are district courts which are first instance courts, regional courts which are first and second instance courts, and appellate courts which are second instance courts. The highest instance courts are the Supreme Court, the Supreme Administrative Court and the Constitutional Tribunal. Owing to this peculiarity, some judges sit as first and second instance magistrates. According to the methodology of presentation of data that has been chosen, judges of regional courts are counted as first instance judges together with judges of district courts and judges of first instance administrative courts. Only judges of appellate courts are considered as second instance magistrates. The Supreme Court operates under the Constitution of the Republic of Poland and the Supreme Court Act. It is established to:
- exercise supervision over the activities of common and military courts in the area of adjudication - this is the so-called judicial supervision (Article 183(1) of the Constitution). The means used to exercise such supervision include:
- recognition of extraordinary complaints, cassations and other appeals (instance supervision),
passing resolutions resolving legal issues (extra-institutional supervision) Resolutions of the entire chamber or a larger body of judges have the force of law and are binding on all Supreme Court formations. A panel of 7 judges may decide to give the resolution the force of legal principle.
Competence of the Constitutional Tribunal
The Constitution of 2 April 1997 includes four areas within the jurisdiction of the Constitutional Tribunal:
1) control of norms (abstract and concrete; a posteriori and a priori - Art. 188 items 1-3, Art. 122 items 3 and 4, Art. 133 item 2 of the Constitution); a special procedure for the control of norms is the consideration of constitutional complaints (Art. 79 and Art. 188 item 5 of the Constitution)
2) adjud

ication of competence disputes between central constitutional organs of the state (Article 189 of the Constitution);
3) adjudicating on the compatibility with the Constitution of the objectives or activities of political parties (Article 188, item 4 of the Constitution)
4) recognising the temporary inability of the President of the Republic to discharge his office (Article 131, paragraph 1 of the Constitution).
Of the four areas of the jurisdiction of the Tribunal indicated above, the control of norms is undoubtedly a fundamental task.
Court assesors:
A person may be appointed to the position of assessor if he or she fulfils the conditions laid down in Article 61 § 1 points 1-4 of the Act on the Common Courts System and, moreover, has completed training at the National School of the Judiciary and Public Prosecution and passed a judge's or prosecutor's exam. Court assessors are appointed by the President of the Republic of Poland for an indefinite period of time, at the request of the National Council of the Judiciary. In the exercise of his or her office, a judicial assessor is independent and subject only to the Constitution and the laws. Assessors who are entrusted with the duties of a judge perform adjudicatory functions in district courts alongside judges. However, they may not: apply pre-trial detention to a detainee handed over to the court's disposal with a request for pre-trial detention, hear complaints against decisions on refusal to initiate an investigation or enquiry, against decisions on discontinuance of an investigation or enquiry, or against decisions on discontinuance of an enquiry and entry of a case in the register of offences, and adjudicate family and guardianship law cases. After 36 months, an assessor can be appointed as a judge by the President of the Republic.
Not all professional judges are assessors first. Those who, prior to their appointment, may also apply for the position of judge:
1) occupied the position of a judge of an administrative court or military court;
2) held the position of a prosecutor;
3) worked at a Polish higher education institution, the Polish Academy of Sciences, a research institute or other scientific institution and has the academic title of professor or the academic degree of doctor habilitowany in legal sciences;
4) Has practised as an advocate, legal adviser or notary public for at least three years;
5) has held the position of president, vice-president or counsel of the General Prosecutor's Office of the Republic of Poland - for at least three years.
The position of an assessor is not then required. In 2021 and 2022, Question 46 always included the number of district court judges, circuit court judges and assessors adjudicating at first instance.

Q046 (2023): Common courts:
1. The number of judges of district, regional courts + court assessors: 9444 (5963 women, 3481 men)
2. The number of judges of the appeal courts: 484 (240 women, 244 men)
Administrative Courts - first instance= Voivodship Administrative Courts - 422 judges (226 women, 196 men); Supreme Administrative Court 108 judges (37 women, 71 men) Supreme court – 95 judges (22 women, 73 men)

Q046 (2022): Common courts:
1. The number of judges of district, regional courts + court assessors: 9403 (5904 women, 3499 men)
2. The number of judges of the appeal courts: 469 (238 women, 231 men)
The numbers are higher because the president appointed a lot of court assessors as judges in 2022. In addition, there were more appointments to the regional and appeal courts than retirements of judges from these courts.
Administrative courts:
1. The number of judges of district + court assessors: 491 (275 women, 216 men)
2. The number of judges of the Supreme Administrative Court : 107 (37 women, 70 men)

Q046 (2021): Common courts:
The number of judges of district courts: 6046 (3938 women, 2108 men)
The number of judges of regional courts : 2684 (1550 women, 1134 men)
The number of judges of the appeal courts: 459 (239 women, 220 men)
The numbers are higher because the president appointed a lot of court assessors as judges in 2021. In addition, there were more appointments to the regional and appeal courts than retirements of judges from these courts.
The Supreme Court : 93 (73 men, 20 women)
The Administrative Supreme Court: 102 (62 men, 40 women);
Administrative courts first instance: 431 (192 men, 239 women);

Q046 (2020): The number of judges of district courts: 6036 (3922 women, 2114 men)
The number of judges of regional courts : 2544 (1462 women, 1082 men)
The number of judges of the appeal courts: 417 (220 women, 197 men)
The number of judges of the first instance administrative courts : 454 (260 women, 194 men)
Supreme courts:
The number of judges of the Supreme Administrative court: 102 (62 men, 40 woman).
The number of judges of the supreme court: 97 (75 men, 22 woman).
Military courts:
The number of judges of district military courts: 18 (1 woman, 17 men)
The number of garrison judges: 27 (5 women, 22 men).
*Starting from 2020 the number of Supreme court judges include also judges of the Supreme Administrative Court

Q046 (2019): Compared to the previous edition, the number of judges of the supreme court was also given.
The number of Supreme court is 99: 25 (civil chamber), 27 (criminal chamber) 14 (labour law and social security chamber), 20 (extraordinary control and public affairs chamber), 13 (disciplinary chamber).
Females: 21 (total)
11(civil chamber)
3 (criminal chamber)
3 (labour law and social security chamber)
3 (extraordinary control and public affairs chamber)
1 (disciplinary chamber)
Males: 78 (total)
14 (civil chamber)
24 (criminal chamber)
11 (labour law and social security chamber)
17 (extraordinary control and public affairs chamber)
12 (disciplinary chamber)

Portugal

Q046 (General Comment): The total includes judges from courts of 1st, 2nd and 3rd instances, except the Constitutional Court.

Q046 (2020): 3. We are dealing with small numbers, therefore the dicrepancy ratio is big. In addition, with time female judges, that are the majority of judges, are getting to the top of their professional career.

Q046 (2019): In absolute terms the increase is only 5 persons. The numbers are small, therefore in relative terms it appears to be relevant.

Q046 (2018): The number of Supreme Court Judges has been decreasing since 2015. In absolute terms the decrease from 2016 to 2018 is from 82 to 71 judges, which is not significative in absolute terms, but acquires a more relevant expression in relative terms.

Q046 (2017): As concerns the increase in the number of female Supreme Court judges: the numbers are small, therefore the variation seems important.

Q046 (2014): The increase in the number of Supreme Court female professional judges is due to the general tendency of increase of female judges in the last decade at first instance courts.

Romania

Q046 (General Comment): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). Only judges of the „judecatorii" are counted as first instance judges. In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q046 (2023): There were some fluctuations due to a number of retirements and new contests for occupying the vacant positions.

Q046 (2022): Only judges of the „judecatorii" are counted as first instance judges.

Q046 (2020): Only judges of the „judecatorii" are counted as first instance judges.

Q046 (2019): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q046 (2018): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Q046 (2017): The number of professional judges sitting in second instance courts (point 2) includes both the number of judges within the courts of appeal and the number of judges within the tribunals.

Q046 (2016): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In the table above the judges from tribunals are included in the category "second instance professional judges".

Q046 (2014): For 2014, judges mentioned at 46.1 are judges within first instance courts, while judges mentioned at 46.2 are judges within tribunals and courts of appeal.

Q046 (2013): Judges mentioned at 46.1 are judges within first instance courts and tribunals, while judges mentioned at 46.2 are judges within courts of appeal. In 2012 and 2013, the Superior Council of Magistracy brought important changes to the Regulation for the promotion of judges to the High Court of Cassation and Justice and 19 judges were promoted.

Slovak Republic

Q046 (General Comment): Supreme Administrative Court is calculated together with Supreme Court.

Q046 (2023): 3. Number of Supreme Court professional judges: Supreme Administrative Court: 25 - 12 - 13
Supreme Court: 54 - 24 - 30

Q046 (2021): Number of Supreme Administrative Court professional judges are included in the Q. 46 line 3. (8 males, 13 females; total 21).

Q046 (2019): The Number of Supreme Court professional judges is 77 for the full time judges. There are 7 temporarily assigned judges as well (2 women and 5 men).

Q046 (2018): The provided total corresponds to the number of judges actually performing their functions. Put differently, judges
who are temporary assigned to other institutions (Ministry of Justice, Judicial Academy, other judicial institutions including international courts), judges granted maternity leave etc. are not considered in the provided figures. Total number including judges temporary not performing their functions is 1427 (521 men, 906 women).

Q046 (2017): The increase in the total number of judges is caused by filling the previously designed vacant posts of judges.

Q046 (2015): The decrease in the number of judges in comparison with the previous cycle has been caused by the retirement of the judges whose posts have not been filled yet. The selection procedures for the vacant posts are under way.

Q046 (2014): In 2014, the total number of judges in the records of the Ministry of justice was 1366 (503 males, 863 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.

Q046 (2013): In 2013, the total number of judges in the records of the Ministry of justice was 1385 (511 males, 874 females), including judges temporary assigned to other institutions, judges granted maternity leave etc.

Slovenia

Q046 (General Comment): The provided total number of judges corresponds to the number of de facto occupied judicial posts performing their functions. Some judges are assigned to other duties (eg. seconded to the Judicial council, Ministry of Justice, Supreme court) and are not included in the reported numbers. The information on actual presence (excluding e.g. seconded judges, the maternity or sick leave, but including the annual leave) is also available.
Judges at the Administrative Court (first instance court, see Q44) and higher judges at local and district courts (first instance courts) are reported as according to their courts (first-instance judges) and not according to their rank (higher-court judges).

Q046 (2023): At the end of 2023, 861 judicial posts were formally occupied, although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 845 professional judges (FTE) sit in courts (perform judicial function), since the rest of the judges (16 judges - difference to the total of 861 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The data on actual presence of judges in courts is also collected; the number of judges in the Slovenian judicial system in 2023 was 79,09 according to actual presence calculations.

Q046 (2022): At the end of 2022, 878 judicial posts were formally occupied, although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 862 professional judges (FTE) sit in courts (perform judicial function), since the rest of the judges (16 judges - difference to the total of 878 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The data on actual presence of judges in courts is also collected; the number of judges in the Slovenian judicial system in 2022 was 767,15 according to actual presence calculations.
Discrepancies (compared to 2020 data): Until 2021, approx. 30 judges at the Administrative Court (first instance court, see Q44) and approx. 50 higher judges at local and district courts (first instance courts) were reported as second-instance judges (accoriding to their rank: higher judge); from 2021 they are reported according to their court (first-instance judges).

Q046 (2021): At the end of 2021, 880 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 860 professional judges sit in courts (perform judicial function), since the rest of the judges (20 judges - difference to the total of 880 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The data on actual presence of judges in courts is also collected; the number of judges in the Slovenian judicial system in 2021 was 802,84 according to actual presence calculations.
Until 2021, approx. 30 judges at the Administrative Court (first instance court, see Q44) and approx. 50 higher judges at local and district courts (first instance courts) were reported as second-instance judges (accoriding to their rank: higher judge); from 2022 they are reported according to their court (first-instance judges).

Q046 (2020): At the end of 2020, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 875 professional judges sit in courts (perform judicial function), since the rest of the judges (15 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave).
The number of judges in the Slovenian judicial system in 2020 was 805,5 according to actual presence calculations.

Q046 (2019): At the end of 2019, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave).
Nevertheless, we report that 873 professional judges sit in courts (perform judicial function), since the rest of the judges (17 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.
The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave). The number of judges in the Slovenian judicial system in 2019 was 797 according to actual presence calculations.

Q046 (2018): At the end of 2018, 890 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 867 professional judges sit in courts (perform judicial function), since the rest of the judges (23 judges - difference to the total of 890 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts. The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave).
The number of judges in the Slovenian judicial system in 2018 was 796 according to actual presence calculations.

Q046 (2017): At the end of 2017, 889 judicial posts were formally occupied (FTE), although some posts were de facto vacant (e.g. judge absent due to maternity leave). Nevertheless, we report that 869 professional judges sit in courts (perform judicial function), since the rest of the judges (20 judges - difference to the total of 889 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.
The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave)
The number of judges in the Slovenian judicial system in 2016 was 795,54 according to actual presence calculations.

Q046 (2016): At the end of 2016, 897 judicial posts were formally occupied (full-time equivalent method), although some post were de facto vacant (e.g. judge absent due to maternity leave). The actual presence is also calculated, based on number of hours judges are actually present in court (excluding the maternity or sick leave, but including the annual leave). The number of judges in Slovenian judicial system in 2016 was 811,52 according to actual presence calculations.
Nevertheless, we report that 880 professional judges sit in courts (perform judicial function), since the rest of the judges (17 judges - difference to the total of 897 judges) were assigned to other duties (e.g. the Ministry of Justice, the Supreme Court, the Judicial Council) and do not sit in courts.

Q046 (2015): At the end of 2015, 912 judicial posts were formally occupied (FTE), although some post were de facto vacant (e.g. judge absent due to maternity leave).
Nevertheless, 897 professional judges sit in courts (perform judicial function), since
some judges were assigned to other duties (at the Supreme Court; different projects ;appointed to the Judicial Council and appointed to the Ministry of Justice.

We reported the Administrative court as the first instance court (Q42 and Q91). However, the law requires for the Administrative court judge to be a higher judge (2nd instance judge), therefore the Administrative court judges are included as the 2nd instance professional judges

Question 046-2

Austria

Q046-2 (General Comment): The decrease in the number of judges at the second instance is attributed to corrections made after discovering that some numbers were counted twice in previous evaluation cycles.

Belgium

Q046-2 (General Comment): It should be noted that the Council of State (composed of 38 councilors in 2024) also rules in the last instance. It was decided under Q 46 and Q 46-2 to consider the Council of State (Conseil d'Etat) as a court of last instance (starting from 2024), and to count only judges of the Aliens Litigation Council (62 judges) as first instance administrative judges. The first column of the table ('total') includes civil and criminal judges as well as 99 administrative judges.

Q046-2 (2022): It is to be noted that the Council of State (comprising 42 judges in 2022, and whose framework was extended to 58 by a law in September 2022) also adjudicates as a court of last instance. It has been decided under Q46 and Q46-2 to consider the Council of State as a court of first instance. The Alien Litigation Council counts 54 judges considered as administrative judges of first instance.

Q046-2 (2020): The system does not allow part-time work for judges. Data by type of case are not known. Judges are appointed at the court level, and the head of the court assigns them to the different chambers of the court and allocates cases.

Bulgaria

Q046-2 (General Comment): Category "other": military judges

Q046-2 (2023): The total number of 1,282 judges of first instance includes 965 district judges for whom no information regarding specialization is available, and military judges are listed in the "Other" column.
The total number of 780 judges of the second instance includes 46 junior judges for whom no information regarding specialization is available, and the judges of the Military Court of Appeal are listed in the "Other" column.
Regarding the Supreme Court of Cassation, the total number of 172 judges also includes the president of the court, for whom no information is available regarding specialization.

Q046-2 (2022): The total number of 1230 first-instance judges includes 922 district judges for whom no information regarding specialization is available, and military judges are listed in the "Other" column.
The total number of 778 judges of the second instance includes 37 junior judges for whom no information regarding specialization is available, and the judges of the Military Court of Appeal are listed in the "Other" column.
Regarding the Supreme Court of Cassation, the total number of 180 judges also includes the president of the court, for whom no information is available regarding specialization.

Q046-2 (2021): The total number of first-instance judges is 1258. It includes 991 district (first instance) judges, for whom there is no available information regarding the specialization, 236 administrative, 10 other (military) and 21 - judges at first instance Specialized Criminal Court.
The total number of second-instance judges includes also 59 junior judges, adjudicating at regional courts (second instance), for whom information on specialization is not available. 5 other are military judges.
The total number of supreme judges includes the president of the Supreme Court of Cassation, for whom there is no available information regarding the specialization.

Q046-2 (2020): The column "others" in question 46-2 refers to the military judges - 12 regional/provincial and 5 appellate - a total of 17.
The total number of judges in the district courts is 959, and the same, with the exception of the Sofia District Court, are not divided by subject matter. Therefore, data related to the number of first instance judges dealing with civil / commercial and criminal cases are not available. Appendix: Summary information on the data as of 31.12.2020, received by all regional/provincial courts (first and second instance) regarding the number of judges in them, who work in the civil, commercial and criminal divisions. It should be borne in mind that, according to the information received, in almost all courts, a large number of judges sit in more than one division, therefore the summation of the number of judges from the three divisions should not give the total number of judges in the respective court. Total number of judges in the Court of Appeal (second instance) - 124, of which in the civil division - 36, in the commercial division - 38 and in the criminal division - 50.

Croatia

Q046-2 (General Comment): The difficulty to provide the data lays in mixed specialization of judges in courts, so exact data cannot be extracted.

Cyprus

Q046-2 (General Comment): on July 2023 as part of the judicial reform a Second instance appeal court was established. The Supreme Court and the Supreme Constitutional Court were also re established.
District judges deal with both criminal and civil cases. However they are assigned either civil or criminal jurisdiction for a specified period of time. The Appeal court is divided into chambers each one dealing with specific matters.

Q046-2 (2023): on July 2023 as part of the judicial reform a Second instance appeal court was established. The Supreme Court and the Supreme Constitutional Court were also re established. The Supreme court deals with Civil and Criminal cases. The Supreme Constitutional Court deals with constitutional cases and Administrative Case at a last instance.
The category "Other" refers to the military court.
District judges deal with both criminal and civil cases. However they are assigned either civil or criminal jurisdiction for a specified period of time. For 2023 the number listed above was the number of first instance district judges that deal solely for 2023 with criminal or civil cases accordingly.

Q046-2 (2021): All 13 Supreme court judges hear all cases. District court judges are dealing with criminal and civil cases, and they were previously included in the 'Other' cases. We have now limited this to judges of special jurisdiction courts.

Q046-2 (2020): This includes the supreme court judges who deal with all types of cases, first instance family court judges, labour court judges, rent control court judges and military court.
Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.

Czech Republic

Q046-2 (2023): We know the number of first instance and highest instance judges, so 123 is the difference - the number of judges in administrative cases.

Q046-2 (2022): The category civil/commercial includes all proceedings except criminal and administrative.

Q046-2 (2021): Insolvency proceedings and Guardianship proceedings

Q046-2 (2020): Insolvency Proceedings

Denmark

Q046-2 (General Comment): We cannot answer this question by case type as all judges make decisions in all types of cases in Denmark = NAP.

Q046-2 (2023): Judges in Denmark deal with all types of cases, including both civil, commercial and criminal cases.

Estonia

Q046-2 (General Comment): Judges of 1st and 2nd instance are not olbliged to only be civil or criminal judges. It can change depending on the workload and wishes of the judge.

Q046-2 (2023): Since 2023 the first instance courts have criminal and civil divsions. If there's a need a criminal judge can still deal with civil cases and vice versa.

Q046-2 (2022): Judges of 1st and 2nd instance are not olbliged to only be civil or criminal judges. It can change depending on the workload and wishes of the judge. The number of civil judges within the courts has been increased in 2022 at the expense of administrative judges.

Q046-2 (2020): In the first instance we don't have judges formally seperated as criminal or civil judges.

Finland

Q046-2 (General Comment): We do not have statistic of the amount of the civil and/ or commercial and criminal judges in the general courts as in many courts judges work in both types of cases. In Market Court, there are 23 judges who are civil/commercial judges.

France

Q046-2 (2022): The increase in the number of judges at the Council of State between 2021 and 2022 is attributed to returns from mobility.

Q046-2 (2021): Non-specialised judges, who account for approximately 45% of the staff of the civil and criminal courts, are required to work in both criminal and civil matters. As a result, the distribution between the different types of litigation is not quantifiable, as these assignments fall within the organisational powers of the head of court.
Similarly, certain specialised judges (juvenile judges and liberty and custody judges) are also likely to intervene in both civil and criminal cases due to their areas of competence.
Source DSJ. Data have been rounded up from 0.5, down below. Source: Council of State for the administrative part (data have been rounded).

Q046-2 (2020): "The distinction by type of case is not possible in the justice of the judicial order.
Note: the distribution of the processing of civil and criminal cases within the tribunals and courts, which depends on the organization of the jurisdictions, does not allow us to fill in this table. For the administrative courts, the FTEs have been rounded up. The precise non-rounded data can be made available if necessary. "

Germany

Q046-2 (2023): "Other" includes judges handling family cases and labour law cases.
"First instance" and "Second instance": Data is taken from the "staff-assignment statistic 2023" of the federal states. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training) in FTE.
"Supreme Court": the figures are taken from the "court-staff statistic" and represent the number (FTE) of judges at the federal courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Constitutional Court, Military Disciplinary Courts) as of 31. December 2022. It shows the number of judges (FTE) at the Federal Court of Justice (154) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 114 judges (headcount) assigned to the civil panels and 47 to the criminal panels.

Q046-2 (2022): "Other" includes judges handling familiy cases and labour law cases. In previous cycles, this category also included judges handling cases at the financial and social courts. In accordance with the classification of cases used for question 91, these judges are now allocated to the category "administrative".
"First instance" and "Second instance": Data is taken from the "staff-assignment statistic" of the federal states. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the "court-staff statistic" and represent the number (FTE) of judges at the federal courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2022. It shows the number of judges (FTE) at the Federal Court of Justice (154) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 114 judges (headcount) assigned to the civil panels and 47 to the criminal panels.

Q046-2 (2021): "Other" includes: familiy cases (at the Local and Higher Regional Courts), cases at the Labour Courts, Social courts, Finance courts
"First instance" and "Second instance": Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the court-staff statistics and represent the number (FTE) of judges at the Federal Courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2020. The statistic is published every second year. It shows the number of judges (FTE) at the Federal Court of Justice (152) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 113 judges (headcount) assigned to the civil panels and 46 to the criminal panels.

Q046-2 (2020): "Other" includes: familiy cases (at the Local and Higher Regional Courts), cases at the Labour Courts, Social courts, Finance courts
"First instance" and "Second instance": Data is taken from the "staff-assignment statistics" of the Länder. It is derived from a complex calculation key as an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training).
"Surpreme Court": the figures are taken from the court-staff statistics and represent the number (FTE) of judges at the Federal Courts (Federal Court of Justice, Federal Patent Court, Federal Administrative Court, Federal Finance Court, Federal Labour Court, Federal Social Court, Federal Consitutional Court, Military Disciplinary Courts) as of 31. December 2020. The statistic shows the number of judges (FTE) at the Federal Court of Justice (152) but includes no information on their assignment to civil or criminal cases. According to the website of the Federal Court of Justice, there are currently 114 judges (headcount) assigned to the civil panels and 47 to the criminal panels.
Slight horizontal and vertical inconsistencies are caused by rounding.

Greece

Q046-2 (General Comment): Starting from 2024, judges of the Court of Audit, a specialised administrative court having the statute of a Supreme court, are categorised as third instance administrative judges.

Q046-2 (2023): Same judges (2713)intervene in both civil and criminal matters in the Greek judicial system.

Q046-2 (2022): There are two categories of judges, those dealing with criminal and civil justice and administrative judges. There is no data on the separation of cases.For the Council of State(Supreme Administrative Court) in administrative cases the judges are 166.

Q046-2 (2020): There are two categories of judges, those dealing with criminal and civil justice and administrative judges. There is no data on the separation of cases

Ireland

Q046-2 (2023): In all courts, (First Instance, Second Instance and Supreme Court) judges are empowered to deal with all case types within their court jurisdiction. While in some courts, most notably the High Court and the Circuit Court, judges may be assigned to specific cases for a period, nonetheless, all judges can deal with all types of cases within their jurisdiction

Q046-2 (2022): In all courts, (First Instance, Second Instance and Supreme Court) judges are empowered to deal with all case types within their court jurisdiction. While in some courts, most notably the High Court and the Circuit Court, judges may be assigned to specific cases for a period, nonetheless, all judges can deal with all types of cases within their jurisdiction.

Q046-2 (2021): Judges can be assigned to both criminal and civil cases. Although in some jurisdictions, mainly the High Court and Circuit Court, Judges might specialise for a period (sometimes for a period of years) in criminal and civil matters. All Judges can administer all types of cases within their jurisdiction. Administrative cases are not a separate category in Ireland.

Q046-2 (2020): Judges deal with both criminal and civil and commercial proceedings. Number of Judges would be the same across all headings (except administrative as already explained) - Court Service

Italy

Q046-2 (2023): Judges who do not specifically deal with any of these types of cases, and judges with coordination and management duties.

Q046-2 (2022): Judges who do not specifically deal with any of these types of cases, and judges with coordination and management duties.

Latvia

Q046-2 (General Comment): The courts of first instance of general jurisdiction do not explicitly distinguish between the specialization of judges on the basis of the main types of cases, therefore there is not possible to distinguish number of judges by case type (civil and/or commercial cases and criminal cases). Although there is a separate group of judges in the district (city) courts, which primarily hear cases of certain categories.

Q046-2 (2023): Comment on Supreme Court total number of judges. The difference between Q46 and Q46-2 is becauce the chief justice is not included in any of court departments.

Q046-2 (2021): For Supreme Court - within the number of judges is not indicated number of President of the Supreme Court.

Q046-2 (2020): The courts of first instance of general jurisdiction do not explicitly distinguish between the specialisation of judges on the basis of the main types of cases, therefore there is not possible to distinguish the data between civil and or commercial cases and criminal cases.

Lithuania

Q046-2 (2020): the first instance indicates the number of judges of district courts, regional courts and regional administrative courts. Likewise, given that the Supreme Administrative Court is the court of appeal (although the rulings of the Supreme Administrative Court of Lithuania are final and not subject to appeal) the number of judges of this court is encompassed in the 2nd instance. The latter indicates the number of judges of the Court of Appeal of Lithuania and the Supreme Administrative Court of Lithuania.

Luxembourg

Q046-2 (2023): The 6 judges of the Supreme Court, i.e. the Court of Cassation, deal with criminal, civil and commercial cases.

Q046-2 (2022): The 5 justices of the Supreme Court, namely the Court of Cassation, deal with criminal, civil and commercial matters.

Malta

Q046-2 (2022): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed from a number of first instance courts (not only the Administrative Review Tribunal). Given that these cases constitute only a fraction of the caseload of this judge, it would be misleading to indicate him as a 2nd Instance judge over appeals from administrative cases.

Q046-2 (2021): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed from a number of first instance courts (not only the Administrative Review Tribunal). Given that these cases constitute only a fraction of the caseload of this judge, it would be misleading to indicate him as a 2nd Instance judge over appeals from administrative cases.

Q046-2 (2020): Some judges in the Maltese judicial system preside over both civil and criminal courts. In this instance, such judges have been distributed evenly between the 2 courts.
Administrative cases at first instance are heard by the Administrative Review Tribunal, presided over by 3 magistrates. If appealed, such cases are heard by the Court of Appeal Inferior Jurisdiction presided over by a judge who hears and decides cases appealed form a number of first instance courts (not only the Administrative Review Tribunal).

Netherlands

Q046-2 (General Comment): Numbers for first and second instance are on posts filled, not fte. For the Dutch Supreme Court, fte and posts filled are the same.
Note that the judges under the category ‘Administrative’ (Supreme Court) refer to the judges in the tax chamber of the Dutch Supreme Court. With regard to administrative law, the Dutch Supreme Court only handles tax cases and some social security cases. There is no third instance court for other administrative cases in the Netherlands.
Judges in first and second instance often work more than one case type. There is a large overlap, but in the administrative system, only one sector can be registered. Therefore, making a distinction would not be a fair reflection of the true situation and the information is not easily available.

Q046-2 (2023): Total fte for first and second instance is 2 477.

Q046-2 (2022): Numbers are on posts filled, not fte. Fte for first and second instance is 2 451.

Q046-2 (2021): Numbers are on posts filled, not fte. FTE for first and second instance is 2416.
For SC fte and posts filled are the same. Note that the 11 judges under the category 'Administrative' (Supreme Court) refer to the judges in the tax chamber of the Dutch Supreme Court. With regard to administrative law, the Dutch Supreme Court only handles tax cases and some social security cases. There is no third instance court for other administrative cases in The Netherlands.

Q046-2 (2020): Judges often work with more than one case type. There is a large overlap, but in the administrative system, only one sector can be registered. Therefore, while this information is not easily available, making this distinction would also not be a fair reflection of the true situation.
These are positions filled, not fte (like Q46).

Poland

Q046-2 (2023): In case of the Supreme Court "Other" refers to"
-16 judges sitting in the Labour and Social Security Law Chamber dealing with the labour law and social security law cases;
-18 judges sitting in the Extraordinary Review and Public Affairs Chamber dealing, inter alia, with the extraordinary appeals in the civil and criminal law cases, the safeguard of the fundamental rights and freedoms, competition and consumer protection cases, some registration cases as well as election protests and protests concerning the validity of a national referendum, cases concerning the regulation of energy, telecommunications and postal services, rail transport, as well as the regulation of the water and sewage market or complaints concerning the excessive length of proceedings. From the whole number of 90 Supreme Court Judges, 11 Supreme Court Judges are randomly chosen to adjudicate in the Professional Liability Chamber.

Q046-2 (2022): In case of the Supreme Court "Other" refers to"
-17 judges sitting in the Labour and Social Security Law Chamber dealing with the labour law and social security law cases;
-17 judges sitting in the Extraordinary Review and Public Affairs Chamber dealing, inter alia, with the extraordinary appeals in the civil and criminal law cases, the safeguard of the fundamental rights and freedoms, competition and consumer protection cases, some registration cases as well as election protests and protests concerning the validity of a national referendum, cases concerning the regulation of energy, telecommunications and postal services, rail transport, as well as the regulation of the water and sewage market or complaints concerning the excessive length of proceedings. From the whole number of 90 Supreme Court Judges, 11 Supreme Court Judges are randomly chosen to adjudicate in the Professional Liability Chamber.

Q046-2 (2020): 1. Supreme Court - the 13 judges of the Supreme Court Chamber of Labour Law and Social Insurance appear in the column "other" together with the 18 judges of the Extraordinary Review and Public Affairs Chamber and the 13 judges of the Disciplinary Chamber.

Portugal

Q046-2 (General Comment): As there are judges who have civil and criminal competences at the same time, it is not possible to discriminate judges by civil and commercial matters. Therefore, the judges of the judicial courts were all included in the column "other". It is also not possible to distinguish by court, which ones are responsible for civil/commercial or criminal proceedings, because of the existence of courts of general and mixed jurisdiction.

Q046-2 (2023): See general comment.

Q046-2 (2022): As there are judges who have civil and criminal competences at the same time, it is not possible to discriminate judges by civil and commercial matters. Therefore, the judges of the judicial courts were all included in the column "other".

Q046-2 (2021): As there are judges who have civil and criminal competences at the same time, it is not possible to distinguish judges by civil and comercial matters. Therefore, the judges of the judicial courts were all included in the column “other”.

Q046-2 (2020): As there are judges who have civil and criminal competences at the same time, it is not possible to distinguish judges by civil and comercial matters. Therefore, the judges of the judicial courts were all included in the column “other”.

Romania

Q046-2 (General Comment): The statistical system does not collect information regarding a breakdown in the number of judges based on the different legal matters.

Q046-2 (2023): The statistical system does not collect information regarding a breakdown in the number of judges based on the different legal matters.

Q046-2 (2022): The statistical system does not collect information regarding a breakdown in the number of judges based on the different legal matters.

Q046-2 (2020): In Romania there are four level of courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above judges from tribunals and courts of appeal shall be included in the category "second instance professional judges", even if according to the procedural provisions in terms of competences tribunals may judge both as first and instance court and for certain procedural circumstances (material and personal) even the courts of appeal may judge in first instance. Moreover even the High Court can judge in first instance for example in criminal cases according to the personal competence rules of procedure.

Slovak Republic

Q046-2 (2023): family, enforcement and reminder departments, visiting judges, judges in evaluation committees, court presidents

Q046-2 (2022): For example hosting judges - can not be involved in one case type, presidents of the courts.
The distribution of administrative judges per instance is made based on the instance level of the court where they work and not based on the instance of the cases for which they are responsible.
When comparing the data presented in the table right above with the question Q046, a discrepancy of 11 judges in the overall count comes to light. It is imperative to clarify that Slovak Republic used a different methodology for these two questions. Here in the question Q046-2, it involved calculating an annual average for the number of judges per matter, instead of the critical moment of 31st of December as for Q046-2.

Q046-2 (2021): The Supreme Administrative Court had 21 administrative judges in 2021, included in Second instance.

Slovenia

Q046-2 (General Comment): Since 2021, data on judges classified by legal fields is collected by approximating the time an individual judge is working on a certain type of cases. The data is collected only as actual presence (not occupied posts/FTE).
The category “Other” corresponds to “Other cases” at Q91: free legal aid at district courts, labour courts and at the Administrative court, enforcement cases on the basis of authentic document in civil matters before the writ for the execution became final (all cases processed at the Central Department for Authentic Document at the Local Court of Ljubljana – exclusive jurisdiction), international attestations at district courts, attestations according to the Hague convention at district courts.
The category "Other" does not include judges involved in the court management as they are partially or entirely relieved from adjudicating cases.

Q046-2 (2023): The data does not include judges involved in the court management (additional 42 judges).
The data for 2023 is reported as FTE (previous years: actual presence) to be compatible with CEPEJ specification. The data is actually collected as actual presence and is converted to FTE according to general ratio of actual presence/occupied posts in judiciary.
The data is only approximate - please see general comment.

Q046-2 (2022): The data is only approximate - please see general comment. The data is reported as actual presence (not FTE) and therefore not compatible with Q46. As already mentioned in the frame of Q46, the number of judges in the Slovenian judicial system in 2022 was 767,15 according to actual presence calculations.
The category "Other" does not include judges involved in the court management (additional 39 judges).

Q046-2 (2021): The data is only approximate - please see general comment. The data is reported as actual presence (not FTE) and therefore not compatible with Q46.

Q046-2 (2020): There is no data for 2020. In 2021, the data on judges by legal fields was collected for the first time (by approximating the time and workload an individual judge is working on a certain type of cases). Since the metodology of reporting is yet to be revised and elaborated, we can only report approximate numbers. For distinction on Civil and/or Commercial/Criminal/Administrative/Other please see comments to Q91, 93 and 94.
First instance judges: Civil and/or commercial: 62% (approx. 396 judges); Criminal: 33% (approx. 214 judges); Administrative: 4% (approx. 28 judges), Other: 1% (approx. 5 judges)
Please note: the judges at the Administrative Court that resolve administative cases at first instance have the rank of a higher judge.
Second instance judges: Civil and/or commercial: 66% (approx. 77 judges); Criminal: 34% (approx. 39 judges); Administrative: /, Other: /
Supreme court judges: Civil and/or commercial: 57% (approx. 16 judges); Criminal: 18% (approx. 5 judges); Administrative: 25% (approx. 9 judges), Other: /

Question 052

Austria

Q052 (General Comment): Starting from 2021, the “Kanzlei” who are responsible for handling of case files are no more counted as “other staff” but as “staff in charge of different administrative tasks and of the management of the courts”. Moreover, starting from 2021, “technical staff” also includes staff working at the courts‘ IT departments. “Other staff” only includes trainees (including trainees for Rechtspfleger) and staff representation. The trainees concerned are nearly all trained for the handling of case files. A small number of trainees is trained for IT-support. Generally speaking, in the last years, efforts were made to enhance the methodology of presentation of data for Q52 and ensure better compliance with the CEPEJ categorization.

Q052 (2023): 2. Non-judge (judicial) staff whose task is to assist the judges such as registrars (case preparation, assistance during the hearing, helping to draft the decisions) - The number is higher now because now case managers are counted within this category by the competent department (since this year). Until now they were hard to count, but now it is possible.
5. Other non-judge staff - The number of Rechtspfleger-candidates has increased significantly compared to the year before and a huge part of them is female.

Q052 (2021): Starting from 2021, the “Kanzlei” who are responsible for handling of case files are no more counted as “other staff”, but as “staff in charge of different administrative tasks and of the management of the courts”. “Other staff” only includes trainees (including trainees for Rechtspfleger) and staff representation. Moreover, starting from 2021, “technical staff” also includes staff working at the courts‘ IT departments, therefore the number is higher than in previous years.

Q052 (2020): "Other": Handling of case files (“Kanzlei”)
2. Non-judge (judicial) staff whose task is to assist the judges: the increased number concerns administrative courts.

Q052 (2019): Non-judge staff whose task is to assist the judges: more staff at the administrative courts
Staff in charge of different administrative tasks and of the management of the courts: more staff
Other: Handling of case files (“Kanzlei”)

Q052 (2018): Handling of case files (“Kanzlei”)

Q052 (2017): The data also include those of administrative courts.

Q052 (2016): This cycle admnistrative courts were taken into account for the first time.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.

Q052 (2015): The right (not rounded) numbers are:
Total non-judge staff working in courts (1 + 2 + 3 + 4 + 5) 4734,55 - 1407,08 - 3327,47
1. Rechtspfleger (or similar bodies) with judicial or quasi-judicial tasks having autonomous competence and whose decisions could be subject to appeal 798,11 - 331,63 - 466,48
2. Non-judge staff whose task is to assist the judges such as registrars (case file preparation, assistance during the hearing, court recording, helping to draft the decisions) 19,05 - 1 - 18,05
3. Staff in charge of different administrative tasks and of the management of the courts (human resources management, material and equipment management, including computer systems, financial and budgetary management, training management) 439,56 - 155,86 - 283,70
4. Technical staff 21,70 - 9,85 - 11,85
5. Other non-judge staff 3456,13 - 908,74 - 2547,39

Q052 (2014): The numerical values in the table have been rounded. The most exact replies for this period would be: total non-judge staff: 4 704,51 (1 388 Male, 3 316,51 Female); Rechtspfleger: 784,78 (320,21 Male, 464,57 Female); non-judge staff whose task is to assist the judges: 19,18 (1 Male, 18,18 Female); staff in charge of different administrative tasks: 438,97 (159,85 Males, 279,12 Females); technical staff: 23,05 (9,95 Males, 13,10 Females); other non-judge staff: 3 438,53 (896,99 Males, 2 541,54 Females).

Belgium

Q052 (2022): The variation in comparison to the 2020 data for points 2 and 3 stems from the fact that legal assistants supporting judges were previously categorized under point 3 (with administrative staff) rather than point 2.

Q052 (2019): "Technical personnel": the slight increase observed between 2018 and 2019 results from investments in personnel.

Q052 (2013): The number of women per category is as follows: Total: 3839,45; category 2: 1212,62; category 3: 2031,93; category 4: 594,90.

Bulgaria

Q052 (General Comment): Since 2012, the category “other” encompasses the number of non-judge staff employees working in the recreational field, while in 2010 it subsumes the number of court assistants. The Judicial Administration Commission does not keep statistics of those who are trained, as well as of trainee judges. There are junior judges in the courts in the country, for whom Judicial Administration Commission has no relation, no data. Accordingly, the total number of judicial employees in the courts does not include trainee judges. The Judges’ College of the Supreme Judicial Council does not maintain data on the gender distribution of the court clerks (non-judge staff) in the courts, since each court of the respective level (a total of 180 courts) is an independent legal entity and their employer is the president of the respective court.

Q052 (2019): Since 2012, the category “other” encompasses the number of non-judge staff employees working in the recreational field, while in 2010 it subsumes the number of court assistants.

Q052 (2017): These are the staff employed in the recreational establishments of the Supreme Administrative Court and the Supreme Court of Cassation such as: manager of the training center, chefs, worker in the kitchen, bartender, waiter, tendant.

Q052 (2015): Unlike the previous evaluation cycles, now we indicate the figure 502 – technical staff (it includes drives, cleaning staff, guards, etc.), which reduce the number of the employees engaged with administrative tasks and court management under number 3.
Other non-judge staff includes 55 court servants working in recreation department.

Q052 (2013): The number of non-judge staff assisting judges includes the number of all court staff from the so called specialized administration supporting judges, including court secretaries and court assistance, while for 2010 it subsumes only court secretaries. The category “staff in charge of different administrative tasks” subsumes the number of non – judge staff of general administration.

Croatia

Q052 (General Comment): The total number of non-judicial staff is a result of a deduction and subsumes only actually working staff. Thus, the total does not include staff on unpaid leave; staff on maternity leave; staff suspended after disciplinary procedures; staff transferred to other State bodies (for example the Ministry of Justice or Judicial Academy). Besides, two non-judicial officials working half-time (for the reason of care for a child with special needs) are counted as 1 non-judicial official. The reason for fluctuation and differences in the number of Rechtpflegers in Republic of Croatia is that they work for 2 years, then prolonged 5 years and then they get a permanent post or not.

Q052 (2023): The figures include civil servants and personnel who have been employed for an undetermined period of time.
-Those who are absent without pay
-who are not actively seeking job
-who are taken off the rolls
-who are dispatched to work for the Ministry of Justice, the Judicial Academy, the State Judicial Council, foreign missions, or other state bodies or organizations outside the state service
-who are off for motherhood
-those on leave as fathers
-those who are on leave as parents
-Those who are absent due to adoption
-those who are on leave as parents
-who have a part-time job
-who, as a result of rising childcare costs, work half-time
-who are caring for a child with developmental difficulties while on leave or working a half-time schedule
-whose employment status is dormant until the child's third year of life

Q052 (2022): The data refer to civil servants and employees employed for an indefinite period.
The number does not include those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q052 (2015): The Republic of Croatia submits correct numbers of non-judge staff who are working in courts for previous cycles (2012, 2013 and 2014), because in the previous cycles this number included the staff working for public prosecutors. Therefore, the correct numbers for these cycles are now provided.

Q052 (2014): In 2013, the number of “Rechtspfleger” included judicial advisors because they work autonomously on cases, on the one hand, and staff who are not judges, but who can enact decisions (land registry officials and court registry officials), on the other hand. In 2014, the interpretation changed and judicial advisors were moved to the category “non-judicial staff whose task is to assist the judges”, since they work autonomously but their decision must be signed by a judge.

Q052 (2013): The variations between 2012 and 2013 in respect of certain sub-categories are due only to a different methodology of classification. The total is slightly different for the two years.

Cyprus

Q052 (General Comment): The total number of non-judge staff includes clerical staff and also court bailiffs.

Q052 (2023): The observed variation in the number of "4. technical staff" is due to the establishment of the Appeal court in 2023 and the employment of new staff.
The category "5. Other" includes court bailiffs.

Q052 (2022): court bailiffs
Increase in the needs of the court led to appointment of more employees.

Q052 (2021): court baillifs

Q052 (2020): Other non-judge staff includes court bailiffs. Differences in number of staff compared to previous year come from new appointments and retirements.

Q052 (2018): Court bailiffs are included in category Other.

Q052 (2017): court bailiffs

Q052 (2016): court bailiff
in 2014 the correct number for male no judge staff assisting the judge should be 9
Question 52: if we change the number of male non judge staff assisting the judge for 2014 from 23 to 9, we must also change the number of non-judge staff assisting judges from 143 to 129 and also the total from 462 to 448. Do you agree on up-dating in this way 2014 data in order to ensure the consistency of the table? the numbers for 2014 must also be changed

Q052 (2015): Between 2014 and 2015, there was a change in the distribution of non-judge staff. In 2014, in the category "staff in charge of administrative tasks", only the number of high-level administrative staff was included. The other administrative staff were included in the category "other non judge staff". Whereas in 2015, all administrative staff were included in the category "staff in charge of administrative tasks". This change of distribution leads to significant variations.

Q052 (2014): Variations concerning data on different categories of non-judge staff are due to different methodology of presentation of data used for 2014 and the previous evaluations.

Czech Republic

Q052 (General Comment): The category “other” encompasses judicial trainees or staff in charge of court documentation, as well as press center and telephone exchange staff.
The judicial trainee is entitled to perform the acts of the court under the conditions and to the extent specified in factual and time plan of the preparatory service which is compiled by the chairman of the regional court after consultation with the advisory board for the education of trainees. The plan must be focused in such a way that the training for the performance of the function of a judge serves in particular to:
a) deepening the trainee's professional knowledge of substantive and procedural law,
b) developing the trainee's ability to apply legislation in a specific matter,
c) gaining knowledge of individual agendas maintained by courts and their implementation,
d) acquisition of procedural procedures and habits necessary for the performance of the function of a judge,
e) acquaintance with ethical principles related to the performance of the function of a judge.
In accordance with the preparatory service plan, the trainee performs preparatory service at a district or regional court. The trainee is usually assigned to one judge. Familiarization with individual court agendas is ensured by the fact that the president of the court where the judicial trainee is currently located gradually assigns the trainee to individual court departments.
The preparatory service includes adaptation courses, seminars and lectures organized by the Judicial Academy and educational activities organized by court for at least 2 days per month.
Starting from 2022 the title of “judicial trainee” has been replaced with “judicial candidate”.

Q052 (2017): Other - judicial trainees, staff in charge of court documentation, press centre and telephone exchange.

Q052 (2016): Other - judicial trainees, staff in charge of court documentation, press centre and telephone exchange.

Q052 (2015): In 2015, compared to 2014, the number of non-judge staff increased due to a project financed from the European social fund and state budget: “Project on improvement of the efficiency of courts by strengthening of the administrative capacities”. The project is running until 30th December 2015.

Q052 (2014): In 2014, the number of non-judge staff increased due to a project financed from the European social fund and State budget: “Project on improvement of the efficiency of courts by strengthening of the administrative capacities”. The project is running until 30th December 2015.

Denmark

Q052 (2023): The category "Other non-judge staff" covers kitchen assistants.

Q052 (2020): -

Q052 (2019): information NA

Q052 (2017): "other non judge staff" - in 2017 there was no staff to fit into this category.

Q052 (2016): The 2016 data on the number of rechtspflegers is correct. The discrepancy that occurs compared to 2014 data is due to a mistake in the 2014 numbers.

Estonia

Q052 (2023): No comment provided.

Q052 (2020): Trainees are not included in the numbers provided for Q52 and Q52-1.

Q052 (2019): Court interpreters are in the category "other non-judge staff".

Q052 (2018): Court interpreters are in the category "other non-judge staff".

Q052 (2017): The increase in the number of male staff in charge of administrative tasks is due to the general movement of personnel.
"Other non-judge staff": Court interpreters.

Q052 (2016): The observed variations in the numbers with regard to the different sub-categories are due to a general movement of staff.

In 2015, a reform of the Land Registry and Registration Department was carried out, during which the four districts were brought together registry and land registry departments to the Tartu County Court, thus establishing one land registry department and one registry office. The reform involved significant optimization of work processes and dossiers which resulted in the reduction of staff working in the registers. The objectives and results of the reform were largely achieved because registries are kept electronically, and individuals can largely interact with the registers, transmit and receive documents receive electronically.

Q052 (2015): The number of technical staff has been decreasing due to redundancies in the Registration and Land Registry Departments. The project of court lawyers was carried out having in mind that the Registration and Land Registry departments are fully digital. Therefore there is a possibility to decrease the number of technical staff.

Q052 (2014): A pilot project has been introduced in 2013 in one county court consisting in providing each judge with a personal legal assistant. After the first year of the pilot project, the average proceeding times in civil cases in that particular court dropped from 201 days to 160 days; after the second year the average proceeding times dropped further to 132 days. In 2015, the project has been extended to all first and second instance courts.

Q052 (2013): Since 2013, the second category includes a new position among court staff – judicial clerks. They assist judges in the administration of justice, participating in the preparation of court cases or in court proceedings. They replace step by step former consultants. There is one judicial clerk for every judge. In 2013, the reform was implemented in the largest court of general jurisdiction as a pilot (Harju County Court). In 2015,it was extended to all first and second instance courts.

Finland

Q052 (General Comment): The Finnish court staff organisation does not correspond to the CEPEJ subcategories. Therefore, only the total of non-judge staff can be provided for the question 52. Office staff has tasks mentioned in the categories 2-5. Summoners' tasks are for example to serve summons, subpoenas and other documents. Trainee judges have the same responsibility as judges but they do not have competence to deal with difficult cases. They are always appointed for a fixed term period (one year). In the courts of appeal, the
administrative courts, the Supreme Court, the Supreme Administrative Court, the Labour Court and the Market Court a referendary prepares and presents a case to the judges but the final judgment is decided by the judges. The tasks of trainee judges and referendaries correspond to the categories 1 and 2.
The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge’s affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoin

t in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).

Q052 (2023): The total non-judge staff includes office staff 1537, summoners 273, trainee district judges 133 and referendaries 256.

Q052 (2022): The total non-judge staff includes office staff 1521, summoners 274, trainee district judges 135 and referendaries 264.

Q052 (2021): The total non-judge staff includes office staff 1530, summoners 269, trainee district judges 131 and referendaries 278. 1. “Rechtspfleger (or similar bodies)”: The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge’s affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff
has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoint in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).

Q052 (2020): The total non-judge staff includes office staff 1477, summoners/process serves 273, trainee district judges 137 and referendaries 275. 1. “Rechtspfleger (or similar bodies)”: The senior judge of a district court may appoint in writing a member of the office personnel at the district court who has given an affirmation corresponding to the judge’s affirmation, who has received sufficient training and who has sufficient skills to attend to the duties: (1) in cases referred to in Chapter 5, section 3 of the Code of Judicial Procedure: (a) to give judgments by default; (b) to give, on the basis of Chapter 21, section 8(c) of the Code of Judicial Procedure, decisions and judgments on court costs, if the respondent has conceded the claim; (c) to decide on the staying of an action if the plaintiff has withdrawn the action and the respondent does not call for a decision in the case; (2) to decide on applications for divorce on the basis of section 25, subsection 1 of the Marriage Act (234/1929) if both spouses are domiciled in Finland. If the case to be decided by office personnel, as referred to in subsection 1, proves to be extensive, subject to interpretation or otherwise difficult to decide, the case shall be transferred for a decision of a notary or a legally trained judge at the district court. The chief judge of a district court may appoint in writing a member of the office personnel at the district court who has sufficient skills, to issue summons and certificates, to effect service of documents and to attend to other duties connected to the preparation, consideration or enforcement of administration of justice matters. Before taking such tasks the staff member must give an oath. (Courts Act, Chapter 19, Section 6).

Q052 (2019): The total non-judge staff includes office staff 1455, summoners 267, trainee district judges 135 and referendaries 271

Q052 (2018): The total non-judge staff includes office staff 1435, summoners 263, trainee district judges 136 and referendaries 297.

Q052 (2017): Office staff 1440, summoners 263, trainee judges 122, referendaries 312

Q052 (2016): office staff 1473, summoners 248, trainee district judges 136, junior district judges 1, referendaries 312

Q052 (2015): office staff 1428, summoners 265, trainee district judges 138, junior district judges 5, referendaries 309

Q052 (2014): For the 2014 exercise the total of 2 161 subsumes 1 434 office staff, 266 summoners, 136 trainee district judges, 7 junior district judges and 318 referendaries.

Q052 (2013): For 2013, the total of 2 196 subsumes 1445 office staff, 265 summoners, 133 trainee district judges, 7 junior district judges, 346 referendaries.

France

Q052 (2023): “Other non-judge staff” include legal assistants and specialist assistants who do not work for the public prosecutor's office. The category “2. Non-judge (judicial) staff whose task is to assist the judges such as registrars” includes also A, B and C category contract staff recruited under the local justice support plan implemented from the second half of 2020 on the sole basis of article 7 bis of law no. 84-16 of 11 January 1984 on statutory provisions relating to the State civil service, created by the civil service transformation law of 6 August 2019 instituting the project contract. These contract staff are recruited for 3 years. The total number of non-judge staff working in the courts (1+2+3+4+5) increased by 564 actual staff between 31.12.2022 and 31.12.2023. This overall upward trend is made up of several contrasting dynamics within the different populations concerned.
For example, the number of “2. Non-judge (judicial) staff whose task is to assist the judges such as registrars” decreased by 451 actual staff numbers between 2022 and 2023. This reduction is mainly attributable to the fall in the number of local justice contract staff in all categories (-268 actual staff numbers) and administrative assistants (-192 actual staff numbers), a number of whose posts have nevertheless been converted into administrative secretary posts. The “3. Staff in charge of different administrative tasks and of the management of the courts” (excluding local justice contract staff) increased by 710 actual staff numbers between 2022 and 2023. This significant increase reflects the continued strengthening of regional administrative services, which has been underway for several years (+233 actual staffing levels between 2022 and 2023), which has led to the creation of contract B local IT technicians (contract B TIP, +126 actual staffing levels), administrative secretaries (+42 actual staffing levels) and psychologists (+18 actual staffing levels).
Similarly, the number of non-judg

e administrative staff in the courts has increased significantly (in particular +156 administrative secretarial posts between 2022 and 2023). Finally, the legal assistants and specialist assistants making up the other non-judge staff category increased by 301 real numbers between 2022 and 2023. As at 31/12/2023, 1 580 category A and B staff (including 1 291 women) were undergoing initial training at the National School for Court Registrars, most of them on practical training in the courts. These staff will join the courts in 2024 or 2025, which will significantly increase the number of staff working in the courts and regional administrative departments.
With regard to the administrative courts, the technical staff listed correspond to the staff employed and paid by the administrative court and not the people working under service contracts, managed locally by each court and paid for out of the latter's operating appropriations, for which we have no visibility.

Q052 (2022): The "other non-judge staff" correspond to legal assistants and specialised assistants who do not work for the prosecution services, while for the other subcategories it is not possible to distinguish between staff working for the courts and those working for the public prosecution services.

The category "non-judge (judicial) staff whose task is to assist the judges such as registrars" includes the category B contractual staff created by the law on the transformation of the civil service of 6 August 2019, which institutes the project contract. They have been recruited under the support plan for justice implemented since the second half of 2020, for 3 years term of office. The significant increase in the number of these contractual staff, combined with the increase in the number of court clerks and the increase in the number of other non-judge staff, contributes to the increase in the overall figures communicated for the year 2022.

As at 31/12/2022, 1 549 category A and B staff (including 1 066 women) were undergoing initial training at the École nationale des greffes, most of them within the courts (practical training). These staff will join the courts in 2023 or 2024, which will significantly increase the number of staff working in the courts and regional administrative departments (RAD).

With regard to "staff in charge of administrative tasks", the increase observed is linked to the implementation of a proactive policy to reinforce the SARs and the secretariats of the court presidents (increase in the number of directors of registry services in the SARs, increase in the number of administrative secretaries, etc.).

