EUROPEAN COMMISSION FOR THE EFFICIENCY OF JUSTICE (CEPEJ)

Study on the functioning of judicial systems in the EU Member States

Facts and figures from the CEPEJ questionnaires 2014 to 2024

Study prepared under the authority of the Working Group on the evaluation of judicial systems (CEPEJ-GT-EVAL)
for the attention of the European Commission (Directorate General Justice)

Part 1 - Data tables per indicator for all EU member States

The information and views set out in this study are those of the authors and do not necessarily reflect the official opinion of the Commission. Executive summary

English version

Since 2012, the European Commission has requested the European Commission for the Efficiency of Justice (CEPEJ) of the Council of Europe, to carry out a study aimed at analysing the situation of the judicial systems in the EU member States based on the specific methodology developed and used by the CEPEJ for evaluating the functioning of the judicial systems of the Council of Europe member States.

This study is based on collecting, processing, and analysing data and comments provided by the European Union (EU) member States through:

- selected data among those collected for the six CEPEJ evaluation cycles (years of reference of the data: 2012, 2014, 2016, 2018, 2020 and 2022).
- and specific questionnaires (for years of reference 2013, 2015, 2017, 2019, 2021, 2023, 2024)

This study will constitute one of the sources used by the European Commission for the "EU Justice Scoreboard".

Structure of the study

Following the last proposed technical specifications provided in the framework of the Contribution Agreement JUST-2025-IM-JACC/RIGH/1 "Service to support the annual publication of the EU Justice Scoreboard", the study, based on 2024 data and also their evolution in relation to 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022 and 2023 data, is structured in two main parts:

the *first part* examines the judicial systems in the EU member States providing data tables per indicator for all member States;

the *second part* contains country profiles for each EU member state separately, with a contextual analysis.

Main elements

The study, through the 8 indicators, provides an overview of the functioning of the justice system based on the elements, selected by the European Commission (EC) and which, according to the CEPEJ, are essential to the effectivity and quality of judicial systems.

Human resources

Different categories of judges (professional, occasional, non-professional) can contribute to the justice system. The 2024 study focuses on professional judges sitting in courts and the European Union average for this category of judges is 22,6 judges per 100 000 inhabitants (the median is 23,4 judges per 100 000 inhabitants). The lowest number of professional judges per 100 000 inhabitants is 3.6 and the highest is 44,4. The average value has slightly increased between 2023 and 2024 from 21,5 to 23,4.

It can be noted that compared with the previous cycle, the number of judges per 100 000 inhabitants increased for more than 1% in 13 member States, whereas it decreased by more than 1% in 5 member States which confirms the mentioned trend of increased median. The remaining countries have reported smaller changes in numbers which can be interpreted as a normal fluctuation of human resources within a system.

This number depends considerably on the organisation of the judicial system and the existence of occasional judges, non-professional judges or even *Rechtspfleger*.

The existence alongside professional judges of competent staff with defined functions and a recognised status is essential for the quality and efficiency of a judicial system. A distinction is made between the five types of non-judge staff:

- the "*Rechtspfleger* " function,
- the non-judge staff whose role is to assist judges directly,
- the staff responsible for administrative matters,

- the technical staff,
- and other types of non-judge staff that fall outside of all the categories mentioned above.

The analysis of data provided by the member States shows different trends for the average and median values. Since 2014, the average number of non-judge staff per 100 000 inhabitants has increased around 5% while the median increased even more (8%). Compared with the last cycle, the average increased 0,63% while the median decreased by 1,33%. The EU median of the non-judge staff per 100 000 inhabitants is 59,4 with the lowest as 23,9 and highest as 158,8.

It is worth noting that 12 countries reported to have staff with "*Rechspfleger* " functions (or equivalent) among non-judge staff.

Since 2020, the CEPEJ Study for the EU Justice Scoreboard includes prosecution services. The diversity in activities of the prosecution services is evident and the number of prosecutors per 100 000 inhabitant varies in European Union from minimum 2,9 to maximum 24 with an average and median of 11,4 prosecutors per 100 000 inhabitants. Compared to the previous cycle, both the average and median values increased by 1% and 7% respectively.

The prosecutors are assisted in their work by non-prosecutor staff attached to the prosecutors' offices. Their number varies largely in the member States from 0,9 to 46,68 non-prosecutor staff per 100 000 inhabitants with an average 15,5 and median 14,5. Compared to the previous cycle, the average and median values are very stable.

Regarding salaries of judges and public prosecutors, it could be noted that their absolute amounts vary largely from state to state depending mostly on the economic situation and the level of the GDP per capita. From 2018 onward, nearly all states showed a consistent trend of salary increase, with 27% increase of average gross annual salary of judges at the beginning of their career and 33% increase of average gross annual salary for judges of the Supreme Court or the Highest Appellate Court. A similar trend is also observed with prosecutors, with 30% increase of the average gross annual salary of public prosecutors at the beginning of their career and 36% increase of the average gross annual salary of public prosecutors at the Supreme Court or the Highest Appellate Instance.

When viewed in a national context, the judges at the beginning of career on average earn 2 times average annual salary in their respective countries, whereas this ratio is a bit lower for public prosecutors - 1,7. A similar disparity is observed among judges and prosecutors of the Supreme Court or the Highest Appellate Instance, where the highest salary of a judge at the Supreme Court is on average 4,1 times higher than the average salary in the country, while public prosecutors of the corresponding level earn 3,6 the average salary in the country.

Lawyers

The average number of lawyers per 100 000 inhabitants in the EU member States has generally shown an upward trend since 2014. Between 2014 and 2024 the average number of lawyers in the EU member States increased by 15% and the median by 23%.

Although the southern states (such as Italy, Greece, Cyprus, Spain, Portugal etc.), but also Luxembourg appear to have a higher number of lawyers per 100,000 inhabitants, the significant discrepancy in values, also reflected in the ratio of lawyers to professional judges, suggests considerable heterogeneity in the roles and tasks performed.

Judicial organisation

The study distinguishes three types of courts:

- courts of general jurisdiction that deal with any issues which are not attributed to specialised courts – their enumeration is made as legal entities for first, second and third instances;
- specialised courts of first instance and those of higher instances (second and/or third instance combined), also considered as legal entities;
- courts, at all levels and of first instance, as geographic locations.

Since 2014, 12 member States have reduced their number of geographical locations, 3 have the same number and 11 increased it. Between the last two cycles, 3 member States increased, and 3 countries reduced the number of courts' geographic locations.

The geographical locations per 100 000 inhabitants have decreased in most of the member States (the median was 1,54 per 100 000 inhabitants in 2014; 1,38 in 2016 and 1,45 in 2024 which is -4,5 % decrease).

As regards the distribution of the disputes between legal entities, all the EU member States except for the Czech Republic and Hungary have specialised courts of first instance.
The most frequent types of specialised courts in EU states are those that deal with administrative cases (exist in all but 5 member states), labour disputes; (exist in 11 member states) and commercial cases (exist in 11 member states).

Significant number of countries have also other not mentioned specialised courts (11 member states). While the majority of countries have few types of specialised courts there are some that have many specialised courts for different matters like Spain, Portugal, Cyprus, France but also Austria, and Italy.

Portugal, France and Cyprus also have large number of specialised courts of 1st instance compared with all courts of 1st instance (75%, 84% and 63% respectively). There are few more countries with many different types of specialised courts, but they qualified them as "other" so they cannot be easily compared with other systems.

Since 2020 the data on the higher instances specialised, courts were collected. Expectedly, their number is smaller than the 1st instance. Few countries have many specialised courts dealing with different cases at the higher instances. In most of the other countries that have higher instance specialised courts, they deal with the administrative matters (19 countries). There are also some higher instance military courts as well. There are also 4 countries that have specialised courts at 1st instance but no specialised courts on higher instances.

ADR - Alternative Dispute Resolution measures
In various EU member States, the use of alternative dispute resolution (ADR) is now widely accepted among the public and legal professionals. It contributes to the improvement of effectiveness of justice by providing court users with alternatives to a regular judicial procedure.
There are different types of ADR in the member States:
Mediation: refers to a voluntary process in a non-binding private dispute settlement in which an impartial and independent third party assists the parties in facilitating discussions aiming to resolve their difficulties and to reach an agreement.
Court-related mediation: in this type of mediation, there's always an intervention of a judge and of a prosecutor who facilitates, advises, decides and/or approves the procedure.
Conciliation: the main objective of a conciliator is to reconcile, most of the time he/she will do so by seeking concessions. He/she may make suggestions to the parties aimed to settle a dispute. The conciliator has more power and plays a more proactive role in comparison with the mediator.
Arbitration: the parties choose a neutral third party - an arbitrator whose final decision is binding. The parties may present evidence and testimonies to the arbitrators. Sometimes, several arbitrators are appointed to work as a court. Arbitration is most often used for the resolution of commercial disputes because it provides a greater confidentiality.
Court-related mediation exists in all States, essentially in civil and commercial areas. However, only 19 states have accredited/registered mediators and can provide their number.

It could be noted that the median number of accredited or registered mediators per 100 000 inhabitants has strongly increased since 2014 (from 8,9 in 2014 to 19,2 in 2024). This may indicate an intent of the member States to support the policies of enhancement of ADR through increased number of trained mediators.

The CEPEJ Study for the EU Justice Scoreboard includes for the third time data on notaries. Regarding the status of notaries in EU, it is important to note that in 22 states notaries are holders of public offices who exercise a public function and are appointed by the State. Thus, they are a subject of supervision by public authorities (for instance the Ministry of Justice) and exercise their functions in a regulated environment. The number of notaries per 100 000 inhabitants varies in EU from minimum 0,9 to maximum 27,8 with an average of 9,1 and median of 6,7 notaries per 100 000 inhabitants.

Systems of measuring and evaluating the functioning of courts and prosecution services

Most countries use quality standards for courts and public prosecution services at the national level. The number of countries that have defined these standards exceeds half of the EU member States (15 member States).

Regarding different modalities of monitoring that are intended to review the day-to-day activity of courts through data gathering and statistical analyses, they appear in all the EU countries. Many fields of courts activity are being monitored particularly case flow data, courts' decisions and efficiency indicators.

Performance and evaluation of judges and public prosecutors

As regard, individual judges and public prosecutors, it could be noted that quantitative performance targets are defined for each judge in 8 countries, whereas 5 countries have these targets set for public prosecutors. Out of these countries, only one doesn't envisage sanctions if the targets are not met by judges or prosecutors (Finland), while others have a possibility to impose different sanctions with or without disciplinary procedure, such as warning by court president, temporary salary reduction, reflection in the individual assessment or other sanctions. Regarding individual evaluation of the public prosecutors' work, quantitative evaluation exists in 12 member States whereas qualitative evaluation is used in 22 States.

Performance of the courts and public prosecution services

An essential element of the proper functioning of courts is the respect for the right to a fair trial within reasonable time, as guaranteed by Article 6 of the European Convention on Human Rights. This right must be duly considered when analysing court workload, the length of proceedings and implementing specific measures to reduce delays and to improve the efficiency. CEPEJ has chosen to develop efficiency court indicators at European level.

The first indicator is the Clearance Rate (CR) which indicates the capacity of the courts and judicial system to deal with the inflow of new cases.

The second indicator is the Disposition Time (DT), that measures the theoretical time (in days) necessary for a pending case to be solved in court in the light of the current pace of work of the courts.

When analysing the efficiency of the courts it is important to look at both indicators together and their evolution over time.

Civil and commercial litigious cases

Looking at the CR for first instance civil and commercial litigious cases, it should be noted that almost every year since 2014 the EU median has been equal or over 100%. The only exception is year 2020 when CR reached 98% as the impact of COVID-19 measures affected the work of courts the most during this year. In 2024 the EU median is 97,8%, which is slightly higher compared to 97% in 2023 and is lower compared to 100,5% in 2022.

Comparing individual countries' data for 2024 and 2023, most of them (14) show decreased CRs and 9 of them show increase which is in line with the mentioned trend. The largest decrease was registered in Italy (-15,05 percentage points) and Finland (-14,02 percent points). On the other side, 9 member States experienced improvements of the CR with more notable increases in Estonia and Romania (with 18,5 and 13 percentage points respectively).

To understand fully this comparison between the cycles, it is important to examine if the number of incoming and resolved cases increased or decreased during these two years. The data shows that in 2024, the number of incoming cases increased in 19 member States (by 4,6% in median). In some states the increase is as big as 49,9%. On the other side the number of resolved cases increased 5,6%, consequently causing the mentioned subtle increase in CR.

As regards the Disposition Time, 13 member States increased their DT compared to 2023. More specifically, 5 countries increased it by more than 10%, 2 countries from 5-10%, 6countries from 0-5%. On the other hand, 11 countries decreased their DT, 3 of them by more than 10%, 4 between 5% and 10% and 4 by less than 5%. The average and median numbers have not demonstrated large fluctuations but also show different tendencies. The average DT increased by 1,9% and median DT increased by 0,4%. Generally, the situation slightly improved because less than a half of the member states increased their DT, meaning that this cycle it might take a bit less time to process civil and commercial litigious cases.

Administrative law cases

Compared with other categories of first instance cases in EU, administrative cases generally have highest DT of 422 days on average in 2024. For example, they still take notably longer time than the civil and commercial cases of the first instance that need 307 days on average in 2024.

The number of countries that decreased their Disposition Time for administrative cases is 10, whereas 15 countries increased disposition time. Three countries improved their performance by decreasing the DT significantly (more than 10%), among others, Estonia, Italy and Slovak Republic.

Increased CR is identified in 8 member States among which Slovak Republic had above +10 percent points increase. CR decreased in 17 countries, out of which significantly (above 10 percent points) in 5, among which Cyprus, Luxembourg, and Portugal.

This analysis shows that majority of states have demonstrated less favourable developments in 2024 regarding administrative cases, since less than half of states have decreased their DT and increased their CR. Therefore, more efforts will be required in future years to shorten the disposition time and come closer to DT levels of civil and criminal cases.

Criminal law cases

Since 2020 criminal cases are reported as part of this study, without comparison with previous cycles.

Looking at the efficiency indicators for the first instance criminal cases, it is immediately notable that CR was not very high in 2024 as EU average is 95,7% while median was 98,8%. This situation is almost identical as in 2023.

Regarding DT, in 2024 the average is 189 days and median is 128 days, whereas in 2023 the average is 175 and median 134 days. The improvements are notable in the individual countries' DTs as 6 states reduced them. However, 17 countries increased their level of DT some of them significantly. The maximum values were observed in Malta (862 days) and Greece (583 days). The lowest DT was recorded in Estonia (35 days) and Hungary (51 days) even less than last year.

The level of CR lower than 100% was reported in 18 states which might lead to backlog formation and corresponding increase of DT in the future years. Therefore, affected states should put efforts to prevent such negative developments. Also, countries with very high DT should continue reducing it toward average or median EU levels in the future.

Public prosecutors: Total number of 1st instance criminal cases

Since 2020 public prosecution’s cases are reported as part of this study, without comparison with previous cycles.

During 2024, the average value of incoming cases by public prosecution services in the European Union was 3,24 cases per 100 inhabitants. The number of processed cases was at approximately same level (3,27). The similar tendency was recorded for average numbers in 2023 and 2022. The identified tendency of median showed slightly higher number for processed cases compared with incoming (3,01 for incoming and 3,08 for resolved). The median values were also lower than average numbers probably because the average was affected by the very large number of cases reported for some of the countries, such as Luxembourg with 10,42 incoming.

Out of processed cases, there were 2,17 discontinued cases per 100 inhabitants and 0,57 cases brought to court (median values).

Looking at the individual countries, it is interesting to note that out of 22 that provided relevant data, 10 states have more or equal number of processed than incoming cases, whereas in 12 states incoming outnumbered processed cases which might potentially lead to generating backlogs in the respective prosecution services. Comparing the ratio of processed cases vs incoming cases over the last cycle, it could be concluded that ten countries managed to improve this ratio. Analysis of this indicator implies slight increase in efficiency of public prosecution services in 2024.

The information and communication technology (ICT) in courts

While initially acting as a simple support tool for productivity, the information and communication technology (ICT) becomes one of the important leverages for improvement of the efficiency of courts. The increasing role of the ICT in improving productivity and efficiency and assisting decision making, is indeed based on the possibilities of the automation of tasks and the inevitable general technological progress.

The questionnaire related to ICT consists of 38 questions that include deployment and usage rate of different tools used in courts. For the needs of this study EC has selected four questions related to two different tools: writing assistance tools and recording of court hearings.

The data show that almost all the EU member States except Cyprus have writing assistance tools, and these tools are very present, with 95-100% deployment rate on these tools reported by 18 member States in civil and commercial matters, 17 member States in administrative matters and 19 member States in criminal matters. This writing assistance tool shows quite high usage rate and 12 of the countries reported 95-100% usage rate for the civil and commercial, 11 for administrative, and 13 for criminal matter. Functionalities of the writing assistance tools are predominantly templates, which is true for all countries, but majority also have automatically generated text. Electronic signature, and speech to text features are present in half of the countries also. Only Hungary and Latvia have automatic suggestion of decision for all matter while France has for civil and criminal matter.

It's worth noting that most countries have tools for the recording of the court hearing, 18 member States have 95-100% deployment rate, and 14 member States have 95-100% usage rate. For those that have provided information on this tool it should be noted that deployment rate is higher for civil and for administrative matter and slightly lower for criminal. Regarding the functionalities, for example for civil matter 22 countries use audio recording and only 10 also video of hearings. Situation is similar for criminal but much less countries seem to record hearings in administrative matter (18). In some countries the recording is systematic for all hearings. This is the case in 11 countries in civil, 8 in administrative and 11 in criminal matter.

The data show that almost all the EU member States have writing assistance tools, one country did not manage to reply to this question, while in the others these tools are very present, and 95-100% deployment rate on these tools was reported by 18 member States in civil and commercial matters, 17 member States in administrative matters and 19 member States in criminal matters. Collection of information on usage rate is an expansion on the deployment rate collected in previous cycles. For this tool it shows quite high usage rate and 12 of the countries reported 95-100% usage rate for the three civil and commercial and administrative, and 13 for criminal matter. Functionalities of the writing assistance tools are predominantly templates, which is true for all countries but quite many also have automatically generated text, electronic signature, and speech to text features. Only Hungary and Latvia have automatic suggestion of decision for all matter while Luxembourg has for criminal matter only.

It's worth noting that most countries have tools for the recording of the court hearing, 16 member States have 95-100% deployment rate, and 13 member States have 95-100% usage rate. For those that have provided information on this tool it should be noted that deployment rate is higher for civil and for criminal matter and slightly lower for administrative. Regarding the functionalities, for example for civil matter 20 countries use audio recording and only 8 also video of hearings. Situation is similar for criminal but much less countries seem to record hearings in administrative matter. In some countries the recording is systematic for all hearings. This is the case in 11 countries in civil, 8 in administrative and 11 in criminal matter.

Version française

Depuis 2012, la Commission européenne a sollicité la Commission européenne pour l'efficacité de la justice (CEPEJ) du Conseil de l'Europe pour réaliser une étude ayant pour objet l'analyse de la situation des systèmes judiciaires dans les Etats membres de l'UE, basée sur la méthodologie propre développée et utilisée par la CEPEJ dans le cadre de l'évaluation du fonctionnement des systèmes judiciaires des Etats membres du Conseil de l'Europe.

Cette étude s'appuie sur la collecte, le traitement et l'analyse des données et commentaires communiqués par les Etats membres de l'Union Européenne (UE) au travers de :

- données sélectionnées parmi les données collectées dans le cadre de six cycles d'évaluation (données des années de référence 2012, 2014, 2016, 2018, 2020 et 2022)
- et de questionnaires spécifiques (pour les années de référence 2013, 2015, 2017, 2019, 2021 et 2023, 2024).

Cette étude sera l'une des sources utilisées par la Commission Européenne pour préparer le « Tableau de bord de la Justice dans l'UE ».

Structure de l'étude

Conformément à la dernière proposition technique rédigée dans le cadre du contrat de contribution JUST-2025-IM-JACC/RIGH/1 – "*Service to support the annual publication of the EU Justice Scoreboard* ", l'étude porte sur les données de 2024 et leurs évolutions par rapport aux données de 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021, 2022 et 2023 Elle est divisée en deux parties :

la première examine les systèmes judiciaires des Etats membres de l'UE à l'aide de tableaux de données par indicateur pour tous les Etats membres ;

la seconde contient des fiches par pays qui présentent une analyse contextualisée pour chaque Etat membre de l'UE.

Principaux éléments

L'étude, au travers de 8 indicateurs, dresse un état des lieux relatif au fonctionnement du service public de la justice sur la base des éléments sélectionnés par la Commission Européenne (CE) parmi ceux qui, d'après la CEPEJ, sont principalement constitutifs de l'efficacité et de la qualité des systèmes judiciaires.

Ressources humaines

Plusieurs catégories de juges (professionnels, occasionnels, non professionnels) peuvent contribuer au système judiciaire. L'étude 2024 se concentre sur les juges professionnels siégeant dans les tribunaux et la moyenne de l'Union Européenne pour cette catégorie de juges s'élève à 22,6 juges pour 100 000 habitants (la médiane est de 23,4 juges pour 100 000 habitants). Le nombre le plus faible de juges professionnels pour 100 000 habitants est de 3,6 et le plus élevé de 44,4. La moyenne a légèrement augmenté entre 2023 et 2024 de 21,5 à 23,4.

On peut noter que, par rapport au cycle précédent, le nombre de juges pour 100 000 habitants a augmenté de plus de 1% dans 13 Etats membres, alors qu'il n'a diminué de plus de 1% que dans 5 pays, ce qui confirme la tendance mentionnée de l'augmentation de la valeur médiane. Les autres pays ont fait état de variations moins importantes, ce qui peut être interprété comme une fluctuation normale des ressources humaines au sein d'un système.
Ce nombre dépend considérablement de l'organisation du système judiciaire et de l'existence de juges occasionnels, de juges non professionnels ou même de *Rechtspfleger*.

L'existence aux côtés des juges professionnels d'un personnel compétent avec des fonctions définies et un statut reconnu est une condition essentielle pour la qualité et l'efficacité d'un système judiciaire.

Une distinction est opérée entre cinq types de personnels non-juges :
- la fonction de "*Rechtspfleger",*
- le personnel non-juge dont le rôle est d'assister directement les juges,
- les personnes responsables de tâches administratives,
- le personnel technique,
- les personnels non-juges n'entrant dans aucune de ces catégories.

L'analyse des données fournies par les États membres montre des tendances différentes pour les valeurs moyennes et médianes. Depuis 2014, le nombre moyen de personnel non-juge pour 100 000 habitants a augmenté de 5% alors que la médiane a augmenté encore plus de 8%. Par rapport au dernier cycle, la valeur moyenne a augmenté de 0,63 %, tandis que la valeur médiane a diminué de 1,33% . La médiane de l'Union européenne du personnel non-juge pour 100 000 habitants est de 59,4avec un minimum de 23,9 et un maximum de 158,8.
Il convient de noter que 12 pays ont indiqué l'existence parmi les personnels non-juge des fonctions de "*Rechspfleger* " (ou équivalent).

Depuis 2020, l'étude de la CEPEJ pour le Scoreboard de l'UE inclut les services des ministères publics. La diversité des activités des ministères publics est évidente et le nombre de procureurs pour 100 000 habitants varie dans l'Union européenne d'un minimum de 2,9 à un maximum de 24 avec une moyenne et une médiane de 11,4 procureurs pour 100 000 habitants. Par rapport au cycle précédent, la valeur moyenne -tout comme la médiane- ont augmenté, respectivement de 1 % et 7 %.

Les procureurs sont assistés dans leurs fonctions par du personnel non-procureur attaché aux ministères publics. Leur nombre varie considérablement de 0,9 à 46,68 personnels non-procureurs pour 100 000 habitants avec une moyenne de 15,5 et une médiane de 14,5. Par rapport au cycle précédent, les valeurs moyenne et médiane sont très stables.

Concernant les salaires des juges et des procureurs, il convient de noter que leurs montants absolus varient considérablement d'un État à l'autre, en fonction principalement de la situation économique et du niveau du PIB par habitant. À partir de 2018, presque tous les États ont connu une tendance constante à l'augmentation des salaires, avec 27 % de hausse du salaire annuel brut moyen des juges en début de carrière et 33 % de hausse du salaire annuel brut moyen des juges de la Cour suprême ou de la dernière instance de recours. Une tendance similaire est également observée pour les procureurs, avec une augmentation de 30 % du salaire annuel brut moyen des procureurs en début de carrière et une augmentation de 36 % du salaire annuel brut moyen des procureurs au niveau de la Cour suprême ou de la dernière instance de recours.

Dans un contexte national, les juges en début de carrière gagnent en moyenne 2 fois le salaire annuel moyen de leur pays respectifs, alors que ce ratio est un peu plus faible pour les procureurs - 1,7. Une disparité similaire est observée entre les juges et les procureurs auprès de la Cour suprême ou de la dernière instance de recours, où le salaire le plus élevé d'un juge à la Cour suprême est en moyenne 4,1 fois plus important que le salaire moyen du pays, tandis que les procureurs au même niveau gagnent 3,6 fois le salaire moyen du pays.

Avocats

Le nombre moyen d'avocats pour 100 000 habitants dans les États membres de l'UE connaît de façon générale une tendance à la hausse depuis 2014. Entre 2014 et 2024, le nombre moyen d'avocats dans les États membres de l'UE a augmenté de 15 % et leur nombre médian de 23 %.

Bien que les Etats du sud (tels que l'Italie, la Grèce, Chypre, l'Espagne, le Portugal etc.), mais aussi le Luxembourg, semblent avoir un nombre plus élevé d'avocats pour 100.000 habitants, la disparité significative des valeurs, qui se reflète également dans le ratio entre avocats et juges professionnels, suggère une hétérogénéité considérable dans les rôles et les tâches accomplis.

Organisation judiciaire

L'étude distingue trois types de tribunaux :

- les tribunaux de droit commun compétents dans toutes les matières pour lesquelles la compétence n'a pas été attribuée à une juridiction spécialisée – leur dénombrement est effectué en tant qu'entités juridiques pour les première, seconde et troisième instance ;
- les tribunaux spécialisés de première instance et d'instances supérieures (seconde et/ou troisième instance combinées), compris également comme entités juridiques ;
- les tribunaux, tous niveaux confondus et de première instance, en tant qu'implantations géographiques

Depuis 2014, 12 pays ont réduit leur nombre d'implantations géographiques, 3 ont conservé le même nombre, tandis que 11 pays ont augmenté ce nombre. Entre les deux derniers cycles, 3 pays ont augmenté et 3 pays ont réduit le nombre d'implantations géographiques.

Le nombre d'implantations géographiques pour 100 000 habitants a diminué dans la plupart des Etats membres (la médiane était de 1,54 tribunaux pour 100 000 habitants en 2014, 1,38 en 2016 et 1,45 en 2024, ce qui représente une baisse de 4,5 %).

En ce qui concerne la répartition des contentieux entre entités juridiques, tous les Etats membres de l'Union Européenne, à l'exception de la République tchèque et de la Hongrie, disposent de tribunaux de première instance spécialisés.

Le type de tribunaux spécialisés existants le plus souvent dans les Etats Membres de l'UE sont ceux qui traitent des affaires administratives (qui existent dans tous les pays à l'exception de cinq d'entre eux), du contentieux du travail (existe dans 11 états membres) et des affaires commerciales (existe dans 11 états membres).

Un nombre significatif de pays dispose également d'autres tribunaux spécialisés non mentionnés (existe dans 11 états membres). Alors que la majorité des pays ont peu de types de tribunaux spécialisés, certains ont de nombreux tribunaux spécialisés dans différentes matières comme l'Espagne et le Portugal mais aussi l'Autriche, Chypre, la France et l'Italie.

Le Portugal, la France et Chypre ont également un grand nombre de tribunaux spécialisés de 1ère instance par rapport à l'ensemble des tribunaux de 1ère instance (75%, 84 % et 63% respectivement). Quelques autres pays ont également un grand nombre de tribunaux spécialisés mais ils sont inclus dans la catégorie « autre» ce qui rend la comparaison avec les autres systèmes difficile.

Depuis 2020, les données sur les tribunaux spécialisés d'instances supérieures ont été collectées et, bien sûr, leur nombre est inférieur à celui de la première instance. Peu de pays disposent d'un grand nombre de tribunaux spécialisés traitant de différentes affaires au niveau des instances supérieures. Dans la plupart des autres pays qui disposent de tribunaux spécialisés au niveau des instances supérieures, ceux-ci traitent de questions administratives (19 pays). Il existe également des tribunaux militaires au niveau des instances supérieures. Il y a également 4 pays qui ont des tribunaux spécialisés en première instance mais pas de tribunaux spécialisés au niveau des instances supérieures.

Mesures alternatives au règlement des litiges (ADR - alternative dispute resolution)

Dans différents pays européens, l'utilisation des mesures alternatives au règlement des litiges (ADR) est maintenant largement acceptée par le public et les professionnels du droit. Ces mesures contribuent à l'amélioration de l'efficacité de la justice en fournissant aux usagers des alternatives à une procédure judiciaire régulière.

Il existe différents types d'ADR dans les pays membres :

La médiation: il s'agit d'un procès volontaire, non contraignant de règlement des litiges privés dans lequel un tiers impartial et indépendant aide les parties à faciliter la discussion afin de les aider à résoudre leurs difficultés et de parvenir à un accord

La médiation conduite ou renvoyée par le tribunal : dans ce type de médiation, il y a toujours intervention d'un juge, d'un procureur qui facilite, conseille, décide ou/et approuve la procédure.

La conciliation: le principal objectif du conciliateur est de concilier, la plupart du temps en recherchant des concessions. Il/Elle peut proposer aux parties des suggestions pour le règlement d'un litige. Par rapport au médiateur, le conciliateur a plus de pouvoir et il est davantage proactif.

L'arbitrage: les parties choisissent un tiers impartial - un arbitre, dont la décision définitive est contraignante. Les parties peuvent présenter des preuves et des témoignages devant les arbitres. Parfois, il y a plusieurs arbitres désignés qui travaillent en tant que juridiction. L'arbitrage est le plus souvent utilisé pour la résolution des litiges commerciaux car il offre une plus grande confidentialité.

La médiation conduite ou renvoyée par le tribunal existe dans tous les Etats, essentiellement en matière civile ou commerciale. Toutefois, seuls 19 États ont des médiateurs accrédités/enregistrés et peuvent fournir leur nombre.

Il convient de noter que la médiane du nombre de médiateurs agréés ou enregistrés pour 100 000 habitants a fortement augmenté depuis 2014 (de 8,9 en 2014 à 19,2 en 2024). Cela peut indiquer une intention des États membres de soutenir les politiques de renforcement des ADR par l'augmentation du nombre de médiateurs formés.

L'étude de la CEPEJ pour le tableau de bord de la justice de l'UE inclut pour la troisième fois des données sur les notaires. En ce qui concerne le statut des notaires dans l'UE, il est important de noter que dans 22 Etats, les notaires sont des titulaires de charges publiques qui exercent une fonction publique et sont nommés par l'Etat. Ils sont donc soumis au contrôle des autorités publiques (par exemple le ministère de la justice) et exercent leurs fonctions dans un environnement réglementé. Le nombre de notaires pour 100 000 habitants varie dans l'Union Européenne entre un minimum de 0,9 et un maximum de 27,8 avec une moyenne de 9,1 et une valeur médiane de 6,7 notaires pour 100 000 habitants.

Système pour mesurer et évaluer le fonctionnement des tribunaux et des services des ministères publics

La plupart des pays utilisent des normes de qualité au niveau national dans les tribunaux et les services des ministères publics. Le nombre de pays ayant défini ces normes est supérieur à la moitié des Etats membres de l'UE (15 États membres).

En ce qui concerne les différentes modalités de suivi destinées à examiner l'activité quotidienne des tribunaux par le biais de la collecte de données et d'analyses statistiques, elles existent dans tous les pays de l'UE. De nombreux domaines de l'activité des tribunaux font l'objet d'un suivi, en particulier les données sur les flux d'affaires, les décisions des tribunaux et les indicateurs d'efficacité.

Performance et évaluation des juges et des procureurs

Concernant les juges et les procureurs individuellement, on peut noter que des objectifs quantitatifs de performance sont définis pour chaque juge dans 8 pays, tandis que 5 pays fixent ces objectifs pour les procureurs. Parmi ces pays, un seul, la Finlande, n'envisage pas de sanctions si les objectifs ne sont pas atteints par les juges ou les procureurs, tandis que les autres ont la possibilité d'imposer différentes sanctions avec ou sans procédure disciplinaire, telles que l'avertissement par le président du tribunal, la réduction temporaire du salaire, la prise en compte dans l'évaluation individuelle ou d'autres sanctions.

En ce qui concerne l'évaluation individuelle du travail des procureurs, l'évaluation quantitative existe dans 12 pays, tandis que l'évaluation qualitative est utilisée dans 22 États.

Performance des tribunaux et services du ministère public

Un élément essentiel du bon fonctionnement des tribunaux est le respect du droit à un procès équitable dans un délai raisonnable, tel que garanti par l'article 6 de la Convention européenne des droits de l'homme. Ce droit doit être dûment pris en compte lors de l'analyse de la charge de travail des tribunaux, de la durée des procédures et de la mise en œuvre de mesures spécifiques pour réduire les délais et améliorer l'efficacité. La CEPEJ a choisi de développer des indicateurs d'efficacité des tribunaux au niveau européen.

Le premier indicateur est le taux de variation du stock d'affaires pendantes (Clearance Rate-CR) qui montre la capacité du tribunal et du système judiciaire à faire face au flux d'affaires nouvelles.
Le second indicateur est la durée estimée d'écoulement du stock, qui mesure le temps théorique (en jours) nécessaire pour qu'une affaire pendante soit résolue par un tribunal, compte tenu du rythme de travail actuel des tribunaux.
Lorsque l'on analyse l'efficacité des tribunaux, il est important d'examiner les deux indicateurs ensemble et leur évolution dans le temps.

Affaires civiles et commerciales contentieuses

Si l'on examine le Clearance rate (CR) des affaires civiles et commerciales de première instance, il convient de noter que la médiane de l'UE est égale ou supérieure à 100 % presque chaque année depuis 2014. La seule exception est l'année 2020, où le CR a atteint 98 %, car c'est au cours de cette année que l'impact des mesures COVID-19 a le plus affecté le travail des tribunaux. En 2024, la médiane de l'UE est de 97,8%, ce qui est légèrement plus élevé par rapport à 97 % en 2023 et est inférieur par rapport à 100,5 % en 2022.

Si l'on compare les données des différents pays pour 2024 et 2023, la plupart d'entre eux (14) affichent des diminutions des CR et 9 d'entre eux montrent une hausse des CR, ce qui correspond à la tendance mentionnée. Les plus fortes diminutions étant enregistrées en Italie (-15,05 points de pourcentage) et en Finlande (-14,02 points de pourcentage). Neuf pays connaissent par ailleurs une amélioration de leur CR, avec une augmentation plus notable en l'Estonie et à la Roumanie (avec 18,5 et 13points de pourcentage respectivement).

Pour mieux comprendre cette comparaison entre les cycles, il convient d'examiner si le nombre d'affaires nouvelles et terminées a augmenté ou diminué au cours de ces deux années. Les données montrent qu'en 2024, le nombre d'affaires nouvelles a augmenté dans 19 Etats membres (avec une médiane de 4,6%). Dans certains États, l'augmentation atteint même 49,9 %. En revanche, le nombre d'affaires terminées a augmenté de 5,6 %, ce qui a entraîné une légère augmentation du CR mentionnée précédemment.

En ce qui concerne le Disposition Time (DT), 13 États membres ont vu leur DT augmenter par rapport à 2023. Plus précisément, 5 pays ont connu une augmentation de plus de 10%, 2 pays de 5 à 10%, 6 pays de 0 à 5%. Par ailleurs, 11 pays ont vu leur DT diminuer, 3 de plus de 10 %, 4 entre 5% et 10% et 4 de moins de 5%. Les valeurs moyennes et médianes n'ont pas connu de grandes fluctuations, mais montrent également des tendances différentes. Le DT moyen a augmenté de 1,9% et le DT médian a augmenté de 0,4 %. D'une manière générale, la situation s'est légèrement améliorée car moins de la moitié des États membres ont augmenté leur DT, ce qui signifie que le traitement des affaires civiles et commerciales pourrait prendre un peu moins de temps au cours de ce cycle.

Affaires de droit administratif

Par rapport aux autres catégories d'affaires de première instance au sein de l'UE, les affaires administratives présentent en général le DT le plus élevé, soit 422 jours en moyenne en 2024. Elles sont par exemple nettement plus longues que les affaires civiles et commerciales de première instance, qui nécessitent 307 jours en moyenne en 2024.

Le nombre de pays qui ont diminué leur DT pour les affaires administratives est de 10, tandis que 15 pays ont augmenté ce DT. Trois pays ont amélioré leurs performances en diminuant le DT de manière significative (plus de 10%), parmi lesquels l'Estonie, l'Italie et la République slovaque.

L'augmentation du Clearance Rate peut être identifiée dans 8 pays parmi lesquels la République slovaque qui ont enregistré une augmentation de plus de +10 points de pourcentage.

Le Clearance Rate a diminué dans 17 pays, et de manière significative (plus de 10 points de pourcentage) dans 5 d'entre eux, dont Chypre, le Luxembourg et le Portugal.

Cette analyse montre que la majorité des États ont évolué moins favorablement en 2024 en ce qui concerne les affaires administratives, puisque moins de la moitié d'entre eux ont diminué leur DT et augmenté leur CR. Par conséquent, des efforts supplémentaires seront nécessaires dans les années à venir pour réduire les DT et se rapprocher des niveaux des DT des affaires civiles et pénales.

Affaires de droit pénal

Depuis 2020, les affaires pénales sont incluses dans cette étude, sans comparaison avec les cycles précédents. Si l'on examine les indicateurs d'efficacité pour les affaires pénales de première instance, on remarque d'emblée que le CR n'était pas très élevé en 2024, la moyenne de l'UE étant de 95,7 % tandis que la médiane se situait à 98,8 %. La situation est quasiment identique à celle de 2023.

En ce qui concerne le DT, en 2024 la moyenne est de 189 jours et la médiane de 128 jours, alors qu'en 2023 la moyenne est de 175 jours et la médiane de 134 jours. Les améliorations ne sont notables que pour les DT des différents pays, puisque 6 États les ont réduits. Cependant, 17 pays ont augmenté leur niveau de DT, dont certains de manière significative. Les valeurs maximales ont été observées à Malte (862 jours) et en Grèce (583 jours). Le DT le plus bas a été enregistré en Estonie (35 jours) et en Hongrie (51 jours), soit encore moins que l'année dernière.

Un niveau de CR inférieur à 100 % a été signalé dans les 18 États, ce qui pourrait entraîner la création d'arriérés et une augmentation correspondante du DT dans les années à venir. Par conséquent, les États concernés doivent s'efforcer de prévenir de telles évolutions négatives. De même, les pays présentant un niveau de DT très élevé doivent continuer à le réduire pour atteindre les niveaux moyens ou médians de l'UE dans les années à venir.

Procureurs publics : Nombre total d'affaires pénales de première instance

Depuis 2020, les affaires du ministère public sont incluses dans cette étude, sans comparaison avec les cycles précédents. En 2024, la valeur moyenne des affaires nouvelles reçues par les services du ministère public dans l'Union européenne était de 3,24 affaires pour 100 habitants. Le nombre d'affaires traitées se situait approximativement au même niveau (3,27). La même tendance a été enregistrée pour les valeurs moyennes en 2023 et 2022. Les valeurs médiane montrent un nombre légèrement plus élevé d'affaires traitées que d'affaires nouvelles (3,01 pour les affaires nouvelles et 3,08 pour les affaires traitées). Si ces valeurs médianes étaient également inférieures aux nombres moyens, c'est aussi probablement parce que la moyenne était affectée par le très grand nombre d'affaires indiqués pour certains pays, tels que le Luxembourg avec 10,42 affaires nouvelles.

Parmi les affaires traitées, il y a eu 2,17 affaires classées pour 100 habitants (valeur médiane) et 0,57 affaire portée devant le tribunal (valeur médiane).

Si l'on considère les pays individuellement, il est intéressant de noter que sur les 22 qui ont fourni des données pertinentes, 10 Etats ont plus d'affaires traitées que d'affaires nouvelles ou un nombre égal pour ces deux catégories, tandis que dans 12 Etats, les affaires nouvelles étaient plus nombreuses que les affaires traitées, ce qui pourrait potentiellement conduire à la création d'arriérés dans les services de poursuite respectifs. La comparaison du ratio entre affaires traitées et affaires nouvelles au cours du dernier cycle permet de conclure que dix pays ont réussi à améliorer ce ratio. L'analyse de cet indicateur suggère une légère augmentation de l'efficacité des services du ministère public en 2024.

L'utilisation des technologies de l'information et de la communication (TIC) dans les tribunaux

Alors qu'elles agissaient initialement comme un simple outil de soutien à la productivité, les technologies de l'information et de la communication (TIC) deviennent l'un des leviers importants pour améliorer l'efficacité des tribunaux. Le rôle croissant des TIC dans l'amélioration de la productivité et de l'efficacité, ainsi que dans l'aide à la prise de décision, repose en effet sur les possibilités de l'automatisation des tâches et l'inévitable progrès technologique général.

Le questionnaire relatif aux TIC comprend 38 questions qui incluent le taux de déploiement et le taux d'utilisation des différents outils utilisés dans les tribunaux. Pour les besoins de cette étude, la Commission européenne a sélectionné quatre questions relatives à deux outils différents : les outils d'assistance à la rédaction et l'enregistrement des audiences.

Les données montrent que presque tous les pays de l'UE sauf Chypre disposent d'outils d'assistance à la rédaction, et ces outils sont très présents avec un taux de déploiement de 95-100% indiqué par 18 Etats membres pour le domaine civil et commercial, 17 pour le domaine administratif et 19 pour le domaine pénal. Pour cet outil d'assistance à la rédaction, le taux d'utilisation est assez élevé : 12 des pays ont déclaré un taux d'utilisation de 95 - 100 % pour le domaine civil et commercial et 11 pour le domaine administratif, 13 pour le domaine pénal. Les fonctionnalités des outils d'aide à la rédaction sont principalement des modèles, ce qui est vrai pour tous les pays, mais un grand nombre d'entre eux disposent également de textes générés automatiquement. La signature électronique et de la conversion automatique de la voix en texte (transcription automatique) sont également présentes dans la moitié des pays. Seule la Hongrie et la Lettonie disposent de décision de justice proposée automatiquement pour toutes les affaires, tandis que la France en dispose pour les affaires civiles et pénales.

Il convient de noter que la plupart des pays disposent d'outils d'enregistrement des audiences, 18 États membres ont un taux de déploiement de 95 à 100 % et 14 États membres ont un taux d'utilisation de 95 - 100 %. Pour ceux qui ont fourni des informations sur cet outil, il est notable que le taux de déploiement est plus élevé pour le domaine civil et administratif et légèrement inférieur pour le domaine pénal. En ce qui concerne les fonctionnalités, pour les affaires civiles, 22 pays utilisent l'enregistrement audio et seulement 10 l'enregistrement vidéo des audiences. La situation est similaire en matière pénale, mais beaucoup moins de pays semblent enregistrer les audiences en matière administrative (18). Dans certains pays, l'enregistrement est systématique pour toutes les audiences. C'est le cas dans 11 pays en matière civile, 8 en matière administrative et 11 en matière pénale.

Les questions relatives aux TIC ont été complètement remaniées en 2022 et consistent en 38 questions qui incluent le taux de déploiement et le taux d'utilisation des différents outils utilisés dans les tribunaux. Pour les besoins de cette étude, la Commission européenne a sélectionné quatre questions relatives à deux outils différents : les outils d'assistance à la rédaction et l'enregistrement des audiences.

Les données montrent que presque tous les pays de l'UE disposent d'outils d'assistance à la rédaction, un pays n'a pas pu répondre à cette question, alors que dans les autres pays, ces outils sont très présents et un taux de déploiement de 95-100% de ces outils a été reporté dans 18 Etats membres pour le domaine civil et commercial, 17 Etats membres pour le domaine administratif et 19 Etats membres pour le domaine pénal. Les informations collectées sur le taux d'utilisation sont une extension de celles concernant le taux de déploiement collectées pour les cycles précédents. Pour cet outil, le taux d'utilisation est assez élevé : 12 % des pays ont déclaré un taux d'utilisation de 95 à 100 % pour les affaires civiles et commerciales et les affaires administratives, 13 pour les affaires pénales. Les fonctionnalités des outils d'aide à la rédaction sont principalement des modèles, ce qui est vrai pour tous les pays, mais un grand nombre d'entre eux disposent également de textes générés automatiquement, de la signature électronique et de la conversion automatique de la voix en texte. Seule la Hongrie et la Lettonie disposent de décision de justice proposée automatiquement pour toutes les affaires, tandis que le Luxembourg ne le fait que pour les affaires pénales.

Il convient de noter que la plupart des pays disposent d'outils d'enregistrement des audiences, 16 États membres ont un taux de déploiement de 95 à 100 % et 13 États membres ont un taux d'utilisation de 95 à 100 %. Pour ceux qui ont fourni des informations sur cet outil, il est notable que le taux de déploiement est plus élevé pour les affaires civiles et pénales et légèrement inférieur pour les affaires administratives. En ce qui concerne les fonctionnalités, pour les affaires civiles, 20 pays utilisent l'enregistrement audio et seulement 8 l'enregistrement vidéo des audiences. La situation est similaire en matière pénale, mais beaucoup moins de pays semblent enregistrer les audiences en matière administrative. Dans certains pays, l'enregistrement est systématique pour toutes les audiences. C'est le cas dans 11 pays en matière civile, 8 en matière administrative et 11 en matière pénale.

Methodology

The methodology used for this study completely follows CEPEJ methodology for its evaluation cycle using a questionnaire for evaluating European judicial systems. This Scheme is filled by the CEPEJ's national correspondents, whose responses are statistically processed and analysed by the Secretariat of the CEPEJ.
Such inter-governmental work requires permanent dialogue and full transparency with the member states of the Council of Europe.

- **Data collection, validation and analysis**

Numbers indicated between brackets following the letter Q refer to the questions of the CEPEJ questionnaire.

From a methodological point of view, and with a commitment to quality, consistency and comparability of the data supplied, data collection is primarily responsibility of the CEPEJ's national correspondents. The national correspondents are the unique interlocutors of the Secretariat when collecting new data. States providing such data are liable for the quality of data used in the survey.

According to CEPEJ methodology, an extensive work is carried out by the CEPEJ Secretariat to verify the quality of the data submitted by the correspondents. This quality check process requires a certain time in order to guarantee the reliability of the quantitative and qualitative data to be finally presented to European Commission.
The reference year for the last data collection is 2024. As for previous cycles, wherever data is not possible to obtain notation NA (not available) is used. Only in exceptional cases and only for questions that are used for standardisation, CEPEJ can accept previous cycle data. This data is population, GDP per capita and average annual salary.
The study itself is based on 2024 data as well on previous cycles (every year, starting with 2014) wherever evolution and trends are presented. "

- **The quality of data**

The reader should bear in mind and always interpret statistical figures presented (including in the country fiches) in the light of their attached narrative comments which allow to contextualise the data and give more information on each specific judicial system.

The CEPEJ has chosen to process and present only the data which offered a high level of quality and accountability: it decided to disregard figures which were too different from one country to another or from one exercise to another without sufficient explanations, or when they did not present sufficient guarantees of reliability. For some issues covered by this study, no data could be provided. This could mean that none were available, that the data could not be collected as such or that no data meeting these requirements had been provided within the deadline set.

- The following abbreviations have been used in this study:

NA: data not available;

NAP: data non applicable;

CR: Clearance Rate;

DT: Disposition Time.

Methodological disclaimer

1) The data analysed have been provided by the member states and/or have then been validated during quality control process finalised 15th December 2025. Amendments provided by member states after the delivery of this study may appear in future reports, as CEPEJ's database is regularly updated. This also explains why previous cycle data updated on the day of this delivery, may not always fully coincide with the data published in previous CEPEJ reports and studies (even sometimes replacing data with "NA").

The validation has been made according to CEPEJ's methodology. However, the full reliability of data depends mostly on the data providers. It should be kept in mind that the accuracy of some entries was confirmed by national correspondents without specific explanation on potential discrepancies.

2) Some data cannot be compared with previous data since the questionnaire was modified between the different evaluation cycles, this is signalised in comments or footnotes under the concerned tables.

3) It should also be noted that the minimum, maximum, average and median values in certain tables are calculated with quantified data (excluding answers "NA" or "NAP").