Q052 (2021): Concerning the total of 22 115, it should be noted that this figure includes 597 legal assistants and specialised assistants working for the courts and 939 contractual staff recruited in the framework of local justice. The "other non-judge staff" correspond to legal assistants and specialised assistants who do not work for the prosecution services. The category "non-judge (judicial) staff whose task is to assist the judges such as registrars" includes the category B contractual staff recruited under the support plan for justice implemented since the second half of 2020 on the sole basis of Article 7 bis of Law No. 84-16 of 11 January 1984 on the statutory provisions relating to the State civil service, created by the law on the transformation of the civil service of 6 August 2019, which institutes the project contract. These contractual employees are recruited for three years. The significant increase in the number of these contractual staff (240 more than in 2020), combined with the increase in the number of court clerks (+221 compared to last year) and the increase in the number of other non-judge staff (+210 compared to last year), contributes to the increase in the overall figures communicated for the year 2021. As on 31 December 2021, 1 666 category A and B staff (including 1 383 women) were undergoing initial training at the “École nationale des greffes”, most of them on practical training in the courts. These staff will join the courts in 2022 or 2023, which will significantly increase the number of staff working in the courts and the regional administrative services.
Source DSJ

Q052 (2020): "Non-judge staff" correspond to legal assistants and specialized assistants who do not work for the prosecution service. Unlike in previous years, this distinction could be made for the numbers in 2020, which explains the decrease in the figures provided compared to the previous year. The category "Non-judicial staff responsible for assisting judges, like registrars" includes the category B contractual employees recruited under the plan to support justice, implemented since the second half of 2020 on the sole basis of article 7bis of the law n°84-16 of January 11, 1984, concerning statutory provisions relating to the State civil service, created by the law on the transformation of the civil service of August 6, 2019, instituting the project contract. These contract employees are hired for 3 years.
As of 12/31/2020, 1,699 category A and B agents (including 1,388 women) were undergoing initial training at the National School of Clerks, most of whom were on practical training in the courts. These personnel will join the courts during 2021 or 2022, which will significantly increase the number of agents working in the courts and regional administrative services.
The data compiles data from the judicial and administrative justice systems. Interns are not included. "

Q052 (2019): As of 31/12/2019, 1,693 category A and B staff (including 1,408 women) were undergoing initial training at the “Ecole nationale des greffes”, most of them on practical training courses in the courts. These staff will join the courts in 2020 or 2021, which will significantly increase the number of staff working in the courts and regional administrative departments.
Other non-judge staff includes specialised assistants (106, 48 men and 58 women) and legal assistants (422, 93 men and 329 women) working in the civil and criminal courts. The increase in the number of legal assistants between 2018 and 2019 is due to the creation of new budgetary posts obtained.

Q052 (2018): With the exception of heading 5 "Other non-judge staff", the distinction between staff attached to judges and staff attached to prosecutors is not possible
At the date of 31/12/2018, 1,173 category A and B staff (including 1,003 women) were in initial training at the National School of Registries, most of whom were on practical training in the courts. These staff will join the courts in 2019 or 2020, which will significantly increase the number of staff working in the courts and regional administrative services.
"Other non-judge staff" includes specialised assistants and assistant lawyers who assist non-judge prosecutors in their duties.
The detail by function and gender is as follows:
Categories Total Male Female
Specialized assistants 23 13 10 10
Assistant lawyers 245 53 192
Total 268 66 202

Q052 (2017): The distinction between staff attached to judges and staff attached to prosecutors is not possible. Namely, the sub-category 2 encompasses specialised assistants (31) and assistant lawyers (242), who assist civil and penal judges or prosecutors in the preparation of case files.

Q052 (2016): No distinction is possible between staff attached to courts and staff attached to public prosecution services. The category “Other non-judge staff” refers to specialized assistants (18) and legal assistants (111) who work in civil and penal courts.

Q052 (2015): It should be noted that as of 31 December 2015, 1013 categories A and B staff (including 886 women) were in initial training at the Ecole nationale des greffes (French National School for Registrars), most of them in practical training in courts. This high volume of staff has joined the courts in 2016 or will do so in 2017, which will increase the number of staff actually working in the courts and regional administrative offices.

The distinction between staff in charge of assisting judges and staff in charge of assisting prosecutors is not possible. The latter are therefore part of the figures provided.

Q052 (2013): The 2013 data encompasses non-judge staff appointed to judges and public prosecutors. On 31 December 2013, 1064 agents were in initial training. They joined courts of law in 2014 or will do in 2015. Among the 21946 non-judge staff, 1911 were appointed to administrative courts. The 274 agents of the State Council counted in 2012 were appointed to a support function and are therefore excluded from the 2013 figures. The size of the litigation section of the State Council represents 87 FET. The staff of the National Court for asylum right has also been taken into account in categories 2, 3 and 4 for a total of 325 FET (not counted until 2013). In 2013, the State Council distributed non-judge staff which was before included in the category "other" in the proposed categories.

Germany

Q052 (General Comment): Data is taken from the "staff-assignment statistic" of the federal states and represents an annual average value of the actual personnel deployed (for example, excluding employees who were not present more than 20 working days during a quarter for reasons other than holiday and/or training). The staff-assignment statistic do not distinguish between male and female staff.

Q052 (2023): "Other non-judge staff" represents:
- staff on the basic level career track as far as not allocated to categories 1 - 4 (including motor-pool staff, staff at court cashiers' offices, internal mail and file delivery service, maintenance etc.)
- staff in staff representation bodies, as representatives for staff with disabilities and as gender equality commissioners

Q052 (2022): "Other non-judge staff" represents:
- staff on the basic level career track as far as not allocated to categories 1 - 4 (including motorpool staff, staff at court cashiers' offices, internal mail and file delivery service, maintenance etc.)
- staff in staff representation bodies, as representatives for staff with disabilities and as gender equality commissioners
Discrepancies of technical staff and other non-judge staff:
The categorisation of staff allocated to "other non-judge staff" was revised and corrected in comparison to previous cycles. Staff on unpaid leave for training purposes was removed. Reception and security services were formerly allocated to "other staff". In alignment with the Explanatory Note, reception and security services are now allocated to the category "technical staff". Other potentially "technical" staff such as motorpool or maintenance staff are not recorded seperatly in the "staff-assignment statistic" but only together with other lines of work as "staff at basic level career track together".

Q052 (2021): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2020): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2019): These figures denote the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2017): This figures denotes the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel

Q052 (2016): This figures denotes the number of staff (full-time equivalent) who are:
•granted unpaid leave for training/further-training purposes,
•released to work in staff representation bodies, as representatives for staff with disabilities, and as gender equality commissioners,
•employed in a special facility,
•employed as reception/security staff,
•employed by the court switchboard,
•motorpool staff,
•cleaners and other non-salaried personnel
Comments:
These are personnel-deployment figures denoting the number of full-time equivalent employees not exercising judicial office. Personnel-deployment figures are not collected according to reference date. Instead, an annual average is calculated over four quarters. There are no absolute figures for the number of persons making up this staff. An employee working full hours is counted as a full-time equivalent (i.e. 1). An employee working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for an employee working half the usual number of hours). Figures for the federal courts are not included.

Q052 (2014): The 2013 and 2014 data are the same due to the impossibility to obtain data for 2014. The trend observed since 2010 reveals stable figures.

Greece

Q052 (2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration

Q052 (2016): Previous data did not, inadvertently, exclude staff working for the public prosecution services.

Hungary

Q052 (General Comment): • Court secretaries („bírósági titkár") are employees of the court that are similar to Rechtspfleger. They are lawyers, who after acquiring a degree at a law faculty have made the bar exam (which requires at least 3 years professional practice). They are enabled to perform duties of judges in cases specifically defined by law.
According to the Constitution when a court secretary is dealing with a case he/she has the same independence as a judge. In criminal cases they can make out of trial decisions (e.g. order an expert to be included in the case), or they can hear witnesses on request of another court. This practically means they assist the judges in pre-trial phase of the case. In misdemeanour cases they adjudicate the case - this is an area of law in which mostly court secretaries deal with cases of first instance. In civil and labour cases they can make any decision that can be made without hearing the case. This practically means they assist the judges in pre-trial phase of the case. In administrative non-litigious cases they can make any decision that can be made without hearing the case. In company registry cases they can make every decision, as well in insolvency cases (with some exceptions).
• From 2012, the category "non-judge staff assisting judges" includes only staff directly assisting judges. • Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2022): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2021): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2020): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2018): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2017): Other non-judge staff includes staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2016): Other non-judge staff includes Staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2015): For the gender ratio we are only able to provide the total figures.

Other non-judge staff (5) includes Staff in charge of different administrative tasks and of the management of the courts (3) and technical staff (4).

Q052 (2014): In 2014, the category "other" includes "staff in charge of different administrative tasks", "technical staff" and some of those judicial employees who in 2012 were counted as "non-judge staff whose task is to assist judges".

Q052 (2013): The methodology of presentation of data used in 2013 is different. Some of those judicial employees who in 2012 were included in the category "non-judge staff whose task is to assist judges" were taken into account in the category "other". The latter includes in 2013 the total number of "staff in charge of different administrative tasks" and "technical staff" because these numbers could not be separated within the national database.

Ireland

Q052 (General Comment): Staff numbers in the Irish Courts Service are computed on the basis of "Full-time equivalent" resources, requiring that staff numbers include decimal points, reflecting part-time, work-sharing and other reduced time working arrangements. As decimal points are not imputtable to this question in the data base, it has been necessary to round up or round down figures.

Q052 (2023): Other non-judge staff includes Service Officers, Tipstaff, Court Messengers 2. Non-judge (judicial) staff whose task is to assist the judges such as registrars (case preparation, assistance during the hearing, helping to draft the decisions) includes staff in Court offices, court going staff including Judicial Assistants and staff in Court Operational Directorates.
ICT staff for this cycle and for the 2022 cycle are included in 4. Technical Staff.

Q052 (2022): 2. Non-judge (judicial) staff whose task is to assist the judges such as registrars (case preparation, assistance during the hearing, helping to draft the decisions): In 2020 the following were counted: staff in Court offices, court going staff including Judicial Assistants and Tipstaff - District, Circuit & High Court including Judicial Assistant and Tipstaff, Court of Appeal including Judicial Assistant, Supreme Court Judicial Assist and Tipstaff. In 2022, Court Operational Directorates/Regional/Judicial Assistants staff are included in this figure. It also includeds Tipstaff/Service Officers and Court Messengers.
3. Staff in charge of different administrative tasks and of the management of the courts (human resources management, material and equipment management, including computer systems, financial and budgetary management, training management): for 2020 ICT Staff were including in this figure. In 2022 ICT Staff are not included in this figure.
4. Technical staff: for 2022, ICT Staff and Cleaning Staff are included in this figure.

Q052 (2021): The discrepancies with previous data are explained by staffing fluctuations.

Q052 (2017): As concerns the increase observed in the number of female staff in charge of different administrative tasks, additional staff have been employed since the last reporting cycle.

Q052 (2016): With regard to the category "staff in charge of different administrative tasks", additional staff have been employed since the last reporting cycle.

Q052 (2015): Figures have rounded up or down to adjust for the fact that actual personnel resource numbers are calculated to decimal points to reflect employment of part of a full-time personnel resource (e.g. where work-sharing arrangements are in place).

Q052 (2013): The reduction in the number of Rechtspfleger since 2012 reflects in part the appointment of number of County Registrars falling within the Rechtspfleger category as Specialist Judges of the Circuit Court. There were also a number of vacant posts at the end of 2013.

Italy

Q052 (General Comment): Drivers and receptionists are included in the category "Staff in charge of different administrative task" . The specialized first instance courts that are not administered and financed by the Ministry of Justice (regional audit commissions, local tax commissions and military courts) are not taken into consideration at question 52.

Q052 (2023): Within the framework of the National Recovery and Resilience Plan (PNRR), the Ministry of Justice has carried out an extraordinary recruitment process to strengthen the so-called "Trial Office". This is an organisational tool consisting in the creation or the reinforcement of support teams for judges, with fixed-term employment and with the aim of reducing the backlog and the disposition time. This measure also improved the quality of justice by supporting judges in their normal activities of study, legal research, drafting documents, organising documents and thus allowing judges to concentrate on more complex tasks.

Q052 (2022): Within the framework of the National Recovery and Resilience Plan (PNRR), the Ministry of Justice has carried out an extraordinary recruitment process to strengthen the so-called "Trial Office". This is an organisational tool consisting in the creation or the reinforcement of support teams for judges, with fixed-term employment and with the aim of reducing the backlog and the disposition time. This measure also improved the quality of justice by supporting judges in their normal activities of study, legal research, drafting documents, organising documents and thus allowing judges to concentrate on more complex tasks.

Q052 (2021): The number of staff has increased due to the hiring of new personnel through public competition.

Q052 (2018): Since 2018, the figures have also included court staff belonging to Administrative Justice.

Q052 (2016): According to the data provided for 2014, 2015 and 2016, we can notice a downward trend as concerns the number of technical staff (a decrease of 28% between 2014 and 2015 and a decrease of 26% between 2015 and 2016), especially the number of female staff (a decrease of 33% between 2014 and 2015 and of 32% between 2015 and 2016). An explanation of these variations is not available at this stage.

Q052 (2015): 'Other non-judge staff' includes: assistants, receptionists, porters and other judicial staff.
The high percentage of “other non judge staff” in Italy is due to a very strict interpretation of the definition of the main categories.

Latvia

Q052 (General Comment): The work of the Judicial Council is ensured by the secretariat of the Judicial Council which is a division of the Supreme Court. This means that the activities of the Council for the Judiciary are provided from the resources of the Budget of the Supreme Court.

Q052 (2023): Other - Supreme Court: Division of case-law and research, Division of provision regime of secrecy, Staff of secretariat of the Council for the Judiciary.
The observed variations in the different categories are due to changes in court staff.

Q052 (2022): Other non-judge staff - Supreme court: division of case-law and research, division of provision regime of secrecy, staff of secretariat of the Council for the Judiciary.
The observed variations in the different categories are due to changes in court staff.

Q052 (2021): Other non-judge staff: Supreme Court - Division of case-law an research, Division of provision of regime of secrecy, Staff of secretariat of the Council for the Judiciary.
In general at the end of 2021, there were many vacancies for court staff for the first and second instance courts, therefore also there are differencies in the number of court staff. In the previous cycles, the numbers for court staff for the first and second instance courts were calculated a little bit different, there were included also vacancies.

Q052 (2020): The observed variations in the different categories are due to changes in court staff.
Other for Supreme Court - Division of case-law and research, Division of provision of regime of secrecy, Staff of the Secretariat of the Council for the Judiciary. Trainees are not included in the number provided of the non-judicial staff.

Q052 (2019): Other non - judge staff: Staff of the Division of case-law and research, Division of provision of regime of secrecy and Secretariat of the Council for the Judiciary, as well consultants (desk officers) of the Supreme Court of Latvia.
The overall discrepancies starts from 2018 due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate). The data between 2018 and 2019 are very similar.

Q052 (2018): Discrepancy due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate).

Q052 (2017): Other non-judge staff- this satff is for Supreme Court - Staff of Division of case-law and research staff, Division of provision of regime of secrecy staff, the Supreme Court of Latvia consultants and Secretariat of the Council for the Judiciary

Starting from 2015 till March, 2018 there were introduced court reform where the judicial map was revised. In the course of the court reform, several courts were merged, legally creating one larger court. On the other hand, in this new territory, the existing courts continue operating as the new body of the joint court, providing the opportunity for citizens to submit the documents at any place of the court. The court reform affected also the changes in the number of court staff, some positions were combined, some positions changed.

Q052 (2014): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings. For 2014, it also subsumes consultants of the Supreme Court.

Q052 (2013): The category “other” includes employees from the Division of Provision of Secrecy Regime and the Supreme Court Division of Case-Law. The latter is a unit of the Supreme Court responsible for the compilation, analysis and publication of court opinions, as well as for summarizing, selecting, processing and publishing in the case-law database court rulings.

Lithuania

Q052 (General Comment): The category “other” includes translators, court psychologists, it encompasses also other helping staff (civil servants and working under the labour agreement).

Q052 (2023): Other staff – translators and psychologists

Q052 (2022): Other staff – translators and psychologists.

Q052 (2021): Psychologists and translators.

Q052 (2020): Other staff – translators and psychologists.
There is no such a position as trainee judges in the Lithuanian court system.

Q052 (2019): Other staff - translators and psychologists.

Q052 (2018): Other non-judge staff – translators and psichologists.

Q052 (2017): Other staff – translators and psychologists.

Q052 (2016): In 2015 the number of technical staff has decreased while at the same time the number of staff assisting judges has increased.

Q052 (2014): The National Courts Administration has never collected data on statistics of court personnel according to the gender. The data, which was provided in earlier evaluation cycles, was preliminary data, manually gathered.

Luxembourg

Q052 (2023): Other non-judge staff consists of legal secretaries and a data protection compliance officer from the administrative courts.

Q052 (2022): In the realm of non-judicial personnel, there are referendaries and a data protection compliance officer within the administrative jurisdictions.

The increase in "other non-judge staff" was elucidated during the 2021 Scoreboard cycle and remains applicable: seen relatively, the number of other non-judge staff has risen by 175% between 2020 and 2022. In absolute terms, this equates to an increase of seven individuals since 2020, encompassing seven positions for referendaries. Both judicial and administrative jurisdictions are increasingly turning to referendaries to relieve magistrates of certain tasks.

Q052 (2021): The category “other non-judge staff” refers to the “référendaires” and the data protection compliance officer of the administrative courts.
The number of “other non-judge staff” has increased by 125% in absolute terms, which corresponds in fact to an increase of 5 persons, representing 5 posts of “référendaires”. Judicial and administrative courts are making greater use of “référendaires” to relieve judges of certain tasks.

Q052 (2020): The other non-judicial staff consists of three legal secretaries and a data protection compliance officer from the administrative courts.

Q052 (2018): Regarding the category "other non-judge staff", it includes non-judge staff working for administrative courts. The increase of the non-judge staff is due to the fact that we no longer distinguish between the staff in charge of administrative tasks and the staff assisting the judges as court clerks, since all the non-judge staff is in charge of assisting the judges. We interpreted this differently in the previous years. Previously some of the staff was considered as not assisting the judges, because of their statute, this appeared as not correct since none of them is limited to administrative tasks, except at the administrative courts, where six persons are in charge of purely administrative tasks. The revised 2017 data shows an increase of the total non-judge staff assisting the judges of 9.95%.

Q052 (2017): With regard to question 52, all the non-judge staff is in charge to assist the judges (except at the administrative courts). Therefore for the year 2017, we did no longer distinguish between staff of administrative tasks and the staff assisting the judges. Only at the administrative courts are 6 persons not assisting the judges.

Q052 (2016): Last year the separation of the sections 1, 2 and 3 was not done correctly. This year this task was made by the parquet general RH office.

Q052 (2014): The overall administrative tasks concerning ordinary courts are centralized at the level of the Prosecutor General Office. The same applies to technical staff. Among the 192 non-judge staff assisting judges, 117 are women. The category "staff in charge of different administrative tasks" (3 women, 2 men) and the category "technical staff" (1) refer exclusively to the Administrative Court (which was not the case for 2012). The 2014 data reflects the administrative reality, the staff that cannot be categorized to one specific task being attached to the State Prosecutor General. The total remains stable; slight variations are due to temporary replacements. The category "other" does not subsume external staff hired on contractual basis, e.g. in IT matters (as in 2012).

Q052 (2013): The overall administrative tasks concerning ordinary courts are centralized at the level of the Prosecutor General Office. The same applies to technical staff. Among the 192 non-judge staff assisting judges, 117 are women. The category "staff in charge of different administrative tasks" (3 women and 2 men) and the category "technical staff" (1) refer exclusively to the Administrative Court staff. The 2013 data reflects the administrative reality, the staff that cannot be categorized to one specific task being attached to the State Prosecutor General. The total remains stable; slight variations are due to temporary replacements. The category "other" does not subsume any more external staff intervening on contractual basis, for example in IT matters.

Malta

Q052 (2023): The distribution of gender by category listed above is a reflection of the changes resulting from the recruitment process. The Court Services Agency is an impartial employer and is constantly seeking to recruit additional staff to support the increasing number of the judiciary, and functions/ operations in court. Fluctuations in the gender ratio are purely incidental.

Q052 (2022): The increase in the number of non-judge staff when compared to the previous evaluation results from an increase in the staff making up the judicial teams of new judges. In addition, there has also been an increase in the number of technical staff with a new grade entitled 'Other industrial grades' being inserted for the first time in this evaluation.

Q052 (2019): For Technical Staff: This is an issue of recruitment and given the change from a Department to an Agency, the Court Services will be issuing new calls in line with the requirements of the Agency.

Q052 (2018): Other non-judge staff include:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti Personnel

Q052 (2017): Other non-judge staff includes:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti staff

Q052 (2016): Other non-judge staff includes:
- Director Civil Courts and staff
- Director Criminal Court and staff
- Registry Criminal Court
- Chief Marshal
- Senior Marshal
- Marshals
- Judiciary Drivers
- Subasti staff

Concerning "Technical Staff", 2 technical staff were employed. Between 2014 and 2015, there was a decrease in the number of tradesman employed with the court administration.

Q052 (2015): In the 2015 data, the category 'Non-judge staff whose task is to assist the judges' includes 13 Court Attorneys that have been introduced for the first time in October 2015. This staff is meant to assist the judges in the drafting of the sentences and other related matters. However the Court Attorneys are not autonomous and the responsibility for the sentences that they draft ultimately lies with the presiding judge.
The differences noted between 2014 and the previous regarding the categories "staff in charge of administrative tasks" and "other non-judge staff" is due to a change in the distribution. After 2014, some non-judge staff who were included in the category "staff in charge of administrative tasks" were integrated in "other non-judge staff".
The decrease between 2014 and 2015 in the number of "technical staff" is due to a decreases in the number of tradesman.

Q052 (2014): The differences noted between 2014 and the previous regarding the categories "staff in charge of administrative tasks" and "other non-judge staff" is due to a change in the distribution.

Q052 (2013): In 2013, the number of non-judge staff was detailed as follows: staff assisting judges – deputy registrars (67), court messengers (19), judicial assistants (30), clerical staff (141), ushers (25), senior court recorders (12), court recorder in charge (1), and Children's advocate (2); staff in charge of administrative tasks – Directorate Support Services (86), Directors and staff (12), Asset Management unit (3), Archives (3), one stop shop (7), Subasti (3), Library (1), Publications (3) technical staff – tradesmen (7), Bookbinder (1);
"other" – cleaners (8), Chief Marshal (1), Marshals (20). An exercise at beefing up the Court administration staff was undertaken by the Government in 2013, fas a result of which, the figures for different sub-categories have increased considerably.

Netherlands

Q052 (General Comment): Only the total of non-judge staff working in first and second intance courts is available.

Q052 (2023): The Council of the Judiciary is not able to make a distinction between different types of non-judge staff working in courts, and thus, the entry is NA (total fte =7 762, number of posts filled: 8 769). The Supreme Court can make the distinction between the number of non-judge staff whose task it is to assist judges (fte=110) and staff in charge of different administrative tasks (fte= 100).

Q052 (2022): The Council of the Judiciary is not able to make a distinction between different types of non-judge staff working in courts, and thus, the entry is NA (total fte = 7 477). The Supreme Court can make the distinction between the number of non-judge staff whose task it is to assist judges (fte= 101) and staff in charge of different administrative tasks (fte= 158).

Q052 (2021): The Council of the Judiciary is not able to make a distinction between different types of non-judge staff working in courts, and thus, the entry is NA. The Supreme Court can make a distinction for the number of non-judge staff whose task is to assist the judges (fte = 110), and staff in charge of different administrative tasks (fte = 148). The first and second instance court cannot (total fte = 7395).

Q052 (2017): the number given is the number of people (posts), the fte is 6719; these can not be separated by gender or line in the table

Q052 (2016): Number of FTE = 6530.

Q052 (2015): FTE in 2015 is 6.497

Q052 (2014): The figure 7 287 pertains to persons; data in FTE is 6 495.

Q052 (2013): According to 2013 data, the figure 7.287 pertains to persons, data in fte is 6.495.

Poland

Q052 (2023): 1. registrars.
2. clerks within the judicial area + assistants.
3. administrative clerks.
4. other employees designated in the Law on Court and Prosecution Staff.
5. specialists from the opinion teams + probation officers.
Supreme court:
Other non-judge staff include:
Supreme Court Research and Analysis Office staff, Supreme Court Information Centre (Press Centre) staff, Supreme Court Correspondence Team staff, Supreme Court Library staff, Visitor Services Team staff, Text-processing specialists, Chief Medical Officer, H&S/Defence Specialist, Internal Audit Officer, Data Protection Officer.

Q052 (2022): The presented data does not include court assessors (trainee judges). The question should only indicate the number of court employees
who are not judges. According to Article 2 § 1a of the Act of 27 July 2001. Law on the Common Court System (Journal of Laws of 2023, item 217), in district courts, tasks related to the administration of justice are also performed by court assessors/trainee judges, with the exception of:
1) applying temporary detention in pre-trial proceedings in relation to a detainee handed over to the court's disposal together with a request to apply temporary detention;
2) examining complaints against decisions on refusal to initiate an investigation or enquiry, decisions to discontinue an investigation or enquiry and decisions to discontinue an enquiry and on decisions to discontinue an investigation and enter the case in the register of crimes
3) deciding family and juvenile cases.

Q052 (2021): •Members of the Research and Analyses Office of the Supreme Court (Biuro Studiów i Analiz SN);
Data also includes staff from The Supreme Administrative court and The Supreme court of justice

Q052 (2020): probation officers, Specialists of Opinion Teams of Forensic Specialists
*the presented data does not include court assessors (trainee judges). The question should only indicate the number of court employees who are not judges. According to Article 2 § 1a of the Act of 27 July 2001. Law on the Common Court System (Journal of Laws of 2020, item 2072), in district courts, tasks related to the administration of justice are also performed by court assessors/trainee judges, with the exception of:
1) applying temporary detention in pre-trial proceedings in relation to a detainee handed over to the court's disposal together with a request to apply temporary detention;
2) examining complaints against decisions on refusal to initiate an investigation or enquiry, decisions to discontinue an investigation or enquiry and decisions to discontinue an enquiry and on decisions to discontinue an investigation and enter the case in the register of crimes
3) deciding family and juvenile cases.
Since in the remaining scope court assessors perform tasks related to the administration of justice - just like judges - they should be deemed to belong to the professional group of judges. At the same time I would like to inform you that as at 31 December 2020 there were 486 trainee judges employed in district courts, including 317 women and 169 men. 1. number of rechtspflegers of 16 voivodeship administrative courts included (males 23, females 34);
2-4. - In 2020 data include also employees of the Supreme Administrative Court;

Q052 (2019): - professional probation officers;
- employed in Consultative Team of Judical Specialist

Q052 (2018): Other non-judge staff:
- professional probation officers
- employed in Consultative Team of Judical Specialists

Q052 (2017): Other non-judge staff -5790
of which:
Professional probation officers - 5188
Employed in Consultative Team of Judicial Specialists - 602.

Q052 (2016): Other non-judge staff - 5859
of which:
Professional probation officers - 5212
Employed in Consultative Team of Judical Specialists - 647.

Portugal

Q052 (General Comment): The variations in the number of non-judge staff over the different evaluation cycles seem high due to the small numbers.

Q052 (2023): The data for the year 2023 reflects a change in the criteria for recording data on non-judge staff by the courts. The personnel working in the central units of the courts began to be registered in the court's common services personnel area. Thus, since 2023 the personnel in the common services have been included in this table.

Q052 (2022): The variations in the number of non-judge staff over the different evaluation cycles seem high due to the small numbers. Included in the "Other non-judge staff" category are professionals not included in the other specific categories, such as senior technical staff who mainly provide support to the higher courts.

Q052 (2020): 52-3-In absolute terms, the increase between 2018 and 2020 in the category "Staff in charge of different administrative tasks and of the management of the courts" for women is from 94 to 104. Since we are dealing with small absolute values, the identified variation, despite not representing a significant difference in absolute terms, acquires a more relevant expression in terms of relative variation.
52-4- We confirm the increase in the number of "technical staff" in the courts between 2018 and 2020. No specific explanation.

Q052 (2019): In 2019, as in previous years there was no other non-judge staff.

Q052 (2018): In 2018, as in 2017 there were no other non-judge staff.

Q052 (2017): "other non judge staff" - this category includes all staff with a non-specified category or non-specific functions. As this is a residual category, the numbers tend to be small.

Q052 (2014): The decrease in the number of staff in charge of administrative tasks is due to retirements that have not been replaced and to the continuous IT modernization.

Q052 (2013): The number of judicial staff is decreasing on account of retirements that have been occurring since 2010. In addition, due to the reform of the Public Administration that is taking place since 2009 and the financial constraints of the past few years, the number of public servants has decreased.

Romania

Q052 (General Comment): The number indicated for the category “non-judge staff assisting judges” encompasses clerks with judicial tasks; the number indicated for “staff in charge of administrative tasks” concerns registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; the number indicated for “technical staff” includes IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents etc.). The category “other” subsumes assistance magistrates, judicial assistants, probation counselors and judge's assistants. o Assistance magistrates work only within the High Court of Cassation and Justice. They participate in the trial sessions, have a consultative vote in deliberations and write the minutes of the sessions, as well as the decisions. o Judicial assistants work only within tribunals and are part, together with the judges, of the panels which judge, in first instance, cases regarding labor and social insurances litigations (the panel is composed of 1 judge and 2 judicial assistants; the latter participate in the deliberations with a consultative vote and sign the decisions). o The probation counselors have, in principle, the following attributions: support the activity of judges by elaborating certain evaluation documents in criminal cases with juvenile offenders; support the activity of the judge delegated with enforcing decisions in criminal matters; cooperate with public institutions in order to execute the measure to force a minor to carry out an unpaid activity in an institution of public interest; initiate and carry on special programs of social reinsertion for persons convicted to prison and for minors who committed offences provided by the criminal law; carry out, at request, activities of individual counseling of offenders, with regard to the social, group and individual behavior; initiate and carry out special programmes of protection, social and judicial assistance of minors and youngsters who committed offences. o T

he position of "judge's assistant" was established by Law no. 393/2023 on the status of the judge's assistant, entered into force on December 17, 2023. Judge's assistants work in courts of appeal, courts of first instance and specialized courts. Judge's assistants perform the following main duties: (a) assist the judge in carrying out specific procedures prior to the setting of the first date of the trial; (b) carry out documentation, verification and presentation of the documents and papers in the case-file and of the facts and points of law relevant to the case (c) draft, under the judge's direction, judgments or other procedural documents.

Q052 (2023): Other: assistance magistrates, judicial assistants, probation counselors and judge's assistants. It should be noted that the position of "judge's assistant" was established by Law no. 393/2023 on the status of the judge's assistant, entered into force on December 17, 2023.

Q052 (2022): Other: assistance magistrates, judicial assistants and probation counselors.

Q052 (2021): 6.665 represents the number of clerks with judicial tasks (- 170 work only within the High Court of Cassation and Justice); 1.701 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 38 work only within the High Court of Cassation and Justice); 1.723 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (–100 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (1055): a higher percentage of occupation of vacant positions.
Assistance magistrates: 130 Judicial assistants: 176 Probation counselors: 749

Q052 (2019): 6437 represents the number of clerks with judicial tasks (- 169 work only within the High Court of Cassation and Justice); 1646 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 16 work only within the High Court of Cassation and Justice); 1750 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents..... (– 6 IT staff works only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (867):
Assistance magistrates: 116 Judicial assistants: 177 Probation counselors: 574

Q052 (2018): 6402 represents the number of clerks with judicial tasks (- 163 work only within the High Court of Cassation and Justice); 1645 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 17 work only within the High Court of Cassation and Justice); 1772 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (–101 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (843):
Assistance magistrates: 110 Judicial assistants: 176 Probation counselors: 557

Q052 (2017): Other categories of personnel which function within the Romanian courts (852): Assistance magistrates: 112 Judicial assistants: 176 Probation counselors: 564
The increase observed in the category "other" between 2016 and 2017 is explained by the employment of the respective number of probation counselors.

Q052 (2016): 6191 represents the number of clerks with judicial tasks (- 165 work only within the High Court of Cassation and Justice); 1621 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 9 work only within the High Court of Cassation and Justice); 1822 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (– 109 work only within the High Court of Cassation and Justice).
Other categories of personnel which function within the Romanian courts (663):
Assistance magistrates: 113 Judicial assistants: 173 Probation counselors: 377

Q052 (2015): 6149 represents the number of clerks with judicial tasks (- 149 work only within the High Court of Cassation and Justice); 1615 - the number of registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (– 9 work only within the High Court of Cassation and Justice); 1844 - number of IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (– 109 work only within the High Court of Cassation and Justice).

Other categories of personnel which function within the Romanian courts: Assistance magistrates: 115 ; Judicial assistants: 176 ; Probation counselors: 352

Q052 (2014): In 2014, there were 6072 clerks with judicial tasks (153 within the High Court of Cassation and Justice); 1585 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants (9 within the HCCJ); 1854 IT staff, contractual personnel and other personnel / drivers, ushers, procedural agents (96 within the HCCJ). The category “other” subsumes 101 Assistance magistrates, 175 Judicial assistants and 360 Probation counselors.

Q052 (2013): In 2013, there were 5743 clerks with judicial tasks; 1563 registering clerks, documentary clerks, statistician clerks, archivist clerks and public servants; 1784 IT staff, contractual personnel and other personnel (drivers, ushers, procedural agents). The category “other” subsumes 92 Assistance magistrates, 176 Judicial assistants and 281 Probation counselors.

Slovak Republic

Q052 (2023): Q052: Rechtspfleger: In connection with the EU project, project positions of "senior judicial officer - coordinator" were created in the courts, which were financed from EU funds and were kept separately in the records. Currently, these positions are financed from the budget of the Ministry of Justice of the Slovak Republic, and therefore the registered number is significantly higher than in the previous year.

Q052 (2022): The judiciary, especially the non-judges' positions, are probably not attractive for the males because of the salary.Another possible explanation is that the position of Rechtspfleger is a starting position before judicial exams and subsequent application for the position of judge, which could have caused an outflow of male employees.

Q052 (2021): The number of technical staff is included in category 3 (staff in charge of administrative tasks).
The position in line 2. is not atractive for males.

Q052 (2020): The number of technical staff and other non-judge staff are included in category 3 (staff in charge of administrative tasks)

Q052 (2018): See general comment.
There are no special explanation related to discrepancies in gender composition of court staff

Q052 (2017): The slight increase in the number of male non-judge staff originates at the Supreme court of the Slovak republic. The position of the "Judicial assistant" has been established and filled. The assistant helps the judge with legal research, drafting of decisions etc. Out of 86 assistants there are 29 male.

Q052 (2014): In 2014, the category "Rechtspfleger" subsumes 967 higher judicial officers and 63 mediation and probation officers. The category "staff assisting judges" includes assistants of judges and court secretaries. The category "staff in charge of different administrative tasks" encompasses court staff responsible for court administration, contact with the public (information centre, filing office), archives and technical staff. It was not possible to extract the accurate number of "technical staff" and "other non-judge staff" from the overall data on "staff in charge of different administrative tasks".

Q052 (2013): In 2013, the category "Rechtspfleger" includes 975 judicial officers, 45 legal assistants at the Supreme Court and 63 mediation and probation officers. The category "non-judge staff assisting judges" includes 1348 assistants and 752 judicial secretaries. The rest of the non-judge staff is subsumed in the category "other". In 2011 and 2012, the Ministry of Justice decided to increase the total number of the judicial officers with the intention to improve the disposition of certain court agendas.

Slovenia

Q052 (General Comment): Data is not collected in a way to allow reporting in CEPEJ categories above. Court staff is employed by courts to work on work posts as defined by the government regulation. Generally, work posts in public administration are divided on "expert-technical" staff and "officials". The Courts Law explicitly provides typical profiles of non-judge staff: judicial assistants, higher and independent judicial assistants and judicial advisers (comparatively they can also perform some typical Rechtspflegers tasks in civil enforcement, land registry, business registry and insolvency cases). The law also provides for judicial trainees. Other typical profiles in courts include: typists, registrars (case management systems) as well as employees in court management and general services (e.g. accounting, HR, archives, general maintenance, cleaning) and IT staff (system administrators/engineers).

Q052 (2023): The number of court staff is reported according to court management reporting standard (occupied work posts), while the number of males/females is calculated according to human resources records.
Break down by some typical profiles (number of occupied posts):
Court directors: 15
Judicial advisers: 617
Judicial assistants: 588
Court registrars: 498
Typists:881
Judicial trainees: 120

Q052 (2022): Approx. 3,5% of all court staff (120 persons) are judicial trainees (counted under "2. Non-judge (judicial staff").

Q052 (2021): Approx. 3% of all court staff (115 persons) are judicial trainees (reported under "2. Non-judge (judicial staff").

Q052 (2020): Approx. 3% of all court staff (109 persons) are judicial trainees (counted under “2. Non-judge (judicial staff”). No particular explanation can be given regarding the increase in the number of “3. Staff in charge of different administrative tasks and of the management of the courts” / Males.

Q052 (2017): Differences with previous evaluation cycles within categories (including male/female ratio):
The number of court staff is reported according to the actual work tasks of the staff. Between years, court staff can be assigned to different departments and tasks and therefore the variation of Rechtspfleger/Non-judge/Administrative staff categories and male/female ratio within categories can change, even though no major hiring or letting go for different categories of court staff had occurred. The relative differences in the Technical staff category are due to the small (absolute) number of staff.

Q052 (2016): Differences with previous evaluation cycles within categories (including male/female ratio):
The number of court staff is reported according to the actual work tasks of the staff. Between years, court staff can be assigned to different departments and tasks and therefore the variation of Rechtspfleger/Non-judge/Administrative staff categories and male/female ratio within categories can change, even though no major hiring or letting go for different categories of court staff had occurred. The relative differences in the Technical staff category are due to the small (absolute) number of staff.

Q052 (2015): The difference between 2014 and 2015 data is due to the methodology of gathering the data. In this cycle, all the courts were asked to provide the additional data to assure the accuracy of the answer. The reporting method was further improved and some adjustments were made according to the definition of “Rechtspfleger”, “Non-judge staff” and „Administrative staff“ categories.

Q052 (2014): In courts, there were 14,55 % of males and 85,45 % of females (judges included) on 31. 12. 2014. In this cycle the reporting method was further improved. The Supreme Court's strategic orientation according to this matter is to decrease the number of judges, while increasing the number of non-judge staff. The Supreme Court can, in order to ensure timeliness of proceedings, distribute additional finances for temporary employment of additional staff to individual courts.

Q052 (2013): The category 1 - "Rechtspfleger" includes court clerks, independent and higher judicial advisors in the field of commercial (court) register, land register and civil enforcement procedure, as they have the competence to decide on certain cases, judicial advisers in the field of civil enforcement, who have even slightly broader competences than judicial assistants. The category 2 includes judicial advisers and the remaining judicial assistants. The category 3 includes administrative support to the judge and court management – court director, human resources office, financing-accounting office. The category 4 refers to cleaning, security, system administration, drivers, etc.

Spain

Q052 (General Comment): The Spanish judicial system distinguishes between three categories of non-judicial staff: Gestor Procesal, Tramitador Procesal and Auxilio Judicial. The sum of these bodies, destinated to Courts, is the response to Q.52.5 'Other non judge staff'.

Q052 (2023): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts: 45.544
In adition to that, there are 1.161 Forensic Doctors.
Regarding the distribution males / females: This distribution can only be given from the Autonomous Regions of the direct competence of the Ministry of Justice (5 of 17). In these Autonomoues Regions the proportion of females within the civil servants in Courts is
72% (therefore, 28% of males and 72% females). This proportion is possibly applicable to the whole national system.

Q052 (2022): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:45332
In adition to that, there are 1155 Forensic Doctors.
Regarding the distribution males / females: This distribution can only be given from the Autonomous Regions of the direct competence of the Ministry of Justice (5 out of 17). In these Autonomoues Regions the proportion of females within the civil servants in Courts is
71% (therefore, 29% of males). This proportion is possibly applicable to the whole national system.

Q052 (2021): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:44651
In adition to that, there are 1147 Forensic Doctors.

Q052 (2020): The sum of the bodies [Gestor Procesal, Tramitador Procesal and Auxilio Judicial] destinated to Courts:44289
In adition to that, there are 1144 Forensic Doctors.
Regarding the distribution males / females: This distribution can only be given from the Autonomous Regions of the direct competence of the Ministry of Justice (5 out of 17). In these Autonomoues Regions the proportion of females within the civil servants in Courts is 71'76% (therefore, 28'23% of males). This proportion is possibly applicable to the whole national system.

Q052 (2019): The data indicated in the chart as 'other non judge staff' (43556) includes the three kinds of civil servants that work in Courts (Gestión procesal, Tramitación procesal, Auxilio judicial). In addition to that, there are other 1122 Forensic Doctors.

Q052 (2018): 1121 Forensic Doctors

Q052 (2017): The figure for other non judge staff includes judicial civil servants who are in charge of the processing of files, communication acts, and other tasks, and are distributed in three categories (called Auxilio Judicial,Tramitación Procesal, Gestión Procesal). Forensic Doctors are a special body (not included in the figure provided in this question). Their total number (Forensic Doctors) at 4 April 2018 is 1003.
For 2017, in contrast with previous cycles, data on number of “other non-judge staff” excludes the civil servants that work in Prosecution Offices.

Q052 (2016): The figure for other non judge staff includes judicial civil servants who are in charge of the processing of files, communication acts, and other tasks, and are distributed in three categories (called Auxilio Judicial, Tramitación Procesal, Gestión Procesal). Forensic Doctors are a special body (not included in the figure provided in this question). Their total number (Forensic Doctors) at 4 April 2018 is 1003.

Q052 (2014): In 2014, there are 44 896 other non-judge staff (judicial clerks) and 3 667 judicial counsellors (this is the new name for the secretario judiciales since October 1st).

Question 052-1

Belgium

Q052-1 (2023): The lack of concordance between the total of Q 52 and the one of Q 52-1 is due to the fact that technical staff are not included in the table under question 52-1. These employees work at all three instances and their number (579) cannot be divided by instance.

Q052-1 (2022): The discrepancy between the totals of Q52 and Q52-1 is due to the technical staff not being included in the table uner question 52-1. These employees operate at all three instances, and their number (593) cannot be divided among these instances.

Q052-1 (2021): Source: Directorate P&O - HR Department Judicial staff - Directorate General Judicial Organisation, Federal Public Service Justice (FPS Justice)

Q052-1 (2020): Source: HR Service Judicial Personnel-Directorate General Judicial Organization, FPS Justice

Bulgaria

Q052-1 (General Comment): Item 1 "Total number of court employees working in the courts of first instance" includes all employees of the district and administrative courts. Item 2 "Total number of court employees working in the courts of second instance (appellate court)" includes all employees working in the regional courts and courts of appeal in the country.

Q052-1 (2021): 2. "Total non-judge staff working in courts at second instance": the increased number is due to newly opened vacancies for non-judge staff in view of strengthening the courts' activities.

Q052-1 (2020): It is noteworthy recalling the difficulty of determining the place of the regional/provincial courts in the "first instance" and "second instance (appellate)" columns. For the purposes of the CEPEJ survey, they are classified as "second instance (appellate)". Accordingly, item 1 "Total number of court employees working in the courts of first instance" includes all employees of the district and administrative courts, while item 2 "Total number of court employees working in the courts of second instance (appellate court)" includes all employees working in the regional courts and courts of appeal.

Croatia

Q052-1 (2023): The figures include civil servants and personnel who have been employed for an undetermined period of time. (Data from Table 052.)
-Those who are absent without pay
-who are not actively seeking job
-who are taken off the rolls
-who are dispatched to work for the Ministry of Justice, the Judicial Academy, the State Judicial Council, foreign missions, or other state bodies or organizations outside the state service
-who are off for motherhood
-those on leave as fathers
-those who are on leave as parents
-Those who are absent due to adoption
-those who are on leave as parents
-who have a part-time job
-who, as a result of rising childcare costs, work half-time
-who are caring for a child with developmental difficulties while on leave or working a half-time schedule
-whose employment status is dormant until the child's third year of life

Q052-1 (2022): The data refer to officials and employees employed on an indefinite basis (data from table 052.)
The number does not include those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Cyprus

Q052-1 (2022): Increase in the needs of the court led to appointment of more employees.

Q052-1 (2021): Positions that were vacant had been filled.

Q052-1 (2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.

Q052-1 (2018): The Court of Appeal is also the Supreme Court

Denmark

Q052-1 (2020): -

Estonia

Q052-1 (2022): Many of the non-judge staff is shared between courts, e.g translators. Main purpose is to cut costs and offer better service with the help of digitalisation.

France

Q052-1 (2023): As in the previous year, staff working in regional administrative departments are not included in this census of staff working in courts only. This explains the difference between the totals for questions 52 (23 258) and 52.1 (21 757). Also included in the number of staff working in the courts are the ‘local justice’ contract staff whose recruitment has been authorised from 2020 onwards on the basis of the project contract (see comment to question 52).
The increase of 495 real staff between 2022 and 2023 for these court staff is mainly due to the increase in the number of legal assistants and specialist assistants (+462 posts). It should be noted that, unlike in question 52, it has not been possible to exclude legal assistants and specialised assistants working for the public prosecutor's office when breaking down the data provided in the table above (1 538 in total for courts of first instance, courts of appeal and supreme courts).

Q052-1 (2022): It has not been possible to exclude the legal assistants and specialized assistants working for the public prosecutor's office from the breakdown of data provided in the frame of Q52-1 (1076 in total for first instance courts, appellate courts, and Supreme courts). Also included in these figures are contractual staff whose recruitment was authorized as of 2020 under project-based contracts (see comments to question 52). The difference between the total of Q52 and the total of Q52-1 is once again explained this year by the non-inclusion in question Q 52-1 of personnel working in SAR: indeed, since question Q52-1 only concerns non-judicial staff working in first instance courts, appellate courts, and Supreme courts, SAR staff are not counted therein.

Q052-1 (2021): It has not been possible to exclude the legal assistants and specialised assistants working for the public prosecution services for the breakdown of the data provided in the table above (359 in total for the First instance courts, Courts of appeal and Supreme courts, at national level). Also included in these numbers are the 'justice de proximité' contract staff whose recruitment has been authorised from 2020 onwards on the basis of the project contract (see comment of Q52). On the other hand, staff working in the SAR are excluded (contrary to Q52), i.e. 1 766 staff.
Source DSJ

Germany

Q052-1 (2023): While the staff-assignment statistic allocates judges to instances, non-judge staff is not allocated to instances.

Q052-1 (2022): While the staff-assignment statistic statistic allocates judges to instances, non-judge staff is not allocated to instances.

Q052-1 (2021): Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances in the staff-assignment statistics of the Länder.

Q052-1 (2020): Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances in the staff-assignment statistics of the Länder.

Q052-1 (2018): Differentiating non-judge staff at first and second instance level based on their gender is not possible since the ordinary court system in Germany consists of three instances (local courts, regional courts and higher regional courts). At the same time, regional courts function as a court of appeal on fact and law but can also hear cases at first instance. Unlike in the case of judges (question 46), non-judge staff are not allocated to individual instances.

Greece

Q052-1 (2022): The explanation was given in last year's questionnaire.

Q052-1 (2021): At the highest level there is the Court of auditors, whose judicial officials have been included above, the total number of them is 637 and consists of 219 men and 418 women. The above data were provided by the Directorate of judicial officials with the cooperation of Juststat of the Ministry.

Q052-1 (2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration

Ireland

Q052-1 (2022): The total non-Judge staff working in the courts includes staff of the Office of the CEO, Corporate Services staff, Strategy and Reform staff, ICT staff, Regions & C&D Operations, Superior Court Operations staff, as well as quasi-judicial and technical staff. These staff members work throughout the system, and not just in one of the district, circuit, high or supreme courts. 1. Total non-judge staff working in courts at first instance level: The FTE for 2022 is up on 2020, this figure is total staff minus staff in Court of Appeal and Supreme Court.
2. Total non-judge staff working in courts at second instance (court of appeal) level: In 2020 this included Court of Appeal staff including Judicial Assist and Tipstaff. In 2022 this includes Court of Appeal staff only.
3. Total non-judge staff working in courts at Supreme Court level: In 2020 this included Supreme Court staff including Judicial Assistants and Tipstaff. In 2022 this includes Supreme Court staff only, as Judicial Assistants are included in figure for 52/Q2 and Tipstaff are included in figure 52/Q5.

Q052-1 (2021): The discrepancies with previous data are explained by staffing fluctuations.

Q052-1 (2020): The total non-Judge staff working in the courts includes staff of the Office of the CEO, Corporate Services staff, Strategy and Reform staff, ICT staff, Regions & C&D Operations, Superior Court Operations staff, as well as quasi-judicial and technical staff. These staff members work throughout the system, and not just in one of the district, circuit, high or supreme courts.

Q052-1 (2018): Question 52 - 1 was answered to provide a breakdown of staff working as registrars and in offices and other support staff in those offices. The reason the figures would not add up to the total is because the figures exclude administrative staff who are employed by the Courts Service in administrative areas away from front line offices, and who cannot be distributed between instances. The wording in the column for the total of such staff (1049) was given on the basis that this column used the same wording as the previous table which presumably covered all Courts Service staff.

Italy

Q052-1 (2022): See comment at Q.52

Q052-1 (2018): Since 2018, the figures have also included court staff belonging to Administrative Justice.

Latvia

Q052-1 (2023): The observed variations in the different categories are due to changes in court staff.

Q052-1 (2022): The observed variations in the different categories are due to changes in court staff.

Q052-1 (2021): In general, at the end of 2021, there were many vacancies for court staff for the first and second instance courts, therefore also there are differences in the number of court staff. In the previous cycles, the numbers for court staff for the first and second instance courts were calculated a little bit different, there were included also vacancies.

Q052-1 (2018): Discrepancy due to court reform (Land Registry offices integrated in general jurisdiction courts and historically high turnover rate)

Luxembourg

Q052-1 (2021): The 27% increase in the number of second instance non-judge staff is explained in particular by the hiring of additional “référendaires”. At the Supreme Court, the number of non-judge female staff decreased by 50% in relative terms; in absolute terms, this corresponds to one woman being replaced by a male member of staff.

Malta

Q052-1 (2020): It is not possible to differentiate the non-judge staff according to these criteria.

Q052-1 (2018): It is not possible, at the moment, to differentiate the staff working at first instance from that working at second instance.

Netherlands

Q052-1 (General Comment): Comments from the SC:
1.Note that the above also includes the judicial and other staff working for the office of the Procurator General and Advocates General at the Dutch Supreme Court (who are not part of the Dutch public prosecution office).
2.Note that the Dutch Supreme Court has outsourced various tasks such as building maintenance, technical services, facility management, reception, security, cleaning, and catering. The individuals performing these services are therefore not included in the numbers above.

Q052-1 (2021): Comments from the SC:
1.Note that the above also includes the judicial and other staff working for the office of the Procurator General and Advocates General at the Dutch Supreme Court (who are not part of the Dutch public prosecution office).
2.Note that the Dutch Supreme Court has outsourced various tasks such as building maintenance, technical services, facility management, reception, security, cleaning and catering. The individuals performing these services are therefore not included in the numbers above.

Q052-1 (2018): The total of non-judge staff does not include staff of the High Court.

Poland

Q052-1 (2020): Data from the supreme court's human resources Department.
In 2020 data include also employees of the Supreme Administrative Court

Portugal

Q052-1 (2023): The data for the year 2023 reflects a change in the criteria for recording data on non-judge staff by the courts. The personnel working in the central units of the courts began to be registered in the court's common services personnel area. Thus, since 2023 the personnel in the common services have been included in this table.

Q052-1 (2022): the data in question 52-1 has also been updated, due to a small error in the accounting of the different categories included in it." Compared to the figures we sent initially, the correction was very small in percentage terms (36 more employees were added, out of a total of 5412).
The amended figures in table 52.1 referred to a specific category of STJ/STA officials who have now been added, as they were not accounted for previously by mistake (neither in the version initially sent with 2022 data, nor in the previous edition with 2021 data).

Q052-1 (2020): We confirm the increase in 2020 in the category of non-judge staff working in courts at Supreme Court level in the Supreme Court of Justice and the Supreme Administrative Court, with a special focus on the administrative and tax courts.

Q052-1 (2018): Since 2016 there has been an increase of non-judge staff to meet the needs of additional staff. There were no legislative or other changes that could directly justify the increase.

Romania

Q052-1 (2023): 3. The difference between the data communicated in 2022 and 2023 is primarily due to changes in the methodology used by the High Court of Cassation and Justice for reporting data on civil servants and contractual staff.

Q052-1 (2021): A higher percentage of occupation of vacant positions for total non-judge staff working in courts at Supreme Court level.

Q052-1 (2020): 3. Total non-judge staff working in courts at Supreme Court level-
The difference between 2018 (comunicated data) and 2020 is pointedly given by the difference in the methodology for reporting data within the human resources sector. Thus, for 2018, in the total number of auxiliary staff (non-judge staff working at Supreme Court level) was not included the number of staff represented by ushers, procedural agents, drivers. Also, rechecking the communicated data for 2018 on this point (point. 3), it is confirmed that the total number of auxiliary staff (occupied positions) at the High Court of Cassation and Justice is 230 (2018 data, including the staff represented by the professional categories mentioned above).

Slovak Republic

Q052-1 (2021): Total non-judge staff working in courts at Supreme Administrative Court level - 59 total; 18 males and 41 females, included in line 3.. Some of the staff moved to the Supreme Administrative Court and some left the judicial system.

Q052-1 (2018): All data were provided by the central institution for the court management, The Department of Human Resources Development of the Ministry of Justice

Slovenia

Q052-1 (General Comment): Besides profiles typically working in courts, the court staff at second instance include judicial trainees (formally employed by higher courts, while doing internship at first instance courts). At third instance the staff at the Supreme court Centre for Informatics is included - mostly system administrators/engineers and project managers.

Q052-1 (2023): The number of court staff is reported according to court management reporting standard (occupied work posts), while the number of males/females is calculated according to human resources records (by instance).
The figures include: 120 judicial trainees at the second instance (formally employed by higher courts, while doing internship at first instance courts), and approx 20 employees of Centre for Informatics at third instance.

Q052-1 (2020): No particular explanation can be given regarding the increase in the number of “3. Total non-judge staff working in courts at Supreme Court level” / Males.

Spain

Q052-1 (2018): These figures include the number of "letrados de Administración de Justicia", which are the CEPEJ equivalent of "Rechtspfleger".

Question 055

Austria

Q055 (General Comment): Data is presented in full time equivalent.

Q055 (2014): The numerical values provided in the table are rounded. The accurate figures are: total – 344,83 (171,52 males and 173,31 females); prosecutors at first instance level – 308,69 (147,13 males and 161,56 females); prosecutors at second instance (court of appeal) level – 20,94 (13,04 males and 7,90 females); prosecutors at Supreme Court level – 15,20 (11,35 males and 3,85 females).

Belgium

Q055 (General Comment): Explanation of the table: 1. all prosecutors working in the labour auditor's offices, public prosecutors' offices of first instance, public prosecutor's office for road safety and the federal public prosecutor's office.
2.All prosecutors working in the public prosecutor's offices of the appeal courts and the public prosecutor's offices of the labour courts.
3.All prosecutors working in the public prosecutor's office at the Court of Cassation.

Q055 (2021): Source: FPS Justice - Directorate General for the Judiciary, HR Department of the Judiciary, Notaries and Enforcement agents

Q055 (2020): Support Service of the College of Public Prosecutors

Q055 (2014): In 2014, the number of professional prosecutors includes the heads of division of the 15 public prosecutors' offices and the heads of the 8 prosecution offices within labour courts.

Bulgaria

Q055 (General Comment): The provided data refers to the actual number of employed persons for the year of reference.

Q055 (2016): 1511 is the total number of working prosecutors at 31.12.2016; 888 prosecutors at first instance level includes – the prosecutors from 113 Regional Prosecutor`s Offices and 1 Specialized Prosecotr`s Office; 500 prosecutors work in 28 District Prosecutor`s Offices, 7 Appelate Prosecutor`s Offices and 3 Military District Prosecutor`s Offices; 123 are the prosecutors working in Supreme Prosecutor`s Office of Cassation and Supreme Administrative Prosecutor`s Office and 1 Prosecutor General. (The indicated numbers do not include the number of the investigative magistrates in the investigative departments at District Prosecutor`s Offices and National Investigation Service and their administrative heads.

Q055 (2014): For 2014, the number of prosecutors acting at 1st instance includes prosecutors of the regional prosecutor’s offices, specialized prosecutor’s offices and the military prosecutor’s offices. The number of prosecutors acting at 2nd instance includes prosecutors from district and appellate prosecutor’s offices. The number of prosecutors at Supreme Court level includes prosecutors from the Supreme Prosecutor's Office of Cassation, Supreme Administrative Public Prosecutor's Office, and the Prosecutor GeneralIn contrast with the 2012 evaluation, the number of investigators in the District Investigation Departments at the District Prosecutor’s Offices and the National Investigation Service is not taken into consideration for 2014.

Croatia

Q055 (General Comment): The provided data encompasses all officials in the public prosecutors' offices, including heads of the public prosecutors' offices (the Public Prosecutor of the Republic of Croatia, county and municipal public prosecutors, the head of the Bureau for Combating Corruption and Organised Crime) and all public prosecutors deputies. The number of prosecutors at the first instance level includes all municipal public prosecutors, their deputies, as well as the head of the Bureau for Combating Corruption and Organised Crime and his deputies. The number of prosecutors at the second instance (court of appeal) level includes all county public prosecutors and their deputies. The number of prosecutors at the Supreme Court level includes the Public Prosecutor and his deputies.

Q055 (2023): The data refers to all state attorneys.
The State Attorney General, municipal/county state attorneys, deputy municipal/county state attorneys facilitated to authorization of municipal/county state attorney duties, deputy state attorneys, and municipal/county state attorneys.
-Those who are absent without pay
-who are not actively seeking job
-who are taken off the rolls
-who are dispatched to work for the Ministry of Justice, the Judicial Academy, the State Judicial Council, foreign missions, or other state bodies or organizations outside the state service
-who are off for motherhood
-those on leave as fathers
-those who are on leave as parents
-Those who are absent due to adoption
-those who are on leave as parents
-who have a part-time job
-who, as a result of rising childcare costs, work half-time
-who are caring for a child with developmental difficulties while on leave or working a half-time schedule
-whose employment status is dormant until the child's third year of life

Q055 (2022): The data refer to all state attorneys:
State Attorney General, municipal/county state attorneys, deputy municipal/county state attorneys authorized to perform duties of municipal/county state attorneys, deputy state attorneys and deputies of municipal/county state attorneys.
The number is reduced by those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q055 (2018): The above information includes all officials in the public prosecutor's offices – all public prosecutors (heads of prosecution offices) and public prosecutors' deputies (deputies of the Public Prosecutor, deputies of the Head of the Bureau for Combating Corruption and Organised Crime and deputies of the county and municipal public prosecutors).
The number of prosecutors at the first instance level includes all municipal public prosecutors (heads of municipal prosecution offices and Head of the Bureau for Combating Corruption and Organised Crime), their deputies, as well as the deputies of the Head of the Bureau for Combating Corruption and Organised Crime. The number of prosecutors at the second instance level (court of appeal) includes all county public prosecutors (heads of the county prosecutors' offices) and their deputies. The number of prosecutors at the supreme court level includes the Public Prosecutor General and his deputies.

Cyprus

Q055 (2023): The data should be interpreted in the light of the fact that in the Criminal section of the Legal Service of the Republic there are both counsels of the Republic as well as public prosecutors, who are in charge of handling criminal cases before the Criminal Courts. Only the number fo public prosecutors is communicated in the table.

Q055 (2022): More positions have been filled.

Q055 (2020): The number includes also legal advisors to the Attorney General's office.
The number increased because more positions of prosecutors were approved.

Q055 (2014): All prosecutors appear before all courts.

Czech Republic

Q055 (General Comment): The Czech Republic is endowed with a system of 4 levels of State prosecution offices: district, regional, high and supreme. The number of high public prosecutors is included in the number of prosecutors at second instance level.

Denmark

Q055 (2023): The number is the actual number of employees in fulltime equivalent as of December 2023. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number regarding December 31st. Therefore the number is drawn for December 1st 2023 and scaled up to a full year.
The data on the number of employees in The Danish Prosecution Service and how they are distributed, is registered through a database, Polpai, containing all employees in the Danish Police and The Danish Prosecution Service.

Q055 (2022): The number is the actual number of employees in fulltime equivalent as of December 2022. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2022 and scaled up to a full year.

Q055 (2021): The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire. This is why the total number of prosecutors does not add up when compared to the number of males and females.

Q055 (2016): The observed discrepancies are due to ordinary changes in staffing.

Q055 (2014): The variations over the period 2012-2014 are due to the fact that in 2012, information was missing about prosecutors engaged in tasks concerning administrative cases (Ledelsessekretatiat) and prosecutors employed by the national police (Rigspolitiet).

Estonia

Q055 (General Comment): The categorization of questions 55 and 56 regarding public prosecutors do not exist in Estonia.

Finland

Q055 (General Comment): The National Prosecution Authority comprises the Office of the Prosecutor General that acts as the general administrative unit, and five prosecution districts: Southern Finland, Western Finland, Northern Finland, Eastern Finland and Åland. The National Prosecution Authority has 34 offices around Finland. The Prosecutor General is the supreme prosecutor and the head of the prosecution service. The Prosecutor General directs and develops prosecutorial activity by issuing general instructions and guidelines to the prosecutors. She/he also appoints district prosecutors. The Prosecutor General may take over a case from a prosecutor, but cannot order a prosecutor to decide the case in any given manner. She/he can also self-decide on the bringing of charges and designate a prosecutor to pursue the case in the courts. The Deputy Prosecutor General decides the matters in his/her competence on the same authority as the Prosecutor General. He/she also acts as a deputy for the Prosecutor General when necessary. For regular prosecutorial tasks, the Office of the Prosecutor General has state prosecutors whose jurisdiction covers the entire country. Most criminal matters (about 91 3000 cases annually) are dealt with by the prosecution areas. The Office of the Prosecutor General deals mainly with criminal cases with wider significance to society as a whole, a few dozen every year. Prosecutors in Finland are not bound on Court instances, and every prosecutor is expected to, in a normal situation, to handle and prosecute the criminal case all the way to the Supreme Court, if needed.

Q055 (2023): All Finnish prosecutors have jurisdiction on first and second court instance. Only the Prosecutor General has jurisdiction on Supreme Court level and can assign a prosecutor to handle a case on Supreme Court level.

Q055 (2020): Prosecutors in Finland are not bound on Court instances.

France

Q055 (2023): These figures correspond to all public prosecutors in the public prosecution services, excluding court presidents and heads of court.
In first instance courts, the total is 1 892 (843 men / 1 049 women). At first instance, 430 “délégués du procureur”, including 72 women and 358 men, carry out functions comparable to those of public prosecutors. The increase in the number of first instance prosecutors compared with 2022 is due to the inclusion of the “délégués du procureur” in 2023.

Q055 (2021): Data taken from an extraction of the LOLFI SIRH - Number of public prosecutors on 31/12/2021. The values are expressed in FTEs.
Source DSJ
The data have been rounded upwards from 0.5 and downwards below, with the exception of the data relating to the number of male prosecutors at the Courts of appeal (the exact figure is 249.6) in order to ensure vertical consistency.

Q055 (2020): Only the judicial order is concerned

Q055 (2014): For 2014, State prosecutors, heads of public prosecution services, are included.

Germany

Q055 (General Comment): The information relates to the number of job shares for public prosecutors. The information on the job shares count a public prosecutor working full-time as 1. A public prosecutor working part-time is counted as the fraction of 1 which corresponds to the proportion of his/her working hours to full-time (e.g. 0.5 for a public prosecutor working half the usual number of hours).

Q055 (2023): 1.: Data is taken from the court staff statistic of the federal states and represents the number of public prosecutors (FTE) at the regional courts as of 31. December 2023
2. Data is taken from the court staff statistic of the federal states and represents the number of public prosecutors (FTE) at the higher regional courts as of 31. December 2023
3. Data is taken from the biannual juducial statistic and represents number of public prosecutors (FTE) at the Federal Court of Justice as of 31. December 2022

Q055 (2022): 1.: Data is taken from the court staff statistic of the federal states and represents the number of public prosecutors (FTE) at the local and regional courts as of 31. December 2022
2. Data is taken from the court staff statistic of the federal states and represents the number of public prosecutors (FTE) at the higher regional courts as of 31. December 2022
3. Data ist taken from the court staff statistic and represents number of public prosecutors (FTE) at the Federal Court of Justice.

Q055 (2021): Figures represent full-time equivalents as of 31. December 2021
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a 'Pact for the Rule of Law'. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
It should be noted that one of goals of the 'Pact for the Rule of Law' is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q055 (2020): Figures represent full-time equivalents as of 31. December 2020
"Pact for the Rule of Law" (Pakt für den Rechtsstaat):
The federal level and the Länder on 31 January 2019 agreed on a 'Pact for the Rule of Law'. The pact foresees additional funding of EUR 220 million from the federal level for the Länder to create 2000 additional posts for judges and prosecutors, including the necessary administrative staff by 31 December 2021. In addition, the federal level is creating 24 additional posts at the Federal Court of Justice and 71 posts at the Prosecutor General of the Federal Court of Justice. New posts that were created after the beginning of 2017 are included into the count.
A joint report by the Federal Government and the Länder on the state of implementation of the pact was presented on 10 June 2021. The report concluded that the implementation has well progressed, noting in particular that over 2 700 post for judges and prosecutors have been created so far, with 2 500 being filled.
It should be noted that one of goals of the 'Pact for the Rule of Law' is to address the challenges related to the upcoming wave of retirements of judges and public prosecutors.

Q055 (2016): Figures indicate the number of full-time equivalent staff (not the number of individuals). A prosecutor working full hours is counted as a full-time equivalent (i.e. 1). A prosecutor working part-time is counted as a fraction of 1. This fraction corresponds to the number of hours worked in relation to a full-time equivalent (e.g. 0.5 for a prosecutor working half the usual number of hours).

Greece

Q055 (2021): The above data are given by the Directorate of organization and operation of Justice with the cooperation of JUSTSTAT.

Q055 (2020): Positions by law have increased.Gender data are not kept.

Hungary

Q055 (2023): On 31 December 2023 2 prosecutors (1 male and 1 female) were working temporarily in the Ministry of Justice. These two persons were also included in the total number of prosecutors, but they were not taken into consideration when looking at the number of prosecutors working at each/different level.
All prosecutors are appointed to work full-time, but it may occur that a prosecutor temporarily works part-time, for child care reasons for example.
As far as prosecutors at first instance level are concerned, the table contains the number of prosecutors working for district and district level prosecution offices together with the number of prosecutors working for chief prosecution offices. Out of this number, the number of prosecutors working at chief prosecution offices is 544 (239 men and 305 women), the number of prosecutors working for district (district level) prosecution offices is 1,166 (408 men and 758 women).
As to the number of prosecutors at second instance, the table includes only the number of prosecutors working at the appellate chief prosecution offices.
The reason for this is that no exact answer can be given to the question. In the Prosecution Service of Hungary, prosecutors working at district and district-level prosecution offices only proceed with first instance cases. Prosecutors of chief prosecution offices working at county (or county-level) prosecution offices handle first instance cases which fall into the jurisdiction of regional/county courts, but part of the prosecutors of chief prosecution offices handle cases at second instance or at second instance, as well in cases initiated at first instance by district or district prosecution offices. Our personnel database, however, does not contain information on the number of such prosecutors of chief prosecution offices.
Prosecutors of the appellate chief prosecution offices handle second instance cases or, in specific circumstances, they proceed at third instance.
Discrepancy explanation:
The explan

ation for the increase in the number of female prosecutors serving in the Chief Prosecution Offices of Appeal, which can be considered significant in percentage terms, is the overall low number of prosecutors in the Chief Prosecution Offices of Appeal, with a small increase in numbers resulting in a large change in percentage terms. The increase in the number of staff was justified by the evolution of the workload in the relevant Chief Prosecution Offices of Appeal, as well as by the need to recruit new colleagues in the Chief Prosecution Offices of Appeal due to retirements and transfers. The proportion of women among prosecutors serving at the Prosecution Service of Hungary is already high, 61.3% in 2023. In these circumstances, there is no particular reason why more women were successful in applying for or being seconded to posts as prosecutors in the Chief Prosecution Offices of Appeal in 2023.

Q055 (2022): On 31 December 2022 2 prosecutors were working temporarily in the Ministry of Justice. These two persons were also included in the total number of prosecutors, but they were not taken into consideration when looking at the number of prosecutors working at each/different level. One of the two public prosecutors assigned to the Ministry of Justice is male and the other one is female. All prosecutors are appointed to work full-time, but it may occur that a prosecutor temporarily works part-time, for child care reasons for example. As far as prosecutors at first instance level are concerned, the table contains the number of prosecutors working for district and district level prosecution offices together with the number of prosecutors working for chief prosecution offices. Out of this number, the number of prosecutors working at chief prosecution offices is 534 (236 men and 298 women), the number of prosecutors working for district (district level) prosecution offices is 1203 (421 men and 782 women).
As to the number of prosecutors at second instance, the table includes the number of prosecutors working at the appellate chief prosecution offices. The reason for this is that no exact answer can be given to the question. In the Hungarian Prosecution Service, prosecutors working at district and district-level prosecution offices only proceed with first instance cases. Prosecutors of chief prosecution offices working at county (or county level) prosecution offices handle first instance cases which fall into the jurisdiction of regional/county courts, but part of the prosecutors of chief prosecution offices handle cases at second instance or at second instance as well in cases initiated at first instance by district or district prosecution offices. Our personnel database, however, does not contain information on the latter group of cases. Prosecutors of the appellate chief prosecution offices handle second instance cases or, in specific circumstances, they proceed at third in

stance. I wish to inform you that prior to 2022 we only indicated among the data the number of prosecutors of dictrict prosecution offices at first instance and the number of prosecutors of chief prosecution offices and appellate chief prosecution offices at second instance. According to this method of calculation, the current data (for 31 December 2022) include the following:
Total number of prosecutors (1 + 2 + 3):
Total: 1874
Males: 727
Females: 1147
1. Number of prosecutors at first instance level:
Total: 1203
Males: 421
Females: 782
2. Number of prosecutors at second instance (court of appeal) level:
Total: 562
Males: 251
Females: 311
3. Number of prosecutors at Supreme Court level:
Total: 107
Males: 54
Females: 53

Q055 (2021): On 31 December 2021, two prosecutors were serving in the Ministry of Justice, on a temporary basis. They are included in the total number of prosecutors; however, they are not taken into account when giving the number of prosecutors serving at different instances (court levels). All prosecutors are appointed to a full-time job; however, it occurs that some prosecutors perform part-time service on a temporary basis for various reasons, such as raising children.
The 'number of prosecutors at first instance level' is an aggregate of the number of prosecutors serving at district-level prosecution services and other prosecution services equivalent to that level, as well as the number of prosecutors serving at high prosecution services. A part of the prosecutors serving at high prosecution services proceed also at second instance (high court) level. The number of prosecutors serving at high prosecution services is 520 (226 males, 294 females), while the number of prosecutors serving at district-level prosecution services (other prosecution services equivalent to that level) is 1210 (439 males, 771 females).
The 'number of prosecutors at second instance (court of appeal) level' means the number of prosecutors serving at appellate prosecution services.

Q055 (2016): Another 9 prosecutors were temporarily serving in the Ministry of Justice. They are included in the total number of prosecutors, but we did not take them into account at each level.

Ireland

Q055 (General Comment): Allocation of prosecutors work is not in all instances divided as per the questions above. The sub-categories at 1, 2 and 3 of the question posed do not apply in the Irish system.The total figure includes the head of the Prosecution Office provided in Q056 as the Director can assume the role and functions of prosecutors in his/her office.

Q055 (2023): The Office has a number of grades for prosecutors which are different from the categories above, they include Prosecutor, Senior Prosecutor, Principal Prosecutor, Senior Principal Prosecutor, Assistant Director of Public Prosecutions and Deputy Chief Prosecutor. There is one Director of Public Prosecutions and one Deputy Director of Public Prosecutions. The total figure of 156 includes the head of the Prosecution Office provided in Q056 as the Director can assume the role and functions of prosecutors in her office.

Q055 (2022): The Office has a number of grades for prosecutors which are different from the categories above, they include Prosecutor, Senior Prosecutor, Principal Prosecutor, Senior Principal Prosecutor, Assistant Director of Public Prosecutions, Deputy Chief Prosecutor. There is one Director of Public Prosecutions and one Deputy Director of Public Prosecutions

Q055 (2020): Our court going staff number at the 31st December 2020 is 128 - (50 male / 78 female). This figure includes our Prosecutors and Technical staff - Legal Executive. It also includes 1 Trainee Solicitor. In our Office our Technical Staff and Trainee Solicitors are court going staff and manage the running of a prosecution at trial in the same manner as some of our Prosecutors. In relation to the increase in staff resources for the ODPP, and the context for same, please see the forewords of our Annual Report 2020 and our Annual Report 2019 available at https://www.dppireland.ie/publication-category/annual-reports/.

Q055 (2018): There were 108.7 fulltime equivalent lawyers (fte) (headcount 111) on the payroll of the Office of the Director of Public Prosecutions at 31 December 2018 – 65.6 fte (67 headcount) of these were female and 43.1 fte (44 headcount) were male.

Q055 (2016): Of the staff complement in the Office of the Director of Public Prosecutions at the end of the reference year, 102 were of professional or technical grade at Prosecutor equivalent level or above.

Q055 (2014): Parts' of Full Time Equivalents were counted in decimal figures and have been rounded up. The total represents the number of qualified Solicitors and Barristers employed directly in the Office of the Director of Public Prosecutions (DPP). A proportion of these lawyers represent the DPP in the District Court. Members of the police force also prosecute in this court within a prescribed 'delegated authority' from the DPP. Members of the independent Bar act on behalf of the DPP, on a self-employed basis, in first instance and appellate courts. There are a further 32 State Solicitors contracted to provide a solicitor service to the DPP in cases heard outside of the capital.

Italy

Q055 (2016): There is no specific explanation concerning the increase in the total number of prosecutors at Supreme Court level. However, numbers are small and therefore percentage changes vary more harshly.

Latvia

Q055 (2023): Data corresponds to the actual situation. The data are correct for 2023. The mistake is in the data for 2022. The number of prosecutors at SC level for 2022 are 51 (27 males and 24 females).

Q055 (2020): The increase in the number of prosecutors in court district level prosecutor's offices is related to the imposition of an obligation on the prosecutor of the court district level prosecutor's office, and not on the chief prosecutor of the district (city) prosecutor's office to perform the duties of a higher prosecutor.
Regarding the decrease in the number of women working in the Prosecutor General's Office, it must be concluded that in total the number of women working has decreased by 8 persons. One of the reasons could be reaching the maximum age for performing the duties prescribed by law or the death of a person.

Lithuania

Q055 (2020): After the reorganization of the prosecution service in 2011, 5 second instance prosecutors' offices were merged with 51 separate first instance prosecutor's office in their area of operation, and thus 5 regional first-second instance prosecutor's offices were established.

Q055 (2014): In 2012, the 56 territorial prosecutor's offices have been reorganised into 5 regional prosecutor's offices with 10 district prosecutor's offices functioning inside them (first instance and second instance levels have been combined). Currently, only two instances exist.

Luxembourg

Q055 (General Comment): The figure in point 3 includes both second instance and Supreme Court prosecutors, as they are grouped together in the Superior Court of Justice, which is subdivided into the Court of Appeal and the Court of Cassation.

Q055 (2022): Since the 2020-2022 Evaluation, the General Prosecutor's Office has seen an increase of two female prosecutors and a male prosecutor has been replaced by a female prosecutor following retirement. The decrease of -28.57% in male prosecutors at the Supreme Court and the 50% increase in female prosecutors at the Supreme Court can be attributed to this.

Q055 (2018): Le personnel des juridictions judiciaires et administratives a connu une croissance soutenue ces dernières années, tel que prévu par la loi modifiée du 7 mars 1980 sur l'organisation judiciaire. Ceci explique les variations importantes observées entre 2016 et 2018 au niveau du personnel de la magistrature et du personnel non-juge. Les magistrats appartenant à la cellule de renseignement financier (CRF) sont dorénavant exclus de la question 55.1 (suite au détachement de la CRF du Parquet de Luxembourg) puisqu'ils n'exercent plus de fonction juridictionnelle proprement dite. Au total, la CRF compte 4 magistrats et un attaché de justice en 2018. L'effectif du Parquet d'arrondissement reste toutefois inchangé suite à la création des nouveaux postes affectés à la CRF
Les magistrats du pool de complément sont inclus dans les chiffres de la question 55.3.

Q055 (2016): The number of prosecutors indicated here as working at the Supreme Court corresponds to the number of prosecutors working at the Superior Court of Justice (which includes prosecutors intervening at the Court of Appeal and Court of Cassation level).

Q055 (2014): The number of male public prosecutors decreased between 2012 and 2014, while the number of female public prosecutors increased for the same period. These variations have for sole explanation the normal progress of career of magistrates of the public prosecution office at first instance.

Malta

Q055 (General Comment): All the lawyers working in the Office of the AG prosecute cases in the criminal courts, but it is not possible, to distinguish between 1st and 2nd Instance Courts. All full-time lawyers have been included in the above figure except the AG herself.

Q055 (2023): The increase in the number of prosecutors follows a recruitment drive throughout 2023

Q055 (2022): The increase in the number of prosecutors is the result of a recruitment drive that was carried out in 2022.

Q055 (2020): The increase in the number of lawyers working at the Office of the AG follows the reform in 2020 whereby the AG has taken up exclusively the role of prosecutor general (the advisory role to government has been vested in the State Advocate). Given this special focus, the Office of the AG has been recruiting more lawyers in order to meet the case demands of the courts.

Q055 (2016): All the lawyers at the Office of the Attorney General work both in Court as well as advisers to the various Ministries and Departments. All prosecuting officers at the Office of the Attorney General act at all court levels. Thus, prosecutors are not classified according to the case instance.

Q055 (2014): These past few years there has been an increase in the number of female law graduates, which will definitely reflect in the employment trends within this sector.

Netherlands

Q055 (General Comment): The Dutch Supreme Court does not have public prosecutors. The office of the Procurator General and Advocates General at the Dutch Supreme Court is separate from Dutch public prosecution and the Ministry of Justice. They have a different function.

Q055 (2020): The Supreme Court does not have (public) prosecutors. The office of the procurator general and attorneys general that the Supreme Court houses, is separate from the public prosecution and does not function as prosecution. They have a different function.

Q055 (2016): total 927,5 358,12 569,38
1 842,25 312,72 529,53
2 85,25 45,40 39,85

Q055 (2014): For 2014, the number of prosecutors at first instance level includes 8 prosecutors who are still in education (7 females; 1 male). Prosecutors at Supreme Court level are not employees of the National Prosecution Service and therefore not included in the total.

Poland

Q055 (General Comment): The general organisational units of the public prosecutor's office are: National Prosecutor's Office , regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices.

Q055 (2023): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. In contrast, under item 3 is the number of prosecutors in the position of prosecutor of the National Prosecuting Authority. The total is higher than the sum of the sub-categories, as it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 420 prosecutors (158 women and 262 men), as pursuant to Article 16 of the Act of 28 January 2016 - Law on Public Prosecutor's Office (Journal of Laws of 2024, item 390), the common organisational units of the public prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices. All items (1 - 3) include military prosecutors, of whom 90 are employed at the district prosecutor's office level, including 67 men and 23 women; at the regional prosecutor's office level, 50, including 39 men and 11 women; and at the National Prosecutor's Office, 19 military prosecutors (13 men and 6 women). In regional prosecutors' offices, prosecutors for military affairs do not perform official duties.
The table in question does not, therefore, provide an opportunity to illustrate the full structure of the public prosecutor's office in Poland, which, in accordance with the above-mentioned provision of the Law on the Public Prosecutor's Office, consists of four levels. In regional prosecutors' offices, prosecutors for military affairs do not perform official duties.

Q055 (2022): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. In contrast, under item 3 is the number of prosecutors in the position of prosecutor of the National Prosecuting Authority. The total is higher than the sum of the subcategories because it includes the number of prosecutors employed in regional prosecutor's offices - a total of 399 prosecutors (156 women and 243 men), as, pursuant to Article 16 of the Act of 28 January 2016 - Law on the Public Prosecutor's Office (Journal of Laws of 2023, item 1360), the common organisational units of the public prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices.
The table in question does not, therefore, provide an opportunity to illustrate the full structure of the public prosecutor's office in Poland, which, in accordance with the above-mentioned provision of the Law on the Public Prosecutor's Office, consists of four levels. All items (1 - 3) include military prosecutors, of whom 86 are employed at the district prosecutor's office level, including 61 men and 25 women; 48 at the circuit prosecutor's office level, including 38 men and 10 women; and 16 military prosecutors (12 men and 4 women) at the National Prosecutor's Office. In regional prosecutors' offices, prosecutors for military affairs do not perform official duties.

Q055 (2021): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. In contrast, under item 3 is the number of prosecutors in the position of prosecutor of the National Prosecuting Authority. The total is higher than the sum of the sub-categories, as it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 402 prosecutors (154 women and 248 men), as, pursuant to Article 16 of the Act of 28 January 2016 - Law on the Public Prosecutor's Office (Journal of Laws of 2022, item 1247), the common organisational units of the public prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices.
All items (1 - 3) include military prosecutors, of whom 77 are employed at the district prosecutor's office level, including 19 women and 58 men; at the regional prosecutor's office level, 45 military prosecutors, including 9 women and 36 men; and at the National Prosecutor's Office, 17 military prosecutors (4 women and 13 men).

Q055 (2020): The table under item 1 contains the number of district prosecutors and under item 2 the number of circuit prosecutors. Whereas under item 3 is the number of prosecutors in the position of a prosecutor of the National Prosecutor's Office. The total is higher than the sum of the subcategories because it takes into account the number of prosecutors employed in regional prosecutor's offices - a total of 391 prosecutors (151 women and 240 men), since according to Article 16 of the Law of 28 January 2016 - Law on Prosecutor's Office (Journal of Laws of 2021, item 66) the common organizational units of the prosecutor's office are: National Prosecutor's Office, regional prosecutor's offices, circuit prosecutor's offices and district prosecutor's offices. For 2020, all items (1-3) include prosecutors for military matters, who at the level of the district prosecutor's office are employed by 85, including 22 women and 63 men; at the level of the regional prosecutor's office - 38 prosecutors for military matters, including 8 women and 30 men, and at the National Prosecutor's Office - 13 prosecutors for military matters (2 women and 11 men).

Q055 (2018): Within the organizational structure of general organizational units of the prosecution office, there are Appellate Public Prosecutor’s Offices, which function as a third rank and employ altogether 367 prosecutors (149 women and 224 men). Additionally, 65 prosecutors of military affairs (including 16 women and 49 men) are employed at the level related to the Regional Public Prosecutor’s Office; 30 prosecutors of military affairs (including 6 women and 24 men) - at the level related to the District Public Prosecutor’s Office, and 5 prosecutors of military affairs (5 men) - in the National Public Prosecutor’s Office.

Portugal

Q055 (General Comment): The communicated data encompasses the number of magistrates of the Public Prosecution Service in courts of first instance, second instance and high superior courts, except the Constitutional Court.

Q055 (2023): Q55.2. The increase in the number of female prosecutors in 2023 compared to 2022 is in line with the steady growth in the number of female prosecutors in recent years.

Q055 (2022): The discrepancy rate is due to small numbers

Q055 (2020): No specific explanation for the numbers above.

Q055 (2018): In absolute terms the decrease from 2016 to 2018 is from 7 to 5 female prossecutors, which is not significative in absolute terms, but acquires a more relevant expression in relative terms.

Romania

Q055 (General Comment): In Romania there are four level of courts/prosecution offices attached to these courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q055 (2023): 3. The vacancies caused by retirements were followed by a series of competitions for positions in PICCJ, DNA, and DIICOT. As a result of these competitions, the gender balance shifted.

Q055 (2018): In Romania there are four level of courts/prosecution offices attached to these courts (first instance courts, tribunals, courts of appeal and the High Court of Cassation and Justice). In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q055 (2014): The prosecutor’s offices are established in the following hierarchy: the prosecutor’s offices attached to the courts of law (point 1 of the table), the prosecutor’s offices attached to tribunals and prosecutor’s offices attached to the courts of appeal (point 2), and the Prosecutor’s Office attached to the High Court of Cassation and Justice (point 3).

Slovenia

Q055 (General Comment): The number is reported in FTE.
Selection process in the procedure for appointing state prosecutors with the formation of a final opinion is in the competence of the State Prosecutor's Council (an independent state body). State prosecutors are appointed by the government.
In Slovenian criminal justice system state prosecutors are exclusively authorized to conduct public prosecution in criminal matters on behalf of society and in the public interest. The Constitution and law guarantee autonomy in status and functioning of state prosecutors. Decisions made by the state prosecutor shall not be interfered with, except by way of general instructions and assigning of a case in the manner determined by the law. Slovenian state prosecutors perform their function in 13 organizational units – prosecution offices. There are 11 District State Prosecutor's Offices and one Specialized State Prosecutor's Office of The Republic of Slovenia, where local, district and senior state prosecutors are positioned. At The Office of the Prosecutor General of the Republic of Slovenia supreme state prosecutors and State Prosecutor General perform their functions. Here are also some state prosecutors of lower ranks assigned to perform demanding professional tasks.
There are no higher state prosecutor's offices as the proceedings before the courts of appeal are governed by the district prosecutor's offices. According to the State Prosecution Service Act prosecutors with the rank of at least local state prosecutor may represent a case before local courts, prosecutors with the rank of at least district state prosecutor may represent a case before district courts, prosecutors with the rank of at least senior state prosecutor may represent a case before higher courts and only supreme state prosecutors may represent a case before the supreme court. Local state prosecutors may also appear before district courts if authorized by the head of state prosecutor's office for certain categories of matters, fo

r a particular matter, for certain categories of procedural acts or for a particular procedural act. Local and district prosecutors may in their cases appear along with a senior prosecutor before the courts of appeal if authorized by the head of an appellate division of the state prosecutor's office for a particular case. Senior and supreme state prosecutors are competent to represent a case also before first instance courts.
In the context of question 55 we counted local and district prosecutors as prosecutors at first instance level, senior prosecutors as prosecutors at second instance level and supreme prosecutors as prosecutors at Supreme Court level without regard of the rang of court before they perform their function in fact or if they are assigned to other institution for a limited period of time (e.g for the administration of State Prosecutorial Council).

Q055 (2023): Numbers are reported in FTE and rounded-up to whole numbers.

Q055 (2022): The number is reported in FTE format. The total gross number of state prosecutors is 210.
An increase in number of higher and supreme state prosecutors is due to the slow/stalled procedures for appointment of candidates at the government in 2020 and 2021 (in 2022, some candidates that applied in 2018, 2019 and 2020 were appointed.)

Q055 (2021): Before 2021, data was reported in gross numbers. For 2021 data, the FTE format is observed.
The above data does not include six State prosecutors who perform other duties (assigned to The Council of State Prosecutors, appointed to Eurojust, the European Public Prosecutor and the European Delegate Prosecutor).

Q055 (2020): The information is in form of gross data. According to the methodology used for reporting judges and court staff (FTE) – by which part-time employees are converted to full-time time by the calculation of working hours, the number amounts to 193, as a number of prosecutors are not working full time.

Q055 (2016): Slovenian state prosecutors perform their function in 13 organizational units. There are 11 district prosecutor's offices and one Specialised State Prosecutor's Office of The Republic of Slovenia, where local, district and higher state prosecutors are positioned. At The Office of the Prosecutor General of the Republic of Slovenia supreme state prosecutors and State Prosecutor General perform their functions. Here are also some state prosecutors of lower ranks assigned to perform demanding professional tasks.
There are no higher state prosecutor's offices as the proceedings before the courts of appeal are governed by the district prosecutor's offices. According to the State Prosecutor Act prosecutors with the rank of at least local state prosecutor may represent a case before local courts, prosecutors with the rank of at least district state prosecutor may represent a case before district courts, prosecutors with the rank of at least higher state prosecutor may represent a case before higher courts and only supreme state prosecutors may represent a case before the supreme court. Local state prosecutors may also appear before district courts if authorized by the head of a state prosecutor's office for certain categories of matters, for a particular matter, for certain categories of procedural acts or for a particular procedural act. According to amendment of legislation in 2015 local and district prosecutors may in their cases appear along with a higher prosecutor before the courts of appeal if authorized by the head of an appellate division of the state prosecutor's office for a particular case. Higher and supreme state prosecutors are competent to represent a case also before first instance courts.
In the context of question 55 we counted local and district prosecutors as prosecutors at first instance level (164), higher prosecutors as prosecutors at second instance level (42) and supreme prosecutors as prosecutors at Supreme Court level (11) without regard of the r

ang of court before they perform their function in fact or if they are assigned to other institution for a limited period of time (e.g for the administration of State Prosecutorial Council). The information is in form of full-time equivalent.

Q055 (2014): In November 2011, the new State Prosecutor Act came into force. It dissolved the special department of the Office of the State Prosecutor General, responsible for the 2d instance level. Proceedings before courts of appeal are now governed by the 4 State circuit prosecutor offices in towns where the higher courts are located. Prosecutors are organised in 12 offices (11 circuit offices and one Specialised State Prosecutor's Office, where circuit and higher prosecutors work) and the Supreme State Prosecutor Office (where supreme State prosecutors and the general State prosecutor work). The function "assistant State prosecutor" changed in "local State prosecutor". The Specialised State Prosecutor's Office for dealing with the most severe criminal offences was established.

Spain

Q055 (General Comment): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories.
Article 34 of Law 50/1981, (Organic Statute of the Public Prosecutor's Office) distinguishes three categories:
1st Chamber Prosecutors of the Supreme Court, equal to Magistrates of the High Court. The Deputy Prosecutor of the Supreme Court will be considered the President of the Chamber.
2nd Prosecutors, equated to Magistrates.
3. Lawyers-Prosecutors, equated to Judges.

Q055 (2023): As mentioned in previous exercises, the structure of the Prosecution service does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First category ("Fiscales de Sala") Prosecutor of Chamber: Total 36, Males 21, Females 15(this category includes the Prosecutors of chamber of Supreme Court).
Second category: "Fiscal": Total 1944, Males 706, Females 1238 Third category: "Abogado-Fiscal": Total 770, Males 183, Females 587
Source: Ministry of Presidency, Justice and Relations with the Parliament.

Q055 (2022): As mentioned in previous exercises, the structure of the Prosecution service does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category ("Fiscales de Sala") Prosecutor of Chamber: Total 40, Males 26, Females 14 (this category includes the Prosecutors of chamber of Supreme Court).
Second. "Fiscal": Total 1908, Males 704, Females 1204
Third: "Abogado-Fiscal": Total 771, Males 187, Females 584

Q055 (2021): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category ("Fiscales de Sala") Prosecutor of Chamber: Total 32, Males 21, Females 11 (this category includes the Prosecutors of chamber of Supreme Court).
Second. "Fiscal": Total 1825, Males 701, Females 1124
Third: "Abogado-Fiscal": Total 774, Males 178, Females 596

Q055 (2020): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, First category ("Fiscales de Sala del Tribunal Supremo") Supreme Court Prosecutor of Chamber: Total 33, Males 26, Females 7
Second. "Fiscal": Total 1830, Males 700, Females 1130
Third: "Abogado-Fiscal": Total 681, Males 158, Females 523

Q055 (2018): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First, Total 33, Males 26, Females 7
Second) Total 1779, Males 696, Females 1083
Third) Total 653, Males 161, Females 492

Q055 (2016): The structure of the Prosecution services does not distinguish prosecutors by 'instance level'.
However, it distinguishes three categories: First) Total 25, Males 19, Females 6
Second) Total 1826, Males 738, Females 1088
Third) Total 622, Males 155, Females 467

Question 056

Austria

Q056 (General Comment): Data are presented in full time equivalent.

Q056 (2023): Starting from 2022, the data provided in the table correspond to persons who exercise the function of head of prosecution office. Previous data were expressed in FTE.

Q056 (2022): Starting from 2022, the data provided in the table correspond to persons who exercise the function of head of prosecution office. Previous data were expressed in FTE.

Q056 (2014): The numerical values provided are rounded. The accurate figures are: total – 26,64 (16,79 males/9,85 females); heads of prosecution offices at first instance level – 19,60 (12,50 males/7,10 females); heads of prosecution offices at second instance level – 6,49 (3,89 males/2,60 females); heads of prosecution offices at Supreme Court level – 0,55 (0,40 males/0,15 females).

Belgium

Q056 (General Comment): The Prosecutor General Office and the Auditor General Office constitute the public prosecution services at the Court of Appeal and the Labor Court, respectively. The Attorney General heads both of them.

Q056 (2014): In 2014, the number of first instance prosecutors' offices and prosecution offices within labour courts was reduced, resulting in a decrease in the number of heads of prosecution services. The decrease between 2012 and 2014 in the number of court presidents and heads of prosecution offices in first instance (male and female) is due to the reform of the judicial map concerning first instance courts.

Bulgaria

Q056 (2023): The process of merging the district prosecutor's offices ended on July 27, 2022. Starting from this date the number of first instance public prosecution offices is 34.

Q056 (2020): In the provided in the previous cycle 2018-2020 the information on the total number of administrative heads, instead of the indicated figure 133 (one hundred and thirty-three), the figure should be 153 (one hundred and fifty-three). The difference is probably due to a technical error or to the provision of the actual number of incumbents, without reflecting the persons appointed to perform the functions of administrative heads. Due to the impossibility to establish the real cause, information on the data in the individual columns cannot be given.
The data provided (cycle 2020-2022) comply with the instructions on question № 056 in the explanatory note to the scheme for evaluation of judicial systems, ie. there are also the persons who have been appointed to perform the functions of administrative heads due to the lack of a holder of the position. The optimization performed under Art. 30, para. 2, item 7 of the JSA of the district prosecutor's offices, whereby with decisions of the Plenum of the SJC under protocol № 21 / 19.07.2018 and 20 / 29.07.2019 a total of 39 (thirty-nine) district prosecutor's offices were closed and transformed in territorial divisions as follows:
- 11 district prosecutor's offices, as of 01.01.2019;
- 28 district prosecutor's offices, as of 01.01.2020
Following this transformation, the total number of prosecutors at first instance, respectively their administrative heads, is now 74.
Thus, from the real number of administrative heads cycle (2018 – 2020) - 153, 39 (thirty-nine) administrative heads were removed from the closed district prosecutor's offices, in view of which the total number of heads of prosecutor's offices decreased to 114 (one hundred and fourteen), of which: the number of heads of prosecutor's offices at first instance is 74 (seventy-four), the number of heads of prosecutor's offices at second instance is 39 (thirty-nine), and at the supreme level - 1 (one).

Q056 (2016): 113 adminsitrative heads of Regional Prosecutor`s Offices and 1 Specialized Prosecutor`s Office; 38 are the administrative heads of 28 District Prosecutor`s Offices, 3 Military District Prosecutor`s Offices, 7 Appealte Prosecutor`s Offices; 1 Prosecutor General

Q056 (2014): For 2014, the figure 113 includes heads of regional prosecutors' offices. The figure 41 includes 29 district, 7 appellate and 3 military district prosecutors' offices, the Supreme Prosecutors Office of Cassation and the Supreme Prosecutors Office of Appellate.

Croatia

Q056 (General Comment): The organisational structure of the public prosecution services comprises: the State Attorney of the Republic of Croatia, the Office for Combating Corruption and Organised Crime (USKOK), county State attorneys' offices and municipal State attorneys' offices. The number of public prosecutors' offices has been significantly rationalised. The number of Heads of the State attorneys' offices does not correspond to the number of municipal State attorneys' offices, because in some of these offices the Heads of offices were not appointed and, until such appointment is made, their duties are exercised by their deputies. The number of the first instance State attorneys' offices includes the number of the municipal State attorneys and Head of Office for Combating Corruption and Organised Crime (USKOK).

Q056 (2023): Q56 - The organisational structure of the public prosecution services comprises: the State Attorney of the Republic of Croatia, the Office for Combating Corruption and Organised Crime (USKOK), county State attorneys' offices and municipal State attorneys' offices. The number of public prosecutors' offices has been significantly rationalised.
The number is reduced by those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q056 (2022): The number is reduced by those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Q056 (2020): In 2018, the number of Heads of the State attorneys' offices did not correspond to the number of municipal state attorneys' offices, because in some of these offices the Heads of offices were not appointed. By 2020, they were appointed. Additionally, since 1st of January 2019., 3 new first instance POs were established. The number of the first instance State attorneys' offices includes the number of the municipal state attorneys and Head of Office for Combating Corruption and Organised Crime.

Q056 (2018): In 2018, the organisational structure of the public prosecution in the Republic of Croatia is comprised of the State Attorney of the Republic of Croatia, the Office for Combating Corruption and Organised Crime, 15 county state attorneys' offices and 22 municipal state attorneys' offices. The number of Heads of the State attorneys' offices does not correspond to the number of municipal state attorneys' offices, because in some of these offices the Heads of offices were not appointed. The number of the first instance State attorneys' offices includes the number of the municipal state attorneys and Head of Office for Combating Corruption and Organised Crime.

Q056 (2016): In 2016, the organisational structure of the public prosecution in the Republic of Croatia is comprised of the State Attorney of the Republic of Croatia, the Office for Combating Corruption and Organised Crime, 15 county state attorneys' offices and 22 municipal state attorneys' offices. The number of Heads of the State attorneys' offices does not correspond to the number of municipal state attorneys' offices, because in some of these offices the Heads of offices were not appointed. The number of the first instance State attorneys' offices includes the number of the municipal state attorneys and Head of Office for Combating Corruption and Organised Crime.

Q056 (2014): On 31 December 2014, there were 10 vacancies opened for Heads of State attorneys' offices (2 at the county level, and 8 at the municipal level).

Cyprus

Q056 (General Comment): All heads of prosecution offices can appear before all courts.

Q056 (2023): In the previous cycles the numbers provided were for the whole legal service of the Republic. In this cycle it was possible to isolate the numbers solely for the public prosecution. The two heads of public prosecution services are the Attorney General and the Deputy Attorney General.

Czech Republic

Q056 (2023): The number of females heads of prosecution offices at second instance level has increased from 1 to 3 - it is a desirable trend.

Q056 (2022): The number of females heads of prosecution offices has decreased only from 2 to 1.

Denmark

Q056 (2023): Please note that question 1 is counted as the director of the prosecution service in the 15 different police districts of Denmark, Greenland and the Faroe Islands. Question 2 is the heads of the 3 state prosecutors offices (Copenhagen, Viborg and State Prosecutor for Special Crime). Question 3 is the Director of Public Prosecutions (Rigsadvokaten).

Q056 (2022): Please note that number 1 is counted as the director of the prosecution service in the 15 different police districts of Denmark, Greenland and the Faroe Islands. 2 is the heads of the 3 state prosecutors offices (Copenhagen, Viborg and State Prosecutor for Special Crime). 3 is the Director of Public Prosecutions (Rigsadvokaten).

Q056 (2020): Please note that number 1 is counted as the director of the prosecution service in the 15 different police districts of Denmark. 2 is the heads of the 3 state prosecutors offices (Copenhagen, Viborg and State Prosecutor for Special Crime Unit) 3 is the Director of Public Prosecutions (Rigsadvokaten).

Q056 (2016): The observed discrepancies are due to ordinary changes in staffing.

Estonia

Q056 (General Comment): The categorization of questions 55 and 56 regarding public prosecutors do not exist in Estonia.

Q056 (2020): .

Finland

Q056 (2023): The Prosecutor Authority is a singular organization headed by the Prosecutor General (one individual person). In the answer the Chief Prosecutors of the geographically defined are considered heads of prosecution office as these departments equate the former independent prosecution offices.

Q056 (2020): Prosecutors in Finland are not bound on Court instances.
This number includes the five prosecution districts, the The Prosecutor General and the Deputy Prosecutor General. The number of heads of prosecution offices decreased between 2018 and 2020 due to the re-organization of the prosecution.

Q056 (2018): The Prosecutor General, the Deputy Prosecutor General and 11 heads of the local prosecution offices.
New heads of prosecution offices have been appointed and more of them are females.

Q056 (2016): the Prosecutor-General, the Deputy Prosecutor-General and 11 heads of local prosecution offices

Q056 (2014): For 2014, the total referres to the Prosecutor-General, the Deputy Prosecutor-General and 11 heads of local prosecution offices.

Germany

Q056 (General Comment): The total number of heads of the public prosecution offices is at least the number of Regional Courts (115) plus the number of Higher Regional Courts (24) at which the chief public prosecution offices are located.

Q056 (2023): The figures were calculated based on the number of public prosecution offices (115 public prosecution offices at the Regional Courts, 24 prosecutor general's offices at the Higher Regional Courts, 1 Federal Prosecutor General`s office at the Federal Court of Justice). Generally, each public prosecution office has one head. Nevertheless, this is merely an approximated value, especially since some posts may be vacant. The federal states have reported a total of 136 heads of prosecution offices. Reports on their allocation to gender and to the first and second instance are not yet conclusive.

Q056 (2022): There are no statistics specifically on the number of the heads of public prosecution offices. The figures were calulated based on the number of public prosecution offices (115 public prosecution offices at the Regional Courts, 24 prosecutor general's offices at the Higher Regional Courts, 1 Federal Prosecutor General`s office at the Federal Court of Justice). Generally, each public prosecution office has one head but there might be cases in which two persons working in part time share the position or in which one person (temporarily) is the head of two public prosecution offices.

Q056 (2020): There are no statistics specifically on the number of the heads of public prosecution offices. The figures were calulated based on the number of public prosecution offices (115 public prosecution offices at the Regional Courts, 24 prosecutor general's offices at the Higher Regional Courts, 1 Federal Prosecutor General`s office at the Federal Court of Justice). Generally, each public prosecution office has one head but there might be cases in which two persons working in part time share the position or in which one person (temporarily) is the head of two public prosecution offices.

Q056 (2018): There is no evidence of how many heads of prosecutors there are.
However, since the structure of the public prosecutor's offices (public prosecutor's offices, Attorney General's Office and General
Prosecutor's Office) is the same as that of the courts (District Court, Higher Regional Court, Federal Supreme Court), there are at least as many senior prosecutors as there are courts. The total number of heads of the public prosecution offices is at least the number of Regional Courts plus the number of Higher Regional Courts at which the chief public prosecution offices are located.

Q056 (2016): There is no evidence of how many heads of prosecutors there are. However, since the structure of the public prosecutor's offices (public prosecutor's offices, Attorney General's Office and General Prosecutor's Office) is the same as that of the courts (District Court, Higher Regional Court, Federal Supreme Court), there are at least as many senior prosecutors as there are courts. The total number of heads of the public prosecution offices is at least the number of Regional Courts (116) plus the number of Higher Regional Courts (24) at which the chief public prosecution offices are located.These are currently 140.

Greece

Q056 (2020): Gender data are not kept.

Q056 (2016): The previous data given referred to the heads of prosecution offices, which in Greece is a title (rank) and not to those who are actually in charge of the organization and the management of a Prosecution Office. This year’s data are the correct ones.

Q056 (2014): The 2014 data concerns all prosecutors that possess the rank of "prosecutors", and not only those who are in charge of each prosecutor’s office. The total number of prosecutors in charge of each prosecutor’s office (heads) is 83.

Hungary

Q056 (2023): The table contains the following heads/senior leaders of prosecution offices: the prosecutor general; prosecutors who are heads of departments at the Office of the Prosecutor General and prosecutors who are heads of autonomous divisions at the Office of the Prosecutor General (the latter two groups of employees consist of 14 persons who are exercising employer’s powers with respect to subordinate prosecutorial employees at the Office of the Prosecutor General); appellate chief prosecutors (where there was no appointed or acting appellate chief prosecutor, the head of division at the appellate chief prosecution office in charge of the appellate chief prosecution office); chief prosecutors; prosecutors who are heads of district (or district-level) prosecution offices (in a district prosecution office, there was temporarily no appointed or acting head of district prosecution office, therefore this structural unit was headed by the deputy head prosecutor).
Within the data relating to the Office of the Prosecutor General, the heads of structural units with functional responsibilities (e.g. IT Department, Autonomous Administrative Division) are also indicated.

Q056 (2022): The table contains the following heads/senior leaders of prosecution offices:
the Prosecutor General; appellate chief prosecutors (if there is no appellate chief prosecutor appointed or assigned, then the head of division at the appellate chief prosecution office who leads the appellate chief prosecution office); chief prosecutors (if there is no chief prosecutor appointed or assigned, then the deputy chief prosecutor who leads the chief prosecution office); prosecutors who are heads of district prosecution offices (if there is no leading prosecutor appointed or assigned, then the deputy head of the district prosecution office who leads the organizational unit).
The heads of organizational units with operational responsibilities (such as Information Technology Department and Independent Administrative Unit) are also included in the data of the Office of the Prosecutor General.
As previously indicated, prior to 2022, only the number of public prosecutors at district prosecution offices who handle first-instance cases and the number of public prosecutors at chief prosecution offices and appellate chief prosecution offices who handle second-instance cases were included in the database. According to this calculation method, the data for prosecution leaders as of 31 December 2022 are as follows:
Total number of heads of prosecution offices (1 + 2 + 3 level of jurisdiction)
Total: 151
Males: 91
Females: 60
1. Number of heads of prosecution offices at first-instance level
Total: 124
Males: 70
Females: 54
2. Number of heads of prosecution offices at second-instance (courts of appeal) level
Total: 26
Males: 20
Females: 6
3. Number of heads of prosecution offices at Supreme Court level
Total: 1
Males: 1
Females: 0

Q056 (2013): The number of heads of prosecution offices corresponds to the number of courts of appeal (5) and the number of district courts intervening in second instance (21).

Ireland

Q056 (General Comment): There is only one Office of Public Prosecution in Ireland and the Director of Public Prosecutions is the head of that office.
In fact, the effect of Section 3 (1) of the Prosecution of Offences Act 1974 is to make the Director of Public Prosecutions the prosecuting authority in relation to criminal matters (apart from a very limited number of functions retained by the Attorney General).The daily management of the services are ensured by the Director, the Deputy Director and the Heads of the three Legal Divisions of the Office.

Q056 (2023): For further information regarding the structure of the Office, please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 2.8 to 2.10. (https://www.dppireland.ie/app/uploads/2023/01/Guidelines-for Prosecutors-5th-Edition-eng.pdf)

Q056 (2022): Please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 2.4 to 2.10. (https://www.dppireland.ie/app/uploads/2023/01/Guidelines-for-Prosecutors-5th-Edition-eng.pdf).

Q056 (2020): Please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 2.4 to 2.10.

Italy

Q056 (2022): The percentage of discrepancies is high due to the small absolute value.

Latvia

Q056 (2022): At the end of 2020, a reorganization was launched in the prosecutor's office with the aim of ensuring rational use of state budget funds, as well as creating a more even distribution of prosecutors' workload. During the reform, which also continued in 2021, the work of individual district-level prosecutor's office units was optimized (reduced number of prosecutors offices and number of heads of offices), at the same time prosecutors were also specialized in criminal offenses committed in the service of state institutions, including those related to corruption.

Q056 (2020): The data provides information only about persons performing the duties of head of prosecution office.

Q056 (2018): Data includes the position of the deputy Head Prosecutor, who is also the position of a higher prosecutor in the Prosecutor's Office.

Q056 (2016): Data includes the position of the deputy Head Prosecutor, who is also the position of a higher prosecutor in the Prosecutor's Office.

Q056 (2014): The provided data includes the number of deputy heads of prosecution offices, who are also occupying the higher prosecutor position within the structure of the public prosecution services. The total number of heads of prosecution offices for 2014 is 61 (8 deputy heads), 36 males (3 deputy heads), 25 females (5 deputy heads). The total number of heads of prosecution offices at first instance level is 41 (4 deputy heads), 24 males (2 deputy heads), 17 females (2 deputy heads). The total number of heads of prosecution offices at second instance level is 10 (4 deputy heads), 6 males (1 deputy head), 4 females (3 deputy heads).

Lithuania

Q056 (2022): In 2022, structural changes were implemented (merging of some departments), resulting in a reduction of 10 managerial positions (Chief Prosecutors, Deputy Chief Prosecutors). The number of men and women changes for natural reasons and depends on the gender of the applicants for the position of the Chief / Deputy Chief Prosecutor.

Q056 (2014): In 2012, the 56 territorial prosecutor’s offices have been reorganised into 5 regional prosecutor’s offices with 10 district prosecutor’s offices functioning inside them (first instance and second instance levels have been combined). Currently, only two instances exist. The total number of heads of prosecution offices evolved in the following manner: 2010 – 190; 2011 – 187; January 2012 – 145; May 2012 – 126; September 2012 – 93, December 2013 – 90, December 2014 – 89.

Luxembourg

Q056 (General Comment): The General Prosecution Office at the level of the Superior Court is headed by one General State Prosecutor. There are also two district prosecution offices (Luxembourg and Diekirch), so there are two district prosecutors.

Q056 (2016): 56.1 to 56.3: the heads referred to therein are also taken into account for items 55.1 to 55.3
The number of prosecutors indicated here as working at the Supreme Court corresponds to the number of prosecutors working at the Superior Court of Justice (which includes prosecutors intervening at the Court of Appeal and Court of Cassation level).

Malta

Q056 (General Comment): The Attorney General is the head of the Office of the Attorney General and her role as Head of Prosecution is defined in the Constitution of Malta.

Q056 (2018): The Attorney General is the head of the Office of the Attorney General. He enjoys the support of 2 Deputy Attorney Generals, one dedicated to civil law and the other dedicated to criminal law.