4) Certain indicators as well as variations might appear as outliers only because of small absolute numbers. This could be the case of small countries, In this case the indicator or variation is not considered as relevant.

5) The CEPEJ works in full transparency vis-à-vis the member states as regards the purpose of the data collection exercise. According to CEPEJ methodology, only the final version of the study can be disseminated, after possible comments from the member states. Before the final version of the study, all the data collected remains confidential. When using data provided by the CEPEJ in public reports, European Commission should always mention "Source: CEPEJ data". If CEPEJ data are presented together with other data, the source of the different data must be clearly mentioned.

6) Certain indicators as well as variations might apear as outliers only because of small absolute numbers. This could be the case of small countries, In this case the indicator or variation is not considered as relevant.

7) The analyses delivered in the country profiles are based on the data and comments provided from the CEPEJ national correspondent and without use of additional sources.

Q001 (2022): Data provided by National Statistical Institute
The number of population as of 01.01.2023 (31.12.2022) is calculated based on the data of the Census of population 2021 and the data of natural and mechanical movement of the population.

Q003 (2023): Preliminary estimates; Final estimates will be available after 11:00 a.m. on 18 October 2024

Q003 (2021): Preliminary estimates. We confirm the nominal growth of 11.57% for the indicator GDP per capita in current prices for 2021 (preliminary data) compared with 2020. The result is based on an increase in nominal GDP and a decrease in the average annual population.

Q003 (2020): The data per capita GDP (in €) in current prices for 2020 will be available after 15.12.2021.

Q003 (2018): NSI data

Q003 (2016): No explanation.

Q004 (2024): The final 2024 data is published on 28.11.2024 covering full and part-time employees. It is 27 898 Leva or 14 264 Euro.
The economic activities in which the largest increase was registered were "Construction" - by 22.6%, "Culture, sports and entertainment" - by 17.1%, and "Transport, storage and post" - by 16.9%.

Q004 (2023): The final 2023 data is published on 29.11.2024. It is 24 485 Leva or 12 518 Euro

Q004 (2021): Preliminary data.
The minimum wage in the country has been risen with 6.6%. In section “Human health and social work activities” the average annual wage increased with 25.7% due to additional wage payments related with the health crisis. In section “Education” there was an increase of the teachers' wages and salaries and the increase in the section was 17.0%. High growth rate of wages and salaries in 2021 compared to 2020 (17.7%) was recorded in “Accommodation and food service activities” as the section started to recover after 2020 lockdowns.

Q004 (2018): NSI data

Q004 (2016): No explanation.

Q005 (2019): BGN 1= EUR 0,51129
EUR 1= BGN 1, 9558

Croatia

Q001 (2024): Data is provisional and it refers to population estimate for middle of 2024
Final population estimate, state on 31st December 2024, will be published on 30th of June 2025

Q001 (2022): State on 31 December 2022

Q001 (2021): https://podaci.dzs.hr/hr/statistika-u-nizu/. Final results of the population census.

Q003 (2024): The GDP data for 2024 are estimated, based on the sum of quarterly figures and are classified as "provisional". The annual data for 2024 will be avaleble in October 2025, but the final data for 2024 vill be avalibe in October 2026 at earliest.

Q003 (2023): As for 2022, the average monthly gross salary was HRK 10,400 (press release available at: https://podaci.dzs.hr/2022/hr/29062), which would be HRK 124,800 on an annual basis, and applying fixed conversion rate to Euro of 7.53450, we arrive at an annual average gross salary of 16,564 euros
Considering the year 2023, the average monthly gross salary was 1,584 euros (press release available at: https://podaci.dzs.hr/2023/hr/58119), and the annual average is 19,008 euros
o If we compare these two values, we arrive at a difference of 14.75% (19,008 / 16,564 * 100)

Q003 (2021): https://podaci.dzs.hr/hr/statistika-u-nizu/

Q004 (2024): Average monthly gross salary for 2024 for person in paid employment in legal entities in the Republic of Croatia is available at web page of the Croatian Bureau of Statistics (https://podaci.dzs.hr/2024/en/76833).
This monthly gross salary (1 821 euro) has been multiplied by 12.

Q004 (2023): Values for 2022 and prior years may differ from previous deliveries. The GDP for 1995-2023 was revised and published in 2023, including "Gross Domestic Product, Revised Data" (https://podaci.dzs.hr/media/r1dhalwf/msi-bruto-domaci-proizvod.xlsx) and "Annual Gross Domestic Product - Annual Calculation, Revised Data" (https://podaci.dzs.hr/media/c51dcmbr/bruto-domaci-proizvod-godisnji.xlsx).

Q004 (2022): will be explained later

Q004 (2021): Average monthly gross salary for 2021 for person in paid employment in legal entities in the Republic of Croatia is available at web page of the Croatian Bureau of Statistics (https://podaci.dzs.hr/2021/en/10583).
This monthly gross salary (9599 Croatian Kuna) has been multiplied by 12 and then divided by Croatian Kuna / Euro average annual medium exchange rate published by the Croatian National Bank (7,52418 Croatian Kuna for 1 Euro; this information is available at https://www.hnb.hr/temeljne-funkcije/monetarna-politika/tecajna-lista/tecajna-lista.)

Q005 (2024): On 1 January 2023 Croatia adopted the Euro and became the 20th member of the euro area.

Q005 (2023): On 1 January 2023 Croatia adopted the Euro and became the 20th member of the euro area

Q005 (2022): On 1 January 2023 Croatia adopted the Euro and became the 20th member of the euro area. On 12 July 2022 the Council of the European Union formally approved Croatia’s accession to the euro area and determined a Croatian kuna conversion rate of 7.53450 per euro.

Q005 (2021): In other words, 7,52045 Croatian Kuna for 1 Eur (medium exchange rate for January 1th 2022). This exchange rate was published on the web page of the Croatian National Bank (available at https://www.hnb.hr/temeljne-funkcije/monetarna-politika/tecajna-lista/tecajna-lista).

Cyprus

Q001 (2022): The data is provisional (01/01/2023).

Q001 (2020): The number is provisional.

Q001 (2018): this is the number on 1st January 2019

Q003 (2022): The latest number was published on 20 October 2023.
The increase is due to inflation (8.4% compared to 2021).
Q003 (2016): Per Capita GDP (current prices)
Total GDP (current prices)
The revised figures provided by the statistical service are
Per Capita GDP (current prices) Total GDP (current prices 2015 20.931 euro 17.742,0 million euro
2016 21.282 euro 18.122,5 million euro

Czech Republic

Q003 (2022): The GDP is constantly growing + the impact of the exchange rate

Q003 (2016): The Czech economy is doing well + the exchange rate.

Q004 (2022): The gross salary is constantly growing + the impact of the exchange rate

Q004 (2021): The gross salary is constantly growing.

Q004 (2020): The gross salary is constantly growing.

Q004 (2019): Positive trends in Czech economy and the exchange rate have had an influence on the rise of average gross annual salary (in €).
Q004 (2016): The Czech economy is doing well + the exchange rate.

Q001 (2014): The data for 2013 and 2014 is the same reference. Because no significant difference has been expected for the year 2014, 2013 data is provided in the frame of the present evaluation.
Q003 (2022): The national accounts (published by the Federal Statistical Office) are revised in the summer of each year on the basis of newly available statistical information. These revisions usually concern the last four years. The revisions have been stronger than usual, especially from 2020 onwards. This is mainly due to the higher uncertainty in the estimates in the years affected by the Corona pandemic.

Q003 (2016): The circumstances have changed since the last campaign.

Q003 (2014): The data for 2013 and 2014 is the same reference. Because no significant difference has been expected for the year 2014, 2013 data is provided in the frame of the present evaluation.
Q004 (2024): The figure represents the average gross annual salary of employees working in full time including special payments (without
special payments: 56 294 EUR)
Special payments are any payments outside of the regular remuneration that can be recurring on an annual basis (such as Christmas bonuses/end-of-the-year bonuses, holiday bonuses, bonuses for the fulfilment of target agreements) or irregular (e.g. payments for jubilees).

Q004 (2023): The figure represents the average gross annual salary of employees working in full time including special payments (without special payments: 53 620 EUR)
Special payments are any payments outside of the regular remuneration. Typical examples of such payments are Christmas bonuses/end-of-the year bonuses, holiday bonuses, payments for jubilees, bonuses for the fulfilment of target agreements.

Q004 (2022): The figure represents the average gross annual salary of employees working in full time including special payments (without special payments: 50 805 EUR)
Special payments are any payments outside of the regular remuneration. Typical examples of such payments are Christmas bonuses/end-of-the year bonuses, holiday bonuses, payments for jubilees, bonuses for the fulfilment of target agreements.

Q004 (2021): The figure represents the average gross annual salary of employees working in full time including special payments (without special payments: 49 202 EUR)
Special payments are any payments outside of the regular remuneration. Typical examples of such payments are Christmas bonuses/end-of-the year bonuses, holiday bonuses, payments for jubilees, bonuses for the fulfilment of target agreements.

Q001 (2018): Taken from Population and Migration Estimates April 2018 release of 28 August 2018 https://www.cso.ie/en/releasesandpublications/er/pme/populationandmigrationestimatesapril2018/

Q001 (2017): Figure of 4729500 as at April 2017. The population number for 2017 based on the GDP figure below for 2017 is 4,793. Taken from Population and Migration Estimates April 2017 release date 28 September 2017. https://www.cso.ie/en/releasesandpublications/er/pme/populationandmigrationestimatesapril2017/

Q001 (2016): The population number for 2016 based on the GDP figure below for 2016 is 4,673,700 Taken from Population and Migration Estimates April 2016 release date 23 August 2016. http://www.cso.ie/en/releasesandpublications/er/pme/populationandmigrationestimatesapril2016/

Q003 (2022): Year 2022 GDP at Current Market Prices per head of population. GDP per person is calculated from Year 2022 GDP at Current Market Prices datum value of €506,282 million divided by 5,100,200, the Estimated Population for Year 2022 (Persons in April)
Q003 (2021): ANA 2021 Table 1.2 – Main Aggregates, 2016-2021 refers https://www.cso.ie/en/media/csoie/releasespublications/documents/ep/annualnationalaccounts/2021/P-ANA2021TBL1.2.xlsx.

Q003 (2020): (See Sources)The 3rd block of data in NIE 2020 Table A shows data Per head of population. GDP at Current Market Prices for reference year 2020 per NIE2020 = €372,869 million. Population 2020 = 4,977,400. The National Income and Expenditure data are subject to potential revision each year (i.e. please note that Ireland does not operate a five-year benchmark revisions policy unlike certain other EU Member States and other countries internationally. It is CSO Ireland policy to incorporate all revisions and updates to the annual national accounts on an annual basis, whenever a new series of annual results are being published. This applies both to routine changes involving the use of more final data and to the less frequent revisions resulting from any major methodological developments. In the past, such major methodological revisions would also have been incorporated in the historic backdata estimates [back to year 1995] published at the same time.).

Q003 (2019): Comments Taken from Table A of the National Income and Expenditure 2019 release of 20 July 2020 https://www.cso.ie/en/statistics/nationalaccounts/nationalincomeandexpenditureannualresults/
The 3rd block of data shows data at Per head of population.
GDP @ current Market prices per NIE2019 = € million 356,051
Population 2019 = 4,921,000 The National Income and Expenditure data each year is subject to revisions.

Q003 (2018): Taken from Table A of the National Income and Expenditure 2018 release of 11 July 2019 https://www.cso.ie/en/statistics/nationalaccounts/nationalincomeandexpenditureannualresults/
The 3rd block of data shows data at Per head of population.
GDP @ current Market prices per NIE2018 = € million 324,328
Population 2018 = 4,857,000 The National Income and Expenditure data each year is subject to revisions.

Q003 (2017): GDP per capita @ current market prices for 2017 = €61,369
Taken from the National Income and Expenditure Annual Results 2017. Release date 14 July 2018. Table A. (main aggregates). https://www.cso.ie/en/releasesandpublications/ep/p-nie/nie2017/
The National Income and Expenditure data each year is subject to revisions

Q003 (2016): Taken from the National Income and Expenditure Annual Results 2016.
The National Income and Expenditure data each year is subject to revisions.
The following is an extract from the National Income and Expenditure 2016 methodology note
...The estimates for 2016 are based upon indicators for the different aggregates and must be regarded as tentative. The provisional nature of the estimates for 2014 and 2015 must also be borne in mind. In particular, the estimates for the year 2016 must be regarded as preliminary. Many of the inquiries upon which the basic compilations rest are incomplete and to the extent that figures given for 2014 and 2015 are still partly subject to revision, projections for the year 2016 are also affected. While no guarantee can be given that published figures will remain unaltered as inquiries proceed and as sources and methods are reviewed, it is expected that any changes made in future in relation to years earlier than 2011 will have a relatively insignificant effect on the year-to-year trend in these data. ...
See Link to the National Income and Expenditure 2016 methodology note on the CSO website
http://www.cso.ie/en/media/csoie/methods/nationalincomeandexpenditureannualresults/NIE2016MethodologyNote.pdf
The GDP figure increased significantly in 2015. The scale of increase was unprecedented. Therefore the GDP per capita increased. Please see link to the Press Statement of 12 July 2016
http://www.cso.ie/en/media/csoie/newsevents/documents/pr_GDPexplanatorynote.pdf

Please scroll down to Table A Main Aggregates, 2011-2016 The 3rd block of data shows data at Per head of population. See GDP at current market prices first line under Per head of population for years 2011 to 2016

Q003 (2015): The 2015 GDP figure was considerable higher compared to other years and at the time of release attracted a lot of media attention and continues to do so.
Q004 (2022): Year 2022 is the latest year for which data are available.

Q004 (2021): Year 2021 is the latest data available. The figure of €44,912.24 was taken from Q4 but it should be noted that the annual gross salary fluctuated during the course of 2021.
https://www.cso.ie/en/releaseandduplications/en/elcq/earningsandlabourcostsq42021final/2022premliminaryestimates.
According to preliminary estimates of the Earnings and Labour Costs Quarterly release, the average weekly earnings were €880.3 in Q1 2022, an increase of 2.3% from €860.19 one year earlier and an increase of 10.0% from the same period in 2020. This represents average earnings of those in employment in the Irish economy in Q1 2022, including those supported by the Employment Wage Subsidy (EWSS).
https://www.cso.ie/en/releaseandduplications/en/elcq/earningsandlabourcostsq42021final/2022premliminaryestimates.

Q004 (2020): Year 2019 is latest data available

Q004 (2019): Comments Taken from Earnings and Labour Costs Annual 2019 release of 26 June 2020
https://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2019/
Q004 (2018): Taken from Earnings and Labour Costs Annual 2018 release of 11 June 2019
https://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2018/

Q004 (2016): Average annual earnings increased by 1.1% to €36,919 in 2016, from €36,519 in 2015.
Taken from CSO release of 29 June 2017 - Earnings and Labour Costs Annual 2016. See link
http://www.cso.ie/en/releasesandpublications/er/elca/earningsandlabourcostsannualdata2016/

Q005 (2021): Ireland Exchange Rate against USD averaged 0.987 (EUR/USD) in Aug 2022, compared with 0.983 EUR/USD in the previous month.

Latvia

Q001 (2024): Data on 01.01.2025

Q001 (2023): Data on 01.01.2024.

Q001 (2022): Population at the beginning of the year, 01.01.2023

Q001 (2021): Data on 01.01.2022.

Q001 (2020): The data is on 01.01.2021.

Q001 (2019): Data are on 01.01.2020.

Q001 (2017): 01.01.2017.- 1 950 116
01.01.2018.- 1 934 379
Q001 (2016): On 2016 1st January - 1 968 957
On 2017 1st January - 1 950 116

Q003 (2022): Starting from 2020, an increase in GDP per capita is observed in Latvia, which is influenced by two factors: a decrease in the population and a moderate increase in GDP.
Q003 (2021): The data provided by the Central Statistical Bureau.
The data for 2020 is a little bit different from that number provided in 2021 for 2020. In the Central Statistical Bureau home page the GDP in current prices for 2020 is 15497.
Q004 (General Comment): After 2012, the minimum monthly salary increased, which had an effect on the average gross annual salary.
Q004 (2024): In 2024, the average gross monthly wage in Latvia increased by approximately 9.7% compared to 2023. The main driver of this growth was a significant rise in public sector salaries, particularly in education, where wages rose by over 18%.
Q004 (2023): The changes in the average salary in 2023 were influenced by the increase of the national minimum wage, as well as the increase of the maximum non-taxable minimum and the coefficient applied in the calculations of the differentiated non-taxable minimum.
Q004 (2022): The average wage in Latvia continues to rise for several years in a row. In 2022, the increase in average wages was influenced by several factors: the lifting of the restrictions of COVID-19, which boosted economic activity, a low unemployment rate, which created the conditions for a small increase in wages.
Q004 (2021): The data provided by the Central Statistical Bureau.

Q004 (2020): The data provided by the Central Statistical Bureau.

Q004 (2016): on 2016

Lithuania

Q001 (General Comment): data from the National data agency

Q001 (2024): data from the National data agency

Q001 (2020): https://osp.stat.gov.lt/statistiniu-rodikliu-analize?hash=5b7fa09d-7ace-4909-89d9-b8a8897da5ba#/

Q003 (2022): Changes in wages were affected from 2022 January 1 as the minimum monthly salary was increased, the basic salary of state politicians, judges, state officials, civil servants and employees of budgetary institutions was increased, the procedure for calculating the amount of tax-free income was changed.

Q003 (2020): http://appsso.eurostat.ec.europa.eu/nui/show.do?dataset=nama_10_pc&lang=en

Q004 (General Comment): According to data from the State Data Agency, wage changes were influenced by the increase in the minimum monthly wage from January 1, 2024, the increase in the minimum salary coefficients for employees of budgetary institutions, changes in the calculation of the non-taxable income amount, and other reasons.

Q004 (2024): The State Data Agency of the Republic of Lithuania announces that the changes in wages were caused by an increase in the minimum monthly wage from January 1, 2024, an increase in the minimum wage coefficients for employees of budgetary institutions, changes in the calculation of non-taxable income, and other reasons.

Q004 (2023): Increase in earnings was influenced by increased basic wages for politicians, judges, civil servants, public service employees and employees of budgetary institutions, increased minimum monthly wage and other reasons.

Q004 (2022): Changes in wages were affected from 2022 January 1 as the minimum monthly salary was increased, the basic salary of state politicians, judges, state officials, civil servants and employees of budgetary institutions was increased, the procedure for calculating the amount of tax-free income was changed.
It should be noted that from 2019 January 1 the rates of state social insurance contributions paid by the employer and the employee have been changed. gross wages indexed 1.289 times.
Q004 (2021): From the 1st January, 2021 the minimum monthly salary was increased, the base salary of state politicians, judges, state officials, civil servants and employees of budgetary institutions was increased, the procedure for calculating the amount of tax-free income was changed and other reasons.
https://osp.stat.gov.lt/informaciniai-pranesimai?articleId=9732032

Q004 (2020): Annual salary growth has been affected by the increase in the minimum monthly salary since the beginning of the reference year, the base salary of state politicians, judges, state politicians, judges, civil servants, civil servants and employees of budgetary institutions, changes in the procedure for calculating tax-free income and other reasons.

Q004 (2019): The increase in wages in 2019 was caused by changes in the tax system: an increase in the basic salary of politicians, judges, civil servants, civil servants and employees of budgetary institutions, an increase in the minimum monthly salary, a revision of the new salary system for civil servants, a change in the procedure for calculating exemptions and other reasons.
Q004 (2018): The state budget and salary increased due to the growth of the economy.

Q004 (2016): The state budget and salary increased due to the growth of the economy (after recovering from crisis before).

Q005 (2017): Lithuania is in an Euro zone.

Q005 (2016): Lithuania is in an Euro zone.

Luxembourg

(https://lustat.statec.lu/vis?fs[0]=Th%C3%A8mes%2C1%7CConditions%20social%23C%23%7CConditions%20de%20vie%23C1%23&fs[1]=Th%C3%A8mes%2C0%7CConditions%20social%23C%23&fs[2]=NACE%20Rev.2%2C0%7CActivit%C3%A9s%20financi%C3%A8res%20et%20d%27assurances%20%28K%29%23SL09%23&pg=0&fc=NACE%20Rev.2 &df[ds]=ds-release&df[id]=DF_C1202&df[ag]=LU1&df[vs]=1.0&pd=2015%2C&dq=L01%2BSL09..A&ly[rw]=NACE_REV2%2CGENDER&ly[cl]=TIME_PERIOD ; consulté le 01.07.2024)

Q004 (2022): Average annual gross incomes by economic activity - Full-time workers (in EUR) NACE Rev.2: Industry and services (B-S). https://lustat.statec.lu/vis?pg=0&df[ds]=ds-release&df[id]=DF_C1202&df[ag]=LU1&df[vs]=1.0&pd=2016%2C2022&dq=L01..A&ly[rw]=GENDER&ly[cl]=TIME_PERIOD&lc=en

Q004 (2020): The 2019 data has been tentatively provided, pending the official release of the 2020 data.

Q004 (2019): This figure represents the average gross salary for the "Industry and Service" sector, according to the NACE Rev 2 code.
(https://statistiques.public.lu/stat/ReportFolders/ReportFolder.aspx?IF_Language=fra&MainTheme=3&FldrName=1&RFPath=30).

Q004 (2016): The variation between the different cycles (44% between 2014 and 2016) comes from a difference between gross salary (which was given for this cycle) and net salary (which was given for the previous cycles).

Malta

Q001 (2023): This data was collected from EuroStat.

Q001 (2022): The National Statistics Office revised their population data in July 2023 and is now estimating the population of Malta at the end of 2021 to be 520,174. The link to the site is: https://nso.gov.mt/world-population-day-11-july-2023/.

Q001 (2017): The discrepancy is mainly due to the increase in population in Malta.

Q003 (2023): Data provided by the National Statistics Office: https://nso.gov.mt/wp-content/uploads/National-Accounts-Selected-indicators-2024Q2.xlsx

Q003 (2022): This is the data provided and verified with the National Statistics Office for the GDP in nominal terms (without taking into consideration the inflation rate).

Q003 (2021): The GDP is estimated by the nSO and is quoted form the following link:
https://nso.gov.mt/en/News_Releases/Documents/2022/05/News2022_095.pdf

Q003 (2018): The quoted figure has been confirmed by NSO and can be verified at
https://nso.gov.mt/en/nso/Selected_Indicators/National_Accounts/Documents/2018/GDP_capita_Q4-2018.pdf

Q004 (2023): Data provided by the NSO

Q004 (2022): This is the data provided and verified with the National Statistics Office

Q004 (2021): The figure quoted above relates specifically to the Average Annual BASIC salary as provided by the National Statistics Office of Malta. The NSO do not collect the Average Annual Gross salary.

Q004 (2018): This data has been provided by NSO based on as yet provisional estimates.

Netherlands

Q001 (2024): Number of inhabitants on January 1, 2024: 17 942 942

Q001 (2023): Number of inhabitants on January 1, 2023: 17 811 291

Q001 (2022): Inhabitants 2022: 17 590 672

Q001 (2019): Number of inhabitants on 1 January 2020

Q001 (2018): Number of inhabitants on 1 January, 2019

Q001 (2016): The figures for state level include regional level and social security institutions. They cannot be separated due to transfers from state level to regional level (and to a lesser extent the other way around). Public expenditure according to EU-definition also includes official social security institutions. This is neither state nor regional level. Transfers from state level to official social security institutions are also possible. According to EU-rules the figures are revised up to 30 months after the end of the reporting period. Compared to previous questionaires (before 2014) these figures have been adjusted according to new rules of the european system of national accounts (illegal activities are now included)

Q003 (General Comment): GDP is based on provisional numbers, definitive numbers (usually available in the next year) may differ slightly from those provided here.

Q003 (2023): For now, we have used the 2022 GDP, and number of inhabitants as provided in Q1. Data for 2023 GDP is not yet available.
The following information was used to calculate the per capita GDP: National GDP divided by number of inhabitants on Jan 1, ref year + 1: 958 549 000 000 / 17 942 942

Q003 (2022): To bring these numbers in line with the information shared with Eurostat, we have used the following calculation: National GDP: 958 549 000 000, divided by the number of inhabitants on Jan 1, ref year + 1 (17 811 291).

Q003 (2020): Source: https://www.cbs.nl/nl-nl/nieuws/2021/28/bbp-per-inwoner-in-nederland-nog-altijd-relatief-hoog-binnen-de-eu
Q003 (2019): GDP 810 247 000 000 divided by the number of inhabitants on 1 January 2019 (17 282 163)
Q003 (2018): gdp 2018: 774.039.000.000
devided by the number of inhabitants on 1 January, 2018
Q003 (2017): the gdp is 3.2% percent higher than in 2016. see also https://www.cbs.nl/nl-nl/achtergrond/2018/19/de-nederlandse-economie-in-2017.
Q003 (2016): The per capita GDP is calculated by dividing total GDP by the average population (=[population on jan 1st current year+ population on jan 1st next year]/2). Note: the explanatory notes say anything on how to calculate per capita GDP.

Q004 (General Comment): Average gross annual salary is based on provisional numbers, definitive numbers (usually available in the next year) may differ slightly from those provided here.
Salary is defined as 'reward per working year'. This reward consists of salary (gross salary, including taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances tied in with work (e.g. travel allowances), and social premiums for the employer (payments for lawful and contractual social security, like pension contributions). The CBS has somewhat different numbers available than those used by Eurostat, therefore, numbers presented here might differ from those in Eurostat.
Q004 (2020): These are provisional numbers and the definitive numbers (available in 2022) may differ slightly from these provided here. The data specifies ‘reward per working year’ as salary. The reward consists of salary (gross salary, as it includes taxes and social contributions/premiums), rewards like holiday stipends, payment in kind, expense allowances that tie in with work (like travel allowances that cover costs to and from work), and social premiums that are for the employer (payments for lawful and contractual social security, like pension contributions).

Q004 (2019): The Statistics Bureau only had numbers for 2018. 2019 data was not available at the moment of data collection.

Q004 (2018): This is average salary of all employees; the number includes money that employers pay for pension plans, social security (money that is paid directly to employees). The statistic does not include the income of people who are not employees (people without work, employers).
Q004 (2016): Compared to previous questionaires (before 2014) these figures have been adjusted according to new rules of the european system of national accounts (illegal activities are now included)

Q004 (2023): The increase reflects the inflation
This is the provisional value for year 2022.
Data for 2023 is still not available.
Q004 (2022): This value is for year 2021.
Data for 2022 is still not available.
Q004 (2016): In the present questionnaire we used another "concept" of gross anual salary that we believe is closer to the objectives of this question.
We opted for the category of "payments and salaries" instead of "remunerations" of the national budget because "remunerations" also includes social contributions by the employer which constitue wage costs and not salary.

Romania

Q001 (2024): Provisional data

Q001 (2023): Provisional data

Q001 (2022): Usually resident population of Romania on January 1st 2023 - provisional data

Q001 (2020): Usually resident population of Romania on January 1st -provisional data

Q001 (2019): provisional data

Q001 (2018): Provisional data (which will be completed when the National Institute of Statistics will finalize population data).The revised data will be available in the TEMPO database of the National Institute of Statistics (www.insse.ro).

Q001 (2017): Provisional data which will be completed when the National Institute of Statistics will finalize population data.

Q001 (2016): Provisional data which will be completed when the National Institute of Statistics will finalize population data - (19638309 -as communicated in September 2017).
Update:
After reviewing/completing of population data by the National Institute of Statistics, in accordance with the methodology of calculation, the revised data are as follows- for January 1, 2015, the number of inhabitants (as revised) is 19875542; for January 1, 2016, the number of inhabitants (final data) is 19760314; for January 1, 2017, the number of inhabitants (final data) is 19644350.
Methodological explanations:
Reference moments for statistically determining the usual resident population are January 1st and July 1st, t year. The data on usual resident population at the moment of January 1st, t year are available on August (provisional data) and on January, t+1 year (final data). Usual resident population represents all persons of Romanian nationality, foreign or stateless who have their usual residence in Romania. Usual residence is the place where a person normally spends the daily period of rest, regardless of temporary absences for purposes of recreation, holidays, visits to friends and relatives, business, medical treatment or religious pilgrimage. The usual residence may be the same as the domicile or may differ from it, for the persons who choose to establish their usual residence in a locality other than the locality of domicile in the country or abroad. It is considered having their usual residence in a specific geographic area just people who have lived in that usual residence for a continuous period of at least 12 months prior to reference moment. The resident population includes the persons who immigrated to Romania but excludes the persons who emigrated from Romania. In order to carry out international comparisons, it will be used only the usual resident population, calculated according to European regulations (Regulation no. 1260/2013 of the European Parliament and of the Council on European demographic statistics and Regulation no. 205/2014 laying down uniformed conditions for the implementation of Regulation no. 1260/2013 on European demographic statistics as regards breakdowns of data, deadlines and data revisions). For the period between the last two censuses (2002-2011 period), data refers to usual resident population, re-estimated under comparability conditions with final results of the Population and Housing Census of 2011. After January 1st, 2012, the usual resident population on January 1st was estimated according to the usual residence criterion, using the components method.
The revised data are available in the TEMPO database of the National Institute of Statistics (www.insse.ro).

Q003 (2024): Provisional data

Q003 (2023): Semi-definitive data

Q003 (2022): provisional data

Q003 (2021): Definitive data should be available in September 2023.

Q003 (2020): provisional data

Q003 (2019): provisional data

Q003 (2017): Provisional data provided by NIS

Q003 (2016): Provisional data

Q003 (2014): For the 2012 and 2014 evaluations, was used the resident population on 1 July of each year, estimated in terms of comparability with the final results of the Population and Housing Census – 2011.
Q004 (General Comment): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated on the basis of the monthly average gross salary at an average monthly value of the euro calculated by the National Bank of Romania for the reference year concluding in the average gross annual salary (as the sum of monthly average salary).

Q004 (2024): The data is provided by the National Institute of Statistics. The difference can be explained based on salary increases and an upward trend can be observed continuing from 2018.
Q004 (2022): The difference can be explained based on salary increases and an upward trend can be observed continuing from 2018.
Q004 (2020): The difference can be explained based on salary increases, and an upward trend can be observed continuing from 2018.
Q004 (2018): At national level, the average gross annual salary is not calculated and included in the official statistical reports made annually by the National Institute of Statistics. Thus, the SMBA was calculated by request by the National Institute of Statistics on the basis of the monthly average gross salary at an average annual value of the euro calculated by the National Bank of Romania for the reference year 2018
According to the provisions of the national legislation in force (GEO no. 79/2017 with subsequent amendments and completions), the social insurance contributions, respectively those of social health insurance that fell to the employer, were transferred to the employee's responsibility and, starting with 2018, are fully supported by the employee, being reflected in the gross amount of the earning.
Consequently, the indicator "monthly gross average wage" produced and disseminated from 2018 is no longer comparable with the previous data series.
These legal provisions do not influence the data comparability for the series of "average monthly net earnings."

Indicator 1: Systems for measuring and evaluating the performance of courts and prosecution services

Comments provided by the national correspondents

organised by country

Question 066. Are quality standards determined for the judicial system at national level (are there quality systems for the judiciary and/or judicial quality policies)?
Question 067. Do you have specialised personnel entrusted with implementation of these national level quality standards?

Question 070. Do you regularly monitor court activities (performance and quality) concerning:

Question 070-1. Do you regularly monitor public prosecution activities (performance and quality) concerning:

Question 071. Do you monitor the number of pending cases and cases that are not processed within a reasonable timeframe (backlogs) for:
Question 072. Do you monitor waiting time during judicial proceedings?

Question 083. Are there quantitative performance targets defined for each judge (e.g. the number of resolved cases in a month or year)?
Question 083-1. Who is responsible for setting these targets for each judge?

Question 083-1-1. What are the consequences for a judge if these targets are not met?

Question 083-2. Are there quantitative performance targets defined for each public prosecutor (e.g. the number of decisions in a month or year)?
Question 083-3. Who is responsible for setting these targets for each public prosecutor?

Question 083-3-1. What are the consequences for a prosecutor if these targets are not met?

Question 120. Is there a system of individual evaluation of the public prosecutors' work?

Question 120-1. Please specify the frequency of this evaluation:

Austria

Q070 (General Comment): .

Q070 (2024): As for now, appeal ratio is monitored by the administrative courts only.

Q070 (2022): satisfaction of court staff: only supreme administrative court

Q070 (2017): "other": e.g. certain kinds of decisions, clearance rate (annually)

Q070-1 (2024): This year the "satisfaction of prosecution staff" included, because the replies have not been answered correctly in the past.
Q072 (2024): Judicial proceedings – of both courts and public prosecution services – are systematically monitored for undue waiting periods. Depending on the type of proceeding a waiting period (= time during which no steps are taken in the proceeding) of three months, six months or twelve months is considered to be potentially undue. A waiting period exceeding this timeframe will lead to the proceeding appearing on an automatically generated list for review. The answer is different from last years, because the question has not been answered correctly in the past.

Q072 (2016): Supreme administrative Court: Statistic of incoming cases, number of decisions delivered, number of postpones cases, length of proceedings (timeframes) and age of cases
Q083 (2018): There are no specific targets given to the Judges, which are seen as a conflict with the Independence of Courts.

Q083 (2016): Provincial Administrative Courts: Maximum 150 cases a year per judge (average value).
Federal Finance Court:
No performance targets, which are seen in conflict with the independence. However based on a continuous transparent controlling the possibility of benchmarking exists. In addition regular dialogues with the judges regarding their performance are held.

Q083-1 (General Comment): No specific targets are formulated in respect of judges.

Q083-1 (2016): Answer counts only for the administrative courts.
For the other courts, no performance targets, which are seen as a conflict with the independence of courts.
Q083-3 (2018): There are no specific targets given to public prosecutors.

Q120 (General Comment): In the Austrian judicial system we have diverse and multifaceted statistic products, which are an important basis for the management of justice. The statistics are regularly compiled by the Federal Computing Center and serve to control the deployment of personnel, but also for the supervision that is necessarily linked to the parties' right to a fair trial. The work of the public prosecutors is continuously and systematically reviewed on a quantitative level (i.e. number of completed cases, duration of proceedings). In this way, major deviations from the average can be identified. If a public prosecutor shows too many delays in proceedings or excessively long proceedings, this can lead to disciplinary proceedings or even a reduction in their job description. The assessment is carried out by the heads of the senior public prosecutors' offices. A qualitative assessment of each prosecutor's work is carried out once for the second calendar year following their appointment to a specific position. The evaluation is repeated when they are appointed to a new position (for the second calendar year following that appointment). An assessment at a later time will be carried out, if either the head of the prosecutor's office or the assessed prosecutor themselves have reason to believe that the result of the last assessment is no longer accurate. If the assessment finds the prosecutor's work to be below average, the assessment is repeated for the next calendar year. The assessment is carried out by the personnel commission at the Senior Public Prosecutor's Office, consisting of the Head of the Senior Public Prosecutor's Office, the Head Prosecutor for the Public Prosecutor's Office to which the assessed prosecutor belongs, one prosecutor appointed/chosen by the Union of Public Services and one prosecutor appointed/chosen by staff representatives.
The evaluation takes into account the prosecutor's professional abilities, skills, knowledge, conduct and performance. The assessment can be relevant for the prosecutor's career, as it will be taken into account in later application procedures. If the assessment finds the prosecutor's work failing to meet the absolute minimum peformance standards necessary to fulfill their duties for two consecutive calendar years, the prosecutor will be dismissed.

Q120 (2024): In the Austrian judicial system we have diverse and multifaceted statistic products, which are an important basis for the management of justice. The statistics are regularly compiled by the Federal Computing Center and serve to control the deployment of personnel, but also for the supervision that is necessarily linked to the parties' right to a fair trial. The work of the public prosecutors is continuously and systematically reviewed on a quantitative level (i.e. number of completed cases, duration of proceedings). In this way, major deviations from the average can be identified. If a public prosecutor shows too many delays in proceedings or excessively long proceedings, this can lead to disciplinary proceedings or even a reduction in their job description. The assessment is carried out by the heads of the senior public prosecutors' offices. A qualitative assessment of each prosecutor's work is carried out once for the second calendar year following their appointment to a specific position. The evaluation is repeated when they are appointed to a new position (for the second calendar year following that appointment). An assessment at a later time will be carried out, if either the head of the prosecutor's office or the assessed prosecutor themselves have reason to believe that the result of the last assessment is no longer accurate. If the assessment finds the prosecutor's work to be below average, the assessment is repeated for the next calendar year. The assessment is carried out by the personnel commission at the Senior Public Prosecutor's Office, consisting of the Head of the Senior Public Prosecutor's Office, the Head Prosecutor for the Public Prosecutor's Office to which the assessed prosecutor belongs, one prosecutor appointed/chosen by the Union of Public Services and one prosecutor appointed/chosen by staff representatives.
The evaluation takes into account the prosecutor's professional abilities, skills, knowledge, conduct and performance. The assessment can be relevant for the prosecutor's career, as it will be taken into account in later application procedures. If the assessment finds the prosecutor's work failing to meet the absolute minimum peformance standards necessary to fulfill their duties for two consecutive calendar years, the prosecutor will be dismissed.
This is not a change, the reply in the past year was not given correctly.

Belgium

Q066 (2021):
The College of Courts and Tribunals and its support service are working on the implementation of a quality system at the national level; there is no declination at the local level yet, but this project is in full evolution. Within the framework of the law of 14 February 2014 and the College's action plans (2018 and 2020), a quality system will be implemented in respect of judges. The intention is therefore to introduce an integrated framework of quality, internal control and (internal) audit models to replace the executive's existing ex ante control and monitoring systems.

Q067 (2024): For public prosecution services: although the reply is “no,” there are, in particular, management support assistants who can work in the field of quality.
Q067 (2023):
Although the reply is ‘no’, the public prosecutor's department does have management support staff who can work in the quality field.
Q067 (2021): The College of Courts and Tribunals is working on the implementation of a quality system. This system is based on international scientific references and will be broken down into ten or so themes that constitute the management modules of an organisation. These management modules cover all aspects of an organisation, including organisational management, process management, human resources management, organisational culture, information and communication, financial management, facility management and information and communication technologies. The College of Courts and Tribunals and the steering committees work together to develop their maturity in these different areas.

Q070 (2024): Number and rate (and other details) of appeals: currently only for criminal cases in police courts.

Q070 (2023): Other: Dashboards including the following are in development or test-phase: - productivity (judges + court staff) (test phase for courts of appeals)
- number and rate of appeals (test phase for police courts)
Q070 (2021): In 2021, the College of Courts and Tribunals has started a project to make a central inventory of the backlog in the courts and tribunals using indicators such as length of proceedings, number of pending cases, Disposition time, backlogs.

Q070 (2017): There are ad hoc systems for monitoring activities within the courts. There is a central service responsible for the collection of statistics which ensures the annual publication of statistics. The Central Statistical Service is developing a uniform and coordinated policy, but there is (as yet) no central system for regular monitoring of activities.

Q070 (2016): There are ad hoc systems for monitoring activities within the courts. There is a central service responsible for the collection of statistics which ensures the annual publication of statistics. But there is no (yet) central system for regular monitoring of activities.

Q071 (General Comment): College of Courts and Tribunals: current mechanism (current exercise - backlog project)

Q071 (2016): There are ad hoc evaluation systems within the courts. But there is no central or coordinated system.

Q072 (General Comment): For the public prosecution services: monitoring using dashboards.

Q072 (2021): Public Prosecutor's Office: Monitoring mechanism via dashboards for the public prosecution services.

Q072 (2020): Monitoring mechanism via dashboards for prosecution services.

Q083-3 (2021): To underline the consistency between Q 83-2 and Q 83-3: these are not quantitative targets.

Q120 (General Comment): Public prosecutors are assessed on the way in which they carry out their duties. Heads of divisions are also assessed on their management skills and staff management, as well as on initiatives taken to tackle the backlog of cases. The criteria on which this assessment is based are of 3 types:
1) legal knowledge, work efficiency and effectiveness, communication, decisiveness and professional ethics
2) collegiality and self-control
3) interest in continuous training, adaptability and open-mindedness, commitment.
The purpose of the assessment is to ensure quality control, but also to provide a form of coaching that contributes to the prosecutor’s development and to anticipate difficulties or a possible negative mention.
Assessment also plays an essential role in consideration for a subsequent appointment or designation.
Competent authorities:
The assessment is carried out by an absolute majority of votes cast by the head of division and two prosecutors appointed by the general assembly or by the division assembly.
The assessment of the heads of divisions is carried out by the competent chamber of the assessment board, which is made up of two heads of divisions from the public prosecutor's office, two magistrates who are members of the Opinion and Investigation Commission of the High Council of the Judiciary, a magistrate of the Court of Audit and a human resources management specialist (see articles 259novies et seq. of the Judicial Code).

Q120-1 (General Comment): The first assessment takes place one year after the judge/prosecutor starts work. Assessments are then carried out every 3 years.

Bulgaria

Q066 (General Comment): Supreme Judicial Council: According to the answers of SJC the competent bodies in these matters are:
The Inspectorate to the SJC:
- checks the organization of the initiation and movement of judicial, prosecutorial and investigative cases, as well as the closing of cases within the established terms and in case of violations, signals the administrative head of the relevant body of the judiciary and the relevant College of the Supreme Judicial Council
- sends signals, proposals and reports to other state bodies, including the competent bodies of the judiciary;
- examines applications against violation of the right to examine and resolve cases within reasonable time.
The Judges' College of the SJC:
- annually analyses and reports the degree of workload of the bodies of the judiciary;
- requests and summarizes every 6 months information from the courts about their activity;
- resolves questions about the organization of the activity of the relevant system of judicial authorities;
- adopts rules for the allocation of cases between the judges who consider cases allocated according to Art. 9, para. 3, in order to equalize their total workload;
- determines the number of judicial officers according to the degree of workload on the proposal of or after agreement with the administrative heads of the bodies of the judiciary, and may open new and lays off positions.
The Plenary of the SJC:
- on the proposal of one of the Colleges, after coordination with the administrative heads of the bodies of the judiciary, determines the number of judges, prosecutors and investigators in all courts, prosecutor's offices and investigative departments according to the degree of workload;
- hears and accepts the annual reports of the bodies of the judiciary under Art. 84, item 16 of the Constitution.
.....
According to the answers of The Prosecutor's office of the Republic of Bulgaria:
The legal regulation is in Art. 84, item 16 of the Constitution of the Republic of Bulgaria, according to which the Parliament hears and accepts the annual report of the Prosecutor General submitted by the SJC and Art. 30, para. 2, item 4 of the Judicial System Act, according to which the Plenum of the SJC hears and accepts this annual report.
Approved by the Prosecutor General/ chief prosecutor is the Directive on the control activity of the Prosecutor's Office, aimed at ensuring the exact and uniform application of the laws in the performance of the functional duties of the prosecutors and investigators. The Directive regulates the conditions, order and procedures for carrying out control activities through audits, checks and analyzes of the work of the prosecutor's offices, the National Investigation Service, as well as individual prosecutors and investigators, outside of the institutional and official verification of the legality of their acts.

Q066 (2024): The Inspectorate with the Supreme Judicial Council:
- checks the organization of the initiation and movement of judicial, prosecutorial and investigative cases, as well as the closing of cases within the established terms and in case of violations, signals the administrative head of the relevant body of the judiciary and the relevant College of the Supreme Judicial Council
- sends signals, proposals and reports to other state bodies, including the competent bodies of the judiciary;
- examines applications against violation of the right to examine and resolve cases within reasonable time.
The Judges' and Prosecutors' College of the SJC:
- annually analyses and reports the degree of workload of the bodies of the judiciary;
- requests and summarizes every 6 months information from the courts and prosecutor's offices about their activity;
- resolves questions about the organization of the activity of the relevant system of judicial authorities;
- adopts rules for the allocation of cases between the judges, prosecutors and investigators who consider cases allocated according to Art. 9, para. 3, in order to equalize their total workload;
- determines the number of judicial officers according to the degree of workload on the proposal of or after agreement with the administrative heads of the bodies of the judiciary, and may open new and lays off positions.
The Plenum of the SJC:
- on the proposal of one of the Colleges, after coordination with the administrative heads of the bodies of the judiciary, determines the number of judges, prosecutors and investigators in all courts, prosecutor's offices and investigative departments according to the degree of workload;
- hears and accepts the annual reports of the bodies of the judiciary under Art. 84, item 16 of the Constitution.

Q066 (2021): Please see the General Comments

Q066 (2020): Judiciary system Act:
Article. 198 (1) The criteria for the appraisal of a judge, prosecutor or an investigating magistrate shall be:
1. legal knowledge and skills of applying it;
2. skill of analysing legally relevant facts;
3. skill of making optimum working arrangements;
4. efficiency and discipline;
5. compliance with the rules of ethical behaviour.
(2) In the course of the appraisal under Paragraph (1) the following indicators shall be taken into account:
1. keeping deadlines;
2. number of instruments upheld and reversed and the grounds for this;
3. the results of inspections carried out by the Inspectorate with the Supreme Judicial Council,
4. the overall caseload of the respective judicial district and judicial authority, as well as the workload of the appraised judge, prosecutor or investigating magistrate compared to other judges, prosecutors or investigating magistrates in the same judicial authority.
(4) The time served by the judge, prosecutor or investigating magistrate as a permanent trainer at the National Institute of Justice shall also be included in the appraisal period. The evaluation of the work performance as a trainer shall be given by the Managing Board.
(5) The time served by the judge, prosecutor or investigating magistrate as an European Delegated Prosecutor shall also be included in the appraisal period. The evaluation of the results of their work under Regulation (EU) 2017/1939 shall become part of their appraisal.
Article. 199. (1) A judge shall be appraised under the following specific criteria:
1. complying with the schedule for conduct of court hearings;
2. skill of conducting a court hearing and drawing up a record of proceedings;
3. administrating cases and appeals, preparing for a court hearing;
4. number of appealed judicial instruments from among the appealable judicial instruments, appealed judicial instruments upheld, judicial instruments reversed or invalidated, in whole or in part, and the grounds for it; the ability to reason and justify judicial instruments and to analyse evidence shall be subject to evaluation.
(2) A prosecutor shall be appraised under the following specific criteria:
1. skills of planning and structuring steps in pre-trial and trial proceedings;
2. complying with the written instructions and orders of the superior prosecutor;
3. ability to make working arrangements and direct the investigating authorities and the teams participating in pre-trial proceedings;
4.number of unappealed prosecutorial instruments, including warrants to terminate and suspend criminal proceedings, number of final judicial instruments rendered on instruments submitted by the prosecutor appraised, as well as the final judicial instruments returning cases for the rectification of procedural breaches, and the reasons for this, number of appeals granted, the prosecutorial instruments upheld, modified and reversed upon an instance and ex officio review, (3) An investigating

Q067 (2020): The Supreme Judicial Council, through its Commission for Attestation/Appraisal and Competitions at the Judges College/Chamber of the Supreme Judicial Council and the Commission for Attestation/Appraisal and Competitions at the Prosecutorial College/Chamber, are the bodies that perform an objective assessment of the professional, business and moral qualities of magistrates.

Q070 (2024): Pursuant to Art. 54 of the JSA The Inspectorate with the Supreme Judicial Council (ISJC) shall check the organization of administrative operation of the courts, prosecution offices and investigating authorities; check the arrangements made for the institution and progress of court, prosecutorial and investigative cases, as well as the disposal thereof within the established time limits; analyze and summarize the cases that have been closed by an effective judicial act, as well as the closed files and cases of prosecutors and investigators, by adopting a procedure for regular reporting and publishing of the results of the analysis and summarizing the closed cases; in the presence of conflicting case-law, the existence of which has been found in carrying out the activity under Art. 54 (1), item 3 of the JSA, it shall alert the competent authorities of the need to request the rendition of interpretative judgements or interpretative decrees; carry out integrity testing and examinations for conflict of interest of judges, prosecutors and investigators, verifications of the financial interests disclosure declarations, as well as checks for identifying actions damaging the prestige of the Judiciary and such related to impairment of the independence of judges, prosecutors and investigators; examine applications against an infringement of the right to have a case examined and disposed of within a reasonable time; draw up an annual programme for scheduled inspections and an annual report on the activity thereof, which it shall submit to the Plenum of the Supreme Judicial Council; adopt a template for reporting the completion of cases within the statutory time limits when carrying out its activity under Art. 54 (1), item 2 of the JSA after consultations with the Supreme Judicial Council; summarize annually the good and bad practices regarding the observance of the ethical rules in accordance with the relevant European and international standards in connection with the abovementioned checks and shall provide the information to the Colleges of the Supreme Judicial Council. The ISJC carries out its inspections based on an annual program for the respective calendar year (planned inspections), upon signals and upon self-referral. The ISJC prepares an annual report on its activities, which is presented to the plenum of the Supreme Judicial Council and is considered by the National Assembly of the Republic of Bulgaria.