Q056 (2016): The Attorney General is the head of the Office of the Attorney General. His role is that of head of the prosecution as well as principal legal advisor to the government (and its various Ministries and Departments).

Netherlands

Q056 (2016): total 61,44 44,1 17,34
1 59,32 41,98, 17,34
2 2,12 2,12 0

Q056 (2014): The number of heads of prosecution offices at first instance level in 2014 includes 19,77 substitutes (14,54 male/5,23 female). Prosecutors at Supreme Court level are not employees of the National Prosecution Service and therefore they are not included in the total.

Poland

Q056 (2023): Comment refers to the description of structure given in Q055. The table takes into account the heads of regional prosecutor's offices, whose number is 11, including 9 men and 2 women. The figures indicated in the table do not take into account the number of persons serving as deputy heads of prosecution offices at the above levels.

Q056 (2022): Due to the impossibility of filtering the data as at 31.12.2022, the status as at 21.07.2023 r.
The table takes into account the heads of regional prosecutors' offices, whose number is 11, including nine men and two women.
The figures indicated in the table do not take into account the number of persons serving as deputy heads of prosecution offices at the above levels.

Q056 (2020): The sum is higher than the sum of the subcategories because it takes into account the number of heads of regional prosecutor's offices, (whose number is 11, including 9 men and 2 women), since according to Article 16 of the Law of January 28, 2016 - Law on Prosecutor's Office (Journal of Laws of 2021, item 66) the common organizational units of the prosecutor's office are: National Prosecutor's Office, regional prosecutors' offices, circuit prosecutors' offices and district prosecutors' offices. The figures indicated in the table do not take into account the number of persons serving as deputy heads of prosecution offices at the above levels.

Q056 (2018): Universal prosecutorial bodies are: the National Public Prosecutor’s Office, appellate public prosecutor’s offices, regional public prosecutor’s offices and district public prosecutor’s offices. Numerical data determined in the table does not include the number of deputy chief prosecutors related to the prosecution offices at the aforementioned levels.

Q056 (2016): There are several differences between data which were sent in previous campaigns (2014) and above table. Differences could be caused by indicating in previous cycles also vice heads of prosecution offices.

Q056 (2014): Figures provided for 2014 encompass deputy-heads of prosecution offices.

Portugal

Q056 (2023): At the first instance level, the following were counted:
- County District Prosecutors Coordinators (23)
- Director of the Central Department of Criminal Investigation and Prosecution (1)
- Directors of Regional Departments of Criminal Investigation and Prosecution (3)
- Directors of Departments of Criminal Investigation and Prosecution (11)

At the second instance level, the following were counted:
- Regional Prosecutors General (4)
- Administrative and Tax State Prosecutors Coordinators (2)
- Coordinator of the Public Prosecutor’s Office at the Guimarães Court of Appeal (1)

At Supreme Court level, the following were counted the Coordinators of the Public Prosecutor’s Office at the Supreme Court of Justice, at the Administrative Court and at the Court of Audit.

Q056 (2016): Portuguese Official Justice Statistics do not colletct these data.

Romania

Q056 (2022): In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q056 (2020): In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".
The discrepancies in terms of number of heads within the prosecution offices compared to the previous campaign are due to the fact that the leading position mandates have expired within the current period and because of the pandemic situation competitions for filling in these positions could not be organised.

Q056 (2018): In line with our previous reports in this matters, in the table above prosecutors from prosecution offices of the tribunals and of the courts of appeal shall be included in the category "second instance professional prosecutors".

Q056 (2016): As regards the total number of heads of prosecution offices that went from 277 in 2014 to 426 for 2016 data, this may be generated by the fact that the specialised prosecution units (such as the anticorruption and anti organised crime structures) might have not been taken into account. Data may therefore not be comparable.

Without taking into calculation the specialised structures as mentioned above, the number of heads prosecution offices of the Supreme court is 13; if adding the number of heads of prosecution offices of the specialised structures, the number will be as follows: DNA (anticorruption unit) 15 out of which 10 male and 5 female; DIICOT (anti organised crime structure) 51 out of which 28 male and 23 female.

Slovak Republic

Q056 (2014): For 2012 and 2014, only the number of heads of prosecution offices was indicated. There is one head prosecutor for every District prosecution office (54), every Regional prosecution office (8) and the General Prosecutor Office (1). However, on 1 January 2015, there were two vacant positions of heads of district prosecution offices.Besides the head of the prosecution office, the post of chief prosecutor implies also the deputies of every prosecution office, the specialised prosecutor and his/her deputies, the directors and the deputies of sections and departments of the General prosecution Office. For example, in 2014, the total number of prosecutors in chief position was 200 (119 men, 81 women).

Slovenia

Q056 (General Comment): We considered heads of District State Prosecutor’s Offices and Specialized State Prosecutor's Office of The Republic of Slovenia as heads of prosecution office at first instance level. There is no organizational counterpart in the structure of prosecution office to courts of second instance, so the answer is NAP. We considered prosecutor general as the head of prosecution office at supreme court level.

Q056 (2020): The difference is due to small absolute number.

Q056 (2016): The position of the Supreme Court president was not filled on 31. 12. 2016 . The term of the previous president ended during 2016 and new president was not elected until 2017. The new president for the next 6-years-term is male.

Spain

Q056 (General Comment): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
So it is not applicable the cathegories designed by the questionnaire. The Spanish structure distinguishes Heads of offices of the Autonomous Region, Heads of offices of Province, Heads of offices of area.

Q056 (2023): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
Number of Heads of offices of the Autonomous Región: Total 16 (Males 9, Female 7)
Number of Heads of offices of Province: Total 43 (Males 24, Female 19)
Number of Heads of offices of Area: Total 24 (Males 11, Females 13)

Q056 (2022): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
Number of Heads of offices of the Autonomous Región: Total 17 (Males 9, Female 8)
Number of Heads of offices of Province: Total 44 (Males 25, Female 19)
Number of Heads of offices of Area: Total 26 (Males 11, Females 15)

Q056 (2020): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
Number of Heads of offices of the Autonomous Región: Total 17 (Males 12, Female 5)
Number of Heads of offices of Province: Total 44 (Males 27, Female 17)
Number of Heads of offices of Area: Total 27 (Males 8, Females 19)

Q056 (2018): The structure of the Prosecutor's body is adapted to the territorial division of Spain in Autonomous Regions and Provinces.
Number of Heads of offices of the Autonomous Región: Total 17
(Males 11, Female 6)
Number of Heads of offices of Province: Total 44 (Males 30, Female 14)
Number of Heads of offices of área: Total 26 (Males 11, Females 15)

Q056 (2016): Number of Heads of offices of the Autonomous Región: Total 17 (Males 13, Female 04)
Number of Heads of offices of Province: Total 44 (Males 30, Female 14)
Number of Heads of offices of área: Total 27 (Males 10, Females 17)

Question 057

Austria

Q057 (2023): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence); starting from 2022, agents of public prosecutor's offices in training are included in the frame of Q60.

Q057 (2022): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence); starting from 2022, agents of public prosecutor's offices in training are included in the frame of Q60.

Q057 (2020): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence); agents of public prosecutor's offices in training included

Q057 (2018): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence); agents of public prosecutor's offices in training included.

Q057 (2016): The agents of public prosecutor's offices ("Bezirksanwälte") are judicial officers with legal training, and are allowed to act for the public prosecutor's offices under the supervision of a public prosecutor (Quite similar to the "Rechtspfleger", but with a lower range of competence).

Belgium

Q057 (General Comment): It should be noted that the competent prosecutor general may entrust permanently appointed lawyers at the prosecution services with prosecution before police courts in certain cases. This requires an individual order stating the reasons and the approval of the competent general prosecutor (see Article 162 § 2 of the Judicial Code). In addition to these lawyers, criminologists, trainee prosecutors, and candidate prosecutors have functions similar to those of public prosecutors.

Q057 (2023): It should be noted, however, that there are persons who have functions comparable to those of public prosecutors. This possibility is regulated by the Judicial Code. These persons may only carry out their duties on commission from the prosecutor general. They are (406) lawyers acting within public prosecution offices, trainee prosecutors and candidate prosecutors.

Q057 (2016): By a reasoned individual order and after a positive opinion has been given by the competent public prosecutor, permanently appointed public prosecutors may bring a public action before the police court, except in the case of involuntary death as a result of a traffic accident, in so far as they can prove at least two years' seniority as a lawyer in the judiciary.

Cyprus

Q057 (2023): the Attorney General may assign to lawyers the prosecution of certain cases

Q057 (2016): the Attorney General can assign to lawyers the prosecution of certain cases.

Denmark

Q057 (General Comment): Some police officers conduct cases pertaining to minor offences in court, but they carry out this function on behalf of the prosecution service.

Q057 (2018): There is a small number of police officers who conduct cases pertaining to minor offences in court behalf of the prosecution service, but it is only a small part of their normal tasks as a police officer.

Estonia

Q057 (2018): We have assistant prosecutors who act under the guidance of the prosecutor.

Q057 (2016): We have assistant prosecutors who act under the guidance of the prosecutor.

Finland

Q057 (General Comment): The Chancellor of Justice of the Government and the Parliamentary Ombudsman may also prosecute or order that charges to be brought in matters falling within the scope of their supervisory authority. If a prosecutor has decided not to prosecute, the injured party has the right to him/herself bring a charge for the offence in order to have the case heard by a court.

Q057 (2018): If a prosecutor has decided not to prosecute, the injured party has the right to self bring a charge for the offence in order to have the case heard by a court. The Chancellor of Justice of the Government and the Parliamentary Ombudsman may also prosecute or order the charges to be brought in matters falling within the scope of their supervisory authority.

France

Q057 (General Comment): In France there are other persons having similar duties to those of public prosecutors, namely the so called "délégués du procureur". The latter carry out certain tasks of the public prosecutor: implementing alternative measures to criminal prosecution, notifying measures proposed as part of a penal composition, notifying convicted offenders of penal orders, monitoring the implementation of probationary sentences, monitoring the enforcement of penalty sentences, receiving payment of fines imposed by penal order, representing the public prosecutor in territorial bodies.

Q057 (2023): The ”délégués du procureur” carry out functions comparable to those of public prosecutors. They intervene to implement alternative measures to prosecution decided by the public prosecutor for minor offences (reminder of obligations under the law, conditional discontinuation, penal composition). They may also be tasked with issuing summonses to appear in court or criminal orders. They carry out their duties within the premises of first instance courts, courts of appeal or any place of justice designated by the public prosecutor (points of justice, police stations, etc.). As key players in the local justice system, their duties have been extended and diversified as part of the reform to make criminal proceedings more efficient, as set out in decree no. 2020-1640 of 21 December 2020. They can now hold office hours, represent the public prosecutor at meetings of partnership bodies or receive payment of fines.

Q057 (2022): In France there are other persons having similar duties to those of public prosecutors, namely the so called "délégués du procureur". The latter carry out certain tasks of the public prosecutor: implementing alternative measures to criminal prosecution, notifying measures proposed as part of a penal composition, notifying convicted offenders of penal orders, monitoring the implementation of probationary sentences, monitoring the enforcement of penalty sentences, receiving payment of fines imposed by penal order, representing the public prosecutor in territorial bodies.

In 2022, there were 1 004 "délégués du procureur". The number in full time equivalent is 400 and it has been calculated approximately, as they work on a sessional basis.

Q057 (2016): No other person has functions comparable to those of the public prosecutor, the latter being sole in charge of the public prosecution. On the other hand, certain powers may be delegated on an ad hoc basis within a specific framework. Thus, before the police court and the local court which are competent to try contraventions of the first four levels, the functions of the public prosecutor are carried out by an officer of the public prosecutor's office (OMP) in the person of the competent police commissioner in the jurisdiction of these courts.
The prosecutor of the Republic may also designate a representative of the public prosecutor to intervene in the procedure of criminal composition or to remind the perpetrator of the obligations resulting from the law, to direct the perpetrator to a health, social or professional structure or to ask the perpetrator to regularise his/her situation or to compensate the damage resulting from the offence. The prosecutor's delegates may be natural persons or associations. They are empowered to do so by the public prosecutor, must take an oath before the court and are bound by professional secrecy. They submit an annual activity report to the prosecutor.
The prosecutor's delegates are not members of the public prosecutor's office and are not in charge of initiating public prosecutions, unlike the officers of the public prosecutor's office mentioned above. Indeed, the prosecutor's delegates are only competent within the framework of the mission assigned to them for an alternative measure to prosecution in a specific case.

Q057 (2014): Data in FTE is not available for two reasons. On the one hand, deputy prosecutors (about 950) and criminal mediators are involved as delivery agents and not employees. On the other hand, associations, to the number of 155, are also entitled to fulfill these missions, but it is still not possible to determine the number of FTE devoted to these specific missions, among other socio-judicial missions.

Germany

Q057 (General Comment): Section 142 of the Courts Constitution Act (GVG) provides for the function of an official of the public prosecution office with a right of audience before the local courts. In Germany, an official of the public prosecution office is a civil servant in a special career of the higher judicial service who performs certain tasks of a public prosecutor. In principle, they can perform prosecutorial duties before local courts without restriction. However, the federal states have enacted orders on the organisation and operation of the public prosecutor's offices. These orders regularly limit the activities of the officials of the public prosecution office to an enumerative catalogue of offences to be tried before the criminal judge. Officials of the public prosecution office cannot perform prosecutorial duties before regional, higher regional or federal courts. In addition, section 142 of the Courts Constitution Act (GVG) provides that trainee jurists may be entrusted with the performance of prosecutorial duties. These trainee jurists are persons who have completed their law studies with the first state examination and are in a two-year preparatory service, the completion of which is intended to qualify them for the judicial office. Within the scope of the assignment of duties, the trainee jurist has the same procedural powers as an official of the public prosecution office.

Q057 (2023): Please refer to the general comment

Q057 (2016): The number cited concerns exclusively associate public prosecutors at a local court (Amtsanwälte). This figure as well reflects job shares (not a number of heads). Besides these associate public prosecutors, there are trainee jurists, civil parties to criminal proceedings, and revenue authorities. However, their number is not known (NA) and therefore was not included in the answer to question 57.
Officials of the public prosecution office:
The office of the public prosecution office at the Local Courts can also be exercised by officials of the public prosecution office with a right of audience before the local courts (section 142 (2) of the Courts Constitution Act). The jurisdiction of the officials of the public prosecution office does not encompass preparing public charges in local court proceedings in criminal matters falling under the jurisdiction of courts other than the local courts. In accordance with the Order regarding the Organisation and Service Operations of the Public Prosecution Offices (Anordnung über Organisation und Dienstbetrieb der Staatsanwaltschaft, OrgStA) issued by some Land administrations of justice, officials of the public prosecution office are only assigned criminal matters in which the criminal court judge rules, and then only the criminal matters designated in a list. Trainee jurists:
Responsibility may be assigned to trainee jurists for discharging the duties of an official of the public prosecution office with a right of audience before the local courts and, in an individual case, for discharging the duties of a public prosecutor under the latter’s supervision (section 142 (3) of the Courts Constitution Act).
Civil party to criminal proceedings:
Under certain preconditions, some criminal offences can be prosecuted by aggrieved per-sons by means of a private charge without needing to first call on the public prosecution office. A private charge can also be filed by someone who is entitled to file a request to prosecute in addition to o

r in place of the aggrieved person.
Revenue authorities:
Tasks comparable to those of the public prosecution office are performed by the revenue authorities in the fiscal criminal proceedings: If the revenue authority conducts the investiga-tion independently in accordance with section 386 (2) of the Fiscal Code (Abgabenordnung, AO), it has the same rights and obligations as the public prosecutor’s office has in an investigation (section 399 (1) of the Fiscal Code).

Greece

Q057 (General Comment): Deputy Prosecutors and members of the prosecution(is the first degree after graduation from the National School of Judges) have related duties to prosecutors.

Hungary

Q057 (2022): According to the Criminal Procedure Code a victim may act as a private prosecutor and a substitute private prosecutor in criminal proceedings, but private prosecutors and substitute private prosecutors are not part of the administration of justice.

Ireland

Q057 (General Comment): For completeness, it should be noted that Section 8 (2) of the Garda Síochána Act 2005 provides that any member of the police service (An Garda Síochána) may institute and conduct prosecutions in a court of summary jurisdiction (the District Court which is the court of first instance in criminal prosecutions) in the name of the Director of Public Prosecutions. The DPP has issued a number of general directions concerning the institution and conduct of prosecutions by members of the police service (Gardaí) who are required by Section 8 (3) of the 2005 Act to comply with such directions in deciding whether to institute and in instituting or conducting a prosecution. 14,191 Garda Members were in service at the end of 2024. In this jurisdiction also, there are a number of specialised investigating authorities in relation to certain particular categories of crime or offending, including breaches of the tax code, provisions for safety and welfare at work, and company or competition law. Many investigative agencies have the power to prosecute summarily (in the District Court) without reference to the DPP.

Q057 (2023): Local State Solicitors who provide a solicitor service in the areas outside Dublin; Prosecution Counsel, who are instructed to act for the Director on a case by case basis; County Prosecutors, who are instructed to prosecute cases in the Circuit Court in their respective County; and members of the Garda Síochána who have authority to prosecute certain summary offences (see general comments). State Solicitors are solicitors in private practice who are employed on a contract basis to act on behalf of the Director of Public Prosecutions. Outside the Dublin area, local State Solicitors provide a solicitor service for the Director in Circuit Courts and some District Court matters. There is generally one State Solicitor per county but in certain counties, State Solicitor areas have been split to take account of factors such as population.
The conduct of trials on indictment is handled by independent counsel practising at the Bar who are engaged to represent the Director of Public Prosecutions on a case-by-case basis. Counsel prosecute in accordance with the Director's instructions and in compliance with the Guidelines for Prosecutors. Retention on any panel is at the discretion of the Director and is subject to satisfactory performance of work on the Director's behalf, as will be determined by the Director. For further details please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 1.5 and 2.13 to 2.15.(https://www.dppireland.ie/app/uploads/2023/01/Guidelines-for-Prosecutors-5th-Edition eng.pdf) and Prosecution System in Ireland (chapters 4 and 5)

Q057 (2022): Please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 1.5 and 2.13 to 2.15. (https://www.dppireland.ie/app/uploads/2023/01/Guidelines-for-Prosecutors-5th-Edition-eng.pdf).

Q057 (2020): Please see Guidelines for Prosecutors (5th edition, 2019), paragraphs 1.5 and 2.13 to 2.15.

Q057 (2016): There are 32 State Solicitors contracted to provide a solicitor service to the Director of Public Prosecutions in cases to be heard outside Dublin. Serious criminal offences, with the exception of certain criminal mattes having an international dimension, are prosecuted in the name of the DPP. Much of the work of the DPP is carried out by barristers in private practice rather than by barristers in the employment of the State. Therefore, there is no equivalent to the salaried official known as a public prosecutor in other member states.

Italy

Q057 (General Comment): In Italy lay magistrates are also members of the public prosecution. They are called "Vice Procuratori Onorari". After a period of training, they can assist the professional public prosecutors to deal with a variety of different functions such as representing the public prosecution office during hearings regarding misdemeanour criminal cases or studying jurisprudence and case-law, or helping professional public prosecutors in drafting procedural acts.

Q057 (2023): In Italy, lay magistrates, known as "Vice Procuratori Onorari," play a unique role as members of the public prosecution system. Following a period of training, they are authorized to support professional public prosecutors in a range of capacities. These responsibilities include: Representation in Court: Lay magistrates can represent the public prosecution office during hearings related to misdemeanor criminal cases. Legal Research and Analysis: They engage in the study of jurisprudence and case-law, contributing to a deeper understanding of legal precedents. Procedural Assistance: Lay magistrates provide valuable assistance to professional public prosecutors in drafting procedural documents and acts.

Q057 (2020): In Italy this figure is called "Vice Procuratore Onorario". After a period of training, they can assist the public prosecutors. They can be employed in a variety of different tasks: hearings of misdemeanor criminal cases, jurisprudence studies, preparation of the request to discontinue cases, etc.

Q057 (2018): In Italy this figure is called “Vice Procuratore Aggiunto”. After a period of training, they can assist the public prosecutors. They can be employed in a variety of different tasks: hearings of misdemeanour criminal cases, jurisprudence studies, preparation of the request to discontinue cases, etc.

Malta

Q057 (General Comment): Police had the authority to investigate and initiate prosecutions before the Court of Magistrates. The Office of the AG prosecutes trials by jury and appeals therefrom and also files and prosecutes appeals from the decisions of the Court of Magistrates. Following the reform in 2020 in which the Office of the AG became Chief Prosecutor, a number of cases previously prosecuted by the police are being gradually handed over to the lawyers working at the Office of the AG.

Q057 (2018): Police have the authority to initiate prosecutions and to prosecute cases before the Court of Magistrates. If cases are serious enough to go to trial by jury (theoretically any case liable by imprisonment for more than 2 years can got to trial by jury, but cases in which trial by jury is mandatory are those in which the charge is liable to imprisonment for 12 years or more. In practice, most trials by jury deal with these kind of serious offences). The prosecution from the Office of the Attorney General prosecute trials by jury and appeals therefrom and also files and prosecutes appeals from the decisions of the Court of Magistrates.

Q057 (2016): In Malta, the police have the authority to prosecute a case in court, unless the nature of the offence is serious enough to merit prosecution in the higher courts by the lawyers working at the Office of the AG. The figure presented above reflects the number of Police Inspectors and Police Superintendents whose duties include prosecution in court.

Netherlands

Q057 (General Comment): In 2018, the function of assistant-public prosecutor (now: deputy public prosecutor) was introduced. They are mandated to act as public prosecutors in parts of the caseload that are high-volume and less complex. In such cases, they have the same powers as a Public Prosecutor: to decide on the type of settlement the Prosecution Service will pursue (afdoeningsbeslissingen), and to represent the prosecution in court as acting Public Prosecutor in single-judge hearings (plaatsvervangend officier enkelvoudige zittingen), independently. It is a permanent position requiring a law degree with a specialisation in criminal law.

Q057 (2020): Assistant-Public prosecutor
Since the previous cycle, the function of assistant - public prosecutor has been introduced.

Poland

Q057 (2023): prosecuting assessors

Q057 (2022): The above figures show the status as at 31.12.2022 and also include assessors in the Military Affairs Departments, of which there are 14 in total.
The provisions concerning prosecution assessors are set out in Section V of the Act - Law on the Public Prosecutor's Office. Pursuant to Article 173 of the Act - Law on the Public Prosecutor's Office, the Public Prosecutor General may entrust an assessor of the public prosecutor's office, for a specified period of time, not exceeding 3 years, with the performance of prosecutorial activities without the right to:
1) participation in the proceedings before the court of appeal and in the proceedings before the district court, with the exception of proceedings at first instance in cases in which he has conducted pre-trial proceedings;
2) to appear before the Supreme Court, to draw up appeals and motions to the Supreme Court.
An assessor of the public prosecutor's office who is not authorised to perform prosecutorial activities may act as a public prosecutor in cases in which an investigation has been conducted.
In addition, the provisions relating to public prosecutors (pursuant to Article 174 § 1 of the Act - Law on Public Prosecution) apply accordingly to prosecution assessors.

Q057 (2020): Pursuant to Article 173 § 1 of the Act on the Public Prosecutor's Office of 28 January 2016 (Journal of Laws of 2021, item 66), the Public Prosecutor General may entrust an assistant prosecutor (assessor) for a fixed period, not exceeding 3 years, with the performance of prosecutorial activities without the right:
1)to participate in proceedings before the Court of Appeal and in proceedings before the Circuit Court, with the exception of proceedings at first instance in cases where he or she has conducted the pre-trial proceedings;
appearing before the Supreme Court, preparing appeals and applications to the Supreme Court.

Q057 (2018): Pursuant to art. 173 § 1 of the Law on Prosecution Act of 28th January 2016 (published in the Journal of Laws 2017, item 1767 and later amendments), Public Prosecutor General can entrust prosecution's assessor (for a specified period of time, not exceeding 3 years) with performance of prosecutor's activities, without the right to:
1)participation in the appeal proceedings, as well as participation in proceedings before the District Court - except for proceedings of a first instance, in cases related to preparatory proceedings conducted by this court;
2)act before the Supreme Court, as well as prepare appeals and motions to the Supreme Court.

Slovak Republic

Q057 (2022): Judicial assistants of the prosecutor's office and assistant prosecutors.

Q057 (2020): Other persons with similar duties as prosecutors are the legal attendants of the prosecutor's office and the assistant prosecutors. As for the different answer in the previous cycle, in that time the institute of assistant prosecutors did not yet exist yet.

Spain

Q057 (General Comment): Police officers can present a police report directly to the Criminal Investigation Courts.

Question 060

Austria

Q060 (2023): - Staff in charge of different administrative tasks and of the management of the prosecution offices
- Technical staff
- Trainees (including trainees for Bezirksanwälte) and staff representation

Q060 (2022): Staff in charge of different administrative tasks and of the management of the prosecution offices
Technical staff
Trainees (including trainees for Bezirksanwälte) and staff representation

Belgium

Q060 (General Comment): These figures cover all grades of judicial staff, except for lawyers appointed at the public prosecution offices, prosecutors under training and candidate prosecutors.
These are: secretaries, non-prosecutor staff responsible for assisting prosecutors in the same way as secretaries, staff responsible for administrative tasks, technical staff. "Other staff" encompasses criminologists.

Q060 (2020): V: 1694
M: 730

Bulgaria

Q060 (General Comment): The Prosecutors' College of the Supreme Judicial Council does not maintain data on the gender distribution of the prosecutor's office clerks (non-prosecutor staff) in the prosecutor's offices, since each prosecutor's office of the respective level is an independent legal entity and their employer is the administrative head of the respective prosecutor's office.

Q060 (2022): number of full-time positions for judicial officers in the general and specialized administration in all prosecutor's offices of the Republic of Bulgaria – 2901 /as of December 31, 2022/
- number of full-time employees in specific positions for judicial officers in the educational centers of the Prosecutor's Office of the Republic of Bulgaria – 55 /as of December 31, 2022/

Q060 (2021): The decrease in the number of staff (non-public prosecutors) in the prosecutor's offices is due to the closing of the majority of the first-instance prosecutor's offices and their merger with those in the regional centers. Thus, the managing and duplicating positions in the closed prosecutor's offices were cut.

Q060 (2014): For 2014, the number of actually working servants in the Prosecutors office at 31 December 2014 (2918,5) includes also 66 servants working in the field of recreational craft. The main source of this data is the establishment plan of the Prosecutors office of the Republic of Bulgaria for the number of prosecutors and investigators and a reference for the number of employees in the Prosecutors office of the Republic of Bulgaria at December 2014.

Croatia

Q060 (2022): The data refer to civil servants and employees employed for an indefinite period.
The number does not include those:
- who are on unpaid leave
- who have a dormant employment status
- who have a dormant status of employment until the third year of the child's life
- who are part-time in accordance with the Act on maternity and parental benefits
- who work part-time to care for a child with special needs
- who are on maternity leave
- who are on parental leave
- who are on paternity leave
- who are removed from service
- who are sent to work in another state body or outside the state service (Ministry of Justice, Judicial Academy, State Judicial Council, international missions and international institutions)

Cyprus

Q060 (2021): In 2021, a significant number of public prosecutors were appointed, as new posts have been approved and vacant posts have been filled.

Q060 (2020): trainees are not included

Denmark

Q060 (General Comment): In Denmark, the staff attached to the public prosecution service (non-public prosecutors) are shared between the police and the prosecution offices (first instance level).

Q060 (2023): All non-public prosecutor staff is included.

Q060 (2022): In the response from 2020, all employees of the prosecution, i.e. also prosecutors, were for unknown reasons included. In the 2021 data the number is 747 in relation to non-public prosecutors. And this year the number is 605 people. The decrease is due to, among other things, that police personnel employed by the prosecution were also included, and due to an organizational change in the public prosecution services.

Q060 (2021): The number is the actual number of employees in full-time equivalent as of December 2021. Full-time equivalents are allocated on the 1st of the month, and it is therefore not possible do draw a precise number for 31 December. The number is therefore drawn for 1 December 2021 and scaled up to a full year. The actual numbers of full-time equivalents are calculated as digitals numbers which is not possible to add in the questionnaire.

Q060 (2020): In 2020, lawyers and police personnel attached to the Prosecution Service are included in the figures.

Q060 (2018): The staff attached to the public prosecution service (non-public prosecutors) are shared between the police and the prosecution offices (first instance level).

Estonia

Q060 (2020): More males have been hired.

Finland

Q060 (2023): Prosecutors´secretaries and other specialist staff.

Q060 (2022): Prosecutor's secretaries and other specialist staff

Q060 (2021): In 2021, more staff was hired.

Q060 (2018): More staff has been recruited.
The number of males has increased.

France

Q060 (2023): The categories of staff taken into account correspond to legal assistants and specialist assistants working for the public prosecutor's office.
The increase in the number of non-prosecutor staff attached to the Public Prosecutor's Office in 2023 compared with 2022 occurs in the context of the strengthening of the justice budget, in particular by providing for the creation of a large number of posts for legal assistants (300 in 2023), these criteria have made it possible to consolidate the assignment of legal assistants to the Public Prosecutor's Office on a long-term basis.
In accordance with the note from the Directorate of Judicial Services dated 30 January 2023 on the distribution and recruitment of legal assistant staff for the year 2023, the following were taken into account: the support for the activity of the public prosecutors' offices, the ratio of the number of legal assistant staff jobs per localised prosecutor’s position so that it is between 1 for 6 and 1 for 7 for all metropolitan jurisdictions, the specificities of overseas jurisdictions and jurisdictions hosting specialized interregional jurisdictions (JIRS) or national centers. In addition, the distribution of the posts of legal assistant officers was linked to an action plan to reduce stocks and improve the quality of processing of proceedings. Similarly, the need to support the public prosecutors' offices, particularly within the JIRS or national centres, in the characterisation and processing of complex offences has led to the assignment of specialised assistants within these courts.

Q060 (2022): This figure includes legal assistants and specialised assistants working in the public prosecutor's office.

Q060 (2021): 359 = legal assistants and specialised assistants
Source DSJ

Q060 (2016): It should be recalled that court staff are assigned to the services of judges and public prosecutors, and details of this breakdown are not available. For very specific staff, the data are nevertheless known: 60 specialised assistants and 49 legal assistants.

Q060 (2014): Staff assisting the public prosecution office are comprised in the whole of the registry staff under the direction of a registry director. The latter works closely with the chairman of the court and the public prosecutor at the court. Therefore, data on staff of the public prosecution office are, to this date, indistinct from those of court staff (question 52). Moreover, some very specialised public prosecution services can be assigned to specialised assistants, sometimes from other jurisdictions, to help them deal with the most complex proceedings. These specialised assistants are at number 44 (including 23 women) in 2014.

Germany

Q060 (2023): Figures include officials of the public prosecution office referred to in question 57.

Q060 (2022): Figures include official solicitors ("Amtsanwälte") referred to in question 57.

Q060 (2021): This figure includes:
- The number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte"), the staff at the public prosecution offices and associate prosecutors' offices based at the Regional Courts as well as the staff at the public prosecution offices based at the Higher Regional Courts (full-time equivalent staff as of 31. December 2021)
- The staff (222 in total, 140 female) at the Office of the Federal Prosecutor General (headcount as of 31. December 2021).

Q060 (2020): This figure includes:
- The number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte" – see question 57), the staff at the public prosecution offices and associate prosecutors' offices based at the Regional Courts as well as the staff at the public prosecution offices based at the Higher Regional Courts (full-time equivalent staff as of 31. December 2020)
- The staff (207 in total, 135 female) at the Office of the Federal Prosecutor General (headcount as of 31. December 2020).

Q060 (2018): This figure indicates the number of full-time equivalent staff (not the number of individuals).
- It includes the number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the
Local Courts – in German: "Amtsanwälte" – see question 57).
- It covers the public prosecution offices and associate prosecutors' offices based at the Regional Courts (1st instance), the public prosecution offices based at the Higher Regional Courts (2nd instance), and the Office of the Federal Prosecutor General (in this case:
number of individuals).

Q060 (2016): This figure indicates the number of full-time equivalent staff (not the number of individuals).
- It includes the number of associate prosecutors (i.e. officials of the public prosecution office with a right of audience only before the Local Courts – in German: "Amtsanwälte" – see question 57).
- It covers the public prosecution offices and associate prosecutors' offices based at the Regional Courts (1st instance), the public prosecution offices based at the Higher Regional Courts (2nd instance), and the Office of the Federal Prosecutor General (in this case: number of individuals).

Q060 (2014): According to 2014 data, the indicated figure reflects job shares (not a number of heads). The data submitted relate to the cut-off date of 31 December 2013. No figures are available that are more up-to-date. The number refers to the staff of the public prosecutor’s offices and the offices of associate public prosecutors at the local courts (courts of first instance), of the public prosecutor’s offices at the higher regional courts (courts of second instance), and of the office of the federal prosecutor (Public Prosecutor General at the Federal Court of Justice; in the latter case, the figure reflects the number of heads).

Greece

Q060 (2022): The majority is the category of Secretaries , the other categories are court bailiffs, typists, It clerks and two public prosecutor's offices have one security clerk each.

Q060 (2021): The modified response came after the cooperation of the Directorate of judicial officials with Juststat.

Q060 (2020): The above figures include civil servants, permanent and those with a private law relationship of indefinite duration.

Hungary

Q060 (2023): The above data include junior prosecutors, trainee prosecutors, paralegals, prosecution officials, clerks and blue-collar employees.

Q060 (2022): The above data include junior prosecutors, trainee prosecutors, officers doing semi-prosecutorial tasks, officers, clerks and blue-collar employees.

Ireland

Q060 (2023): The non-public prosecutors include specialists in the following areas: Human resources and organisational development, finance, ICT, facilities, media and communications, corporate governance, procurement, strategic management including risk management, Freedom of Information, quality assurance and audit. There is a Policy and Research Unit supported by knowledge management and research function and librarian. All legal sections are supported by a team of administrative staff who are considered to be generalist.
Our overall sanction headcount increased from 260 in 2022 to 301 in 2023 which resulted in a headcount increase for non-public prosecutors.

Q060 (2022): The non-public prosecutors include specialists in the following areas: Human resources and organisational development, finance, ICT, facilities, media and communications, corporate governance, procurement, strategic management including risk management, Freedom of Information, quality assurance and internal audit. There is a Policy and Research Unit supported by knowledge management and research function and librarian. All legal sections are supported by a team of administrative staff who are considered to be generalist.

Q060 (2018): There were 95.25 fulltime equivalent (fte) administrative/technical staff (headcount 102) on the payroll of the Office of the Director of Public Prosecutions at 31 December 2018 – 54.85 fte (61 headcount) of these were female and 40.40 fte 41 headcount) were male.

Q060 (2016): Of the staff complement in the Office of the Director of Public Prosecutions at the end of the reference year, 77 were administrative grades.

Q060 (2014): In the frame of the 2014 exercise, parts of Full Time Equivalents were counted in decimal figures and have been rounded up or down as appropriate.

Italy

Q060 (2021): The number of staff has increased due to the hiring of new personnel through public competition.

Latvia

Q060 (General Comment): Total number of staff- 390 that consists of- 121 - non prosecutor stuff (whose task is to assist the prosecutor such as registrars (case preparation, assistance during the hearing, helping to draft the decisions); 178 in charge of different administrative tasks and of the management of the prosecution offices; 91 technical staff.
Discrepancy comment: Data for 2023 is correct related to the number of males and females. In 2022 there was typing mistake and females should be 268, males 109.

Q060 (2023): Total number of staff- 390 that consists of- 121 - non prosecutor stuff (whose task is to assist the prosecutor such as registrars (case preparation, assistance during the hearing, helping to draft the decisions); 178 in charge of different administrative tasks and of the management of the prosecution offices; 91 technical staff.
Discrepancy comment: Data for 2023 is correct related to the number of males and females. In 2022 there was typing mistake and females should be 268, males 109.

Q060 (2022): Total number of staff working at the Prosecution Office is 377 (268 male employees, 109 female employees). Of this number, qualified (judicial) support for prosecutors in the performance of their functions, such as assistance during the hearing, helping to draft the decisions (category 2 of the question 52) is provided only by 14 employees. Prosecution Office has 105 prosecutor assistants who provide only technical assistance, they do not provide qualified (judicial) assistance (the functions of prosecutor assistants correspond to those described under category 3 of the question 52). There are also 159 employees that perform different administrative and management tasks. Therefore, the total number of employees in charge of administrative and management tasks is 264. And finally, we have 99 employees that perform technical duties.
Changes on proportion of gender of employees are connected with the changes in the number of employees.

Q060 (2021): Total number of staff working at the Prosecution Office is 357 (103 male employees, 254 female employees): 187 employees (35 male and 152 female) are staff in charge of administrative functions and management of Prosecution Office. 75 employees (40 male and 35 female) perform technical duties. 95 employees are prosecutor assistants (28 male and 67 female). We would like to emphasize that in Latvia assistant prosecutors do not perform the functions of drafting procedural documents. Main duties of assistant prosecutors are preparation of criminal case material copies; drawing up of the case list documents, sewing and numbering of the case materials; preparation of materials to be issued to the process participants; certification of the correctness of document derivatives; delivery of the prepared materials to the addressees and reception of the documents.

Q060 (2014): The 2014 data encompasses the administrative director, deputies of the administrative director and other staff of the administrative director office – staff of the Chancellery, interpreters, IT specialists, personal specialists, car drivers, auditors (in total 318 employees, among which 232 women), as well as prosecutors' assistants (in total 74 assistants, among which 55 women). Assistants to prosecutors have no prosecutorial procedural powers. Their competence and jurisdiction are strictly limited. For example, an assistant is entitled to receive visitors, to take action in connection with the preparation of the case (prepare copies of criminal case materials, to produce the list of documents) etc.

Lithuania

Q060 (2023): assistants of prosecutors, lawyers, other administrative staff.

Q060 (2022): The number of women in staff (non-public prosecutors) attached to the public prosecution services tends to be higher. Total number of staff changed due to natural changes in human resources and as a result of the optimisation processes within the Public Prosecutor's Office.

Q060 (2021): The decrease in staff numbers is due to:
- natural rotation of human resources (various reasons: career, dissatisfaction with salary or duties, etc.);
- implementation of changes in work organisation;
- a higher number of persons left the institution than were recruited.

Q060 (2020): Number of staff does not include trainee prosecutors, only assistants, specialists and other employees. A person, who has been admitted to the service as prosecutor, must complete an assigned traineeship of up to two years. During the traineeship, the trainee prosecutor performs all duties of a prosecutor, but is obliged to coordinate draft procedural decisions and resolutions with the internship supervisor.

Q060 (2016): The provided data on the number of prosecution staff includes assistants and lawyers who work directly with prosecutors (total 363: 81 males and 282 females).

Luxembourg

Q060 (2022): The staff of the judicial and administrative jurisdictions has experienced sustained growth in recent years, as provided for by the amended law of 7 March 1980 on judicial organization, as we had previously explained during the evaluation period of 2020-2022. The variation in total non-judicial staff between 2020 and 2022 is 25.33%. An increase of 9% was observed between 2021 and 2022.

Q060 (2020):
"The staff of the judicial and administrative jurisdictions has grown steadily in recent years, as provided for by the amended law of March 7, 1980 on judicial organization. This explains the significant variations observed between 2018 and 2020 at the judicial and non-judicial personnel.
In 2018, the FIU was administratively attached to the Parquet Général du Luxembourg. Due to the FIU's functional independence, analysts (13 positions) and administrative staff (6 positions) are no longer counted among the staff of the public prosecutor's office."

Q060 (2018): Le personnel des juridictions judiciaires et administratives a connu une croissance soutenue ces dernières années, tel que prévu par la loi modifiée du 7 mars 1980 sur l'organisation judiciaire. Ceci explique les variations importantes observées entre 2016 et 2018 au niveau du personnel de la magistrature et du personnel non-juge. En 2018, la CRF a été rattachée administrativement au Parquet général du Luxembourg. En raison de l'indépendance fonctionnelle de la CRF, les analystes (8 postes) et le personnel administratif (5 postes) ne sont dorénavant plus comptés parmi le personnel du ministère public. L'effectif du Parquet d'arrondissement reste toutefois inchangé, par rapport à 2017, suite à la création des nouveaux postes remplaçant les postes auparavant affectés à la CRF auprès du Parquet.

Malta

Q060 (2022): Like in previous evaluations, the number of non-judge staff includes legal procurators working at the Office of the Attorney General.

Q060 (2016): This data relates specifically to the staff working int he Office of the AG.

Q060 (2014): The number of non-public prosecutors staff declared for 2014, is categorised as follows: supporting paralegal clerical staff – 17 (6 Male/11 Female); civil lawyers acting as attorneys – 13 (11Female/2 Male), legal prosecutors – 3 Female.

Netherlands

Q060 (2023): Administration, business operations, policy, management, management support, project managers, secretary, trainees.

Poland

Q060 (2023): The table provides data on the actual employment of clerks, assistant prosecutors and other employees in common organisational units of the prosecutor's office.

Q060 (2022): The table provides data on the actual employment of clerks, assistant prosecutors and other employees in the common organisational units of the public prosecutor's office.

Q060 (2020): The table presents information available at the National Public Prosecutor's Office Human Resources Office [Biuro Kadr] and contains the numbers of persons actually employed in universal prosecutorial bodies of the public prosecution services, without conversion into full-time equivalents.
The Human Resources Office does not have detailed data on the number of employees in the universal prosecutorial bodies of the public prosecution service who are employed on an indefinite or fixed-term basis. Organisational units of the public prosecution service provide the Human Resources Office with data on employees of the public prosecution service (military part is provided separately) in the following groups:
1)ETE [full time employment] limits,
2)use of the FTE limits (not counted in full-time equivalents and not broken down between men and women) rounded to two decimal places, the actual number of employees (broken down into male and female employees).
The data provided doesnt include trainee prosecutors.

Q060 (2018): In the table, were presented total numbers of employees. Personnel's Office does not have detailed data connected with differentiation the number of workers per part time or full-time basis. The Personnel's Office also does not have detailed data connected with the number of workers employed in general organizational units of the prosecution office, for an unspecified or specified period of time.

Romania

Q060 (2023): Of the 1 810 filled positions in prosecution offices nationwide, 1 803 are held by clerks, while the remaining 7 are occupied by procedural agents (responsible for tasks such as delivering summons and other courier duties) and other staff, including drivers.

Q060 (2022): Out of the total of 2089 filled in positions in the prosecution offices country wide, 1761 are occupied by clerks and the rest of
328 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as
drivers.

Q060 (2020): Out of the total of 2408 filled in positions in the prosecution offices country wide, 1997 are occupied by clerks and the rest of 411 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as drivers.

Q060 (2018): Out of the total of 2468 filled in positions in the prosecution offices country wide, 2044 are occupied by clerks and the rest of 424 are procedural agents (who accomplish activities such as delivering summons, other courier activities etc.) and other staff such as drivers.

Q060 (2016): The numbers include the clerks, forensics, auxiliary staff, public servants and contract staff

Slovak Republic

Q060 (2022): The dicrepacy ratio was caused mainly by the resolution of the Govermnet of the Slovak republic, which ordered the state authorities to reduce the number of state employees by 10 %.

Q060 (2020): Staff increased for natural recruitment procedure

Slovenia

Q060 (General Comment): The information is in FTE. Staff attached to the public prosecution service are civil servants at state prosecutor's offices (state prosecutorial personnel). Staff includes the director general, directors, judicial advisors, trainees, administrators, registrars and other civil servants from state prosecutor's offices. Trainees typically do not perform a significant amount of work as their role is to learn; however they participate in hearings and drafting of court decisions in some cases.

Q060 (2022): The number is reported in FTE format. The total gross number of staff is 309.

Q060 (2021): Before 2021, data was reported in gross numbers. For 2021 data, the FTE format is observed.

Q060 (2020): The information is in form of gross data. According to the methodology used for reporting judges and court staff (FTE) – by which part-time employees are converted to full-time time by the calculation of working hours, the number amounts to 298, as a number of staff are not working full time.

Q060 (2016): The information is in form of full-time equivalent.

Q060 (2014): The substantial increase of employments in state prosecutor's offices in 2014 is a result of Government's decision to strengthen the fight against corruption and other fields of criminality defined in the Prosecution Policy. In the year 2014, 40 Senior Judicial Advisers took up their post, as well as 7 other types of civil servants. In the year 2015 the employment procedures were concluded for admitting 15 trainees.

Question 132

Austria

Q132 (General Comment): Judges/prosecutors are first placed into a certain pay grade according to their position within the judiciary system (e.g. regional courts, supreme court, administrative courts, etc.), where they receive the according base salary (§ 66 RStDG / § 190 RStDG). Every four years the salary increases by a fixed amount up until a certain maximum. Judges and public prosecutors in certain senior positions, such as the head of a district court, the vice president or president of a court of first instance or the head of a senior public prosecutor's office/public prosecutor's office, are entitled to a service allowance (between EUR 201.40 and EUR 1560.60 as at 31 Dezember 2024). The service allowance is part of the monthly salary. The service allowance is part of the monthly payment together with the salary. In principle, it could be stated that the salary covers all additional work performed by judges and public prosecutors in terms of quantity and time. Administrative Courts: First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 86440 Net annual salary: EUR 55850 Judge of the Administrative Supreme Court: Gross annual salary: approx. EUR 150000

Q132 (2023): Judges/prosecutors are first placed into a certain pay grade according to their position within the judiciary system (e.g. regional courts, supreme court, administrative courts, etc.), where they receive the according base salary (§ 66 RStDG / § 190 RStDG). Every four years the salary increases by a fixed amount up until a certain maximum. Judges and public prosecutors in certain senior positions, such as the head of a district court, the vice president or president of a court of first instance or the head of a senior public prosecutor's office/public prosecutor's office, are entitled to a service allowance (between EUR 171.90 and EUR 1332.30 as at 31 Dezember 2022). The service allowance is part of the monthly salary. The service allowance is part of the monthly payment together with the salary.
In principle, it could be stated that the salary covers all additional work performed by judges and public prosecutors in terms of quantity and time. Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 86440 Net annual salary: EUR 55850
Judge of the Administrative Supreme Court: Gross annual salary: approx. EUR 150000

Q132 (2022): Judges/prosecutors are first placed into a certain pay grade according to their position within the judiciary system (e.g. regional courts, supreme court, administrative courts, etc.), where they receive the according base salary (§ 66 RStDG / § 190 RStDG). Every four years the salary increases by a fixed amount up until a certain maximum. Judges and public prosecutors in certain senior positions, such as the head of a district court, the vice president or president of a court of first instance or the head of a senior public prosecutor's office/public prosecutor's office, are entitled to a service allowance (between EUR 171.90 and EUR 1332.30 as at 31 Dezember 2022). The service allowance is part of the monthly salary. The service allowance is part of the monthly payment together with the salary.
In principle, it could be stated that the salary covers all additional work performed by judges and public prosecutors in terms of quantity and time. Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 78545
Net annual salary: EUR 49400
Judge of the Administrative Supreme Court: Gross annual salary: approx. EUR 142000

Q132 (2021): Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 75700
Net annual salary: EUR 46900
Judge of the Administrative Supreme Court: Gross annual salary: EUR 133000

Q132 (2020): Administrative Courts:
First instance professional judge at the beginning of his/her career: Gross annual salary: EUR 75000
Net annual salary: EUR 46600
Judge of the Administrative Supreme Court: Gross annual salary: EUR 130000

Q132 (2019): Administrative Courts - First instance professional judge at the beginning of his/her Career:
Gross annual salary, in €: 72.900 Net annual salary, in €: 45.100

Q132 (2018): Gross annual Salary in € on 31 Dec 2018 First instance professional judge at the beginning of his/her career 53 865
Judge of the Supreme Court or the Highest Appellate Court : 131 227,88
Public prosecutor at the beginning of his/her career: 57 158,80
Public prosecutor of the Supreme Court or the Highest Appellate Instance : 131 227,88
Administrative court:
first instance professional Judge at the beginning of his/her Career: 69 600,00
Judge of the Supreme Court or the Highest Appellate Court: 126 000

Q132 (2016): Because of the requirement of numerical values the numerical values in the table above are rounded. the correct and exact answer is:
Gross annual Salary in € on 31 Dec 2016 (= Gross annual Salary in local currency on 31 dec 2016):
First instance professional judge at the beginning of his/her career: 59 962,40
Judge of the Supreme Court or the Highest Appellate Court (please indicate the average salary of a judge at this level, and not the salary of the Court President): 126 594,16
Public prosecutor at the beginning of his/her career: 55 139
Public prosecutor of the Supreme Court or the Highest Appellate Instance (please indicate the average salary of a public prosecutor at this level, and not the salary of the Public prosecutor General): 126 594,16

Q132 (2014): For 2014, the numerical values in the table are rounded. The correct and exact reply concerning the gross annual salary in Euros on 31 December 2014 is: first instance professional judges at the beginning of their career: 50 402,80 Euros; judges of the Supreme Court or the Highest appellate Court: 121 651,25 Euros; public prosecutors at the beginning of their career: 53 485,60 Euros; public prosecutors of the Supreme Court or the Highest appellate instance: 121651,25 Euros.

Belgium

Q132 (General Comment): The gross amount of 86,916 corresponds to the salary of a judge in a court of first instance at the start of their career (= between 3 and 6 years of seniority) and that of a deputy public prosecutor at the start of their career (= between 3 and 6 years of seniority).
The amount of 158,926 corresponds to the salary of a counselor at the Court of Cassation with the maximum length of service (given that appointment to the Court of Cassation is the final stage of a judicial career for each of them, they all receive the maximum). The salaries of administrative judges are not included in the table. Counselors to the Council of State are not part of the judicial system. Their salaries are also set by law.
Salary evolves according to financial seniority with an increase every three years. The calculation of net salary depends on individual parameters (based on the situation of the person concerned, married, number of dependent children etc.) and therefore cannot be described in general terms. The following are deducted from the gross salary: health insurance contributions, survivor's pension contributions, special social security contribution, withholding tax.

Q132 (2019): Judge at the court of first instance or deputy king's prosecutor, with three years of seniority (beginning of career) married and two dependent children.
Advisor to the Supreme Court with 24 years of seniority, married and no dependent children.
Advocate General at the Supreme Court, with 24 years of service and no dependent children.

Q132 (2016): Judge at the Court of First Instance or Deputy Crown Prosecutor, with three years seniority (beginning of career) married and two dependent children
Councillor at the Court of Cassation with 24 years seniority, married, no dependent children
Advocate General at the Court of Cassation, with 24 years seniority, no dependent children

Bulgaria

Q132 (General Comment): The gross salary of a Supreme court judge is formed as the sum of the Basic Monthly Salary for the Position of "supreme judge or prosecutor" (BMSP) + Rank + Additional remuneration for time served. The Rank and BMSP are determined according to the Classifier of Positions in the Administration of Courts and Prosecutors' offices, which are approved by decisions of the Judges' and the Prosecutors' College of the Supreme Judicial Council, respectively. The additional remuneration for time served is determined as 2% of (BMSP+Rank) is added for each year of service in the judicial system.

Q132 (2023): According to Art. 218, paragraph 3 of the Judiciary System Act (JSA), the remuneration of judges, prosecutors and investigators is determined by a decision of the General Assembly of the Supreme Judicial Council (SJC) and the Supreme Prosecutorial Council (SPC) that adopts "Table No. 1 - for determination of the maximum basic monthly salaries of judges, prosecutors and investigators", which is applicable for all magistrates equally. In this regard, data for judges and prosecutors match completely. The gross monthly remuneration of judges, prosecutors and investigators is formed by adding to the basic monthly remuneration the remuneration for rank (from Table No. 1) and time served (according to Article 219 of the JSA).

Q132 (2022): Data, provided by the Supreme Judicial Council. The increase of gross salaries (respectively net salaries) compared to the previous assessment cycle (2020-2022) is due to the increase in labour remuneration - 10% in 2021 and 10% in 2022, as well as the funds provided in the budget of the judiciary for additional remuneration in connection with Art. 233, paragraph 6 of the Judiciary System Act.
Comment from the Supreme Court of Cassation: The amount of maximum basic monthly remuneration of judges shall be determined by the Plenum of the Supreme Judicial Council. Judges shall receive additional remuneration for long service and professional experience, determined in relation to the basic remuneration at the rate of up to 40% (2% – for 1 calendar year for acquired service and professional experience in a judicial authority; 1.5% – for 1 calendar year for acquired service and professional experience outside a judicial authority, but in the same time, similar or the same nature of work, position or profession; 1% – for 1 calendar year for acquired service and professional experience outside a judicial authority and in another specialty). The maximum amount of 40% is set by the Judicial System Act, in force since 11.08.2007. Judges who reached a higher percentage before the amendment of the law shall retain the percentage reached in accordance with the decision of the Supreme Judicial Council under Protocol No.29/21.09.2007. In the Supreme Court of Cassation, 14 judges receive additional remuneration in excess of 40%. Judges don't get a 13th salary or bonuses paid regularly to everyone, regardless of their personal circumstances. By a decision of the Plenum of the Supreme Judicial Council, an additional remuneration may be paid to judges, but its receipt is not mandatory and unconditional. The entitlement to receive an additional remuneration is defined in the Rules for Determination and Payment of Additional Remuneration (adopted by a decision of the Plenum of the Suprem

e Judicial Council under Protocol No. 29/22.11.2018, amended and supplemented by a decision under Protocol No. 13/13.06.2019, amended and supplemented by a decision under Protocol No. 28/21.11.2019, amended and supplemented by a decision under Protocol No. 18/12.05.2022 and the Rules for Determination and Payment of Additional Remuneration to Judges pursuant to Article 233, paragraph 6, the first sentence of the Judiciary System Act (adopted by the Judicial Collegium of the Supreme Judicial Council by Decision under Protocol No. 24/22.06.2021, amended by Decision under Protocol No. 41/17.11.2021). In 2022 additional remuneration in the amount of 11,220 BGN or 5,736.69 EUR was paid to the judges of the Supreme Court of Cassation in accordance with the decision of the Plenum of the Supreme Judicial Council on the application of the Rules for Determination and Payment of Additional Remuneration. (Gross annual salary, in €= basic salary+ additional remuneration for seniority)

Q132 (2021): In the data for Q 132, the line "Prosecutor at the beginning of his/her career" is correct, but refers to the salaries of a district (first instance) prosecutor at the beginning of his/her career. The data for judges and prosecutors is calculated from the salary report collected and summarized by the Judiciary as of December 2021. The gross salary of the lowest judicial/prosecutor level, i.e. district judge and district prosecutor, is calculated. The system also has the position of "junior judge", but at the beginning of their career, they work in second-instance courts (regional courts), and based on the Questionnaire, information is requested about the lowest position in the first instance. The salary of a district judge and a district prosecutor according to "Table No. 1 of the SJC for Determining the Maximum Basic Monthly Salaries of Judges, Prosecutors and Investigators" is the same.
The data for question 132, line "Prosecutor of the Supreme Court or the Highest Appellate Instance" for the supreme judges and supreme prosecutors is calculated from the salary report provided by the supreme judicial bodies as of December 2021. The gross salary of a magistrate in the supreme judicial body was calculated. According to "Table No. 1 of the SJC for Determining the Maximum Basic Monthly Salaries of Judges, Prosecutors, and Investigators", the determined remuneration of a supreme judge and a supreme prosecutor is the same.