Q070-1 (General Comment): .Other: The Inspectorate to the Supreme Judicial Council, pursuant to Art. 54 of the Judiciary System Act, examines the organization of the administrative duties of the courts, prosecutor's offices and investigative bodies; reviews the organization of the initiation and motions of court, prosecutor's and investigative proceedings, as well as the closure of cases within the established deadlines; analyzes and summarizes the cases that have been closed by a final court act, as well as the closed files and cases of prosecutors and investigators, adopting a procedure for regular reporting and publication of the results of the analysis and summary of the closed cases; in the event of contradictory judiciary practices, observed in the execution of work pursuant to Article 54(1)(3) of the Judiciary System Act, notifies the respective authorities to request the adoption of interpretative decisions or interpretative rulings; performs integrity and conflict of interest checks for judges, prosecutors and investigators on their property declarations, as well as on the detection of actions that violate the reputation of the judiciary and those related to the breach of the independence of judges, prosecutors and investigators; reviews applications against the hearing and settlement of cases within a reasonable timeline, prepares an annual programme for planned inspections and an annual report on its activities, submitted to the Plenum of the Supreme Judicial Council; adopts a model for reporting on the settlement of cases within the legal timeline in the performance of duties under Article 54, (1)(2) of the Judiciary System Act, in coordination with the Supreme Judicial Council; prepares annual summaries of good and bad practices in terms of compliance with the ethical rules in accordance with the relevant European and international standards in relation to the abovementioned checks and provides the information to the relevant Colleges of the Supreme Judicial Council.

Q070-1 (2024): Pursuant to Art. 54 of the JSA The Inspectorate with the Supreme Judicial Council (ISJC) shall check the organization of administrative operation of the courts, prosecution offices and investigating authorities; check the arrangements made for the institution and progress of court, prosecutorial and investigative cases, as well as the disposal thereof within the established time limits; analyze and summarize the cases that have been closed by an effective judicial act, as well as the closed files and cases of prosecutors and investigators, by adopting a procedure for regular reporting and publishing of the results of the analysis and summarizing the closed cases; in the presence of conflicting case-law, the existence of which has been found in carrying out the activity under Art. 54 (1), item 3 of the JSA, it shall alert the competent authorities of the need to request the rendition of interpretative judgements or interpretative decrees; carry out integrity testing and examinations for conflict of interest of judges, prosecutors and investigators, verifications of the financial interests disclosure declarations, as well as checks for identifying actions damaging the prestige of the Judiciary and such related to impairment of the independence of judges, prosecutors and investigators; examine applications against an infringement of the right to have a case examined and disposed of within a reasonable time; draw up an annual programme for scheduled inspections and an annual report on the activity thereof, which it shall submit to the Plenum of the Supreme Judicial Council; adopt a template for reporting the completion of cases within the statutory time limits when carrying out its activity under Art. 54 (1), item 2 of the JSA after consultations with the Supreme Judicial Council; summarize annually the good and bad practices regarding the observance of the ethical rules in accordance with the relevant European and international standards in connection with the abovementioned checks and shall provide the information to the Colleges of the Supreme Judicial Council. The ISJC carries out its inspections based on an annual program for the respective calendar year (planned inspections), upon signals and upon self-referral. The ISJC prepares an annual report on its activities, which is presented to the plenum of the Supreme Judicial Council and is considered by the National Assembly of the Republic of Bulgaria.

Q070-1 (2018): "Other": percentage of returned cases

Q071 (General Comment): The duration of the court proceedings initiated by the Prosecutor's Office of the Republic of Bulgaria is monitored, as in case of excessive delay there is a possibility to request acceleration of these proceedings through the procedure under Chapter 26 of the PPC.

Q072 (2024): The Inspectorate to the Supreme Judicial Council (ISJC):
One of the main powers of the Inspectorate to the Supreme Judicial Council (ISJC) is to "check the organization of the initiation and progress of court, prosecution, and investigation cases, as well as the completion of cases within the established time limits" (Article 54, paragraph 1, item 2 of the Judiciary System Act). In exercising this power, the ISJC monitors for delays in the course of the relevant proceedings, which is done within the framework of the inspections carried out on the judicial authorities (comprehensive planned/scheduled inspections or inspections based on reports/signals) or when conducting preliminary investigations into reports/signals from individuals or legal entities of violations in the handling of cases. This year, the ISJC is responding to the questionnaire for the first time, as it has not been sent to it before. In previous years, the SJC probably gave a negative answer to this question in view of its own powers, rather than those exercised by the ISJC, which is an independent body separate from the SJC.

Q083-3-1 (2023): NAP- There are no defined purposes.

Q083-3-1 (2022): But there is a quantitative evaluation of the work of a prosecutor which reflects in the individual assessment`- please see Q 120

Q120 (General Comment): Supreme Judicial Council: Criteria on which the assessment is based: the criteria are general (relevant to the activity of each judge, prosecutor, and investigator); specific (relevant only to the position held – judge, prosecutor, or investigator), and additional (relevant only to administrative heads and their deputies).
Authority competent to carry out the assessment: the assessment is accepted by the Prosecutor's College of the Supreme Judicial Council.
Purposes for which the evaluation results are used: when participating in a competition for promotion or transfer in position; when participating in a procedure for the selection of an administrative head; for appointment to the position of deputy of the administrative head; on promotion to a higher rank; on secondment; for participation in the composition of a Permanent Appraisals Commission to the Appellate Prosecutor's Offices; participation in a competition committee.
Prosecutor's Office of RB: Such a system exists. According to Art. 196 of the Judicial System Act the evaluation is carried out in advance, in order to acquire irreplaceability, periodic and extraordinary attestation of the magistrates, and the criteria for the same are defined in Art. 198 of the Judicial System Act: legal knowledge and skills; ability to analyze legally relevant facts; ability to optimally organize work; expediency and discipline; compliance with the rules of ethical conduct. Attestation also takes into account the following indicators: compliance with deadlines; number of confirmed and canceled acts and the reasons for this; the results of the inspections of the Inspectorate at the Supreme Judicial Council; the overall workload of the relevant judicial authority, as well as the workload of the assessed judge, prosecutor or investigator compared to other judges, prosecutors or investigators from the same judicial authority.

Q120-1 (General Comment): Quantitative evaluation of the work of the prosecutors is carried out by applying the Rules for measuring the workload of the prosecutor's offices and the individual workload of each prosecutor and investigator, adopted by the Prosecution College/collegium of the SJC. It is possible to display the data according to the indicators provided for in the Rules in real time, both for the prosecutor's office as a whole, as well as for individual prosecutor's offices and for each specific prosecutor.
Quantitative data on the workload are taken into account in the appraisal procedure of a specific prosecutor, in the course of which an assessment of his work is carried out, both in terms of quantitative indicators and also regarding the quality of the performed activity according to the results achieved.
Prosecutors are assessed in accordance with Ordinance No. 3 of February 23, 2017 of the Supreme Judicial Council on the indicators and Methodology for Assessment and the Criteria for Reporting the Workload Degree of Prosecutors and Investigators and of Administrative Heads and Their Deputies (promulgated SG No. 21 /10.03.2017).
Attestation is carried out:
1. in advance - for a three-year period from the appointment to the position of prosecutor or investigator - when participating in a competition or when being offered a promotion;
2. to acquire irreplaceability - upon completion of 5 years of experience as a prosecutor or investigator;
3. periodically - for a 5-year period from the attestation of irreplaceability of a prosecutor and investigator, of an administrative head and of a deputy administrative head;
4. extraordinary - in the cases under Art. 197, para. 5 of the Judicial System Act.
Junior prosecutors and junior investigators are not assessed in advance, and a report on their work is prepared by the mentor in the second year of their appointment.

Croatia

Q066 (General Comment): According to the Courts Act (Official Gazette, No. 28/13, 33/15, 82/15, 67/18), the president of the court evaluates the work of every judge according to Framework Criteria for the work of judges in the period of one year following the standards on the number of judgements delivered by a judge compared with the number of judgements that should have been delivered, according to the Framework Criteria for the work of judges, result of work in different kinds of cases, respecting deadlines in delivery of judgements and drafting of judgements, quality of judgements on the grounds of expressed remedies in legal actions and other activities of judges.
Framework criteria are adopted by the Minister of Justice on the proposal of the General Assembly of Supreme Court. The Criteria prescribe the number of decisions that need to be rendered every year by a judge.
According to the State Attorney Office Act (Official Gazette, No. 67/18), State Attorneys' and Deputy State Attorneys' performance is evaluated every three years according to the following criteria: achieved results in resolving cases (based on the number of cases assigned to work on the basis of the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county or municipal state attorney's offices for the previous three-year period), the quality of decisions and the justified use of legal remedies, proper performance of the state attorney's duty - observance of deadlines during the procedure, other activities of the State Attorney and the Deputy State Attorney, experience in performing the duty of state attorney and compliance of conduct with the Code of Ethics of State Attorneys and Deputy State Attorneys. The Framework criteria are adopted by the Minister in charge of judicial affairs, with the prior opinion of the Chief State Attorney of the Republic of Croatia.

Q066 (2024): According to the Courts Act (Official Gazette, No. 28/13, 33/15, 82/15, 67/18, 126/19, 130/20, 21/22, 60/22), the president of the court evaluates the work of every judge according to Framework Criteria for the work of judges in the period of one year following the standards on the number of judgements delivered by a judge compared with the number of judgements that should have been delivered, according to the Framework Criteria for the work of judges, result of work in different kinds of cases, respecting deadlines in delivery of judgements and drafting of judgements, quality of judgements on the grounds of expressed remedies in legal actions and other activities of judges.
Framework criteria are adopted by the Minister of Justice on the proposal of the General Assembly of Supreme Court. The Criteria prescribe the number of decisions that need to be rendered every year by a judge.
According to the State Attorney Office Act (Official Gazette, No. 67/18, 21/22), State Attorneys' and Deputy State Attorneys' performance is evaluated every three years according to the following criteria: achieved results in resolving cases (based on the number of cases assigned to work on the basis of the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county or municipal state attorney's offices for the previous three-year period), the quality of decisions and the justified use of legal remedies, proper performance of the state attorney's duty - observance of deadlines during the procedure, other activities of the State Attorney and the Deputy State Attorney, experience in performing the duty of state attorney and compliance of conduct with the Code of Ethics of State Attorneys and Deputy State Attorneys. The Framework criteria are adopted by the Minister in charge of judicial affairs, with the prior opinion of the Head State Attorney of the Republic of Croatia.

Q066 (2023): According to the Courts Act (Official Gazette, No. 28/13, 33/15, 82/15, 67/18, 126/19, 130/20, 21/22, 60/22), the president of the court evaluates the work of every judge according to Framework Criteria for the work of judges in the period of one year following the standards on the number of judgements delivered by a judge compared with the number of judgements that should have been delivered, according to the Framework Criteria for the work of judges, result of work in different kinds of cases, respecting deadlines in delivery of judgements and drafting of judgements, quality of judgements on the grounds of expressed remedies in legal actions and other activities of judges.
Framework criteria are adopted by the Minister of Justice on the proposal of the General Assembly of Supreme Court. The Criteria prescribe the number of decisions that need to be rendered every year by a judge.
According to the State Attorney Office Act (Official Gazette, No. 67/18, 21/22), State Attorneys' and Deputy State Attorneys' performance is evaluated every three years according to the following criteria: achieved results in resolving cases (based on the number of cases assigned to work on the basis of the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county or municipal state attorney's offices for the previous three-year period), the quality of decisions and the justified use of legal remedies, proper performance of the state attorney's duty - observance of deadlines during the procedure, other activities of the State Attorney and the Deputy State Attorney, experience in performing the duty of state attorney and compliance of conduct with the Code of Ethics of State Attorneys and Deputy State Attorneys. The Framework criteria are adopted by the Minister in charge of judicial affairs, with the prior opinion of the Chief State Attorney of the Republic of Croatia.

Q066 (2022): According to the Courts Act (Official Gazette, No. 28/13, 33/15, 82/15, 67/18, 126/19, 130/20, 21/22, 60/22), the president of the court evaluates the work of every judge according to Framework Criteria for the work of judges in the period of one year following the standards on the number of judgements delivered by a judge compared with the number of judgements that should have been delivered, according to the Framework Criteria for the work of judges, result of work in different kinds of cases, respecting deadlines in delivery of judgements and drafting of judgements, quality of judgements on the grounds of expressed remedies in legal actions and other activities of judges.
Framework criteria are adopted by the Minister of Justice with the prior opinion of the General Assembly of Supreme Court. The Criteria prescribe the number of decisions that need to be rendered every year by a judge.
According to the State Attorney Office Act (Official Gazette, No. 67/18, 21/22), State Attorneys' and Deputy State Attorneys' performance is evaluated every three years according to the following criteria: achieved results in resolving cases (based on the number of cases assigned to work on the basis of the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county or municipal state attorney's offices for the previous three-year period), the quality of decisions and the justified use of legal remedies, proper performance of the state attorney's duty - observance of deadlines during the procedure, other activities of the State Attorney and the Deputy State Attorney, experience in performing the duty of state attorney and compliance of conduct with the Code of Ethics of State Attorneys and Deputy State Attorneys. The Framework criteria are

Q066 (2018): According to the Courts Act (Official Gazette, number 28/13, 33/15, 82/15), the president of the court evaluates the work of every single judge according to Framework for the workload of judges in the period of one year following the standards on the number of judgements delivered by a judge compared with the number of judgements that should have been delivered, according to the Framework for the workload of judges, result of work in different kinds of cases, respecting deadlines in delivery of judgements and drafting of judgements, quality of judgements on the grounds of expressed remedies in legal actions and other activities of judges.
Framework criteria are adopted by the Minister of Justice on the proposal of the General Assembly of Supreme Court. The Criteria prescribe the number of decisions that need to be rendered every year by a judge.

Q066 (2017): According to the Courts Act (Official Gazette, No. 28/13, 33/15, 82/15), the president of the court evaluates the work of every single judge in his/her court for the previous year on the basis of the following standards: the number of judgements delivered by a judge compared with the number of judgements that should have been delivered, according to the Framework for the workload of judges, result of work in different kinds of cases in absolute numbers and percentages, respecting deadlines in delivery of judgements and drafting of judgements, quality of judgements on the grounds of expressed remedies in legal actions and other activities of judges.
Framework criteria are adopted by the Minister of Justice on the proposal of the General Assembly of Supreme Court. The Criteria prescribe the number of decisions that need to be rendered every year by a judge.

Q070 (2019): As regards "number of appeals", from 2019 we are able to get this data from our case management system.

Q083 (2020): According to the Courts Act (Official Gazette No. 28/13, 33/15, 82/15, 67/18) , the Minister in charge for Justice, upon the proposal of the General Assembley of the Supreme Court of the Republic of Croatia, adopts the Framework criteria for the work of judges.
Q083-1 (General Comment): According to the Courts Act, the Minister of Justice, upon the proposal of the General Session of the Supreme Court of the Republic of Croatia, adopts the Framework criteria for the workload of judges.

Q083-1-1 (2024): According to the Courts Act (Official Gazette No. 28/13, 33/15, 82/15, 67/18, 126/19, 130/20, 21/22, 60/22) , the president of the court where a judge performs judicial duties issues a decision each calendar year assessing whether the judge has fulfilled their duties based on prescribed criteria. If it is determined that the judge, without justified reason, did not meet the required number of decisions or performed duties improperly, disciplinary proceedings must be initiated in accordance with the State Judicial Council Act.
Disciplinary action against a court president is initiated by the president of the higher court. Sanctions for disciplinary offences may include a rebuke, salary reduction (up to one third for up to 12 months), or dismissal.
If justified reasons exist for underperformance, they must be explained and the decision forwarded to the higher court. Judges may object to such a decision within three days; the court president must respond within eight days. If the objection is rejected, the judge may appeal to the higher court, whose decision is final and not subject to further legal remedies.

Q083-1-1 (2023): According to the Courts Act (Official Gazette No. 28/13, 33/15, 82/15, 67/18, 126/19, 130/20, 21/22, 60/22) the president of the court in which the judge performs judicial duty determines by decision for the previous calendar year whether the judge has fulfilled his duties as a judge according to the prescribed criteria. If the president of the court determines that the judge, without justifiable reason, did not make the number of decisions determined by the Framework Criteria for the work of judges in a one-year period or that he performed his judicial duties improperly, he is obliged to initiate disciplinary proceedings against such a judge, in accordance with the State Judicial Council Act. Disciplinary proceedings against the president of the court are initiated by the president of the immediately higher court. According to the State Judicial Council Act (Official Gazette No. 116/10, 57/11, 130/11, 13/13, 28/13, 82/15, 67/18, 126/19, 80/22) disciplinary penalties may be imposed for committed disciplinary offences: rebuke, a fine of up to one third of the salary earned in the previous month in a period of one to three months, a fine of up to one third of the salary earned in the previous month in a period of four to six months, a fine of up to one third of the salary earned in the previous month in a period of seven to twelve months or dismissal from duty. If the president of the court determines that, due to justified reasons, the judge did not make the number of decisions determined by the Framework Criteria for the work of judges in a one-year period, he is obliged to state in the explanation of the decision what justified reasons are in question and submit the decision immediately to the president of the higher court. Against the decision of the president of the court, which determines whether the judge has fulfilled his duties as a judge, the judge can submit an objection to the president of the court within three days of receiving the decision. The president of the court is obliged to decide on the objection within eight days. The president of the court can reject the complaint or accept it and make a new decision. If the objection is rejected, the judge has the right to appeal to the president of the immediately higher court within eight days from the delivery of the decision on the objection. The president of the immediately higher court can make a decision confirming the decision of the president of the court or accept the appeal and make a new decision. Against this decision, the judge has no right to declare legal remedies.

Q083-1-1 (2022): According to the Courts Act (Official Gazette No. 28/13, 33/15, 82/15, 67/18, 126/19, 130/20, 21/22, 60/22) the president of the court in which the judge performs judicial duty determines by decision for the previous calendar year whether the judge has fulfilled his duties as a judge according to the prescribed criteria. If the president of the court determines that the judge, without justifiable reason, did not make the number of decisions determined by the Framework Criteria for the work of judges in a one-year period or that he performed his judicial duties improperly, he is obliged to initiate disciplinary proceedings against such a judge, in accordance with the State Judicial Council Act. Disciplinary proceedings against the president of the court are initiated by the president of the immediately higher court. According to the State Judicial Council Act (Official Gazette No. 116/10, 57/11, 130/11, 13/13, 28/13, 82/15, 67/18, 126/19, 80/22) disciplinary penalties may be imposed for committed disciplinary offences: rebuke, a fine of up to one third of the salary earned in the previous month in a period of one to three months, a fine of up to one third of the salary earned in the previous month in a period of four to six months, a fine of up to one third of the salary earned in the previous month in a period of seven to twelve months or dismissal from duty. If the president of the court determines that, due to justified reasons, the judge did not make the number of decisions determined by the Framework Criteria for the work of judges in a one-year period, he is obliged to state in the explanation of the decision what justified reasons are in question and submit the decision immediately to the president of the higher court.
Against the decision of the president of the court, which determines whether the judge has fulfilled his duties as a judge, the judge can submit an objection to the president of the court within three days of receiving the decision.
The president of the court is obliged to decide on the objection within eight days. The president of the court can reject the complaint or accept it and make a new decision.
If the objection is rejected, the judge has the right to appeal to the president of the immediately higher court within eight days from the delivery of the decision on the objection. The president of the immediately higher court can make a decision confirming the decision of the president of the court or accept the appeal and make a new decision. Against this decision, the judge has no right to declare legal remedies.

Q083-3 (2022): According to the State Attorney Office Act (Official Gazette No. 67/18, 21/22) , the Minister in charge for Justice, with the prior opinion of Prosecutor General, adopts the Framework criteria for the work of public prosecutors (Deputy State Attorneys).
Q083-3 (2020): According to the State Attorney Office Act (Official Gazette No. 67/18) , the Minister in charge for Justice, upon the proposal of Prosecutor General, adopts the Framework criteria for the work of public prosecutors (Deputy State Attorneys).

Q083-3 (2018): According to the State Attorney's Act, the Minister of Justice, upon the proposal of Prosecutor General, adopts the Framework criteria for the work of public prosecutors.
Q083-3-1 (2024): According to the State Attorney Council Act (Official Gazette No. 67/18, 126/19, 80/22) if the number of resolved cases and actions taken in a one-year period is, without justifiable reason, less than 80% of the average of the state attorney's office in which he holds office, Deputy state attorney is disciplinary liable for disciplinary offence of irregular performance of duty.

Q083-3-1 (2023): According to the State Attorney Council Act (Official Gazette No. 67/18, 126/19, 80/22) if the number of resolved cases and actions taken in a one-year period is, without justifiable reason, less than 80% of the average of the state attorney's office in which he holds office, Deputy state attorney is disciplinary liable for disciplinary offence of irregular performance of duty.

Q083-3-1 (2022): According to the State Attorney Council Act (Official Gazette No. 67/18, 126/19, 80/22) if the number of resolved cases and actions taken in a one-year period is, without justifiable reason, less than 80% of the average of the state attorney's office in which he holds office, Deputy state attorney is disciplinary liable for disciplinary offence of irregular performance of duty.

Q120 (2024): State attorneys and deputy state attorneys are evaluated according to the following criteria:
1. achieved results in resolving cases based on the number of cases assigned to work based on the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county and municipal state attorneys' offices for the previous three-year period
2. quality of decisions and justified use of legal remedies
3. proper performance of state attorney duties - compliance with deadlines during the procedure
4. other activities of the state attorney and deputy state attorney
5. experience in performing state attorney duties
6. compliance with the Code of Ethics for State Attorneys and Deputy State Attorneys.

According to the above criteria, the state attorney and deputy state attorney can achieve a maximum of 150 points, whereby a maximum of 60 points can be achieved for the criteria stated in points 1 and 2, a maximum of 10 points for the criteria stated in points 3 and 4, and a maximum of five points for the criteria stated in points 5 and 6.
The grades for the performance of the duties of the State Attorney and Deputy State Attorney are:
1. excellent performance of the duties: 130 - 150 points
2. very successful performance of the duties: 110 - 129 points
3. successful performance of the duties: 90 - 109 points
4. satisfactory performance of the duties: 70 - 89 points
5. unsatisfactory performance of the duties: less than 70 points.

The Deputy State Attorney is evaluated by the State Attorney, and the State Attorney is evaluated by the immediately superior State Attorney.
The assessment must be reasoned. The state attorney and deputy state attorney who disagrees with the assessment have the right to file a complaint with the State Attorney Council.
The assessment of the performance of the duties of a state attorney is taken into account in the procedures for the promotion and permanent transfer of deputy state attorneys and in the procedure for the appointment of state attorneys.
To be appointed to the position of Deputy State Attorney in a higher state attorney's office, the Deputy State Attorney must be assessed at least with the grade "successfully performs his duties" in the last evaluation before appointment.

Q120 (2023): According to the State Attorney Office Act (Official Gazette, No. 67/18, 21/22), State Attorneys' and Deputy State Attorneys' performance is evaluated every three years according to the following criteria: achieved results in resolving cases (based on the number of cases assigned to work on the basis of the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county or municipal state attorney's offices for the previous three-year period), the quality of decisions and the justified use of legal remedies, proper performance of the state attorney's duty - observance of deadlines during the procedure, other activities of the State Attorney and the Deputy State Attorney, experience in performing the duty of state attorney and compliance of conduct with the Code of Ethics of State Attorneys and Deputy State Attorneys. The Framework criteria are adopted by the Minister in charge of judicial affairs, with the prior opinion of the Chief State Attorney of the Republic of Croatia.

Q120 (2022): According to the State Attorney Office Act (Official Gazette, No. 67/18, 21/22), State Attorneys' and Deputy State Attorneys' performance is evaluated every three years according to the following criteria: achieved results in resolving cases (based on the number of cases assigned to work on the basis of the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county or municipal state attorney's offices for the previous three-year period), the quality of decisions and the justified use of legal remedies, proper performance of the state attorney's duty - observance of deadlines during the procedure, other activities of the State Attorney and the Deputy State Attorney, experience in performing the duty of state attorney and compliance of conduct with the Code of Ethics of State Attorneys and Deputy State Attorneys. The Framework criteria are adopted by the Minister in charge of judicial affairs, with the prior opinion of the Chief State Attorney of the Republic of Croatia.

Q120-1 (2024): The State Attorney and the Deputy State Attorney are evaluated every three years. If the Deputy State Attorney is a candidate in the procedure for appointment to a senior State Attorney's office or for State Attorney, the State Attorney will evaluate him/her on the basis of his/her previous work, even if three years have not passed since the date of appointment. This evaluation serves only for the purposes of the specific appointment procedure.

Cyprus

Q066 (General Comment): Quality standards are applied in practice

Q066 (2024): Quality standards are applied in practice

Q066 (2017): Quality standards are applied in practice

Q066 (2016): There are no written standards but in practice there are quality stantards.

Q066 (2015): In practice there are quality stantards

Q066 (2014): In practice there are quality stantards

Q070 (2023): the costs of the judicial procedings and the appeal ratio are now being monitored

Q120-1 (2021): the assessment is carried out by the AG the Deputy AG and the head of Department as part of their annual evaluation

Czech Republic

Q083 (General Comment): Quantitative performance targets exist but they are not strictly binding. The Ministry of Justice in the Czech Republic uses "measures" (měřítka) as the sole numerical indicators for allocating judge and support staff positions across courts on an annual basis. Functioning similarly to case weights, these measures represent the notional number of cases that a judge or support staff member should handle in a year on a full-time basis; for example, in 2024, each district court judge is expected to manage 352 civil cases or 230 criminal cases annually. The measures are updated or confirmed each year by the systemisation commission, an informal body of representatives from regional, superior, and supreme court management, along with the Ministry of Justice. They are published in documents that accompany the Minister of Justice's annual allocation decision.
Universal across courts of the same level, these measures and historical case data guide the Ministry in distributing judge and staff positions among superior, regional, and district courts. Regional court presidents have the flexibility to adjust these allocations based on local conditions or specific court needs, while staffing for the Supreme Court and Supreme Administrative Court is managed through direct arrangements between their respective presidents and the Minister of Justice.
To improve the accuracy of these allocations, the Ministry of Justice is undertaking a project, supported by the European Commission’s Technical Support Instrument, to gather empirical data on the labour intensity of various tasks performed by judges and support staff. This project aims to strengthen the factual basis for determining the measures.
Additionally, court presidents continuously monitor the performance of judges and support staff to ensure cases are processed within reasonable timeframes, upholding individuals' right to have cases heard promptly. However, the Ministry of Justice does not regulate or oversee this managerial and disciplinary authority, which is independently exercised by court management.

Q083 (2018): Quantitative performance targets exist but they are not strictly binding.

Q120 (2024): The Head of Public Prosecutor's Office monitors e.g. the number of appeals, the number of returnig cases etc.

Q120 (2023): The Head of Public Prosecutor's Office monitors e.g. the number of appeals, the number of returnig cases etc.

Q120 (2022): The Head of Public Prosecutor's Office monitors e.g. the number of appeals, the number of returnig cases etc.

Q120-1 (2018): The individual assessment of the public prosecutors' work take place at least once every two years.

Denmark

Q066 (2019): No, we use quantitative measures. Quality is usually measured as length of time to finalize a case.

Q066 (2016): No, we use quantitative measures. Quality is measured as length of time to finalize a case.

Q066 (2015): The only standards are objective standards for example acceptable timeframes to finalize a case.

Q067 (2019): As above

Q067 (2018): The public prosecution is not part of Danish Court Administration.

Q067 (2017): Because judges are independent, we do not interfere with a judge decision. However, there is always the possibility to appeal a court decision if either of the parties disagree with the verdict.
Q067 (2016): As above.

Q070 (2024): We collect data on the following, but we do not monitor the courts with this data. We share it with the courts for guidance or The Ministry of Justice, but we do not have mandate to regulate the courts based on this data. The Ministry of Justice do not have mandate to monitor and regulate the courts either. We monitor both "satisfaction of the court staff" and "appeal ratio". The reason for the change from previous years is not that it hasn't been monitored, but that there has been a different interpretation of the question previously in regards to the use of "monitor". We do collect the data however we cannot use the data to force action upon the courts.

Q070 (2023): We collect data on the following, but we do not monitor the courts with this data. We share it with the courts for guidance or The Ministry of Justice, but we do not have mandate to regulate the courts based on this data. The Ministry of Justice do not have mandate to monitor and regulate the courts either. We monitor both "satisfaction of the court staff" and "appeal ratio". The reason for the change from previous years is not that it hasn't been monitored, but that there has been a different interpretation of the question previously in regards to the use of "monitor". We do collect the data however we cannot use the data to force action upon the courts.

Q070 (2021): Danish Court Admininistration is typically not doing this. A responsible court follow their cases though.

Q070 (2020): We value independence high. Therefore Danish Court Administration does not evaluate the performance or productivity of individual judges. We follow overall productivity and case flow though as that is used to allocate ressources and to find the court most in need of vacant judge positions.
Q070 (2019): Courts are followed yearly in a yearly report. District courts receives monthly a report about case flow, pending cases, backlogs, weighted cases and the time it takes to finalize cases.
Q070 (2017): In Denmark we have a management system which information is updated monthly for the district courts where the points above are shown. For the High Courts and the Supreme Court, the case flow is not followed so often and in a so detailed way, but there are also much fewer cases. "Other": activity in terms of weighted cases and also pending cases

Q070 (2016): The so called "weighted cases" are measured in order to have a measure for the activity.

Q070-1 (2024): Length of procedure: If what is meant is how long from charge to indictment, then that is something we measure and it is not a new procedure.
Cost of judicial procedure: We have changed the answer compared to the previous evaluation cycle. Clearance rate: We monitor both the number of pending charges without indictment and pending charges without decision and can thereby calculate the difference and have been able to do so not just this year, so this is not a new procedure either.

Q070-1 (2023): Length of procedure: If what is meant is how long from charge to indictment, then that is something we measure and it is not a new procedure.
Cost of judicial procedure: We have changed the answer compared to the previous evaluation cycle. Clearance rate: We monitor both the number of pending charges without indictment and pending charges without decision and can thereby calculate the difference and have been able to do so not just this year, so this is not a new procedure either.

Q070-1 (2022): - The prosecution makes monthly reports to the Ministry of Justice on data regarding number of cases, clearance rate, etc.
- Disposition time is measured indirectly through a report that measures all steps in a criminal case from arrest to imprisonment. There
is no direct measure of disposition time, but it can be read from this report.
- The prosecution makes an biannual survey on the satisfaction of the prosecution staff.

Q070-1 (2021): The prosecution makes quarterly reports to the Ministry of Justice on data regarding number of cases, percentage of conviction etc.
Disposition time is measured indirectly through a report that measures all steps in a criminal case from arrest to imprisonment. There is no direct measure of disposition time, but it can be read from this report. The prosecution makes a biannual survey on the satisfaction of the prosecution staff.

Q070-1 (2020): The methodology of replying changed in this question.
The prosecution makes quarterly reports to the Ministry of Justice on data regarding number of cases, clearance rate, etc. Disposition time is measured indirectly through a report that measures all steps in a criminal case from arrest to imprisonment. There is no direct measure of disposition time, but it can be read from this report. Therefore we find it more correct to check this option. Satisfaction of the prosecution staff has always been measured but not by the ministry of justice. Therefore it was not checked last time. However, it is measured, and we therefore find it correct to check this option. The prosecution makes an annual survey on the satisfaction of the prosecution staff.

Q071 (2024): We monitor all three options regarding pending cases and have been previously as well. The reason for the change is due to a new understanding of the question in regards to the use of the word "monitor". We now understand it as we collect the data, however we cannot force action upon the courts based on this data.

Q071 (2023): We monitor all three options regarding pending cases and have been previously as well. The reason for the change is due to a new understanding of the question in regards to the use of the word "monitor". We now understand it as we collect the data, however we cannot force action upon the courts based on this data.

Q071 (2021): Danish Court Admininistration is typically not doing this. A responsible court follow their cases though.

Q071 (2020): Danish Court Administration is not doing it as a general thing. If a specific court needs help, Danish Court Administration can work out list of pending cases and list them according to age to give the court a tool to locate cases that need attention.
Q072 (2024): We do collect data on the waiting time from the case is recieved in the system until the first court meeting and then until the case is finalized. But we do not use the data for monitoring the courts in regards to regulating the courts. The data is used for analysis among other things. The courts might individually keep track of the waiting time.

Q072 (2023): We do collect data on the waiting time from the case is recieved in the system until the first court meeting and then until the case is finalized. But we do not use the data for monitoring the courts in regards to regulating the courts. The data is used for analysis among other things. The courts might individually keep track of the waiting time.

Q072 (2021): Danish Court Admininistration is typically not doing this. A responsible court follow their cases though. The individual courts may work out list of pending cases or worning lists when to act on a case.
Q072 (2020): Danish Court Admininistration is typically not doing this. A responsible court follow their cases though.

Q072 (2018): We monitor the overall time from the courts receive a case until it is finalized, but not what happen in between. The same goes for the prosecution
Q083 (General Comment): Judges are independent. Therefore measuring is done focusing on case-flows and economic indicators without identifying the individual judge.
Q083 (2022): The judges are independent. Therefore measuring is done focusing on case-flows and economic indicators.

Q083 (2018): There are no such targets from the side of Danish Court administration, but quantitative performances are used to re-allocate ressources so the court in most need of ressources in case of a vacant judge position also gets the vacant position.
Q083-1 (General Comment): Judges are independent. Therefore measuring is done focusing on case-flows and economic indicators.
Q083-1 (2018): NA as per answer 083.

Q083-1-1 (2023): The Danish judges have absolute independance.

Q083-2 (General Comment): There is a productivity target for the prosecution as a whole, but not for each public prosecutor.

Q120 (General Comment): Prosecutors are continuously evaluated by their immediate manager, i.a. at the annual employee development interviews, where the manager evaluates the employee's performance in the current position as well as the employee's development goals for the coming year.
In the first 6 months of employment prosecutors have a targeted onboarding program. This also includes feedback and evaluation of the individual prosecutor.
Furthermore prosecutors go through targeted basic training in the first three years of employment, which ends with an exam and assessment. They are also assigned a mentor, who is a professional sparring partner for the prosecutor and provides professional feedback on the prosecutor's performance and legal work.

Q120 (2024): The evaluation takes place continuously during the basic training and rotation period but is conducted for all prosecutors, including in connection with performance appraisals (MUS interviews), one-on-one meetings, and similar sessions.The topics may include the following: well-being, motivation, efficiency in task execution, holistic perspective etc.

Q120 (2023): Prosecutors are continuously evaluated by their immediate manager, i.a. at the annual employee development interviews, where the manager evaluates the employee's performance in the current position as well as the employee's development goals for the coming year.
In the first 6 months of employment prosecutors have a targeted onboarding program. This also includes feedback and evaluation of the individual prosecutor. Furthermore prosecutors go through targeted basic training in the first three years of employment, which ends with an exam and assessment. They are also assigned a mentor, who is a professional sparring partner for the prosecutor and provides professional feedback on the prosecutor's performance and legal work.

Q120 (2020): Public prosecutors go through intensive education for the first three years of them being recruited and this evaluation is structured centrally with HR at the Attorney Generals office. During that period they are individually being assessed through exams and through working with mentors. Thus they are continuously being assessed both centrally through exams as well as locally through the daily work that the mentor sees. Later in the career the assessment is not structured in such a way but all through their career the prosecutors are evaluated through their daily work and how they perform in court.

Q120-1 (General Comment): Prosecutors are continuously evaluated by their immediate manager, i.a. at the annual employee development interviews, where the manager evaluates the employee's performance in the current position as well as the employee's development goals for the coming year.
In the first 6 months of employment prosecutors have a targeted onboarding program. This also includes feedback and evaluation of the individual prosecutor.
Furthermore prosecutors go through targeted basic training in the first three years of employment, which ends with an exam and assessment. They are also assigned a mentor, who is a professional sparring partner for the prosecutor and provides professional feedback on the prosecutor's performance and legal work.

Q120-1 (2024): The evaluation takes place continuously during the basic training and rotation period but is conducted for all prosecutors, including in connection with performance appraisals (MUS interviews), one-on-one meetings, and similar sessions.The topics may include the following: well-being, motivation, efficiency in task execution, holistic perspective etc.

Q120-1 (2021): More frequent during the first three years of their career. Less frequent after that.

Q120-1 (2020): See response to 120: More frequent during the first three years of their career. Less frequent after that.

Estonia

Q066 (General Comment): Estonia has developed a quality system consisting of 3 parts. The first part contains the quality standards (good practice) for the management of the court that describe activities related to the chairman of the court. The second part contains the quality standards for the administration of courts and is focused on the different roles of the parties involved in the administration of courts: directors, Ministry of Justice, Council for the Administration of Courts. The third part contains quality standards for the court proceedings and is addressed to all the judges. All of the three parts of the quality standards have been discussed and approved by the Council for Administration of Courts, respectively in 2012, 2013 and 2015.

Q070 (General Comment): The scope of the monitoring system is extended to the results of proceedings; the categories of cases; the number of decisions appealed and revoked, fully or partially. The waiting time and the 'age' of pending (not solved) cases are also monitored. It is worthy of mention that every year all the courts and the Ministry of Justice enter into an agreement according to which courts should aim to carry out structural changes and to make changes in case-flow management that will ultimately ensure efficient proceedings. The content of the agreement has changed since 2017. The goals are more general and the same for all the courts (except The Supreme Court).

Q070 (2023): There are no "other" in 2023. In general MoJ has not been regulary monitoring as it did before.

Q070 (2017): See previous general comments.

Q070 (2016): see general comments

Q072 (General Comment): There are reminders in the CMS after certain period.

Finland

Q066 (General Comment): There are no quality standards covering the whole judiciary in Finland. Instead there are several quality projects going on, for example the Quality Project of the Administrative Courts, which started in 2020 and concerns all administrative courts in Finland. The Rovaniemi Court of Appeal Quality Projects have produced quality benchmarks, which evaluate the quality of the adjudication in courts of law. Last assessment was conducted in 2020.
The speed and consistency of prosecutors' work are monitored through statistics and by their supervisors. Additionally, special quality work is carried out, which defines quality matters.

Q066 (2021): Prosecution Services' system quality improvement project is underway.

Q066 (2020): Prosecution Services' system quality improvement project is underway.

Q066 (2015): There is a Quality Project of the courts in the jurisdiction of the Court of Appeal of Rovaniemi. (The jurisdiction of the Court of Appeal of Rovaniemi is the northernmost of the six appellate jurisdictions in Finland.) In 1999, the courts in the jurisdiction of the Court of Appeal of Rovaniemi launched a project for improvement of quality in adjudication. The quality project covers both civil cases and criminal cases. The objective of the quality project is to develop the functioning of the courts further and further so that the proceedings meet the criteria of a fair trial, that the decisions are well reasoned and justified, and that the services of the courts are affordable to the individual customers. The main working method consists of systematic discussions among the judges and also between the judges and stakeholders. The development work is steered by the development committee of the quality project. Normally four working groups for quality are set up for each year. The membership consists of judges from each of the District Courts in the appellate jurisdiction, members of the Court of Appeal, and referendaries of the Court of Appeal. Also prosecutors, private attorneys, public legal aid attorneys and heads of pre-trial investigation may serve as members in the working groups for quality. Each working group for quality is tasked to deal with one of the development themes which have been selected. The reports of the working groups are presented at the Quality Conference, they are discussed, and quality objectives based on the reports are set for the following year. The Report of Quality, containing the final reports, is published every year.

There is also a quality project of the courts in the jurisdiction of the Court of Appeal of Helsinki. Quality Project consists of working methods of two kind: cooperation with the University of Helsinki and working groups. Working groups for quality are set up for each year. The membership consists of judges from District Courts, members of the Court of Appeal, referendaries of the Court of Appeal, prosecutors and lawyers. Each working group for quality is tasked to address to one of the development themes which have been selected. The reports of the working groups are presented at the conference called 'Day of Jurisdiction'.

In addition there is a cooperation project between administrative courts. Some topics of the project have related to the quality standards. The reports of the project have discussed the matters like the factors of quality at administrative courts and the collection of information on quality.

It is also worth mentioning that on 15 October 2009, the presidents of Finnish Courts of Appeal proposed that the Finnish Association of Judges should begin work on drafting ethical guidelines for judges. A working group was set and the draft on ethical principles was discussed widely. The principles were formally released at the Judge Day event held in Helsinki on 12 October 2012.

Q067 (General Comment): Nationwide and departmental working groups formed for prosecutors evaluate and set quality standards.
Q067 (2023): Nationwide and departmental working groups formed for prosecutors evaluate and set quality standards.

Q070 (General Comment): All courts keep statistics of the mentioned court activities in the operational case management systems. The National Courts Administration can access these figures through a reporting system.

Q070 (2019): satisfaction of court staff is monitored with job satisfaction surveys which are taken every second year

Q070-1 (2021): "Backlogs": cases that have been pending for longer than a year are monitored

Q070-1 (2020): "Backlogs": cases that have been pending for longer than a year are monitored.

Q072 (2021): Within the courts, the time the case is pending in a court is monitored.
Prosecution services: The time between police investigation and prosecutor's decision (the time the case is pending in the prosecution service) is monitored.

Q072 (2020): Within the courts, the time the case is pending in a court is monitored.

Q072 (2018): Within the courts, the time the case is pending in a court is monitored.

Q083 (General Comment): A court can decide whether it sets quantitative performance targets for each judge. There are targets set for each judge in some courts.
Q083 (2016): It is up to each court to decide. In some courts there are targets set for each judge.

Q083-1 (General Comment): The National Courts Administration negotiates annually with each court in order to set targets and objectives for the court for the next year. An allocation of permanent staff and possible additional temporary judges or other staff is decided upon these negotiations but within the state budget. Timeframe (length of proceedings) targets are also set. Possible issues and problems with developing the activities of the court are also discussed. Finally, the appropriation to cover the annual costs of the court operations is agreed. A minutes of the negotiation is written and it includes the targets, objectives and estimated workloads for the court for the next year. The chief justices of the courts can then apply this results-based management system in their respective courts as they see appropriate.

Q083-1-1 (General Comment): See general comments to Q 83-1

Q083-3-1 (General Comment): Prosecutors have quantitave targets (management of the prosecutors service). There will not be disciplinary consequences for the prosecutor. The superior of the prosecutor and the prosecutor can discuss about the targets and the amount of pending cases.
Q083-3-1 (2023): Prosecutors have quantitave targets (management of the prosecutors service). There will not be disciplinary consequences for the prosecutor. The superior of the prosecutor and the prosecutor can discuss about the targets and the amount of pending cases.

France

Q066 (General Comment): Concerning the civil and criminal justice:
Quality standards developed for public administration are used in the judicial system. The charter of the administrations thus sets the rules for the reception of litigants in all courts and can lead to certification. There are also local initiatives aimed at setting up a "quality system" based on certification by an external body, which consists in establishing procedures describing the reception process, the organisation of work and the management of a case.

As part of the rollout of the national "Public Services +" program (an interministerial program for the continuous improvement of public services aimed at offering users services that are closer, simpler, and more efficient), particular efforts are being made to monitor timelines for civil cases resolved in less than 12 months. This is part of a broader program that improves the quality of reception, information, and communication with litigants. The various SP+ commitments are subject to specific quality management processes, and their effects are partly assessed through annual satisfaction surveys conducted in the courts. Furthermore, good initiatives from the Ministry of Justice services and civil and criminal courts are cataloged and classified to be shared and replicated. Across the country, the creativity of staff members contributes to improving the quality of service provided to litigants. Because these best practices should benefit the largest number, they are now incorporated into a searchable database accessible to all agents. This allows field actors to find sources of inspiration and tools to develop new systems to improve our justice system. It also allows these same actors to share with everyone a best practice they have implemented. The tools necessary for their deployment are also made available, and reviews of certain practices have been conducted since 2024 to assess their implementation and impact on beneficiaries.
As regards administrative justice: following an experimental phase, the drafting of litigious decisions in direct style within the administrative courts was generalised, as of January 1, 2019, through a joint note from the President of the Litigation Section and the President of the Administrative Courts Inspection Mission. In this regard, a vade-mecum on drafting decisions by the administrative courts was developed by a working group chaired by President Stirn and distributed.
The framework letters sent to each court by the General Secretariat of the Council of State reiterate the general objectives outlined in the documents accompanying the finance law regarding promptness and quality: target average judgment deadlines, proportion of cases older than 24 months (which should not exceed 8.5% of the overall caseload across all courts and 4.5% for administrative appeal courts), and the rate of annulment or modification of judgments by the courts or of decisions by the Council of state not exceeding 15%.

Q066 (2023): Following an experimental phase, the direct style of drafting of decisions in litigious matters rendered within the administrative court has been generalized, as of January 1, 2019, by a joint note from the president of the Litigation Section and the president of the Inspection Mission of the Administrative Courts. With this in mind, a vade-mecum on the drafting of decisions of the administrative court had been drawn up by a working group chaired by President Stirn and distributed.
The framework letters sent to each court by the General Secretariat of the Council of State recall the general objectives set out in the documents accompanying the Finance Act in terms of speed and quality: target average delivery time, proportion of cases of more than 24 months (must not exceed 8.5% of the overall backlog of all courts and 4.5% of the overall backlog for administrative courts of appeal) and rate of annulment-reversal of judgments of the tribunals by the courts or judgments of the courts by the judge of cassation not exceeding 15%.

Q066 (2022): Recently, at the initiative of the Minister of Justice, good practices from the different departments of the ministry of Justice and courts have been listed and classified so that they could be shared and replicated. Across the country, the creativity of staff is helping to improve the quality of service provided to litigants. Because these best practices should be of benefit to as many people as possible, they are now included in a search tool accessible to all staff. For those working in the field, the aim is to provide a source of inspiration and tools for developing new systems to improve the justice system. It is also a way for them to share the best practices they have implemented. The tools needed for their deployment are also made available to them.

Q066 (2021): Quality standards developed for public administration are used in the judicial system. The charter of the administrations thus sets the rules for the reception of litigants in all courts and can lead to certification. There are also local initiatives aimed at setting up a "quality system" based on certification by an external body, which consists in establishing procedures describing the reception process, the organisation of work and the management of a case.
Source DSJ

Q066 (2020): "If yes, please specify: Quality standards developed for public administration are used in the judicial system. The charter of the administrations thus sets the rules for the reception of litigants in all the courts and can lead to certification. There are also local initiatives aimed at setting up a "quality system" based on certification by an external body, which consist in establishing procedures describing the reception process, the organization of work and the management of a case.
With regard to administrative justice: the rate of annulment and reversal of jurisdictional decisions must be kept below 15% and the stock of cases older than two years below 7.5% of the total stock."

Q066 (2019):
Quality standards developed for public administration are used in the judicial system. The charter of administrations thus sets out the rules for the reception of litigants in all courts and may give rise to certification. There are also local initiatives to set up a "quality system" based on certification by an external body, which consists of establishing procedures describing the process of reception, work organisation and management of a case.
Administrative justice: the rate of annulment of court decisions must be kept below 15% and the number of cases pending for more than two years.

Q066 (2016): Quality standards developed for public administration are used in the judicial system. The charter of the administrations determines the rules for the reception of litigants in all courts and may give rise to certification. There are also local initiatives aimed at setting up a "quality system" based on certification by an external body, which consists in establishing procedures describing the process of reception, organisation of work and management of a case.

Q067 (General Comment): Concerning administrative justice:
There are no specialised personnel specifically responsible for implementing these quality standards, but there is a monitoring responsibility within the competence of the chamber presidents and heads of courts. Concerning civil and criminal justice: with regard to the quality standards of the Public Services + program, each court has a local contact responsible for deploying SP+ on the ground. The Department of Expertise and Modernization of the Ministry's General Secretariat is responsible for coordinating the network of local contacts.

Q067 (2023): Strictly speaking, there are no specialised staff responsible for the implementation of these quality standards, but a monitoring responsibility for the presidents of chambers and heads of courts.

Q067 (2021): Source DSJ

Q067 (2020): The answer is no for the administrative justice.

Q067 (2014): 2010: State prosecutors draw an annual report on the activity, management of their public prosecution office and on the enforcement of the law, as well as an annual report concerning the measures of custody and the condition of the custody facilities.

Q070 (2024): Administrative justice: source: Council of State
In the case of administrative courts, there is no monitoring of user satisfaction or the cost of judicial procedures.
- Activity monitoring indicators by subject matter, types of judgment formation (panel, summary proceedings, single judge, orders)
- Indicator for monitoring the number of cases resolved per judge and decision support
Social barometers were conducted in 2017, 2021, and 2023, based on a questionnaire addressed to staff and judges (working conditions, etc.).
The additional responses compared to the last CEPEJ campaign do not correspond to new developments.
Civil and criminal justice: source: DSJ
there is no monitoring of user satisfaction or the cost of judicial procedures.

Q070 (2023): Indicators for monitoring activity by matters, types of judicial formation (collegial, summary proceedings, single judge, orders)
Indicator for monitoring the number of cases resolved by a judge and decision-making support
* Social barometers were carried out in 2017, 2021 and 2023.
The additional answers compared to last year do not imply innovations

Q070 (2021): Source DSJ and Council of State

Q070 (2020): Judicial and administrative jurisdictions combined.

Q070 (2019): Civil and criminal justice: After the deployment of innovative applications, satisfaction questionnaires are sent to users in the courts (heads of courts, directors of registries, judges and registry officials) in order to improve change support actions and the implementation.
In addition, with regard to victims, the Ministry of Justice will conduct a satisfaction survey in the second half of 2019 among victims of criminal offences who resort to victim support associations. The results of this survey, similar to a previous survey conducted in 2011, could be published in 2020. Likewise, the Ministry of Justice is attentive to citizens' views on the way they are received in the courts. For several years now, surveys have been conducted on the reception in the courts by a service provider pretending being a litigant. In 2018, an online survey, coupled with a face-to-face survey, was conducted in seven 1st instance courts “tribunaux de grande instance” among litigants appearing in these courts. In 2019, the satisfaction survey will be carried out in all “tribunaux de grande instance” via an online survey accessible by internet address or QR code. Finally, a national survey is also under way on the reception of litigants in the courts in the specific context of the implementation of social centres within the “tribunaux de grande instance” and the integration within these courts of the three separate courts that previously dealt with these types of litigation. The survey, carried out among court staff, aims to assess the difficulties encountered by persons presenting themselves at the reception desk and to identify any corrections that could be included in the texts.
The reply to the question encompasses replies from administrative justice and civil and criminal justice.

Q070 (2018): The coverage rate of cases as well as the structure of civil or criminal litigation are used by the courts.
In addition, other indicators usefully complete the analysis: .
Share of decisions on the merits in completed cases (civil activity).
Share of referrals in completed cases (civil activity).
Theoretical time to sell off the stock.
Average age of the stock.
Percentage of cases over 12 months in stock (civil activity).

Q070 (2017): The number of cases referred is an indicator used only by administrative courts.
The courts have business applications to monitor their civil and criminal activities. At national level, data from these applications is
from these applications are collected automatically via infocentres, reprocessed and cross-referenced, then
in the form of tables or graphs. These reports can be generated on a monthly basis, except for certain activity data (court of appeal).
These reports can be generated on a monthly basis, except for certain activity data (criminal courts, juvenile court judges, enforcement of sentences), for which reports are generated annually.
These infocentres enable the courts to monitor statistics and manage their activity. They enable the central administration to
They enable the central administration to prepare management dialogues from a performance perspective.

Q070 (2016): The number of cases subject to referral is an indicator used only by administrative courts.
Courts have business applications to monitor their civil and criminal activities. At national level, data from these applications are collected automatically via info-centres, processed and cross-referenced, and then presented in the form of tables or graphs. These refunds can be generated monthly, except for certain activity data (assize court, juvenile judges, enforcement of sentences), for which the refunds are annual.
These info-centres enable courts to carry out a statistical follow-up and to monitor their activities. They allow the central administration to prepare management dialogues from a performance perspective.

Q070 (2015): The number of cases being referred is used only by administrative courts.
The rate of coverage of cases is used by judicial courts.
The state of stocks by age group is used by administrative courts.

Q070 (2014): 2013, 2014, the category "others" includes:
- the coverage rate of cases (used by judicial courts)
- the state of the stocks per age group (used bu administrative courts)
It should be noted that concerning the indicators mentioned in the question, the number of appealed cases is only used by administrative courts.

Q070-1 (2024): Civil and criminal courts: source: DSJ
There is no regular monitoring of the activities of public prosecutor services for the satisfaction of public prosecutor staff and for the costs of legal proceedings.

Q070-1 (2021): Source DSJ

Q070-1 (2020): Judicial jurisdiction.

Q071 (2021): Source DSJ and Council of State

Q071 (2020): No further indication.

Q071 (2016): In civil matters, courts of first instance (TGI), labour courts (conseils de prud'hommes) and courts of appeal can measure their stock on the basis of business applications or data returns carried out by info-centers.
The identification of cases not processed within a reasonable time is easier through business applications that offer dashboards breaking down cases in stock by age group.
In criminal matters, first instance courts (TGI) can use the Cassiopée business application to record cases in stock at the registry and the number of unedited judgments. The situation of cases in stock at the registry office cannot be measured via the info-centre, which only allows establishing the number of cases registered with the Public Prosecutor's Office and the Correctional Service.

Q072 (2024): Administrative justice : source: Council of state
The mechanism for monitoring waiting time during court proceedings exists only for administrative courts (source: Council of State). The Skipper software allows one to see the status of the case and whether an investigative measure is pending. However, it does not send an alert to the investigating judge.

Q072 (2021): Source DSJ, the reply concerns the civil and criminal justice.

Q072 (2020): Answer for the court.

Q083 (2024): For civil and criminal courts the reply is "No". For administrative courts the reply is "Yes".

Q083 (2022): The positive reply concerns administrative courts.

Q083 (2016): Individual quantitative objectives are established only with regard to administrative judges by the respective court president.

Q083-1 (2024): Civil and criminal courts, the reply is NAP. For administrative courts, it is the court president. No quantitative objective per judge is defined at the national level. The General Secretariat of the Council of State sets an overall objective per court, in consultation with the court president. Court presidents can set quantitative performance objectives per judge: number of cases per year, priority to the oldest cases.

Q083-1 (2023): No quantitative objective is defined per judge at the national level. For administrative courts, the General Secretariat of the Council of State, in consultation with the head of court, sets an overall objective for each court.
The heads of jurisdiction can set quantitative performance objectives per judge: number of cases per year, priority to the oldest cases.

Q083-1-1 (2023): The individual part of the administrative judges' function allowance (there is also a functional part that depends on the responsibilities, the level of experience and the constraints relating to the functions performed), which takes into account the results obtained and the way of serving, may be adjusted if the objectives, qualitative and in particular quantitative, are not met.
During the previous collection, all items had been checked. In reality, rather than disciplinary proceedings, proceedings for professional inadequacy would be initiated.
In civil and criminal justice, on the other hand, there are no defined targets.

Q083-2 (2021): source DSJ

Q120 (2022): The assessment of public prosecutors provided for by statutory ordinance No. 58-1270 of 22 December 1958 aims to determine the professional value of the magistrate. It must reflect his/her legal and technical professional skills, his/her level of commitment, assess his/her abilities to exercise a specific function and identify training needs within his/her career path. The assessment is made by the Attorney general at the Court of appeal or the public prosecutor at the High Court of appeal for prosecutors in their jurisdiction. Considered as a moment for exchange, this evaluation should highlight both the skills that were mobilized by the prosecutor and areas where improvement could be made. It contributes to better situate his/her activity within the service organization and operation while specifying the missions related to his/her duties by highlighting his/her professional potential.

For prosecutors, the evaluation offers a privileged opportunity to take stock of their activities, consider developments in their professional practice and regularly position themselves relative to their career goals. For evaluators it should enable them detect each individual's potential so as contribute towards efficient human resource management.

Q120 (2021): source DSJ

Q120-1 (2022): Article 12-1 of the ordinance of December 22, 1958 establishes the principle of evaluating the professional activity of each judge/prosecutor every two years. An evaluation must also be conducted when applying for promotion.

Q120-1 (2021): source DSJ

Q067 (2020): Due to judicial independence, there are no national level quality standards.

Q070 (General Comment): The Federal Statistical Office collects key figures on court performance (incoming cases, resolved cases, pending cases on the beginning and the end of a year) from the federal states. The Federal Statistical Office processes and publishes the data once per year for the civil, criminal, family, administrative, labour, social and financial courts.

Q070 (2024): All feredal states reported monitoring regarding number of incoming, resolved and pending cases as well as lenght of proceedings, number of appeals and disposition time.
2 federal states reported monitoring productivity of judges and court staff.

Q070 (2023): The monitoring activities no. 1-4 were selected by all respondent federal states and the activities no. 5 and 9-13 were selected by the majority of the federal states.
A minority of the federal states reported the following "other" monitoring activities: statistics on the nature of resolution (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.), number of main-trial days, participation of interpreters and experts.

Q070 (2022): The monitoring activities no. 1-4 were selected by all respondent federal statesa and the activities no. 5 and 9-13 were selcted by the majority of the federal states.
A minority of the federal states (as in previous years) reported the following "other" monitoring activities: statistics on the nature of resolution (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.), number of main-trial days, participation of interpreters and experts. (While the situation has not changed since the last cycle, the option "other" was not selected this time for the purpose of methodological consistency with the answers to other questions in this section).
One federal state has not yet replied.

Q070 (2021): The monitoring activities no. 1-4 were selected by all Länder, the activities no. 5 and 9-13 were selcted by most Länder and the activities under "other" were only mentioned by a some Länder (5).

Q070 (2020): The monitoring activities mentioned unter "other" were reported only by some of the Länder.

Q070 (2019): Some of the Länder did mention a monitoring system concerning other court activities such as statistics on the nature of resolution are kept (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.).

Q070 (2018): Some of the Länder did mention a monitoring system concerning other court activities such as statistics on the nature of resolution are kept (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.).

Q070 (2016): other: Some of the Länder did mention a monitoring system concerning other court activities such as statistics on the nature of resolution are kept (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.).

Q070 (2014): In 2014, some of the Landers did mention a monitoring system concerning other court activities, namely statistics on the nature of resolution (e.g. in civil matters cases are dealt with by contentious judgment/by acknowledgement/by settlement, etc.).

Q070-1 (General Comment): The Federal Statistical Office collects key figures on the public prosecution offices' performance (incoming cases, resolved cases, pending cases on the beginning and the end of a year) from the federal states and publishes the data once per year.

Q070-1 (2024): All feredal states reported monitoring regarding number of incoming, resolved and pending cases as well as lenght of proceedings and disposition time.
4 federal states reported monitornig costs of the judicial procedures and 2 reported monitoring productivity of prosecutors and prosecution staff.

Q070-1 (2023): The monitoring activities no. 1-4 were selected by all respondent federal states and the activities and 5 and 10 to 12 were selected by the majority of the federal states. A minority of the federal states also monitors the costs of the judicial proceedings

Q070-1 (2022): The monitoring activities no. 1-4 were selected by all respondent federal states and the activitiers and 5 and 10 to 12 were selected by the majority of the federal states. A minority of the federal states also monitors the costs of the judicial proceedings.
One federal state has not yet replied.

Q070-1 (2021): The monitoring activities no. 1-5 and 1-12 were selected by most Länder, the activity no. 9 (monitoring of costs) was selected by some (5) Länder.
Q070-1 (2020): A few Länder answered that they have also been monitoring productivity and costs.

Q071 (2024): The majority of the respondent federal states monitor pending cases and backlogs.

Q071 (2023): The majority of the respondent federal states monitor pending cases and backlogs.

Q071 (2022): The majority of the respondent federal states monitor pending cases and backlogs. Two federal states could not provide an answer, one federal state has not yet replied.
Q071 (2021): Four of the Länder could not provide an answer. The remaining Länder monitor pending cases and backlogs for all of the case categories mentioned above.
Q071 (2020): The majority, but not all of the Länder have reported to monitor pending cases and backlogs.

Q071 (2018): In 2018, Länder have monitored the number of pending cases and the backlogs.

Q072 (2024): One federal state monitors waiting time with respect to the ordinary courts. A minority of 2 federal states monitor waiting time with regard to the public prosecution services. The vast majority of the federal states does not monitor waiting time.

Q072 (2023): One federal state monitors waiting time with respect to the ordinary courts. A minority of 2 federal states monitor waiting time with regard to the public prosecution services. The vast majority of the federal states does not monitor waiting time.
Q072 (2022): One federal state monitors waiting time with respect to the ordinary courts. A minority of 3 federal states monitor waiting time with regard to the public prosecution services. The vast majority of the federal states does not monitor waiting time.

Q072 (2021): Courts: One of the Länder reported that waiting times are monitored with respect to ordinary courts.
Public Prosecution: While the majority of the Länder answered "no", a small minority of 3 Länder answered "yes".

Q083 (General Comment): There are no quantitative performance targets because this might interfere with judicial independence as defined by article 97 of the Basic Law for the Federal Republic of Germany ("Judges shall be independent and subject only to the law.").
Q083 (2024): Of the respondent federal states, all but one reported that there are no quantitative performance targets for judges.
Q083 (2023): Of the respondent federal states, all but one reported that there are no quantitative performance targets for judges.
Q083 (2022): Of the respondent 15 federal states, 14 reported that there are no quantitative performance targets for judges. One federal state has not yet replied.

Q083-1 (2024): One federal state reported, that quantitative performance targets can be defined based on the system used to determine staffing requirements of the judiciary.
Q083-1 (2023): One federal state reported, that quantitative performance targets can be defined based on the system used to determine staffing requirements of the judiciary.
Q083-1 (2020): There are no quantitative performance targets for each judge

Q083-1-1 (2024): One federal state selected "reflected in the individual assessment" and "warning by the court's president".

Q083-1-1 (2023): One federal state selected "reflected in the individual assessment" and "warning by the court's president".

Q083-2 (2024): Of the respondent federal states, all but one reported that there are no quantitative performance targets for public prosecutors.
Q083-2 (2023): Of the respondent federal states, all but one reported that there are no quantitative performance targets for public prosecutors
Q083-2 (2022): Out of 15 respondent federal states, 14 reported that there are no quantitative performane targets for public prosecutors. One federal state has not yet replied.
Q083-2 (2021): The vast majority of the Länder selected "no", 2 of the Länder answered "yes".

Q083-3 (2024): One federal state reported, that quantitative performance targets can be defined based on the system used to determine staffing requirements of the judiciary.
Q083-3 (2023): One federal state reported, that quantitative performance targets can be defined based on the system used to determine staffing requirements of the judiciary.
Q083-3 (2021): There are no quantitative performance targets for each public prosecutor. The 2 Länder that have quatitative performance targets answered, that the prosecutor General is responsible for setting these targets.

Q083-3 (2020): There are no quantitative performance targets for each public prosecutor

Q083-3-1 (2024): One federal state selected "reflected in the individual assessment" and "warning by head of prosecution".

Q083-3-1 (2023): One federal state selected "reflected in the individual assessment" and "warning by head of prosecution".

Q120 (2024): Of the respondent federal states, 13 reported that there is a quantitative evaluation of the public prosecutors' work and 14 reported that there is a qualitative evaluation.
The assessment is generally carried out by the direct superior and is based on different criteria such as specialised knowledge, expression, cooperation, leadership skills, negotiating skills, etc. The results are mostly used for decisions about promotions

Q120 (2023): Of the respondent federal states, 14 reported that there is a quantitative evaluation of the public prosecutors' work and 15 reported that there is a qualitative evaluation.
The assessment is generally carried out by the direct superior and is based on different criteria such as specialised knowledge, expression, cooperation, leadership skills, negotiating skills, etc. The results are mostly used for decisions about promotions.

Q120 (2022): Out of 15 respondent federal states, 12 reported that there is a quantitative evaluation of the public prosecutors' work and 12 reported that there is a qualitative evaluation (one federal state has not yet replied).
The assessment is generally carried out by the direct superior and is based on different criteria such as specialised knowledge, expression, cooperation, leadership skills, negotiating skills, etc. The results are mostly used for decisions about promotions.

Q120 (2021): The vast majority of the Länder answered "yes", 3 answered "no".

Q120-1 (2024): Assessment intervals vary among the federal states. Assments are generally more frequent at the beginning of the career (approx. every 6 to 9 months) and become less frequent over time (approx. every year to every 5 years). Additionally, occasion-related assessments may be performed in case of promotions or applications for new positions.

Q120-1 (2023): Assessment intervals vary among the federal states. Assments are generally more frequent at the beginning of the career (approx. every 6 to 9 months) and become less frequent over time (approx. every year to every 5 years). Additionally, occasion-related assessments may be performed in case of promotions or applications for new positions.

Greece

Q066 (General Comment): Law 4938/2022, article 102 par.4 subsection, includes among other evaluation elements the quality of the judges' work with the additional consideration of any successful appeal or cassation against their decisions. The inspector examines, among other things, the quality of their work, i.e. the processing of the legal and factual part of each case and takes into account the cassation or appeal of the decisions drawn up by the inspectors upon admission of the respective legal remedy during the inspected period as well as the wording of the judicial decisions. Article 104 refers to plenary of the Supreme Courts issuing directions in conjunction with Article 102 which refers to assessment criteria. From the combination of articles 104 and 102 and 100, 101, 102, 104 of Law 4938/22, the following innovations regarding the inspection system result: a) the drafting of an evaluation report on the operation of each court and prosecutor's office (not foreseen before) b) the drafting of an evaluation report of the directors, the courts and the prosecutor's offices (not foreseen before) c) the drafting of an evaluation report of the presidents and the presiding departments and judicial formations of each court and prosecutor's office d) for the inspection of the judges, they take into account the available statistical data.
The two-year term of the inspectors is expected to significantly upgrade the evaluation system, because it will provide the possibility of controlling the judicial work over a longer period of time, especially for the crowded judicial formations.
There is a system for inspecting the quantitative and qualitative performance of judicial officials (law 4938/2022) and decisions of the Administrative Plenary of the Council of State regarding the framework of instructions, practices and guidelines for the evaluation of the Council of State's Associate Councillors and Rapporteurs, as well as judges of the administrative courts. A Charter of Ethics for judges of the Council of State has also been approved. (Council of State).
With the 19/2023 decision of the Council of State in Plenary and the Council, a framework of guidelines, instructions and practices for the inspection of ordinary administrative courts, their directors and other judges was formulated on the basis of article 104 of the Code of the Organization of Courts (Law 4938/22). {General Commission of the State for ordinary administrative courts}.
Decision 7/23 of Areios Pagos in Plenary and the Council.

Q066 (2024): -With the 19/2023 decision of the Council of State in Plenary and the Council, a framework of guidelines, instructions and practices for the inspection of ordinary administrative courts, their head of administration and other judges was formulated on the basis of article 104 of the Code of the Organization of Courts (Law 4938/22).
-The Plenary Session of the Council of State has issued guidelines to the judges serving in it for the better drafting of decisions. Specifically, for the rapporteurs, it has provided concrete recommendations on how to write their reports. Moreover, the Plenary Session has approved a document analyzing the elements taken into account when evaluating the judges.

Q066 (2023): There is a system for inspecting the quantitative and qualitative performance of judicial officials (law 4938/2022) and decisions of the Administrative Plenary of the Council of State regarding the framework of instructions, practices and guidelines for the evaluation of the Council of State's Associate Councillors and Rapporteurs, as well as judges of the administrative courts. A Charter of Ethics for judges of the Council of State has also been approved. (Council of State).
With the 19/2023 decision of the Council of State in Plenary and the Council, a framework of guidelines, instructions and practices for the inspection of ordinary administrative courts, their directors and other judges was formulated on the basis of article 104 of the Code of the Organization of Courts (Law 4938/22). {General Commission of the State for ordinary administrative courts}.
Decision 7/23 of Areios Pagos in Plenary and the Council.
-Article 104 of the Code of the Organization of Courts (Law 4938/22).

Q066 (2022): According to Law 4938/2022 (art.104) of the organization of court and tribunals code.

Q066 (2021): Most of the measures taken recently in greece aim at speeding up administrative justice. However, the law provides a set of quality criteria that must be taken into account when inspectors check the performance of each judge.

Q066 (2017): Most of the measures taken recently in Greece aim at speeding up Justice. However the Law provides a set of quality criteria that must be taken into account when inspectors check the performance of each judge.

Q067 (2023): The Inspectors of the courts receive for the first time instructions from the Plenaries of the courts, specific directions for the operation of the courts and the evaluation of the supervisors, statistical data are used and specially reasoned reports are drawn up. The new way of evaluation has been systematized and good practices are reported.

Q067 (2021): It depends on the court, the answer was changed from yes to no although there are judicial services that have answered positively the majority have answered no.
Q067 (2017): The Law provides a set of quality criteria that must be taken into account when inspectors check the performance of each judge.
Q070 (General Comment): According to Law 4938/2022 (art. 99-104), supreme judges appointed as inspectors for two year’s term, redact every year general reports on the operation of each court and prosecutor's office in their district and recommend the necessary measures for the proper functioning of the service.
Q070 (2024): -Costs of the judicial procedures have not been chosen by the majority of the courts.
-Disposition time refers only to Administrative Courts.
-According to Law No 4938/2022 (OG A' 109/06.06.2022) “Code of Organization of Courts and Status of Judicial Officers and other provisions”, Justices of Supreme Court, appointed as inspectors for a period of two years, draw up an annual report on the work carried out by each court and prosecutor’s office, recommending the necessary measures that should be performed for the proper functioning of judicial bodies.
-According to Law 4938/2022 (art. 99-104), supreme judges appointed as inspectors for two year’s term, redact every year general reports on the operation of each court and prosecutor's office in their district and recommend the necessary measures for the proper functioning of the service.
Regarding the administrative courts, the General Commission of the State for ordinary administrative courts monitors and inspects the functioning of the administrative courts and assists their work (Articles 32-33 of Law 4938/2022). In the near future we hope to be able to use a business intelligence program through the upgraded Integrated Data Management System for the Administrative Justice, in order to extract composite statistical data without contacting any court.

Q070 (2023): According to Law 4938/2022 (art. 99-104), supreme judges appointed as inspectors for two year’s term, redact every year general reports on the operation of each court and prosecutor's office in their district and recommend the necessary measures for the proper functioning of the service. Regarding the administrative courts, the General Commission of the State for ordinary administrative courts monitors and inspects the functioning of the administrative courts and assists their work (Articles 32-33 of Law 4938/2022). In the near future we hope to be able to use a business intelligence program through the upgraded Integrated Data Management System for the Administrative Justice, in order to extract composite statistical data without contacting any court. [E-mail: g-epitropia-d-d@otenet.gr].

Q070 (2022): Many courts have chosen the option number of Appeals but not all. The Council of State has additionally selected the options number of Appeals and ratio of Appeals. The General Commission of the State for ordinary administrative courts has additionally selected the options number of Appeals and clearance rate.
According to Law 4938/2022 (art. 99-104), supreme judges appointed as inspectors for two year's term, redact every year general reports on the operation of each court and prosecutor's office in their district and recommend the necessary measures for the proper functioning of the service.
Regarding administrative courts, this task is fulfilled by the General Commission of the State for ordinary administrative courts. In the near future we hope to be able to use a business intelligence program, in order to extract composite statistical data without contacting any court.
[E-mail: g-epitropia-d-d@otenet.gr]

Q070 (2019): The Greek government has introduced a new system for organizing and evaluating the planning and implementation of public sector actions and projects, which introduces among others, monitoring court activities. (L. 4622/2019 art. 49 foll.)
Q070 (2017): Regarding Administrative Courts, this task is fulfilled by the General Commission of the State for ordinary administrative courts. In the near future there will be a possibility for the General Commission of the state to use a business intelligence program, in order to extract composite statistical data without contacting any court [E-mail: g-epitropia-d-d@otenet.gr]
Q070-1 (2024): The twelfth option has been chosen by some courts.
Q070-1 (2022): It is noted that the clearance rate was not selected by all prosecutors'offices, in addition several prosecutors' offices but not all have chosen the option of percentage of convictions and acquittals.
Q072 (General Comment): The waiting time during court procedures is monitored annually through the inspection process.The interval between the adjudication of the case and the issuance of the decision is watched, so that the judge does not have much pending and there is a quick delivery of justice.
Q072 (2024): The President of the Court and the Presidents of the Departments oversee the proceedings, and if it is observed that a case has been pending for an extended period, they issue recommendations to the judges to whom the case has been assigned(Council of State).
Q072 (2018): There is a monitoring system regarding the length of the judicial procedure, but it does not include such kind of information.
Q072 (2016): There is a monitoring system regarding the length of the judicial procedure, but it does not include such kind of information.
Q083 (General Comment): The Head of each court is responsible for the assignment of the cases between judges of his/her competence. In this sense, he/she is aware of the quantitative performance of judges. The assigned cases have to be dealt with by the judges within the period of 8 (eight) months according to Law 4983/2022 (art. 99-104) and Law 2717/1999 art. 194 par.1.
Each administrative court sets up an internal service regulation (Article 19 of Law 4938/2022) which specifies, among other things, the number of cases assigned to each judge per month or year, taking into consideration the special circumstances of each court, the number of serving judges and the seriousness of the cases(General Commission of the State for ordinary administrative courts).

Q083 (2023): Each administrative court sets up an internal service regulation (Article 19 of Law 4938/2022) which specifies, among other things, the number of cases assigned to each judge per month or year, taking into consideration the special circumstances of each court, the number of serving judges and the seriousness of the cases(General Commission of the State for ordinary administrative courts).
Q083 (2022): Every administrative judge is charged each year with a specific number of cases to carry out, stipulated by an internal Regulation, according to a model adopted by the General Commission of the State.
Q083 (2020): Every administrative judge is charged each year with a specific number of cases to carry out, stipulated by an internal Regulation.
Q083 (2018): Every judge is charged each year with a specific number of cases to carry out, stipulated by an internal Regulation.
Q083 (2016): Every judge is charged each year with a specific number of cases to carry out, stipulated by an internal Regulation.
Q083-1 (General Comment): Besides the heads of courts, there are also the plenary of the Supreme Courts.
Q083-1-1 (2024): "Other": Disciplinary punishment pronounced by the competent disciplinary body, that can reach the permanent termination.
Q083-2 (2022): There is, however, as far as possible an equal distribution of cases between them by the Head of the Service (Prosecution Service) and the obligation of the public prosecutor to process the cases assigned to him in the time frames provided for each case.
Q083-3 (2022): The answer chosen is in accordance with the answers of the majority of the prosecutors ' offices.

Q083-3-1 (2022): NAP:No targets are set

Q120 (General Comment): Annual inspection reports concerning prosecutors are prepared (Appeals Prosecutors or Deputy Prosecutors of the Supreme Court), and in the context of these reports, the judicial work of each prosecutor is evaluated and assessed as a whole, both in terms of the quality and legal correctness of the processing of the criminal files handled by each prosecutor, both in terms of their quantity in the inspected period of time, the legal and substantive correctness of provisions or acts issued by her/ him, her/his hard work, her/ his morals and her/his social representation. The purpose of the evaluation of prosecutors is to assess whether they should be promoted to the next level and to establish whether disciplinary offenses have been committed.
The criteria on which the evaluation is based, the authority responsible for the evaluation and the purposes for which the results of the evaluation are used are defined in the Code of the Organization of Courts and the Status of Judiciary (Law 4938/2022). Articles 93,100,101,102,103,104.

Q120 (2024): The criteria on which the evaluation is based, the authority responsible for the evaluation, and the purposes for which the results of the evaluation are used are defined in the Code of the Organization of Courts and the Status of the Judiciary (Law 4938/2022), specifically in Articles 93, 100, 101, 102, 103, and 104, with Articles 93, 100, and 102 as amended and currently in force.
Q120 (2023): The criteria on which the evaluation is based, who is the authority responsible for the evaluation and the purposes for which the results of the evaluation are used are defined in the Code of the Organization of Courts and the Status of Judiciary (Law 4938/2022). Articles 93,100,101,102,103,104.
Q120 (2022): The question was answered by the prosecutor's office of the Supreme Court.
Q120-1 (2022): The question was answered by the prosecutor's office of the Supreme Court.

Hungary
Q066 (General Comment): Second instance courts have to prepare a note on the decision and the trial procedure of the first instance court, based on professional criteria in every case. In this note, the court of appeal has to examine: the application of substantive, procedural and administrative regulations; the preparation of the hearings; the quality of the judges trial leading practice; if the coercive measures were well founded; if the hearings were set timely; if the ruling was transcribed in time; if the decision was edited correctly. The conclusions are summarized and judges of first instance courts are informed about them at least once a year.
Furthermore, the departments of the Supreme Court (Kúria) responsible for examining the judicial practice evaluates the practice of the courts and regularly inform judges about their experience.
Q066 (2024): The president of the panel of the regional courts and regional courts of appeal, in connection with the case reviewed by the panel, shall prepare a note on the decision and the trial of the first-instance court, based on professional criteria in every case. The judge or panel that proceeded in the case may access the note directly in the system.

Q070 (General Comment): Among others:
- individual judge’s statistics, - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- pending cases of an individual judge / court,
- the time frame of pending cases
- number of appealed cases,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2024): Other - statistics on the reasons to postpone trials - number of hearing days in cases - number of hearings per day - the subject of cases - the ratio of litigious and non-litigious cases - cases that are pending over 2 or 5 years have a separated statistical report every month - cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month
Q070 (2023): - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2022): - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2021): - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2020): - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2019): Other:
- statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2018): Other:
- statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2015): Among others:
- individual judge’s statistics,
- statistics on the reasons of the postpone of the trials,
- number of trial days in cases,
- number of tried cases per day,
- pending cases of an individual judge / court,
- the time frame of pending cases
- number of appealed cases,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2014): In 2013 and 2014, among other are quoted individual judge’s statistics, statistics on the reasons of postponing trials, the number of trial days, the number of tried cases per day, the number of pending cases of an individual judge/court, the time frame of pending cases, the number of appealed cases, the subject of incoming/resolved/pending cases, the ratio of litigious and non-litigious cases. Cases that are pending over 2 or 5 years have a separated statistical report every month, as well as cases in which there were no actions taken in the last 30 days by the court.

Q070-1 (2022): The public prosecution services are led in a hierarchical structure. Leaders perform their duties at a national and regional level, as well as at the level of each organizational unit. It is up to the decision of the leader who exercises the employer's rights to determine how the activities (performance, quality) of the prosecution office should be evaluated and on the basis of what indicators in order to manage the organizational unit effectively. The set of indicators may vary from year to year, depending on the circumstances. Therefore, more than one answer could be given to the given question.
For example, the performance of individual prosecutors or officers may be assessed at the level of an organizational unit; a staff satisfaction survey may be conducted; or a target analysis based on client satisfaction may be carried out.
The clearance rate could also be considered as a reference point and is actually monitored by the public prosecution services. However, statistics are produced at the level of the prosecution services and at the regional level on a calendar year basis. Therefore, those decisions on the termination of prosecution proceedings which are made at the end of a year, but become final only in the following year, can only be taken into account in the next year. The number of indictments and the number of finally closed cases that are closed because of finally closed court cases in the years after the indictment may also differ from the number of indictments on an annual basis. Therefore, the "clearance rate" – as a reference point – is a difficult criterion to follow.
At the national level, the Prosecutor General is required to present a report to Parliament. This report does not focus on the performance of individual public prosecutors; instead, it assesses the performance of the public prosecution service as a whole and according to a breakdown of organizational units. In our 2023 response, we tried to take this into account and, in this respect, we have indicated that primarily the indicators indicated were taken into account. Compared to our previous response in 2020, there was no change in terms of the fact that the clearance rate had been taken into account, even if it was not the primary evaluation criterion.

Q070-1 (2021): The BTM system (Criminal Justice Activity Indicator System) is available for the Prosecution Service of Hungary. This system requlary monitors prosecution activities (performance and quality), however, it does not contain any information about the number of incoming cases, length of proceedings, number of resolved cases, backlogs etc.

Q071 (General Comment): Judges have to report those cases on a monthly basis that are pending for more than 2 years. The president of the court can
order a fast-track procedure for a case based on the report.
Q071 (2018): Judges have to report those cases on a monthly basis that are pending for more than 2 years. The president of the court can order a fast-track procedure for a case based on the report.
Q072 (General Comment): The administrative office of the court reports those cases to the president in which there was no judicial activity in the last 30 days.
Q072 (2023): Judges: Two legal institutions are not taken into account in the length of the procedure:
Interruption of proceedings - Act CXXX of 2016 on the Code of Civil Procedure point 34.
Stay of proceedings - Act CXXX of 2016 on the Code of Civil Procedure point 35.
Prosecutors: The Prosecution Service takes into account the inactive period in court proceedings and has answered 'yes' to the question accordingly.
Q072 (2022): It was not possible to give an unambiguous answer to this question because of the reasons given in point 70-1. There are several possible "waiting times" in court proceedings which can be monitored. The length of proceedings can be and is monitored by the public prosecution services at the organizational, regional and local levels to different extents. As there was no substantive change in this respect, our reply is modified as follows, in line with the previous answer.
If the question refers to the judicial recess, the answer is "yes"; it is monitored by those who exercise the employer's rights, mainly for the purpose of granting a leave of absence.

Q072 (2018): The administrative office of the court reports those cases to the president in which there was no judicial activity in the last 30 days.

Q083 (2024): There is no specified number of cases to resolve for each judge, but according to the act on the Legal Status and Remuneration of Judges and the regulation governing the administration of courts, the number of hearing days is mandatorily specified.
Q083 (2023): There is no specified number of cases to resolve for each judge, but according to the act on the Legal Status and Remuneration of Judges and the regulation governing the administration of courts, the number of hearing days is mandatorily specified.
Q083-1-1 (2024): Without disciplinary procedure - Other: withdrawal of remote work
With disciplinary procedure - Other: discharge from executive office
Q083-1-1 (2023): According to the Act on the Legal Status and Remuneration of Judges -section 124 - disciplinary measures may be imposed against a judge for professional misconduct. Although it is theoretically possible for the above measures to be applied in the event of non-compliance with the quantitative requirement indicated in question 83, this does not occur in practice.

Q083-2 (2022): Quantitative performance targets have not yet been set. The public prosecution services were in the process of installing a new specialized IT system (IIDR), which was originally planned to affect internal prosecution statistics too. However, it has not been introduced. The planned system is currently under revision, so it is not possible to provide information on how and when it will be introduced and whether quantitative performance targets will be set.

Q083-2 (2021): For the time being, no performance targets are in place, but the development of such targets is in progress.

Q120 (2024): In accordance with Section 50 (1) of Act CLXIV of 2011 on the Status and Career Path of the Prosecutor General, Prosecutors and other Prosecution Employees, prosecutors, with the exception of the prosecutor general and the deputy prosecutor general, shall be assessed before the expiry of the fixed term of the first prosecution appointment (for the purpose of appointment for an indefinite period), while in the case of a first appointment for an indefinite term, before the expiry of a period of three years following the appointment, and thereafter every eight years, provided that they worked under the supervision of the assessor or his/her deputy for a minimum of one year during the assessment period. The assessment is the responsibility of the person exercising the employer's authority.
The purpose of assessment is to assess the quality of the prosecutor’s professional activities, to evaluate their skills, abilities and character traits with an impact thereon and to facilitate professional development. The assessment may only feature duly supported, factual findings.
Prosecutors do not need to be assessed during the six years preceding the completion of the applicable old-age pension age.
In addition to cases mentioned above, a prosecutor shall also be assessed if requested by the prosecutor, provided that two years have elapsed since the previous assessment, circumstances have emerged that indicate the prosecutor’s professional ineligibility or the necessity to alter the evaluation of the previous assessment.
In the event of an ineligible grade, upon the disclosure of the result of the assessment, the prosecutor shall be called upon to resign his/her office within thirty days. If despite the call the prosecutor does not resign his/her office, his/her prosecution service employment shall be terminated by exempting him/her from office. If a prosecutor on fixed-term service is assessed as ineligible before the expiry of the fixed term, the prosecutor's service relationship shall be terminated on the date of expiry of the fixed term.
In accordance with Sections 13/A-13/F of Instruction 4/2012. (I. 6.) of the Prosecutor General on specific questions regarding the status of employees of the Prosecution Service, a case file examination shall be carried out as a basis for the assessment which is due to follow with regard to prosecutors appointed to a prosecution office subordinated to the Office of the Prosecutor General prior to the time when the assessment is due. Such a case file examination shall not be carried out for senior head prosecutors. Case file examinations shall discover the examined prosecutor’s practice regarding the application of substantive and procedural law during at least a one-year period prior to the case file examination, or since the prosecutor’s latest assessment – or in absence of an assessment – since the time of his/her appointment. The case file examination and its evaluation shall be done by a prosecutor (hereinafter: examiner prosecutor) who works at the prosecution office directly superior to the prosecution office where the examined prosecutor is appointed to and who works in the same field of prosecutorial activity or expertise as the examined prosecutor. The examiner prosecutor shall be designated by the directly superior prosecution office, whereas at the Office of the Prosecutor General by the head of the structural unit that is competent regarding the examined prosecutor’s duties.
In the future, the workload calculation system may also be suitable for quantitatively measuring and monitoring the work of

prosecutors in the longer term, by performing calculations on an individual basis.

Q120 (2023): In accordance with Section 50 (1) of Act CLXIV of 2011 on the Status and Career Path of the Prosecutor General, Prosecutors and other Prosecution Employees, prosecutors, with the exception of the prosecutor general and the deputy prosecutor general, shall be assessed before the expiry of the fixed term of the first prosecution appointment, while in the case of a first appointment for an indefinite term, before the expiry of a period of three years following the appointment, and thereafter every eight years, provided that they worked under the supervision of the assessor or his/her deputy for a minimum of one year during the assessment period.
The purpose of assessment is to assess the quality of the prosecutor's professional activities, to evaluate their skills, abilities and character traits with an impact thereon and to facilitate professional development. The assessment may only feature duly supported, factual findings.
Prosecutors do not need to be assessed during the six years preceding the completion of the applicable old-age pension age.
In addition to cases mentioned above, a prosecutor shall also be assessed if requested by the prosecutor, provided that two years have elapsed since the previous assessment, circumstances have emerged that indicate the prosecutor's professional ineligibility or the necessity to alter the evaluation of the previous assessment.
In the event of an ineligible grade, upon the disclosure of the result of the assessment, the prosecutor shall be called upon to resign his/her office within thirty days. If despite the call the prosecutor does not resign his/her office, his/her prosecution service employment shall be terminated by exempting him/her from office. If a prosecutor on fixed-term service is assessed as ineligible before the expiry of the fixed term, the prosecutor's service relationship shall be terminated on the date of expiry of the fixed term.
In accordance with Sections 13/A-13/F of Instruction 4/2012. (I. 6.) of the Prosecutor General on specific questions regarding the status of employees of the Prosecution Service, a case file examination shall be carried out as a basis for the assessment which is due to follow with regard to prosecutors appointed to a prosecution office subordinated to the Office of the Prosecutor General prior to the time when the assessment is due. Such a case file examination shall not be carried out for senior head prosecutors. Case file examinations shall discover the examined prosecutor's practice regarding the application of substantive and procedural law during at least a one-year period prior to the case file examination, or since the prosecutor's latest assessment – or in absence of an assessment – since the time of his/her appointment. The case file examination and its evaluation shall be done by a prosecutor (hereinafter: examiner prosecutor) who works at the prosecution office directly superior to the prosecution office where the examined prosecutor is appointed to and who works in the same field of prosecutorial activity or expertise as the examined prosecutor. The examiner prosecutor shall be designated by the directly superior prosecution office, whereas at the Office of the Prosecutor General by the head of the structural unit that is competent regarding the examined prosecutor's duties.

Q120 (2022): The person exercising the employer's rights assesses a prosecutor's work every eight years. The purpose of assessment based on the examination of case files is to assess the quality of the prosecutor's professional activities, to evaluate his/her skills, abilities and character traits with an impact thereon and to facilitate professional development.
In accordance with Section 50 (1) of the Prosecution Employment Status Act, prosecutors, with the exception of the Prosecutor General and the Deputy Prosecutor General, shall be assessed before the expiry of the fixed term of the first prosecution appointment, while in the case of a first appointment for an indefinite term, before the expiry of a period of three years following the appointment, and thereafter every eight years, provided that they worked under the supervision of the assessor or his/her deputy for minimum one year during the assessment period. Prosecutors do not need to be assessed during the six years preceding the completion of the applicable old-age pension age. In addition to cases mentioned above, a prosecutor shall also be assessed if requested by the prosecutor, provided that two years have elapsed since the previous assessment, circumstances have emerged that indicate the prosecutor's professional ineligibility or the necessity to alter the evaluation of the previous assessment. The purpose of assessment is to assess the quality of the prosecutor's professional activities, to evaluate his/her skills, abilities and character traits with an impact thereon and to facilitate professional development. The assessment may only feature duly supported, factual findings.
In the event of an ineligible grade, upon the disclosure of the result of the assessment, the prosecutor shall be called upon to resign his/her office within thirty days. If despite the call the prosecutor does not resign his/her office, his/her prosecution service employment shall be terminated by exempting him/her from office. In accordance with Sections 13/A-13/F of Instruction 4/2012. (I. 6.) of the Prosecutor General on specific questions regarding the status of employees of the Prosecution Service, a case file examination shall be carried out as a basis for the assessment which is due to follow with regard to the prosecutor appointed to a prosecution office subordinated to the Office of the Prosecutor General prior to the time when the assessment is due. Such a case file examination shall not be carried out for senior head prosecutors. Case file examinations shall discover the examined prosecutor's practice regarding the application of substantive and procedural law during at least a one-year period prior to the case file examination, or since the prosecutor's latest assessment – or in absence of an assessment – since the time of his/her appointment at the most. The case file examination and its evaluation shall be done by a prosecutor (hereinafter: examiner prosecutor) who works at the prosecution office directly superior to the prosecution office where the examined prosecutor is appointed to and who works in the same field of prosecutorial activity or expertise as the examined prosecutor. The examiner prosecutor shall be designated by the directly superior prosecution office or at the Office of the Prosecutor General by the head of the organizational unit in the prosecution service that is competent in view of the examined prosecutor's duties.

Q120-1 (2021): Under Section 50 (1) of Act on Prosecutors, prosecutors shall be assessed on a regular basis, with the exception of the Prosecutor General and the Deputy Prosecutors General.
In case of the first appointment, which is for a definite term, the prosecutor shall be assessed by the end of that term. In case of appointment to prosecutor for an indefinite term, the prosecutor shall be assessed within 3 years following the appointment; then the assessment shall be carried out every 8 years.
Prosecutors are do not need to be assessed within the period of six years before reaching retirement age.
Besides the above, prosecutors shall be assessed if they request so, provided that at least 2 years have elapsed since the last assessment, or in the occurrence of any circumstance which suggests professional inadequacy, or which necessitates the amendment of the results of the last assessment. The assessment procedure involves examination of case files, as set out in Sections 13A to 13F of the Prosecutor General's Order No. 4/2012.

Q120-1 (2018): The evaluation system is defined by Articles 50-52 of the Act on the Legal Status of Prosecutors. The purpose is to assess the quality of the prosecutor's activities, his/her skills, abilities and character traits with an impact thereon and to facilitate professional development. Prosecutors, with the exception of the Prosecutor General and the Deputy Prosecutor General, are assessed before the expiry of the fixed term of the first appointment, while in the case of a first appointment for an indefinite term, before the expiry of a period of 3 years following the appointment, and thereafter every 8 years. Prosecutors need not be assessed during the 6 years preceding the completion of the applicable old-age pension age. A prosecutor shall also be assessed if: requested by the prosecutor; circumstances have emerged that indicate the prosecutor's professional ineligibility or the necessity to alter the evaluation of the previous assessment; in the extraordinary proceeding to be completed without delay, s/he fails to meet the deadline extended by the superior prosecutor. The assessment is the duty of the person exercising the employer's rights. The official work of prosecutors assigned to the Ministry is evaluated by the Minister responsible for justice in accordance with the rules applicable to government officials. As a result, prosecutors may be awarded the following grades: excellent, suitable for promotion; excellent and fully eligible; eligible; eligible, subsequent assessment required; ineligible. In the event of an ineligible grade, the prosecutor shall be called upon to resign his/her office within thirty days. If the prosecutor is awarded a grade "eligible, subsequent assessment required", the person exercising the employer's rights identifies the deficiencies and irregularities and states the main criteria of the desired changes which shall be reviewed prior to the next assessment (within 2 years). A prosecutor shall be awarded an ineligible grade upon the next assessment if he/she fails to obtain an eligible grade. S/he may request a court of law to quash any erroneous or untrue finding.

Ireland

Q066 (2023): Following on from the Commission on the Future of Policing in Ireland Report in 2021, and the subsequent work of the High Level Review Group, the establishment of a Quality Assurance Unit, within the ODPP, was agreed in 2023. It is anticipated that this Unit will be formally established in September 2024.
Q066 (2021): With effect from October 1 2022, a statutory system providing for investigation and adjudication of complaints in relation to judicial conduct has been commenced pursuant to Judicial Council Act 2019.
Q067 (2023): NAP within the public prosecution services

Q067 (2021): Secretary of Judicial Council and Judicial Conduct Committee of that Committee investigate and adjudicate complaints.
Q070 (2024): While we do not routinely measure the missing activities above – that is not to say we cannot measure them.
•The Appeal ratio can be calculated if and when required.
•While we do not use disposition time, we can monitor it.
•We routinely measure waiting times and durations of proceedings.
•Productivity is measured in multiple ways, including via performance management processes

Q070 (2023): While we do not routinely measure the missing activities above – that is not to say we cannot measure them.
•Productivity is measured in multiple ways, including via performance management processes.
•The Appeal ratio can be calculated if and when required.
•While we do not use disposition time, we do have waiting times and durations of proceedings which are routinely captured and provide a good proxy.

Q070 (2022): These are not new or recently introduced monitoring options.

Q070 (2014): 2014: Since 2014 Ireland introduced a monitoring system for the length of proceedings and it is now capable of calculating average length of proceedings in first instance jurisdictions.
Q070-1 (2023): Information is published in Part 2 and Appendix 3 of ODPP Annual Report 2022 (https://www.dppireland.ie/app/uploads/2024/05/AR-2022-eng-copy.pdf)
Q070-1 (2022): Information is published in Part 2 and Part 4 of ODPP Annual Report 2021 (https://www.dppireland.ie/app/uploads/2023/02/AR2021eng.pdf).
Q070-1 (2020): information is published in Annual Report available at: https://www.dppireland.ie/app/uploads/2020/10/AR-2019-eng.pdf
Q070-1 (2018): Information is published in Annual Report available at https://www.dppireland.ie/filestore/documents/AR2017_[eng].pdf
Q071 (2024): Civil Law statistics are recorded by cases received and cases resolved during the year. The majority of civil cases initiated in Ireland do not proceed to trial. Typically, they are settled between the parties (with or without a court approval), are formally discontinued (with notification to the defendant and the court), or are not pursued further by the plaintiff (without the plaintiff notifying the court). It is therefore not possible to provide figures for pending caseloads in most courts. In Criminal Law, backlogs can be measured when required.

Q071 (2023): Civil Law statistics are recorded by cases received and cases resolved during the year. The majority of civil cases initiated in Ireland do not proceed to trial. Typically, they are either settled between the parties (with or without a court approving a settlement), are formally discontinued (involving notification to the defendant and the court), or are not pursued further by the plaintiff (without the plaintiff notifying the court). It is therefore not possible to provide figures for pending caseloads in most courts.
In Criminal Law, cases are counted by offence, not by case/defendant. We record resolved cases as cases where an order is made. As there may be more than one penalty imposed in respect of an offence and a separate order made in respect of each penalty, the figures for resolved cases can appear to be higher than those for incoming cases and can cause difficulty in calculating figures for pending cases.

Q071 (2022): N/A

Q071 (2020): NAP

Q071 (2018): NAP

Q071 (2016): NAP

Q072 (2023): We currently capture waiting times for most jurisdictions and areas of law, and we are increasing the capture of duration of proceedings.
Q083-1 (2018): NAP

Q083-1 (2016): NAP

Q083-2 (2024): It should be noted that the answer is dependent on how the term “target” is defined. Allocation of files happens in some divisions but not all, and not all prosecutors are assigned a specific number of files per week. Additionally, targets can be influenced by external factors such as: the number of investigation files received, or the availability of court dates in order to process cases. The main reason why prosecutors are not assigned a set number of files is because the size and complexity of files can vary significantly. Therefore, our answer has to be nuanced given the type of system we operate in and this would explain discrepancies in answers.
So while there are no targets defined, there is an expectation of work completion and case management through action lists, etc which we report in our annual report and also to DPER (Department of Public Expenditure and Reform) as part of our budget/ performance metrics.

Q083-2 (2023): It should be noted that the answer is dependent on how the term “target” is defined. Allocation of files happens in some divisions but not all, and not all prosecutors are assigned a specific number of files per week. Additionally, targets can be influenced by external factors such as: the number of investigation files received, or the availability of court dates in order to process cases. The main reason why prosecutors are not assigned a set number of files is because the size and complexity of files can vary significantly. Therefore, our answer has to be nuanced given the type of system we operate in and this would explain discrepancies in answer

Q083-2 (2022): Allocation of files happens in some divisions but not all, and not all prosecutors are assigned a specific number of files per week. Additionally, targets can be influenced by external factors such as: the number of investigation files received, or the availability of court dates in order to process cases. The main reason why prosecutors are not assigned a set number of files is because the size and complexity of files can vary significantly.