Q132 (2020): In 2019, with a decision of the Plenum of the SJC under item 6 of Protocol № 2 / 24.01.2019, an updated Table № 1 of the SJC was approved to determine the maximum basic monthly salaries of judges, prosecutors and investigators pursuant to Art. 218, para 2 and para 3 of the JSA with an increase of 10%, as of 01.01.2019. With the same decision the ranks for magistrates were increased by BGN 100 per rank, as of 01.03.2019.
In 2020, with a decision of the Plenum of the SJC under item 2 of Protocol № 2 / 30.01.2020, an updated Table 1 of the SJC was approved for determining the maximum basic monthly salaries of judges, prosecutors and investigators on the grounds of Article 218. , para 2 and para 3 of JSA with an increase of 10%, as of 01.01.2020. With the same decision the ranks for magistrates were increased by BGN 50 per rank, as of 01.03.2020.

Q132 (2018): The sums shown do not include the amount of the social security contributions, in order to be made comparable to the data given in the previous assessment cycle when they were not included either in the amount of the gross salary for the relevant position. The source of the data was information summarized and analyzed in the "Financial planning and analysis" Department of Supreme Judicial Council of Bulgaria

Q132 (2016): Under the provisions of Art. 218 (2) of the Judiciary System Act, the basic monthly remuneration for the lowest judicial, prosecutorial or investigating magisterial position shall be set at the double amount of the average monthly salary of employees in the public-financed sphere according to data of the National Institute of Statistics.
The increase in the salaries of the magistrates that occupy the lowest position is in line with the increase of the average monthly salary of the employees in the public-financed sphere, according to data of the National Statistical Institute and the financial resources of the budget of the judiciary.
Under the provisions of Art. 218, (3) of the Judiciary System Act, the remuneration of the other positions, including judges and prosecutors in the Supreme Court / Supreme Prosecution Office in the bodies of the judiciary, shall be determined by a decision of the SJC Plenum and taking into account the financial possibilities on the budget of the judiciary.

Q132 (2014): For 2014, the indicated amounts do not include the insurance contributions for the purpose of data comparability in respect of the previous evaluation scheme, when these amounts have not also been taken into consideration.

Croatia

Q132 (2023): Starting January 1, 2023, the official currency is Euro.

Q132 (2021): Salaries of judges and other judicial officials are determined by multiplying the base for calculating the salary by the coefficient for a particular official, which are proscribed by the Judges' and other Judicial Officials' Salaries Act (Official Gazette No. 10/99, 25/00, 01/01, 30/01, 59/01, 114/01, 116/01, 64/02, 153/02, 154/02, 17/04, 08/06, 142/06, 34/07, 134/07, 146/08, 155/08, 39/09, 155/09, 14/11, 154/11, 12/12, 143/12, 100/14, 147/14, 120/16, 16/19). Determined salaries are increased by 0.5% for each completed year of service, by a maximum of 20%.

Q132 (2020): Salaries of judges and other judicial officials are determined by multiplying the base for calculating the salary by the coefficient for a particular official, which are proscribed by the Judges' and other Judicial Officials' Salaries Act (Official Gazette No. 10/99, 25/00, 01/01, 30/01, 59/01, 114/01, 116/01, 64/02, 153/02, 154/02, 17/04, 08/06, 142/06, 34/07, 134/07, 146/08, 155/08, 39/09, 155/09, 14/11, 154/11, 12/12, 143/12, 100/14, 147/14, 120/16, 16/19). Determined salaries are increased by 0.5% for each completed year of service, by a maximum of 20%.

Czech Republic

Q132 (2023): The Ministry of Justice has clarified that they cannot provide additional comments on the salary increases for judges in the Czech Republic. However, it is worth noting that judicial and prosecutorial salaries were previously frozen. This freeze was later deemed unconstitutional by the Constitutional Court, which led to a substantial increase in salaries, particularly for first-instance judges and public prosecutors, starting in 2023.

Q132 (2022): the impact of exchange rate

Q132 (2020): the salaries have risen generally + exchange rate

Denmark

Q132 (General Comment): We are not able to inform the net salary. The Danish tax system is progressive. That means that the percentage of tax depends on the income and the municipal tax varies from municipality to municipality. The employment of a new public prosecutor is covered by the collective agreement. In addition to the amount stated above, the public prosecutor in the beginning of his/her career is paid an annual supplement of 17.388 kr./2.330 €. This supplement covers the prosecutor’s participation in The Local Prosecution Service’s shift schedule (b-vagt). The public prosecutor is payed a basic salary, which is decided centrally in the collective agreement, based on years of working experience, qualifications, work assignments and responsibility in the specific position. In addition to the basic salary, the public prosecutor can be paid a locally negotiated supplement. The supplements depend on the qualifications and specific responsibilities in the position as a prosecutor. Public prosecutor are entitled to an annual salary negotiation.

Q132 (2023): The employment of a new public prosecutor is covered by the collective agreement. In addition to the amount stated above, the public prosecutor in the beginning of his/her career is paid an annual supplement of 17.388 kr./2.330 €. This supplement covers the prosecutor’s participation in The Local Prosecution Service’s shift schedule (b-vagt). The public prosecutor is payed a basic salary, which is decided centrally in the collective agreement, based on years of working experience, qualifications, work assignments and responsibility in the specific position. In addition to the basic salary, the public prosecutor can be paid a locally negotiated supplement. The supplements depend on the qualifications and specific responsibilities in the position as a prosecutor. Public prosecutor are entitled to an annual salary negotiation.

Q132 (2022): Regarding prosecutor: The employment of a new public prosecutor is covered by the collective agreement. In addition to the amount stated above, the public prosecutor in the beginning of his/her career is paid an annual supplement of 17.174 kr./€ 2.304. This supplement covers the prosecutor's participation in The Local Prosecution Ser-vice's shift schedule (b-vagt). The public prosecutor is payed a basic salary, which is decided centrally in the collective agreement, based on years of working experience, qualifications, work assignments and responsibility in the specific position. In addition to the basic salary, the public prosecutor can be paid a locally negotiated supplement. The supplements depend on the qualifications and specific responsibilities in the position as a prosecutor. Public prosecutor are entitled to an annual salary negotiation.
The Prosecution Service's Remuneration Policy states a maximum annual salary for the public prosecutors. The maximum annual salary for any Senior Prosecutor/Special Prosecutor, including the prosecutors at The Supreme Court Unit with the Director of Public Prosecutions is 714.000 DKKR/€ 95.829. The maximum annual salary for any Deputy State Prosecutor within the Danish Prosecution Service, including the Deputy State Prosecutor at The Supreme Court Unit with the Director of Public Prosecutions, is 942.000 DKKR/€ 126.430. The amounts are stated without pension as well as without remuneration for participation in shift schedules etc. Civil servants receive 16,8 % of the total salary as a pension contribution, and employees under the collective agreement receive 17,1 %. However, the pension contribution for the availability supplement (rådighedstillæg) is 12,5 %.

Q132 (2021): The annual salaries are specified without pension. The annual salary for a Public prosecutor of the Supreme Court or the Highest Appellate is specified based on the average salary for Senior Prosecutors, Special Prosecutors and the Deputy State Prosecutor at The Supreme Court Unit with the Director of Public Prosecutions.

Estonia

Q132 (2020): Since 2010 the salary of prosecutors depends of the salary of the President and is indexed by 1 April of each calendar year. In 2018 the salary system of public prosecutors changed and with that the smallest salaries increased the most.

Q132 (2019): Since 2010 the salary of prosecutors depends of the salary of the President and is indexed by 1 April of each calendar year. In 2018 the salary system of public prosecutors changed and with that the smallest salaries increased the most.

Finland

Q132 (2022): In Finland, there are several salary categories for judges. The salary depends also on the years of work experience. At the end of 2022 first instance judge is in a salary category T11 in which the gross salary is from 4944,63 €/month to 6428,019€/month depending on his/her experience. A permanent first instance judge T13 has usually at least nine years of work experience which means the salary is 6036,7065 €/month. In Finland, the taxation is progressive so the information on net salary varies from person to person and is not available.
Prosecutors salaries are based on three components: task-specific , personal component and component based on the years of employment. At the start of the career prosecutors usually start at the lower levels of task-specific paylevels, as well as the component based on years of employment is lower. By your own capability you can rise your own personal component. Experienced professionals usually have higher levels in all three components.

Q132 (2020): Prosecutors in Finland are not bound on Court instances.

Q132 (2016): In Finland there are several salary categories for judges. The slary depends also on the experience. A first instance judge has a category of T 11 for which the gross salary is from 4501,79 €/month to 5627,24 €/month depending on his/her experience. A permanent 1st instance judge has usually at least 9 years experience which means the salary is 5177,06 €/month. In Finland we have progressive taxation so the information on net salary is not available.

France

Q132 (General Comment): Administrative courts:
First-instance professional judge at the beginning of their career: the data mentioned in the first line corresponds to the average salary of a junior advisor at the first-grade level.
Judge of the Supreme Court or final appellate court: this refers to the average salary of deputy presidents of the litigation section. The salary primarily consists of: base salary: this depends on the increased index held by the civil servant in their grade and step within the grade, and it progresses with seniority according to an index scale. This index is multiplied by the value of the public service point to calculate the base salary; additional remuneration components: paid based on personal circumstances (e.g., dependents, location of the administrative residence, allowances for assignments in certain overseas territories, etc.); allowances: either paid on a fixed basis depending on the various functions that may be held during the career or based on the significance and quality of the service rendered, and the achievement of quantitative objectives.

Civil and criminal courts:
The average salary of a first-instance professional judge at the beginning of their career corresponds to the entry-level salary upon starting their position after completing the National School for the Judiciary (ENM).
The average salary of a first-instance prosecutor at the beginning of their career corresponds to the entry-level salary upon starting their position after completing the ENM.
The average salary of judges at the Court of cassation (the methodology used in previous years is applied): it is more relevant to take the average cost of judges at the Court of Cassation, as it should reflect the highest salary of a judge/prosecutor in the highest judicial instance, rather than the salary of the president of the court or the Attorney General.
Prosecutor at the Supreme Court or final appellate court: same as above.

Q132 (2023): As regards the salary of a first instance professional judge at the beginning of his/her career, the salary scale for judges at the beginning of their career has been upgraded.

Q132 (2022): According to the administrative court judges' annual salary, it amounts to 57,400 euros gross and 48,700 euros net. As for the Council of State judges, their annual remuneration stands at 190,000 euros gross and 161,000 euros net.

The administrative judges in France are subject to another salary regim. The gross annual salary of administrative judges is 57 400 Euro and 48 700 Euro net. For the judges of the Council of State (Conseil d'Etat), the annual salary is 190 000 Euros gross and 161 000 Euros net.

Q132 (2021): The data filled in the table are those of the civil and criminal justice, source DSJ.
Concerning the administrative justice, the data are as follows: professional judge of first instance, beginning of career: 50 200, 41 300; judge of the Supreme court or of the last instance of appeal: 95 100, 76 900. Source – Council of State

Q132 (2020): "The completed table concerns only magistrates of the judicial order.
For the administrative order: -gross annual salary in euros of a professional judge of 1st instance at the beginning of his career: 47,100 euros
-gross annual salary in euros of a Supreme Court judge: 94,000 euros
-net annual salary in euros of a professional judge of first instance at the beginning of his career: 38,700 euros
-net annual salary in euros of a supreme court judge: 76,000 euros.
sources DSJ and CE."

Q132 (2014): In 2014, the annual gross salary of administrative judges was 42,615€ and the annual net salary was 36,318€. At the State Council, the annual gross salary was 108,881€.

Germany

Q132 (General Comment): The salaries of judges and public prosecutors are determined by remuneration laws ("Besoldungsgesetze") which exist in each federal state as well as on the federal level. These laws define the remuneration based on different pay-groups, pay-grades and experience levels. Judges and public prosecutors belong to pay-group "R" that has several pay-grades ("R1", "R2", "R3"...). The allocation to the pay-grades depends on the kind of court, position at the court and size of the court. The number of available pay-grades and the details of allocation differ among the remuneration laws. In simplified terms, judges at local courts, regional courts, labour courts, social courts and administrative courts are allocated to pay-grade "R1" according to the remuneration laws of the federal states. Judges at higher regional courts, regional labour courts, regional social courts, regional administrative courts and finance courts as well as judges with an outstanding position (e.g. director, presiding judge) at the courts mentioned for pay-grade "R1" are allocated to pay-grade "R2" according to the remuneration laws of the federal states. Higher pay-grades according to the remuneration laws of the federal states are reserved for judges in outstanding positions (e.g. presidents, presiding judges). Pay-grades R1 and R2 have several experience levels. Generally, judges will climb to the next experience level after a period of two years from the beginning of their career and then climb further every two or three years (details may differ among the federal states and also with regard to the Federal Courts). The Federal Remuneration Law applies to judges and public prosecutors at the federal courts. With regard to the Federal Remuneration Law, judges at the Federal Patent Court and Military Disciplinary Courts are allocated to pay-grade "R2". Judges at the highest federal courts (Federal Court of Justice, Federal Labour Court, Federal Social Court, Federal Administrative Court, Federal Finan

ce Court) are allocated to pay-grade "R6", presiding judges to pay-grade “R8”. Federal Public Prosecutors at the Federal Court of Justice are allocated to pay-grade “R6”.

Q132 (2023): First instance judge or public prosecutor at the beginning of their career:
Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the federal states. The average was calculated unweighted. The monthly base-salaries of the federal states were added up and divided by the number of federal states, regardless of how many judges and prosecutors with the respective pay-grades work in a federal state (number unknown). Gross base-salaries range from approx. 52 737 to 58 298 EUR per year.
Judge of the Supreme Court or Highest Appellate Court:
Data represents the base-salary of presiding judges at the Federal Court of Justice, Federal Administrative Court, Federal Labour Court, Federal Social Court and Federal Finance Court according to the Federal Remuneration Law (“Bundesbesoldungsgesetz”). This is the highest base-salary that a judge can achieve (excluding the court presidents and judges at the Federal Constitutional Court).
Public Prosecutor of the Supreme Court or Highest Appellate Court:
Data represents the base-salary of the Federal Public Prosecutors at the Federal Court of Justice according to the Federal Remuneration Law (“Bundesbesoldungsgesetz”). This is the highest base-salary that a public prosecutor can achieve (excluding the Federal Prosecutor General).
Judges and public prosecutors are entitled to additional payments depending on 1) their individual familial situation (married/partnership, children); 2) their position and function at the court (eg. judges with administrative tasks)
Calculations were made on the following basis:
1) judge/public prosecutor at the beginning of their career: pay-grade "R1" (remuneration laws of the federal states) , lowest level of experience, unmarried, no children, no special tasks
2) judges at the supreme courts: pay-grade "R8" (Federal Remuneration Law), unmarried, no children, no special tasks.
3) public prosecutors at the supreme court: pay-grade “

R6” (Federal Remuneration Law), unmarried, no children, no special tasks

Q132 (2022): First instance judge or public prosecutor at the beginning of their career:
Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the federal states. The average was calculated unweighted. The monthly base-salaries of the federal states were added up and divided by the number of federal states, regardless of how many judges and prosecutors with the respective pay-grades work in a federal state (number unknown).
Judge of the Supreme Court or Highest Appellate Court:
The calculation method was changed in comparison to previous years, causing high discrepancies. Data represents the base-salary of presiding judges at the Federal Court of Justice, Federal Administrative Court, Federal Labour Court, Federal Social Court and Federal Finance Court according to the Federal Remuneration Law ("Bundesbesoldungsgesetz"). This is the highest base-salary that a judge can achieve (excluding the court presidents and judges at the Federal Constitutional Court).
Public Prosecutor of the Supreme Court or Highest Appellate Court:
The calculation method was changed in comparison to previous years, causing high discrepancies Data represents the base-salary of the Federal Public Prosecutors at the Federal Court of Justice according to the Federal Remuneration Law ("Bundesbesoldungsgesetz"). This is the highest base-salary that a public prosecutor can achieve (excluding the Federal Prosecutor General).
Judges and public prosecutors are entitled to additional payments depending on 1) their individual familial situation (married/partnership, children); 2) their position and function at the court (eg. judges with administrative tasks)
Calculations were made on the following basis:
1) judge/public prosecutor at the beginning of their career: pay-grade "R1" (remuneration laws of the federal states) , lowest level of experience, unmarried, no children, no special tasks
2) judges at the supreme courts: pay-grade "R8" (Fed

eral Remuneration Law), unmarried, no children, no special tasks.
3) public prosecutors at the supreme court: pay-grade "R6" (Federal Remuneration Law), unmarried, no children, no special tasks

Q132 (2021): Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the Länder. Judges and public prosecutors may be entitled to additional payments depending on -
their individual familial situation (married/partnership, children)
- position and function at the court (eg. judges with administrative tasks)
The conditions and amount of any additional payments are determined by the remuneration laws of the Länder.

Q132 (2020): Data represents average base-salaries of judges and public prosecutors according to the remuneration laws ("Besoldungsgesetze") of the Länder. Judges and public prosecutors may be entitled to additional payments depending on -
their individual familial situation (married/partnership, children)
- position and function at the court (eg. judges with administrative tasks)
The conditions and amount of any additional payments are determined by the remuneration laws of the Länder.

Q132 (2016): The salaries calculated were based on the following assumptions:
Outset of the career (judge / public prosecutor): remuneration pursuant to R1, salary bracket 1, single, no children
The average was formed as a simple average of the Länder, without weighting the numbers based on the number of judges active in them, since the corresponding data are not known. The figure given as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.
No Information on annual net salary is available on the Basis of the personal circumstances of judges and public prosecutors.

Q132 (2014): The salaries calculated for 2014 were based on the following assumptions: outset of the career (judge/public prosecutor): remuneration pursuant to R1, salary bracket 1, single, no children. The figure given as the salary of a judge or public prosecutor of the Supreme Court is the basic salary R6 without any allowance for working at one of the highest federal courts and without family allowance.

Greece

Q132 (2016): Data on net annual salaries of judges and prosecutors is not available. In fact, after subtracting from the gross salary the insurance contribution, the amount is still subject to further taxation (22%-35%), depending on the family status of each judge and prosecutor.

Hungary

Q132 (2023): Judges:
Compared to the 2022 data, the decrease in starting (beginning of the career) salary resulted from a change in the calculation method. In previous years, we gave the average salary of the appointed judges, which depends on the length of service and this year the hypothetical lowest salary available at the beginning of the career. The starting salary was calculated according to the above-mentioned calculation method (1 EUR = 382,78 HUF).
The highest salary received at the Supreme Court was defined without any leadership allowances, which is why it is less than the average salary was in the 2022 data.

Q132 (2022): During the career/career progression of prosecutors, salaries are determined as follows.
The prosecutor's salary consists of a basic salary and the supplement determined in the Prosecution Employment Status Act Based on Article 66 (2) of Act XC of 2021 on the Central Budget of Hungary for 2022 and pursuant to Article 59 (3) of Act CLXIV of 2011 on the Status and Career Path of the Prosecutor General, Prosecutors and other Prosecution Employees, the basic salary of a prosecutor in 2022 was HUF 566660.
The basic salary of the prosecutor shall be determined on the basis of the length of service calculated in accordance with this Act, multiplied by the salary base and the multiplying factors specified in this Act for each grade.
Prosecutors who do not yet have any service time upon their appointment or whose accepted service time upon their appointment does not exceed three years shall be classified into pay grade 1. Prosecutors shall proceed one pay grade up on the scale upon the completion of every three years of service time. The length of service shall be calculated from the date of appointment of the prosecutor. However, time spent as a prosecutor before the appointment in the prosecution service and in the judiciary, as well as the time spent in other legal employment or activities requiring a completed bar exam or requiring a completed bar exam according to the rules applicable by the person exercising the employer's rights upon authorization by law shall be taken into account as time included in the length of service.
According to the Prosecution Employment Status Act, the basic salary of a prosecutor is 1.25 times the salary base in grade 1 of the prosecutor's salary scale, and 2.10 times the salary base in grade 14, which is the highest grade.
Prosecutors shall be entitled to a position supplement monthly, the amount of which is
a) twenty per cent of the pay base in the case of prosecutors working in district prosecution offices (113332 HUF in 2022), b) forty

per cent of the pay base in the case of prosecutors working in chief prosecution offices (226664 HUF), c) seventy per cent of the pay base in the case of prosecutors working in appellate chief prosecution offices (396662 HUF), d) hundred and twenty per cent of the pay base in the case of prosecutors working in the Office of the Prosecutor General 679992 HUF).
In general, judges' salaries increase automatically with length of service after every 3 years. In addition, they receive a surplus allowance at all levels of jurisdiction (higher bonus on higher levels), and court executies also receive a management bonus. In addition, there are various allowances which may be granted to eligible judges (e.g. language allowance). From 1 January 2020, judges' salaries increased by an average of 32 percent. In 2021 by another 12 percent of the salary base and by a further 13 percent in 2022.

Q132 (2020): At its December 2019 session, the National Assembly passed a law increasing the salaries of judges by 32 percent and that of prosecutors by 21 percent.

Q132 (2018): The reason for the increase of judicial salaries is the increase of the base salary of judges by 15% in 2017-2018.

Ireland

Q132 (2023): It is not possible to provide a net annual salary as each person's tax credits/deductions are personal to them and their circumstances. Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will be charged in accordance with the relevant statutory provisions.
The judicial salary reflects that of a judge of the District Court (new entrant) and a judge of the Supreme Court (highest point on the pay scale) as at 31 December 2023.Judges appointed post 1 January 2012 are placed on a three-point pay scale.
Within the Office we have Prosecutors at various different grade levels which are equivalent to general Civil Service grades and the rate of pay applicable to those grades are applied to our Prosecutors. The rate of pay per grade are in line with Government pay policy.

Q132 (2022): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2022.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will be charged in accordance with the relevant statutory provisions.
Judges appointed post 1 January 2017 are placed on a three-point pay scale.
Reason for Discrepancy: The question asked in this year's survey is slightly different than the one asked in the previous survey. This means that the replies should not be compared directly. The 2021 survey asked for "Judge of the Supreme Court or the Highest Appellate Court (please indicate the average salary of a judge at this level, and not the salary of the Court President) as at 31 December 2020".
The figure provided for this in 2021 – €208,854.00 – corresponded to the salary for a newly appointed Judge with less than 1 year of experience in the Supreme Court.
The current survey asked for the salaries of judges and public prosecutors on 31 December 2022, specifically, the salary for "Judge of the Supreme Court or the Highest Appellate Court (please indicate the highest salary of a judge at this level, excluding the salary of the Court President)".
The figure provided in this year's survey – €257,872.00 – corresponded to the highest salary point on the scale for Judge of the Supreme Court.
It should further be noted, that since 2020, the members of the judiciary had a number of pay increases in Ireland which included the restoration of pay to pre-austerity levels on 1 July 2022.
The salary of the Director of Public Prosecutions (the most senior person in the Irish Prosecution service) is linked to Irish Civil Service Secretary General Grade II. This salary is currently €243,600. As with all civil service salaries, this is subject to pension (individual and spouse and dependent contributions) and tax related deductions such Income Tax, Universal Social Charge and Pay Rel

ated Social Insurance.

Q132 (2021): The information you are seeking has been retrieved from sources which are available to the public. For figures relating to judicial remuneration please see Association of Judges Ireland and for figures relating to the salaries of other civil servants which includes prosecutors see publicjobs.ie

Q132 (2020): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2020.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will
be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade

Q132 (2019): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2019.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will
be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade

Q132 (2018): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2018.
Statutory deductions such as PAYE, USC, pension contributions will vary according to personal circumstances. In every case these will be charged in accordance with the relevant statutory provisions. Prosecuting in the Superior Courts is not necessarily linked to grade

Q132 (2016): The judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court as at 31 December 2016.

Q132 (2014): The Judicial salary reflects that of a judge of the District Court and a judge of the Supreme Court at December 2014 who were appointed to that courts on or after 1 January 2012. It is noteworthy that following a constitutional amendment in 2011, legislation was passed to allow for the reductions in the remuneration of judges. The Financial Emergency Measures in the Public Interest legislation refers.

Q132 (2013): There is no equivalent of a public prosecutor of the Supreme Court and so a summary of all lawyer grade salaries are provided below: Director of Public Prosecutions (€176,350); Deputy Director of Public Prosecutions (€156,380); Head of Directing Division (€142,199 (modified scale)); Professional Officer Grade II (€119,572); Professional Officer Grade III (€81,080); Professional Officer Grade IV (€67,434); Chief Prosecution Solicitor (€149,499); Principal Prosecution Solicitor (€85,127); Senior Prosecution Solicitor (€79,401); Prosecution Solicitor AP1 (€67,434); Prosecution Solicitor (€30,218 (new entrant from 1 January 2013)).

Italy

Q132 (General Comment): It is noteworthy that the salaries of judges and public prosecutors do not depend on the position held but rather on the experience (i.e. years of service). This means that the salary of a judge working in the lowest courts can be the same as the salary of a judge working in the Supreme Court of Cassation. The salaries of administrative judges are not included in the data provided.

Latvia

Q132 (General Comment): The salary of Supreme Court judges or prosecutors does not depend on the judge's / prosecutor`s seniority in the Supreme Court or Prosecutor Office. All judges of the Supreme Court, with the exception of the chairman of the court and the Chairperson of a department of the Supreme Court, receive the remuneration as stipulated in the Law on Remuneration of Officials and Employees of State and Local Government Authorities.

Q132 (2023): If a judge has received a positive statement in the regular assessment of the professional activity of a judge, a service supplement to the monthly salary shall be determined for the judge, except for a judge of the Constitutional Court, in the following amount:
1) after six years worked in the office - 5 per cent of the monthly salary;
2) after 10 years worked in the office - 10 per cent of the monthly salary.

Q132 (2022): Data on net annual salary, in EUR for first instance professional judges differs from previous period due the raise of gross annual salary.

Q132 (2020): Prosecutors shall be entitled to a supplement for the ranking of the public prosecutor, depending on the degree of office assigned. The ranking of a public prosecutor shall be assigned according to the position, professional knowledge, qualifications and experience of work.
Question 132 indicates the minimum gross and net public remuneration.
Discrepancies with data from the previous cycle are connected with changes in the Law On Remuneration of Officials and Employees of State and Local Government Authorities. Between 2019 and 2020 a gradual increase in salary has been introduced, the gross salary has been increased per EUR 1764 and the net annual salary increase per EUR 1203. The salaries for judges are reviewed annually according to the law.

Q132 (2019): Discrepancies with data from the previous cycle are connected with changes in the Law On Remuneration of Officials and Employees of State and Local Government Authorities.
Comments on salaries of prosecutors: The increase in salaries is related to changes in the regulatory framework for prosecutors remuneration, which entered into force on 01.01.2019. The discrepancies in the section of salary for public prosecutor at the beginning of his or her career is connected to that in previous cycle the maximum salary was indicated which first instance prosecutor could get, but now it is indicated the salary at the beginning of the career.

Q132 (2018): The changes are related to the Law On Remuneration of Officials and Employees of State and Local Government Authorities, which increased the judge's monthly salary to EUR 1966, and the salaries of judges increased significantly in 2018 compared to 2016. Same for prosecutors.
Comment for prosecutors: Prosecutors shall be entitled to a supplement for the ranking of the public prosecutor, depending on the degree of office assigned. The ranking of a public prosecutor shall be assigned according to the position, professional knowledge, qualifications and experience of work. Question 132 shows the maximum gross and net public remuneration.

Q132 (2016): Prosecutors, depending on the grade assigned, are provided with an allowance for a post of prosecutor from 7 to 35 percent of the monthly salary. The position of a prosecutor is assigned according to the occupation, professional knowledge, qualification and work experience.
In above stated amount special additional payment to judges depending of their time of service (starting from 7% after 3 years of service, until 35% - after 20 years of service) is already included.

Lithuania

Q132 (General Comment): Thus, the budget increased and was approved and executed by 40 percent, mainly because from July 1, 2023, judges' salaries were increased (judges' salaries increased almost 2 times). In 2023, they were only uploaded from July. and for a year and a half, which is why they are not visible in the approved budgets. In 2024, additional appropriations were allocated for the entire year, so both the wage fund and the total budget increased by about 38 percent in 2 years compared to the budgets approved in 2024 and 2022. And since salaries are really paid, execution has also increased. The same goes for prosecutors' salaries.

Q132 (2023): From the 2023 July 1 after the amendments to the Law of Remuneration of Judges came into force, the coefficient and the base amount applied in calculating the remuneration of judges has been changed. The coefficient of judges’ salary increased about 2,03 times (evaluating the changes of base amount and recalculation). Also, with the changes from July 1, no left extra payment for work experience calculating the judge salary, so there is no difference between the judge in the beginning of his career and the judge with long work experience. Because of that, the change in first instance judge salary is bigger (discrepancy ratio approx. 55 %) than in Supreme Court judge salary (discrepancy ratio approx. 32 %).

Q132 (2022): The Law on Judges' Remuneration of the Republic of Lithuania establishes, that the salary of judges of general competence and specialized courts consists of:
1) official salary;
2) supplement for length of service to the State of Lithuania (one percent of the official salary of a judge for each year of service to the State of Lithuania, but not more than 30 percent);
3) payment for work and duty on rest days and holidays, substitution;
4) premium for increased workload (the amount of the premium for the increased workload, but not more than 30 percent of his official salary, is determined by the president of the court in accordance with the procedure established by the Juditial Council.

Q132 (2020): From the 1 January 2019 the official salary ratio of district court judges was increased. In 2019 and in 2020 a higher base amount of official salary (salary) was also applied, which is used to calculate the remuneration of judges and public procesutors (2018 - 132,5; 2019 - 173, 2020 - 176)

Q132 (2019): From 2019 January 1 the salaries of district court judges increased due to an increase in their official salary coefficients (the official salary ratio of the president of the court increased from 0.5 to 1.5 basic amounts; deputy chief judge - from 1.2 to 1.9 basic amounts, judge - by 2 basic amounts).
From 2019 January 1 the basic amount of the official salary, which is used to calculate the salaries of both prosecutors and judges, was also increased: in 2018 this basic amount was 132.5 euros, in 2019 - 173 euros.

Q132 (2018): In 2017 prosecutors' salaries were increased.

Q132 (2016): The salary of public prosecutors at the beginning of the carrier was increased.

Luxembourg

Q132 (General Comment): For the starting salary of a professional judge or a public prosecutor at first instance, we consider the salary of judicial attachés after their first appointment. The magistrates' salary scale provides a base of 380 index points; any prior professional experience may be added, but is not taken into account in our calculations.

For the theoretical maximum salary of a judge or prosecutor at the Court of Appeal, we consider grade M6, step 7, which corresponds to 647 points; an additional 25 points are added for managerial duties. To calculate the annual salary, these points must be multiplied by the value of the index point.

Q132 (2023): As the salary at the start of the career (professional judge of 1st instance or public prosecutor), we consider the salary of the attachés de justice after their first appointment. The salary scale for magistrates is based on 380 index points; any professional experience may be added to this, but is not taken into account in our calculations.
As the theoretical maximum salary for a judge or prosecutor at the Court of Appeal, we consider grade M6, step 7, which corresponds to 647 points, plus 25 points for management duties. To calculate the annual salary, these points must be multiplied by the value of the index point. In 2023, the value of the index point changed three times, namely on 1 February to 21.7301, on 1 April to 22.2733 and on 1 September to 22.8300. Taking these indices into account, a salary over 12 months corresponds to €101,592 gross for a professional judge of first instance, or a maximum salary of €179,657 for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned. Further explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the Civil Service website (https://fonctionpublique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html).

Q132 (2022): As a starting treatment for early career (professional judge or prosecutor), we consider the salary of "attachés de justice" after their initial appointment. The judge's salary scale provides for a base of 380 index points, with potential professional experience that may be added but is not taken into account in our calculations.

For the theoretical maximum salary of a judge or prosecutor at the Court of Appeal, we consider grade M6, step 7, which corresponds to 647 points; an additional 25 points are added for managerial functions. To calculate the annual salary, these points must be multiplied by the value of each index point. Between January and March 2022, the value was set at 20.6831871 per index point; after April 1st, 2022 it increased to 21.2002547 per index point. Taking these indices into consideration yields an annual gross salary equivalent to €96,084 for a professional judge at first instance and up to a maximum salary of €169,916 for a judge or prosecutor at Supreme Court level.

These figures do not include any potential bonuses or allowances that may supplement the basic salary according to each individual judge's circumstances."

For further details on calculating civil servant payments applicable also to magistrates' Grade M careers can be found on Public Service website: https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html

Q132 (2021): As a starting salary (professional judge of first instance or prosecutor) we consider the salary of the “attachés de justice” after their first appointment. The salary scale of the magistrates provides for 380 index points as a basis, a possible professional experience can be added to it but is not taken into account by our calculations.
As a theoretical basic salary for a judge or prosecutor at the Court of Appeal we consider the grade M4, level 4, which corresponds to 455 points and to the average seniority of a magistrate appointed to the Court (Court and General Prosecutor's Office). However, it should be taken into account that this salary is strongly influenced by the family situation of the person concerned.
To calculate the annual salary, these points must be multiplied by the value of the index point. Between January and September 2021, the value of the index point for a civil servant was 20.17893; after 1 October, the value of the index point was 20.6831871. Taking into consideration these elements, a 12-month salary corresponds to 92 591€ for a first instance professional judge, respectively a salary of 110 865€ for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the civil service website (https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html).

Q132 (2020): "As a starting salary (professional judge of first instance or prosecutor) we consider the salary of the judicial attachés after their first appointment. The salary scale of the magistrates provides for 380 index points as a basis, a possible professional experience can be added to it but is not taken into account by our calculations.
As a theoretical basic salary for a judge or prosecutor at the Court of Appeal we consider the grade M4, step 4, which corresponds to 455 points and to the average seniority of a magistrate appointed to the Court (seat and General Prosecutor's Office). However, it should be taken into account that this salary is strongly influenced by the family situation of the person concerned.
To calculate the annual salary, these points must be multiplied by the value of the index point. In December 2020, the value of the index point for a civil servant was 20.17893, which corresponds to a 12-month salary of 92.016€ for a professional judge of first instance, respectively a salary of 110.177€ for a judge or prosecutor at the Supreme Court. These figures do not include any bonuses, allowances or benefits that may be added to the basic salary depending on the magistrate concerned. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates, can be found on the civil service website (https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html)."

Q132 (2019): As a salary at the beginning of the career (first instance professional judge or prosecutor) we consider the salary of the “attachés de justice” after their first appointment. The salary scale for judges and prosecutors is based on 380 points, any professional experience can be added but is not taken into account in our calculations. To calculate the annual salary, these points must be multiplied by the value of the index point. In December 2019, the value of the index point of a civil servant was 20,17893, which corresponds to a salary of €92,016 over 12 months. In 2016, this figure corresponded to €84,185 and in 2018 to €89,771. More explanations on the calculation of civil servants' salaries, which also apply to the M career of magistrates (judges and prosecutors), can be found on the civil service website: https://fonction-publique.public.lu/fr/carriere/parcours-remuneration/fonctionnaire/traitement.html.

Q132 (2016): The salary are those of the Court President and the Prosecutor General as no average salary can be calculated.

Malta

Q132 (2023): The increase in the gross and net wages are the result of a recalculation of the wage after adjusting for NI and tax in the 3 tax rates (Single / Parent / Married). Please also note that there was a revision in the salaries backdating to 2023.

Q132 (2022): Following the newly signed collective agreement the Office of the Attorney General, the new salary package commensurate to the different positions within the Office have changed since those provided in previous submissions. The salary package provided above within the field 'Public prosecutor at the beginning of his/ her career' refers to the salary package of Lawyer III.

Q132 (2020): Wages for the lawyers of the AG were improved following a revision of salaries.

Q132 (2019): Public prosecutor at the beginning of his/her career: Actually there was an increase in the gross annual salary which is also reflected in the net annual salary. The difference in the net annual salary is then due to the different tax brackets that apply.

Q132 (2018): In 2018, following discussions with the Judiciary Association, the Ministry substantially increased the wage package of the members of the judiciary across all grades (Magistrates, Judges and Chief Justice). The agreement saw an increase in the basic salary and allowances received by the judiciary, with further increases planned over the coming 3 years. This improvement in the wage package reflects the commitment of the current administration to improve the working conditions of the judiciary, and continues to build on the reforms already brought into effect by the Constitutional Reforms (Justice Sector) Act of 2016.

Q132 (2014): The 2014 figures include the allowances over and above the 'basic' wage. A Magistrate has competence to hear all civil cases up to a value of €11,650 and criminal cases up till an imprisonment of 10 years whilst Judges hear all the other cases. The data provided relates to the salary of a Magistrate (in respect of first instance professional judge) and a Judge (in respect of Judge of the Supreme Court). The Net Annual Salary varies according to the Income Tax Bands announced, from time to time, and therefore it is not possible to indicate the amounts. The figures provided for as net income were calculated on the salary above-indicated for a married person.

Netherlands

Q132 (General Comment): Numbers include a vacation stipend and 13th month (together 16.3% of the annual salary). Please refer to legislation (https://wetten.overheid.nl/BWBR0006530/2023-07-01#Hoofdstuk2b) on this subject.
Salary of a judge / prosecutor 'at the beginning of their career': the salary used is the one for a starting judge/prosecutor, after finishing a training period of several years. During the training there is a separate salary, which is lower than the salary of a fully functional judge/prosecutor.

Q132 (2022): Discrepancy comment: In 2021 we needed to look for a different methodology to calculate the net annual salary for a public prosecutor. This year, we believe we have found a reliable simulation method, and using this, we came to this answer. Using this methodology, answers for previous years would be:
2020: 84.058 (B) en 49.185 (N)
2021: 85.195 (B) en 50.175 (N)
2022: 87.637 (B) en 51.555 (N)

Q132 (2021): Public prosecution: Numbers are including a vacation stipend and 13th month. There is no new collective labour agreement as of yet, so these numbers are the same as last year. As soon as a new agreement is reached, the salary may change retroactively.
Concer
Courts: Salary of a judge / prosecutor 'at the beginning of career': the salary used is one for a starting judge / prosecutor, after finalizing a training period of several years. During the training, there is a fixed salary, lower than the salary of a fully functional judge/prosecutor. Salary includes a holiday stipend, as well as a 13th month.
Supreme Court: the above amount is the average gross salary (11.163,63 euro per month) for a regular Supreme Court judge and includes a holiday allowance (8% of annual salary) and a so-called 13th month (8.3% of annual salary). Please refer to legislation (https://wetten.overheid.nl/BWBR0008365/2021-07-01) on this subject as well as the salary scheme (https://nvvr.org/uploads/documenten/Salaristabellen-RM-juli-2021.pdf).

Q132 (2016): The discrepancy of the answers for gross salary is not clarified.

Poland

Q132 (General Comment): Judges: The basic salary of a judge is determined in rates, the amount of which is determined using multipliers of the basis for determining basic salary. The rates of basic salary in particular judge's positions and multipliers, used for determination of basic salary of judges in particular rates, are specified in the appendix to the Act.
A judge is entitled to a function-related allowance in connection with the performance of his duties.
Judges' remuneration is also differentiated by a long service bonus, amounting, beginning with the sixth year of service, to 5% of basic salary and increasing after each year by 1% until it reaches 20% of basic salary. No social security contributions are payable on judges' salaries. Prosecutors:
The base salary for public prosecutors of universal prosecutorial bodies of the public prosecution services shall be determined based on the table of base salary scale for public prosecutors of universal prosecutorial bodies of the public prosecution services Pursuant to Article 123 of the Act on the Public Prosecutor's Office of 28 January 2016, the basis for determining the base salary of a public prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Main Statistical Office "Statistics Poland" [GUS]. At the same time, according to Article 124 § 11 of the quoted Act on Public Prosecutor's Office, a public prosecutor is entitled to an supplement for long-time service amounting to 5% of the base salary currently received by the public prosecutor, beginning from the 6th year of his/her employment, and increasing after each successive year of his/her employment by 1% of this salary, until reaching 20% of the base salary. After 20 years of service the long-service supplement shall be paid, irrespective of the length of service beyond that period, at the rate of 20% of the p

ublic prosecutor's current base salary.
Supreme court and Main Public Prosecutor Office: Pursuant to Article 124 § 1 of the above-mentioned Act, the base salary of public prosecutors of the National Public Prosecutor's Office is equal to the base salary of judges of the Supreme Court. Pursuant to Article 48 of the Act on the Supreme Court [Ustawa o Sądzie Najwyższym] of 8 December 2017 (Journal of Laws of 2021, item 154, as amended), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The promotion rate is 115% of the base rate. Upon taking up his/her post, a judge of the Supreme Court receives base pay at the basic rate. After 7 years of service in the Supreme Court, the base salary of a judge of the Supreme Court shall be increased to the promotion rate.

Q132 (2023): The increase in judges' and prosecutors' salaries was 7.8% over 2022. The amount of the increase of more than 7.8% is due to the unlocking of the salaries frozen in 2020-2023. It must also be taken into account that the month of November and December 2023 was paid with compensation after the wage unfreeze.
The basic remuneration for prosecutors of common organisational units of the public prosecutor's office shall be determined on the basis of the table of basic remuneration rates for prosecutors of common organisational units of the public prosecutor's office and the Institute of National Remembrance - Commission for the Prosecution of Crimes against the Polish Nation and the multipliers used to determine this remuneration, which constitutes Annex No. 1 to the Regulation of the Council of Ministers of 29.02.2016. (Journal of Laws of 2023, item 1656) on the basic remuneration of prosecutors and the amount of function allowances to which prosecutors are entitled. The said table sets out the rates of basic remuneration for individual prosecutor positions and the corresponding multiplier, which is used to determine the amount of basic remuneration for that position. Pursuant to Article 123 of the Act of 28 January 2016 - Prosecution Law, the basis for determining the basic salary of a prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland 'Monitor Polski' by the President of the Central Statistical Office. Pursuant to Article 124 § 1 of the aforementioned Act, the basic salary of prosecutors of the National Prosecuting Authority is equal to the basic salary of judges of the Supreme Court. Pursuant to Article 48 of the Act of 8 December 2017 on the Supreme Court (Journal of Laws of 2024, item 622), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The 5 promotion rate is 115% of the

basic rate. On assuming office, a judge of the Supreme Court shall receive basic salary at the basic rate. After 7 years of service in the Supreme Court, the basic salary of a judge of the Supreme Court shall be increased to the promotion rate. At the same time, in accordance with Article 124 § 11 of the cited Act - Prosecution Law, a prosecutor is entitled to an allowance for long service amounting, starting from the 6th year of service, to 5% of the basic salary currently received by the prosecutor and increasing after each subsequent year of service by 1% of this salary, until reaching 20% of the basic salary. After 20 years of service, the allowance shall be paid, irrespective of length of service beyond that period, at 20% of the prosecutor's current basic salary.

Q132 (2022): The salary increase for judges and prosecutors at the beginning of their careers was 4.4% by 2021.

Q132 (2021): Judges: The basic salary of a judge is determined in rates, the amount of which is determined using multipliers of the basis for determining basic salary. The rates of basic salary in particular judge's positions and multipliers, used for determination of basic salary of judges in particular rates, are specified in the appendix to the Act.
A judge is entitled to a function-related allowance in connection with the performance of his duties.
Judges' remuneration is also differentiated by a long service bonus, amounting, beginning with the sixth year of service, to 5% of basic salary and increasing after each year by 1% until it reaches 20% of basic salary. No social security contributions are payable on judges' salaries. Prosecutors:
The base salary for public prosecutors of universal prosecutorial bodies of the public prosecution services shall be determined based on the table of base salary scale for public prosecutors of universal prosecutorial bodies of the public prosecution services Pursuant to Article 123 of the Act on the Public Prosecutor’s Office of 28 January 2016, the basis for determining the base salary of a public prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, announced in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Main Statistical Office “Statistics Poland” [GUS]. At the same time, according to Article 124 § 11 of the quoted Act on Public Prosecutor's Office, a public prosecutor is entitled to an supplement for long-time service amounting to 5% of the base salary currently received by the public prosecutor, beginning from the 6th year of his/her employment, and increasing after each successive year of his/her employment by 1% of this salary, until reaching 20% of the base salary. After 20 years of service the long-service supplement shall be paid, irrespective of the length of service beyond that period, at the rate of 20% of the p

ublic prosecutor's current base salary.
Supreme court and Main Public Prosecutor Office: Pursuant to Article 124 § 1 of the above-mentioned Act, the base salary of public prosecutors of the National Public Prosecutor’s Office is equal to the base salary of judges of the Supreme Court. Pursuant to Article 48 of the Act on the Supreme Court [Ustawa o Sądzie Najwyższym] of 8 December 2017 (Journal of Laws of 2021, item 154, as amended), the remuneration of a judge of the Supreme Court is determined at either the basic rate or the promotion rate. The promotion rate is 115% of the base rate. Upon taking up his/her post, a judge of the Supreme Court receives base pay at the basic rate. After 7 years of service in the Supreme Court, the base salary of a judge of the Supreme Court shall be increased to the promotion rate.

Q132 (2019): The base salary for public prosecutors of common organisational units of the prosecutor's office is determined on the basis of the table of base salary for prosecutors of common organisational units of the prosecutor's office and the Institute of National Remembrance - Commission for the Prosecution of Crimes against the Polish Nation, and the multipliers used to determine this salary, which constitutes appendix no. 1 to the Regulation of the Council of Ministers of 29 February 2016 on the base salary of the prosecutors and the amount of functional allowances to which the prosecutors are entitled. The above table sets out the rates of base salary for different prosecutorial positions and the corresponding multiplier, which is used to determine the base salary for this position.
Pursuant to Article 123 of the Act of 28 January 2016 – The Prosecutor's Office Law, the basis for determining the base salary of a prosecutor in a given year is the so-called base amount, i.e. the average salary in the second quarter of the previous year, published in the Official Journal of the Republic of Poland "Monitor Polski" by the President of the Central Statistical Office.
Pursuant to Article 124 § 1 of the abovementioned Act, the base salary of prosecutors of the National Prosecutor's Office is equal to the base salary of the Supreme Court judges. Pursuant to Article 48 of the Act of 8 December 2017 on the Supreme Court (Journal of Laws of 2018, item 5, as amended), the salary of a judge of the Supreme Court is determined at the base rate or the promotion rate. The promotion rate is 115% of the base rate. A judge of the Supreme Court, taking up a position, receives the base salary at the base rate. After 7 years of service in the Supreme Court, the base salary of a Supreme Court judge is increased to the promotion rate.
At the same time, pursuant to Article 124 § 11 of the quoted Act – The Prosecutor's Office Law, a prosecutor is entitled to an allowance for long-term work amountin

g to, starting from the 6th year of work, 5% of the base salary currently earned by the prosecutor and increasing after each consecutive year of work by 1% of this salary, until 20% of the base salary is reached. After 20 years of work, the allowance is paid, irrespective of the length of service beyond that period, in the amount of 20% of the base salary currently earned by the prosecutor.
Moreover, pursuant to Article 124 § 10 of the quoted Act – The Prosecutor's Office Law, in connection with the function of a prosecutor, the prosecutor is entitled to a functional allowance, which results from appendix no. 2 Table of functions and multipliers used to determine the amount of functional allowances to the Ordinance of the Council of Ministers of 29 February 2016 on the base salary of the prosecutors and the amount of functional allowances to which the prosecutors are entitled..
Additionally, pursuant to Article 111 § 2 and 4 of the abovementioned Act, due to the nature of work and the scope of tasks performed, a special bonus may also be granted to the prosecutor of the National Prosecutor's Office, in the amount not exceeding 40% of the total base salary and the functional allowance. The allowance shall be granted for a fixed period, and in justified cases - also for an indefinite period.

Q132 (2018): Base salary for prosecutors related to general organizational units of the prosecution office is determined by virtue of the Table regarding rates, connected with the base salary for prosecutors related to general organizational units of the prosecution office and for prosecutors related to the Nation's Memory Institute - Commission for the Prosecution of Crimes against Polish Nation. The aforementioned table also includes multipliers used for determining the aforementioned salary and it constitutes Schedule No 1 enclosed to the Regulation of the Council of Ministers of 29th February 2016 on the base salary for prosecutors and the amount of extra duty allowance for prosecutors. The aforementioned table determines rates of the base salary related to particular prosecutor's position and appropriate multiplier used for determining the amount of base salary connected with this position. Pursuant to art. 123 of the Law on Prosecution Act of 28th January 2016 (published in the Journal of Laws 2017, item 1767 and later amendments), the basis of the prosecutor's base salary in a given year shall be - so called - base amount, that is average salary related to second quarter of the previous year, published in the Official Journal of the Republic of Poland by the Chairman of the Central Statistics Office.
Pursuant to art. 124 § 1 of the aforementioned Act, base salary for prosecutors related to the National Public Prosecutor's Office is equal to base salary for the Supreme Court judges.
Pursuant to art. 48 of the Supreme Court Act of 8th December 2017 (published in the Journal of Laws 2018, item 5 and later amendments) salary for the Supreme Court judge is determined at the basic rate or promotion rate. The amount of a promotion rate constitutes 115% of a basic rate. The Supreme Court judge, while taking over the post, acquires base salary related to the basic rate. After seven years of duty connected with the Supreme Court, base salary for the Supreme Court judge is raised up

to the promotion rate. At the same time, pursuant to art. 124 § 11 of the aforementioned Law on Prosecution Act, prosecutor is entitled to allowance connected with a long-term service. This allowance constitutes, starting with the 6th year of service, 5% of the base salary currently received by the prosecutor and it rises - after each following year of service - by 1% of the base salary, until it reaches the level of 20% of the base salary. After twenty years of service, the allowance constitutes, independently on the period of service exceeding this time, 20% of the base salary currently received by the prosecutor.
What is more, pursuant to art. 124 § 10 of the aforementioned Law on Prosecution Act, in connection with certain position, prosecutor in entitled to extra duty allowance, which stems from Schedule No 2 of the Table regarding positions and multipliers used for determining the amount of extra duty allowance, enclosed to the Regulation of the Council of Ministers of 29th February 2016 on the base salary for prosecutors and the amount of extra duty allowance for prosecutors.
Additionally, pursuant to art. 111 § 2 and 4 of the aforementioned Act, the National Public Prosecutor - due to the character of service and the scope of duties - can be entitled to the special allowance as well. The amount of the special allowance shall not exceed 40% of base salary and extra duty allowance altogether. The special allowance is granted for a specified period of time or - under particularly justified circumstances - for an unspecified period of time. Salaries of judges and public prosecutors of the Supreme Court or the Highest Appellate Instance - we indicated average salary which contains base salary, allowance connected with a long-term service and allowance connected with occupying post.

Portugal

Q132 (General Comment): The net annual salary depends on various factors: personal tax situation; other personal revenues. It would not be accurate to provide a number under this category.

Q132 (2020): Source of data: Directorate-General for the Administration of Justice and the High Council for the Judiciary
The increase of salaries resulted from the revision of the statute of judges and prossecutors.

Q132 (2019): The increase of the Public Prosecutors' salary in the Supreme Court was due to the revision of the Statute of Judicial Magistrates

Romania

Q132 (2023): For entry-level salaries, the decline is attributed to legislative changes and a shift in recruitment trends, with preference now given to candidates from the National Institute of Magistracy, without prior seniority. Previously, data included individuals with at least five years of legal experience, resulting in higher average salaries. Conversely, the significant increase in end-of-career salaries stems from adjustments in salary structures, influenced by court rulings and administrative acts recognizing outstanding rights. These changes introduced a broadly applicable benchmark for salary calculations across the justice sector.

Q132 (2016): The increase between 2014 and 2016 is resulting from legislative changes, including the way in which specific legislation is applied in the light of the jurisprudence of the Constitutional Court. The calculation method did not change, but the base of the monthly salaries has grown during the last two years, according to the legislation concerning the public remuneration, as it was interpreted by the Constitutional Court and the ordinary courts of law. Currently, the differences between salaries in the judicial system are eliminated. Since 2000 to the present, the magistrates' salaries have risen steadily, including the latest law on salaries in the public domain (Law no. 153/2017) has set a has set a salary level for magistrates well above the average of the budgetary staff. This law will have its full effect until 2022.

Slovak Republic

Q132 (General Comment): The stated sums represent the basic gross salary of judges/prosecutors without bonuses and supplements. According to the Act on Judges (No. 385/2000 Coll.) the average monthly salary of the judge equals the monthly salary of the Member of Parliament. The monthly salary of the judge at the beginning of the career is 90% of this salary. The monthly salary of the judge of the Supreme Court is 130 % of the monthly salary of the Member of Parliament. The judge is entitled to have 2 additional monthly salaries (in May and in November) unless he/she do not meet the conditions stipulated in law. The sum of annual average salary stated in this questionnaire counts 14 months salaries.
All bonuses and supplements are stipulated by law. Specific supplement belongs to the judges of the Specialized Criminal court and to the judges of the Supreme court deciding on the remedies against the decisions of that court. The value of the net salary depends on several individual criteria, e. g. the number of children, the voluntary pension security scheme etc. Similar rules govern the salaries of prosecutors (Act on Prosecutors and Trainee Prosecutors No.154/2001 Coll.). The average salary of the prosecutor equals the average salary of the judge. The salary of the beginning prosecutor is 85% of this salary, the salary of the prosecutor at the General Prosecutors office is equal to the salary of the Supreme Court judge. Prosecutors are also entitled to 2 additional monthly salaries. Supplements for the heads of the prosecutor offices are similar to supplements of the court presidents at the same level.The prosecutors of the Special Prosecutor´s Office are entitled to same supplement as the judges of the Specialized Criminal Court.

Q132 (2019): The stated sums represent the basic gross salary of judges/prosecutors stipulated by law without supplements (methodology comparable to previous years data in the questionnaire). See general comment for details.

Q132 (2018): The stated sums represent the basic gross salary of judges/prosecutors stipulated by law without supplements. See general comment for details.

Q132 (2014): The salaries of judges and prosecutors in 2014 were at the same level as in 2012. The adjustments of salaries for all State officials (Members of Parliament, Government, judges) were stopped in the years 2013 and 2014 due to State expenditures restrictions.

Slovenia

Q132 (General Comment): The basic salary for judges and prosecutors is regulated by law, as well as promotion. The salary of the prosecutor is determined on the same basis, with the same supplements and in the same way as the salary of the judge. All employees in the country (including judges and public prosecutors) are also entitled to the supplement for the period of employment. As the calculation of the average pay would be too complicated, we report figures calculated from above criteria. Please note all figures reported include the supplement for the period of employment.
Judge/prosecutor at the beginning of the career: starting salary for local court judge and for local state prosecutor (without promotion), including the supplement for the period of employment (5 years) - approx. 1-2% of the reported amount.
Judge/Prosecutor at the highest instance: salary of a supreme court judge and supreme state prosecutor – counselor (not president of the Supreme Court or State Prosecutor General) including the supplement for the period of employment (44 years) - approx 15% of the reported amount.