Q083-2 (2021): Prosecutors in our directing division are allocated a specific number of files per week. Decisions must be issued within a designated time frame and this is monitored by our case management system

Q083-2 (2018): Work is demand led by number of files submitted by external investigating agencies

Q083-3 (2024): Unit Heads assign a number of files to each Prosecutor depending on ability or grade. The targets for the Office are ultimately greatly impacted by external factors like the amount of investigation files that are submitted to the office, the availability of court dates to process cases and the fact that the size and complexity of files varies. A Prosecutor’s ability to progress their caseload is very much impacted by these factors so within this Office we don’t usually reference “targets.”

Q083-3 (2023): Unit Heads assign a number of files to each Prosecutor depending on ability or grade. The targets for the Office are ultimately greatly impacted by external factors like the amount of investigation files that are submitted to the office, the availability of court dates to process cases and the fact that the size and complexity of files varies. A Prosecutor’s ability to progress their caseload is very much impacted by these factors so within this Office we don’t usually reference “targets”.

Q083-3 (2022): Unit Heads assign a number of files to each Prosecutor depending on ability or grade. This might not mean that “targets” are set. The targets for the Office are ultimately greatly impacted by external factors like the amount of investigation files that are submitted to the office, the availability of court dates to process cases and the fact that the size and complexity of files varies. A Prosecutor’s ability to progress their caseload is very much impacted by these factors so within this Office we don’t usually reference “targets”.

Q120 (2024): Performance Management Development System (PMDS) is the on-going management of performance and is a key enabler of current and future Civil Service reform. PMDS is designed to be a meaningful and useful support to all Staff and Managers in the management and improvement of individual performance.

Q120 (2023): A Prosecutor’s performance is individually assessed through PMDS (Performance Management and Development System). PMDS assesses how a jobholder's work performance, career and development needs are managed. It links the management of individual performance to the objectives of the Office, as set out in the Strategy of Statement and Business Plan. PMDS seeks to strike a balance between the needs of the organisation and the development needs of those who work in it. It recognises the need for continual change and improvement and for the involvement of staff in bringing this about. Individual prosecutors are responsible for carrying out their own goal setting and assessment. The PMDS form is then reviewed and assessed by the prosecutor’s manager.

Q120 (2022): A Prosecutor’s performance is individually assessed through PMDS (Performance Management and Development System). PMDS assesses how a jobholder's work performance, career and development needs are managed. It links the management of individual performance to the objectives of the Office, as set out in the Strategy of Statement and Business Plan. PMDS seeks to strike a balance between the needs of the organisation and the development needs of those who work in it. It recognises the need for continual change and improvement and for the involvement of staff in bringing this about. Individual prosecutors are responsible for carrying out their own goal setting and assessment. The PMDS form is then reviewed and assessed by the prosecutor’s manager.

Q120-1 (2021): Performance Management System

Q120-1 (2018): Prosecutors working in-house are required to participate in Public service wide Performance Management and Development System (PMDS).

Italy

Q066 (General Comment): In Italy there is not a strict quality system as such. However, there is a regular monitoring system in place which tracks the performance of court activities.
Q070 (General Comment): Within the framework of the National Recovery and Resilience Plan (PNRR), the Ministry of Justice has introduced an additional monitoring system specifically designed for PNRR purposes, in order to keep track of a series of KPIs related to the efficiency of the Italian courts.
Q072 (2018): Waiting time is monitored only for Administrative Justice.

Q083 (General Comment): Law n.71 of 17 June 2022 has recently modified article 2 of Legislative Decree n.109, 23 February 2006, regarding disciplinary responsibility of professional magistrates. The amendment has introduced specific disciplinary offences regarding the conduct of the magistrate who does not cooperate in reaching the goals laid in the 'Program for the management of civil and criminal proceedings' (in Italian 'Programma di Gestione'), which is disciplined by art37 of Decree-Law II. 98 of 6 of July 2011 and regularly approved by each Court.

Q083 (2020): Quantitative performance targets are set in terms of length and timeframe of proceedings. Judges who fail to meet certain
requirements may face disciplinary proceedings.

Q083 (2018): Quantitative performance targets are set in terms of length and timeframe of proceedings. Judges who fail to meet certain requirements may face disciplinary proceedings.
Q083 (2016): Quantitative performance targets are set in terms of length and timeframe of proceedings. Judges who fail to meet certain requirements may face disciplinary proceedings.
Q083-1-1 (2022): Disciplinary sanction as provided by the Legislative Decree no 109 of 23rd February 2006, regarding disciplinary responsibility of professional magistrates.
Q083-2 (General Comment): Law n.71 of 17 June 2022 has recently modified article 2 of Legislative Decree n.109, 23 February 2006, regarding disciplinary responsibility of professional magistrates. The amendment has introduced specific disciplinary offences regarding the conduct of the magistrate who does not cooperate in reaching the goals laid in the 'Program for the management of civil and criminal proceedings' (in Italian 'Programma di Gestione'), which is disciplined by art37 of Decree-Law II. 98 of 6 of July 2011 and regularly approved by each Court.

Q083-3-1 (2023): Disciplinary sanction as provided by the Legislative Decree no 109 of 23rd February 2006, regarding disciplinary responsibility of professional magistrates.
Q083-3-1 (2022): Disciplinary sanction as provided by the Legislative Decree no 109 of 23rd February 2006, regarding disciplinary responsibility of professional magistrates.
Q120 (General Comment): The assessment procedure applies to both judges and public prosecutors. Every four years, the High Council for the Judiciary (CSM) conducts a professional appraisal based on the professional skills of judges/prosecutors. The professional status of both judges and prosecutors is organized into 7 different levels. Several criteria are taken into consideration: independence, impartiality, balance, professional capacity, work capacity, diligence and commitment The assessment is based on a number of acts and documents that describe all the professional aspects of the magistrate to be evaluated. The most significant are: • "self report" where the magistrate illustrates all the elements that he/she believes are necessary or useful to be considered for the purpose of his/her appraisal; • a random sample of acts and documents produced by the magistrate during the evaluation period;
• an "informative report" prepared by a superior of the magistrate;
• the statistics concerning activity of the magistrate: the number of provisions drafted, the processing times of the proceedings, the time for filing the documents (even in comparison with the other magistrates of the office); • work related publications, If any;
• reports from the lawyers' council, if any.

Q120-1 (2023): Every four years
Q120-1 (2022): Every four years

Latvia

Q066 (General Comment): For judges: The reply is partly “yes” because according to the Law on Judicial Power Section 27.1., a Chief Judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (standard of time periods for adjudication of matters) prior to the beginning of each calendar year, in co-operation with court judges. This standard shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and other basic principles related to the guarantee of fair trial. A Chief Judge of a court shall approve the standard and supervise the actual time periods of examining matters in a court. He/she shall submit information to the Board of Justice regarding the approved standard until 1 February of each year. Implementing the task of the working group for strengthening judicial efficiency established by Judicial Council, Division of Case-law and Research of the Supreme Court has developed guidelines for writing court judgments in both civil cases and administrative cases for courts of first instance and appeal instance. Within the framework of the project, twelve judges of the first and appeal instances were interviewed about the experience of writing court judgments in civil cases and also four judges of the administrative court of the first and appeal instance were interviewed in the administrative courts, and the courts were also asked to select and send good and critical examples of writing court judgments.
For prosecutors: On 6th February 2023 Council of the Prosecutor General adopted a decision “On measures for the implementation of the quality management system in the Prosecution Office in 2023-2027”.
In January 15, 2020 the “Visitors service standards of the district (city) courts and regional courts” were approved. This document summarizes the general principles related to functions such as judicial reception and providing with information. The standards help court staff to raise their professionalism and understand the court visitors servicing values.

Q066 (2024): For judges: The reply is partly "yes" because, according to the Law on Judicial Power, Section 27.1, a Chief Judge of a court shall plan and determine the objectives of the court's work in relation to average time periods for adjudication of matters in court (standard time periods for adjudication of matters) prior to the beginning of each calendar year, in co-operation with the court judges. This standard shall be determined by taking into account the court's resources and the necessity to ensure the right of a person to the adjudication of a matter in a reasonable time period, as well as other basic principles related to the guarantee of a fair trial. A Chief Judge of a court shall approve the standard and supervise the actual time periods for examining matters in court. He/she shall submit information to the Board of Justice regarding the approved standard by 1 February of each year.
Implementing the task of the working group for strengthening judicial efficiency established by the Judicial Council, the Division of Case-law and Research of the Supreme Court has developed guidelines for writing court judgments in both civil cases and administrative cases for courts of first instance and appeal instances. Within the framework of the project, twelve judges of the first and appeal instances were interviewed about their experience of writing court judgments in civil cases, and also four judges of the administrative courts of the first and appeal instances were interviewed in the administrative courts. The courts were also asked to select and send good and critical examples of writing court judgments.
In 2024, courts also began using a new model to balance court and judge workloads – “Case Weighting”. A new tool has been introduced to modernize court administration, aimed at helping determine case complexity, assess statistics, performance indicators, and case distribution. The model evaluates the complexity of each case received by the court using a point-based system.
To determine the weight of a case, all cases are classified into 42 groups based on types of proceedings and sub-branches of law. Taking all of this into account, the case weight is determined for distribution purposes, as well as for calculating judge and court workload indicators. The implementation of this model enables a more equitable distribution of workload among courts and judges, helps better plan case review timelines, and allows for evaluation of implemented reforms. It is important to note that active work is still ongoing to implement and utilize this case weighting model in courts.
On 6th February 2023 Council of the Prosecutor General adopted a decision “On measures for the implementation of the quality management system in the Prosecution Office in 2023-2027”. In 2024 several internal documents were adopted to implement the quality management system. This system covers administrative and management processes of the PO, including support tasks provided by the non-prosecutor stuff such as case preparation, assistance during the hearings, helping to draft the decisions.

Q066 (2023): For judges: The reply is partly “yes” because according to the Law on Judicial Power Section 27.1., a Chief Judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (standard of time periods for adjudication of matters) prior to the beginning of each calendar year, in co-operation with court judges. This standard shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and other basic principles related to the guarantee of fair trial. A Chief Judge of a court shall approve the standard and supervise the actual time periods of examining matters in a court. This document summarizes the general principles related to functions such as judicial reception and providing with information. The standards help court staff to raise their professionalism and understand the court visitors servicing values.

Q066 (2021): Partly yes, according to the Law on Judicial Power Section 27.1. chief judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (the standard of time periods for adjudication of matters) prior to the beginning of each calendar year in co-operation with court judges. The standard of time periods for adjudication of matters shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and in conformity with other basic principles for examination of matters. A Chief Judge of a court shall approve the standard of time periods for adjudication of matters in a court and supervise the actual time periods of examining matters in a court. A Chief Judge of a court shall submit information to the Board of Justice regarding the approved standard of time periods for adjudication of matters until 1 February of each year.

Q066 (2020): Partly yes, according to the Law on Judicial Power Section 27.1. the Court President before the beginning of each calendar year,shall plan and determine the objectives of the court work in relation to average time periods for the examination of cases in a court (the standard of time periods for the examination of cases) in cooperation with court judges. The standard of time periods for the examination of cases shall be determined by taking into account the court resources and the necessity to ensure the right of a person to the examination of a case in a reasonable time period and in conformity with other basic principles for the examination of cases. The Court President shall submit the standard case examination time limits for approval to the Judicial Council until 1 February of each year.

Q066 (2019): In January 15, 2020 the “Visitors service standards of the district (city) and regional court" is adopted. This document
defines the procedure by which the employee of the district (city) and regional court shall ensure the servicing of the court visitor, the
participant in the proceedings, its representative (hereinafter - customer) (the acceptance of the client, the provision of information and
communication in person, by telephone and by electronic means) and basic customer service values, general principles and basic rules
for customer service.

Q066 (2017): According to the Law on Judicial Power Art 27.1. chief judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (the standard of time periods for adjudication of matters) prior to the beginning of each calendar year in co-operation with court judges. The standard of time periods for adjudication of matters shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and in conformity with other basic principles for examination of matters. A Chief Judge of a court shall approve the standard of time periods for adjudication of matters in a court and supervise the actual time periods of examining matters in a court. A Chief Judge of a court shall submit information to the Board of Justice regarding the approved standard of time periods for adjudication of matters until 1 February of each year. First standarts of time periods for adjudication of matters were submitted to the Board of Justice in 2014.

Q066 (2016): Partly yes, according to the Law on Judicial Power Section 27.1. chief judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (the standard of time periods for adjudication of matters) prior to the beginning of each calendar year in co-operation with court judges. The standard of time periods for adjudication of matters shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and in conformity with other basic principles for examination of matters. A Chief Judge of a court shall approve the standard of time periods for adjudication of matters in a court and supervise the actual time periods of examining matters in a court. A Chief Judge of a court shall submit information to the Board of Justice regarding the approved standard of time periods for adjudication of matters until 1 February of each year.
First standarts of time periods for adjudication of matters were submitted to the Board of Justice in 2014.

Q066 (2015): Since 2008 courts apply 'The visitors service standards of the district (city) courts and regional courts'. This courts visitor's service standard summarizes the general principles of judicial reception and providing with information. Standard helps court staff to raise their professionalism and understand the court visitors servicing values.
On 2015 May 18 Council of Justice approved guidelines on communication of the court system. The aim of the guidelines is to promote the effective functioning of the judiciary and promte the public confidence in the judiciary, creating a positive Court’ s image and enhance its’ authority in society.

Q066 (2014): In 2014, for the first time, standards of time periods for adjudication of matters were submitted to the Board of Justice.
Q067 (General Comment): In order to implement high-quality investigation supervision, to achieve a quick, economical and effective fair settlement of criminal legal relations in criminal proceedings, as well as to ensure a uniform policy of criminal penalties and control of prosecutors' work, the prosecutor's office has adopted internal legal acts that ensure timely informing of senior officials about the manner and necessity of completing criminal proceedings in case of involvement of the said official.
As regards everyday duties, responsibility lies upon every prosecutor. There are cases, provided by in the order of the Prosecutor General, when the prosecutor is obliged to report to the supervising prosecutor, higher-ranking prosecutor or other prosecutors (chief prosecutor of the relevant prosecution office, or chief prosecutor of the Criminal Justice Department of the Office of the Prosecutor General). During the evaluation process of prosecutors (with the new system – the annual rating of the indicators of the professional performance of the prosecutors of first instance level; or the one carried out no less frequent than once in 5 years), one department of the Office of the Prosecutor General is responsible for creating an assessment of the quality and efficiency of the professional activities of district-level prosecutors and monitoring the results.

Q070 (2023): The indicators “productivity of judges and court staff” and “number of appeals” are taken into account when assessing the professional activity of a judge, because the objective of the assessment of the professional activities of a judge is to promote the continuous professional growth of a judge throughout his or her career, thereby improving the quality of the work of the judge and the court. An Annual evaluation of court staff is also carried out, which is essential for high-quality work of courts.

Q070 (2022): The indicators “productivity of judges and court staff” and “number of appeals” are taken into account when assessing the professional activity of a judge, because the objective of the assessment of the professional activities of a judge is to promote the continuous professional growth of a judge throughout his or her career, thereby improving the quality of the work of the judge and the court. An Annual evaluation of court staff is also carried out, which is essential for high-quality work of courts.

Q070 (2017): Decision stability (proportion of decisions appealed in higher instance)

Q070 (2016): Decision stability (proportion of decisions appealed in higher instance)

Q070-1 (2024): Discontinued/closed criminal cases, quality of the final decisions made by the prosecutors, the motives of the protests submitted by the prosecutors and the examination results, crime trends in certain topical qualifications of criminal offenses (e.g. money laundering, human trafficking, sex crimes, violent crimes, etc.). Different quantitative performance targets have been assessed and monitored. The data in the monthly reports provided by public prosecutors allows (and has allowed in previous years too) to see the disposition time as well, however, there have been no standards set, for instance as to how long is too long. With the new system this indicator (disposition time), among others, is used to evaluate the professional performance of the prosecutor, even though only in comparison with other prosecutors.

Q070-1 (2023): Discontinued/closed criminal cases, quality of the final decisions made by the prosecutors, the motives of the protests submitted by the prosecutors and the examination results, crime trends in certain topical qualifications of criminal offenses (e.g. money laundering, human trafficking, sex crimes, violent crimes, etc.).
As stated in comments provided before (e.g. in the answer to Q83-2), different quantitative performance targets have been assessed and monitored. The data in the monthly reports provided by public prosecutors (referred to in comment to Q83.1-1 in 2022) allows (and has allowed in previous years too) to see the disposition time as well, however there have been no standards set, for instance as to how long is too long. With the new system this indicator (disposition time), among others, is used to evaluate the professional performance of the prosecutor, even though only in comparison with other prosecutors.

Q071 (2018): We have created a specific tool for this purpose that is available also in public from https://dati.gov.lv/

Q072 (2024): On an irregular basis, the Ministry of Justice and the Council of Justice analyze the number of days (period) from the initiation or receipt of the case in court to the moment when the case review is started.
Q072 (2022): "Within the courts": On an irregular basis, the Ministry of Justice and the Council of Justice analyze the number of days (period) from the initiation or receipt of the case in court to the moment when the case review is started.

Q083-1 (General Comment): According to the Law on Judicial Power, when adjudicating, judges are independent and are subject only to the law. Therefore, judges set targets by themselves. However, the President of the court monitors the workload of the judges in the court as a whole, assigning cases to another judge if necessary.

Q083-1 (2024): According to the Law on Judicial Power, when adjudicating, judges are independent and are subject only to the law. Therefore, judges set targets by themselves. However, the President of the court monitors the workload of the judges in the court as a whole, assigning cases to another judge if necessary.
Q083-1 (2023): According to the Law on Judicial Power, when adjudicating, judges are independent and are subject only to the law. Therefore, judges set targets by themselves. However, the President of the court monitors the workload of the judges in the court as a whole, assigning cases to another judge if necessary.

Q083-2 (General Comment): The prosecutor provides a monthly report on the statistical indicators of his or her work. In addition, the statistical indicators of the individual work of the public prosecutor (statistical indicators for the monitoring of the investigation, prosecution, maintenance of the State prosecution and other functions of the public prosecutor) are also analysed during the process of assessing the professional activities of prosecutors (not less than once every five years).

Q083-2 (2024): During 2023 the number of processed (closed, brought to court and concluded by a penalty imposed/negotiated by the prosecutor) cases was assessed and monitored, but no standard was set for how many cases should be completed. The new system for evaluating the professional performance of prosecutors (effective as of 1st of January 2024) provides that the quantitative indicator of the work performed by the district-level prosecutor is evaluated every year in comparison to other prosecutors.
Q083-2 (2023): During 2023 the number of processed (closed, brought to court and concluded by a penalty imposed/negotiated by the prosecutor) cases was assessed and monitored, but no standard was set for how many cases should be completed. The new system for evaluating the professional performance of prosecutors (effective as of 1st January 2024) provides that the quantitative indicator of the work performed by the district-level prosecutor is evaluated every year.

Q083-3 (2023): During 2023 the number of processed (closed, brought to court and concluded by a penalty imposed/negotiated by the prosecutor) cases was assessed and monitored, but no standard was set for how many cases should be completed.
Q120 (General Comment): Evaluation is carried out by the Attestation Commission of Prosecutors. During the evaluation of a public prosecutor the following indicators of the quality of performance of the functions are assessed: supervision, criminal prosecution, maintenance of state prosecution in court, as well as the protection of state and individual rights. An assessment of professional competences is also carried out. The results are generally used to evaluate professional performance and suitability for the position. In the case of a negative opinion, the Commission can determine specific tasks that must be performed to eliminate the deficiencies found in prosecutor’s professional activity or to improve his/her professional activity.

Q120 (2024): The purpose of evaluating professional performance of prosecutors is to promote the continuous professional development. The evaluation of the prosecutor's professional activity is carried out by the Attestation Commission of Prosecutors established by the Council of Prosecutor General at least once every five years. In cases where deficiencies are found in the prosecutor's professional activity, the assessment can be carried out any time before the term of five years. When evaluating the professional performance of the prosecutor, the Attestation Commission of Prosecutors analyses the quality of performance of the prosecutor's functions, the organization of individual work, the participation in activities improving qualification, the statistical indicators, as well as other criteria provided for in the Regulation on the Evaluation of Professional Performance of Prosecutors. Following the evaluation the Attestation Commission of Prosecutors gives a positive or negative opinion, in some cases specific tasks can be determined for the prosecutor to eliminate the deficiencies found in professional activity or to improve his professional performance. The opinion of the Attestation Commission of Prosecutors acquires legal force when it is approved by the Prosecutor General.

Q120 (2023): The purpose of evaluating the professional performance of the prosecutor is to promote the continuous professional development of the prosecutor during the performance of his/her duties. The evaluation of the prosecutor's professional activity is carried out by the Attestation Commission of Prosecutors established by the Council of Prosecutor General at least once every five years. In cases where deficiencies are found in the prosecutor's professional activity, the assessment of his/her professional performance can be (in certain cases must be) carried out any time before the term of 5 years. When evaluating the professional performance of the prosecutor, the Attestation Commission of Prosecutors analyses the quality of performance of the prosecutor's functions, the organization of individual work, participation in qualification raising events, statistical indicators of work, as well as other criteria provided for in the Regulation on the Evaluation of Professional Performance of Prosecutors. The Attestation Commission of Prosecutors gives a positive or negative opinion on the professional activity of the prosecutor, including, specific tasks can be determined for the prosecutor to be performed in order to eliminate the deficiencies found in his professional activity or to improve his professional performance. The opinion of the Attestation Commission of Prosecutors acquires legal force when it is approved by the Prosecutor General.

Q120-1 (General Comment): The assessment of the professional activities of prosecutors have been commenced and is operational from 1 January 2014, within which the professional activities of prosecutors are assessed on a regular basis (not less than once every five years).
Q120-1 (2024): In general, no less than once every five years, if all skills are assessed at an appropriate level. If deficiencies are found in the actions of the prosecutor and the measures taken have not brought positive results, then the assessment is carried out earlier. If the prosecutor's skills are assessed negatively, the evaluation must be carried out immediately. As from 2024, a new system of the evaluation of prosecutors is introduced, which also provides for annual evaluation. In accordance with this new system, starting from the reporting period of 2023, an annual evaluation of the activities of district-level prosecutors is carried out – the results of the activities of all district-level prosecutors in four main work areas are compared with each other:
– supervision of criminal cases under investigation,
– completion of the pre-trial investigation,
– maintenance of state prosecution in court,
– work in the field of non-criminal cases.
Each of the mentioned areas is evaluated according to the performance indicators, which are grouped into three categories – quantity, quality and compliance with the strategic goals of the Prosecution Office. As a result of the evaluation, prosecutors are divided into three groups – good efficiency, satisfactory efficiency (minor improvements necessary), unsatisfactory efficiency (significant improvements necessary). Regarding prosecutors that are evaluated as working satisfactorily, their direct managers set development goals for them for the current year. Regarding prosecutors that are evaluated as working unsatisfactory, the responsible structural unit of the Prosecutor General’s Office creates a professional development program with performance improvement tasks for the current year. The execution of this program is controlled by the prosecutor's immediate supervisor and/or a higher-ranking prosecutor. For the period from 2023, in relation to chief prosecutors (organizational management) and higher-ranking prosecutors, a 360-degree performance and competence evaluation is carried out using survey questionnaires. The results of the survey are sent to the corresponding next level chief prosecutors and next higher-ranking prosecutors. Based on the survey results, they set professional development goals for their chief prosecutors and lower-ranking prosecutors for the current year.

Q120-1 (2023): In general, no less than once every five years, if all skills are assessed at an appropriate level. If deficiencies are found in the actions of the prosecutor and the measures taken have not brought positive results, then the assessment is carried out earlier. If the prosecutor's skills are assessed negatively, the evaluation must be carried out immediately.
As from 2024, a new system of professional activity of prosecutors is introduced, which also provides for annual evaluation. In accordance with this new system, starting from the reporting period of 2023, an annual evaluation of the activities of district-level prosecutors is carried out - the results of the activities of all district-level prosecutors in four main work areas are compared with each other:
– supervision of criminal cases under investigation,
– completion of the pre-trial investigation,
– maintenance of state prosecution in court,
– work in the field of non-criminal cases.
Each of the mentioned areas is evaluated according to the performance indicators, which are grouped into three categories - quantity, quality and compliance with the strategic goals of the Prosecution Office.
As a result of the evaluation, prosecutors are divided into three groups - good efficiency, satisfactory efficiency (minor improvements necessary), unsatisfactory efficiency (significant improvements necessary).
Regarding prosecutors working satisfactorily, their direct managers set development goals for them for the current year.
Regarding unsatisfactory working prosecutors, the responsible structural unit of the Prosecutor General's Office creates a professional development program with precise performance improvement tasks for the current year, the execution of which is controlled by the prosecutor's immediate supervisor and/or a higher-ranking prosecutor.
For the period from 2023, in relation to chief prosecutors (organizational management) and higher-ranking prosecutors, a 360-degree performance and competence evaluation is carried out using survey questionnaires.
The results of the survey are sent to the corresponding next level chief prosecutors and next higher-ranking prosecutors.
Based on the survey results, they set professional development goals for their chief prosecutors and lower-ranking prosecutors for the current year.

Q120-1 (2020): Not less than once every five years

Lithuania

Q070 (General Comment): All data except satisfaction of users, are recorded in the Lithuanian Court Information System (LITEKO), as well as other data, related to the case, it‘s process and the parties to the proceedings.
Q070 (2023): National court administration carries out the courts assessing the quality of services and service delivery survey every year.
Q071 (2024): The number of pending cases and cases that are not processed within a reasonable timeframe (backlogs) for civil, criminal and administrative law cases are monitoring.
Q072 (2024): Through administrative supervision mechanism

Q072 (2023): Through administrative supervision mechanism

Q072 (2022): Within the courts: through an administrative supervision mechanism.

Q072 (2020): courts: through administrative supervision mechanism

Q083-2 (General Comment): According to Article 33 of the Law on Prosecution Service, evaluation of prosecutor's individual performance, qualification and suitability is carried out by the Attestation Commission. Performance of a prosecutor who has received a positive evaluation after his/her internship, is thereafter evaluated every five years during the regular evaluation of the service. The extraordinary evaluation can be carried out by decision of the Prosecutor General: at the request of the public prosecutor him/herself, if at least half a year has passed since his/her last evaluation; in the case the prosecutor is applying for a higher position, or to the same or an equivalent post after the expiry of the term of appointment; if three years have passed since the last evaluation of his/her service; if the prosecutor's performance has repeatedly been deficient, giving rise to reasonable doubts as to his/her suitability for the position in question.

Q083-2 (2018): The quantitative performance targets are defined for the Prosecutor General’s Office and 5 regional Prosecutor’s Offices, but not for individual public prosecutors.
Q083-3 (2024): no targets in the system

Q083-3 (2018): The quantitative performance targets are defined for the Prosecutor’s Offices, but not for individual public prosecutors.
Q083-3-1 (2024): no targets in the system

Q120 (2024): The service, qualifications of the prosecutors and their suitability for the position are assessed by the Prosecutors' Assessment Commission.
The Commission is composed of seven members (four prosecutors and three persons (non-prosecutors) of impeccable reputation, nominated by the President of the Republic, the Speaker of the Seimas, and the Prime Minister) for a period of three years.
The Commission assesses data on the procedural and non-procedural performance and professional qualities of the prosecutor, and, in the case of the evaluation of the chief prosecutor (or deputy), also on the administrative performance.

Q120 (2023): The service, qualifications of the prosecutors and their suitability for the position are assessed by the Prosecutors'
Assessment Commission.
The Commission is composed of seven members (four prosecutors and three persons (non-prosecutors) of impeccable reputation, nominated by the President of the Republic, the Speaker of the Seimas, and the Prime Minister) for a period of three years.
The Commission assesses data on the procedural and non-procedural performance and professional qualities of the prosecutor, and, in the case of the evaluation of the chief prosecutor (or deputy), also on the administrative performance.

Q120 (2022): The service, qualifications of the prosecutors and their suitability for the position are assessed by the Prosecutors' Assessment Commission.
The Commission is composed of seven members (four prosecutors and three persons (non-prosecutors) of impeccable reputation, nominated by the President of the Republic, the Speaker of the Seimas, and the Prime Minister) for a period of three years.
The Commission assesses data on the procedural and non-procedural performance and professional qualities of the prosecutor, and, in the case of the evaluation of the chief prosecutor (or deputy), also on the administrative performance.

Q120-1 (General Comment): According to Article 33 of the Law on Prosecution Service, evaluation of prosecutor's individual performance, qualification and suitability is carried out by the Attestation Commission. Performance of a prosecutor who has received a positive evaluation after his/her internship, is thereafter evaluated every five years during the regular evaluation of the service. The extraordinary evaluation can be carried out by decision of the Prosecutor General: at the request of the public prosecutor him/herself, if at least half a year has passed since his/her last evaluation; in the case the prosecutor is applying for a higher position, or to the same or an equivalent post after the expiry of the term of appointment; if three years have passed since the last evaluation of his/her service; if the prosecutor's performance has repeatedly been deficient, giving rise to reasonable doubts as to his/her suitability for the position in question.

Q120-1 (2024): The Commission carries out regular and extraordinary assessments of the service.
Regular service assessments are carried out:
1. at the end of the prosecutor's traineeship;
2. every five years.
An extraordinary service assessment may be carried out:
1. at the reasoned request of the prosecutor, if at least half a year has elapsed since the last assessment;
2. when, at the end of his/her term of office, the prosecutor seeks appointment to a higher, the same or an equivalent post, provided that three years have elapsed since the last service assessment;
3. in cases where it is established that the prosecutor's performance has repeatedly been deficient, giving rise to reasonable doubts as to his suitability for the post in question.

Q120-1 (2022): The Commission carries out regular and extraordinary assessments of the service.
Regular service assessments are carried out:
1. at the end of the prosecutor's traineeship;
2. every five years.
An extraordinary service assessment may be carried out:
1. at the reasoned request of the prosecutor, if at least half a year has elapsed since the last assessment;

Luxembourg

Q070 (General Comment): No regular system has been implemented up to today. However, a monitoring can be done through the statistical service of the judiciary (SSJ) on an punctual basis and upon request of the competent authorities.

Q070 (2017): ??? (see comments to parent campaign)

Q070 (2016): No regular system has been implemented up to today. However, a monitoring can be done through the statistical service of the judiciary (SSJ) on an punctual basis and upon request by the competent authorities.

Q070 (2015): By using the newly implemented statistical tools, the information ticked in addition to last year's questionnaire can now be retrieved by the statistical service on an as needed basis at least for criminal cases. Identical markers are being implemented for civil and commercial cases and will available in a foreseeable future.

Q070 (2014): 2014: There is no regular monitoring system. However, new statistical tools are implemented and can provide monitoring elements when necessary without daily measurement current affairs.
Q071 (2018): New systems of monitoring have been implemented since 2016 (JUCIV for the civil law cases and JANGA for administrative law cases)
Q071 (2016): No regular system has been implemented up to today. However, a monitoring can be done through the statistical service of the judiciary (SSJ) on an punctual basis and upon request by the competent authorities.

Q072 (2014): According to 2014 data, the newly set up statistical tools, as well as the courts' CMS, allow an "as needed" check of the waiting time.
Q083-1 (2018): NAP

Q083-2 (2018): NAP

Q083-3 (2018): NAP

Malta

Q066 (General Comment): There exists a Code of Ethics for the members of the Judiciary which, though not providing for the organisation and quality of the judicial work, does lay upon the members of the Judiciary certain obligations which are important in ensuring the transparency and independence of the judicial process.
Q066 (2017): There exists a Code of Ethics for the members of the Judiciary which, though not providing for the organisation and quality of the judicial work, does lay upon the members of the Judiciary certain obligations which are important in ensuring the transparency and independence of the judicial process.
Q066 (2016): There exists a Code of Ethics for the Judiciary which, though not providing for the organisation and quality of judicial work, does lay upon the members of the Judiciary, certain obligations which are important in ensuring the transparency and independence of the judicial process.
Q067 (2018): There are general quality standards that apply to the public sector, but not specific quality standards that monitor the implementation of quality standards within the judiciary or the prosecution services.
Q070 (2022): Other: Age of the pending caseload.

Q070 (2019): Other: age of pending caseload

Q070 (2017): other: clerance rate

Q070 (2015): The monitoring of court activities also takes place through the ongoing analysis of the Clearance Rate and Disposition Time of the various courts. This data is also being published online on a monthly basis.
The category "other" refers to the monitoring of the Clearance Rate and Disposition Time of all civil courts, boards and tribunals. This exercise was started in 2015.
Q070 (2014): In 2014, the court administration was monitoring length of proceedings through the number of incoming and resolved cases, as well as through the pending caseload. The age of civil cases was another parameter that was being assessed.
On the occasion of the 2014 exercise, it has been indicated that since 2015, Malta started computing the Disposition Time and Clearance Rate of all the civil and criminal courts. By the end of 2015, for the civil courts, this information will be made available online.
Q070-1 (2022): The Office of the Attorney General has embarked on a data management process that is seeing more information being collected in respect of the efficiency parameters of the Office. This explains why in this evaluation cycle, the cathegories of 'Backlog' and ' Productivity of Prosecutors and prosecutors staff' have been marked.

Q070-1 (2021): The Attorney General is collecting data on length of proceedings and using it to monitor efficiency. This exercise will be refined in the coming months within the scope of an ongoing project addressing the re-engineering of processes within the Office of the AG.
Q070-1 (2018): The Office of the AG does hold a record of the number of incoming cases and terminated cases, but these are not as yet organised into official performance indictaors.
Q072 (2016): In Malta, there is no formal monitoring system. However, an "informal" monitoring used to take place. It falls mostly within the remit of the Chief Justice and the respective members of the judiciary.

Q083 (General Comment): The administration of the case load is left in the hands of the individual judge and magistrate together with the Chief Justice who assigns the particular duties to each judge and magistrate.
Q083 (2016): The administration of the case load is left in the hands of the individual judge/ magistrate together with the Chief Justice who assigns the particular duties to each judge and magistrate.
Q083-1 (2018): NA

Q083-3 (2018): NA

Q083-3-1 (2023): Performance targets do not warrant disciplinary action unless the reason why these were not reached constitutes a disciplinary offence. The AG carries out performance appraisals on the staff and if their targets are not met, then it will normally reflect in their performance appraisal.
Q120-1 (General Comment): It is up to the discretion of the Attorney General to conduct such an evaluation, but it must be carried out at least once annually..
Q120-1 (2022): It is up to the discretion of the Attorney General to carry out such evaluation but it has be carried out at least once annually.
Q120-1 (2021): The work of public prosecutors is constantly monitored by the Deputy AG and the AG herself. The monitoring is not scheduled at specific annual intervals but it is ingrained in the daily work processes in the Office.

Q120-1 (2020): The work of public prosecutors is constantly monitored by the Deputy AG and the AG herself. The monitoring is not scheduled at specific annual intervals but it is ingrained in the daily work processes in the Office.

Q120-1 (2018): Thework of public prosecutors is constantly monitored by the Deputy Attorney General (in charge of the criminal field) and the Attorney General. The monitoring is not scheduled at specific annual intervals, but is ongoing and ingrained in the daily work processes of the Office.

Netherlands

Q066 (General Comment): Quality standards determined for the judicial system at national level in the Netherlands:
1.Legal remedies e.g. public hearing, public ruling, publication of judgements, appeal
2.Quality indicators e.g. appeal rates, processing times, complaints
3.Quality standards – the professional standards (including professional development, reflection and feedback) These standards are publicly available on the website of the Judiciary. See https://www.rechtspraak.nl/Organisatie-en-contact/Rechtspraak-in-Nederland/Rechters/Paginas/De-professionele-standaarden-van-de-rechters.aspx
4.Quality measurement instruments Judiciary: customer survey, employee survey, independent review
The quality system for the judiciary is published on: https://www.rechtspraak.nl/Organisatie-en-contact/Organisatie/Raad-voor-de-rechtspraak/Kwaliteit-van-de-rechtspraak

Q066 (2019): There is a so-called Team Judicial Quality (Team Juridische Kwaliteit), which studies topics in a theme-wise manner. This is part of the program 'Programma OM Strafvordering 2020'. A team of public prosecutors participates in TKJ and assesses the judicial work of colleagues in a structured and systematic way. There is often a first assessment (baseline) and a first follow-up assessment, and sometimes even a second follow-up. If necessary, the assessment framework is adjusted.

Q067 (General Comment): Courts: there are staff members (policy officers) within the offices that coordinate the quality in that office.
Public prosecution: At the head office of the public prosecution (Parket-General), there is personnel responsible for producing, implementing, evaluating, and auditing quality measures. These are the TJK (as mentioned in Q66), Team Processes and Information (standard processes and procedures) and the Scientific Bureau OM (national guidelines and policy regulations).

Q067 (2017): yes

Q070 (2024): Many of these activities are included in the annual report, see for example Chapter 7 of 2024's Annual Report.

Q070 (2023): Many of these activities are included in the annual report, see for example Chapter 6 of 2023's Annual Report: https://www.rechtspraak.nl/SiteCollectionDocuments/Jaarverslag%20Rechtspraak%202023.pdf
Q070 (2020): There is an annual publication that includes the appeal ratio for some case types. To call it 'monitoring' would be a bit too much, but it is annually checked and reported on.
Incoming cases and length of proceedings have not previously been mentioned, but these are monitored.
Q071 (General Comment): The public prosecution logically only monitors criminal law cases, the courts monitor all types of cases.
Q071 (2021): Public prosecution only monitors criminal law cases, the courts monitor all.

Q072 (General Comment): Waiting time can be monitored through registration in the court system.
Agreements are made across the justice chain on timeframes in which particular caseloads (sexual offences, youth cases, and specific traffic violations) should be handled. These agreements are monitored.
Government (the Second Chamber) is annually informed on the agreements via factsheet. Additionally, timeframe agreements were reached within the public prosecution on the speed with which penal orders are to be issued, the terms in which an objection is to be judged and the speed with which the first decision with attachment is to be taken.

Q072 (2020): Within the courts: Registration in the court system gives the opportunity to monitor waiting time.
Within the public prosecution services: Across the justice chain, agreements have been made on the timeframes in which particular caseloads (sexual offences, youth cases and specific traffic violations) should be handled. These agreements are monitored. Annually, the government (Second Chamber) is informed on this via the factsheet 'Strafrechtketen'. Besides this, timeframe-agreements have been reached within the public prosecution on speed with which penal orders are to be issued, terms in which an objection is to be judged and the speed with which the first decision with attachment is to be taken (eerste beslissing bij beslag).

Q083 (2016): There is a planning and control cycle (3 times per year) which involves financial/accounting evaluation but also visits ('bestuurlijke overleggen), there is once per year an accountant check of the annual report (per court and for total of 19 district courts, 5 general appeal courts and 2 specialised courts (Trade and Inductry Tribunal (CBb) and Central Appeals Tribunal (CRvB)), and once every 4 years there is a round of visitations.

Q083-1 (2018): NAP

Q083-1 (2016): The planning and control cycle is done by The Council for the Judiciary, on a court level (not at individual judge level). Targets for each individual judge are not imposed by The Council for the Judiciary.

Q083-2 (General Comment): There is no national policy on targets for every prosecutor. An office could choose to set targets for their prosecutors (see next question), but these may vary across offices.

Q083-2 (2020): There is no national policy on targets for every prosecutor. An office (parket) could choose to set targets for their prosecutors (see next question), but this may vary across offices.

Q083-3 (General Comment): There is no national policy on targets for every prosecutor. An office could choose to set targets for their prosecutors (the head of the organisational unit or hierarchically superior public prosecutor would do this), but these may vary across offices.

Q120 (General Comment): The public prosecution has a team Judicial Quality at the General Office that studies the quality of the criminal proceedings of the public prosecution. As part of these studies and assessments, a pool of prosecutors has been compiled, and they study the work of other public prosecutors. This is an assessment of an office, not of individual prosecutors. The results of these studies are used for quality enhancement trajectories. The studies are repeated periodically.

Q120 (2020): The public prosecution has a team Judical Quality at the General Office (Parket Generaal) that studies the quality of the criminal proceedings of the public prosecution. As part of these studies and assessments, a pool of prosecutors has been compiled, and they study the work of other public prosecutors. The results of these studies are used for quality enhancement trajectories. The studies are repeated periodically.

Q120-1 (General Comment): A regular cycle of individual assessments exists, based on certain competencies a public prosecutor should possess. The extent to which the public prosecutor possesses these competencies is assessed in performance and assessment reviews. Furthermore, each prosecutor has to obtain a certificate implying they are ‘fit for trial’, that they have the necessary skills to represent the public prosecution at trial.

Poland

Q066 (General Comment): The Ministry of Justice collects statistical data sent by common courts concerning their current activity, and also evaluates annual information on the activity of courts, prepared by presidents of courts of appeal about the activity of courts within the area of appeals, within the scope of tasks entrusted to them. In addition, the Minister of Justice convenes a meeting with presidents of courts of appeal at least once a year to discuss issues related to exercising supervision. Within the framework of that evaluation, a multifaceted analysis of collected statistical data is conducted, inter alia, an indicator of stability of jurisprudence, an indicator of control over the inflow of court cases or time of adjudication in incoming cases. However, no legal provision defines specific quality standards for individual indicators, concerning organisational quality and/or justice quality policy, to be formulated for the justice system as a whole.

Q066 (2024): There are no specific norms, but the evaluation system operates as part of internal and external administrative supervision in the form of:
- visits covering the full activity of the courts or individual court divisions, which are carried out as necessary at the order of the president of the court of appeal and the president of the regional court;
- vetting, covering selected issues in the administrative activity of a court or a division of a court upon the order of the president of a court of appeal and the president of a circuit court;
- within the framework of the general directions, made annually by the Minister of Justice, of internal administrative supervision performed by presidents of courts of appeal, in which indicators related to efficiency of common courts' activity may be defined, on the basis of which presidents of courts of appeal establish directions of internal administrative supervision performed by presidents of courts from the area of appeal. - within the framework of the annual evaluation by the Minister of Justice of the annual information submitted by presidents of courts of appeal on the activity of common courts within the area of appellate courts, which he accepts or refuses to accept, and within the framework of the control of performance of supervisory duties by presidents of courts of appeal. The results of the courts, presented in the annual information prepared by the presidents of appellate courts, are subjected to a thorough analysis in the Ministry of Justice by supervisory services. In relation to the courts with bad results, actions are taken within the scope of external administrative supervision of the Minister of Justice over the courts, aimed at ensuring the proper course of the courts in the adjudication of cases. If significant deficiencies in the administrative performance of a court are found, or if the president of an appellate court fails to carry out orders, the Minister of Justice may also order a vetting of the court or court division or a vetting of the supervisory performance of the court president. The Minister of Justice may also draw the attention of the president or vice-president of an appellate court in writing if he or she finds deficiencies in the management of the court, in the exercise of internal administrative supervision or in the performance of other administrative activities, and demand the rectification of its consequences.

Q066 (2023): There are no specific norms, but the evaluation system operates as part of internal and external administrative supervision in the form of:
- visits covering the full activity of the courts or individual court divisions, which are carried out as necessary at the order of the president of the court of appeal and the president of the regional court;
- vetting, covering selected issues in the administrative activity of a court or a division of a court upon the order of the president of a court of appeal and the president of a circuit court;
- within the framework of the general directions, made annually by the Minister of Justice, of internal administrative supervision performed by presidents of courts of appeal, in which indicators related to efficiency of common courts' activity may be defined, on the basis of which presidents of courts of appeal establish directions of internal administrative supervision performed by presidents of courts from the area of appeal. - within the framework of the annual evaluation by the Minister of Justice of the annual information submitted by presidents of courts of appeal on the activity of common courts within the area of appellate courts, which he accepts or refuses to accept, and within the framework of the control of performance of supervisory duties by presidents of courts of appeal. The results of the courts, presented in the annual information prepared by the presidents of appellate courts, are subjected to a thorough analysis in the Ministry of Justice by supervisory services. In relation to the courts with bad results, actions are taken within the scope of external administrative supervision of the Minister of Justice over the courts, aimed at ensuring the proper course of the courts in the adjudication of cases. If significant deficiencies in the administrative performance of a court are found, or if the president of an appellate court fails to carry out orders, the Minister of Justice may also order a vetting of the court or court division or a vetting of the supervisory performance of the court president. The Minister of Justice may also draw the attention of the president or vice-president of an appellate court in writing if he or she finds deficiencies in the management of the court, in the exercise of internal administrative supervision or in the performance of other administrative activities, and demand the rectification of its consequences.

Q066 (2016): The most important indicator comes from evaluation of judgements through second instance procedure. In this purpose “judgement stability” ratio are in use as a ratio o judgements reversed or annulled in procedure of appeal.

Q067 (General Comment): Inspection departments operate in the appellate and regional courts. The task of the judges working in these departments is to perform on behalf of the president of the court activities in the scope of supervision over the administrative activity of the courts in the area of the operation of a given appellate or district court. Supervision consists in taking actions to improve the office of the courts or increase the efficiency and level of work organization culture in the courts. For this purpose, visits of departments in courts or surveys of recognized cases of a given category are carried out, the secretariats of departments in the courts are controlled.
Activities in the scope of administrative supervision can not enter the field in which judges and assessors are independent.

Q067 (2023): There are no specialised units in all courts, but at the level of the Courts of Appeal and District Courts there are Visiting Magistrates' Departments where visiting magistrates specialised in a particular field are appointed to supervise cases on a permanent basis. The comments on visiting judges in paragraph 66 remain valid. A visiting judge in an appellate court is appointed by the president of the appellate court, and in a circuit court by the president of the circuit court, for a period of four years, from among judges with at least seven years' experience as a judge. Before appointing the visiting judge, the president of the relevant court consults the Minister of Justice.

Q070 (2024): other - timeliness of the awarding of fees to experts and translators, timeliness of the preparation of motivations, workload of judges and registrars.
The selection of question 70 in the questionnaire, ‘User satisfaction regarding court services,’ is based on monitoring the quality of customer service using satisfaction surveys conducted in common courts. Monitoring of service quality focuses mainly on assessing communication aspects of service, such as: assistance from court staff in handling cases, staff patience, clear and understandable communication between staff and users.
This information was collected in previous years.
As regards the data on ‘court costs’ in this question, data on the enforcement of court judgments in relation to fines, fees and court costs are monitored by the Ministry of Justice in NS1 reports for individual statistical periods. The data was collected in previous years.

Q070 (2023): * other - timeliness of the awarding of fees to experts and translators, timeliness of the preparation of motivations, workload of judges and registrars. Others - the data comes from the Department of Administrative Supervision and has also been used previously.
Q070 (2017): Supervision covers only the administrative activities of the courts. There are the internal supervision exercised by the presidents of the courts and the external supervision exercised by the Minister of Justice within the narrow scope specified in the law.
Q070 (2016): Supervision covers only the administrative activities of the courts. There are the internal supervision exercised by the presidents of the courts and the external supervision exercised by the Minister of Justice within the narrow scope specified in the law.
Q070-1 (2021): In 2021, following the implementation of the new central ICT system PROK-SYS, which provides for a modern reporting system, the possibility of obtaining data on a wide range of activities of all organisational units of the prosecution offices was created. The system provides a solution for generating types of reports on the costs of proceedings. This allows for daily supervision of the activities of the prosecution offices from every level, including the central level. Prior to 2021, data on the costs of proceedings were only collected locally.
Q072 (General Comment): Public Prosecution services
The issue of the duration of pre-trial proceedings is defined in the Code of Criminal Procedure, in Article 310 § 1 and § 2 and Article 325i § 1. Article 310 § 1 and § 2 states that the investigation shall be completed within 3 months. In justified cases the investigation period may be extended by a specified period of time by the public prosecutor supervising the investigation or the public prosecutor directly superior to the public prosecutor leading the investigation, but not longer than one year. In particularly justified cases a competent public prosecutor superior to the prosecutor supervising or leading the investigation may extend the investigation by a specified period of time.
Article 325i § 1 states that an investigation should be completed within 2 months. The prosecutor may extend this period to 3 months, and in particularly justified cases – to a longer specified period of time.
The authority empowered to order the extension of an investigation or an inquiry by a specified period of time shall monitor such proceedings with respect to their proper conduct in view of their possible length and shall assess the validity of the procedural steps taken or to be taken.
The request for the extension of an investigation or an inquiry must include the steps that need to be taken in the further course of the proceedings and indicate the reasons why they have not yet been taken.
Courts:
The presidents of the courts, in exercising internal administrative supervision over the administrative activity of the courts, control the taking of actions by judges within appropriate time limits; direct control is also exercised by the presidents of the divisions. Monitored also within the framework of management control and analysis of annual information on activities of courts operating within the area of appellate courts prepared by presidents of courts of appeal

Q072 (2024): ongoing monitoring of statistical data by court presidents regarding the duration of proceedings in specific categories of cases

Q072 (2021): * courts -The presidents of the courts, exercising internal administrative supervision over the administrative activity of the courts, control the taking of actions by the judges in due time; direct control is also exercised by the presidents of the divisions. Monitoring also takes place within the framework of the external administrative supervision of the Minister of Justice over the administrative activity of common courts within the framework of management control and analysis of annual information on the activity of courts operating on the territory of courts of appeal prepared by presidents of courts of appeal.
*prosecutors - In the course of pre-trial proceedings, the public prosecutor commissioning other bodies to carry out procedural actions or appointing experts to prepare an opinion shall each time set a deadline for their implementation. If the entrusted activities are not carried out in time, the prosecutor makes an enquiry as to the reasons for the delay and the deadline for carrying out the activities. The course of pre-trial proceedings is monitored both in terms of internal service supervision and external service supervision, in order to ensure their proper dynamics.
At the trial stage, if a hearing is postponed without a date being set, the prosecutor's office makes timely enquiries as to whether the reasons preventing it from being scheduled have ceased.

Q072 (2018): In the mode of external and internal administrative supervision over the administrative activity of courts by analyzing the results of the courts or departments and monitoring the efficiency of individual cases in the case of detected lengthiness.
Q083 (General Comment): In general there are not any quantitative performance targets defined for each judge but for certain cases the law imposes timeframe for performing specific action or handling specific matters. President of the court sets the performance target with using statistically calculated indicators of average performance that court and individual judge is expected to achieve.
Q083-1 (General Comment): .
Q083-1 (2016): For certain cases the law imposes timeframe for performing specific action or handling specific matters. President of court sets the performance target with using statistically calculated indicators of average performance that court and individual judge is expected to achieve.
Q083-3 (2024): If one were to consider that this question, is linked to question 83-2 on quantitative objectives, then the answer is NAP. Which is not to say that the efficiency of a prosecutor is not subject to any assessment by superiors. Indeed, it is the task of prosecutors exercising a managerial function to ensure the proper and efficient performance of official tasks in the units and organisational units entrusted to them, in particular to ensure the efficiency of the proceedings conducted by the prosecutors subordinate to them. Executives are therefore obliged to have knowledge of, inter alia, the number of proceedings conducted by their subordinate prosecutors, the number of proceedings completed by them, the number of protracted proceedings and to react to cases of, for example, protracted proceedings.

Which is not to say that the efficiency of a prosecutor is not subject to any assessment by superiors. Indeed, it is the task of prosecutors exercising a managerial function to ensure the proper and efficient performance of official tasks in the units and organisational units entrusted to them, in particular to ensure the efficiency of the proceedings conducted by the prosecutors subordinate to them. Executives are therefore obliged to have knowledge of, inter alia, the number of proceedings conducted by their subordinate prosecutors, the number of proceedings completed by them, the number of protracted proceedings and to react to cases of, for example, protracted proceedings.

Q083-3 (2020): Individual goals are set by prosecutors themselves in a way that enables them to carry out their duties effectively

Q083-3-1 (2024): *without disciplinary procedure:
- Warning by head of prosecution
In the event that the objectives of the criminal proceedings are not achieved or in the event that an obvious violation of the law is found in the conduct of the case, the superior public prosecutor shall, irrespective of his other powers, point out the misconduct to the public prosecutor who committed the misconduct, after requesting an explanation. The prosecutor to whom the misconduct has been pointed out may, within 7 days, submit a written objection to the superior prosecutor who pointed out the misconduct. If the public prosecutor does not agree with the infringement pointed out, he/she is entitled to appeal. If an objection is lodged, the superior public prosecutor who pointed out the misconduct shall either rescind the finding of misconduct or refer the case to the disciplinary court for consideration. The appeal procedure before the disciplinary court is then initiated.
- Temporary salary reduction
Without a disciplinary procedure, a salary reduction is not possible. A supervisor cannot decide on a pay cut alone.
- Reflected in the individual assessment The whistleblowing notice shall be reflected in the prosecutor's personnel file. A copy of the notice of reproof that has not been rescinded shall be attached to the prosecutor's personnel file.
- Other, please specify: _____
For minor disciplinary offences that do not justify the initiation of disciplinary proceedings, the public prosecutor in charge shall inflict on subordinate public prosecutors an orderly penalty of admonition.
A copy of the letter inflicted with an orderly penalty of admonishment shall be attached to the prosecutor's personal file. The public prosecutor to whom an admonishment by order penalty has been inflicted may, within 7 days from the date of service of the admonition, lodge an objection to the public prosecutor directly superior to the public prosecutor who inflicted the penalty.
*With disciplinary procedure:
-Warning by head of prosecution
With the application of the disciplinary procedure, the initial route is the same as described above. Except that once the appeal procedure is triggered, the course of action is as follows. If an objection is lodged, the superior prosecutor who pointed out the misconduct shall either rescind the pointing out of the misconduct or refer the case to the disciplinary court for consideration. The disciplinary court shall issue an order upholding the reproof of misconduct or revoking the reproof of misconduct and discontinuing the proceedings after hearing the disciplinary ombudsman and the public prosecutor to whom the misconduct was reproved, unless a hearing is not possible. The prosecutor to whom the misconduct has been pointed out is entitled to lodge a complaint against the decision refusing to consider the objection. The complaint shall be examined by the same disciplinary court in another equivalent composition.
- Temporary salary reduction
A prosecutor may be suspended for up to 6 months if the nature of the disciplinary offence makes it necessary to immediately remove him or her from the performance of duties. In the case of a valid authorisation to prosecute a public prosecutor, and also when a request for incapacitation has been submitted to the competent court, the disciplinary supervisor may suspend the public prosecutor from his/her duties until the proceedings are validly concluded. The decision on suspension may be appealed to the Disciplinary Court of the Prosecutor General. Where a public prosecutor has been suspended, the Disciplinary Court at the Prosecutor General, on the motion of the disciplinary superior, may reduce the amount of the public prosecutor's salary up to 50% for the duration of the suspension. The decision on the reduction of remuneration may be appealed against.
- Reflected in the individual assessment The whistleblowing notice shall be reflected in the prosecutor's personnel file. A copy of the notice of reproof that has not been rescinded shall be attached to the prosecutor's personnel file.
- Other, please specify: _____
A disciplinary penalty may be imposed on a prosecutor following a disciplinary procedure. The disciplinary penalties are: 1) admonishment; 2) reprimand; 2a) a 5% - 50% reduction in basic salary for a period of six months to two years; 2b) a pecuniary penalty in the amount of one month's basic salary payable for the month preceding the final conviction plus the prosecutor's long-term service allowance, function allowance and special allowance; 3) removal from the position held; 4) transfer to another official position;
5) expulsion from the prosecution service. In the event of an appeal procedure against a warning, disciplinary proceedings shall be initiated. If an objection is lodged, the superior prosecutor: 1) repeals the disciplinary penalty of admonishment and notifies the prosecutor of the acceptance of the objection, or 2) overturns the disciplinary penalty of admonishment and refers the case to the disciplinary ombudsman for investigation, or 3) overturns the punishment of a caution and refers the case through the disciplinary ombudsman to the disciplinary court for examination. After the lapse of 3 years from the date on which the orderly penalty of admonishment becomes final, the Prosecutor General or the competent regional or district prosecutor shall order the removal of the copy of the letter of admonishment from the prosecutor's personal file, if during this period no misconduct in the efficiency of the pre-trial proceedings, the management of the prosecution or the exercise of supervision resulting in the drawing of attention, no misconduct was pointed out or no disciplinary offence was found to have been committed. In such a case, only the simultaneous. Removal from the prosecutor's personal file of copies of all such letters and judgments. At the request of the prosecutor, the removal may take place after one year. The decision of the disciplinary court may be appealed to the disciplinary court of the second instance.

Q083-3-1 (2023): *without disciplinary procedure:

Portugal

Q066 (General Comment): Law on the organisation of the judicial system (Law 62/2013 of 26 August) sets out that the High Council for the Judiciary and the Prosecutor-General, in liaison with the member of Government responsible for the justice, establish, within their respective competences, the strategic objectives for first instance courts for a three year period. These entities are also responsible for setting, every year, the strategic objectives of first instance courts for the following judicial year Taking into account the results obtained in the previous year and the strategic objectives formulated for the subsequently year, the president of the court and the public prosecutor coordinator, after hearing the judiciary administrator, articulate proposals for the procedural objectives for each court. This system is very recent, is currently being implemented, subject to improvements, and only covers civil and commercial cases.

Q066 (2021): For instance, the Prosecutor General's Directives and Instructions define good practices of functional performance at national level and their compliance may be viewed an indicator of the quality of the work developed (example, Directive 5/2019, on acting in cases of domestic violence (https://dre.pt/home/-/dre/126870404/details/maximized - text in Portuguese).
In addition to Directives and Instructions, the performance assessment system for prosecutors is based on quality criteria/performance parameters, as a rule, uniformly applied at national level.

Q066 (2020): For instance, the Prosecutor General's Directives and Instructions define good practices of functional performance at national level and their compliance may be viewed an indicator of the quality of the work developed (example, Directive 5/2019, on acting in cases of domestic violence (https://dre.pt/home/-/dre/126870404/details/maximized - text in Portuguese).
In addition to Directives and Instructions, the performance assessment system for prosecutors is based on quality criteria/performance parameters, as a rule, uniformly applied at national level.

Q067 (2022): The High Council of the Public Prosecution Service has “inspectors” (“inspectores”) who assess the quality of the work carried out by the prosecutors, applying national quality criteria or standards.

Q067 (2021): The High Council of the Public Prosecution Service has “inspectors” (“inspectores”) who assess the quality of the work carried out by the prosecutors, applying national quality criteria or standards.

Q067 (2020): The High Council of the Public Prosecution Service has “inspectors” (“inspectores”) who assess the quality of the work carried out by the prosecutors, applying national quality criteria or standards.

Q070 (2022): Users satisfaction is monitored through surveys and indirectly by the consulting body of each court that includes members of the community. The appeal ratio is only monitored in the context of judges evaluation.

Q070 (2020): we included "satisfaction of users" because one of the tasks of the president judge of the court is to monitor and evaluate the activity of the court, in particular the quality of the justice service provided to citizens, taking into account particular complaints or responses to satisfaction questionnaires. "Article 94 of Law 62/2013, 26th August, on the judicial organization"

Q070 (2019): In this evaluation cycle we included "satisfaction of users" because one of the tasks of the president judge of the court is to monitor and evaluate the activity of the court, in particular the quality of the justice service provided to citizens, taking into account particular complaints or responses to satisfaction questionnaires. "Article 94 of Law 62/2013, 26th August, on the judicial organization"

Q070 (2017): Scheduling; delays of judges and sections.

Q070 (2016): Scheduling; delays of judges and sections.

Q070 (2015): Scheduling: time delays of judges and sections of the court.

Q070-1 (2020): We included “clearance rate” and “disposition time” because one of the tasks of the public prosecutor coordinator is to monitor and evaluate the activity of the public prosecutors services, including the efficiency of procedures. Article 101 of Law 62/2013, 26th August on judicial organization.

Q072 (General Comment): Through SITAF and CITIUS (case management systems for administrative and tax courts and judicial courts, respectevly) it is possible to check waiting times during judicial proceedings.
The Portuguese Code of Criminal Procedure establishes no binding timeframes for criminal investigations. At a national level, within the public prosecution services, there is only monitoring of the judicial proceedings time during on criminal investigations, with reference to this timeframe.
At a local level, some other proceedings (such as the initial intervention of public prosecutors on protection of adults with some incapacity, requesting accompanying measures – under the legal framework of the accompanied adult [Regime Jurídico do Maior Acompanhado]) are also monitored on time duration.

Q072 (2022): The waiting period is monitored in the quarterly monitoring of all judicial courts. The Court President reports to the council the number of cases that are waiting procedural movement for more then 1, 2, 3 or 4 months.

Q072 (2021): Because of the Covid-19 pandemic, the courts were asked for specific elements on the steps taken in the Courts. Also, the procedural laws (e.g. civil and criminal) provides that the registry shall send to the President of the Court, on a monthly base, information detailing the cases in which three months have elapsed since the expiration of the deadline set for the performance of the judge's own act.

Q072 (2018): Through SITAF and CITIUS (case management systems) it is possible to check waiting times during judicial proceedings.

Q083 (General Comment): Taking into account the results obtained in the previous year and the strategic objectives formulated for the following year, the president of the court and the coordinating prosecutor, after hearing the judicial administrator, articulate, for the following year, proposals for objectives of a procedural nature (management or administrative) for the district and for the courts of extended territorial jurisdiction, as well as for the Public Prosecution Offices located there, which have to be ratified respectively by the Judicial High Council and the Attorney General's Office.
The procedural objectives of the district shall refer, in particular, to the number of completed cases and the time of their duration, taking into account, among other factors, the nature of the process or the value of the case, considering the human resources and the means related to the functioning of the district and based, namely, on the established procedural reference values.
The procedural objectives of the district may not impose, limit or condition the decisions to be rendered in specific cases, either on the merits of the matter, or on the option for the procedural form understood as more appropriate.
The procedural objectives of the district must be reflected in the objectives established annually for judicial officers and be considered in the respective assessment.
The procedural objectives of the district must be considered in the evaluation criteria of the magistrates, defined by the respective Councils.

Q083-2 (General Comment): Yes for some District Prosecution's Office and No at a national level. At national level, only reference values are fixed for the purpose of placing prosecutors. Also at a national level, the fact that a prosecutor has finished more proceedings than those that he/she started is a general criterion of evaluation and compliance with general objectives, in the qualitative individual assessment of the public prosecutors' work.

Q083-3 (2020): The local hierarchically superior public prosecutor can set individual targets for each public prosecutor.
The High Council of the Public Prosecution Service only sets reference values for the purpose of placing prosecutors and establishing how many prosecutors are needed for a particular Public Prosecution Office.

Q120 (General Comment): The prosecutors are evaluated periodically in time lapses between 3 to 5 years. The evaluation is held by the Prosecutors Superior High Council and it evaluates the quality of the work held by all prosecutors. A higher ranked prosecutor does the evaluation and produces a report that is sanctioned by the Prosecutors Superior High Council.

Q120 (2024): The criteria are the following: capacity to exercise the profession, technical preparation and adaptation to the inspected service – article 11 of the evaluation regulations - https://www.ministeriopublico.pt/iframe/regulamento-de-inspecoes-do-ministerio-publico.
The authority competent for carrying out the assessment are the public prosecutors appointed by the Superior Council of the Public Prosecutor.
The assessment is used to: career progression and to check whether the prosecutor is able to perform duties in the court where he is placed.

Q120 (2023): The criteria are the following: capacity to exercise the profession, technical preparation and adaptation to the inspected service – article 11 of the evaluation regulations - https://www.ministeriopublico.pt/iframe/regulamento-de-inspecoes-do-ministerio-publico.
The authority competent for carrying out the assessment are the public prosecutors appointed by the Superior Council of the Public Prosecutor.
The assessment is used to: career progression and to check whether the prosecutor is able to perform duties in the court where he is placed.

Romania

Q066 (General Comment): There are no formal standards for quality established for the whole judiciary. However, informal standards are being used (such as training, quality of the reasoning, assessment of the activity of the judges, assessment of the good reputation of the judges etc.).
More precisely, the activity of courts is evaluated and monitored periodically, on the basis of certain statistical data/performance indicators, such as those presented at question 70. The evaluation is achieved by verifications carried out by inspectors of the Judicial Inspection of the SCM, by elaborating periodical reports. The schedule and thematic of those verifications are approved every year by the SCM.
At organizational level, there are no quality standards established for courts. It may be considered that such standards exist at individual level, for each judge, by the indicators for the evaluation of professional activity.

Q070 (2024): ECRIS - case management and STATIS - statistics monitoring application including for court's efficiency assessment •The ReJust Desktop App and the Notebook module implemented on the website www.rejust.ro are work tools aimed at the optimization of the management of cases. Their scope is the speedy resolution of cases, through automation and simplification of administrative tasks, the reduction of processing times and facilitating quick access to necessary information. These tools ensure a more efficient management of cases, a faster resolution thereof and an adequate monitoring, significantly contributing to the modernization and standardization of judicial activities. Furthermore, the App offers advanced IT solutions for reasoning repetitive cases, allowing the use of standardized templates for ensuring the speeding up of the case reasoning process.
•The portal registratura.rejust.ro is a work tool which facilitates the submission of claims, documents and the payment of the stamp duties. The objective of this tool is the digitalization and streamlining of judicial processes, ensuring the acceleration of case resolution, as well as costs reduction and the standardization of activities, offering a unitary and accessible platform for interested parties.

Q120 (2022): According to Article 87 of Law No 303/2022 -The individual professional evaluation of judges and prosecutors involves analysing and noting of the criteria and indicators for assessing the professional performance of judges and prosecutors, indicators which concern, in particular, the quality of the activity, the efficiency, the integrity and the obligation to continue vocational training, and in the case of judges and prosecutors appointed to senior positions, the manner of carrying out the managerial duties. (2) Professional evaluation of judges and prosecutors aims to establish the level of their professional competence and also to improve professional performance, increase the efficiency of the activity of courts and prosecutor’s offices and public trust in judicial authority, maintain and consolidate the of the quality of the judicial system

Q120-1 (2024): Legislation on the statute of judges and prosecutors was replaced by Law no. 303/2022
Frequency: from to 2 to 5 years depending on the seniority; According to Article 88 of Law No 303/2022 - (1) Considering the seniority in the position of judge or prosecutor, the assessment shall be carried out as follows: a) every 2 years, for judges and prosecutors with a seniority of between one and five years; b) every 3 years, for judges and prosecutors with a seniority of between 5 and 10 years; c) every 4 years, for judges and prosecutors with a seniority of between 10 and 15 years; d) every 5 years, for judges and prosecutors with a seniority of more than 15 years. (2) Judges of the High Court of Cassation and Justice shall not be subject to evaluation. (3) Professional evaluation may also be carried out whenever requested by the judge or prosecutor

Q120-1 (2023): Legislation on the statute of judges and prosecutors was replaced by Law no. 303/2022

Q120-1 (2022): Legislation on the statute of judges and prosecutors was replaced by Law no. 303/2022

Q120-1 (2020): According to the provisions of art. 39 of the Law no. 303/2004, amended and republished in 2018, judges and prosecutors are being periodically evaluated under the observance of the professional and performance criteria. The evaluation shall envisage the quality of their activity, efficiency, integrity as well as the fulfillment of the obligation to take part in in-service professional training and on managerial activity for those judges and prosecutors in leadership positions. The periodical evaluation shall be first carried out by the end of the first 2 years of activity after the entering in profession and shall be continued every 3/4/5 years depending on the seniority in profession (5-10 years, 10-15 years, over 15 years of seniority).

Q120-1 (2018): similar to judges, see Q114, 114.1 and the additional comments

Slovak Republic

Q066 (General Comment): Internal revision of the court is a type of control of the court and judges, which aims to check the current state of the judiciary, to identify the causes of shortcomings in the performance of the judiciary and to propose measures to eliminate them.

Q066 (2024): Internal revision

Internal revision of the court is a type of control of the court and judges, which aims to check the current state of the judiciary, to identify the causes of shortcomings in the performance of the judiciary and to propose measures to eliminate them.

Q066 (2023): Internal revision

Internal revision of the court is a type of control of the court and judges, which aims to check the current state of the judiciary, to identify the causes of shortcomings in the performance of the judiciary and to propose measures to eliminate them.

Q066 (2020): Internal revision of the court is a type of control of the court and judges, which aims to check the current state of the judiciary, to identify the causes of shortcomings in the performance of the judiciary and to propose measures to eliminate them.

Q066 (2014): There is a system to evaluate the overall functioning of courts with respect to the Manifesto of the Government of the Slovak Republic for the period of 2010-2014:
http://www.vlada.gov.sk/data/files/855_the-manifesto-of-the-governmentof-the-slovak-republic-for-the-period-of-2010-2014.pdf

Q067 (General Comment): Judicial Council, Council of Prosecutors and disciplinary commissions.

Q067 (2020): Judicial Council, Council of Prosecutors and disciplinary commissions.

Q067 (2019): Judicial Council, Council of Prosecutors and disciplinary commissions

Q070 (General Comment): The category “other” encompasses: the number of cases according to types of disputes, the results of the cases
(reconciliation, dismissals, full satisfaction, partial satisfaction, etc.).

Q070-1 (2024): The verification activity is carried out once a year, either randomly or based on a plan. It focuses on one subordinate prosecutor's office, either regional or district, in the non-criminal section.
The monitoring process focuses on all files from a specific period and reviews them thoroughly. This includes making sure the files are complete, and meet both procedural and legal standards

Q070-1 (2023): The verification activity is carried out once a year, either randomly or based on a plan. It focuses on one subordinate prosecutor's office, either regional or district, in the non-criminal section.
The monitoring process focuses on all files from a specific period and reviews them thoroughly. This includes making sure the files are complete, and meet both procedural and legal standards.

Q072 (2024): The prosecutor's office, as one of the parties to the legal proceedings, cannot fundamentally influence its length. However, prosecutors continuously monitor the status of criminal cases after the indictment has been filed and, in justified cases, communicate with the courts to determine the reasons for inaction or the current status of the case, usually by written requests.
The prosecutor, as a party to the proceedings, also has the authority in this regard arising from the legal regulation, namely to file a complaint for inaction pursuant to Section 55, paragraph 3 of the Criminal Procedure Code. Complaints for inaction under Section 55(3) of the Criminal Procedure Code were filed by prosecutors in a total of 186 cases in 2024.

Q072 (2023): If the prosecutor becomes involved in a specific procedure, receives a complaint about court inactivity, or becomes aware of such inactivity through other means, they must either highlight the inactivity within the proceedings or request the president of the court to take action to resolve it.

Q083-2 (2024): Quantitative performance goals for the prosecutor are not set, but in general, the prosecutor's office sets goals, for example, with a plan of main tasks, and it is monitored. The General Prosecutor as well as the leading prosecutors are responsible for setting these goals, and disciplinary action may be taken if they are not met.

Q083-2 (2023): Quantitative performance goals for the prosecutor are not set, but in general, the prosecutor's office sets goals, for example, with a plan of main tasks, and it is monitored. The General Prosecutor as well as the leading prosecutors are responsible for setting these goals, and disciplinary action may be taken if they are not met.

Q083-3 (2022): Prosecutors do not have quantitative performance targets within a certain period, but at the same time they have responsibility for their work, and therefore the hierarchically superior public prosecutor is responsible for observing the duties and goals of each prosecutor.

Q120 (2024): Evaluation of a prosecutor pursuant to Section 31 of Act No. 154/2001 Coll.

Q120-1 (2024): Evaluation of a prosecutor pursuant to Section 31 of Act No. 154/2001 Coll., which is conducted in connection with selection procedures, disciplinary proceedings, or at the prosecutor's request in relation to the termination of the prosecutor's service relationship.
The evaluation of a prosecutor is carried out by the head of the service office on the basis of documents prepared by the supervising prosecutor. In the case of a prosecutor who has been temporarily assigned to another prosecutor's office for a period exceeding six months, the head of the service office shall also request supporting documents from the supervising prosecutor of the office to which the prosecutor has been temporarily assigned.
The evaluation of a prosecutor includes, in particular, an assessment of:
a) the prosecutor's procedures and decision-making activities, focusing on the professional quality of decisions and the timeliness of proceedings;
b) the prosecutor's knowledge of generally binding legal regulations, internal service regulations, and the results of professional development;
c) compliance with service discipline.

Slovenia

Q066 (General Comment): The Supreme Court's Data warehouse, containing all court cases, as well as financial data and human resources data was implemented in 2011. The data are collected based on CEPEJ Guidelines on Judicial statistics (GOJUST). A special office at the Supreme Court with specialised knowledge was introduced in order to monitor the quality and define quality policies on the level of entire judiciary and individual courts. Quality standards based on SATURN guidelines are taken into account in several predefined BI system reports.
The important role in the determination of quality standards is played by the Supreme Court's „Opening of the judicial year" document, in which a set of priorities is determined. The priorities are subsequently monitored throughout the judicial year by automated BI tools and customised analysis at the Supreme Court.
The 2013 amendment to the Courts Act provides that the Supreme Court shall adopt the Criteria for quality of work for courts for the next (judicial) year, based on its Yearly report on efficiency and effectiveness of courts. Since 2015, the Supreme Court has been adopting the timeframes for different types of procedures as well as for different procedural phases for next year (as a part of the Criteria for quality of work).
As for public prosecution, the criteria for quality of work are defined in the Prosecution Policy (adopted by the Prosecutor General), while the quantitative aspects of work are defined in the Criteria for evaluating the performance of the state prosecutor's offices adopted by the State Prosecutorial Council.

Q066 (2015): The Supreme Court's Data warehouse, containing all court cases, as well as financial data and human resources data was implemented in 2011. The data are collected based on CEPEJ Guidelines on Judicial statistics (GOJUST). The system was awarded with Special mention in the 2012 Crystal Scales of Justice Competition and was defined as "Inspiring example" in the EC document Quality of Public Administration - A Toolbox for Practitioners - http://ec.europa.eu/social/main.jsp?catId=738&langId=sl&pubId=7757.

A special office at the Supreme Court with specialised knowledge was introduced in order to monitor the quality and define quality policies on the level of entire judiciary and individual courts.

Quality standards based on SATURN guidelines are taken into account in several predefined BI system reports.

The important role in the determination of quality standards is played by the Supreme Court's „Opening of the judicial year" document, in which a set of priorities is determined. The priorities are subsequently monitored throughout the judicial year by automated BI tools and customised analysis at the Supreme Court.

The 2013 amendment to the Courts Act provides that the Supreme Court shall adopt the Criteria for quality of work for courts for the next (judicial) year, based on its Yearly report on efficiency and effectiveness of courts. In 2015 the Supreme Court adopted the timeframes for different types of procedures as well as for different procedural phases for 2016 (as a part of the Criteria for quality of work).

Q066 (2014): 2014 A dedicated office at the Supreme Court with specialised knowledge was introduced in order to monitor the quality and define quality policies at the level of entire judiciary and individual courts level.
Quality standards based on SATURN guidelines are taken into account in several predefined BI system reports.
The recent amendment of the Courts Act provides that the Supreme Court shall adopt the Criteria for quality of work for courts for the next (judicial) year, based on its Yearly report on efficiency and effectiveness of courts. Since the amendment was adopted in the middle of 2013, the first Annual report of Supreme Court will be for 2014 (to be published in 2015). Consequently, only 2015 will be the (first) year to formally adopt the aforementioned Criteria.
The important role in the determination of quality standards is played by the Supreme Court`s „Opening of the judicial year" document, in which a set of priorities is determined. The priorities are subsequently monitored throughout the judicial year by automated BI tools and customised analysis at the Supreme Court.

Q067 (General Comment): The Office for Court Management Development at the Supreme Court promotes the improvement in leadership and management of courts and the increase in effectiveness and efficiency. It is responsible for the preparation of different reports and analysis regarding work of courts and the promotion of best practices.
The Department for the Organization and Development of Management of the Supreme State Prosecutor's Office of the Republic of Slovenia is responsible for monitoring the implementation of the Prosecution Policy and the Criteria for the Success of Prosecution of State Prosecutor's Offices.

Q070 (General Comment): In Slovenia there is a regular monitoring system in a form of collecting data on court statistics. Court statistics are collected and published four times a year by the Ministry of Justice. They include the data on the number of judges and court staff, number of incoming, resolved and pending cases, age of unresolved cases, length of proceedings, average time to resolve a case, type of decision, court backlogs, legal remedies and time to issue a court decision.
Besides that, the data on court activities are automatically on national level, thus statistical analysis are made possible. All courts have access to a wide range of special reports, generated in the Court management information system. Reports include detailed information on court activities (for example length of specific phases of a court proceeding, top 20 oldest cases in certain area of law, etc.), human resources, court performance indicators (the critical indicators are marked red for unsatisfactory performance and green when meeting the standards) that provide guidance to presidents and directors of courts. The business intelligence system that creates priority reports derives the data from the Data warehouse of the Supreme Court. The same source is used for Court statistics publications by the Ministry of Justice. Each court is able to access the above mentioned reports at any moment, while some data are quarterly collected and published on national level (as prescribed by the Court rules).
The satisfaction surveys are performed and results published bi-annually.

Q070 (2015): The data on court activities are automatically collected on national level, thus statistical analysis is made possible.

All courts have access to a wide range of special reports, generated in the Court management information system. Reports include detailed information on court activities (e.g. length of specific phases of a court proceeding, top 20 oldest cases per legal area etc.), human resources, court performance indicators (the critical indicators are marked red for unsatisfactory performance and green when meeting the standards) that provide guidance to presidents and directors of courts. These additional data available to court management officials are the reason, why we put check before “other elements”.

The business intelligence system that creates priority reports derives the data from the Data warehouse of the Supreme Court. The same source is used for Court statistics publications by the Ministry of Justice.

Each court is able to access the above mentioned reports at any moment, while some data are quarterly collected and published on national level (as prescribed by the Court rules).

Q070-1 (General Comment): The BI tools that use data gathered in information system of the State Prosecutor's Office provide the heads of prosecution offices with up-to-date overview of the performance of state prosecutors and the functioning of the office. Heads can customize the level and content of information presented to them for the purpose of making quantitative data supported decisions on allocation of work among prosecutors, control of the case-flow.

Q070-1 (2024): Other: percentage of different types of decisions, value of proceeds of crime under freezing order, pronounced criminal sanctions…
Q070-1 (2023): "other": percentage of different types of decisions, value of proceeds of crime under freezing order, pronounced criminal sanctions.
Q070-1 (2022): "other": percentage of different types of decisions, value of proceeds of crime under freezing order, pronounced criminal sanctions…
Q070-1 (2020): "Other": percentage of different types of decisions, value of proceeds of crime under freezing order, pronounced criminal sanctions…

Q072 (General Comment): In accordance with the Prosecution Policy adopted in 2017, cases in which a final court decision at first instance has not been adopted within 3 years of filing a written charge with the court, are monitored in particular.

Q083 (General Comment): Since 2016, the Criteria on the work abilities does not include standards for the minimal expected number of solved cases (however the number of resolved cases is still monitored).
Q083 (2018): Since 2016, the Criteria on the work abilities does not include standards for the minimal expected number of solved cases (however the number of resolved cases is still monitored).
Q083 (2016): Since 2016, the Criteria on the work abilities does not include standards for the minimal expected number of solved cases (however the number of resolved cases is still monitored).
Q083-1 (General Comment): See Q114.

Q083-2 (General Comment): .

Q083-3 (General Comment): .

Q120 (General Comment): On the proposal of the State Prosecutor General, State Prosecutorial Council adopts Criteria for the assessment of state prosecutors' performance. They define quality and quantity indicators. The quantitative criteria define expected time for the resolution of cases and for typical procedural acts. The performance of the evaluated prosecutor is compared to other prosecutors at his/her office concerning the number of assigned, resolved and unresolved cases, number of attendances at the court hearings, conviction rate, pronounced sanctions and number of logged appeals. Head of state prosecutor's office as competent authority for the matters od state prosecution administration can alert the public prosecutor to his duty to meet the targets.
Regular individual assessment of the public prosecutors' work is carried out every three years. The assessment can also be carried out on demand of the State Prosecutorial Council, head of prosecutor's office, Minister or the prosecutor himself. In first three years after the appointment for the state prosecutor the assessment is carried out every single year.

Q120-1 (General Comment): Regular individual assessment of the public prosecutors' work is carried out every three years. The assessment can also be carried out on demand of the State Prosecutorial Council, head of prosecutor's office, Minister or the prosecutor himself. In first three years after the appointment for the state prosecutor the assessment is carried out every single year.
Q120-1 (2024): Every year in the first three years of appointment, then every three years.

Q120-1 (2018): Every three years

Spain

Q066 (General Comment): The Judicial Statistics Section of the CGPJ General Council of the Judiciary publishes annually the document La justicia dato a dato, which focuses on the quality of justice, adding key indicators for the year. It is published in Spanish and English.
Justice 2030 is a common 10-year work plan, developed in co-governance, which represents the realisation of the Recovery, Transformation and Resilience Plan for the Public Justice Service. This plan includes various programme that includes the overall quality objectives of user-oriented justice and data-oriented, digitally accessible and sustainable justice.

Q066 (2024): In June 2024, the instrument "Policy on the Use of Artificial Intelligence in the Administration of Justice" was approved. Its objective is to improve the efficiency of the judicial system through the use of AI-based solutions, ensuring a responsible, legal, and ethical use of these technologies.
Q066 (2023): The Judicial Statistics Section of the CGPJ General Council of the Judiciary publishes annually the document La justicia dato a dato, which focuses on the quality of justice, adding key indicators for the year. It is published in Spanish and English.
Justice 2030 is a common 10-year work plan, developed in co-governance, which represents the realisation of the Recovery, Transformation and Resilience Plan for the Public Justice Service. This plan includes various programme that includes the overall quality objectives of user-oriented justice and data-oriented, digitally accessible and sustainable justice.

Q066 (2015): Every three months each Court sends statistics to the Council for the Judiciary with complete information about the activity of the Court.
Q067 (2015): Every three months each Court sends statistics to the Council for the Judiciary with complete information about the activity of the Court.
Q070 (General Comment): The category "other" encompasses: number of enforcement procedures, number of decisions appealed, number of rogatory letters issued, received and resolved, aid between courts, pending writings, form of termination of trials, etc.

Q070 (2024): In the current exercise the option "satisfaction of users" was not selected because none opinion poll about "The Perception of Justice Among Its Service Users" or similar was conducted by the General Council of the Judiciary, in 2024.

Q070 (2023): An example of monitoring user satisfaction is the opinion poll commissioned by the General Council of the Judiciary, entitled "The Perception of Justice Among Its Service Users", conducted in February 2023. The results are published on the website

Q070 (2017): The category “other” includes many other data such appeals, aid between courts, pending writings, etc.

Q070 (2016): The category “other” includes many other data such appeals, aid between courts, pending writings, enforcement proceedings, form of termination of trials, etc.

Q070-1 (General Comment): The inspection service of the Public Prosecutor Office

Q070-1 (2024): The Fiscal Inspection Service is an internal body within the Public Prosecutor, responsible for overseeing and monitoring compliance with the duties and obligations of prosecutors and the proper functioning of the prosecutor's offices

Q070-1 (2023): The Fiscal Inspection Service is an internal body within the Public Prosecutor, responsible for overseeing and monitoring compliance with the duties and obligations of prosecutors and the proper functioning of the prosecutor's offices

Q071 (General Comment): The CGPJ publishes quarterly territorial reports on the activity of judicial bodies and annual reports at state, High Court, provincial, and judicial district levels. For each specific territory and period, a wide range of indicators are provided for each type of body within the selected territorial scope: number of cases filed, resolved, and pending; number of final judgments, orders, and decrees; number of executions filed, resolved, and pending; resolution, backlog, congestion, and sentencing rates; evolution of key indicators compared to the same period of the previous year.
A set of indicators describe the situation of each jurisdiction and the system as a whole: resolution, backlog, congestion, and litigation rates; number of cases filed per judge; percentage of judgments handed down by career judges; number of judgments handed down per judge; estimated average durations at each instance. Each indicator is provided for the period and the same period of the year before. They are generated at state and High Court levels.

Q071 (2023): The CGPJ publishes quarterly territorial reports on the activity of judicial bodies and annual reports at state, High Court, provincial, and judicial district levels. For each specific territory and period, a wide range of indicators are provided for each type of body within the selected territorial scope: number of cases filed, resolved, and pending; number of final judgments, orders, and decrees; number of executions filed, resolved, and pending; resolution, backlog, congestion, and sentencing rates; evolution of key indicators compared to the same period of the previous year.

Belgium

Q066 (2021):
The College of Courts and Tribunals and its support service are working on the implementation of a quality system at the national level; there is no declination at the local level yet, but this project is in full evolution. Within the framework of the law of 14 February 2014 and the College's action plans (2018 and 2020), a quality system will be implemented in respect of judges. The intention is therefore to introduce an integrated framework of quality, internal control and (internal) audit models to replace the executive's existing ex ante control and monitoring systems.

Bulgaria

Q066 (General Comment): Supreme Judicial Council: According to the answers of SJC the competent bodies in these matters are:
The Inspectorate to the SJC:
- checks the organization of the initiation and movement of judicial, prosecutorial and investigative cases, as well as the closing of cases within the established terms and in case of violations, signals the administrative head of the relevant body of the judiciary and the relevant College of the Supreme Judicial Council
- sends signals, proposals and reports to other state bodies, including the competent bodies of the judiciary;
- examines applications against violation of the right to examine and resolve cases within reasonable time.
The Judges' College of the SJC:
- annually analyses and reports the degree of workload of the bodies of the judiciary;
- requests and summarizes every 6 months information from the courts about their activity;
- resolves questions about the organization of the activity of the relevant system of judicial authorities;
- adopts rules for the allocation of cases between the judges who consider cases allocated according to Art. 9, para. 3, in order to equalize their total workload;
- determines the number of judicial officers according to the degree of workload on the proposal of or after agreement with the administrative heads of the bodies of the judiciary, and may open new and lays off positions.
The Plenary of the SJC:
- on the proposal of one of the Colleges, after coordination with the administrative heads of the bodies of the judiciary, determines the number of judges, prosecutors and investigators in all courts, prosecutor's offices and investigative departments according to the degree of workload;
- hears and accepts the annual reports of the bodies of the judiciary under Art. 84, item 16 of the Constitution.
.....
According to the answers of The Prosecutor's office of the Republic of Bulgaria:
The legal regulation is in Art. 84, item 16 of the Constitution of the Republic of Bulgaria, according to which the Parliament hears and accepts the annual report of the Prosecutor General submitted by the SJC and Art. 30, para. 2, item 4 of the Judicial System Act, according to which the Plenum of the SJC hears and accepts this annual report.
Approved by the Prosecutor General/ chief prosecutor is the Directive on the control activity of the Prosecutor's Office, aimed at ensuring the exact and uniform application of the laws in the performance of the functional duties of the prosecutors and investigators. The Directive regulates the conditions, order and procedures for carrying out control activities through audits, checks and analyzes of the work of the prosecutor's offices, the National Investigation Service, as well as individual prosecutors and investigators, outside of the institutional and official verification of the legality of their acts.

Q066 (2024): The Inspectorate with the Supreme Judicial Council:
- checks the organization of the initiation and movement of judicial, prosecutorial and investigative cases, as well as the closing of cases within the established terms and in case of violations, signals the administrative head of the relevant body of the judiciary and the relevant College of the Supreme Judicial Council
- sends signals, proposals and reports to other state bodies, including the competent bodies of the judiciary;
- examines applications against violation of the right to examine and resolve cases within reasonable time.
The Judges' and Prosecutors' College of the SJC:
- annually analyses and reports the degree of workload of the bodies of the judiciary;
- requests and summarizes every 6 months information from the courts and prosecutor's offices about their activity;
- resolves questions about the organization of the activity of the relevant system of judicial authorities;
- adopts rules for the allocation of cases between the judges, prosecutors and investigators who consider cases allocated according to Art. 9, para. 3, in order to equalize their total workload;
- determines the number of judicial officers according to the degree of workload on the proposal of or after agreement with the administrative heads of the bodies of the judiciary, and may open new and lays off positions.
The Plenum of the SJC:
- on the proposal of one of the Colleges, after coordination with the administrative heads of the bodies of the judiciary, determines the number of judges, prosecutors and investigators in all courts, prosecutor's offices and investigative departments according to the degree of workload;
- hears and accepts the annual reports of the bodies of the judiciary under Art. 84, item 16 of the Constitution.

Q066 (2021): Please see the General Comments

Q066 (2020): Judiciary system Act:
Article. 198 (1) The criteria for the appraisal of a judge, prosecutor or an investigating magistrate shall be:
1. legal knowledge and skills of applying it;
2. skill of analysing legally relevant facts;
3. skill of making optimum working arrangements;
4. efficiency and discipline;
5. compliance with the rules of ethical behaviour.
(2) In the course of the appraisal under Paragraph (1) the following indicators shall be taken into account:
1. keeping deadlines;
2. number of instruments upheld and reversed and the grounds for this;
3. the results of inspections carried out by the Inspectorate with the Supreme Judicial Council,
4. the overall caseload of the respective judicial district and judicial authority, as well as the workload of the appraised judge, prosecutor or investigating magistrate compared to other judges, prosecutors or investigating magistrates in the same judicial authority.
(4) The time served by the judge, prosecutor or investigating magistrate as a permanent trainer at the National Institute of Justice shall also be included in the appraisal period. The evaluation of the work performance as a trainer shall be given by the Managing Board.
(5) The time served by the judge, prosecutor or investigating magistrate as an European Delegated Prosecutor shall also be included in the appraisal period. The evaluation of the results of their work under Regulation (EU) 2017/1939 shall become part of their appraisal.
Article. 199. (1) A judge shall be appraised under the following specific criteria:
1. complying with the schedule for conduct of court hearings;
2. skill of conducting a court hearing and drawing up a record of proceedings;
3. administrating cases and appeals, preparing for a court hearing;
4. number of appealed judicial instruments from among the appealable judicial instruments, appealed judicial instruments upheld, judicial instruments reversed or invalidated, in whole or in part, and the grounds for it; the ability to reason and justify judicial instruments and to analyse evidence shall be subject to evaluation.
(2) A prosecutor shall be appraised under the following specific criteria:
1. skills of planning and structuring steps in pre-trial and trial proceedings;
2. complying with the written instructions and orders of the superior prosecutor;
3. ability to make working arrangements and direct the investigating authorities and the teams participating in pre-trial proceedings;
4.number of unappealed prosecutorial instruments, including warrants to terminate and suspend criminal proceedings, number of final judicial instruments rendered on instruments submitted by the prosecutor appraised, as well as the final judicial instruments returning cases for the rectification of procedural breaches, and the reasons for this, number of appeals granted, the prosecutorial instruments upheld, modified and reversed upon an instance and ex officio review. Q066 (General Comment): Quality standards are applied in practice

Q066 (2024): Quality standards are applied in practice

Q066 (2017): Quality standards are applied in practice

Q066 (2016): There are no written standards but in practice there are quality stantards.

Q066 (2015): In practice there are quality stantards

Q066 (2014): In practice there are quality stantards

Denmark

Q066 (2019): No, we use quantitative measures. Quality is usually measured as length of time to finalize a case.

Q066 (2016): No, we use quantitative measures. Quality is measured as length of time to finalize a case.

Q066 (2015): The only standards are objective standards for example acceptable timeframes to finalize a case.

Estonia

Q066 (General Comment): Estonia has developed a quality system consisting of 3 parts. The first part contains the quality standards (good practice) for the management of the court that describe activities related to the chairman of the court. The second part contains the quality standards for the administration of courts and is focused on the different roles of the parties involved in the administration of courts: directors, Ministry of Justice, Council for the Administration of Courts. The third part contains quality standards for the court proceedings and is addressed to all the judges. All of the three parts of the quality standards have been discussed and approved by the Council for Administration of Courts, respectively in 2012, 2013 and 2015.

Finland

Q066 (General Comment): There are no quality standards covering the whole judiciary in Finland. Instead there are several quality projects going on, for example the Quality Project of the Administrative Courts, which started in 2020 and concerns all administrative courts in Finland. The Rovaniemi Court of Appeal Quality Projects have produced quality benchmarks, which evaluate the quality of the adjudication in courts of law. Last assessment was conducted in 2020.
The speed and consistency of prosecutors' work are monitored through statistics and by their supervisors. Additionally, special quality work is carried out, which defines quality matters.

Q066 (2021): Prosecution Services' system quality improvement project is underway.

Q066 (2020): Prosecution Services' system quality improvement project is underway.

Q066 (2015): There is a Quality Project of the courts in the jurisdiction of the Court of Appeal of Rovaniemi. (The jurisdiction of the Court of Appeal of Rovaniemi is the northernmost of the six appellate jurisdictions in Finland.) In 1999, the courts in the jurisdiction of the Court of Appeal of Rovaniemi launched a project for improvement of quality in adjudication. The quality project covers both civil cases and criminal cases. The objective of the quality project is to develop the functioning of the courts further and further so that the proceedings meet the criteria of a fair trial, that the decisions are well reasoned and justified, and that the services of the courts are affordable to the individual customers. The main working method consists of systematic discussions among the judges and also between the judges and stakeholders. The development work is steered by the development committee of the quality project. Normally four working groups for quality are set up for each year. The membership consists of judges from each of the District Courts in the appellate jurisdiction, members of the Court of Appeal, and referendaries of the Court of Appeal. Also prosecutors, private attorneys, public legal aid attorneys and heads of pre-trial investigation may serve as members in the working groups for quality. Each working group for quality is tasked to deal with one of the development themes which have been selected. The reports of the working groups are presented at the Quality Conference, they are discussed, and quality objectives based on the reports are set for the following year. The Report of Quality, containing the final reports, is published every year.

There is also a quality project of the courts in the jurisdiction of the Court of Appeal of Helsinki. Quality Project consists of working methods of two kind: cooperation with the University of Helsinki and working groups. Working groups for quality are set up for each year. The membership consists of judges from District Courts, members of the Court of Appeal, referendaries of the Court of Appeal, prosecutors and lawyers. Each working group for quality is tasked to address to one of the development themes which have been selected. The reports of the working groups are presented at the conference called 'Day of Jurisdiction'.

In addition there is a cooperation project between administrative courts. Some topics of the project have related to the quality standards. The reports of the project have discussed the matters like the factors of quality at administrative courts and the collection of information on quality.

It is also worth mentioning that on 15 October 2009, the presidents of Finnish Courts of Appeal proposed that the Finnish Association of Judges should begin work on drafting ethical guidelines for judges. A working group was set and the draft on ethical principles was discussed widely. The principles were formally released at the Judge Day event held in Helsinki on 12 October 2012.

France

Q066 (General Comment): Concerning the civil and criminal justice:
Quality standards developed for public administration are used in the judicial system. The charter of the administrations thus sets the rules for the reception of litigants in all courts and can lead to certification. There are also local initiatives aimed at setting up a "quality system" based on certification by an external body, which consists in establishing procedures describing the reception process, the organisation of work and the management of a case.

As part of the rollout of the national "Public Services +" program (an interministerial program for the continuous improvement of public services aimed at offering users services that are closer, simpler, and more efficient), particular efforts are being made to monitor timelines for civil cases resolved in less than 12 months. This is part of a broader program that improves the quality of reception, information, and communication with litigants. The various SP+ commitments are subject to specific quality management processes, and their effects are partly assessed through annual satisfaction surveys conducted in the courts. Furthermore, good initiatives from the Ministry of Justice services and civil and criminal courts are cataloged and classified to be shared and replicated. Across the country, the creativity of staff members contributes to improving the quality of service provided to litigants. Because these best practices should benefit the largest number, they are now incorporated into a searchable database accessible to all agents. This allows field actors to find sources of inspiration and tools to develop new systems to improve our justice system. It also allows these same actors to share with everyone a best practice they have implemented. The tools necessary for their deployment are also made available, and reviews of certain practices have been conducted since 2024 to assess their implementation and impact on beneficiaries.
As regards administrative justice: following an experimental phase, the drafting of litigious decisions in direct style within the administrative courts was generalised, as of January 1, 2019, through a joint note from the President of the Litigation Section and the President of the Administrative Courts Inspection Mission. In this regard, a vade-mecum on drafting decisions by the administrative courts was developed by a working group chaired by President Stirn and distributed.
The framework letters sent to each court by the General Secretariat of the Council of State reiterate the general objectives outlined in the documents accompanying the finance law regarding promptness and quality: target average judgment deadlines, proportion of cases older than 24 months (which should not exceed 8.5% of the overall caseload across all courts and 4.5% for administrative appeal courts), and the rate of annulment or modification of judgments by the courts or of decisions by the Council of state not exceeding 15%.

Q066 (2023): Following an experimental phase, the direct style of drafting of decisions in litigious matters rendered within the administrative court has been generalized, as of January 1, 2019, by a joint note from the president of the Litigation Section and the president of the Inspection Mission of the Administrative Courts. With this in mind, a vade-mecum on the drafting of decisions of the administrative court had been drawn up by a working group chaired by President Stirn and distributed.
The framework letters sent to each court by the General Secretariat of the Council of State recall the general objectives set out in the documents accompanying the Finance Act in terms of speed and quality: target average delivery time, proportion of cases of more than 24 months (must not exceed 8.5% of the overall backlog of all courts and 4.5% of the overall backlog for administrative courts of appeal) and rate of annulment-reversal of judgments of the tribunals by the courts or judgments of the courts by the judge of cassation not exceeding 15%.