Q132 (2023): In June 2023 the Constitutional Court decided on a request of the Judicial Council to review the constitutionality of the statutory regulation on judges' salaries (Case No. U-I-772/21). The predominant part of the consideration of this case involved the review of the constitutionality of the regulation of judges' basic salaries (regulated in the Public Sector Salary System Act).
The Constitutional Court held that the regulation of judges' basic salaries was inconsistent with the constitutional principle of judicial independence, as it did not comply with the constitutional requirement that judges' salaries be relatively stable. Judges' salaries have namely very significantly lost real value in just over ten years. The Constitutional Court further held that, with regard to the principle of judicial independence, the following allegations may, in principle, also be relevant, namely that the growth of judges' salaries lags behind the growth of the average salary in the state, or in a certain narrower employment segment that is more closely related to judges; that the ratio between judges' salaries and other salaries is inappropriate; that the (excessively) low salaries of judges affect the (un)attractiveness of the judicial profession; and, under certain conditions, the allegations concerning the entitlement of judges to social transfers may also be relevant.
In the context of the review of the consistency of the regulation of judges' basic salaries with the principle of the separation of powers, the Constitutional Court reiterated its position that the three branches of power must also be equal with regard to the financial status of their officials, and that this requirement is not one of perfect uniformity, but of relative comparability. In this regard, taking into account the applicable normative regulation of the entitlement of deputies of the National Assembly to a set monthly allowance for covering the expenses incurred in relation to the performance of their wor

k in a constituency, and taking into account the fact that deputies may be placed into higher salary grades than the starting salary grade, the Constitutional Court established that the regulation of judges' basic salaries, as regards the salary ratio between deputies and the lowest-ranked judges, is inconsistent with the principle of the separation of powers. The Constitutional Court added, however, that it cannot be held that the challenged salary ratios between Supreme Court judges and ministers are unconstitutional.
In the light of the above, the Constitutional Court held that the Public Sector Salary System Act, insofar as it refers to judges's salaries and it's revalorisation procedure, was inconsistent with the Constitution. However and set a deadline for the law-maker to remedy the incompliance with the Constitution. The ruling has not been implemented yet despite protests as the government has been insisting it will tackle judiciary pay as part of comprehensive salary reform in the entire public sector, which is yet to be finalised.
Following up on its earlier decision, the Constitutional Court has decided in May 2024 (U-I-8/24) that judges' pay be raised by an amount corresponding to the total rise in consumer prices in the past decade. The judges will receive higher salaries in September 2024, when they receive their monthly pay for August, along with the difference in back pay starting from 3 January 2024. The Constitutional court's decision determines that salaries should be raised in a way that takes the pay brackets valid on 1 June 2012 and adjusts them for inflation recorded between that day and 31 December 2023. A calculation on the website of the national Statistical Office website shows this amounts to 26.2%.

Spain

Q132 (General Comment): Judicial and Prosecutorial careers - The regulation of the remuneration system for members of the judicial and prosecutorial careers is contained in Law 15/2003 of 26 May regulating the remuneration system of the judicial and prosecutorial careers and is based on the principles of objectivity, fairness, transparency and stability. The remuneration system for judicial and prosecutorial careers is generally made up of a fixed component and a variable component based on objectives, the quantification elements of which are detailed in the law.
The fixed component rewards the category and seniority in the judicial career, as well as the objective characteristics of the positions held. Fixed remuneration is divided into two categories: basic remuneration and additional remuneration. The basic salary is made up of salary (it remunerates the category held within the judicial career and is fixed) and seniority (it is remunerated by a successive increase of five per cent of the initial salary corresponding to the category of entry for every three years of active service or in other administrative situations in which time is recognised for this purpose). Salaries and seniority objectively reflect the category within the judicial career and the successive proportional increase on the initial salary, fixed at five per cent every three years. Judges and magistrates are entitled to two additional payments per year, each equal to one month's salary and recognised seniority, and, if applicable, a proportional amount for the destination allowance under the conditions established by law for the entire State public sector, paid in June and December.
The additional remuneration is made up of the allowance for each post and the specific allowance. The allowance corresponding to each post of judge or magistrate is quantified according to the following criteria The population group to which it belongs; the objective conditions of representation linked to the position held and other specifi

c circumstances linked to the post. The amount of the special allowance for each post of judge or magistrate is set out in Annex II to the Act. The special allowance compensates for the special conditions of certain posts of particular responsibility, complexity or difficulty. The posts benefiting from the special allowance and the amount of the special allowance are listed in Annex III to the Act.
The variable remuneration based on objectives is based specifically on the individual performance of each judge in the performance of his or her judicial and professional duties, as certified by the system of dedication modules. The objective for each assignment in the judicial career is set by the General Council of the Judiciary in accordance with the modules of dedication or other technical criteria it deems appropriate. The variable remuneration works by modulating the amount of the fixed remuneration in parallel with the performance of the previous six-month period. If the members of a court achieve a particularly noteworthy individual performance, i.e. if they exceed the objective assigned to the post by 20 percent, an increase of between five and 10 percent of the fixed remuneration is applied. In cases where, for reasons directly attributable to the judge, the individual performance is insufficient and does not reach 80 percent of the target, the fixed remuneration is automatically reduced by five percent of its amount. Under no circumstances can variable remuneration for targets be consolidated.
The following shall have the status of special remuneration: those corresponding to the performance of on-call duties; those derived from the performance of extraordinary duties without relief from judicial functions; those corresponding to substitutions involving the joint performance of another function, provided that they are in all cases compatible with the other remuneration concepts regulated by law and that their accrual and amount are adapted to the regulatory scheme approved by the Government.
Final comment: Special mention should be made of the recent updating of the amounts of the representation allowance for members of the judicial and prosecutorial professions, which have been subject to an increase in remuneration of between 440 and 450 euros, depending on the type of body and post, by virtue of Royal Decree 775/2023 of 3 October updating the remuneration system for the judicial and prosecutorial professions, in accordance with Law 15/2003 of 26 May regulating the remuneration system for the judicial and prosecutorial professions. These increases are made ex officio by the administration and are retroactive to 1 January 2023.

Q132 (2023): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Judges 7.154.057,70 euros, Prosecution 3.607.755,10 euros.
Professional substitutions: Judges 8.899.597,45 euros. Prosecution 1.094.364,54 euros,

Q132 (2022): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.462.886,71 euros, Judges 6.889.266,33 euros.
- Professional substitutions. Prosecution 1.014.132,71 euros, Judges 10.489.137,61 euros.

Q132 (2021): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.391.688,99 euros, Judges 6.719.737,10 euros.
- Professional substitutions. Prosecution 596.210,59 euros, Judges 7.666.770,44 euros.

Q132 (2020): In addition to salary, other concepts must be taken into account: - Remuneration for objectives: Prosecution 3.364.701,68 euros, Judges 6.760.485,89 euros.
- Professional substitutions. Prosecution 624.438,54 euros, Judges 8.852.605,61 euros.

Q132 (2019): Other two concepts have to be taken into account:
- Remuneration for objectives. (For 2019, Judges 6.560.790,81, Prosecutors 3.298.733,53)
- Professional substitutions. (For 2019, Judges 6.028.864,05; Prosecutors 726.720,41)
Remuneration according to objectives can be considerable in both cases.Substitution refers to cases in which, according to the law, one judge substitutes another, thereby accruing an increase in remuneration, depending on the circumstances and duration of that substitution.

Q132 (2018): Other two concepts have to be taken into account:
- Remuneration for objectives. (For 2018, Judges 6.474.050,91, Prosecutors 3.220.851,03)
- Professional substitutions. (For 2018, Judges 3.220.851,03; Prosecutors 646.740,23)

Question 133

Austria

Q133 (General Comment): Judges at Administrative Courts get the same benefits as functionaries (e.g. anniversary reward, child allowance, possibly cost of living bonus, travel fees of transportation allowance)

Q133 (2018): Judges at Administrative Courts get the same benefits as functionaries (e.g. anniversary reward, child allowance, possibly cost of living bonus, travel fees of transportation allowance)

Q133 (2016): Judges at Administrative Courts get the same benefits as officials (i.e. anniversary reward, child allowance, possibly costs of living Bonus, travel fees or Transportation allowance).

Belgium

Q133 (General Comment): Judges and prosecutors are subject to a specific pension scheme (with a retirement age limit of 67 years + preferential fraction). They may receive an “on-call allowance” (for work performed at night or on weekends).

Q133 (2023): Judges and public prosecutors have a specific pension scheme (age limit at 67 + preferential rate).

Q133 (2022): Judges and prosecutors are subject to a specific pension scheme (with a retirement age limit of 67 years + preferential fraction).

Q133 (2021): Judges and prosecutors have a specific pension scheme (age limit at 67 + preferential rate).

Q133 (2020): Magistrates have a specific pension scheme (age limit at 67 + preferential rate).

Bulgaria

Q133 (General Comment): On the basis of article 223 of the Judiciary System Act, while in office, judges and prosecutors may use housing belonging to the internal housing fund of the judicial system bodies.

Q133 (2023): On the basis of Art. 223 of the Judiciary System Act - judges and prosecutors can use housing from the departmental housing fund of the bodies of the judiciary.

Q133 (2022): On the basis of Art. 223 of the Judiciary System Act - judges and prosecutors can use housing from the departmental housing fund of the bodies of the judiciary.

Q133 (2021): Pursuant to Article 223 of the Judiciary System Act, judges and prosecutors may use dwellings from the institutional housing stock of the judiciary.

Q133 (2020): Pursuant to Article 223 of the Judiciary System Act, judges and prosecutors may use dwellings from the institutional housing stock of the judiciary

Q133 (2019): Persuant to art. 223 of the Judiciary System Act, judges and prosecutors may use housing of the departmental housing fund of the judicial authorities.

Croatia

Q133 (General Comment): Prior to the decision of the promotion, the Council shall request from the competent judicial council the submission of a rating performance of judicial duties. Afterwards, the Council shall conduct a conversation with the candidates. Following the interview, the Council approaches a secret ballot and the points achieved during the interview are summed up to the points of the evaluation of the performance of judicial duties. The Council draws up a list of priority candidates and decides on the promotion of judges. The decision must be based on the total number of points and the established priority list of candidates which is published on the website of the Council.

Q133 (2019): Additional benefits was recently introduced by the Law amending the Law on Salaries of Judges and Other Judicial Officials (Official Gazette 16/19).

Czech Republic

Q133 (2018): Judges and prosecutors are entitled to obtain housing only if they are temporarily transferred to another court/prosecution office.

Q133 (2016): Judges and prosecutors are entitled to obtain housing only if they are temporarily transferred to another court/prosecution office.

Denmark

Q133 (2023): However, professional judges are employed as "civil servants" who receive a lifelong pension.

Q133 (2022): However, professional judges are employed as "civil servants" who receive a lifelong pension.

France

Q133 (2020): Pursuant to the provisions of the order of April 5, 2017, establishing the lists of functions of the State services of the Ministry of Justice provided for in Articles R. 2124-65 and R. 2124-68 of the General Code of the Property of Public Persons that may give rise to the granting of a concession of housing by absolute necessity of service or of a precarious occupation agreement with penalty, certain heads of courts and jurisdictions benefit from a precarious occupation agreement with penalty._x000D_
A fee is charged to the beneficiary of this agreement. It is equal to 50% of the real rental value of the occupied premises._x000D_

Greece

Q133 (2021): judges, except salary, receive two allowances (Article 30 of N.3205/2003), the faster processing allowance and attendance costs. These are not taxed.Article 6, paragraph 6 subparagraph 4, of the decision numbered A.1275 (B ´6375/31.12.2021) indicating what is not included in the certificates of remuneration(page 81063 of the decision).However, if we are to be legally precise, the correct answer to the Cepej question is no. It is not a reduced taxation,but for sums granted, as to other classes of wage-earners, and they face expenses to which they are subjected for the exercise of their work.

Ireland

Q133 (2023): Judges receive an annual allowance as well as travel (mileage) and subsistence (hotels).

Q133 (2022): Judges receive an annual allowance as well as travel (mileage) and subsistence (hotels).

Lithuania

Q133 (2019): no other financial bennefit.

Malta

Q133 (General Comment): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through he introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

Q133 (2022): In respect of 'Special Pension' for Public Prosecutors, The Pensions Ordinance, Chp 93 of the Laws of Malta, stipulates a special pension for the Attorney General only.

Q133 (2020): In respect of 'Special Pension' for Public Prosecutors, The Pensions Ordinance, Chp 93 of the Laws of Malta, stipulates a special pension for the Attorney General only.

Q133 (2018): Act 44 Constitutional Reforms (Justice Sector) Act of 2016 also enhanced the independence of the judiciary through he introduction of an adequate pension scheme that respects the service that has been offered by the retired judiciary, as well as their widows/ widowers.
The special pension was introduced in 2016 for the judiciary, so it was not present in the previous cycles and it is not applicable to the lawyers working in the Office of the Attorney General.

Q133 (2019): retirement
Pursuant to Article 127 § 1 of the Act of 28 January 2016 – The Prosecutor's Office Law in connection with Article 69 -71 and Article 100 of the Act of 27 July 2001 - Law on the system of common courts (Journal of Laws of 2020, item 365, as amended), the prosecutor shall retire when they reach the age of 65, unless, not later than six months and not earlier than twelve months before reaching this age, they declare to the General Prosecutor their willingness to continue holding the position and present a certificate stating that they are able, due to their health condition, to perform their prosecutorial duties, issued on the terms specified for a candidate for the prosecutor's position. A prosecutor shall, at their request, retire, with the right to the emolument referred to in Article 100 § 2 - in the amount of 75% of the base salary and the length of service allowance earned on their last position - after the age of 55 for a woman, if she has worked for not less than 25 years in the position of a judge or a prosecutor, and the age of 60 for a man, if he has worked for not less than 30 years in the position of a judge or a prosecutor. A prosecutor who is a woman shall, at her request, retire after reaching the age of 60, regardless of the period of service as a prosecutor or judge. A prosecutor who retires or is retired due to age, illness or loss of ability shall be entitled to an emolument of 75% of the base salary and the length of service allowance earned on their last position. The emolument shall be increased in accordance with changes in the base salary of active prosecutors. In addition, a retired prosecutor shall be entitled to a one-time severance payment of six months' salary.
Judges and prosecutors are not given housing, but have, for example, the possibility to apply for financial support - in the form of a loan - to meet possible housing needs.

Q133 (2016): A judge who retires or is retired due to age, illness or physical incapacity is entitled to an emolument equal to 75 percent of the basic salary and seniority allowance received at the most recent post.
The emolument is icresed in line with changes of the basic solaries of active judges. A judge who retires is entitled to a one-off severance payment in the amount of six months' remuneration.

Portugal

Q133 (General Comment): Special pension: In Portugal, Jubilation (Jubilação) is the name given to a special retirement scheme which, in addition to the title of honour, allows that emeritus judges shall continue to be bound by their statutory duties and attached to the court of which they were a member. They shall enjoy the titles, honours, privileges and immunities corresponding to their category and may attend the solemn ceremonies held in the said court in professional dress, taking their seats to the right of the magistrates on active service. The pension of the retired judge under this special scheme is calculated and updated based on the remuneration of the magistrate in active service, as it is considered that he or she somehow continues to have a connection to the service.
Housing: The salary of a judge includes an annual gross amount of €xxxxx (€xxxx x 14) as a compensation allowance. An 11% tax is deducted from this amount as a contribution to the general pension fund / social security. This allowance is of a mixed nature, between compensation for the specific nature of the job (working on call and on an exclusive basis) and an allowance comparable to subsistence allowance (due to not being given adequate housing). At the judge's request, he or she may be assigned a residence if one of the properties available for this purpose is available. These properties belong to the State, under the management of the Ministry of Justice.

Romania

Q133 (2021): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q133 (2020): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q133 (2019): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Q133 (2018): Other financial benefits are essentially related to medical expenses and travel expenses (limited).

Slovak Republic

Q133 (2023): Prosecutors: Prosecutors are paid a pension supplement by the Prosecutor General's Office of the Slovak Republic, which in previous years was reported in "Special pension" and in 2023 was already reported in "Other financial benefits"

Q133 (2020): The regulation about housing was included in the Decree of the Ministry of Justice of the Slovak Republic no. 293/2019
Coll., which lays down the conditions and scope of reimbursement of increased expenses for traveling of the hosting judge, or the hosting court can offer accommodation for the judge.

Q133 (2019): The regulation about housing is newly included in the Decree of the Ministry of Justice of the Slovak Republic no. 293/2019 Coll., which lays down the conditions and scope of reimbursement of increased expenses for traveling of the hosting judge, or the hosting court can offer accommodation for the judge.

Slovenia

Q133 (General Comment): There is a possibility for judges, public prosecutors and state attorneys (as well as other public servants in judiciary) to apply for a non-profit tenancy in an apartment, owned by the Ministry of Justice. However, the number of available apartments is very low (less than 0,5% of all functionaries and public servants in judiciary).

Q133 (2018): There is a possibility for judges, public prosecutors and state attorneys (as well as other public servants in judiciary) to apply for a non-profit tenancy in an apartment, owned by the Ministry of Justice. However, the number of available apartments is very low (less than 0,5% of all functionaries and public servants in judiciary).

Question 146

Austria

Q146 (2023): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31 December 2023 (available at www.oerak.at). The data only include lawyers registered in the list of Austrian lawyers, lawyers registered in the list of established European lawyers according to the Lawyers' Directives registered by 31 December 2023. It does not include legal advisors as such a professions/type of service provider does not exist in Austria.

Q146 (2021): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31 December 2021 (available at www.rechtsanwaelte.at). The data only include lawyers registered in the list of Austrian lawyers, lawyers registered in the list of established European lawyers according to the Lawyers' Directives registered by 31 December 2021. It does not include legal advisors as such a professions/type of service provider does not exist in Austria.

Q146 (2017): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2017 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.238), lawyers registered in the list of established European lawyers (87) registered by 31st of December 2017. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q146 (2016): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2016 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.132), lawyers registered in the list of established European lawyers (84) registered by 31st of December 2016. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q146 (2015): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2015 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.057), lawyers registered in the list of established European lawyers (81) registered by 31st of December 2015. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q146 (2014): The 2014 data includes lawyers registered in the list of Austrian lawyers (5940), lawyers registered in the list of established European lawyers (80) and trainee lawyers (2072) registered by 31 December 2014. It does not encompass solicitors or legal advisors as such professions do not exist in Austria.

Belgium

Q146 (General Comment): The latest barometers organised by the Flemish Bars Association (Orde van Vlaamse Balies) and the French- and German-speaking Bars Association (Ordre des barreaux francophones et germanophone) show that the lawyer profession is becoming increasingly feminised in Belgium. - Orde van Vlaamse Balies: according to the latest 'Barometer of the profession' (2020), carried out by the Flemish Bars Association in collaboration with Ghent University (UGent) and Leuven University (KUL), in December 2019, 64.8% of trainee lawyers were women. On the other hand, 57.6% of the lawyers registered on the roll, who therefore completed the traineeship, were men.
- French- and German-speaking Bars Association: according to the latest 'Barometer of the profession' (2022) carried out by AVOCATS.BE in collaboration with ULiège (University of Liège), the percentage of women has been rising steadily since 2007 and has exceeded 50% since 2018. This increase and the shape of the age pyramid point to a strong feminisation of the profession in the years to come.

Q146 (2023): Unfortunately, data by gender on 1 December 2023 are not available.

Q146 (2022): The total is composed as follows: 11 072 for the Order of Flemish Bars - Orde van Vlaamse Balies and 8 238 for the Order of French-speaking and German-speaking Bars (as of December 1st, 2022). It emerges from the latest barometers organized respectively by the Order of Flemish Bars - Orde van Vlaamse Balies and by the Order of French-speaking and German-speaking Bars that more women are working as lawyers in Belgium.

Q146 (2021): The figures are for the Orde Van Vlaamse Balies, 10 973, and for the Order of the French-speaking and German-speaking Bars, 8 188 as of 1 December 2021: a total of 19 161 lawyers.
Unfortunately, none of the Bars was able to provide figures by gender. The Bars report a stable annual increase. According to the latest "barometers of the profession" carried out by the Bar Associations (in 2018 and 2020), it seems that the legal profession is becoming more and more feminised, and the age pyramid suggests that this feminisation will increase in the years to come.

Q146 (2020): For the Order of the French- and German-speaking Bars: 8,160 and for the Orde van Vlaamse Balies (Order of the Flemish Bars) 10715--> total 18,875. According to a recent study (2020), in December 2019, 64.8% of trainee lawyers were women. On the other hand, 57.6% of the lawyers on the roll (who have completed the traineeship) were men. However, if these percentages are compared with those in previous similar studies, it must be concluded that the legal profession in Belgium is becoming more female.

Q146 (2019): The data correspond to the number of lawyers registered with the Belgian bars on September 1, 2019, therefore at the start of the judicial year 2019-2020. This number fluctuates during the judicial year.
Number of lawyers registered with Flemish bars: 10,862.
Number of lawyers registered with French and German speaking bars: 8,043.

Q146 (2018): 8002 for the French and German-speaking Bar Association
10656 for the Flemish Bar Association (OVB)

Q146 (2017): 7 939 lawyers for the French and German-speaking Bar Association on 1 December 2017
10 665 lawyers at the Flemish Bar (OVB)

Q146 (2016): 7,930 lawyers for the French- and German-speaking Bar Association on 1 December 2016
10,602 lawyers at the Flemish Bar (OVB)

Q146 (2015): As at 1 December 2015, there were 7,882 French-speaking and German-speaking lawyers (avocats.be) and 10,520 Dutch-speaking lawyers (Orde van Vlaamse balies).

Czech Republic

Q146 (2022): There is no special reason for the increase, the profession is open to everyone regardless of the gender.

Q146 (2020): Data to: 31.12.2020

Q146 (2018): Data to: 31.12. 2018

Q146 (2017): There are 11587 active lawyers and 1496 inactive.

Q146 (2015): From the above mentioned number of lawyers there are 11011 active practising and 1289 temporary inactive.

Q146 (2013): In 2013, 10 255 lawyers are practicing in an active manner, while 1 141 lawyers discontinued their practicing.

Denmark

Q146 (2023): The data from 2023 was also reported last year. Due to the implementation of a new member system at the Danish Bar and Law society, currently it is unfortunately not possible to access the total number of female/male lawyers practicing as of January 1st 2022.

Q146 (2021): The figures given above are the number of lawyers at the end of 2021.

Q146 (2013): The 2013 data corresponds to the statistical data for September 2014.

Finland

Q146 (General Comment): As of 2014, only attorneys-at-law, public legal aid lawyers and licenced legal counsels are allowed to represent a client in court. In addition, in-house lawyers can represent their company in court. Lawyers working for trade unions can represent a client in a district court and in the Labour Court in disputes regarding employment relationship. Lawyers working for public authorities can represent the public authority in court.
In order to qualify as an attorney-at-law, a lawyer needs to have at least four years of work experience and must pass the demanding three-part professional qualification test known as the bar examination. The titles of attorney-at-law and attorney's office are protected by law and can only be used by lawyers accepted into the Finnish Bar Association. Attorney's offices employ also associate lawyers, that is lawyers who are not yet members of the bar.

Q146 (2023): The number includes 2 300 attorneys (i.e. members of the Finnish Bar Association), 1 725 licensed trial counsels and 205 public legal aid attorneus. From the public legal aid attorneys 92 were simultaniously members of the Finnish Bar Association.

Q146 (2022): The number includes 2255 attorneys (i.e. members of the Bar Association), 1733 licensed trial counsels and 200 public legal aid attorneys. From the public legal aid attorneys 90 were also members of the Bar Association.

Q146 (2021): The total number of lawyers includes 2230 attorneys-at-law, 1738 licensed legal counsels and 205 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
The total number of in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

Q146 (2020): In 2020, the total number of lawyers includes 2211 attorneys-at-law, 1664 licensed legal counsels and 212 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
The total number of in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

Q146 (2019): It is estimated that there are 16.000 people with law degree in Finland – it is no possible to provide an exact number of "legal advisors".
Approx. 4.000 lawyers can represent their clients in Court. These consist of 1631 licensed legal councels, 2177 members of the Finnish Bar Association (attorneys-at-law) and 214 public legal assistants in state legal aid offices.
The Finnish Bar Association states that 66% are men and 34% women. However, 52% of their new members are women.

Q146 (2018): In 2018, the total number of 3965 lawyers includes 2143 attorneys-at-law, 1603 licensed legal counsels and 219 public legal aid lawyers. These lawyers can represent a client in court. The title of attorney-at-law is protected by law and can only be used by lawyers accepted into the Finnish Bar Association.
In addition, in-house lawyers can represent their company in court. Lawyers working for trade unions can represent a client in a district court and in the Labour Court in disputes regarding employment relationship. Lawyers working for public authorities can represent the public authority in court. The total number of these in-house lawyers, trade union lawyers and lawyers working for public authorities is not available.

Q146 (2017): The total number of lawyers 3,846 includes 2,137 members of the Finnish Bar Association, 1,588 licensed lawyers and 228 public legal aid lawyers. 107 legal aid lawyers were also members of the Finnish Bar Association.

Q146 (2016): The number of lawyers indicated for 2012, 2013 and 2014 refers to members of the Finnish Bar Association who are entitled to use the professional titles advokat (advocate). Law firms (firms owned by members of the Bar) employ also associates. Besides, legal aid offices employ also legal advisers who are not all members of the Bar Association. Till 2014, jurists (persons who have a Master's Degree in law) could offer similar legal services than members of the Bar. From the beginning of the year 2014, only advocates, public legal aid attorneys and counsels who have obtained the license referred to in the Licensed Counsel Act are allowed to represent a client in the court.
In 2016,the total number of lawyers 3,791 includes 2,119 members of the Finnish Bar Association, 1,540 licensed lawyers and 229 public legal aid lawyers (97 public legal aid lawyers are also members of the Finnish Bar Association). Only members of the Finnish Bar Association are entitled to use the professional title "advocate".

France

Q146 (2021): Source DACS

Q146 (2020): source DACS

Q146 (2018): data at the date of 1st of January 2018

Q146 (2017): Data as at 1 January 2018

Q146 (2016): data as at 1 January 2017

Q146 (2014): The 2014 data refers to the number of lawyers on 1 January 2015.

Germany

Q146 (2023): number of lawyers as of 1 January 2024

Greece

Q146 (2019): The number is indicative and constantly changing, in the absence of restrictions on the number of positions.
Source: Plenary Session of the Presidents of Hellenic Bar Associations

Q146 (2018): The number is indicative and constantly changing, in the absence of restrictions on the number of positions. Source: Plenary Session of the Presidents of Hellenic Bar Associations

Q146 (2013): The 2013 data corresponds to the total number in the end of December 2013.

Hungary

Q146 (General Comment): We would like to clarify that the above total figure includes attorneys, in-house counsels, registered legal advisors, junior attorneys, European community lawyers and foreign legal advisors.
In Hungary, those lawyers who work as employees of a company are called “in-house counsels”. They have the right to represent their employers in any proceedings, the limitation is that they can only act on behalf of their employers and can't have any other clients. There is another category, “registered legal advisors”, who carry out their work under the control of an in-house counsel and have not passed the bar exam yet. Such registered legal advisors have the same representation rights before the court as junior attorneys explained below.
Junior attorneys and registered legal advisors may represent the parties before the District Court only (including appeals and extraordinary revisions in such cases), where legal representation is not mandatory.
European community lawyers and foreign legal advisors do not have representation rights before court (however, the number of such lawyers is insignificant, for 2024 it was 74).
We would also like to note that the above total figure also contains those who are currently suspending their lawyer practice. The total number of active (non-suspended) attorneys, in-house legal counsels, registered legal advisors and junior attorneys is: 18,165.

Q146 (2023): As per the received question regarding our response to Q146 of the CEPEJ questionnaire (2023 data), we would like to clarify that the respective statistical register of the Hungarian Bar Association has changed recently, due to which the data on the separate numbers of female and male lawyers is no longer available to us. We have received data only for the total number of lawyers practicing in Hungary; hence, this is the reason why the number of female and male lawyers were marked with NA in our answer for the first time in contrast to previous years.

Q146 (2022): The number of lawyers in 2022 includes the number of legal advisors.

Q146 (2020): A new act on the attorneys (Act LXXXVIII of 2017) entered into force on 1 January 2018. https://njt.hu/translated/doc/J2017T0078P_20180101_FIN.pdf

Q146 (2018): A new act on the attorneys (Act LXXXVIII of 2017) entered into force on 1 January 2018. https://njt.hu/translated/doc/J2017T0078P_20180101_FIN.pdf

Q146 (2017): A new act on the attorneys entered into force, as of January 1, 2018. The next year's report will reflect the changes.

Q146 (2016): A new act on the attorneys will enter into force, as of January 1, 2018. The next year's report will reflect the changes.

Ireland

Q146 (2023): The above figures represent members of the Law Library (barristers) and members of the Law Society (solicitors). Of the 11,871 solicitors, 37 were unclassified i.e solicitors who did not identify as either male or female. They are included in the total figure. As of 31 December 2023, there were also an additional 912 barristers on the 'Roll of Practising Barristers' who were not members of the Law Library. These were not included in last years figures and are, likewise, not included in the total figure for this round. This figure can not be broken down into males and females as that data is not requested on the Legal Services Regulatory Authority's application form. You can find further information regarding the Law Library on the Bar of Ireland website at https://www.lawlibrary.ie/about/.

Q146 (2022): The above figures represent members of the Law Library (barristers) and members of the Law Society (solicitors)

Q146 (2021): As of 31 December 2021, there were 11,316 practicing solicitors in Ireland. 5,319 male, 5971 female and 26 undefined. For the undefined classification, this is due to the Society not being provided with information on the solicitor's gender. These statistics include solicitors with a practicing certificate in the Republic of Ireland, including practicing solicitors employed by the State. Reply from the Law Library: total n: 2118; males 1354; female 764. Please note that the numbers above are as at June 2021 and per our Annual Report https://www.lawlibrary.ie/about/governance/annual-report/ The figures only relate to barristers who are members of the Bar of Ireland, and do not include barristers operating outside of the Bar of Ireland. The Roll of Barristers, held by the LSRA, contain that list. Further the above does not include solicitor numbers, which are available via the Law Society of Ireland and the LSRA.

Q146 (2020): The above figure is the sum membership of the Bar of Ireland and the Law Society. Total figure includes 24 lawyers with a gender reported as "Unknown".

Q146 (2019): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

Q146 (2018): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

Q146 (2017): This figure represents the total number of barristers practising as members of the Law Library/Bar of Ireland and the total number of solicitors who held practising certificates for 2017.

Q146 (2016): This figure represents the current membership of the Bar Council of Ireland and the Law Society of Ireland.

Q146 (2014): The number of lawyers comprises Solicitors and Barristers in the end of December 2014.

Italy

Q146 (2013): For 2013, the number of practicing lawyers was not available. The provided figure corresponds to the number of lawyers in 2012, assuming that data should be almost the same for both years.

Latvia

Q146 (2017): This number includes sworn advocates and assistants to sworn advocates.

Q146 (2013): There were 1 336 sworn lawyers in Latvia on December 31, 2013, of which 70 - assistants to lawyers and 13 - lawyers from other countries. 116 State legal aid providers have been concluded contracts with the Legal Aid Administration about State-guaranteed legal assistance in civil cases, administrative cases, cross-border disputes and provision of out of court legal assistance. State provided legal assistance in criminal matters in Latvia is provided by sworn lawyers, not by legal aid providers.

Lithuania

Q146 (2019): There are also 1008 lawyers' assistants (449 males, 559 females). They can provide some legal service but are not included in the number of lawyers above.

Q146 (2018): There are also 943 lawyers' assistants. They can provide some legal service but are not included in the number of lawyers above.

Q146 (2017): The number is provided by the Lithuanian Bar Association (the number of practising lawyers (advocats) - 2207. Also there are 925 lawyers' assistants who provide legal service).

Q146 (2016): The number is provided by the Lithuanian Bar Association (the number of practising lawyers (advocats). Also there are 870 lawyers' assistants who provide legal service also.

Q146 (2015): Numbers are taken from the List of Practising Advocates of Lithuania. The list is regulated by the Law on the Bar and administered by Lithuanian Bar Association. The assistants of advocates is not presented in the data.

Luxembourg

Q146 (2023): At the Luxembourg Bar, the number of individual lawyers (3,377) includes the 'individual' lawyers who represent legal entities. The number of corporate lawyers (216) includes the number of law firms registered with the Bar. The Diekirch Bar currently has 54 'natural person' lawyers and 6 law firms represented by natural persons. In total, therefore, in 2023 there will be 3431 lawyers who are natural persons, including the lawyers who represent the 222 legal entities. Since the entry into force of the law of 16 December 2011 concerning the practice of the legal profession in the form of a legal entity (article 8 (10) and (11) of the law on the legal profession of 10 August 1991), a natural person (a lawyer registered on list I or IV, i.e. a natural person) may practice the legal profession through a legal entity (registered on list V or VI).

Q146 (2022): The number of individual lawyers, amounting to 3202, includes those individual lawyers who represent legal entities. The number of law firms, totalling 207, encompasses the registered law firms listed in the Bar Association's registry. Presently, the Diekirch Bar has 53 individual lawyers and 4 law firms (4 from list V and 1 from list VI) represented by individual lawyers. Therefore, in 2022, there was a total of 3255 individual lawyers including those representing the 211 legal entities.

An individual (lawyer listed on lists I or IV as an individual) may practice law through a legal entity (listed on lists V or VI) since the entry into force of the Law of December 16th 2011 concerning the exercise of lawyer profession in form of a legal entity (article8(10)and(11) of the Law on the Lawyer Profession of August 10th 1991).

Q146 (2021): The Diekirch Bar did not provide details on the breakdown of the number of lawyers by gender. Among lawyers registered at the Luxembourg Bar, who represent 98% of the lawyers registered at the two Luxembourg Bars, 52% were male and 48% were female.

Q146 (2015): The number indicated includes the number of lawyers, trainee lawyer, lawyers practising under their home-country professional titles and independent lawyers at September 1st, 2016.

Malta

Q146 (2021): The answer to Q146 represents the warranted lawyers who have registered themselves in the Register of Legal Professionals and Law Firms as per Act XIX of 2021. As from this evaluation onwards, the number of lawyers quoted will always be sourced from this official register.

Q146 (2017): The number of lawyers quoted in this answer refers to the number of warranted lawyers at the end of 2017. This data is based on a list of warranted lawyers practicing in Malta, compiled by the Department of Justice. Work on this list is ongoing but it is important to note that the figure quoted above, reflects a more faithful representation of the number of warranted lawyers in Malta.

Q146 (2016): The number of lawyers quoted in this answer refers to the number of warranted lawyers who are also members of the Chamber of Advocates, at the end of 2016. Throughout 2016, the Chamber of Advocates has been updating their list of members in order to clear the names of the lawyers who have either retired or have passed away. Furthermore, it is important to note that at present membership with the Chamber of Advocates, which is the sole Bar Association in Malta, is not mandatory. Hence over the past few months, the Department of Justice is drawing up the first complete list of warranted and non-warranted lawyers in Malta. Work is still underway so it is important to note that the figure quoted above, which is less than that submitted in the previous evaluation, reflects a more faithful representation of the number of warranted lawyers in Malta.

Q146 (2015): The number of lawyers quoted in this answer refers to the number of warranted lawyers on the list of advocates at the end of 2015. It is possible that some of these lawyers have retired so whilst the warrant remains valid, it does not necessarily mean that all 1569 lawyers are practising the profession. At present there does not exist any mechanism wherein lawyers register once they are given the Warrant to practice, and membership with the Chamber of Advocates, which is the sole Bar Association in Malta, is not mandatory to practice as a lawyer.

Netherlands

Q146 (2021): On 1-1-2021: 17 964 (9 837 male, 8 127 female)

Q146 (2020): This is the number of lawyers on 1-1-2021
Number of lawyers on 1-1-2020: 17.829 (total), 9867 (males), 7962 (females)

Q146 (2019): Numbers on 1/1/2020

Q146 (2017): Annual report NOVA 2017

Poland

Q146 (2022): Number of advocates: total: 21 447, male- 11 343, female - 10 104
Number of legal counsels: total: 40 107, male - 18 725 , female - 21 382
It is noteworthy that legal advisers have the same powers as advocates.

Q146 (2020): Number of advocates: total: 19954, male- 10513, female - 8845
Incomplete data: No information on sex of 596 advocates;
Number of legal counsels: total: 37411, male - 17746, female - 19665
It is noteworthy that legal advisers have the same powers as advocates.

Q146 (2019): It is the total number of legal advisers and advocates.
It is noteworthy that legal advisers have the same powers as advocates.

Romania

Q146 (2020): There is no official explanation due to legal norms, in principle such fluctuations can be registered within the profession, as long as the total number has not registered significant fluctuations.

Slovak Republic

Q146 (2016): The number represents all lawyers registered in the list of the Slovak Bar Association.
Out of this number 848 lawyers have their practise suspended.

Slovenia

Q146 (2017): (Male: 939, 798: female).

Spain

Q146 (2023): Lawyers 'census' [Abogacía en datos] (Spanish General Bar Association website): Information on practicing and resident lawyers. Percentage of women and men (45 and 55% aprox.)

Q146 (2022): Lawyers 'census' [Abogacía en datos] (General Bar Association website): Information on practicing and resident lawyers. Percentage of women and men (45 and 55% aprox.)

Q146 (2021): The data are obtained through the General Bar Association Annual Report 2021. On practicing and resident lawyers.

Q146 (2020): The data are obtained through the General Bar Association Annual Report 2020. On practicing and resident lawyers.

Q146 (2017): Resident Lawyers (Memory of the General Bar Association 2017)

Q146 (2016): Resident Lawyers (31 December 2016)

Q146 (2015): In civil cases, mainly the legal representation is for Procuradores. In criminal cases, lawyers can assume legal representation until a Procurador is appointed for the case. In administrative cases legal representation is mostly assumed by lawyers. Graduados sociales' (consultants on labour and social security matters) may represent the parties in labour law proceedings. The responses above are given is on the basis that lawyers have a monopoly on practising the defence at Court which, in Spain, is not equivalent to “legal representation”.

Question 147

Austria

Q147 (2017): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2017 (available at www.rechtsanwaelte.at).
The data only includes lawyers registered in the list of Austrian lawyers (6.238), lawyers registered in the list of established European lawyers (87) registered by 31st of December 2017. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q147 (2016): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2016 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.132), lawyers registered in the list of established European lawyers (84) registered by 31st of December 2016. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Q147 (2015): Statistic from the Austrian Bar (Österreichischer Rechtsanwaltskammertag) of 31st December 2015 (available at www.rechtsanwaelte.at).The data only includes lawyers registered in the list of Austrian lawyers (6.057), lawyers registered in the list of established European lawyers (81) registered by 31st of December 2015. It does not include solicitors nor legal advisors as such professions/types of service providers do not exist in Austria.

Croatia

Q147 (2020): Not applicable

Cyprus

Q147 (2018): This figure represents the Lawyers who are registered and have a license for registering practicing advocates

Q147 (2017): the lawyers who do not renew their license are not included in this number

Czech Republic

Q147 (2016): There are no legal advisors (as decribed in the question above) in the Czech Republic.

Denmark

Q147 (2019): License to practice as an "advokat" is mandatory in Denmark.

Finland

Q147 (2019): The Association of Finnish Lawyers, which is the only association in Finland for all lawyers, has approximately 16.000 members. 55% of their lawyer members are women, and 57% of the student members are women. (https://www.lakimiesliitto.fi/liitto/jasenet/)

France

Q147 (2023): This category does not exist. The profession of legal adviser was integrated into the profession of lawyer by the law of 31 December 1990. Legal advice is open to certain professionals by virtue of their status, but also to other professionals after approval has been granted by the Ministry of Justice.

Q147 (2019): This category does not exist. The profession of legal adviser was integrated into the legal profession by the law of 31 December 1990. The activity of legal advice is open to certain professionals by virtue of their status but also to other professionals after an approval has been issued by the Ministry of Justice.

Germany

Q147 (General Comment): All lawyers in Germany are empowered to plead before court. No distinction is made between different groups of lawyers in Germany, such as between solicitors and barristers. The stated within question 146 include in-house lawyers according to section 46 para. 2 of the Federal Code for Lawyers (Bundesrechtsanwaltsordnung – BRAO). These are persons, who exercise their profession as salaried employees of persons or companies other than lawyers or patent attorneys or in a company for the joint practice of law or patent law. They shall be deemed to be practising as a lawyer if they are working as a lawyer for their employer under an employment agreement. The conditions to be met with regard to the requirement “working as a lawyer” are set out in section 46 para. 3. Compared to lawyers, their powers to provide for legal advice and representation in court are restricted according to section 46 para. 5 (restriction to the employer’s legal affairs) and according to section 46c para. 2 BRAO. Like lawyers, in-house lawyers have to be admitted to the legal profession by the competent regional bar association. There are 27 789 in-house lawyers admitted to the legal profession in Germany. In addition to lawyers, certain other individuals may also appear in court as legal advisers but there are no statistical data on these individuals.

Q147 (2023): please refer to the general comment

Q147 (2022): see General Comment

Q147 (2021): See the general comments

Q147 (2020): See the general comments

Q147 (2019): See the general comments

Greece

Q147 (2022): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q147 (2021): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q147 (2020): All lawyers can be legal advisers and therefore have the right to be represented in court.

Hungary

Q147 (General Comment): Legal advisors (jogtanácsos) facilitate the functioning of the organisation by which they are employed. They conduct legal representation within the organisation, provide legal advice and information; prepare applications, contracts and other documents; participate in organising legal work. As a general rule, legal advisors, in contrast to attorneys, discharge their duties (which are not as extensive as those of attorneys) as employees. Their compensation is based on the regulations concerning employment. Any person entered in the register maintained by the county court in Budapest can become a legal advisor. Besides, applicants must hold citizenship in one of the member States participating in the Agreement on the European Economic Area; have no criminal record; hold a university degree; have passed the Hungarian professional examination in law.

Q147 (2022): Types of lawyers in Hungary
In Hungary "attorneys" are those legal professionals who hold a degree in law and have passed the BAR exam and registered by and members of the local bar association. There is no distinction between Hungarian attorneys, such as solicitors and barristers in the UK, any Hungarian attorney can represent a client before the court. An attorney, however, may practise either as an individual attorney, or as a member of a law firm. In other words, he/she can't be an employee. Please see below the number of attorneys practicing in Hungary (i.e., excluding legal advisors, junior lawyers, EU lawyers):
Number of attorneys (i.e., figures excluding legal advisors)
Total: 11,615
Males: 6,440
Females: 5,175
Those lawyers who work as employees of a company are called "legal advisors" (i.e. in-house counsels). They have the right to represent their employers in any proceedings, the limitation is that they can only act on behalf of their employers and can't have any other clients. There is a special category of legal advisors (in-house counsels) who are members of the local bar association as "registered legal advisors".
Moreover, there are "employed attorneys" (whose employer is limited to a lawyer or law firm), European legal counsels (under the EU Directives as implemented by Hungarian legislation), and employed European legal counsels.
All different categories described above are subordinated to the profession of a lawyer and legal advisor.
Monopoly
Lawyers (attorneys), and to a certain extent registered and non-registered legal advisors are the only professionals who are entitled to represent an individual and/or legal entity in legal matters. So, from this point of view there is a monopoly, since no one else is allowed to fulfil the role of legal representative as a professional, for consideration.
There is no general requirement to have legal representation in court or administrative cases, this is only mandatory in certain proceedings, so from this

point of view there is no monopoly (please see the detailed list of the cases below, where legal representation is mandatory). Attorneys have a monopoly of representation of defendants in criminal cases during the whole length of criminal proceedings. Victims of criminal cases may also be represented by their family members.
In administrative proceedings, legal representation is not mandatory, and in general any person can represent a party who has the mandate to do so (but the limitation still applies that professionally only an attorney can represent parties in these proceedings too). Section 45 of the Code of Criminal Procedure (Act XC of 2017) prescribes the presence of a defence attorney in the following cases:
a) a criminal offence for which the law prescribes five or more years of imprisonment,
b) the accused is subject to a coercive measure affecting a person's personal freedom, or in another matter is subject to arrest, preliminary involuntary treatment in a mental institution, or is placed under imprisonment, custodial arrest or educational training;
c) the accused is deaf, mute, blind or – regardless of his/her legal capacity – mentally incompetent,
d) the accused does not know the Hungarian language or the language of the proceedings,
e) the accused is not able to personally defend himself/herself for other reasons,
f) the court, the public prosecutor's office or the investigating authority assigned a defence attorney upon the request of the defendant or due to considering it necessary for other reasons,
g) it is especially prescribed by law (e.g. in case of an accused minor).
According to the Code of Civil Procedure (Act CXXX of 2016), in the case of civil cases, there is compulsory legal representation in all types of cases with the exception of lawsuits where the District Courts are competent including the appeals and extraordinary revisions in such cases.

Q147 (2020): Legal advisors (jogtanácsos) facilitate the functioning of the organisation by which they are employed. They conduct legal representation within the organisation, provide legal advice and information; prepare applications, contracts and other documents; participate in organising legal work. As a general rule, legal advisors, in contrast to attorneys, discharge their duties (which are not as extensive as those of attorneys) as employees. Their compensation is based on the regulations concerning employment. Any person entered in the register maintained by the county court in Budapest can become a legal advisor. Besides, applicants must hold citizenship in one of the member States participating in the Agreement on the European Economic Area; have no criminal record; hold a university degree; have passed the Hungarian professional examination in law.

Ireland

Q147 (2023): Data only relates to those with a practising certificate

Q147 (2022): Practicing solicitors are entitled to represent their clients in court. More information is available here:
•https://mcmahonsolicitors.ie/parties/#:~:text=Originally%2C%20only%20barristers%20had%20rights,majority%20of%20Circuit%20Court%20cases
•https://www.citizensinformation.ie/en/justice/courtroom/solicitors.html

Q147 (2021): Traditionally, solicitors in Ireland could only represent their clients at the District Court and Circuit Court and would be required to engage a barrister to advocate on behalf of their clients at the higher courts. However, this has changed in recent years, and practicing solicitors are now entitled to a rights of audience and may argue cases at all courts. More information is available here:
https://mcmahonsolicitors.ie/parties/#:~:text=Originally%2C%20only%20barristers%20had%20rights,majority%20of%20Circuit%20Court%20cases.
https://www.citizensinformation.ie/en/justice/courtroom/solicitors.html

Latvia

Q147 (2017): According to Advocacy Law of the Republic of Latvia in accordance with the procedures specified by this Law, the following persons may work as advocates in Latvia:
1) sworn advocates;
2) assistants to sworn advocates;
3) citizens of European Union Member States who have obtained the qualification of an advocate in one of the European Union Member States (hereinafter - advocates of European Union Member States).
Foreign advocates, except for advocates of European Union Member States, may practice in Latvia in accordance with the international agreements on legal assistance binding to the Republic of Latvia. Solicitors, in-house counsellors and others is an unregulated profession in Latvia and consequently is not counted, controlled or otherwise supervised.

Lithuania

Q147 (2015): Numbers are taken from the List of Practising Advocates of Lithuania. The list is regulated by the Law on the Bar and administered by Lithuanian Bar Association. The assistants of advocates is not presented in the data.

Netherlands

Q147 (2017): NA

Q147 (2016): NA.

Slovenia

Q147 (General Comment): Persons entered in the directory of the Bar Association of Slovenia are only lawyers (and not other legal experts, in-house counsellors etc.)

Question 148

Bulgaria

Q148 (2019): With a comment that legal advisors, other legal educated staff at institutions, businesses, legal entities and sole traders who are hired employees represent only their employer in court ("as a client")

Q148 (2018): With a comment that legal advisors, other legal educated staff at institutions, businesses, legal entities and sole traders who are hired employees represent only their employer in court ("as a client").

Croatia

Q148 (2020): Not applicable

Cyprus

Q148 (2023): The term legal advisor does not exist. Under Advocates Law a registry of practicing lawyers and a registry of non practicing lawyers is kept. The number described above is for practicing lawyers.

Q148 (2022): the Cyprus Bar Association regulates the Advocates who have a renewed practicing license.

Czech Republic

Q148 (2016): There are no legal advisors (as decribed in the question 147) in the Czech Republic.

Denmark

Q148 (2019): This number include lawyers who have deposited their Danish license to practice as a lawyer. The number is limited to persons born after the 1st of October 1954. Please note that all lawyers have a degree in law (cand.jur), but to practice law in Denmark as an "advokat", lawyers need a license. Lawyers without a license are not included in the number.

Estonia

Q148 (General Comment): Data on the number of legal advisors who cannot represent their clients in court is not collected.

Finland

Q148 (2018): The exact number of legal advisors who cannot represent their clients in court is not available.

France

Q148 (2021): Source DACS

Q148 (2018): There is no regulated profession in France for lawyers who cannot represent clients in court.

Greece

Q148 (2023): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q148 (2022): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q148 (2021): All lawyers can be legal advisers and therefore have the right to be represented in court.

Q148 (2020): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Q148 (2019): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Q148 (2018): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Q148 (2016): All lawyers can be legal advisors therefore they have the right to represent their clients in court.

Hungary

Q148 (2023): Types of lawyers in Hungary
Section 4 of the Act on Legal Practice determines comprehensively who is entitled to practise as a lawyer:
a) attorneys,
b) European community lawyers,
c) foreign legal advisors,
d) bar association legal counsel,
e) employed attorneys,
f) employed European community lawyers,
g) junior attorney and
h) legal advisors registered by the bar association.
In Hungary "attorneys" are those legal professionals who hold a degree in law and have passed the BAR exam and registered by and members of the local bar association. There is no distinction between Hungarian attorneys, such as solicitors and barristers in the UK, any Hungarian attorney can represent a client before the court. An attorney, however, may practise either as an individual attorney, or as a member of a law firm. In other words, he/she can't be an employee. Please see below the number of attorneys practicing in Hungary (i.e., excluding in-house counsels, junior lawyers, EU lawyers):
Number of attorneys (i.e., figures excluding in-house counsels)Total:13,348
Males: NA
Females: NA
Those lawyers who work as employees of a company are called “in-house counsels”. They have the right to represent their employers in any proceedings, the limitation is that they can only act on behalf of their employers and can't have any other clients. There is another category, “registered legal advisors”, who carry out their work under the control of an in-house counsel and have not passed the bar exam yet. Such registered legal advisors have the same representation rights before the court as junior attorneys explained below.
Moreover, there are "employed attorneys" (whose employer is limited to a lawyer or law firm), European legal counsels (under the EU Directives as implemented by Hungarian legislation), and employed European legal counsels.

Ireland

Q148 (2021): Solicitors may represent their clients in all court. However, many prefer to engage a barrister to do so on behalf of their client particularly in the higher courts. The Society is not aware of any exact figure of legal advisors who are prevented from representing their clients in court.

Latvia

Q148 (2017): Solicitors, in-house counsellors and others is an unregulated profession in Latvia and consequently is not counted, controlled or otherwise supervised. Also, for example, Civil Procedure Law provides that in some case categories/the Supreme Court persons can conduct cases by themselves or with the intermediation of an advocate. Due to this it is not possible to count persons who cannot represent their clients in court.

Q148 (2016): There was a mistake in last cycle. Not all legal advisors can represent their clients in court, for instance, in criminal cases only sworn advocate can represent their clients in court.

Malta

Q148 (General Comment): This data was not available prior to 2014. It started being collected by the Department of Justice in 2015.

Q148 (2021): Throughout 2021, 4 new applications have been submitted out of which 3 were accepted.

Q148 (2019): Throughout 2019, only 5 EU legal professionals were granted the respective certificate of registration with the limitation that they cannot represent their clients in court. Many more applications are pending evaluation.

Q148 (2018): The figure of 135 legal advisors is derived form the composite of 101 legal advisors at the end of 2017 and 34 new applications throughout 2018. hence at the end of 2018, there were 135 legal advisors who could practice with an established lawyer in Malta but cannot represent clients in court.

Q148 (2017): In 2017, there have been 25 newly registered legal advisors.

Poland

Q148 (2019): "0" in principle, however: 4078 advocates and 10449 legal advisers - because of their non-practition. Non-practitioners who have not lost their qualifications but who are registered on the list of non-practitioners, cannot provide services to clients, including representation in courts.

Portugal

Q148 (2021): We do not have this figure in Portugal.

Q148 (2020): We do not have this figure in Portugal.

Slovak Republic

Q148 (2018): Slovak legal order does not regulate this type of legal advisors.

Q148 (2017): The Slovak legal system does not recognize this kind of legal advisors.

Indicator 8: Mediators and notaries

Indicator 8: The existence and use of alternative dispute resolution methods

comments provided by the national correspondents

organised by country

Question 166. Number of accredited or registered mediators for court-related mediation:

Question 192. Number and status of notaries in your country.

Austria

Q166 (2019): The list of mediators started in 2004; registration is always limited for a specific period: five years after the initial registration and ten years for continuation of an existing registration. Many mediators registered in 2004, applied for continuation of the registration in 2009 but did not do so in 2019. This explains the significant drop in registered mediators.

Q166 (2015): Q166

Q168
Sec. 198 – 209 CPC

Q192 (General Comment): Civil law notaries are appointed by the Federal Minister of Justice. They are entrusted with official functions but practice within the framework of a liberal profession. The number of notary offices continues to grow in Austria.

Q192 (2023): Federal Ministry of Justice

Q192 (2022): Federal Ministry of Justice

Q192 (2020): Ministry of Justice

Q192 (2018): Notaries in Austria are public office holders.

Belgium

Q166 (General Comment): An individual may hold qualifications in various fields.

Q166 (2021): Data provided by the Federal Mediation Commission: https://www.cfm-fbc.be/fr.
The difference (in figures) with the previous cycle is explained in particular by the removal of mediators who are no longer up to date with their continuing training obligation.
Mediation Barometer 2021 (some figures and trends), link:
https://www.cfm-fbc.be/sites/default/files/content/explorer/slides_barometer_-_fr.pdf
A mediator may receive several accreditations. The Federal Mediation Commission determines the criteria for the accreditation of mediators under Articles 1726 and 1727 § 6 of the Judicial Code.

Q166 (2020):
"The difference in the number of mediators compared to the previous cycle is explained in particular by the removal of mediators who are no longer up to date with their continuing education obligation.
As of 31/12/2020, 2577 mediators are accredited by the Federal Mediation Commission (CFM) and more than 3400 accreditations with this same CFM (some mediators having in fact several accreditations in family, civil and commercial, social, administrative matters).
The difference (as for the figure) with the previous cycle is explained in particular by the striking off of mediators who are no longer up to date with their obligation of permanent training.
"

Q166 (2019): The number of accredited mediators in 2019 was 2,399. The number of approvals (by type of civil litigation) granted to mediators: 3,177, including 2,178 to women and 999 to men.
A mediator can be accredited in family matters as well as in civil and commercial matters. S/he may have one or all of the accreditation (family, civil and commercial, social affairs, mediation with public authorities). So one mediator is not equal to one acreditation.
Q166 (2018): 2122 accredited mediators with 2788 accreditations granted, 907 for male mediators and 1881 accreditations for female mediators
Q166 (2017): Information on mediation: http://www.mediation-justice.be

Q166 (2016): Information on mediation: http://www.mediation-justice.be

Q166 (2015): number of médiators at 13/10/2016

Q192 (General Comment): The notary is a public official who has been delegated by the State to give authenticity to the deeds that s/he draws up, while ensuring that these deeds are preserved, have probative value and are enforceable. To ensure the necessary independence, notaries practise as self-employed professionals.
Notaries: public officers appointed by the State: the Ministry of Justice is responsible for the appointment procedure (Federal Public Service JUSTICE).

Q192 (2023): The Ministry of Justice (Federal Public Service Justice) is responsible for the appointment procedure.

Q192 (2022): The Ministry of Justice is competent with regard to the appointment procedure.

Q192 (2016): The notary is a public official who has received delegation from the State authority to confer authenticity on the acts of which he is the author, while ensuring the conservation, probative force and enforceability of the said acts. In order to ensure the necessary independence of his activity, the notary exercises it within the framework of a liberal profession.

Q192 (2014): In 2014, the figure given corresponded to the number of notaries, associated notaries and alternate notaries.

Bulgaria

Q166 (2023): The information about the number of registered court-related mediators is not available (NA). As of December 2023, the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 4692 (for 2023 the number of newly registered is 862).
Q166 (2022): The information about the number of registered court-related mediators is not available (NA). As of June 2023, the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 3463 (for 2022 the number of newly registered is 226).
Q166 (2021): The information about the number of registered court-related mediators is not available (NA). As of June 2022 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2929 (for 2021 the number of newly registered is 214).
Q166 (2020): The information about the number of registered court-related mediators is not available (NA). As of July 2021 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2767 (for 2020 the number of newly registered is 233).
Q166 (2019): The information about the number of registered court-related mediators is not available (NA). At the end of 2019 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2419.

Q166 (2018): The information about the number of registered court-related mediators is not available (NA). As of May 2019 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2311 (for 2018 the number of newly registered is 250).
Q166 (2015): Number of registered mediators is 1501 up to 31.12.2015.

Q192 (General Comment): Notaries and Notarial Practice Act regulates the legal status of notaries and of the Notary Chamber, the organisation of the notarial practice and notarial fees. Notaries are private persons who are entrusted by the State with the performance of notarial acts as provided for in the laws. They are independent in the performance of their duties and comply solely with the law. The Minister of Justice exercises control over the practice of each notary as to the implementation of the law and the Statute of the Notary Chamber of Bulgaria. The Council of Notaries also has the power to monitor compliance with the obligations of the notaries and the assistant notaries, and may take part through its representatives in disciplinary proceedings against such notaries and assistants in the prescribed cases. The notary procedures are stipulated by the Civil Procedure Code (Articles 569-594).

Q192 (2022): Ministry of Justice

Q192 (2020): According to the current Bulgarian legislation, notaries carry out activities that are explicitly assigned to them through a legal delegation by the state. According to Art. 2, para. 1 of the Law on Notaries and Notarial Activity “the notary is a person to whom the state assigns the performance of the notarial actions provided for in the laws". They are private professionals, who perform their activity independently, with a public function that is given to them by the State. Notaries in Bulgaria are appointed after a national competition organized by the Ministry of Justice and on the basis of an Order of the Minister of Justice. The ministry that is mainly engaged in the procedure is the Ministry of Justice.

Q192 (2018): According to the Bulgarian legislation in force, notaries carry out activities that are explicitly assigned to them through a statutory delegation by the state. According to art.2 para 1 of the Notaries and Notarial Activity/Practice Act “A notary is a person, to whom the state assigns the notary activities stipulated by the law.”

Croatia

Q166 (2023): On June 29, 2023, the Law on the Peaceful Resolution of Disputes ("Official Gazette", number 67/23; hereinafter: ZMRS) entered into force, and it provides in Article 7, Paragraph 1 that the title of mediator is acquired by registration in the Register mediator who runs the Center for Peaceful Resolution of Disputes (https://cmrs.hr/) and eliminated by deletion from the Register.

Q166 (2022): Judges mediators are determined by the Annual Work Schedule.

Q192 (2020): Public notaries in the Republic of Croatia are appointed by the minister competent for judicial affairs.

Cyprus

Q192 (General Comment): Cyprus does not have notaries but certifying officers whose competences are to authenticate as true copies of documents.

Q192 (2020): We only have certifying officers authenticating documents

Czech Republic

Q166 (General Comment): Registered mediators are people who have proven their knowledge and abilities by passing an exam and meet other conditions set by law. According to the law, upon one's request, the Ministry shall register a person who is capable of legal acts, is of good repute and integrity, has obtained a master's degree from university in the Czech Republic (or has obtained a similar higher education abroad, if according to an international treaty to which the Czech Republic is bound the recognition of such education is determined), has passed the mediator exam (or has been recognized as qualified), and has not been removed from the list of mediators in the last 5 years before submitting the application. Person of a good repute and integrity is one who has not been legally sentenced for an intentionally committed criminal offence or a crime committed due to negligence in connection with the performance of the mediator's activities.

Q166 (2023): From the above mentioned number of mediators there are 362 mediators in criminal cases and 364 mediators in non criminal cases (of which there are 313 active mediators).

Q166 (2022): From the above mentioned number of mediators there are 362 mediators in criminal cases and 350 mediators in non criminal cases (of which there are 307 active mediators).

Q166 (2021): From the above mentioned number of mediators there are 359 probate and mediation officials and 327 mediators in non criminal cases.

Q166 (2020): From the above mentioned number of mediators there are 356 probate and mediation officials and 313 mediators in non criminal cases.

Q166 (2019): From the above mentioned number of mediators there are 347 probate and mediation officials and 242 mediators in non criminal cases.

Q166 (2018): From the above mentioned number of mediators there are 429 probate and mediation officials and 228 mediators in non criminal cases. The number of mediators is increasing since the Ministry of Justice supports broader use of other criminal sanctions which are alternatives to imprisonment such as house arrest.

Q166 (2017): From the above mentioned number of mediators there are 421 probate and mediation officials and 239 (from this number 211 active and 28 inactive) mediators in non criminal cases. The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Q166 (2016): From the above mentioned number of mediators there are 398 probate and mediation officials and 222 mediators in non criminal cases. The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Q166 (2015): From the mentioned number of mediators there are 381 probate and mediation officials and 208 mediators in non criminal cases.

The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Q192 (2023): Ministry of Justice

Denmark

Q166 (General Comment): https://domstol.dk/alle-emner/retsmaegling/

Q166 (2022): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2022 is 54. The number of registred jugdes who serves as mediators in court mediation in 2022 is 84.
Q166 (2021): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2021 is 53. The number of registred jugdes who serves as mediators in court mediation in 2021 is 90.
Q166 (2020): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2020 is 53. The number of registred jugdes who serves as mediators in court mediation in 2020 is 90.
Q166 (2018): The number of registered judges who serve as mediators in court mediation in 2018 is 86. The number of registered attorneys
who are appointed to serve as mediators in court mediation in 2018 is 57.
Q166 (2017): In 2017 there are 57 registered attorneys and 78 judges with a special mediation education as of 1st July 2017. There is a different process of appointment. Judge mediators go through a special education, and registered attorneys must file a job application to become mediator. There we have updated numbers for judge mediators. Attorneys are appointed every 4 years and the last appointment window was in 2016. The number of attorneys is therefore the same as last year. Source: http://www.domstol.dk/saadangoerdu/retsmaegling/Documents/Liste%20over%20advokatmaeglere.pdf

Q166 (2016): The number of registered judges who serve as mediators in court mediation in 2016 is 86. The number of registered attorneys who are appointed to serve as mediators in court mediation in 2016 is 57.

Q192 (General Comment): The function of a notary is an integrated function of the district courts. All 24 district courts have one or more notaries which can confirm signatures on important documents or confirm that a copy is identical to the original document. Thus, a notary can confirm the identity of a person who signs a will or another document. With its endorsement, the notary guarantees that the signer understands what it means to make a will. A notary can also witness and confirm that a certain person has signed a special document.
The number of notaries in Denmark is uncertain. The Danish Court Administration does not have precise information regarding the total number of notaries employed by the Danish Courts or the gender of the notaries. However, it is possible to make an approximate statement of the number of notaries in the courts in 2024 based on accounting figures and average costs per year. On this basis, it is estimated that in 2024 there have been approx. 53 full-time notary positions in the district courts. Please note, that ‘notary’ is not an occupation, but a function typically carried out by clerical workers or student assistants at the court. Consequently, at some courts, the function is performed by part-time employees, which means that the number of full-time equivalent positions may not accurately reflect the actual number of individuals serving as notaries.

Q192 (2023): The amount of notaries is uncertain. The Danish Court Administration does not have precise information regarding the total number of notaries employed by the Danish Courts or the gender of the notaries. However, it is possible to make an approximate statement of the number of notaries in the courts in 2023 on the basis of accounting figures and average costs per year. On this basis, it is estimated that in 2023 there have been approx. 41 notary annual works in the district courts.

Estonia

Q192 (General Comment): A notary is an independent holder of office in public law, to whom the State has delegated the duty of ensuring the security of legal relationships and prevention of legal disputes. A notary executes his/her office as a liberal profession in his/her own name and at his/her own responsibility. Notaries are not proprietors but for accounting and taxation purposes, provisions applying to sole proprietors are applied. Notaries are appointed to office by the Minister of Justice according to the number of notaries and their corresponding territorial jurisdiction determined by the Regulation of the Minister of Justice. The Ministry of Justice supervises the professional activities of notaries.

Finland

Q166 (General Comment): A specific training is required for judges who want to become mediators. The training is not an actual legal requirement, but it is a general rule to get special training in order to mediate.
In Finland when you mediate in the court, you do not have to be an accredited or registered mediator. Even the training is not actual legal requirement, but it's a general rule to get a training before you can mediate. We have two different kind of training paths, depending which kind of cases are mediated, civil cases or custody dispute. We do not mediate criminal cases yet. In civil cases training is targeted to judges only and it consist of 3 parts, totally 6 days. First part is a 3-days training and is done before you start mediation, 2 others are done while you have mediated some time (year/ 2 years). First training includes basic theories about mediation, examples, structure of the process and practise. Two latter trainings are basically to deepen your skills.
Child dispute mediation training is meant for judges and auxiliaries. Training path consists from 5 different trainings, some targeted to judges, some to auxiliaries and some are joint trainings total 8 days. Training includes basic mediation theory, custody dispute theory/law, child law/ child rights, practise etc.

Q166 (2023): See comment to 166-1

Q166 (2022): See comment to 166-1

Q166 (2019): In Finland there is no accreditation or a register for court-related mediators. All mediators are trained in a special training program for mediation.
Q192 (General Comment): In Finland, the notary system is not similar to some other European countries. Notaries do not work in the courts but in the local register offices.
The law on public notaries applies to them: https://www.finlex.fi/fi/laki/ajantasa/2014/20140420 (FI) or https://www.finlex.fi/sv/laki/ajantasa/2014/20140420 (SE)

Q192 (2016): In Finland there is not a notary system as in other European countries. Notaries do not work in courts and their competences are limited.
Q192 (2014): In 2014, there were 70 notaries public working in 11 local register offices. According to the Act on Notary Public (420/2014), the heads of Local Register Offices and the officers appointed by them as well as the officials appointed by the State Department of Åland are notaries public.
The number of notaries for 2012 and 2014 was provided by local register offices. Possible reasons/ factors explaining the observed decrease of 48% are the new Act on Public Notaries (420/2014) and the reform of local register offices. The number of the latter has decreased since 2014 (currently their number is 9) and the number of branch offices has decreased as well.

France

Q166 (2023): 2 980 mediators (2 627 individuals/353 legal entities).

Q166 (2021): 2854 of which 2542 are natural persons, the others are legal persons
source SADJAV
Q166 (2020): "There are also 312 legal persons
These data concern only civil mediation and come from the SADJAV and the DACS. The increase in the number of mediators registered on the lists of mediators established by the seond instance courts is indicative of the development of the use of alternative dispute resolution methods and more particularly mediation.
The Ministry of Justice strongly encourages mediators to register on these lists. Registration on the lists of mediators with the second instance courts obeys certain conditions as mentioned in the decree n°2021-95 of January 29, 2021 amending the decrees n°2017-1457 of October 9, 2017 relating to the list of mediators with the second instance court. In addition, the mediator wishing to be registered must provide, in support of his application, supporting documents attesting in particular to his training (decree of January 29, 2021 fixing the list of supporting documents to be provided for registration on the list provided for in article 22-1 A of law n°95-125 of February 8, 1995 relating to the organization of the jurisdictions and to civil, criminal and administrative procedure). A verification of his or her criminal record is also carried out.
These requirements help to ensure the minimum guarantees (training, impartiality, independence and verification of criminal status) required of a mediator recommended by the courts. Finally, the mediators registered on these lists have a better visibility since the litigants are led to go to the lists of the second instance court to find a mediator (https://www.justice.fr/r%C3%A9gler-litiges-autrement/m%C3%A9diation).
A mediator recommended by the justice is, moreover, a guarantee of confidence for the litigants. "

Q166 (2018): The data are approximate because they have been compiled manually from the lists of mediators at the courts of appeal, published and provided for by article 8 of Act No. 2016-1547 of 18 November 2016 on the modernization of 21st century justice and partial because the service is still waiting for the publication and/or registration of 13 lists, on 05 June 2019. It is recalled that in the French judicial system, the judge remains free to appoint a mediator who does not appear on the lists drawn up by the courts of appeal. Indeed, these lists are intended for the information of the judge.

Q166 (2016): Except for the profession of family mediator for which a diploma is required, the profession of mediator in civil and commercial matters is not regulated and there is no national register of mediators. Nevertheless, it is possible to consider as registered: mediators in criminal matters entrusted with tasks by public prosecutors (312), justice conciliators who are volunteers and selected by judicial bodies (1958), and the family mediators empowered by the family allowances funds (670). Data is not presented in full time equivalent.

Q166 (2015): Accredited mediators are family mediators, criminal mediators and legal conciliators, who work in courts or are subsidised by the family allowance funds.

Source: Ministry of Justice, General Secretariat, Sub-Directorate of Statistics and Studies, Access to Law and Victim Assistance Unit

Q192 (General Comment): The status of notaries as public and ministerial officers is defined by the provisions of article 1 of Order no. 45-2590 of 2 November 1945 relating to the status of notaries and article 3 of the amended Act of 25 Ventôse Year XI concerning the organisation of the notarial profession. Article 1 bis of Order no. 45-2590 of 2 November 1945 on the status of notaries defines the various legal forms in which the profession of notary may be practised.

Q192 (2022): As of 30/04/2023, out of a total of 17 429 notaries, 9 880 were women. As of 31/12/2022, these data are not available.

The status of notaries as public and ministerial officers is defined by the provisions of article 1 of Order no. 45-2590 of 2 November 1945 relating to the status of notaries and article 3 of the amended Act of 25 Ventôse Year XI concerning the organisation of the notarial profession. Article 1 bis of Order no. 45-2590 of 2 November 1945 on the status of notaries defines the various legal forms in which the profession of notary may be practised.

Germany

Q166 (General Comment): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Q166 (2023): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.
Q166 (2022): see General Comment
Q166 (2018): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.
Q166 (2017): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available
on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.
Q166 (2016): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.
Q192 (General Comment): The number of appointments as notary is in keeping with the number of notaries required in order to ensure the due and proper administration of the law (section 4 of the Federal Code for Notaries). The applicants are to be identified by advertisement (section 4a of the Federal Code for Notaries). Generally, the notary may not pursue any other profession (section 8 paragraphs (1) and (2) of the Federal Code for Notaries).

Q192 (2023): Notaries hold a public office. They are appointed by the Ministry of Justice of the respective state (“Land”), cf. sec. 12 Federal Code for Notaries.
Q192 (2022): Notaries hold a public office. They are appointed by the Ministry of Justice of the respective state (“Land”), cf. sec. 12 Federal Code for Notaries.
Q192 (2020): Notaries hold a public office. They are appointed by the Ministry of Justice of the respective state (“Land”), cf. sec. 12 Federal Code for Notaries

Greece

Q166 (2021): Of the 2985 mediators active are 2963.

Q166 (2020): There is no relevant information regarding the data.

Q166 (2019): The interest of people to acquire the status of mediator increased in 2019 without any special or official reason.

Q192 (General Comment): Notaries are professionals appointed by the state and in particular, by the Minister of Justice after successful participation in certain public competition. They are considered by our Constitution as public servants without receiving any salary from the State and they practice their profession as in private sector.

Q192 (2020): 2813 active notaries in a total of 3500 organic positions

Q192 (2018): Notaries are professionals appointed by the state and in particular, by the Minister of Justice after successful participation in certain public competition. They are considered by our Constitution as public servants without receiving any salary from the State and they practice their profession as in private sector.

Hungary

Q166 (2023): Discrepancy explanation: The percentage difference can be explained by the low numerical value.

Q166 (2016): There is a continuous training for court secretaries and judges in the field of mediation so that is the reason for the increasing number. To be registered as a court mediator one must finish this training (organized by the National Office for the Judiciary).

Q166 (2014): The increase in the number of judicial mediators between 2013 and 2014 is a result of constant training organized by the National Office for the Judiciary.

Q166 (2013): Registered mediator can be any natural or legal person, who complies with the legal requirements (concerning university degree, mediation training etc.). According to the relevant legislation (Act LV of 2002 on Mediation) mediators established in other EEA Member States (i.e. living in the European Economic Area) can act in a current case in Hungary. The foreign mediator should inform the Ministry of Justice, which shall specify the rights for one year.

Q192 (General Comment): .

Q192 (2023): In Hungary due to the official nature and constitutional status of a civil law notary in exercising public authority a notary may only assume office as a result of a successful application procedure and the appointment of the Minister of Justice. The appointment is the sole event when the notary is commissioned by the State to fulfil tasks forming part of the justice system upon the formal request of clients. The number of notaries and their tariffs is governed by a regulation of the Minister of Justice.
The total number of the Hungarian notarial seats is 313. This is a numerus clausus. In the near future, this number is expected to be reduced by 3. Concerning the difference between the total of the notarial seats (313) and the added number of the male and female notaries (310), the following has to be remarked. On the seats which are vacant (generally because on the given seat a notary retired and the selection procedure is still ongoing or the newly appointed notary has not taken up the activity yet) , the notarial services are fulfilled by another notaries or deputy notaries who act as ‘substitute notaries’. This is a temporary status in both cases. In case of inclusion of the notary acting as susbstitute, his/her gender would be counted twice, giving a false image on the proportion of genders. In case of a deputy notary acting as substitute, it is not sure that the given person will be appointed as a notary to the given seat (it can be a person with the opposite gender). Therefore, we did not find it adequate to include their number into the data provided.

Q192 (2022): In Hungary due to the official nature and constitutional status of a civil law notary in exercising public authority a notary may only assume office as a result of a successful application procedure and the appointment of the Minister of Justice. The appointment is the sole event when the notary is commissioned by the State to fulfil tasks forming part of the justice system upon the formal request of clients. The number of notaries and their tariffs is governed by a regulation of the Minister of Justice.
The total number of the Hungarian notarial seats is 313. This is a numerus clausus. In the near future, this number is expected to be reduced by 3. Concerning the difference between the total of the notarial seats (313) and the added number of the male and female notaries (304), the following has to be remarked. On the seats which are vacant (generally because on the given seat a notary retired and the selection procedure is still ongoing or the newly appointed notary has not taken up the activity yet) , the notarial services are fulfilled by another notaries or deputy notaries who act as ‘substitute notaries’. As this is a temporary status, their number based on genders isn’t included in our calculations.

Q192 (2020): Act XLI of 1991 on Civil Law Notaries

Q192 (2014): According to 2014 data, notaries are appointed by the Minister of Justice for indefinite term. The number of notary positions is regulated by ministerial decree in such a way as to facilitate the access to notarial services in the whole country and to ensure the sustainability of all notarial offices. Civil law notaries are supervised by regional chambers and the Hungarian National Chamber, which is also obliged to provide various supporting IT-systems and to manage the notarial archives. The Minister of Justice has judicial supervisory competence over civil law notaries. The president of the competent Budapest or county court for the seat of the notary public has legal supervision over the actions of the notary, as part of that, he/she may order that the activities of the notary shall be reviewed by the chamber and may also initiate disciplinary proceedings.
Civil law notaries exercise as part of the State judicature official legal authority in accordance with the legal rules of their competence. Therefore, they have public authority. This is the reason why only Hungarian citizens can be appointed public notaries and this is why some elements of the notaries' obligations are similar to those of judges. Namely, the appointment is only possible as a result of an open selection procedure, and it is restricted to the jurisdiction of the local court; in case of notary's absence, a substitute may only be assigned by the local notaries' chamber; the notary is to act personally, impartially, in accordance with the acts regulating his/her competence; the notary is obliged to cooperate which means that he/she can refuse to proceed only if permitted by law, the form of the refusal shall be a writ; in order to facilitate an impartial procedure, the notary, in accordance with the requirement to provide equal opportunities, is obliged to inform the parties of their rights and obligations; the notary is only subject to legal rules; the notary is entitled to use the arms of the

country; the rules on the liability and exclusion of judges are also applicable to notaries; the remuneration of civil law notaries is fixed by law.

Ireland

Q166 (2014): 2014: Reforms are also under consideration. Legislation is being prepared to promote mediation as a viable, effective and efficient alternative to court proceedings thereby reducing legal costs, speeding up the resolution of disputes and relieving the stress involved in court proceedings. It is anticipated that a Mediation Bill will be published in 2015 with a view to enactment of the legislation quickly thereafter.
Q192 (General Comment): Notaries in Ireland are recognised in other countries.

Italy

Q166 (2018): The above figures refer to public mediators who deal with civil and commercial mediation procedures. Therefore these figures do not include mediators in family matters (818) nor in consumer cases.
Q166 (2016): The number of accredited mediators is destined to grow. Probably at a lower growth rate.

Q192 (General Comment): The Notary as existing in Italy belongs to the "Latin (roman) notarial system". The Latin notary is a public officer and a specialized counselor; his/her expertise must cover estate contracts, loans and mortgages, company law, family law, wills law, the relevant sections of fiscal law. The Latin notary also performs other judicial duties as a judicial auxiliary/assistant. Notaries as public officers are professionals who perform public functions. They are vested by the State with public authority and faith, which allows them to draw authentic deeds (or public deeds). Put differently, a notary can be defined as a public officer to whom the State delegates a specific public power, the power to assert (to affirm) the authenticity of a document. The profession of notary is characterized by the qualities of independence and impartiality. A full description of the responsibilities of the notary can be found at the following link: http://www.notariato.it/en/italian-notaries/who-we-are/responsibilities-of-the-notary.html

Latvia

Q166 (2021): Source for question no.166 – website of Council of Certified Mediators https://sertificetimediatori.lv/mediatori/

Q166 (2020): Data are available only about certified mediators. According legislation there can be practicing mediators and certified mediators. The former is a natural person selected freely by the parties who have agreed to conduct mediation while the latter, is a mediator who, in accordance with the procedures laid down in the laws and regulations, has acquired mediation and received a certificate which gives him/her the right to be included in the list of mediators.

Q166 (2019): Data are available only about certified mediators. According legislation there can be practicing mediators and certified mediators. The former is a natural person selected freely by the parties who have agreed to conduct mediation while the latter, is a mediator who, in accordance with the procedures laid down in the laws and regulations, has acquired mediation and received a certificate which gives him/her the right to be included in the list of mediators.

Q166 (2015): Variation of the number of mediators is constant since every year new mediators pass the exam and become certified mediators
Q192 (General Comment): In respect of their official duties, sworn notaries are equivalent to State officials, belonging to the court system.

Q192 (2018): The number of professional notaries (98) is indicated based on the number of actually practising notaries. Previously, there was indicated the number of the work positions, what is according to the regulation of the Cabinet of Ministers.

Lithuania

Q166 (General Comment): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country and the development of the application of mediation might have impact on the significant increase of the number of people that gained the status of mediator.
Till 1st January, 2019 National Couts Administration have been maintained the list of court mediators which included judges and other persons (not judges). Due to a change in legal regulation (from 1st January, 2019), National Courts Administration maintains only the list of Judges who have been granted the status of mediators (Article 5 (2) of the Law on Mediation of the Republic of Lithuania) and transmits this data to the State Garanteed Legal Aid Service. The latter maintains the common list of mediators and decides on the status of mediator for persons who are not judges. The mentioned list is published on the website of the The State Garanteed Legal Aid Service (Article 5 (6) of the Law on Mediation). It is to notice that court-related mediation in practice is more often executed by mediators judges however the mediators who are not judges are also allowed to mediate at this stage when they are appointed by the State Garanteed Legal Aid Service.

Q166 (2021): from 2021 January 1 all mediators registered in the list of mediators of the Republic of Lithuania have the right to conduct judicial mediation in both civil and administrative cases.
Q166 (2020): In 2020 the list contained 438 mediators not judges (of which 100 males and 338 females), and 114 mediators judges (of which 27 males and 87 females).
The Ministry of Justice of the Republic of Lithuania, implementing the project co-financed by the European Union Structural Funds No. 10.1.4-V-922-01-005 "Development of the Conciliation Mediation System", taking into account the expansion of the Institute of Mediation and the consequent increased need for mediators, initiated the organization of training for mediators, during which a total of 420 persons (320 people were trained in the training of 40 academic hours, 100 people took part in the training of 24 academic hours).
This training took place in May – October, 2019. All participants signed a contract for the provision of training services, one of the conditions of which was the obligation to register to take the qualification exam for mediators and to come to take it. Due to the fact that the Training Participants' Agreement did not provide for the obligation to pass the mediators' qualification examination but to come to take it, the Ministry of Justice did not collect information on the proportion of trainees who passed the mediators' qualification examination, but the persons who took part in this training were very active in applying for the qualification examination for mediators. There were also cases when those who did not pass the mediator qualification exam for the first time registered to take the exam again six months later.
October – November in 2020 specialized training for mediators on the topic “Mediation in family disputes in the presence of signs of domestic violence” was organized on the order of the Ministry of Justice. A total of 60 mediators participated in the training. These training were intended to improve the qualification of mediators in disputes where are possible signs of domestic violence, therefore only mediators registered in the list of mediators of the Republic of Lithuania an

d having signed agreements with the State Guaranteed Legal Aid Service on the provision of compulsory mediation services could participate in.
It is noteworthy that the organized training, which were free of charge for their participants, increased the number of mediators in both 2019 and 2020. In this context, it would not be appropriate to compare the increase between 2019 and 2020 .

Q166 (2019): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country might have impact on the significant increase of the number of people that gained the status of mediator.
Till 1st January, 2019 National Couts Administration have been maintained the list of court mediators which included judges and other persons (not judges). Due to a change in legal regulation (from 1st January, 2019), National Courts Administration maintains only the list of Judges who have been granted the status of mediators (Article 5 (2) of the Law on Mediation of the Republic of Lithuania) and transmits this data to the State Garanteed Legal Aid Service. The latter maintains the common list of mediators and decides on the status of mediator for persons who are not judges. The mentioned list is published on the website of the The State Garanteed Legal Aid Service (Article 5 (6) of the Law on Mediation). On 31 December, 2019 the list contained 286 mediators not judges (of which 71 males and 215 females), and 106 mediators judges (of which 25 males and 81 females).
It is to notice that court-related mediation in practice is more often executed by mediators judges however the mediators who are not judges are also allowed to mediate at this stage when they are appointed by the State Garanteed Legal Aid Service.

Q166 (2018): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country might have impact on the significant increase of the number of people that gained the status of mediator.

Q166 (2017): The number of the mediators could increase due to the more effective spread of the information about the judicial mediation.
Q166 (2016): Judicial mediation is becoming more popular, efforts made by the judiciary and the National Courts Administration, as well as the legislator, resulted in an increased number of mediators.
Q166 (2015): National Courts Administration, data of the Activities report of 2015 of the Commission of the Judicial Mediation (http://www.teismai.lt/data/public/uploads/2016/03/teismines-mediacijos-komisijos-2015-m.-veiklos-apibendrinimas.pdf)

The main reforms that have been implemented over the last two years in judicial mediation:
From the 1st January 2015 the judicial mediation is available in all the courts of general jurisdiction. Before it was only available in courts, who participated in the pilot project. It is only available in civil cases. The judicial mediation is free of charge and parties may choose the judicial mediator from the List of Judicial Mediators (the List of Judicial Mediators is available at website https://e.teismas.lt/lt/public/teismin%C4%97-mediacija/). Judges, assisstants of judges, lawyers, psichologists and other persons of different background are on the List of Judicial Mediators.

The peculiarity is that judges can also have the status of judicial mediator. The parties may choose the judge, who deals with the case (if she/he has the status of judicial mediator) to act as judicial mediator. If a peaceful agreement is reached in such a case he/she has also the power to validate it.
Parties may also choose the judge of the Court of Appeal, the Supreme Court of Lithuania to deal with their dispute, which is heard by the court of lower instance, i.e. the dispute, which arose in the court of first instance, can be dealt with by the judge of the higher court.
In order to secure the impartiality of a judge, the judge, who was dealing with the dispute as judicial mediator has an obligation to opt out from the case at later stage.

In order to promote the peaceful settlement of disputes, the Judicial Council has also decided, that judges in every case should decide on suitability of the case for judicial mediation. It was also decided to set at least 4 hours of trainings on judicial mediation in the training programmes of judges.

National Courts

Administration has implemented the EU project on e-services in administration of justice in 2015. During the project, management of the process of judicial mediation was created in the Information System of Lithuanian Courts LITEKO. Parties have a possibility to make a statement in the claim or other document on judicial mediation, the judicial mediator can access the case via electronic means, can arrange the judicial mediation session via electronic means, the parties can discuss on a peaceful agreement, can sign and deliver it to the court via electronic means, i.e. E-Service Portal of Lithuanian Courts (https://e.teismas.lt/en/public/home/).

Q166 (2014): One of the reasons explaining the increase of the number of judicial mediators in 2014 is that from 1st January, 2015 new regulations on judicial mediation came into force, which set stricter requirements for candidates to judicial mediators (requirement for longer trainings (32 hours instead of 16 hours), requirement to attend the meetings of the Judicial Mediation Commission). Therefore persons, who wished to act as judicial mediators hurried to deliver their documents before the 1st. January, 2015, so that their request would be considered under rules, which were valid before 1st. January, 2015.

Q192 (2020): The Ministry of Justice.

Luxembourg

Q166 (General Comment): The figures provided represent the total number of accredited mediators as of 31.12. of the reference year (in civil, commercial and criminal matters) without taking into account mediators who have ceased their activity. Source: Ministry of Justice

Q166 (2022): While no detailed analysis has been conducted on this matter, the use of mediation has emerged in recent years as a preferable alternative for resolving minor cases, such as disputes between neighbours. The increase observed since 2020 in the number of criminal cases where parties agree to initiate mediation could be attributed to positive experiences with the mediation centre, particularly with a view to avoiding such matters being referred to already burdened courts, notably following the health crisis.

Q166 (2020): The increase in the number of mediators is the consequence of a political decision to focus on alternative methods of dispute resolution. This political decision has been translated in particular by a strengthening of the mediation offer.

Q166 (2019): The figures provided represent the total number of accredited mediators (in civil, commercial and criminal matters) without taking into account mediators who have ceased their activity.

Q166 (2016): There are 92 mediators for criminal matter and 81 in civil and commercial matter.

Q192 (2023): Ministry of Justice (https://mj.gouvernement.lu/fr/professions-droit/le-notaire.html)

Q192 (2022): Ministry of Justice (https://mj.gouvernement.lu/en/legal-professions/the-notary.html)

Chamber of Notaries (http://www.notariat.lu/find-a-notary/notaries-directory/)

Q192 (2020): Ministère de la justice (https://mj.gouvernement.lu/fr/professions-droit/le-notaire.html#:~:text=Le%20nombre%20des%20notaires%20est,pour%20l'ensemble%20du%20pays)
Chambre des notairs (http://www.notariat.lu/trouver-un-notaire/annuaire-des-notaires/)

Q192 (2014): In 2014, there were in total 36 notaries with a hybrid status of regulateed liberal profession and public officer.

Malta

Q166 (2017): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Q166 (2016): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Q166 (2015): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Q192 (General Comment): The Notary is a Public Officer and as such is an emanation of the State. At the same time he/she is a free professional with his/her own personal office, independent of the State and of the parties. This dual-nature ensures the right balance between the legal-fiscal functions for which the Notary is the ultimate reference point.
Conveyance (property sales, purchase, leasing, etc.), financing collateral (hypothecation of immovable), succession (wills, trusts, etc.) and matters pertaining to civil status (matrimonial regimes, personal separations, etc.) are all within the ambit of the profession and form the portfolio of a notary’s day-to-day work. It is only through a notarial act that most transactions related to the above are given legal effect and this adds certainty and improves efficiency. Being a necessary passage at Law, the notarial requirement makes for a very cost-effective way of crystallizing a state of certainty in that notarial tariffs are stipulated by law and the citizen is all the more protected. The notarial intervention is thus imposed by law to safeguard legality and ensuring at all times that the autonomy of the private citizen never goes beyond what is legally and statutorily permitted.

Q192 (2020): All Public Notaries are appointed by the state even if they practice in their professional capacity. In previous evaluations we used to list the notaries as 'Public officials' but as from this evaluation, following changes in this question, we are marking them as 'Holders of public offices appointed by the State'.

Q192 (2018): The full list of practising Notaries is published in the Government Gazette every year in January. The above number of Notaries has been derived from the publication issued on the 31st January 2019 accessible at (https://www.gov.mt/en/Government/DOI/Government%20Gazette/Documents/2019/01/Government%20Gazette%20-%2031st%20January.pdf)

Netherlands

Q166 (2018): In campaigns to promote mediation, many people have been trained to become a mediator, and were accredited. Therefore, we observe that there are more people that want to be professional mediators than there is demand for the mediation services. The decrease of the number of mediators was discussed in the news media. The explanation given for the decrease was that the fee for being registered went up substantially. Many mediators who did hardly have cases to mediate, gave up.

Q166 (2015): In the frame of the 2015 exercise the number of mediatiors has increased, especially since the increase of the own financial contribution in divorce cases. Lawyers practice more often judicial mediation, which is less expensive.

Q166 (2014): In the frame of the 2014 exercise, it has been explained that the number of mediations has increased, especially since the increase of the own financial contribution in divorce cases. Lawyers practice more often judicial mediation, which is less expensive.

Q192 (General Comment): Dutch notaries are civil law notaries.
There are three types of notaries: notaries (or notaries entrepreneurs), assigned notaries, and deputy notaries.
Deputy notaries (or deputy civil law notaries) are persons in training to become a notary, or persons who choose to work under a notary. They are not entitled to sign notarial acts in their own name.
Notaries (notary entrepreneur) are formally appointed by the King. They are also entrepreneurs, running their own business.
Assigned notaries are formally appointed by the Minister and are employed by a notary. Both are entitled to sign notarial acts.

Q192 (2023): These numbers can be divided into the following categories (see General comment for an explanation on the type of notaries)
Notary entrepreneurs: 1 234
Assigned notaries: 224
Deputy notaries: 1 972

Q192 (2022): These are numbers on January 1st 2022.
Notaries (or notary-entrepreneurs) are formally appointed by the King. A notary is also an entrepreneur, running his/her own business. The notary may hire ‘assigned notaries’. An assigned notary is formally appointed by the Minister, and is employed by a notary. Both notaries and assigned notaries are entitled to sign notarial acts.
Additionally, there are deputy (civil law) notaries, who are either a person in training to become a notary, or people who choose to continue working under a notary (they are not entitled to sign notarial acts (in their own name). One can remain a deputy notary forever.

Q192 (2020): The count of notaries includes the so-called ‘’candidate’-notaries; they do not hold the full professional status, and a notary with full professional status remains responsible for the work of the candidate. People can remain a ‘çandidate’ for many years, even a life time. Notaries are entrepreneurs, work in/ as private enterprises, and are formally appointed by the King; their profession is regulated by law. There are also ‘added notaries’ (toegevoegde notarissen’): they have fulll responsibility like a notary, but they are not entrepreneurs, they are employees.

Q192 (2018): The count of notaries includes so-called 'candidates'. They do not hold the full professional status and a notary with full professional status remains responsible for the work of a candidate. People can remain 'candidate' for many years, or even a life time.
Notaries can work in private enterprises, but are formally appointed by the King, and their profession is regulated by Law.

Q192 (2014): In 2014, there were 1 336 notaries and 1 631 junior notaries. Notaries are private professionals under the authority (control) of public authorities. Dutch notaries are civil law notaries, meaning that they are fully qualified legal professionals. A notary is not only a sworn official but also an entrepreneur. As of 1 January 2013, it is also possible to become a public official without being an entrepreneur: the assigned notary. To become an assigned notary may be an alternative for junior notaries who do not have entrepreneurial ambition. Other than that the assigned notary has the same competences as the notary entrepreneur. An assigned notary has an employment contract with the notary to whom he/she is assigned and thus he/she is not an entrepreneur; is entitled to sign notarial acts within the protocol of the notary to whom he/she is assigned; acts under the authority of the notary to whom he/she is assigned; is by law the regular replacement of the notary to whom he/she is assigned.

Poland

Q166 (2023): Between 2020 and 2023, the Ministry of Justice implemented a project entitled ‘Dissemination of Alternative Dispute Resolution Methods by Increasing the Competence of Mediators, Establishment of the National Register of Mediators (NCM) and Outreach Activities’. One of the objectives of the project was to professionalise the mediation profession and increase the number of qualified mediators. As part of the project, training courses on the conduct of judicial and extrajudicial mediation in civil cases were organised (most of the training took place in 2022 and 2023) for mediator candidates and mediators. The trainings were attended by more than 1,600 people
For 2023, there is no gender-disaggregated data - confirmed by the head of the mediation department.

Q166 (2021): *2020 data

Q166 (2019): The Ministry of Justice is currently working on the project "Dissemination of alternative dispute resolution methods by raising the competence of mediators, establishing the National Register of Mediators (KRM) and information activities.". The National Register of Mediators (KRM) will be a public register containing information on persons practicing the profession of mediator. The functioning of KRM will allow for ordering and increasing the ministry's control over the activity and number of mediators in Poland.

Q166 (2017): The central register of mediators in Poland is not maintained. There are two separate list of registered mediators maintained by each regional courts – a list of permanent mediators created by the president of a reginal court and a list of mediators created by mediation organisations. There is no possibility to account number of registered mediators because mediators are repeated on both lists and in different courts also.

Q166 (2016): The central register of mediators in Poland is not maintained. There are two separate list of registered mediators maintained by each regional courts – a list of permanent mediators created by the president of a reginal court and a list of mediators created by mediation organisations. There is no possibility to account number of registered mediators because mediators are repeated on both lists and in different courts also.

Q192 (General Comment): The profession of notary is governed in Poland by the Law of 14 February 1991 on notary (OJ 2020, Item 1192, rev.).
The Polish legislator conferred the power to appoint notaries solely on the Minister of Justice. The decision on this matter shall be the decision of the administrative authority on a case-by-case basis, is taken under the provisions of the Code of Administrative Conduct and is discretionary. The Minister of Justice has the competence to select candidates to practice the profession of notary, as well as the designation of their office. Before a decision is taken, the provisions only provide for the obligation to consult the board of the competent board of the notary chamber. The Minister of Justice issues an administrative decision under Article 10 of the Law on notary, is not bound in any way by the content of this opinion, which is assessed like any other evidence. The scope of the discretion granted to the Minister of Justice under Article 10(1) of the Act is limited only by the provisions of articles 10(3) and 11 to 13 of the act. The candidates for notaries, when applying for the appointment of a notary and the appointment of a registry, make an autonomous choice as to the path of life, as well as the place where the profession is to be performed. It is their responsibility only to decide on the specific location of the office. In this respect, the Minister of Justice is bound by the content of the proposal. The law provisions - the notarial law also doesn’t make the creation of another office dependant on the non-exceeding of a specified number of registries in a given registry. There is no numerical restriction of access to the profession of notary in Poland (numerus clausus).
Notariat in Poland belongs to the group of Latin-type notariats, however the status of notaries is not uniform. On the one hand, notaries conduct their activities at their own risk, and the service nature of this activity can be considered to fall within the scope of freed

om of economic activity. In its resolution of 23 March 2016 (III CZP 4/16), the Supreme Court stated, that the notary is an entrepreneur within the meaning of Article 431 of the Civil Code. On the other hand, the notary is a person of public trust who guarantees security of commerce and shall ensure that the rights of the parties to the acts and of third parties are duly safeguarded. Notaries play an important role in the structure of the bodies responsible for applying the law and building the trust of citizens in the state, its institutions and legal trading entities.
A notary shall be appointed to carry out the acts which the parties are obliged or willing to give a notarial form (notarial activities) acts as a public trust person within the scope of these powers, by exercising the protection of public officers (Article 1(1) and Article 2(1) of the Law of 14 February 1991 on notary). The notarial acts, made by a notary in accordance with the law, are authentic (Article 2(2) of the Law - notary Law). When performing notarized activities, the notary collects taxes and court fees related to the notary activity of the parties, which is then transferred to the account of the competent institution. The notary is remunerated for the notarized activities, determined by agreement with the parties. However, the maximum rates of remuneration are determined officially by means of a regulation of the Minister of Justice, issued in agreement with the minister responsible for financial institutions (OJ of 2020, item 1473, rev.).
The notary is responsible for the damage caused in the performance of the notarial procedure and in this respect, is subject to compulsory civil liability insurance. In addition, a notary may be held liable for disciplinary action. Disciplinary courts are called upon to rule on disciplinary matters – at first instance, disciplinary courts of notary chambers, At second instance, a higher disciplinary Court at the National Notarial Council. The appeal of the Court of first Instance is also served by a surety against the Supreme Court. Disciplinary proceedings shall be open, however, the most severe disciplinary penalty is that the law of the law firm is not allowed to run. Notaries are established by a notary public authority to which membership is mandatory. The local government comprises the notarial chambers and the National Council of Notarial. The notarial Chamber is a notary who leads a registry in the district of the appellate court. The number of notary chambers in Poland therefore corresponds to the number of appellate courts (11). The National Notarial Council is the representative of the notary and consists of notaries selected by general meetings of notaries of notary houses.

Q192 (2018): Notaries are appointed by Minister of Justice.

Portugal

Q166 (2023): There is a national registry managed by the Ministry of Justice, on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration of private mediators is not mandatory, there are also some mediators that are not registered and may practice court-related mediation

Q166 (2022): There is a national registry managed by the Ministry of Justice, on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration of private mediators is not mandatory, there are also some mediators that are not registered and may practice court-related mediation

Q166 (2020): There is a national registry on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration is not mandatory, there are also some mediators that are not registered and may practice court-related mediation.)

Q166 (2018): There is a national registry on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration is not mandatory, there are also some mediators that are not registered and may practice court-related mediation.)

Q166 (2017): this number includes mediators of the Ministry of Justice registered public systems mediation and mediators of the Peace Courts. Unlike previous data (before 2016), the 2016 and 2017 data also include accredited conflict mediators in accordance with Law n.29/2013 of 19 April (Mediation Law).
The slight increase in the number of accredited mediators between the years of 2016 and 2017 is due to the increased number of applications for inclusion on the list organized by the Ministry of Justice submitted by private mediators.

Q166 (2016): this number includes mediators of the Ministry of Justice registered public systems mediation and mediators of the Peace Courts. Unlike previous data, it also includes accredited conflict mediators in accordance with Law n.29/2013 of 19 April (Mediation Law).

Q166 (2015):

The given number in question 166 includes the mediators of the Ministry of Justice' registered public systems mediation and mediators of the Peace Courts. In addition to this number there are 234 accredited conflict mediators in accordance with article 9 (1) (e) of Law No. 29/2013, of 19 April (Mediation Law), regulated by Ministerial Ordinance No. 344/2013, of 27 November.

Please acknowledge that registered public system mediators and mediators of the Peace Courts can also be accredited conflict mediators but not the other way around.

Q192 (General Comment): In 2004, a new status of the notarial profession was approved. Since, the notaries are private professionals under the authority (control) of public authorities. They compete for licenses and take office before the Minister of Justice and the president of the Chamber of Notaries. As a transition period is still running, some notaries work as public agents (before 2004, notaries were exclusively public officials). Since 2018, with Decree Law 115/2018, 21st December, "public notaries" ceased to exist and were transfered to the special carrear of registrar.

Q192 (2022): The increase in the number of notaries was due to the takeovers that took place during 2021 and 2022. Specifically, we refer to the grant of licenses for the installation of notary offices, awarded under the 8th Competition (Notice 4822/2022, of March 8) and the competitions for the award of the title of notary (Notice 3552/2021, of February 26 and Notice 3251/2022, of February 17).

Romania

Q166 (2022): The data is provided by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of the persons who meet the conditions provided by law.

Q166 (2021): The data were communicated by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of persons who meet the conditions provided by law. The decrease in the number of mediators is caused by withdrawals or suspensions of mediators' authorizations (possibly because of the low number of requests for mediation).

Q166 (2020): The data were communicated by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of persons who meet the conditions provided by law.

Q166 (2019): The number of mediators accredited annually by the Mediation Council registers fluctuations, from year to year, being related most of the times to the legislative amendments brought to the mediation law, which can determine the increase in the number of persons requesting the accreditation as mediator, after the training courses required by law.

Q166 (2016): Regarding the variation registered in the number of authorizations granted to the mediators during the period 2014-2016, we mention that this was due to the legislative changes in the field of mediation occurred during that period.

Q166 (2013): The increase of the number of mediators in 2012 and 2013 comparing to 2010 is a result of the legislative reforms, stimulating the ADR.

Q192 (2018): Notaries public are not differentiated by gender within the records of the Ministry of Justice.

Slovak Republic

Q166 (2021): In criminal matters is mediation provided by the 84 Probation officers located on District Courts.

Q166 (2020): In criminal matters is mediation provided by the 81 Probation officers located on District Courts.

Q166 (2019): In criminal matters is mediation provided by the 81 Probation officers located on District Courts.

Q166 (2018): In previous cycles the number of registered mediators provided by the Ministry of Justice included all persons listed in the register of mediators, including those who has been stroke out of a list or suspended. For this evaluation cycle we can provide the number of active registered mediators.

Q192 (General Comment): The Act n. 323/1993 Col. on Notaries and Notarial Activities, regulates the status and activities of notaries. A notary is a person appointed and empowered by the State to practice as a notary and carry out other activities in accordance with the law. A notary is appointed by the Minister of Justice on the basis of selection procedure, as a general rule to hold office within the geographical jurisdiction of a court of first instance. Notary is holding public office until the age of 67. He/she is not part of state bureaucracy; he/she is not bounded by any instructions, but is subject to State supervision, performed by the Minister of Justice. State is thus entitled to issue legislation regulating the activities of the notaries, self-governance of the notaries, as well as designate the number of notarial offices within the district of Court of first instance. A notary is impartial and independent in the performance of his/her duties. He/she is bound only by the Constitution, laws and other general implementing legislation. The office of a notary is incompatible with entrepreneurial activities or other gainful activity, except for the management of the notary's own assets and those of his/her minor children, and academic, publishing, pedagogical, interpreting and artistic activity. A notary may not act as an expert in cases where he/she acts as a court commissioner.

Q192 (2023): Ministry of Justice

Q192 (2022): Ministry of Justice of the Slovak republic.

Slovenia

Q166 (2021): The procedures for listing (and un-listing) individual mediators are led by individual courts.

Q192 (General Comment): A notary is a legal official who has been entrusted by the public authority with the safeguarding of the freedom of consent and the protection of the rightful interests of individuals. The presence of the notary confers authenticity to legal acts. As a guarantor of legal security, the notary has an important role to play in limiting subsequent litigation. Thereby, he/she is a major actor in preventive justice.

Spain

Q166 (2023): The figure provided is the number of mediators (natural and legal persons) registered in the Registry of Mediators.
With the entry into force of Law 16/2022 of September 5th, which reformed the consolidated text of the Insolvency Act, the figure of the insolvency mediator has been eliminated. Consequently, the registration of insolvency mediators in the Mediators Registry, both natural persons and legal entities, has been annulled. Therefore, the total number of mediators is lower than that provided in previous years. It should be added that this Registry is not mandatory, so the number of mediators may be higher.

Q166 (2022): The figure provided is the number of mediators (natural and legal persons) registered in the Registry of Mediators.
This Registry is not compulsory, so the number of persons that act as mediatos may be higher.

Q166 (2021): The figure provided is the addition of number of mediators (natural persons), Institutions of mediation, Mediators in insolvency cases and Mediators in insolvency cases (legal persons); all of them registered in the Registry of Mediators.
This Registry is not compulsory for civil cases, so the number of persons that act as mediatos may be higher.

Q166 (2020): The figure provided is the number of mediators (natural and legal persons) registered in the Registry of Mediators.
This Registry is not compulsory, so the number of persons that act as mediatos may be higher.
Mediation does not have a long tradition in Spain. However, it has good legislative support, and broad institutional support (for example, from the General Council of the Judiciary).
The Draft Law on Procedural Efficiency Measures contains rules that will enhance it (such as providing that the attempted solution be a prior procedural requirement).

Q166 (2019): The figure indicated is the sum of [Mediators + Insolvency mediators + Institutions of Mediation + Legal Persons Insolvency
mediators] registered in the Registry of Mediation of the Ministry of Justice.
The registry is not compulsory and there are other Registries in Autonomous Regions.

Q166 (2018): The figure indicated is the sum of [Mediators + Insolvency mediators + Institutions of Mediation + Legal Persons Insolvency mediators] registered in the Registry of Mediation of the Ministry of Justice.
The registry is not compulsory and there are other Registries in Autonomous Regions. Therefore, the figure is not a complete and perfect national data.

Q166 (2017): The data indicates the number of natural persons registered as Mediators and Mediators on Insolvency, in the Registry of Mediators and Mediation Institutions. (Registration is not compulsory).
Moreover, there are 123 Institutions of Mediation, and other 132 legal persons registered as Mediators on Insolvency. Law 5/2012 on mediation in civil and commercial matters regulated mediation. The Royal Decree 980/2013, develops the previous Law and creates the Register of Mediators and Mediation Institutions. Registration in the Register is voluntary, therefore, its figures are still indicative. But in general the regulation offers a better structuring of the Mediation Institution and a progressive improvement of the quality of the data. Moreover, Mediation is being developed and implemented more and more, both by public initiatives and by professional Associations.

Q166 (2016): In the Registry of the Ministry of Justice there are 1160 private mediators registered who work in the whole territory. The mediation takes place out of Courts. The Court during the first hearing informs to the parties about the possibility of going to mediation, and can suspend the procedure if the parties decide to try the mediation.
The registry mentioned is voluntary (not mandatory), so the figure is a posible approximation. The number of Institutions of Mediation is 66.

Q166 (2015): The approval in 2012 of the Act on mediation in civil and commercial matters could have influence on the increase in the number of mediators.
Q192 (General Comment): "The Notaries' regulation (Decree of 2 June 1944) states in article 1 that "notaries are both civil servants and legal professionals, corresponding to this double character the organization of Notaries. As officials, they exercise notarial public faith, which has and protects a double content:
a) In the field of facts, the accuracy of what the notary sees, hears or perceives through his senses.
b) And in the sphere of Law, the authenticity and probative force of the declarations of will of the parties in the public instrument drawn up in accordance with the laws.
As legal professionals, they have the mission of advising those who claim their ministry and advise them of the most appropriate legal means to achieve the lawful ends that they intend to achieve.
The Notary will enjoy full autonomy and independence in its function, and in its hierarchical organization it reports directly to the Ministry of Justice and the General Directorate of Registries and Notaries".

Indicator 8: The existence and use of alternative dispute resolution methods

comments provided by the national correspondents

organised by question no.

Question 166. Number of accredited or registered mediators for court-related mediation:

Question 192. Number and status of notaries in your country.

Question 166

Austria

Q166 (2019): The list of mediators started in 2004; registration is always limited for a specific period: five years after the initial registration and ten years for continuation of an existing registration. Many mediators registered in 2004, applied for continuation of the registration in 2009 but did not do so in 2019. This explains the significant drop in registered mediators.

Q166 (2015): Q166
http://www.mediatorenliste.justiz.gv.at

Q168
Sec. 198 – 209 CPC

Belgium

Q166 (General Comment): An individual may hold qualifications in various fields.

Q166 (2021): Data provided by the Federal Mediation Commission: https://www.cfm-fbc.be/fr.
The difference (in figures) with the previous cycle is explained in particular by the removal of mediators who are no longer up to date with their continuing training obligation.
Mediation Barometer 2021 (some figures and trends), link:
https://www.cfm-fbc.be/sites/default/files/content/explorer/slides_barometer_-_fr.pdf
A mediator may receive several accreditations. The Federal Mediation Commission determines the criteria for the accreditation of mediators under Articles 1726 and 1727 § 6 of the Judicial Code.

Q166 (2020):
"The difference in the number of mediators compared to the previous cycle is explained in particular by the removal of mediators who are no longer up to date with their continuing education obligation.
As of 31/12/2020, 2577 mediators are accredited by the Federal Mediation Commission (CFM) and more than 3400 accreditations with this same CFM (some mediators having in fact several accreditations in family, civil and commercial, social, administrative matters).
The difference (as for the figure) with the previous cycle is explained in particular by the striking off of mediators who are no longer up to date with their obligation of permanent training.
"

Q166 (2019): The number of accredited mediators in 2019 was 2,399. The number of approvals (by type of civil litigation) granted to mediators: 3,177, including 2,178 to women and 999 to men.
A mediator can be accredited in family matters as well as in civil and commercial matters. S/he may have one or all of the accreditation (family, civil and commercial, social affairs, mediation with public authorities). So one mediator is not equal to one acreditation.

Q166 (2018): 2122 accredited mediators with 2788 accreditations granted, 907 for male mediators and 1881 accreditations for female mediators

Q166 (2017): Information on mediation: http://www.mediation-justice.be

Q166 (2016): Information on mediation: http://www.mediation-justice.be

Q166 (2015): number of médiators at 13/10/2016

Bulgaria

Q166 (2023): The information about the number of registered court-related mediators is not available (NA). As of December 2023, the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 4692 (for 2023 the number of newly registered is 862).

Q166 (2022): The information about the number of registered court-related mediators is not available (NA). As of June 2023, the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 3463 (for 2022 the number of newly registered is 226).

Q166 (2021): The information about the number of registered court-related mediators is not available (NA). As of June 2022 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2929 (for 2021 the number of newly registered is 214).

Q166 (2020): The information about the number of registered court-related mediators is not available (NA). As of July 2021 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2767 (for 2020 the number of newly registered is 233).

Q166 (2019): The information about the number of registered court-related mediators is not available (NA). At the end of 2019 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2419.

Q166 (2018): The information about the number of registered court-related mediators is not available (NA). As of May 2019 the total number of mediators registered in the Unified Register of Mediators at the Ministry of Justice is 2311 (for 2018 the number of newly registered is 250).