Q066 (2022): Recently, at the initiative of the Minister of Justice, good practices from the different departments of the ministry of Justice and courts have been listed and classified so that they could be shared and replicated. Across the country, the creativity of staff is helping to improve the quality of service provided to litigants. Because these best practices should be of benefit to as many people as possible, they are now included in a search tool accessible to all staff. For those working in the field, the aim is to provide a source of inspiration and tools for developing new systems to improve the justice system. It is also a way for them to share the best practices they have implemented. The tools needed for their deployment are also made available to them.

Q066 (2021): Quality standards developed for public administration are used in the judicial system. The charter of the administrations thus sets the rules for the reception of litigants in all courts and can lead to certification. There are also local initiatives aimed at setting up a "quality system" based on certification by an external body, which consists in establishing procedures describing the reception process, the organisation of work and the management of a case.
Source DSJ

Q066 (2020): "If yes, please specify: Quality standards developed for public administration are used in the judicial system. The charter of the administrations thus sets the rules for the reception of litigants in all the courts and can lead to certification. There are also local initiatives aimed at setting up a "quality system" based on certification by an external body, which consist in establishing procedures describing the reception process, the organization of work and the management of a case.
With regard to administrative justice: the rate of annulment and reversal of jurisdictional decisions must be kept below 15% and the stock of cases older than two years below 7.5% of the total stock."

Q066 (2019):
Quality standards developed for public administration are used in the judicial system. The charter of administrations thus sets out the rules for the reception of litigants in all courts and may give rise to certification. There are also local initiatives to set up a "quality system" based on certification by an external body, which consists of establishing procedures describing the process of reception, work organisation and management of a case.
Administrative justice: the rate of annulment of court decisions must be kept below 15% and the number of cases pending for more than two years.

Q066 (2016): Quality standards developed for public administration are used in the judicial system. The charter of the administrations determines the rules for the reception of litigants in all courts and may give rise to certification. There are also local initiatives aimed at setting up a "quality system" based on certification by an external body, which consists in establishing procedures describing the process of reception, organisation of work and management of a case.

Germany

Q066 (2024): Due to judicial independence, there are no national level quality standards.

Q066 (2023): Due to judicial independence, there are no national level quality standards.

Q066 (2022): Due to judicial independence, there are no national level quality standards.

Greece

Q066 (General Comment): Law 4938/2022, article 102 par.4 subsection, includes among other evaluation elements the quality of the judges' work with the additional consideration of any successful appeal or cassation against their decisions. The inspector examines, among other things, the quality of their work, i.e. the processing of the legal and factual part of each case and takes into account the cassation or appeal of the decisions drawn up by the inspectors upon admission of the respective legal remedy during the inspected period as well as the wording of the judicial decisions. Article 104 refers to plenary of the Supreme Courts issuing directions in conjunction with Article 102 which refers to assessment criteria. From the combination of articles 104 and 102 and 100, 101, 102, 104 of Law 4938/22, the following innovations regarding the inspection system result: a) the drafting of an evaluation report on the operation of each court and prosecutor's office (not foreseen before) b) the drafting of an evaluation report of the directors, the courts and the prosecutor's offices (not foreseen before) c) the drafting of an evaluation report of the presidents and the presiding departments and judicial formations of each court and prosecutor's office d) for the inspection of the judges, they take into account the available statistical data.
The two-year term of the inspectors is expected to significantly upgrade the evaluation system, because it will provide the possibility of controlling the judicial work over a longer period of time, especially for the crowded judicial formations.
There is a system for inspecting the quantitative and qualitative performance of judicial officials (law 4938/2022) and decisions of the Administrative Plenary of the Council of State regarding the framework of instructions, practices and guidelines for the evaluation of the Council of State's Associate Councillors and Rapporteurs, as well as judges of the administrative courts. A Charter of Ethics for judges of the Council of State has also been approved. (Council of State).
With the 19/2023 decision of the Council of State in Plenary and the Council, a framework of guidelines, instructions and practices for the inspection of ordinary administrative courts, their directors and other judges was formulated on the basis of article 104 of the Code of the Organization of Courts (Law 4938/22). {General Commission of the State for ordinary administrative courts}.
Decision 7/23 of Areios Pagos in Plenary and the Council.

Q066 (2024): -With the 19/2023 decision of the Council of State in Plenary and the Council, a framework of guidelines, instructions and practices for the inspection of ordinary administrative courts, their head of administration and other judges was formulated on the basis of article 104 of the Code of the Organization of Courts (Law 4938/22).
-The Plenary Session of the Council of State has issued guidelines to the judges serving in it for the better drafting of decisions. Specifically, for the rapporteurs, it has provided concrete recommendations on how to write their reports. Moreover, the Plenary Session has approved a document analyzing the elements taken into account when evaluating the judges.

Q066 (2023): There is a system for inspecting the quantitative and qualitative performance of judicial officials (law 4938/2022) and decisions of the Administrative Plenary of the Council of State regarding the framework of instructions, practices and guidelines for the evaluation of the Council of State's Associate Councillors and Rapporteurs, as well as judges of the administrative courts. A Charter of Ethics for judges of the Council of State has also been approved. (Council of State).
With the 19/2023 decision of the Council of State in Plenary and the Council, a framework of guidelines, instructions and practices for the inspection of ordinary administrative courts, their directors and other judges was formulated on the basis of article 104 of the Code of the Organization of Courts (Law 4938/22). {General Commission of the State for ordinary administrative courts}.
Decision 7/23 of Areios Pagos in Plenary and the Council.
-Article 104 of the Code of the Organization of Courts (Law 4938/22).

Q066 (2022): According to Law 4938/2022 (art.104) of the organization of court and tribunals code.

Q066 (2021): Most of the measures taken recently in greece aim at speeding up administrative justice. However, the law provides a set of quality criteria that must be taken into account when inspectors check the performance of each judge.

Q066 (2017): Most of the measures taken recently in Greece aim at speeding up Justice. However the Law provides a set of quality criteria that must be taken into account when inspectors check the performance of each judge.

Hungary

Q066 (General Comment): Second instance courts have to prepare a note on the decision and the trial procedure of the first instance court, based on professional criteria in every case. In this note, the court of appeal has to examine: the application of substantive, procedural and administrative regulations; the preparation of the hearings; the quality of the judges trial leading practice; if the coercive measures were well founded; if the hearings were set timely; if the ruling was transcribed in time; if the decision was edited correctly. The conclusions are summarized and judges of first instance courts are informed about them at least once a year.
Furthermore, the departments of the Supreme Court (Kúria) responsible for examining the judicial practice evaluates the practice of the courts and regularly inform judges about their experience.

Q066 (2024): The president of the panel of the regional courts and regional courts of appeal, in connection with the case reviewed by the panel, shall prepare a note on the decision and the trial of the first-instance court, based on professional criteria in every case. The judge or panel that proceeded in the case may access the note directly in the system.

Ireland

Q066 (2023): Following on from the Commission on the Future of Policing in Ireland Report in 2021, and the subsequent work of the High Level Review Group, the establishment of a Quality Assurance Unit, within the ODPP, was agreed in 2023. It is anticipated that this Unit will be formally established in September 2024.

Q066 (2021): With effect from October 1 2022, a statutory system providing for investigation and adjudication of complaints in relation to judicial conduct has been commenced pursuant to Judicial Council Act 2019.

Italy

Q066 (General Comment): In Italy there is not a strict quality system as such. However, there is a regular monitoring system in place which tracks the performance of court activities.

Latvia

Q066 (General Comment): For judges: The reply is partly “yes” because according to the Law on Judicial Power Section 27.1., a Chief Judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (standard of time periods for adjudication of matters) prior to the beginning of each calendar year, in co-operation with court judges. This standard shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and other basic principles related to the guarantee of fair trial. A Chief Judge of a court shall approve the standard and supervise the actual time periods of examining matters in a court. He/she shall submit information to the Board of Justice regarding the approved standard until 1 February of each year. Implementing the task of the working group for strengthening judicial efficiency established by Judicial Council, Division of Case-law and Research of the Supreme Court has developed guidelines for writing court judgments in both civil cases and administrative cases for courts of first instance and appeal instance. Within the framework of the project, twelve judges of the first and appeal instances were interviewed about the experience of writing court judgments in civil cases and also four judges of the administrative court of the first and appeal instance were interviewed in the administrative courts, and the courts were also asked to select and send good and critical examples of writing court judgments.
For prosecutors: On 6th February 2023 Council of the Prosecutor General adopted a decision “On measures for the implementation of the quality management system in the Prosecution Office in 2023-2027”.
In January 15, 2020 the “Visitors service standards of the district (city) courts and regional courts” were approved. This document summarizes the general principles related to functions such as judicial reception and providing with information. The standards help court staff to raise their professionalism and understand the court visitors servicing values.

Q066 (2024): For judges: The reply is partly "yes" because, according to the Law on Judicial Power, Section 27.1, a Chief Judge of a court shall plan and determine the objectives of the court's work in relation to average time periods for adjudication of matters in court (standard time periods for adjudication of matters) prior to the beginning of each calendar year, in co-operation with the court judges. This standard shall be determined by taking into account the court's resources and the necessity to ensure the right of a person to the adjudication of a matter in a reasonable time period, as well as other basic principles related to the guarantee of a fair trial. A Chief Judge of a court shall approve the standard and supervise the actual time periods for examining matters in court. He/she shall submit information to the Board of Justice regarding the approved standard by 1 February of each year.
Implementing the task of the working group for strengthening judicial efficiency established by the Judicial Council, the Division of Case-law and Research of the Supreme Court has developed guidelines for writing court judgments in both civil cases and administrative cases for courts of first instance and appeal instances. Within the framework of the project, twelve judges of the first and appeal instances were interviewed about their experience of writing court judgments in civil cases, and also four judges of the administrative courts of the first and appeal instances were interviewed in the administrative courts. The courts were also asked to select and send good and critical examples of writing court judgments.
In 2024, courts also began using a new model to balance court and judge workloads – “Case Weighting”. A new tool has been introduced to modernize court administration, aimed at helping determine case complexity, assess statistics, performance indicators, and case distribution. The model evaluates the complexity of each case received by the court using a point-based system.
To determine the weight of a case, all cases are classified into 42 groups based on types of proceedings and sub-branches of law. Taking all of this into account, the case weight is determined for distribution purposes, as well as for calculating judge and court workload indicators. The implementation of this model enables a more equitable distribution of workload among courts and judges, helps better plan case review timelines, and allows for evaluation of implemented reforms. It is important to note that active work is still ongoing to implement and utilize this case weighting model in courts.
On 6th February 2023 Council of the Prosecutor General adopted a decision “On measures for the implementation of the quality management system in the Prosecution Office in 2023-2027”. In 2024 several internal documents were adopted to implement the quality management system. This system covers administrative and management processes of the PO, including support tasks provided by the non-prosecutor stuff such as case preparation, assistance during the hearings, helping to draft the decisions.

Q066 (2023): For judges: The reply is partly “yes” because according to the Law on Judicial Power Section 27.1., a Chief Judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (standard of time periods for adjudication of matters) prior to the beginning of each calendar year, in co-operation with court judges. This standard shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and other basic principles related to the guarantee of fair trial. Q066 (2021): Partly yes, according to the Law on Judicial Power Section 27.1. chief judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (the standard of time periods for adjudication of matters) prior to the beginning of each calendar year in co-operation with court judges. The standard of time periods for adjudication of matters shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and in conformity with other basic principles for examination of matters. A Chief Judge of a court shall approve the standard of time periods for adjudication of matters in a court and supervise the actual time periods of examining matters in a court. A Chief Judge of a court shall submit information to the Board of Justice regarding the approved standard of time periods for adjudication of matters until 1 February of each year.

Q066 (2020): Partly yes, according to the Law on Judicial Power Section 27.1. the Court President before the beginning of each calendar year,shall plan and determine the objectives of the court work in relation to average time periods for the examination of cases in a court (the standard of time periods for the examination of cases) in cooperation with court judges. The standard of time periods for the examination of cases shall be determined by taking into account the court resources and the necessity to ensure the right of a person to the examination of a case in a reasonable time period and in conformity with other basic principles for the examination of cases. The Court President shall submit the standard case examination time limits for approval to the Judicial Council until 1 February of each year.

Q066 (2019): In January 15, 2020 the “Visitors service standards of the district (city) and regional court" is adopted. This document
defines the procedure by which the employee of the district (city) and regional court shall ensure the servicing of the court visitor, the
participant in the proceedings, its representative (hereinafter - customer) (the acceptance of the client, the provision of information and
communication in person, by telephone and by electronic means) and basic customer service values, general principles and basic rules
for customer service.

Q066 (2017): According to the Law on Judicial Power Art 27.1. chief judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (the standard of time periods for adjudication of matters) prior to the beginning of each calendar year in co-operation with court judges. The standard of time periods for adjudication of matters shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and in conformity with other basic principles for examination of matters. A Chief Judge of a court shall approve the standard of time periods for adjudication of matters in a court and supervise the actual time periods of examining matters in a court. A Chief Judge of a court shall submit information to the Board of Justice regarding the approved standard of time periods for adjudication of matters until 1 February of each year. First standarts of time periods for adjudication of matters were submitted to the Board of Justice in 2014.

Q066 (2016): Partly yes, according to the Law on Judicial Power Section 27.1. chief judge of a court shall plan and determine the objectives of the court work in relation to average time periods for adjudication of matters in a court (the standard of time periods for adjudication of matters) prior to the beginning of each calendar year in co-operation with court judges. The standard of time periods for adjudication of matters shall be determined, taking into account the court resources and the necessity to ensure the right of a person to adjudication of a matter in a reasonable time period and in conformity with other basic principles for examination of matters. A Chief Judge of a court shall approve the standard of time periods for adjudication of matters in a court and supervise the actual time periods of examining matters in a court. A Chief Judge of a court shall submit information to the Board of Justice regarding the approved standard of time periods for adjudication of matters until 1 February of each year.
First standarts of time periods for adjudication of matters were submitted to the Board of Justice in 2014.

Q066 (2015): Since 2008 courts apply 'The visitors service standards of the district (city) courts and regional courts'. This courts visitor's service standard summarizes the general principles of judicial reception and providing with information. Standard helps court staff to raise their professionalism and understand the court visitors servicing values.
On 2015 May 18 Council of Justice approved guidelines on communication of the court system. The aim of the guidelines is to promote the effective functioning of the judiciary and promte the public confidence in the judiciary, creating a positive Court' s image and enhance its' authority in society.

Q066 (2014): In 2014, for the first time, standards of time periods for adjudication of matters were submitted to the Board of Justice.

Malta

Q066 (General Comment): There exists a Code of Ethics for the members of the Judiciary which, though not providing for the organisation and quality of the judicial work, does lay upon the members of the Judiciary certain obligations which are important in ensuring the transparency and independence of the judicial process.

Q066 (2017): There exists a Code of Ethics for the members of the Judiciary which, though not providing for the organisation and quality of the judicial work, does lay upon the members of the Judiciary certain obligations which are important in ensuring the transparency and independence of the judicial process.

Q066 (2016): There exists a Code of Ethics for the Judiciary which, though not providing for the organisation and quality of judicial work, does lay upon the members of the Judiciary, certain obligations which are important in ensuring the transparency and independence of the judicial process.

Netherlands

Q066 (General Comment): Quality standards determined for the judicial system at national level in the Netherlands:
1.Legal remedies e.g. public hearing, public ruling, publication of judgements, appeal
2.Quality indicators e.g. appeal rates, processing times, complaints
3.Quality standards – the professional standards (including professional development, reflection and feedback) These standards are publicly available on the website of the Judiciary. See https://www.rechtspraak.nl/Organisatie-en-contact/Rechtspraak-in-Nederland/Rechters/Paginas/De-professionele-standaarden-van-de-rechters.aspx
4.Quality measurement instruments Judiciary: customer survey, employee survey, independent review
The quality system for the judiciary is published on: https://www.rechtspraak.nl/Organisatie-en-contact/Organisatie/Raad-voor-de-rechtspraak/Kwaliteit-van-de-rechtspraak

Q066 (2019): There is a so-called Team Judicial Quality (Team Juridische Kwaliteit), which studies topics in a theme-wise manner. This is part of the program 'Programma OM Strafvordering 2020'. A team of public prosecutors participates in TKJ and assesses the judicial work of colleagues in a structured and systematic way. There is often a first assessment (baseline) and a first follow-up assessment, and sometimes even a second follow-up. If necessary, the assessment framework is adjusted.

Poland

Q066 (General Comment): The Ministry of Justice collects statistical data sent by common courts concerning their current activity, and also evaluates annual information on the activity of courts, prepared by presidents of courts of appeal about the activity of courts within the area of appeals, within the scope of tasks entrusted to them. In addition, the Minister of Justice convenes a meeting with presidents of courts of appeal at least once a year to discuss issues related to exercising supervision. Within the framework of that evaluation, a multifaceted analysis of collected statistical data is conducted, inter alia, an indicator of stability of jurisprudence, an indicator of control over the inflow of court cases or time of adjudication in incoming cases. However, no legal provision defines specific quality standards for individual indicators, concerning organisational quality and/or justice quality policy, to be formulated for the justice system as a whole.

Q066 (2024): There are no specific norms, but the evaluation system operates as part of internal and external administrative supervision in the form of:
- visits covering the full activity of the courts or individual court divisions, which are carried out as necessary at the order of the president of the court of appeal and the president of the regional court;
- vetting, covering selected issues in the administrative activity of a court or a division of a court upon the order of the president of a court of appeal and the president of a circuit court;
- within the framework of the general directions, made annually by the Minister of Justice, of internal administrative supervision performed by presidents of courts of appeal, in which indicators related to efficiency of common courts' activity may be defined, on the basis of which presidents of courts of appeal establish directions of internal administrative supervision performed by presidents of courts from the area of appeal. - within the framework of the annual evaluation by the Minister of Justice of the annual information submitted by presidents of courts of appeal on the activity of common courts within the area of appellate courts, which he accepts or refuses to accept, and within the framework of the control of performance of supervisory duties by presidents of courts of appeal. The results of the courts, presented in the annual information prepared by the presidents of appellate courts, are subjected to a thorough analysis in the Ministry of Justice by supervisory services. In relation to the courts with bad results, actions are taken within the scope of external administrative supervision of the Minister of Justice over the courts, aimed at ensuring the proper course of the courts in the adjudication of cases. If significant deficiencies in the administrative performance of a court are found, or if the president of an appellate court fails to carry out orders, the Minister of Justice may also order a vetting of the court or court division or a vetting of the supervisory performance of the court president. The Minister of Justice may also draw the attention of the president or vice-president of an appellate court in writing if he or she finds deficiencies in the management of the court, in the exercise of internal administrative supervision or in the performance of other administrative activities, and demand the rectification of its consequences.□

Q066 (2023): There are no specific norms, but the evaluation system operates as part of internal and external administrative supervision in the form of:
- visits covering the full activity of the courts or individual court divisions, which are carried out as necessary at the order of the president of the court of appeal and the president of the regional court;
- vetting, covering selected issues in the administrative activity of a court or a division of a court upon the order of the president of a court of appeal and the president of a circuit court;
- within the framework of the general directions, made annually by the Minister of Justice, of internal administrative supervision performed by presidents of courts of appeal, in which indicators related to efficiency of common courts' activity may be defined, on the basis of which presidents of courts of appeal establish directions of internal administrative supervision performed by presidents of courts from the area of appeal. - within the framework of the annual evaluation by the Minister of Justice of the annual information submitted by presidents of courts of appeal on the activity of common courts within the area of appellate courts, which he accepts or refuses to accept, and within the framework of the control of performance of supervisory duties by presidents of courts of appeal. The results of the courts, presented in the annual information prepared by the presidents of appellate courts, are subjected to a thorough analysis in the Ministry of Justice by supervisory services. The Minister of Justice may also draw the attention of the president or vice-president of an appellate court in writing if he or she finds deficiencies in the management of the court, in the exercise of internal administrative supervision or in the performance of other administrative activities, and demand the rectification of its consequences.□

Q066 (2016): The most important indicator comes from evaluation of judgements through second instance procedure. In this purpose “judgement stability” ratio are in use as a ratio o judgements reversed or annulled in procedure of appeal.

Portugal

Q066 (General Comment): Law on the organisation of the judicial system (Law 62/2013 of 26 August) sets out that the High Council for the Judiciary and the Prosecutor-General, in liaison with the member of Government responsible for the justice, establish, within their respective competences, the strategic objectives for first instance courts for a three year period. These entities are also responsible for setting, every year, the strategic objectives of first instance courts for the following judicial year Taking into account the results obtained in the previous year and the strategic objectives formulated for the subsequently year, the president of the court and the public prosecutor coordinator, after hearing the judiciary administrator, articulate proposals for the procedural objectives for each court. This system is very recent, is currently being implemented, subject to improvements, and only covers civil and commercial cases.

Q066 (2021): For instance, the Prosecutor General's Directives and Instructions define good practices of functional performance at national level and their compliance may be viewed an indicator of the quality of the work developed (example, Directive 5/2019, on acting in cases of domestic violence (https://dre.pt/home/-/dre/126870404/details/maximized - text in Portuguese).
In addition to Directives and Instructions, the performance assessment system for prosecutors is based on quality criteria/performance parameters, as a rule, uniformly applied at national level.

Q066 (2020): For instance, the Prosecutor General's Directives and Instructions define good practices of functional performance at national level and their compliance may be viewed an indicator of the quality of the work developed (example, Directive 5/2019, on acting in cases of domestic violence (https://dre.pt/home/-/dre/126870404/details/maximized - text in Portuguese).
In addition to Directives and Instructions, the performance assessment system for prosecutors is based on quality criteria/performance parameters, as a rule, uniformly applied at national level.

Romania

Q066 (General Comment): There are no formal standards for quality established for the whole judiciary. However, informal standards are being used (such as training, quality of the reasoning, assessment of the activity of the judges, assessment of the good reputation of the judges etc.).
More precisely, the activity of courts is evaluated and monitored periodically, on the basis of certain statistical data/performance indicators, such as those presented at question 70. The evaluation is achieved by verifications carried out by inspectors of the Judicial Inspection of the SCM, by elaborating periodical reports. The schedule and thematic of those verifications are approved every year by the SCM.
At organizational level, there are no quality standards established for courts. It may be considered that such standards exist at individual level, for each judge, by the indicators for the evaluation of professional activity.

Slovak Republic

Q066 (General Comment): Internal revision of the court is a type of control of the court and judges, which aims to check the current state of the judiciary, to identify the causes of shortcomings in the performance of the judiciary and to propose measures to eliminate them.

Q066 (2024): Internal revision
Internal revision of the court is a type of control of the court and judges, which aims to check the current state of the judiciary, to identify the causes of shortcomings in the performance of the judiciary and to propose measures to eliminate them.

Q066 (2023): Internal revision
Internal revision of the court is a type of control of the court and judges, which aims to check the current state of the judiciary, to identify the causes of shortcomings in the performance of the judiciary and to propose measures to eliminate them.

Q066 (2020): Internal revision of the court is a type of control of the court and judges, which aims to check the current state of the judiciary, to identify the causes of shortcomings in the performance of the judiciary and to propose measures to eliminate them.

Q066 (2014): There is a system to evaluate the overall functioning of courts with respect to the Manifesto of the Government of the Slovak Republic for the period of 2010-2014:
http://www.vlada.gov.sk/data/files/855_the-manifesto-of-the-governmentof-the-slovak-republic-for-the-period-of-2010-2014.pdf

Slovenia

Q066 (General Comment): The Supreme Court's Data warehouse, containing all court cases, as well as financial data and human resources data was implemented in 2011. The data are collected based on CEPEJ Guidelines on Judicial statistics (GOJUST). A special office at the Supreme Court with specialised knowledge was introduced in order to monitor the quality and define quality policies on the level of entire judiciary and individual courts. Quality standards based on SATURN guidelines are taken into account in several predefined BI system reports.
The important role in the determination of quality standards is played by the Supreme Court's „Opening of the judicial year" document, in which a set of priorities is determined. The priorities are subsequently monitored throughout the judicial year by automated BI tools and customised analysis at the Supreme Court.
The 2013 amendment to the Courts Act provides that the Supreme Court shall adopt the Criteria for quality of work for courts for the next (judicial) year, based on its Yearly report on efficiency and effectiveness of courts. Since 2015, the Supreme Court has been adopting the timeframes for different types of procedures as well as for different procedural phases for next year (as a part of the Criteria for quality of work).
As for public prosecution, the criteria for quality of work are defined in the Prosecution Policy (adopted by the Prosecutor General), while the quantitative aspects of work are defined in the Criteria for evaluating the performance of the state prosecutor's offices adopted by the State Prosecutorial Council.

Q066 (2015): The Supreme Court's Data warehouse, containing all court cases, as well as financial data and human resources data was implemented in 2011. The data are collected based on CEPEJ Guidelines on Judicial statistics (GOJUST). The system was awarded with Special mention in the 2012 Crystal Scales of Justice Competition and was defined as "Inspiring example" in the EC document Quality of Public Administration - A Toolbox for Practitioners - http://ec.europa.eu/social/main.jsp?catId=738&langId=sl&pubId=7757.

A special office at the Supreme Court with specialised knowledge was introduced in order to monitor the quality and define quality policies on the level of entire judiciary and individual courts.

Quality standards based on SATURN guidelines are taken into account in several predefined BI system reports.

The important role in the determination of quality standards is played by the Supreme Court's „Opening of the judicial year" document, in which a set of priorities is determined. The priorities are subsequently monitored throughout the judicial year by automated BI tools and customised analysis at the Supreme Court.

The 2013 amendment to the Courts Act provides that the Supreme Court shall adopt the Criteria for quality of work for courts for the next (judicial) year, based on its Yearly report on efficiency and effectiveness of courts. In 2015 the Supreme Court adopted the timeframes for different types of procedures as well as for different procedural phases for 2016 (as a part of the Criteria for quality of work).

Q066 (2014): 2014 A dedicated office at the Supreme Court with specialised knowledge was introduced in order to monitor the quality and define quality policies at the level of entire judiciary and individual courts level.
Quality standards based on SATURN guidelines are taken into account in several predefined BI system reports.
The recent amendment of the Courts Act provides that the Supreme Court shall adopt the Criteria for quality of work for courts for the next (judicial) year, based on its Yearly report on efficiency and effectiveness of courts. Since the amendment was adopted in the middle of 2013, the first Annual report of Supreme Court will be for 2014 (to be published in 2015). Consequently, only 2015 will be the (first) year to formally adopt the aforementioned Criteria.
The important role in the determination of quality standards is played by the Supreme Court`s „Opening of the judicial year" document, in which a set of priorities is determined. The priorities are subsequently monitored throughout the judicial year by automated BI tools and customised analysis at the Supreme Court.

Spain

Q066 (General Comment): The Judicial Statistics Section of the CGPJ General Council of the Judiciary publishes annually the document La justicia dato a dato, which focuses on the quality of justice, adding key indicators for the year. It is published in Spanish and English.
Justice 2030 is a common 10-year work plan, developed in co-governance, which represents the realisation of the Recovery, Transformation and Resilience Plan for the Public Justice Service. This plan includes various programme that includes the overall quality objectives of user-oriented justice and data-oriented, digitally accessible and sustainable justice.

Q066 (2024): In June 2024, the instrument "Policy on the Use of Artificial Intelligence in the Administration of Justice" was approved. Its objective is to improve the efficiency of the judicial system through the use of AI-based solutions, ensuring a responsible, legal, and ethical use of these technologies.

Q066 (2023): The Judicial Statistics Section of the CGPJ General Council of the Judiciary publishes annually the document La justicia dato a dato, which focuses on the quality of justice, adding key indicators for the year. It is published in Spanish and English.
Justice 2030 is a common 10-year work plan, developed in co-governance, which represents the realisation of the Recovery, Transformation and Resilience Plan for the Public Justice Service. This plan includes various programme that includes the overall quality objectives of user-oriented justice and data-oriented, digitally accessible and sustainable justice.

Q066 (2015): Every three months each Court sends statistics to the Council for the Judiciary with complete information about the activity of the Court.

Question 067

Belgium

Q067 (2024): For public prosecution services: although the reply is “no,” there are, in particular, management support assistants who can work in the field of quality.

Q067 (2023):
Although the reply is ‘no’, the public prosecutor's department does have management support staff who can work in the quality field.

Q067 (2021): The College of Courts and Tribunals is working on the implementation of a quality system. This system is based on international scientific references and will be broken down into ten or so themes that constitute the management modules of an organisation. These management modules cover all aspects of an organisation, including organisational management, process management, human resources management, organisational culture, information and communication, financial management, facility management and information and communication technologies. The College of Courts and Tribunals and the steering committees work together to develop their maturity in these different areas.

Bulgaria

Q067 (2020): The Supreme Judicial Council, through its Commission for Attestation/Appraisal and Competitions at the Judges College/Chamber of the Supreme Judicial Council and the Commission for Attestation/Appraisal and Competitions at the Prosecutorial College/Chamber, are the bodies that perform an objective assessment of the professional, business and moral qualities of magistrates.

Denmark

Q067 (2019): As above

Q067 (2018): The public prosecution is not part of Danish Court Administration.

Q067 (2017): Because judges are independent, we do not interfere with a judge decision. However, there is always the possibility to appeal a court decision if either of the parties disagree with the verdict.

Q067 (2016): As above.

Finland

Q067 (General Comment): Nationwide and departmental working groups formed for prosecutors evaluate and set quality standards.

Q067 (2023): Nationwide and departmental working groups formed for prosecutors evaluate and set quality standards.

France

Q067 (General Comment): Concerning administrative justice:
There are no specialised personnel specifically responsible for implementing these quality standards, but there is a monitoring responsibility within the competence of the chamber presidents and heads of courts. Concerning civil and criminal justice: with regard to the quality standards of the Public Services + program, each court has a local contact responsible for deploying SP+ on the ground. The Department of Expertise and Modernization of the Ministry's General Secretariat is responsible for coordinating the network of local contacts.

Q067 (2023): Strictly speaking, there are no specialised staff responsible for the implementation of these quality standards, but a monitoring responsibility for the presidents of chambers and heads of courts.

Q067 (2021): Source DSJ

Q067 (2020): The answer is no for the administrative justice.

Q067 (2014): 2010: State prosecutors draw an annual report on the activity, management of their public prosecution office and on the enforcement of the law, as well as an annual report concerning the measures of custody and the condition of the custody facilities.

Germany

Q067 (2024): Due to judicial independence, there are no national level quality standards.

Q067 (2023): Due to judicial independence, there are no national level quality standards.

Q067 (2022): Due to judicial independence, there are no national level quality standards.

Q067 (2021): Due to judicial independence, there are no national level quality standards.

Q067 (2020): Due to judicial independence, there are no national level quality standards.

Greece

Q067 (2023): The Inspectors of the courts receive for the first time instructions from the Plenaries of the courts, specific directions for the operation of the courts and the evaluation of the supervisors, statistical data are used and specially reasoned reports are drawn up. The new way of evaluation has been systematized and good practices are reported.

Q067 (2021): It depends on the court, the answer was changed from yes to no although there are judicial services that have answered positively the majority have answered no.

Q067 (2017): The Law provides a set of quality criteria that must be taken into account when inspectors check the performance of each judge.

Ireland

Q067 (2023): NAP within the public prosecution services

Q067 (2021): Secretary of Judicial Council and Judicial Conduct Committee of that Committee investigate and adjudicate complaints.

Latvia

Q067 (General Comment): In order to implement high-quality investigation supervision, to achieve a quick, economical and effective fair settlement of criminal legal relations in criminal proceedings, as well as to ensure a uniform policy of criminal penalties and control of prosecutors' work, the prosecutor's office has adopted internal legal acts that ensure timely informing of senior officials about the manner and necessity of completing criminal proceedings in case of involvement of the said official.
As regards everyday duties, responsibility lies upon every prosecutor. There are cases, provided by in the order of the Prosecutor General, when the prosecutor is obliged to report to the supervising prosecutor, higher-ranking prosecutor or other prosecutors (chief prosecutor of the relevant prosecution office, or chief prosecutor of the Criminal Justice Department of the Office of the Prosecutor General). During the evaluation process of prosecutors (with the new system – the annual rating of the indicators of the professional performance of the prosecutors of first instance level; or the one carried out no less frequent than once in 5 years), one department of the Office of the Prosecutor General is responsible for creating an assessment of the quality and efficiency of the professional activities of district-level prosecutors and monitoring the results.

Malta

Q067 (2018): There are general quality standards that apply to the public sector, but not specific quality standards that monitor the implementation of quality standards within the judiciary or the prosecution services.

Netherlands

Q067 (General Comment): Courts: there are staff members (policy officers) within the offices that coordinate the quality in that office.
Public prosecution: At the head office of the public prosecution (Parket-General), there is personnel responsible for producing, implementing, evaluating, and auditing quality measures. These are the TJK (as mentioned in Q66), Team Processes and Information (standard processes and procedures) and the Scientific Bureau OM (national guidelines and policy regulations).

Q067 (2017): yes

Poland

Q067 (General Comment): Inspection departments operate in the appellate and regional courts. The task of the judges working in these departments is to perform on behalf of the president of the court activities in the scope of supervision over the administrative activity of the courts in the area of the operation of a given appellate or district court. Supervision consists in taking actions to improve the office of the courts or increase the efficiency and level of work organization culture in the courts. For this purpose, visits of departments in courts or surveys of recognized cases of a given category are carried out, the secretariats of departments in the courts are controlled.
Activities in the scope of administrative supervision can not enter the field in which judges and assessors are independent.

Q067 (2023): There are no specialised units in all courts, but at the level of the Courts of Appeal and District Courts there are Visiting Magistrates' Departments where visiting magistrates specialised in a particular field are appointed to supervise cases on a permanent basis. The comments on visiting judges in paragraph 66 remain valid. A visiting judge in an appellate court is appointed by the president of the appellate court, and in a circuit court by the president of the circuit court, for a period of four years, from among judges with at least seven years' experience as a judge. Before appointing the visiting judge, the president of the relevant court consults the Minister of Justice.

Portugal

Q067 (2022): The High Council of the Public Prosecution Service has “inspectors” (“inspectores”) who assess the quality of the work carried out by the prosecutors, applying national quality criteria or standards.

Q067 (2021): The High Council of the Public Prosecution Service has “inspectors” (“inspectores”) who assess the quality of the work carried out by the prosecutors, applying national quality criteria or standards.

Q067 (2020): The High Council of the Public Prosecution Service has “inspectors” (“inspectores”) who assess the quality of the work carried out by the prosecutors, applying national quality criteria or standards.

Slovak Republic

Q067 (General Comment): Judicial Council, Council of Prosecutors and disciplinary commissions.

Q067 (2020): Judicial Council, Council of Prosecutors and disciplinary commissions.

Q067 (2019): Judicial Council, Council of Prosecutors and disciplinary commissions

Slovenia

Q067 (General Comment): The Office for Court Management Development at the Supreme Court promotes the improvement in leadership and management of courts and the increase in effectiveness and efficiency. It is responsible for the preparation of different reports and analysis regarding work of courts and the promotion of best practices.
The Department for the Organization and Development of Management of the Supreme State Prosecutor's Office of the Republic of Slovenia is responsible for monitoring the implementation of the Prosecution Policy and the Criteria for the Success of Prosecution of State Prosecutor's Offices.

Spain

Q067 (2015): Every three months each Court sends statistics to the Council for the Judiciary with complete information about the activity of the Court.

Question 070

Austria

Q070 (General Comment): .

Q070 (2024): As for now, appeal ratio is monitored by the administrative courts only.

Q070 (2022): satisfaction of court staff: only supreme administrative court

Q070 (2017): "other": e.g. certain kinds of decisions, clearance rate (annually)

Belgium

Q070 (2024): Number and rate (and other details) of appeals: currently only for criminal cases in police courts.

Q070 (2023): Other: Dashboards including the following are in development or test-phase: - productivity (judges + court staff) (test phase for courts of appeals)
- number and rate of appeals (test phase for police courts)

Q070 (2021): In 2021, the College of Courts and Tribunals has started a project to make a central inventory of the backlog in the courts and tribunals using indicators such as length of proceedings, number of pending cases, Disposition time, backlogs.

Q070 (2017): There are ad hoc systems for monitoring activities within the courts. There is a central service responsible for the collection of statistics which ensures the annual publication of statistics. The Central Statistical Service is developing a uniform and coordinated policy, but there is (as yet) no central system for regular monitoring of activities.

Q070 (2016): There are ad hoc systems for monitoring activities within the courts. There is a central service responsible for the collection of statistics which ensures the annual publication of statistics. But there is no (yet) central system for regular monitoring of activities.

Bulgaria

Q070 (2024): Pursuant to Art. 54 of the JSA The Inspectorate with the Supreme Judicial Council (ISJC) shall check the organization of administrative operation of the courts, prosecution offices and investigating authorities; check the arrangements made for the institution and progress of court, prosecutorial and investigative cases, as well as the disposal thereof within the established time limits; analyze and summarize the cases that have been closed by an effective judicial act, as well as the closed files and cases of prosecutors and investigators, by adopting a procedure for regular reporting and publishing of the results of the analysis and summarizing the closed cases; in the presence of conflicting case-law, the existence of which has been found in carrying out the activity under Art. 54 (1), item 3 of the JSA, it shall alert the competent authorities of the need to request the rendition of interpretative judgements or interpretative decrees; carry out integrity testing and examinations for conflict of interest of judges, prosecutors and investigators, verifications of the financial interests disclosure declarations, as well as checks for identifying actions damaging the prestige of the Judiciary and such related to impairment of the independence of judges, prosecutors and investigators; examine applications against an infringement of the right to have a case examined and disposed of within a reasonable time; draw up an annual programme for scheduled inspections and an annual report on the activity thereof, which it shall submit to the Plenum of the Supreme Judicial Council; adopt a template for reporting the completion of cases within the statutory time limits when carrying out its activity under Art. 54 (1), item 2 of the JSA after consultations with the Supreme Judicial Council; summarize annually the good and bad practices regarding the observance of the ethical rules in accordance with the relevant European and international standards in connection with the abovementioned checks and shall provide the information to the Colleges of the Supreme Judicial Council. The ISJC carries out its inspections based on an annual program for the respective calendar year (planned inspections), upon signals and upon self-referral. The ISJC prepares an annual report on its activities, which is presented to the plenum of the Supreme Judicial Council and is considered by the National Assembly of the Republic of Bulgaria.

Croatia

Q070 (2019): As regards "number of appeals", from 2019 we are able to get this data from our case management system.

Cyprus

Q070 (2023): the costs of the judicial procedings and the appeal ratio are now being monitored

Denmark

Q070 (2024): We collect data on the following, but we do not monitor the courts with this data. We share it with the courts for guidance or The Ministry of Justice, but we do not have mandate to regulate the courts based on this data. The Ministry of Justice do not have mandate to monitor and regulate the courts either. We monitor both "satisfaction of the court staff" and "appeal ratio". The reason for the change from previous years is not that it hasn't been monitored, but that there has been a different interpretation of the question previously in regards to the use of "monitor". We do collect the data however we cannot use the data to force action upon the courts.

Q070 (2023): We collect data on the following, but we do not monitor the courts with this data. We share it with the courts for guidance or The Ministry of Justice, but we do not have mandate to regulate the courts based on this data. The Ministry of Justice do not have mandate to monitor and regulate the courts either. We monitor both "satisfaction of the court staff" and "appeal ratio". The reason for the change from previous years is not that it hasn't been monitored, but that there has been a different interpretation of the question previously in regards to the use of "monitor". We do collect the data however we cannot use the data to force action upon the courts.

Q070 (2021): Danish Court Admininistration is typically not doing this. A responsible court follow their cases though.

Q070 (2020): We value independence high. Therefore Danish Court Administration does not evaluate the performance or productivity of individual judges. We follow overall productivity and case flow though as that is used to allocate ressources and to find the court most in need of vacant judge positions.

Q070 (2019): Courts are followed yearly in a yearly report. District courts receives monthly a report about case flow, pending cases, backlogs, weighted cases and the time it takes to finalize cases.

Q070 (2017): In Denmark we have a management system which information is updated monthly for the district courts where the points above are shown. For the High Courts and the Supreme Court, the case flow is not followed so often and in a so detailed way, but there are also much fewer cases. "Other": activity in terms of weighted cases and also pending cases

Q070 (2016): The so called "weighted cases" are measured in order to have a measure for the activity.

Estonia

Q070 (General Comment): The scope of the monitoring system is extended to the results of proceedings; the categories of cases; the number of decisions appealed and revoked, fully or partially. The waiting time and the 'age' of pending (not solved) cases are also monitored. It is worthy of mention that every year all the courts and the Ministry of Justice enter into an agreement according to which courts should aim to carry out structural changes and to make changes in case-flow management that will ultimately ensure efficient proceedings. The content of the agreement has changed since 2017. The goals are more general and the same for all the courts (except The Supreme Court).

Q070 (2023): There are no "other" in 2023. In general MoJ has not been regulary monitoring as it did before.

Q070 (2017): See previous general comments.

Q070 (2016): see general comments

Finland

Q070 (General Comment): All courts keep statistics of the mentioned court activities in the operational case management systems. The National Courts Administration can access these figures through a reporting system.

Q070 (2019): satisfaction of court staff is monitored with job satisfaction surveys which are taken every second year

France

Q070 (2024): Administrative justice: source: Council of State
In the case of administrative courts, there is no monitoring of user satisfaction or the cost of judicial procedures.
- Activity monitoring indicators by subject matter, types of judgment formation (panel, summary proceedings, single judge, orders)
- Indicator for monitoring the number of cases resolved per judge and decision support
Social barometers were conducted in 2017, 2021, and 2023, based on a questionnaire addressed to staff and judges (working conditions, etc.).
The additional responses compared to the last CEPEJ campaign do not correspond to new developments.
Civil and criminal justice: source: DSJ
there is no monitoring of user satisfaction or the cost of judicial procedures.

Q070 (2023): Indicators for monitoring activity by matters, types of judicial formation (collegial, summary proceedings, single judge, orders)
Indicator for monitoring the number of cases resolved by a judge and decision-making support
* Social barometers were carried out in 2017, 2021 and 2023.
The additional answers compared to last year do not imply innovations

Q070 (2021): Source DSJ and Council of State

Q070 (2020): Judicial and administrative jurisdictions combined.

Q070 (2019): Civil and criminal justice: After the deployment of innovative applications, satisfaction questionnaires are sent to users in the courts (heads of courts, directors of registries, judges and registry officials) in order to improve change support actions and the implementation.
In addition, with regard to victims, the Ministry of Justice will conduct a satisfaction survey in the second half of 2019 among victims of criminal offences who resort to victim support associations. The results of this survey, similar to a previous survey conducted in 2011, could be published in 2020. Likewise, the Ministry of Justice is attentive to citizens' views on the way they are received in the courts. For several years now, surveys have been conducted on the reception in the courts by a service provider pretending being a litigant. In 2018, an online survey, coupled with a face-to-face survey, was conducted in seven 1st instance courts “tribunaux de grande instance” among litigants appearing in these courts. In 2019, the satisfaction survey will be carried out in all “tribunaux de grande instance” via an online survey accessible by internet address or QR code. Finally, a national survey is also under way on the reception of litigants in the courts in the specific context of the implementation of social centres within the “tribunaux de grande instance” and the integration within these courts of the three separate courts that previously dealt with these types of litigation. The survey, carried out among court staff, aims to assess the difficulties encountered by persons presenting themselves at the reception desk and to identify any corrections that could be included in the texts.
The reply to the question encompasses replies from administrative justice and civil and criminal justice.

Q070 (2018): The coverage rate of cases as well as the structure of civil or criminal litigation are used by the courts.
In addition, other indicators usefully complete the analysis: .
Share of decisions on the merits in completed cases (civil activity).
Share of referrals in completed cases (civil activity).
Theoretical time to sell off the stock.
Average age of the stock.
Percentage of cases over 12 months in stock (civil activity).

Q070 (2017): The number of cases referred is an indicator used only by administrative courts.
The courts have business applications to monitor their civil and criminal activities. At national level, data from these applications is
from these applications are collected automatically via infocentres, reprocessed and cross-referenced, then
in the form of tables or graphs. These reports can be generated on a monthly basis, except for certain activity data (court of appeal).
These reports can be generated on a monthly basis, except for certain activity data (criminal courts, juvenile court judges, enforcement of sentences), for which reports are generated annually.
These infocentres enable the courts to monitor statistics and manage their activity. They enable the central administration to
They enable the central administration to prepare management dialogues from a performance perspective.

Q070 (2016): The number of cases subject to referral is an indicator used only by administrative courts.
Courts have business applications to monitor their civil and criminal activities. At national level, data from these applications are collected automatically via info-centres, processed and cross-referenced, and then presented in the form of tables or graphs. These refunds can be generated monthly, except for certain activity data (assize court, juvenile judges, enforcement of sentences), for which the refunds are annual.
These info-centres enable courts to carry out a statistical follow-up and to monitor their activities. They allow the central administration to prepare management dialogues from a performance perspective.

Q070 (2015): The number of cases being referred is used only by administrative courts.
The rate of coverage of cases is used by judicial courts.
The state of stocks by age group is used by administrative courts.

Q070 (2014): 2013, 2014, the category "others" includes:
- the coverage rate of cases (used by judicial courts)
- the state of the stocks per age group (used bu administrative courts)
It should be noted that concerning the indicators mentioned in the question, the number of appealed cases is only used by administrative courts.

Germany

Q070 (General Comment): The Federal Statistical Office collects key figures on court performance (incoming cases, resolved cases, pending cases on the beginning and the end of a year) from the federal states. The Federal Statistical Office processes and publishes the data once per year for the civil, criminal, family, administrative, labour, social and financial courts.

Q070 (2024): All feredal states reported monitoring regarding number of incoming, resolved and pending cases as well as lenght of proceedings, number of appeals and disposition time.
2 federal states reported monitoring productivity of judges and court staff.

Q070 (2023): The monitoring activities no. 1-4 were selected by all respondent federal states and the activities no. 5 and 9-13 were selected by the majority of the federal states.
A minority of the federal states reported the following "other" monitoring activities: statistics on the nature of resolution (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.), number of main-trial days, participation of interpreters and experts.

Q070 (2022): The monitoring activities no. 1-4 were selected by all respondent federal statesa and the activities no. 5 and 9-13 were selcted by the majority of the federal states.
A minority of the federal states (as in previous years) reported the following "other" monitoring activities: statistics on the nature of resolution (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.), number of main-trial days, participation of interpreters and experts. (While the situation has not changed since the last cycle, the option "other" was not selected this time for the purpose of methodological consistency with the answers to other questions in this section).
One federal state has not yet replied.

Q070 (2021): The monitoring activities no. 1-4 were selected by all Länder, the activities no. 5 and 9-13 were selcted by most Länder and the activities under "other" were only mentioned by a some Länder (5).

Q070 (2020): The monitoring activities mentioned unter "other" were reported only by some of the Länder.

Q070 (2019): Some of the Länder did mention a monitoring system concerning other court activities such as statistics on the nature of resolution are kept (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.).

Q070 (2018): Some of the Länder did mention a monitoring system concerning other court activities such as statistics on the nature of resolution are kept (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.).

Q070 (2016): other: Some of the Länder did mention a monitoring system concerning other court activities such as statistics on the nature of resolution are kept (e.g. in civil cases: dealt with by contentious judgment/by acknowledgement/by settlement, etc.).

Q070 (2014): In 2014, some of the Landers did mention a monitoring system concerning other court activities, namely statistics on the nature of resolution (e.g. in civil matters cases are dealt with by contentious judgment/by acknowledgement/by settlement, etc.).

Greece

Q070 (General Comment): According to Law 4938/2022 (art. 99-104), supreme judges appointed as inspectors for two year’s term, redact every year general reports on the operation of each court and prosecutor's office in their district and recommend the necessary measures for the proper functioning of the service.

Q070 (2024): -Costs of the judicial procedures have not been chosen by the majority of the courts.
-Disposition time refers only to Administrative Courts.
-According to Law No 4938/2022 (OG A' 109/06.06.2022) “Code of Organization of Courts and Status of Judicial Officers and other provisions”, Justices of Supreme Court, appointed as inspectors for a period of two years, draw up an annual report on the work carried out by each court and prosecutor’s office, recommending the necessary measures that should be performed for the proper functioning of judicial bodies.
-According to Law 4938/2022 (art. 99-104), supreme judges appointed as inspectors for two year’s term, redact every year general reports on the operation of each court and prosecutor's office in their district and recommend the necessary measures for the proper functioning of the service.
Regarding the administrative courts, the General Commission of the State for ordinary administrative courts monitors and inspects the functioning of the administrative courts and assists their work (Articles 32-33 of Law 4938/2022). In the near future we hope to be able to use a business intelligence program through the upgraded Integrated Data Management System for the Administrative Justice, in order to extract composite statistical data without contacting any court.