Q166 (2015): Number of registered mediators is 1501 up to 31.12.2015.

Croatia

Q166 (2023): On June 29, 2023, the Law on the Peaceful Resolution of Disputes ("Official Gazette", number 67/23; hereinafter: ZMRS) entered into force, and it provides in Article 7, Paragraph 1 that the title of mediator is acquired by registration in the Register mediator who runs the Center for Peaceful Resolution of Disputes (https://cmrs.hr/) and eliminated by deletion from the Register.

Q166 (2022): Judges mediators are determined by the Annual Work Schedule.

Czech Republic

Q166 (General Comment): Registered mediators are people who have proven their knowledge and abilities by passing an exam and meet other conditions set by law. According to the law, upon one's request, the Ministry shall register a person who is capable of legal acts, is of good repute and integrity, has obtained a master's degree from university in the Czech Republic (or has obtained a similar higher education abroad, if according to an international treaty to which the Czech Republic is bound the recognition of such education is determined), has passed the mediator exam (or has been recognized as qualified), and has not been removed from the list of mediators in the last 5 years before submitting the application. Person of a good repute and integrity is one who has not been legally sentenced for an intentionally committed criminal offence or a crime committed due to negligence in connection with the performance of the mediator's activities.

Q166 (2023): From the above mentioned number of mediators there are 362 mediators in criminal cases and 364 mediators in non criminal cases (of which there are 313 active mediators).

Q166 (2022): From the above mentioned number of mediators there are 362 mediators in criminal cases and 350 mediators in non criminal cases (of which there are 307 active mediators).

Q166 (2021): From the above mentioned number of mediators there are 359 probate and mediation officials and 327 mediators in non criminal cases.

Q166 (2020): From the above mentioned number of mediators there are 356 probate and mediation officials and 313 mediators in non criminal cases.

Q166 (2019): From the above mentioned number of mediators there are 347 probate and mediation officials and 242 mediators in non criminal cases.

Q166 (2018): From the above mentioned number of mediators there are 429 probate and mediation officials and 228 mediators in non criminal cases. The number of mediators is increasing since the Ministry of Justice supports broader use of other criminal sanctions which are alternatives to imprisonment such as house arrest.

Q166 (2017): From the above mentioned number of mediators there are 421 probate and mediation officials and 239 (from this number 211 active and 28 inactive) mediators in non criminal cases. The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Q166 (2016): From the above mentioned number of mediators there are 398 probate and mediation officials and 222 mediators in non criminal cases. The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Q166 (2015): From the mentioned number of mediators there are 381 probate and mediation officials and 208 mediators in non criminal cases.
The number of mediators in non criminal cases is constantly increasing since the entry into force of a law on judicial mediation in civil matters in 2012.

Denmark

Q166 (General Comment): https://domstol.dk/alle-emner/retsmaegling/

Q166 (2022): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2022 is 54. The number of registred jugdes who serves as mediators in court mediation in 2022 is 84.

Q166 (2021): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2021 is 53. The number of registred jugdes who serves as mediators in court mediation in 2021 is 90.

Q166 (2020): The number of registered attorneys who are appointed to serve as mediators in court mediation in 2020 is 53. The number of registred jugdes who serves as mediators in court mediation in 2020 is 90.

Q166 (2018): The number of registered judges who serve as mediators in court mediation in 2018 is 86. The number of registered attorneys
who are appointed to serve as mediators in court mediation in 2018 is 57.

Q166 (2017): In 2017 there are 57 registered attorneys and 78 judges with a special mediation education as of 1st July 2017. There is a different process of appointment. Judge mediators go through a special education, and registered attorneys must file a job application to become mediator. There we have updated numbers for judge mediators. Attorneys are appointed every 4 years and the last appointment window was in 2016. The number of attorneys is therefore the same as last year. Source: http://www.domstol.dk/saadangoerdu/retsmaegling/Documents/Liste%20over%20advokatmaeglere.pdf

Q166 (2016): The number of registered judges who serve as mediators in court mediation in 2016 is 86. The number of registered attorneys who are appointed to serve as mediators in court mediation in 2016 is 57.

Finland

Q166 (General Comment): A specific training is required for judges who want to become mediators. The training is not an actual legal requirement, but it is a general rule to get special training in order to mediate.
In Finland when you mediate in the court, you do not have to be an accredited or registered mediator. Even the training is not actual legal requirement, but it's a general rule to get a training before you can mediate. We have two different kind of training paths, depending which kind of cases are mediated, civil cases or custody dispute. We do not mediate criminal cases yet. In civil cases training is targeted to judges only and it consist of 3 parts, totally 6 days. First part is a 3-days training and is done before you start mediation, 2 others are done while you have mediated some time (year/ 2 years). First training includes basic theories about mediation, examples, structure of the process and practise. Two latter trainings are basically to deepen your skills.
Child dispute mediation training is meant for judges and auxiliaries. Training path consists from 5 different trainings, some targeted to judges, some to auxiliaries and some are joint trainings total 8 days. Training includes basic mediation theory, custody dispute theory/law, child law/ child rights, practise etc.

Q166 (2023): See comment to 166-1

Q166 (2022): See comment to 166-1

Q166 (2019): In Finland there is no accreditation or a register for court-related mediators. All mediators are trained in a special training program for mediation.

France

Q166 (2023): 2 980 mediators (2 627 individuals/353 legal entities).

Q166 (2021): 2854 of which 2542 are natural persons, the others are legal persons
source SADJAV

Q166 (2020): "There are also 312 legal persons
These data concern only civil mediation and come from the SADJAV and the DACS. The increase in the number of mediators registered on the lists of mediators established by the seond instance courts is indicative of the development of the use of alternative dispute resolution methods and more particularly mediation.
The Ministry of Justice strongly encourages mediators to register on these lists. Registration on the lists of mediators with the second instance courts obeys certain conditions as mentioned in the decree n°2021-95 of January 29, 2021 amending the decrees n°2017-1457 of October 9, 2017 relating to the list of mediators with the second instance court. In addition, the mediator wishing to be registered must provide, in support of his application, supporting documents attesting in particular to his training (decree of January 29, 2021 fixing the list of supporting documents to be provided for registration on the list provided for in article 22-1 A of law n°95-125 of February 8, 1995 relating to the organization of the jurisdictions and to civil, criminal and administrative procedure). A verification of his or her criminal record is also carried out.
These requirements help to ensure the minimum guarantees (training, impartiality, independence and verification of criminal status) required of a mediator recommended by the courts. Finally, the mediators registered on these lists have a better visibility since the litigants are led to go to the lists of the second instance court to find a mediator (https://www.justice.fr/r%C3%A9gler-litiges-autrement/m%C3%A9diation).
A mediator recommended by the justice is, moreover, a guarantee of confidence for the litigants. "

Q166 (2018): The data are approximate because they have been compiled manually from the lists of mediators at the courts of appeal, published and provided for by article 8 of Act No. 2016-1547 of 18 November 2016 on the modernization of 21st century justice and partial because the service is still waiting for the publication and/or registration of 13 lists, on 05 June 2019. It is recalled that in the French judicial system, the judge remains free to appoint a mediator who does not appear on the lists drawn up by the courts of appeal. Indeed, these lists are intended for the information of the judge.

Q166 (2016): Except for the profession of family mediator for which a diploma is required, the profession of mediator in civil and commercial matters is not regulated and there is no national register of mediators. Nevertheless, it is possible to consider as registered: mediators in criminal matters entrusted with tasks by public prosecutors (312), justice conciliators who are volunteers and selected by judicial bodies (1958), and the family mediators empowered by the family allowances funds (670). Data is not presented in full time equivalent.

Q166 (2015): Accredited mediators are family mediators, criminal mediators and legal conciliators, who work in courts or are subsidised by the family allowance funds.

Germany

Q166 (General Comment): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Q166 (2023): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Q166 (2022): see General Comment

Q166 (2018): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Q166 (2017): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available
on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Q166 (2016): Germany does not have a system of accreditation or registration for mediators. In addition, there is no statistical data available on the number of court annexed mediation cases. For these reasons, Germany cannot provide information on the number of accredited or registered mediators who practice judicial mediation.

Greece

Q166 (2021): Of the 2985 mediators active are 2963.

Q166 (2020): There is no relevant information regarding the data.

Q166 (2019): The interest of people to acquire the status of mediator increased in 2019 without any special or official reason.

Hungary

Q166 (2023): Discrepancy explanation: The percentage difference can be explained by the low numerical value.

Q166 (2016): There is a continuous training for court secretaries and judges in the field of mediation so that is the reason for the increasing number. To be registered as a court mediator one must finish this training (organized by the National Office for the Judiciary).

Q166 (2014): The increase in the number of judicial mediators between 2013 and 2014 is a result of constant training organized by the National Office for the Judiciary.

Q166 (2013): Registered mediator can be any natural or legal person, who complies with the legal requirements (concerning university degree, mediation training etc.). According to the relevant legislation (Act LV of 2002 on Mediation) mediators established in other EEA Member States (i.e. living in the European Economic Area) can act in a current case in Hungary. The foreign mediator should inform the Ministry of Justice, which shall specify the rights for one year.

Ireland

Q166 (2014): 2014: Reforms are also under consideration. Legislation is being prepared to promote mediation as a viable, effective and efficient alternative to court proceedings thereby reducing legal costs, speeding up the resolution of disputes and relieving the stress involved in court proceedings. It is anticipated that a Mediation Bill will be published in 2015 with a view to enactment of the legislation quickly thereafter.

Italy

Q166 (2018): The above figures refer to public mediators who deal with civil and commercial mediation procedures. Therefore these figures do not include mediators in family matters (818) nor in consumer cases.

Q166 (2016): The number of accredited mediators is destined to grow. Probably at a lower growth rate.

Latvia

Q166 (2021): Source for question no.166 – website of Council of Certified Mediators https://sertificetimediatori.lv/mediatori/

Q166 (2020): Data are available only about certified mediators. According legislation there can be practicing mediators and certified mediators. The former is a natural person selected freely by the parties who have agreed to conduct mediation while the latter, is a mediator who, in accordance with the procedures laid down in the laws and regulations, has acquired mediation and received a certificate which gives him/her the right to be included in the list of mediators.

Q166 (2019): Data are available only about certified mediators. According legislation there can be practicing mediators and certified mediators. The former is a natural person selected freely by the parties who have agreed to conduct mediation while the latter, is a mediator who, in accordance with the procedures laid down in the laws and regulations, has acquired mediation and received a certificate which gives him/her the right to be included in the list of mediators.

Q166 (2015): Variation of the number of mediators is constant since every year new mediators pass the exam and become certified mediators

Lithuania

Q166 (General Comment): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country and the development of the application of mediation might have impact on the significant increase of the number of people that gained the status of mediator.
Till 1st January, 2019 National Couts Administration have been maintained the list of court mediators which included judges and other persons (not judges). Due to a change in legal regulation (from 1st January, 2019), National Courts Administration maintains only the list of Judges who have been granted the status of mediators (Article 5 (2) of the Law on Mediation of the Republic of Lithuania) and transmits this data to the State Garanteed Legal Aid Service. The latter maintains the common list of mediators and decides on the status of mediator for persons who are not judges. The mentioned list is published on the website of the The State Garanteed Legal Aid Service (Article 5 (6) of the Law on Mediation). It is to notice that court-related mediation in practice is more often executed by mediators judges however the mediators who are not judges are also allowed to mediate at this stage when they are appointed by the State Garanteed Legal Aid Service.

Q166 (2021): from 2021 January 1 all mediators registered in the list of mediators of the Republic of Lithuania have the right to conduct judicial mediation in both civil and administrative cases.

Q166 (2020): In 2020 the list contained 438 mediators not judges (of which 100 males and 338 females), and 114 mediators judges (of which 27 males and 87 females).
The Ministry of Justice of the Republic of Lithuania, implementing the project co-financed by the European Union Structural Funds No. 10.1.4-V-922-01-005 "Development of the Conciliation Mediation System", taking into account the expansion of the Institute of Mediation and the consequent increased need for mediators, initiated the organization of training for mediators, during which a total of 420 persons (320 people were trained in the training of 40 academic hours, 100 people took part in the training of 24 academic hours).
This training took place in May – October, 2019. All participants signed a contract for the provision of training services, one of the conditions of which was the obligation to register to take the qualification exam for mediators and to come to take it. Due to the fact that the Training Participants' Agreement did not provide for the obligation to pass the mediators' qualification examination but to come to take it, the Ministry of Justice did not collect information on the proportion of trainees who passed the mediators' qualification examination, but the persons who took part in this training were very active in applying for the qualification examination for mediators. There were also cases when those who did not pass the mediator qualification exam for the first time registered to take the exam again six months later.
October – November in 2020 specialized training for mediators on the topic “Mediation in family disputes in the presence of signs of domestic violence” was organized on the order of the Ministry of Justice. A total of 60 mediators participated in the training. These training were intended to improve the qualification of mediators in disputes where are possible signs of domestic violence, therefore only mediators registered in the list of mediators of the Republic of Lithuania an

d having signed agreements with the State Guaranteed Legal Aid Service on the provision of compulsory mediation services could participate in.
It is noteworthy that the organized training, which were free of charge for their participants, increased the number of mediators in both 2019 and 2020. In this context, it would not be appropriate to compare the increase between 2019 and 2020 .

Q166 (2019): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country might have impact on the significant increase of the number of people that gained the status of mediator.

The latter maintains the common list of mediators and decides on the status of mediator for persons who are not judges. The mentioned list is published on the website of the The State Garanteed Legal Aid Service (Article 5 (6) of the Law on Mediation). On 31 December, 2019 the list contained 286 mediators not judges (of which 71 males and 215 females), and 106 mediators judges (of which 25 males and 81 females).
It is to notice that court-related mediation in practice is more often executed by mediators judges however the mediators who are not judges are also allowed to mediate at this stage when they are appointed by the State Garanteed Legal Aid Service.

Q166 (2018): On 29 June, 2017 new regulation for mediation and becoming mediator was adopted which entered into force from 2019-01-01. The amendments that have been made set new requirements to improve the quality of mediation services. Also, the establishment of mediation as a professional activity (with the exception of judicial mediation by judges) is approved, part of such activity is paid by state. These factors as well as the overall promotion of mediation in the country might have impact on the significant increase of the number of people that gained the status of mediator.

Q166 (2017): The number of the mediators could increase due to the more effective spread of the information about the judicial mediation.

Q166 (2016): Judicial mediation is becoming more popular, efforts made by the judiciary and the National Courts Administration, as well as the legislator, resulted in an increased number of mediators.

Q166 (2015): National Courts Administration, data of the Activities report of 2015 of the Commission of the Judicial Mediation (http://www.teismai.lt/data/public/uploads/2016/03/teismines-mediacijos-komisijos-2015-m.-veiklos-apibendrinimas.pdf)

The main reforms that have been implemented over the last two years in judicial mediation:
From the 1st January 2015 the judicial mediation is available in all the courts of general jurisdiction. Before it was only available in courts, who participated in the pilot project. It is only available in civil cases. The judicial mediation is free of charge and parties may choose the judicial mediator from the List of Judicial Mediators (the List of Judicial Mediators is available at website https://e.teismas.lt/lt/public/teismin%C4%97-mediacija/). Judges, assisstants of judges, lawyers, psichologists and other persons of different background are on the List of Judicial Mediators.

The peculiarity is that judges can also have the status of judicial mediator. The parties may choose the judge, who deals with the case (if she/he has the status of judicial mediator) to act as judicial mediator. If a peaceful agreement is reached in such a case he/she has also the power to validate it.
Parties may also choose the judge of the Court of Appeal, the Supreme Court of Lithuania to deal with their dispute, which is heard by the court of lower instance, i.e. the dispute, which arose in the court of first instance, can be dealt with by the judge of the higher court.
In order to secure the impartiality of a judge, the judge, who was dealing with the dispute as judicial mediator has an obligation to opt out from the case at later stage.

In order to promote the peaceful settlement of disputes, the Judicial Council has also decided, that judges in every case should decide on suitability of the case for judicial mediation. It was also decided to set at least 4 hours of trainings on judicial mediation in the training programmes of judges.

National Courts

Administration has implemented the EU project on e-services in administration of justice in 2015. During the project, management of the process of judicial mediation was created in the Information System of Lithuanian Courts LITEKO. Parties have a possibility to make a statement in the claim or other document on judicial mediation, the judicial mediator can access the case via electronic means, can arrange the judicial mediation session via electronic means, the parties can discuss on a peaceful agreement, can sign and deliver it to the court via electronic means, i.e. E-Service Portal of Lithuanian Courts (https://e.teismas.lt/en/public/home/).

Q166 (2014): One of the reasons explaining the increase of the number of judicial mediators in 2014 is that from 1st January, 2015 new regulations on judicial mediation came into force, which set stricter requirements for candidates to judicial mediators (requirement for longer trainings (32 hours instead of 16 hours), requirement to attend the meetings of the Judicial Mediation Commission). Therefore persons, who wished to act as judicial mediators hurried to deliver their documents before the 1st. January, 2015, so that their request would be considered under rules, which were valid before 1st. January, 2015.

Luxembourg

Q166 (General Comment): The figures provided represent the total number of accredited mediators as of 31.12. of the reference year (in civil, commercial and criminal matters) without taking into account mediators who have ceased their activity. Source: Ministry of Justice

Q166 (2022): While no detailed analysis has been conducted on this matter, the use of mediation has emerged in recent years as a preferable alternative for resolving minor cases, such as disputes between neighbours. The increase observed since 2020 in the number of criminal cases where parties agree to initiate mediation could be attributed to positive experiences with the mediation centre, particularly with a view to avoiding such matters being referred to already burdened courts, notably following the health crisis.

Q166 (2020): The increase in the number of mediators is the consequence of a political decision to focus on alternative methods of dispute resolution. This political decision has been translated in particular by a strengthening of the mediation offer.

Q166 (2019): The figures provided represent the total number of accredited mediators (in civil, commercial and criminal matters) without taking into account mediators who have ceased their activity.

Q166 (2016): There are 92 mediators for criminal matter and 81 in civil and commercial matter.

Malta

Q166 (2017): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Q166 (2016): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Q166 (2015): The data regarding the number of mediators was provided by The Malta Mediation Centre, quoting the number of mediators duly accredited and registered in terms of the provisions of the Mediation Act, 2004 (Cap. 474 of the Laws of Malta).

Netherlands

Q166 (2018): In campaigns to promote mediation, many people have been trained to become a mediator, and were accredited. Therefore, we observe that there are more people that want to be professional mediators than there is demand for the mediation services. The decrease of the number of mediators was discussed in the news media. The explanation given for the decrease was that the fee for being registered went up substantially. Many mediators who did hardly have cases to mediate, gave up.

Q166 (2015): In the frame of the 2015 exercise the number of mediatiors has increased, especially since the increase of the own financial contribution in divorce cases. Lawyers practice more often judicial mediation, which is less expensive.

Q166 (2014): In the frame of the 2014 exercise, it has been explained that the number of mediations has increased, especially since the increase of the own financial contribution in divorce cases. Lawyers practice more often judicial mediation, which is less expensive.

Poland

Q166 (2023): Between 2020 and 2023, the Ministry of Justice implemented a project entitled 'Dissemination of Alternative Dispute Resolution Methods by Increasing the Competence of Mediators, Establishment of the National Register of Mediators (NCM) and Outreach Activities'. One of the objectives of the project was to professionalise the mediation profession and increase the number of qualified mediators. As part of the project, training courses on the conduct of judicial and extrajudicial mediation in civil cases were organised (most of the training took place in 2022 and 2023) for mediator candidates and mediators. The trainings were attended by more than 1,600 people
For 2023, there is no gender-disaggregated data - confirmed by the head of the mediation department.

Q166 (2021): *2020 data

Q166 (2019): The Ministry of Justice is currently working on the project "Dissemination of alternative dispute resolution methods by raising the competence of mediators, establishing the National Register of Mediators (KRM) and information activities.". The National Register of Mediators (KRM) will be a public register containing information on persons practicing the profession of mediator. The functioning of KRM will allow for ordering and increasing the ministry's control over the activity and number of mediators in Poland.

Q166 (2017): The central register of mediators in Poland is not maintained. There are two separate list of registered mediators maintained by each regional courts – a list of permanent mediators created by the president of a reginal court and a list of mediators created by mediation organisations. There is no possibility to account number of registered mediators because mediators are repeated on both lists and in different courts also.

Q166 (2016): The central register of mediators in Poland is not maintained. There are two separate list of registered mediators maintained by each regional courts – a list of permanent mediators created by the president of a reginal court and a list of mediators created by mediation organisations. There is no possibility to account number of registered mediators because mediators are repeated on both lists and in different courts also.

Portugal

Q166 (2023): There is a national registry managed by the Ministry of Justice, on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration of private mediators is not mandatory, there are also some mediators that are not registered and may practice court-related mediation

Q166 (2022): There is a national registry managed by the Ministry of Justice, on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration of private mediators is not mandatory, there are also some mediators that are not registered and may practice court-related mediation

Q166 (2020): There is a national registry on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration is not mandatory, there are also some mediators that are not registered and may practice court-related mediation.)

Q166 (2018): There is a national registry on private mediators and also a national registry on public mediators, but one can not determine who among them practice court- related mediation. Besides, since the registration is not mandatory, there are also some mediators that are not registered and may practice court-related mediation.)

Q166 (2017): this number includes mediators of the Ministry of Justice registered public systems mediation and mediators of the Peace Courts. Unlike previous data (before 2016), the 2016 and 2017 data also include accredited conflict mediators in accordance with Law n.29/2013 of 19 April (Mediation Law).
The slight increase in the number of accredited mediators between the years of 2016 and 2017 is due to the increased number of applications for inclusion on the list organized by the Ministry of Justice submitted by private mediators.

Q166 (2016): this number includes mediators of the Ministry of Justice registered public systems mediation and mediators of the Peace Courts. Unlike previous data, it also includes accredited conflict mediators in accordance with Law n.29/2013 of 19 April (Mediation Law).

Q166 (2015):

The given number in question 166 includes the mediators of the Ministry of Justice' registered public systems mediation and mediators of the Peace Courts. In addition to this number there are 234 accredited conflict mediators in accordance with article 9 (1) (e) of Law No. 29/2013, of 19 April (Mediation Law), regulated by Ministerial Ordinance No. 344/2013, of 27 November.

Please acknowledge that registered public system mediators and mediators of the Peace Courts can also be accredited conflict mediators but not the other way around.

Romania

Q166 (2022): The data is provided by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of the persons who meet the conditions provided by law.

Q166 (2021): The data were communicated by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of persons who meet the conditions provided by law. The decrease in the number of mediators is caused by withdrawals or suspensions of mediators' authorizations (possibly because of the low number of requests for mediation).

Q166 (2020): The data were communicated by the Mediation Council, reflecting the pace of the authorization process as a mediator by the Mediation Council (which may register fluctuations from year to year), of persons who meet the conditions provided by law.

Q166 (2019): The number of mediators accredited annually by the Mediation Council registers fluctuations, from year to year, being related most of the times to the legislative amendments brought to the mediation law, which can determine the increase in the number of persons requesting the accreditation as mediator, after the training courses required by law.

Q166 (2016): Regarding the variation registered in the number of authorizations granted to the mediators during the period 2014-2016, we mention that this was due to the legislative changes in the field of mediation occurred during that period.

Q166 (2013): The increase of the number of mediators in 2012 and 2013 comparing to 2010 is a result of the legislative reforms, stimulating the ADR.

Slovak Republic

Q166 (2021): In criminal matters is mediation provided by the 84 Probation officers located on District Courts.

Q166 (2020): In criminal matters is mediation provided by the 81 Probation officers located on District Courts.

Q166 (2019): In criminal matters is mediation provided by the 81 Probation officers located on District Courts.

Q166 (2018): In previous cycles the number of registered mediators provided by the Ministry of Justice included all persons listed in the register of mediators, including those who has been stroke out of a list or suspended. For this evaluation cycle we can provide the number of active registered mediators.

Slovenia

Q166 (2021): The procedures for listing (and un-listing) individual mediators are led by individual courts.

Spain

Q166 (2023): The figure provided is the number of mediators (natural and legal persons) registered in the Registry of Mediators.
With the entry into force of Law 16/2022 of September 5th, which reformed the consolidated text of the Insolvency Act, the figure of the insolvency mediator has been eliminated. Consequently, the registration of insolvency mediators in the Mediators Registry, both natural persons and legal entities, has been annulled. Therefore, the total number of mediators is lower than that provided in previous years. It should be added that this Registry is not mandatory, so the number of mediators may be higher.

Q166 (2022): The figure provided is the number of mediators (natural and legal persons) registered in the Registry of Mediators.
This Registry is not compulsory, so the number of persons that act as mediatos may be higher.

Q166 (2021): The figure provided is the addition of number of mediators (natural persons), Institutions of mediation, Mediators in insolvency cases and Mediators in insolvency cases (legal persons); all of them registered in the Registry of Mediators.
This Registry is not compulsory for civil cases, so the number of persons that act as mediatos may be higher.

Q166 (2020): The figure provided is the number of mediators (natural and legal persons) registered in the Registry of Mediators.
This Registry is not compulsory, so the number of persons that act as mediatos may be higher.
Mediation does not have a long tradition in Spain. However, it has good legislative support, and broad institutional support (for example, from the General Council of the Judiciary).
The Draft Law on Procedural Efficiency Measures contains rules that will enhance it (such as providing that the attempted solution be a prior procedural requirement).

Q166 (2019): The figure indicated is the sum of [Mediators + Insolvency mediators + Institutions of Mediation + Legal Persons Insolvency
mediators] registered in the Registry of Mediation of the Ministry of Justice.
The registry is not compulsory and there are other Registries in Autonomous Regions.

Q166 (2018): The figure indicated is the sum of [Mediators + Insolvency mediators + Institutions of Mediation + Legal Persons Insolvency mediators] registered in the Registry of Mediation of the Ministry of Justice.
The registry is not compulsory and there are other Registries in Autonomous Regions. Therefore, the figure is not a complete and perfect national data.

Q166 (2017): The data indicates the number of natural persons registered as Mediators and Mediators on Insolvency, in the Registry of Mediators and Mediation Institutions. (Registration is not compulsory).
Moreover, there are 123 Institutions of Mediation, and other 132 legal persons registered as Mediators on Insolvency. Law 5/2012 on mediation in civil and commercial matters regulated mediation. The Royal Decree 980/2013, develops the previous Law and creates the Register of Mediators and Mediation Institutions. Registration in the Register is voluntary, therefore, its figures are still indicative. But in general the regulation offers a better structuring of the Mediation Institution and a progressive improvement of the quality of the data. Moreover, Mediation is being developed and implemented more and more, both by public initiatives and by professional Associations.

Q166 (2016): In the Registry of the Ministry of Justice there are 1160 private mediators registered who work in the whole territory. The mediation takes place out of Courts. The Court during the first hearing informs to the parties about the possibility of going to mediation, and can suspend the procedure if the parties decide to try the mediation.
The registry mentioned is voluntary (not mandatory), so the figure is a posible approximation. The number of Institutions of Mediation is 66.

Q166 (2015): The approval in 2012 of the Act on mediation in civil and commercial matters could have influence on the increase in the number of mediators.

Question 192

Austria

Q192 (General Comment): Civil law notaries are appointed by the Federal Minister of Justice. They are entrusted with official functions but practice within the framework of a liberal profession. The number of notary offices continues to grow in Austria.

Q192 (2023): Federal Ministry of Justice

Q192 (2022): Federal Ministry of Justice

Q192 (2020): Ministry of Justice

Q192 (2018): Notaries in Austria are public office holders.

Belgium

Q192 (General Comment): The notary is a public official who has been delegated by the State to give authenticity to the deeds that s/he draws up, while ensuring that these deeds are preserved, have probative value and are enforceable. To ensure the necessary independence, notaries practise as self-employed professionals.
Notaries: public officers appointed by the State: the Ministry of Justice is responsible for the appointment procedure (Federal Public Service JUSTICE).

Q192 (2023): The Ministry of Justice (Federal Public Service Justice) is responsible for the appointment procedure.

Q192 (2022): The Ministry of Justice is competent with regard to the appointment procedure.

Q192 (2016): The notary is a public official who has received delegation from the State authority to confer authenticity on the acts of which he is the author, while ensuring the conservation, probative force and enforceability of the said acts. In order to ensure the necessary independence of his activity, the notary exercises it within the framework of a liberal profession.

Q192 (2014): In 2014, the figure given corresponded to the number of notaries, associated notaries and alternate notaries.

Bulgaria

Q192 (General Comment): Notaries and Notarial Practice Act regulates the legal status of notaries and of the Notary Chamber, the organisation of the notarial practice and notarial fees. Notaries are private persons who are entrusted by the State with the performance of notarial acts as provided for in the laws. They are independent in the performance of their duties and comply solely with the law. The Minister of Justice exercises control over the practice of each notary as to the implementation of the law and the Statute of the Notary Chamber of Bulgaria. The Council of Notaries also has the power to monitor compliance with the obligations of the notaries and the assistant notaries, and may take part through its representatives in disciplinary proceedings against such notaries and assistants in the prescribed cases. The notary procedures are stipulated by the Civil Procedure Code (Articles 569-594).

Q192 (2022): Ministry of Justice

Q192 (2020): According to the current Bulgarian legislation, notaries carry out activities that are explicitly assigned to them through a legal delegation by the state. According to Art. 2, para. 1 of the Law on Notaries and Notarial Activity “the notary is a person to whom the state assigns the performance of the notarial actions provided for in the laws". They are private professionals, who perform their activity independently, with a public function that is given to them by the State. Notaries in Bulgaria are appointed after a national competition organized by the Ministry of Justice and on the basis of an Order of the Minister of Justice. The ministry that is mainly engaged in the procedure is the Ministry of Justice.

Q192 (2018): According to the Bulgarian legislation in force, notaries carry out activities that are explicitly assigned to them through a statutory delegation by the state. According to art.2 para 1 of the Notaries and Notarial Activity/Practice Act “A notary is a person, to whom the state assigns the notary activities stipulated by the law.”

Croatia

Q192 (2020): Public notaries in the Republic of Croatia are appointed by the minister competent for judicial affairs.

Cyprus

Q192 (General Comment): Cyprus does not have notaries but certifying officers whose competences are to authenticate as true copies of documents.

Q192 (2020): We only have certifying officers authenticating documents

Czech Republic

Q192 (2023): Ministry of Justice

Denmark

Q192 (General Comment): The function of a notary is an integrated function of the district courts. All 24 district courts have one or more notaries which can confirm signatures on important documents or confirm that a copy is identical to the original document. Thus, a notary can confirm the identity of a person who signs a will or another document. With its endorsement, the notary guarantees that the signer understands what it means to make a will. A notary can also witness and confirm that a certain person has signed a special document.
The number of notaries in Denmark is uncertain. The Danish Court Administration does not have precise information regarding the total number of notaries employed by the Danish Courts or the gender of the notaries. However, it is possible to make an approximate statement of the number of notaries in the courts in 2024 based on accounting figures and average costs per year. On this basis, it is estimated that in 2024 there have been approx. 53 full-time notary positions in the district courts. Please note, that 'notary' is not an occupation, but a function typically carried out by clerical workers or student assistants at the court. Consequently, at some courts, the function is performed by part-time employees, which means that the number of full-time equivalent positions may not accurately reflect the actual number of individuals serving as notaries.

Q192 (2023): The amount of notaries is uncertain. The Danish Court Administration does not have precise information regarding the total number of notaries employed by the Danish Courts or the gender of the notaries. However, it is possible to make an approximate statement of the number of notaries in the courts in 2023 on the basis of accounting figures and average costs per year. On this basis, it is estimated that in 2023 there have been approx. 41 notary annual works in the district courts.

Estonia

Q192 (General Comment): A notary is an independent holder of office in public law, to whom the State has delegated the duty of ensuring the security of legal relationships and prevention of legal disputes. A notary executes his/her office as a liberal profession in his/her own name and at his/her own responsibility. Notaries are not proprietors but for accounting and taxation purposes, provisions applying to sole proprietors are applied. Notaries are appointed to office by the Minister of Justice according to the number of notaries and their corresponding territorial jurisdiction determined by the Regulation of the Minister of Justice. The Ministry of Justice supervises the professional activities of notaries.

Finland

Q192 (General Comment): In Finland, the notary system is not similar to some other European countries. Notaries do not work in the courts but in the local register offices.
The law on public notaries applies to them: https://www.finlex.fi/fi/laki/ajantasa/2014/20140420 (FI) or https://www.finlex.fi/sv/laki/ajantasa/2014/20140420 (SE)

Q192 (2016): In Finland there is not a notary system as in other European countries. Notaries do not work in courts and their competences are limited.

Q192 (2014): In 2014, there were 70 notaries public working in 11 local register offices. According to the Act on Notary Public (420/2014), the heads of Local Register Offices and the officers appointed by them as well as the officials appointed by the State Department of Åland are notaries public.
The number of notaries for 2012 and 2014 was provided by local register offices. Possible reasons/ factors explaining the observed decrease of 48% are the new Act on Public Notaries (420/2014) and the reform of local register offices. The number of the latter has decreased since 2014 (currently their number is 9) and the number of branch offices has decreased as well.

France

Q192 (General Comment): The status of notaries as public and ministerial officers is defined by the provisions of article 1 of Order no. 45-2590 of 2 November 1945 relating to the status of notaries and article 3 of the amended Act of 25 Ventôse Year XI concerning the organisation of the notarial profession. Article 1 bis of Order no. 45-2590 of 2 November 1945 on the status of notaries defines the various legal forms in which the profession of notary may be practised.

Q192 (2022): As of 30/04/2023, out of a total of 17 429 notaries, 9 880 were women. As of 31/12/2022, these data are not available.

The status of notaries as public and ministerial officers is defined by the provisions of article 1 of Order no. 45-2590 of 2 November 1945 relating to the status of notaries and article 3 of the amended Act of 25 Ventôse Year XI concerning the organisation of the notarial profession. Article 1 bis of Order no. 45-2590 of 2 November 1945 on the status of notaries defines the various legal forms in which the profession of notary may be practised.

Germany

Q192 (General Comment): The number of appointments as notary is in keeping with the number of notaries required in order to ensure the due and proper administration of the law (section 4 of the Federal Code for Notaries). The applicants are to be identified by advertisement (section 4a of the Federal Code for Notaries). Generally, the notary may not pursue any other profession (section 8 paragraphs (1) and (2) of the Federal Code for Notaries).

Q192 (2023): Notaries hold a public office. They are appointed by the Ministry of Justice of the respective state (“Land”), cf. sec. 12 Federal Code for Notaries.

Q192 (2022): Notaries hold a public office. They are appointed by the Ministry of Justice of the respective state (“Land”), cf. sec. 12 Federal Code for Notaries.

Q192 (2020): Notaries hold a public office. They are appointed by the Ministry of Justice of the respective state (“Land”), cf. sec. 12 Federal Code for Notaries

Greece

Q192 (General Comment): Notaries are professionals appointed by the state and in particular, by the Minister of Justice after successful participation in certain public competition. They are considered by our Constitution as public servants without receiving any salary from the State and they practice their profession as in private sector.

Q192 (2020): 2813 active notaries in a total of 3500 organic positions

Q192 (2018): Notaries are professionals appointed by the state and in particular, by the Minister of Justice after successful participation in certain public competition. They are considered by our Constitution as public servants without receiving any salary from the State and they practice their profession as in private sector.

Hungary

Q192 (General Comment): .

Q192 (2023): In Hungary due to the official nature and constitutional status of a civil law notary in exercising public authority a notary may only assume office as a result of a successful application procedure and the appointment of the Minister of Justice. The appointment is the sole event when the notary is commissioned by the State to fulfil tasks forming part of the justice system upon the formal request of clients. The number of notaries and their tariffs is governed by a regulation of the Minister of Justice.
The total number of the Hungarian notarial seats is 313. This is a numerus clausus. In the near future, this number is expected to be reduced by 3. Concerning the difference between the total of the notarial seats (313) and the added number of the male and female notaries (310), the following has to be remarked. On the seats which are vacant (generally because on the given seat a notary retired and the selection procedure is still ongoing or the newly appointed notary has not taken up the activity yet) , the notarial services are fulfilled by another notaries or deputy notaries who act as ‘substitute notaries’. This is a temporary status in both cases. In case of inclusion of the notary acting as susbstitute, his/her gender would be counted twice, giving a false image on the proportion of genders. In case of a deputy notary acting as substitute, it is not sure that the given person will be appointed as a notary to the given seat (it can be a person with the opposite gender). Therefore, we did not find it adequate to include their number into the data provided.

Q192 (2022): In Hungary due to the official nature and constitutional status of a civil law notary in exercising public authority a notary may only assume office as a result of a successful application procedure and the appointment of the Minister of Justice. The appointment is the sole event when the notary is commissioned by the State to fulfil tasks forming part of the justice system upon the formal request of clients. The number of notaries and their tariffs is governed by a regulation of the Minister of Justice.
The total number of the Hungarian notarial seats is 313. This is a numerus clausus. In the near future, this number is expected to be reduced by 3. Concerning the difference between the total of the notarial seats (313) and the added number of the male and female notaries (304), the following has to be remarked. On the seats which are vacant (generally because on the given seat a notary retired and the selection procedure is still ongoing or the newly appointed notary has not taken up the activity yet) , the notarial services are fulfilled by another notaries or deputy notaries who act as 'substitute notaries'. As this is a temporary status, their number based on genders isn't included in our calculations.

Q192 (2020): Act XLI of 1991 on Civil Law Notaries

Q192 (2014): According to 2014 data, notaries are appointed by the Minister of Justice for indefinite term. The number of notary positions is regulated by ministerial decree in such a way as to facilitate the access to notarial services in the whole country and to ensure the sustainability of all notarial offices. Civil law notaries are supervised by regional chambers and the Hungarian National Chamber, which is also obliged to provide various supporting IT-systems and to manage the notarial archives. The Minister of Justice has judicial supervisory competence over civil law notaries. The president of the competent Budapest or county court for the seat of the notary public has legal supervision over the actions of the notary, as part of that, he/she may order that the activities of the notary shall be reviewed by the chamber and may also initiate disciplinary proceedings.
Civil law notaries exercise as part of the State judicature official legal authority in accordance with the legal rules of their competence. Therefore, they have public authority. This is the reason why only Hungarian citizens can be appointed public notaries and this is why some elements of the notaries' obligations are similar to those of judges. Namely, the appointment is only possible as a result of an open selection procedure, and it is restricted to the jurisdiction of the local court; in case of notary's absence, a substitute may only be assigned by the local notaries' chamber; the notary is to act personally, impartially, in accordance with the acts regulating his/her competence; the notary is obliged to cooperate which means that he/she can refuse to proceed only if permitted by law, the form of the refusal shall be a writ; in order to facilitate an impartial procedure, the notary, in accordance with the requirement to provide equal opportunities, is obliged to inform the parties of their rights and obligations; the notary is only subject to legal rules; the notary is entitled to use the arms of the

country; the rules on the liability and exclusion of judges are also applicable to notaries; the remuneration of civil law notaries is fixed by law.

Ireland

Q192 (General Comment): Notaries in Ireland are recognised in other countries.

Italy

Q192 (General Comment): The Notary as existing in Italy belongs to the "Latin (roman) notarial system". The Latin notary is a public officer and a specialized counselor; his/her expertise must cover estate contracts, loans and mortgages, company law, family law, wills law, the relevant sections of fiscal law. The Latin notary also performs other judicial duties as a judicial auxiliary/assistant. Notaries as public officers are professionals who perform public functions. They are vested by the State with public authority and faith, which allows them to draw authentic deeds (or public deeds). Put differently, a notary can be defined as a public officer to whom the State delegates a specific public power, the power to assert (to affirm) the authenticity of a document. The profession of notary is characterized by the qualities of independence and impartiality. A full description of the responsibilities of the notary can be found at the following link: http://www.notariato.it/en/italian-notaries/who-we-are/responsibilities-of-the-notary.html

Latvia

Q192 (General Comment): In respect of their official duties, sworn notaries are equivalent to State officials, belonging to the court system.

Q192 (2018): The number of professional notaries (98) is indicated based on the number of actually practising notaries. Previously, there was indicated the number of the work positions, what is according to the regulation of the Cabinet of Ministers.

Lithuania

Q192 (2020): The Ministry of Justice.

Luxembourg

Q192 (2022): Ministry of Justice (https://mj.gouvernement.lu/en/legal-professions/the-notary.html)

Chamber of Notaries (http://www.notariat.lu/find-a-notary/notaries-directory/)

Q192 (2020): Ministère de la justice (https://mj.gouvernement.lu/fr/professions-droit/le-notaire.html#:~:text=Le%20nombre%20des%20notaires%20est,pour%20l'ensemble%20du%20pays)
Chambre des notairs (http://www.notariat.lu/trouver-un-notaire/annuaire-des-notaires/)

Q192 (2014): In 2014, there were in total 36 notaries with a hybrid status of regulateed liberal profession and public officer.

Malta

Q192 (General Comment): The Notary is a Public Officer and as such is an emanation of the State. At the same time he/she is a free professional with his/her own personal office, independent of the State and of the parties. This dual-nature ensures the right balance between the legal-fiscal functions for which the Notary is the ultimate reference point.
Conveyance (property sales, purchase, leasing, etc.), financing collateral (hypothecation of immovable), succession (wills, trusts, etc.) and matters pertaining to civil status (matrimonial regimes, personal separations, etc.) are all within the ambit of the profession and form the portfolio of a notary's day-to-day work. It is only through a notarial act that most transactions related to the above are given legal effect and this adds certainty and improves efficiency. Being a necessary passage at Law, the notarial requirement makes for a very cost-effective way of crystallizing a state of certainty in that notarial tariffs are stipulated by law and the citizen is all the more protected. The notarial intervention is thus imposed by law to safeguard legality and ensuring at all times that the autonomy of the private citizen never goes beyond what is legally and statutorily permitted.

Q192 (2020): All Public Notaries are appointed by the state even if they practice in their professional capacity. In previous evaluations we used to list the notaries as 'Public officials' but as from this evaluation, following changes in this question, we are marking them as 'Holders of public offices appointed by the State'.

Q192 (2018): The full list of practising Notaries is published in the Government Gazette every year in January. The above number of Notaries has been derived from the publication issued on the 31st January 2019 accessible at (https://www.gov.mt/en/Government/DOI/Government%20Gazette/Documents/2019/01/Government%20Gazette%20-%2031st%20January.pdf)

Netherlands

Q192 (General Comment): Dutch notaries are civil law notaries.
There are three types of notaries: notaries (or notaries entrepreneurs), assigned notaries, and deputy notaries.
Deputy notaries (or deputy civil law notaries) are persons in training to become a notary, or persons who choose to work under a notary. They are not entitled to sign notarial acts in their own name.
Notaries (notary entrepreneur) are formally appointed by the King. They are also entrepreneurs, running their own business.
Assigned notaries are formally appointed by the Minister and are employed by a notary. Both are entitled to sign notarial acts.

Q192 (2023): These numbers can be divided into the following categories (see General comment for an explanation on the type of notaries)
Notary entrepreneurs: 1 234
Assigned notaries: 224
Deputy notaries: 1 972

Q192 (2022): These are numbers on January 1st 2022.
Notaries (or notary-entrepreneurs) are formally appointed by the King. A notary is also an entrepreneur, running his/her own business. The notary may hire ‘assigned notaries’. An assigned notary is formally appointed by the Minister, and is employed by a notary. Both notaries and assigned notaries are entitled to sign notarial acts.
Additionally, there are deputy (civil law) notaries, who are either a person in training to become a notary, or people who choose to continue working under a notary (they are not entitled to sign notarial acts (in their own name). One can remain a deputy notary forever.

Q192 (2020): The count of notaries includes the so-called ‘’candidate’-notaries; they do not hold the full professional status, and a notary with full professional status remains responsible for the work of the candidate. People can remain a ‘çandidate’ for many years, even a life time. Notaries are entrepreneurs, work in/ as private enterprises, and are formally appointed by the King; their profession is regulated by law. There are also ‘added notaries’ (toegevoegde notarissen’): they have fulll responsibility like a notary, but they are not entrepreneurs, they are employees.

Q192 (2018): The count of notaries includes so-called 'candidates'. They do not hold the full professional status and a notary with full professional status remains responsible for the work of a candidate. People can remain 'candidate' for many years, or even a life time.
Notaries can work in private enterprises, but are formally appointed by the King, and their profession is regulated by Law.

Q192 (2014): In 2014, there were 1 336 notaries and 1 631 junior notaries. Notaries are private professionals under the authority (control) of public authorities. Dutch notaries are civil law notaries, meaning that they are fully qualified legal professionals. A notary is not only a sworn official but also an entrepreneur. As of 1 January 2013, it is also possible to become a public official without being an entrepreneur: the assigned notary. To become an assigned notary may be an alternative for junior notaries who do not have entrepreneurial ambition. Other than that the assigned notary has the same competences as the notary entrepreneur. An assigned notary has an employment contract with the notary to whom he/she is assigned and thus he/she is not an entrepreneur; is entitled to sign notarial acts within the protocol of the notary to whom he/she is assigned; acts under the authority of the notary to whom he/she is assigned; is by law the regular replacement of the notary to whom he/she is assigned.

Poland

Q192 (General Comment): The profession of notary is governed in Poland by the Law of 14 February 1991 on notary (OJ 2020, Item 1192, rev.).
The Polish legislator conferred the power to appoint notaries solely on the Minister of Justice. The decision on this matter shall be the decision of the administrative authority on a case-by-case basis, is taken under the provisions of the Code of Administrative Conduct and is discretionary. The Minister of Justice has the competence to select candidates to practice the profession of notary, as well as the designation of their office. Before a decision is taken, the provisions only provide for the obligation to consult the board of the competent board of the notary chamber. The Minister of Justice issues an administrative decision under Article 10 of the Law on notary, is not bound in any way by the content of this opinion, which is assessed like any other evidence. The scope of the discretion granted to the Minister of Justice under Article 10(1) of the Act is limited only by the provisions of articles 10(3) and 11 to 13 of the act. The candidates for notaries, when applying for the appointment of a notary and the appointment of a registry, make an autonomous choice as to the path of life, as well as the place where the profession is to be performed. It is their responsibility only to decide on the specific location of the office. In this respect, the Minister of Justice is bound by the content of the proposal. The law provisions - the notarial law also doesn’t make the creation of another office dependant on the non-exceeding of a specified number of registries in a given registry. There is no numerical restriction of access to the profession of notary in Poland (numerus clausus).
Notariat in Poland belongs to the group of Latin-type notariats, however the status of notaries is not uniform. On the one hand, notaries conduct their activities at their own risk, and the service nature of this activity can be considered to fall within the scope of freed

om of economic activity. In its resolution of 23 March 2016 (III CZP 4/16), the Supreme Court stated, that the notary is an entrepreneur within the meaning of Article 431 of the Civil Code. On the other hand, the notary is a person of public trust who guarantees security of commerce and shall ensure that the rights of the parties to the acts and of third parties are duly safeguarded. Notaries play an important role in the structure of the bodies responsible for applying the law and building the trust of citizens in the state, its institutions and legal trading entities.
A notary shall be appointed to carry out the acts which the parties are obliged or willing to give a notarial form (notarial activities) acts as a public trust person within the scope of these powers, by exercising the protection of public officers (Article 1(1) and Article 2(1) of the Law of 14 February 1991 on notary). The notarial acts, made by a notary in accordance with the law, are authentic (Article 2(2) of the Law - notary Law). When performing notarized activities, the notary collects taxes and court fees related to the notary activity of the parties, which is then transferred to the account of the competent institution. The notary is remunerated for the notarized activities, determined by agreement with the parties. However, the maximum rates of remuneration are determined officially by means of a regulation of the Minister of Justice, issued in agreement with the minister responsible for financial institutions (OJ of 2020, item 1473, rev.).
The notary is responsible for the damage caused in the performance of the notarial procedure and in this respect, is subject to compulsory civil liability insurance. In addition, a notary may be held liable for disciplinary action. Disciplinary courts are called upon to rule on disciplinary matters – at first instance, disciplinary courts of notary chambers, At second instance, a higher disciplinary Court at the National Notarial Council. The appeal of the Court of first Instance is also served by a surety against the Supreme Court. Disciplinary proceedings shall be open, however, the most severe disciplinary penalty is that the law of the law firm is not allowed to run. Notaries are established by a notary public authority to which membership is mandatory. The local government comprises the notarial chambers and the National Council of Notarial. The notarial Chamber is a notary who leads a registry in the district of the appellate court. The number of notary chambers in Poland therefore corresponds to the number of appellate courts (11). The National Notarial Council is the representative of the notary and consists of notaries selected by general meetings of notaries of notary houses.

Q192 (2018): Notaries are appointed by Minister of Justice.

Portugal

Q192 (General Comment): In 2004, a new status of the notarial profession was approved. Since, the notaries are private professionals under the authority (control) of public authorities. They compete for licenses and take office before the Minister of Justice and the president of the Chamber of Notaries. As a transition period is still running, some notaries work as public agents (before 2004, notaries were exclusively public officials). Since 2018, with Decree Law 115/2018, 21st December, "public notaries" ceased to exist and were transfered to the special carrear of registrar.

Q192 (2022): The increase in the number of notaries was due to the takeovers that took place during 2021 and 2022. Specifically, we refer to the grant of licenses for the installation of notary offices, awarded under the 8th Competition (Notice 4822/2022, of March 8) and the competitions for the award of the title of notary (Notice 3552/2021, of February 26 and Notice 3251/2022, of February 17).

Romania

Q192 (2018): Notaries public are not differentiated by gender within the records of the Ministry of Justice.

Slovak Republic

Q192 (General Comment): The Act n. 323/1993 Col. on Notaries and Notarial Activities, regulates the status and activities of notaries. A notary is a person appointed and empowered by the State to practice as a notary and carry out other activities in accordance with the law. A notary is appointed by the Minister of Justice on the basis of selection procedure, as a general rule to hold office within the geographical jurisdiction of a court of first instance. Notary is holding public office until the age of 67. He/she is not part of state bureaucracy; he/she is not bounded by any instructions, but is subject to State supervision, performed by the Minister of Justice. State is thus entitled to issue legislation regulating the activities of the notaries, self-governance of the notaries, as well as designate the number of notarial offices within the district of Court of first instance. A notary is impartial and independent in the performance of his/her duties. He/she is bound only by the Constitution, laws and other general implementing legislation. The office of a notary is incompatible with entrepreneurial activities or other gainful activity, except for the management of the notary's own assets and those of his/her minor children, and academic, publishing, pedagogical, interpreting and artistic activity. A notary may not act as an expert in cases where he/she acts as a court commissioner.

Q192 (2023): Ministry of Justice

Q192 (2022): Ministry of Justice of the Slovak republic.

Slovenia

Q192 (General Comment): A notary is a legal official who has been entrusted by the public authority with the safeguarding of the freedom of consent and the protection of the rightful interests of individuals. The presence of the notary confers authenticity to legal acts. As a guarantor of legal security, the notary has an important role to play in limiting subsequent litigation. Thereby, he/she is a major actor in preventive justice.

Spain

Q192 (General Comment): "The Notaries' regulation (Decree of 2 June 1944) states in article 1 that "notaries are both civil servants and legal professionals, corresponding to this double character the organization of Notaries. As officials, they exercise notarial public faith, which has and protects a double content:
a) In the field of facts, the accuracy of what the notary sees, hears or perceives through his senses.
b) And in the sphere of Law, the authenticity and probative force of the declarations of will of the parties in the public instrument drawn up in accordance with the laws.
As legal professionals, they have the mission of advising those who claim their ministry and advise them of the most appropriate legal means to achieve the lawful ends that they intend to achieve.
The Notary will enjoy full autonomy and independence in its function, and in its hierarchical organization it reports directly to the Ministry of Justice and the General Directorate of Registries and Notaries".

Annex 1

List of the tables presented in the Study

General data: economic and demographic data

Table 0.1: General data: economic and demographic data in 2024 (Q1, Q3, Q4, Q5)

General data

Indicator 1: Systems for measuring and evaluating the performance of courts and public prosecution services

Policies at the national level

Annex 4

Definitions of the Clearance Rate (CR) and the Disposition Time (DT)

The CEPEJ has chosen to develop performance indicators of courts at the European level. CEPEJ invites the member states to organise their data collection system so as to be able to provide the relevant information for calculating such indicators. The first indicator is the Clearance Rate. This allows a useful comparison even though the parameters of the cases concerned are not identical in every respect. This indicator can be used to see if the courts are keeping up with the number of incoming cases without increasing their backlog. The second indicator is the calculated Disposition Time. By making use of a specific calculation method, it is possible to generate data concerning the estimated time that is needed to bring a case to an end. This method can provide relevant information on the overall functioning of the courts of a state or entity. Gradually, the report of the CEPEJ will enable a comparative evaluation of the functioning of judicial systems in dealing with case-flows coming in and going out of the courts.

Clearance Rate (CR)

The Clearance Rate is a simple ratio, obtained by dividing the number of resolved cases by the number of incoming cases, expressed in a percentage:

$$Clearance\ Rate\ (\%) = \frac{Resolved\ cases\ in\ a\ period}{Incoming\ cases\ in\ a\ period} \times 100$$

A Clearance Rate close to 100 % indicates the ability of the court or of a judicial system to resolve approximately as many cases as the number of incoming cases within the given time period. A Clearance Rate above 100 % indicates the ability of the system to resolve more cases than those received, thus reducing the number of pending cases at the end of the measurement period, including any existing backlog. Finally, a Clearance Rate below 100 % appears when the number of incoming cases is higher than the number of resolved cases. In this case, the total number of pending cases will increase.

Essentially, the Clearance Rate shows how the court or the judicial system is coping with the in-flow of cases. It allows comparisons even when the parameters of the cases concerned in different countries are not identical in every respect.

Disposition Time (DT)

The calculated Disposition Time measures the theoretical time necessary for a pending case to be solved in court in the light of the current pace of work of the courts in that country or entity.
The Disposition Time is obtained by dividing the number of pending cases at the end of the observed period by the number of resolved cases within the same period multiplied by 365 (days in a year):

$$Calculated\ Disposition\ Time = \frac{Number\ of\ pending\ cases\ at\ the\ end\ of\ a\ period}{Number\ of\ resolved\ cases\ in\ a\ period} \times 365$$

The conversion into days simplifies the understanding of the relation between pending and resolved cases within a period. The calculated Disposition Time would show, for example, that the time necessary for solving a pending case has increased from 120 days to 150 days. This allows comparisons within the same jurisdiction over time and, with some prudence, between judicial systems in different countries or entities. It is also relevant for assessing court efficiency in this regard in the light of established standards for the length of proceedings.

It should be noted that this indicator is not a calculation of the average time needed to process a case but a theoretical estimate of the time needed to process pending cases. However, the indicator fails to show the mix, concentration, or merits of the cases. Thus, for example, if the ratio indicates that pending cases will be processed in 90 days, some cases might be solved on the 10th day and others on the 90th day. Case level data of the actual duration of cases from functional ICT systems is needed in order to review these details and make a full analysis. In the meantime, this formula may offer valuable information on the estimated maximum duration of cases that are still pending.