Q070 (2023): According to Law 4938/2022 (art. 99-104), supreme judges appointed as inspectors for two year’s term, redact every year general reports on the operation of each court and prosecutor's office in their district and recommend the necessary measures for the proper functioning of the service. Regarding the administrative courts, the General Commission of the State for ordinary administrative courts monitors and inspects the functioning of the administrative courts and assists their work (Articles 32-33 of Law 4938/2022). In the near future we hope to be able to use a business intelligence program through the upgraded Integrated Data Management System for the Administrative Justice, in order to extract composite statistical data without contacting any court. [E-mail: g-epitropia-d-d@otenet.gr].

Q070 (2022): Many courts have chosen the option number of Appeals but not all. The Council of State has additionally selected the options number of Appeals and ratio of Appeals. The General Commission of the State for ordinary administrative courts has additionally selected the options number of Appeals and clearance rate.
According to Law 4938/2022 (art. 99-104), supreme judges appointed as inspectors for two year's term, redact every year general reports on the operation of each court and prosecutor's office in their district and recommend the necessary measures for the proper functioning of the service.
Regarding administrative courts, this task is fulfilled by the General Commission of the State for ordinary administrative courts. In the near future we hope to be able to use a business intelligence program, in order to extract composite statistical data without contacting any court.
[E-mail: g-epitropia-d-d@otenet.gr]

Q070 (2019): The Greek government has introduced a new system for organizing and evaluating the planning and implementation of public sector actions and projects, which introduces among others, monitoring court activities. (L. 4622/2019 art. 49 foll.)

Q070 (2017): Regarding Administrative Courts, this task is fulfilled by the General Commission of the State for ordinary administrative courts. In the near future there will be a possibility for the General Commission of the state to use a business intelligence program, in order to extract composite statistical data without contacting any court [E-mail: g-epitropia-d-d@otenet.gr]

Hungary

Q070 (General Comment): Among others:
- individual judge's statistics, - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- pending cases of an individual judge / court,
- the time frame of pending cases
- number of appealed cases,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2024): Other - statistics on the reasons to postpone trials - number of hearing days in cases - number of hearings per day - the subject of cases - the ratio of litigious and non-litigious cases - cases that are pending over 2 or 5 years have a separated statistical report every month - cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2023): - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2022): - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2021): - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2020): - statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2019): Other:
- statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2018): Other:
- statistics on the reasons of the postpone of the trials,
- number of trial days in cases, - number of tried cases per day,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2015): Among others:
- individual judge’s statistics,
- statistics on the reasons of the postpone of the trials,
- number of trial days in cases,
- number of tried cases per day,
- pending cases of an individual judge / court,
- the time frame of pending cases
- number of appealed cases,
- the subject of incoming / finished / pending cases,
- the ratio of litigious and non-litigious cases,
- cases that are pending over 2 or 5 years have a separated statistical report every month
- cases in which there were no actions taken in the last 30 days by the court have a separated statistical report every month

Q070 (2014): In 2013 and 2014, among other are quoted individual judge’s statistics, statistics on the reasons of postponing trials, the number of trial days, the number of tried cases per day, the number of pending cases of an individual judge/court, the time frame of pending cases, the number of appealed cases, the subject of incoming/resolved/pending cases, the ratio of litigious and non-litigious cases. Cases that are pending over 2 or 5 years have a separated statistical report every month, as well as cases in which there were no actions taken in the last 30 days by the court.

Ireland

Q070 (2024): While we do not routinely measure the missing activities above – that is not to say we cannot measure them.
•The Appeal ratio can be calculated if and when required.
•While we do not use disposition time, we can monitor it.
•We routinely measure waiting times and durations of proceedings.
•Productivity is measured in multiple ways, including via performance management processes

Q070 (2023): While we do not routinely measure the missing activities above – that is not to say we cannot measure them.
•Productivity is measured in multiple ways, including via performance management processes.
•The Appeal ratio can be calculated if and when required.
•While we do not use disposition time, we do have waiting times and durations of proceedings which are routinely captured and provide a good proxy.

Q070 (2022): These are not new or recently introduced monitoring options.

Q070 (2014): 2014: Since 2014 Ireland introduced a monitoring system for the length of proceedings and it is now capable of calculating average length of proceedings in first instance jurisdictions.

Italy

Q070 (General Comment): Within the framework of the National Recovery and Resilience Plan (PNRR), the Ministry of Justice has introduced an additional monitoring system specifically designed for PNRR purposes, in order to keep track of a series of KPIs related to the efficiency of the Italian courts.

Latvia

Q070 (2023): The indicators “productivity of judges and court staff” and “number of appeals” are taken into account when assessing the professional activity of a judge, because the objective of the assessment of the professional activities of a judge is to promote the continuous professional growth of a judge throughout his or her career, thereby improving the quality of the work of the judge and the court. An Annual evaluation of court staff is also carried out, which is essential for high-quality work of courts.

Q070 (2022): The indicators “productivity of judges and court staff” and “number of appeals” are taken into account when assessing the professional activity of a judge, because the objective of the assessment of the professional activities of a judge is to promote the continuous professional growth of a judge throughout his or her career, thereby improving the quality of the work of the judge and the court. An Annual evaluation of court staff is also carried out, which is essential for high-quality work of courts.

Q070 (2017): Decision stability (proportion of decisions appealed in higher instance)

Q070 (2016): Decision stability (proportion of decisions appealed in higher instance)

Lithuania

Q070 (General Comment): All data except satisfaction of users, are recorded in the Lithuanian Court Information System (LITEKO), as well as other data, related to the case, it‘s process and the parties to the proceedings.

Q070 (2023): National court administration carries out the courts assessing the quality of services and service delivery survey every year.

Luxembourg

Q070 (General Comment): No regular system has been implemented up to today. However, a monitoring can be done through the statistical service of the judiciary (SSJ) on an punctual basis and upon request of the competent authorities.

Q070 (2017): ??? (see comments to parent campaign)

Q070 (2016): No regular system has been implemented up to today. However, a monitoring can be done through the statistical service of the judiciary (SSJ) on an punctual basis and upon request by the competent authorities.

Q070 (2015): By using the newly implemented statistical tools, the information ticked in addition to last year's questionnaire can now be retrieved by the statistical service on an as needed basis at least for criminal cases. Identical markers are being implemented for civil and commercial cases and will available in a foreseeable future.

Q070 (2014): 2014: There is no regular monitoring system. However, new statistical tools are implemented and can provide monitoring elements when necessary without daily measurement current affairs.

Malta

Q070 (2022): Other: Age of the pending caseload.

Q070 (2019): Other: age of pending caseload

Q070 (2017): other: clerance rate

Q070 (2015): The monitoring of court activities also takes place through the ongoing analysis of the Clearance Rate and Disposition Time of the various courts. This data is also being published online on a monthly basis.
The category "other" refers to the monitoring of the Clearance Rate and Disposition Time of all civil courts, boards and tribunals. This exercise was started in 2015.

Q070 (2014): In 2014, the court administration was monitoring length of proceedings through the number of incoming and resolved cases, as well as through the pending caseload. The age of civil cases was another parameter that was being assessed.
On the occasion of the 2014 exercise, it has been indicated that since 2015, Malta started computing the Disposition Time and Clearance Rate of all the civil and criminal courts. By the end of 2015, for the civil courts, this information will be made available online.

Netherlands

Q070 (2024): Many of these activities are included in the annual report, see for example Chapter 7 of 2024's Annual Report.

Q070 (2023): Many of these activities are included in the annual report, see for example Chapter 6 of 2023’s Annual Report: https://www.rechtspraak.nl/SiteCollectionDocuments/Jaarverslag%20Rechtspraak%202023.pdf

Q070 (2020): There is an annual publication that includes the appeal ratio for some case types. To call it ‘monitoring’ would be a bit too much, but it is annually checked and reported on.
Incoming cases and length of proceedings have not previously been mentioned, but these are monitored.

Poland

Q070 (2024): other - timeliness of the awarding of fees to experts and translators, timeliness of the preparation of motivations, workload of judges and registrars.
The selection of question 70 in the questionnaire, ‘User satisfaction regarding court services,’ is based on monitoring the quality of customer service using satisfaction surveys conducted in common courts. Monitoring of service quality focuses mainly on assessing communication aspects of service, such as: assistance from court staff in handling cases, staff patience, clear and understandable communication between staff and users.
This information was collected in previous years.
As regards the data on ‘court costs’ in this question, data on the enforcement of court judgments in relation to fines, fees and court costs are monitored by the Ministry of Justice in NS1 reports for individual statistical periods. The data was collected in previous years.

Q070 (2023): * other - timeliness of the awarding of fees to experts and translators, timeliness of the preparation of motivations, workload of judges and registrars. Others - the data comes from the Department of Administrative Supervision and has also been used previously.

Q070 (2017): Supervision covers only the administrative activities of the courts. There are the internal supervision exercised by the presidents of the courts and the external supervision exercised by the Minister of Justice within the narrow scope specified in the law.

Q070 (2016): Supervision covers only the administrative activities of the courts. There are the internal supervision exercised by the presidents of the courts and the external supervision exercised by the Minister of Justice within the narrow scope specified in the law.

Portugal

Q070 (2022): Users satisfaction is monitored through surveys and indirectly by the consulting body of each court that includes members of the community. The appeal ratio is only monitored in the context of judges evaluation.

Q070 (2020): we included "satisfaction of users" because one of the tasks of the president judge of the court is to monitor and evaluate the activity of the court, in particular the quality of the justice service provided to citizens, taking into account particular complaints or responses to satisfaction questionnaires. "Article 94 of Law 62/2013, 26th August, on the judicial organization"

Q070 (2019): In this evaluation cycle we included "satisfaction of users" because one of the tasks of the president judge of the court is to monitor and evaluate the activity of the court, in particular the quality of the justice service provided to citizens, taking into account particular complaints or responses to satisfaction questionnaires. "Article 94 of Law 62/2013, 26th August, on the judicial organization"

Q070 (2017): Scheduling; delays of judges and sections.

Q070 (2016): Scheduling; delays of judges and sections.

Q070 (2015): Scheduling: time delays of judges and sections of the court.

Romania

Q070 (2024): ECRIS - case management and STATIS - statistics monitoring application including for court's efficiency assessment •The ReJust Desktop App and the Notebook module implemented on the website www.rejust.ro are work tools aimed at the optimization of the management of cases. Their scope is the speedy resolution of cases, through automation and simplification of administrative tasks, the reduction of processing times and facilitating quick access to necessary information. These tools ensure a more efficient management of cases, a faster resolution thereof and an adequate monitoring, significantly contributing to the modernization and standardization of judicial activities. Furthermore, the App offers advanced IT solutions for reasoning repetitive cases, allowing the use of standardized templates for ensuring the speeding up of the case reasoning process.
•The portal registratura.rejust.ro is a work tool which facilitates the submission of claims, documents and the payment of the stamp duties. The objective of this tool is the digitalization and streamlining of judicial processes, ensuring the acceleration of case resolution, as well as costs reduction and the standardization of activities, offering a unitary and accessible platform for interested parties.

Q070 (2023): ECRIS - case management and STATIS - statistics monitoring application including for court's efficiency assessment •The ReJust Desktop App and the Notebook module implemented on the website www.rejust.ro are work tools aimed at the optimization of the management of cases. Q070 (2021): ECRIS - case management and STATIS - statistics monitoring application including for court's efficiency assessment

Q070 (2020): ECRIS - case management and STATIS - statistics monitoring application including for court's efficiency assessment

Q070 (2019): ECRIS - case management and STATIS - statistics monitoring application including for court's efficiency assessment

Q070 (2017): - e.g. suspended cases

Q070 (2016): - suspended cases etc.

Slovak Republic

Q070 (General Comment): The category “other” encompasses: the number of cases according to types of disputes, the results of the cases
(reconciliation, dismissals, full satisfaction, partial satisfaction, etc.).

Slovenia

Q070 (General Comment): In Slovenia there is a regular monitoring system in a form of collecting data on court statistics. Court statistics are collected and published four times a year by the Ministry of Justice. They include the data on the number of judges and court staff, number of incoming, resolved and pending cases, age of unresolved cases, length of proceedings, average time to resolve a case, type of decision, court backlogs, legal remedies and time to issue a court decision.
Besides that, the data on court activities are automatically on national level, thus statistical analysis are made possible. All courts have access to a wide range of special reports, generated in the Court management information system. Reports include detailed information on court activities (for example length of specific phases of a court proceeding, top 20 oldest cases in certain area of law, etc.), human resources, court performance indicators (the critical indicators are marked red for unsatisfactory performance and green when meeting the standards) that provide guidance to presidents and directors of courts. The business intelligence system that creates priority reports derives the data from the Data warehouse of the Supreme Court. The same source is used for Court statistics publications by the Ministry of Justice. Each court is able to access the above mentioned reports at any moment, while some data are quarterly collected and published on national level (as prescribed by the Court rules).
The satisfaction surveys are performed and results published bi-annually.

Q070 (2015): The data on court activities are automatically collected on national level, thus statistical analysis is made possible.

All courts have access to a wide range of special reports, generated in the Court management information system. Reports include detailed information on court activities (e.g. length of specific phases of a court proceeding, top 20 oldest cases per legal area etc.), human resources, court performance indicators (the critical indicators are marked red for unsatisfactory performance and green when meeting the standards) that provide guidance to presidents and directors of courts. These additional data available to court management officials are the reason, why we put check before “other elements”.

The business intelligence system that creates priority reports derives the data from the Data warehouse of the Supreme Court. The same source is used for Court statistics publications by the Ministry of Justice.

Each court is able to access the above mentioned reports at any moment, while some data are quarterly collected and published on national level (as prescribed by the Court rules).

Spain

Q070 (General Comment): The category “other” encompasses: number of enforcement procedures, number of decisions appealed, number of rogatory letters issued, received and resolved, aid between courts, pending writings, form of termination of trials, etc.

Q070 (2024): In the current exercise the option "satisfaction of users" was not selected because none opinion poll about "The Perception of Justice Among Its Service Users" or similar was conducted by the General Council of the Judiciary, in 2024.

Q070 (2023): An example of monitoring user satisfaction is the opinion poll commissioned by the General Council of the Judiciary, entitled "The Perception of Justice Among Its Service Users", conducted in February 2023. The results are published on the website

Q070 (2017): The category “other” includes many other data such appeals, aid between courts, pending writings, etc.

Q070 (2016): The category “other” includes many other data such appeals, aid between courts, pending writings, enforcement proceedings, form of termination of trials, etc.

Question 070-1

Austria

Q070-1 (2024): This year the "satisfaction of prosecution staff" included, because the replies have not been answered correctly in the past.

Bulgaria

Q070-1 (General Comment): .Other: The Inspectorate to the Supreme Judicial Council, pursuant to Art. 54 of the Judiciary System Act, examines the organization of the administrative duties of the courts, prosecutor's offices and investigative bodies; reviews the organization of the initiation and motions of court, prosecutor's and investigative proceedings, as well as the closure of cases within the established deadlines; analyzes and summarizes the cases that have been closed by a final court act, as well as the closed files and cases of prosecutors and investigators, adopting a procedure for regular reporting and publication of the results of the analysis and summary of the closed cases; in the event of contradictory judiciary practices, observed in the execution of work pursuant to Article 54(1)(3) of the Judiciary System Act, notifies the respective authorities to request the adoption of interpretative decisions or interpretative rulings; performs integrity and conflict of interest checks for judges, prosecutors and investigators on their property declarations, as well as on the detection of actions that violate the reputation of the judiciary and those related to the breach of the independence of judges, prosecutors and investigators; reviews applications against the hearing and settlement of cases within a reasonable timeline, prepares an annual programme for planned inspections and an annual report on its activities, submitted to the Plenum of the Supreme Judicial Council; adopts a model for reporting on the settlement of cases within the legal timeline in the performance of duties under Article 54, (1)(2) of the Judiciary System Act, in coordination with the Supreme Judicial Council; prepares annual summaries of good and bad practices in terms of compliance with the ethical rules in accordance with the relevant European and international standards in relation to the abovementioned checks and provides the information to the relevant Colleges of the Supreme Judicial Council.

Q070-1 (2024): Pursuant to Art. 54 of the JSA The Inspectorate with the Supreme Judicial Council (ISJC) shall check the organization of administrative operation of the courts, prosecution offices and investigating authorities; check the arrangements made for the institution and progress of court, prosecutorial and investigative cases, as well as the disposal thereof within the established time limits; analyze and summarize the cases that have been closed by an effective judicial act, as well as the closed files and cases of prosecutors and investigators, by adopting a procedure for regular reporting and publishing of the results of the analysis and summarizing the closed cases; in the presence of conflicting case-law, the existence of which has been found in carrying out the activity under Art. 54 (1), item 3 of the JSA, it shall alert the competent authorities of the need to request the rendition of interpretative judgements or interpretative decrees; carry out integrity testing and examinations for conflict of interest of judges, prosecutors and investigators, verifications of the financial interests disclosure declarations, as well as checks for identifying actions damaging the prestige of the Judiciary and such related to impairment of the independence of judges, prosecutors and investigators; examine applications against an infringement of the right to have a case examined and disposed of within a reasonable time; draw up an annual programme for scheduled inspections and an annual report on the activity thereof, which it shall submit to the Plenum of the Supreme Judicial Council; adopt a template for reporting the completion of cases within the statutory time limits when carrying out its activity under Art. 54 (1), item 2 of the JSA after consultations with the Supreme Judicial Council; summarize annually the good and bad practices regarding the observance of the ethical rules in accordance with the relevant European and international standards in connection with the abovementioned checks and shall provide the information to the Colleges of the Supreme Judicial Council. The ISJC carries out its inspections based on an annual program for the respective calendar year (planned inspections), upon signals and upon self-referral. The ISJC prepares an annual report on its activities, which is presented to the plenum of the Supreme Judicial Council and is considered by the National Assembly of the Republic of Bulgaria.

Q070-1 (2018): "Other": percentage of returned cases

Denmark

Q070-1 (2024): Length of procedure: If what is meant is how long from charge to indictment, then that is something we measure and it is not a new procedure.
Cost of judicial procedure: We have changed the answer compared to the previous evaluation cycle. Clearance rate: We monitor both the number of pending charges without indictment and pending charges without decision and can thereby calculate the difference and have been able to do so not just this year, so this is not a new procedure either.

Q070-1 (2023): Length of procedure: If what is meant is how long from charge to indictment, then that is something we measure and it is not a new procedure.
Cost of judicial procedure: We have changed the answer compared to the previous evaluation cycle. Clearance rate: We monitor both the number of pending charges without indictment and pending charges without decision and can thereby calculate the difference and have been able to do so not just this year, so this is not a new procedure either.

Q070-1 (2022): - The prosecution makes monthly reports to the Ministry of Justice on data regarding number of cases, clearance rate, etc.
- Disposition time is measured indirectly through a report that measures all steps in a criminal case from arrest to imprisonment. There
is no direct measure of disposition time, but it can be read from this report.
- The prosecution makes an biannual survey on the satisfaction of the prosecution staff.

Q070-1 (2021): The prosecution makes quarterly reports to the Ministry of Justice on data regarding number of cases, percentage of conviction etc.
Disposition time is measured indirectly through a report that measures all steps in a criminal case from arrest to imprisonment. There is no direct measure of disposition time, but it can be read from this report. The prosecution makes a biannual survey on the satisfaction of the prosecution staff.

Q070-1 (2020): The methodology of replying changed in this question.
The prosecution makes quarterly reports to the Ministry of Justice on data regarding number of cases, clearance rate, etc. Disposition time is measured indirectly through a report that measures all steps in a criminal case from arrest to imprisonment. There is no direct measure of disposition time, but it can be read from this report. Therefore we find it more correct to check this option. Satisfaction of the prosecution staff has always been measured but not by the ministry of justice. Therefore it was not checked last time. However, it is measured, and we therefore find it correct to check this option. The prosecution makes an annual survey on the satisfaction of the prosecution staff.

Finland

Q070-1 (2021): "Backlogs": cases that have been pending for longer than a year are monitored

Q070-1 (2020): "Backlogs": cases that have been pending for longer than a year are monitored.

France

Q070-1 (2024): Civil and criminal courts: source: DSJ
There is no regular monitoring of the activities of public prosecutor services for the satisfaction of public prosecutor staff and for the costs of legal proceedings.

Q070-1 (2021): Source DSJ

Q070-1 (2020): Judicial jurisdiction.

Germany

Q070-1 (General Comment): The Federal Statistical Office collects key figures on the public prosecution offices' performance (incoming cases, resolved cases, pending cases on the beginning and the end of a year) from the federal states and publishes the data once per year.

Q070-1 (2024): All feredal states reported monitoring regarding number of incoming, resolved and pending cases as well as lenght of proceedings and disposition time.
4 federal states reported monitornig costs of the judicial procedures and 2 reported monitoring productivity of prosecutors and prosecution staff.

Q070-1 (2023): The monitoring activities no. 1-4 were selected by all respondent federal states and the activities and 5 and 10 to 12 were selected by the majority of the federal states. A minority of the federal states also monitors the costs of the judicial proceedings

Q070-1 (2022): The monitoring activities no. 1-4 were selected by all respondent federal states and the activitiers and 5 and 10 to 12 were selected by the majority of the federal states. A minority of the federal states also monitors the costs of the judicial proceedings.
One federal state has not yet replied.

Q070-1 (2021): The monitoring activities no. 1-5 and 1-12 were selected by most Länder, the activity no. 9 (monitoring of costs) was selected by some (5) Länder.

Q070-1 (2020): A few Länder answered that they have also been monitoring productivity and costs.

Greece

Q070-1 (2024): The twelfth option has been chosen by some courts.

Q070-1 (2022): It is noted that the clearance rate was not selected by all prosecutors'offices, in addition several prosecutors' offices but not all have chosen the option of percentage of convictions and acquittals.

Hungary

Q070-1 (2022): The public prosecution services are led in a hierarchical structure. Leaders perform their duties at a national and regional level, as well as at the level of each organizational unit. It is up to the decision of the leader who exercises the employer’s rights to determine how the activities (performance, quality) of the prosecution office should be evaluated and on the basis of what indicators in order to manage the organizational unit effectively. The set of indicators may vary from year to year, depending on the circumstances. Therefore, more than one answer could be given to the given question.
For example, the performance of individual prosecutors or officers may be assessed at the level of an organizational unit; a staff satisfaction survey may be conducted; or a target analysis based on client satisfaction may be carried out.
The clearance rate could also be considered as a reference point and is actually monitored by the public prosecution services. However, statistics are produced at the level of the prosecution services and at the regional level on a calendar year basis. Therefore, those decisions on the termination of prosecution proceedings which are made at the end of a year, but become final only in the following year, can only be taken into account in the next year. The number of indictments and the number of finally closed cases that are closed because of finally closed court cases in the years after the indictment may also differ from the number of indictments on an annual basis. Therefore, the “clearance rate” – as a reference point – is a difficult criterion to follow.
At the national level, the Prosecutor General is required to present a report to Parliament. This report does not focus on the performance of individual public prosecutors; instead, it assesses the performance of the public prosecution service as a whole and according to a breakdown of organizational units. In our 2023 response, we tried to take this into account and, in this respect, we have indicated that primarily the indicators indicated were taken into account. Compared to our previous response in 2020, there was no change in terms of the fact that the clearance rate had been taken into account, even if it was not the primary evaluation criterion.

Q070-1 (2021): The BTM system (Criminal Justice Activity Indicator System) is available for the Prosecution Service of Hungary. This system requlary monitors prosecution activities (performance and quality), however, it does not contain any information about the number of incoming cases, length of proceedings, number of resolved cases, backlogs etc.

Ireland

Q070-1 (2023): Information is published in Part 2 and Appendix 3 of ODPP Annual Report 2022 (https://www.dppireland.ie/app/uploads/2024/05/AR-2022-eng-copy.pdf)

Q070-1 (2022): Information is published in Part 2 and Part 4 of ODPP Annual Report 2021 (https://www.dppireland.ie/app/uploads/2023/02/AR2021eng.pdf).

Q070-1 (2020): information is published in Annual Report available at: https://www.dppireland.ie/app/uploads/2020/10/AR-2019-eng.pdf

Q070-1 (2018): Information is published in Annual Report available at https://www.dppireland.ie/filestore/documents/AR2017_[eng].pdf

Latvia

Q070-1 (2024): Discontinued/closed criminal cases, quality of the final decisions made by the prosecutors, the motives of the protests submitted by the prosecutors and the examination results, crime trends in certain topical qualifications of criminal offenses (e.g. money laundering, human trafficking, sex crimes, violent crimes, etc.). Different quantitative performance targets have been assessed and monitored. The data in the monthly reports provided by public prosecutors allows (and has allowed in previous years too) to see the disposition time as well, however, there have been no standards set, for instance as to how long is too long. With the new system this indicator (disposition time), among others, is used to evaluate the professional performance of the prosecutor, even though only in comparison with other prosecutors.

Q070-1 (2023): Discontinued/closed criminal cases, quality of the final decisions made by the prosecutors, the motives of the protests submitted by the prosecutors and the examination results, crime trends in certain topical qualifications of criminal offenses (e.g. money laundering, human trafficking, sex crimes, violent crimes, etc.).
As stated in comments provided before (e.g. in the answer to Q83-2), different quantitative performance targets have been assessed and monitored. The data in the monthly reports provided by public prosecutors (referred to in comment to Q83.1-1 in 2022) allows (and has allowed in previous years too) to see the disposition time as well, however there have been no standards set, for instance as to how long is too long. With the new system this indicator (disposition time), among others, is used to evaluate the professional performance of the prosecutor, even though only in comparison with other prosecutors.

Malta

Q070-1 (2022): The Office of the Attorney General has embarked on a data management process that is seeing more information being collected in respect of the efficiency parameters of the Office. This explains why in this evaluation cycle, the cathegories of 'Backlog' and ' Productivity of Prosecutors and prosecutors staff' have been marked.

Q070-1 (2021): The Attorney General is collecting data on length of proceedings and using it to monitor efficiency. This exercise will be refined in the coming months within the scope of an ongoing project addressing the re-engineering of processes within the Office of the AG.

Q070-1 (2018): The Office of the AG does hold a record of the number of incoming cases and terminated cases, but these are not as yet organised into official performance indictaors.

Poland

Q070-1 (2021): In 2021, following the implementation of the new central ICT system PROK-SYS, which provides for a modern reporting system, the possibility of obtaining data on a wide range of activities of all organisational units of the prosecution offices was created. The system provides a solution for generating types of reports on the costs of proceedings. This allows for daily supervision of the activities of the prosecution offices from every level, including the central level. Prior to 2021, data on the costs of proceedings were only collected locally.

Portugal

Q070-1 (2020): We included “clearance rate” and “disposition time” because one of the tasks of the public prosecutor coordinator is to monitor and evaluate the activity of the public prosecutors services, including the efficiency of procedures. Article 101 of Law 62/2013, 26th August on judicial organization.

Romania

Q070-1 (2024): Other: National Repository-starting 2023 the ECRIS 3 application (that was used only locally, at the level of each prosecution office) was extended and centralized in order to replicate most of the data available in the local ECRIS. ROARMIS-an application that monitors the debt recovery process starting the first stages of criminal investigation. SOICCAP-SAS - an application that monitors the complexity of the activity of each prosecutor and prosecution office, taking into account not only the number of cases, but the totality of activities for each case.

Q070-1 (2023): Other: National Repository-starting 2023 the ECRIS 3 application (that was used only locally, at the level of each prosecution office) was extended and centralized in order to replicate most of the data available in the local ECRIS. ROARMIS-an application that monitors the debt recovery process starting the first stages of criminal investigation. Slovak Republic

Q070-1 (2024): The verification activity is carried out once a year, either randomly or based on a plan. It focuses on one subordinate prosecutor's office, either regional or district, in the non-criminal section.
The monitoring process focuses on all files from a specific period and reviews them thoroughly. This includes making sure the files are complete, and meet both procedural and legal standards

Q070-1 (2023): The verification activity is carried out once a year, either randomly or based on a plan. It focuses on one subordinate prosecutor's office, either regional or district, in the non-criminal section.
The monitoring process focuses on all files from a specific period and reviews them thoroughly. This includes making sure the files are complete, and meet both procedural and legal standards.

Slovenia

Q070-1 (General Comment): The BI tools that use data gathered in information system of the State Prosecutor's Office provide the heads of prosecution offices with up-to-date overview of the performance of state prosecutors and the functioning of the office. Heads can customize the level and content of information presented to them for the purpose of making quantitative data supported decisions on allocation of work among prosecutors, control of the case-flow.

Q070-1 (2024): Other: percentage of different types of decisions, value of proceeds of crime under freezing order, pronounced criminal sanctions…

Q070-1 (2023): "other": percentage of different types of decisions, value of proceeds of crime under freezing order, pronounced criminal sanctions.

Q070-1 (2022): "other": percentage of different types of decisions, value of proceeds of crime under freezing order, pronounced criminal sanctions…

Q070-1 (2020): "Other": percentage of different types of decisions, value of proceeds of crime under freezing order, pronounced criminal sanctions…

Spain

Q070-1 (General Comment): The inspection service of the Public Prosecutor Office

Q070-1 (2024): The Fiscal Inspection Service is an internal body within the Public Prosecutor, responsible for overseeing and monitoring compliance with the duties and obligations of prosecutors and the proper functioning of the prosecutor's offices

Q070-1 (2023): The Fiscal Inspection Service is an internal body within the Public Prosecutor, responsible for overseeing and monitoring compliance with the duties and obligations of prosecutors and the proper functioning of the prosecutor's offices

Question 071

Belgium

Q071 (General Comment): College of Courts and Tribunals: current mechanism (current exercise - backlog project)

Q071 (2016): There are ad hoc evaluation systems within the courts. But there is no central or coordinated system.

Bulgaria

Q071 (General Comment): The duration of the court proceedings initiated by the Prosecutor's Office of the Republic of Bulgaria is monitored, as in case of excessive delay there is a possibility to request acceleration of these proceedings through the procedure under Chapter 26 of the PPC.

Denmark

Q071 (2024): We monitor all three options regarding pending cases and have been previously as well. The reason for the change is due to a new understanding of the question in regards to the use of the word "monitor". We now understand it as we collect the data, however we cannot force action upon the courts based on this data.

Q071 (2023): We monitor all three options regarding pending cases and have been previously as well. The reason for the change is due to a new understanding of the question in regards to the use of the word "monitor". We now understand it as we collect the data, however we cannot force action upon the courts based on this data.

Q071 (2021): Danish Court Admininistration is typically not doing this. A responsible court follow their cases though.

Q071 (2020): Danish Court Administration is not doing it as a general thing. If a specific court needs help, Danish Court Administration can work out list of pending cases and list them according to age to give the court a tool to locate cases that need attention.

France

Q071 (2021): Source DSJ and Council of State

Q071 (2020): No further indication.

Q071 (2016): In civil matters, courts of first instance (TGI), labour courts (conseils de prud'hommes) and courts of appeal can measure their stock on the basis of business applications or data returns carried out by info-centers.
The identification of cases not processed within a reasonable time is easier through business applications that offer dashboards breaking down cases in stock by age group.
In criminal matters, first instance courts (TGI) can use the Cassiopée business application to record cases in stock at the registry and the number of unedited judgments. The situation of cases in stock at the registry office cannot be measured via the info-centre, which only allows establishing the number of cases registered with the Public Prosecutor's Office and the Correctional Service.

Germany

Q071 (2024): The majority of the respondent federal states monitor pending cases and backlogs.

Q071 (2023): The majority of the respondent federal states monitor pending cases and backlogs.

Q071 (2022): The majority of the respondent federal states monitor pending cases and backlogs. Two federal states could not provide an answer, one federal state has not yet replied.

Q071 (2021): Four of the Länder could not provide an answer. The remaining Länder monitor pending cases and backlogs for all of the case categories mentioned above.

Q071 (2020): The majority, but not all of the Länder have reported to monitor pending cases and backlogs.

Q071 (2018): In 2018, Länder have monitored the number of pending cases and the backlogs.

Hungary

Q071 (General Comment): Judges have to report those cases on a monthly basis that are pending for more than 2 years. The president of the court can
order a fast-track procedure for a case based on the report.

Q071 (2018): Judges have to report those cases on a monthly basis that are pending for more than 2 years. The president of the court can order a fast-track procedure for a case based on the report.

Ireland

Q071 (2024): Civil Law statistics are recorded by cases received and cases resolved during the year. The majority of civil cases initiated in Ireland do not proceed to trial. Typically, they are settled between the parties (with or without a court approval), are formally discontinued (with notification to the defendant and the court), or are not pursued further by the plaintiff (without the plaintiff notifying the court). It is therefore not possible to provide figures for pending caseloads in most courts. In Criminal Law, backlogs can be measured when required.

Q071 (2023): Civil Law statistics are recorded by cases received and cases resolved during the year. The majority of civil cases initiated in Ireland do not proceed to trial. Typically, they are either settled between the parties (with or without a court approving a settlement), are formally discontinued (involving notification to the defendant and the court), or are not pursued further by the plaintiff (without the plaintiff notifying the court). It is therefore not possible to provide figures for pending caseloads in most courts.
In Criminal Law, cases are counted by offence, not by case/defendant. We record resolved cases as cases where an order is made. As there may be more than one penalty imposed in respect of an offence and a separate order made in respect of each penalty, the figures for resolved cases can appear to be higher than those for incoming cases and can cause difficulty in calculating figures for pending cases.

Q071 (2022): N/A

Q071 (2020): NAP

Q071 (2018): NAP

Q071 (2016): NAP

Latvia

Q071 (2018): We have created a specific tool for this purpose that is available also in public from https://dati.gov.lv/

Lithuania

Q071 (2024): The number of pending cases and cases that are not processed within a reasonable timeframe (backlogs) for civil, criminal and administrative law cases are monitoring.

Luxembourg

Q071 (2018): New systems of monitoring have been implemented since 2016 (JUCIV for the civil law cases and JANGA for administrative law cases)

Q071 (2016): No regular system has been implemented up to today. However, a monitoring can be done through the statistical service of the judiciary (SSJ) on an punctual basis and upon request by the competent authorities.

Netherlands

Q071 (General Comment): The public prosecution logically only monitors criminal law cases, the courts monitor all types of cases.

Q071 (2021): Public prosecution only monitors criminal law cases, the courts monitor all.

Romania

Q071 (2024): STATIS - statistics monitoring application including for court's efficiency assessment

Q071 (2023): STATIS - statistics monitoring application including for court's efficiency assessment

Question 072

Austria

Q072 (2024): Judicial proceedings – of both courts and public prosecution services – are systematically monitored for undue waiting periods. Depending on the type of proceeding a waiting period (= time during which no steps are taken in the proceeding) of three months, six months or twelve months is considered to be potentially undue. A waiting period exceeding this timeframe will lead to the proceeding appearing on an automatically generated list for review. The answer is different from last years, because the question has not been answered correctly in the past.

Q072 (2016): Supreme administrative Court: Statistic of incoming cases, number of decisions delivered, number of postpones cases, length of proceedings (timeframes) and age of cases

Belgium

Q072 (General Comment): For the public prosecution services: monitoring using dashboards.

Q072 (2021): Public Prosecutor's Office: Monitoring mechanism via dashboards for the public prosecution services.

Q072 (2020): Monitoring mechanism via dashboards for prosecution services.

Bulgaria

Q072 (2024): The Inspectorate to the Supreme Judicial Council (ISJC):
One of the main powers of the Inspectorate to the Supreme Judicial Council (ISJC) is to "check the organization of the initiation and progress of court, prosecution, and investigation cases, as well as the completion of cases within the established time limits" (Article 54, paragraph 1, item 2 of the Judiciary System Act). In exercising this power, the ISJC monitors for delays in the course of the relevant proceedings, which is done within the framework of the inspections carried out on the judicial authorities (comprehensive planned/scheduled inspections or inspections based on reports/signals) or when conducting preliminary investigations into reports/signals from individuals or legal entities of violations in the handling of cases. This year, the ISJC is responding to the questionnaire for the first time, as it has not been sent to it before. In previous years, the SJC probably gave a negative answer to this question in view of its own powers, rather than those exercised by the ISJC, which is an independent body separate from the SJC.

Denmark

Q072 (2024): We do collect data on the waiting time from the case is recieved in the system until the first court meeting and then until the case is finalized. But we do not use the data for monitoring the courts in regards to regulating the courts. The data is used for analysis among other things. The courts might individually keep track of the waiting time.

Q072 (2023): We do collect data on the waiting time from the case is recieved in the system until the first court meeting and then until the case is finalized. But we do not use the data for monitoring the courts in regards to regulating the courts. The data is used for analysis among other things. The courts might individually keep track of the waiting time.

Q072 (2021): Danish Court Admininistration is typically not doing this. A responsible court follow their cases though. The individual courts may work out list of pending cases or worning lists when to act on a case.

Q072 (2020): Danish Court Admininistration is typically not doing this. A responsible court follow their cases though.

Q072 (2018): We monitor the overall time from the courts receive a case until it is finalized, but not what happen in between. The same goes for the prosecution

Estonia

Q072 (General Comment): There are reminders in the CMS after certain period.

Finland

Q072 (2021): Within the courts, the time the case is pending in a court is monitored.
Prosecution services: The time between police investigation and prosecutor’s decision (the time the case is pending in the prosecution service) is monitored.

Q072 (2020): Within the courts, the time the case is pending in a court is monitored.

Q072 (2018): Within the courts, the time the case is pending in a court is monitored.

France

Q072 (2024): Administrative justice : source: Council of state
The mechanism for monitoring waiting time during court proceedings exists only for administrative courts (source: Council of State). The Skipper software allows one to see the status of the case and whether an investigative measure is pending. However, it does not send an alert to the investigating judge.

Q072 (2021): Source DSJ, the reply concerns the civil and criminal justice.

Q072 (2020): Answer for the court.

Germany

Q072 (2024): One federal state monitors waiting time with respect to the ordinary courts. A minority of 2 federal states monitor waiting time with regard to the public prosecution services. The vast majority of the federal states does not monitor waiting time.

Q072 (2023): One federal state monitors waiting time with respect to the ordinary courts. A minority of 2 federal states monitor waiting time with regard to the public prosecution services. The vast majority of the federal states does not monitor waiting time.

Q072 (2022): One federal state monitors waiting time with respect to the ordinary courts. A minority of 3 federal states monitor waiting time with regard to the public prosecution services. The vast majority of the federal states does not monitor waiting time.

Q072 (2021): Courts: One of the Länder reported that waiting times are monitored with respect to ordinary courts.
Public Prosecution: While the majority of the Länder answered "no", a small minority of 3 Länder answered "yes".

Greece

Q072 (General Comment): The waiting time during court procedures is monitored annually through the inspection process.The interval between the adjudication of the case and the issuance of the decision is watched, so that the judge does not have much pending and there is a quick delivery of justice.

Q072 (2024): The President of the Court and the Presidents of the Departments oversee the proceedings, and if it is observed that a case has been pending for an extended period, they issue recommendations to the judges to whom the case has been assigned(Council of State).

Q072 (2018): There is a monitoring system regarding the length of the judicial procedure, but it does not include such kind of information.

Q072 (2016): There is a monitoring system regarding the length of the judicial procedure, but it does not include such kind of information.

Hungary

Q072 (General Comment): The administrative office of the court reports those cases to the president in which there was no judicial activity in the last 30 days.

Q072 (2023): Judges: Two legal institutions are not taken into account in the length of the procedure:
Interruption of proceedings - Act CXXX of 2016 on the Code of Civil Procedure point 34.
Stay of proceedings - Act CXXX of 2016 on the Code of Civil Procedure point 35.
Prosecutors: The Prosecution Service takes into account the inactive period in court proceedings and has answered 'yes' to the question accordingly.

Q072 (2022): It was not possible to give an unambiguous answer to this question because of the reasons given in point 70-1. There are several possible "waiting times" in court proceedings which can be monitored. The length of proceedings can be and is monitored by the public prosecution services at the organizational, regional and local levels to different extents. As there was no substantive change in this respect, our reply is modified as follows, in line with the previous answer.
If the question refers to the judicial recess, the answer is "yes"; it is monitored by those who exercise the employer's rights, mainly for the purpose of granting a leave of absence.

Q072 (2018): The administrative office of the court reports those cases to the president in which there was no judicial activity in the last 30 days.

Ireland

Q072 (2023): We currently capture waiting times for most jurisdictions and areas of law, and we are increasing the capture of duration of proceedings.

Italy

Q072 (2018): Waiting time is monitored only for Administrative Justice.

Latvia

Q072 (2024): On an irregular basis, the Ministry of Justice and the Council of Justice analyze the number of days (period) from the initiation or receipt of the case in court to the moment when the case review is started.

Q072 (2022): "Within the courts": On an irregular basis, the Ministry of Justice and the Council of Justice analyze the number of days (period) from the initiation or receipt of the case in court to the moment when the case review is started.

Lithuania

Q072 (2024): Through administrative supervision mechanism

Q072 (2023): Through administrative supervision mechanism

Q072 (2022): Within the courts: through an administrative supervision mechanism.

Q072 (2020): courts: through administrative supervision mechanism

Luxembourg

Q072 (2014): According to 2014 data, the newly set up statistical tools, as well as the courts' CMS, allow an "as needed" check of the waiting time.

Malta

Q072 (2016): In Malta, there is no formal monitoring system. However, an "informal" monitoring used to take place. It falls mostly within the remit of the Chief Justice and the respective members of the judiciary.

Netherlands

Q072 (General Comment): Waiting time can be monitored through registration in the court system.
Agreements are made across the justice chain on timeframes in which particular caseloads (sexual offences, youth cases, and specific traffic violations) should be handled. These agreements are monitored.
Government (the Second Chamber) is annually informed on the agreements via factsheet. Additionally, timeframe agreements were reached within the public prosecution on the speed with which penal orders are to be issued, the terms in which an objection is to be judged and the speed with which the first decision with attachment is to be taken.

Q072 (2020): Within the courts: Registration in the court system gives the opportunity to monitor waiting time.
Within the public prosecution services: Across the justice chain, agreements have been made on the timeframes in which particular caseloads (sexual offences, youth cases and specific traffic violations) should be handled. These agreements are monitored. Annually, the government (Second Chamber) is informed on this via the factsheet 'Strafrechtketen'. Besides this, timeframe-agreements have been reached within the public prosecution on speed with which penal orders are to be issued, terms in which an objection is to be judged and the speed with which the first decision with attachment is to be taken (eerste beslissing bij beslag).

Poland

Q072 (General Comment): Public Prosecution services
The issue of the duration of pre-trial proceedings is defined in the Code of Criminal Procedure, in Article 310 § 1 and § 2 and Article 325i § 1. Article 310 § 1 and § 2 states that the investigation shall be completed within 3 months. In justified cases the investigation period may be extended by a specified period of time by the public prosecutor supervising the investigation or the public prosecutor directly superior to the public prosecutor leading the investigation, but not longer than one year. In particularly justified cases a competent public prosecutor superior to the prosecutor supervising or leading the investigation may extend the investigation by a specified period of time.
Article 325i § 1 states that an investigation should be completed within 2 months. The prosecutor may extend this period to 3 months, and in particularly justified cases – to a longer specified period of time.
The authority empowered to order the extension of an investigation or an inquiry by a specified period of time shall monitor such proceedings with respect to their proper conduct in view of their possible length and shall assess the validity of the procedural steps taken or to be taken.
The request for the extension of an investigation or an inquiry must include the steps that need to be taken in the further course of the proceedings and indicate the reasons why they have not yet been taken.
Courts:
The presidents of the courts, in exercising internal administrative supervision over the administrative activity of the courts, control the taking of actions by judges within appropriate time limits; direct control is also exercised by the presidents of the divisions. Monitored also within the framework of management control and analysis of annual information on activities of courts operating within the area of appellate courts prepared by presidents of courts of appeal

Q072 (2024): ongoing monitoring of statistical data by court presidents regarding the duration of proceedings in specific categories of cases

Q072 (2021): * courts -The presidents of the courts, exercising internal administrative supervision over the administrative activity of the courts, control the taking of actions by the judges in due time; direct control is also exercised by the presidents of the divisions. Monitoring also takes place within the framework of the external administrative supervision of the Minister of Justice over the administrative activity of common courts within the framework of management control and analysis of annual information on the activity of courts operating on the territory of courts of appeal prepared by presidents of courts of appeal.
*prosecutors - In the course of pre-trial proceedings, the public prosecutor commissioning other bodies to carry out procedural actions or appointing experts to prepare an opinion shall each time set a deadline for their implementation. If the entrusted activities are not carried out in time, the prosecutor makes an enquiry as to the reasons for the delay and the deadline for carrying out the activities. The course of pre-trial proceedings is monitored both in terms of internal service supervision and external service supervision, in order to ensure their proper dynamics.
At the trial stage, if a hearing is postponed without a date being set, the prosecutor's office makes timely enquiries as to whether the reasons preventing it from being scheduled have ceased.

Q072 (2018): In the mode of external and internal administrative supervision over the administrative activity of courts by analyzing the results of the courts or departments and monitoring the efficiency of individual cases in the case of detected lengthiness.

Portugal

Q072 (General Comment): Through SITAF and CITIUS (case management systems for administrative and tax courts and judicial courts, respectevly) it is possible to check waiting times during judicial proceedings.
The Portuguese Code of Criminal Procedure establishes no binding timeframes for criminal investigations. At a national level, within the public prosecution services, there is only monitoring of the judicial proceedings time during on criminal investigations, with reference to this timeframe.
At a local level, some other proceedings (such as the initial intervention of public prosecutors on protection of adults with some incapacity, requesting accompanying measures – under the legal framework of the accompanied adult [Regime Jurídico do Maior Acompanhado]) are also monitored on time duration.

Q072 (2022): The waiting period is monitored in the quarterly monitoring of all judicial courts. The Court President reports to the council the number of cases that are waiting procedural movement for more then 1, 2, 3 or 4 months.

Q072 (2021): Because of the Covid-19 pandemic, the courts were asked for specific elements on the steps taken in the Courts. Also, the procedural laws (e.g. civil and criminal) provides that the registry shall send to the President of the Court, on a monthly base, information detailing the cases in which three months have elapsed since the expiration of the deadline set for the performance of the judge's own act.

Q072 (2018): Through SITAF and CITIUS (case management systems) it is possible to check waiting times during judicial proceedings.

Romania

Q072 (2024): There are statistical reports developed by an IT application called Statis that monitor the duration of a court trial on different levels - total time, preliminary proceedings, delays between the sessions, time for drafting the decision etc.

Q072 (2023): There are statistical reports developed by an IT application called Statis that monitor the duration of a court trial on different levels - total time, preliminary proceedings, delays between the sessions, time for drafting the decision etc.

Q072 (2022): There are statistical reports developed by an IT application called Statis that monitor the duration of a court trial on different levels - total time, preliminary proceedings, delays between the sessions, time for drafting the decision etc.

Q072 (2021): There are statistical reports developed by an IT application called Statis that monitor the duration of a court trial on different levels - total time, preliminary proceedings, delays between the sessions, time for drafting the decision etc.

Q072 (2020): There are statistical reports developed by an IT application called Statis that monitor the duration of a court trial on different levels - total time, preliminary proceedings, delays between the sessions, time for drafting the decision etc.

Q072 (2018): There are statistical reports developed by an IT application called Statis that monitor the duration of a court trial on different levels - total time, preliminary proceedings, delays between the sessions, time for drafting the decision etc.

Q072 (2016): There are statistical reports developed by an IT application called Statis that monitor the duration of a court trial on different levels - total time, preliminary proceedings, delays between the sessions, time for drafting the decision etc.

Q072 (2014): According to 2014 data, there are statistical reports developed by Statis IT application monitoring the duration of a court trial on different levels - total time, preliminary proceedings, delays between the sessions, time for drafting the decision etc. More precisely, in 2014, the Superior Council of Magistracy has established a working group that has analyzed several national and international documents on the efficiency of the courts and has developed a set of indicators that are used to make an overall assessment of the efficiency of courts, sections and, if needed panels of judges. These indicators were implemented and used in the Statis application.

Slovak Republic

Q072 (2024): The prosecutor's office, as one of the parties to the legal proceedings, cannot fundamentally influence its length. However, prosecutors continuously monitor the status of criminal cases after the indictment has been filed and, in justified cases, communicate with the courts to determine the reasons for inaction or the current status of the case, usually by written requests.
The prosecutor, as a party to the proceedings, also has the authority in this regard arising from the legal regulation, namely to file a complaint for inaction pursuant to Section 55, paragraph 3 of the Criminal Procedure Code. Complaints for inaction under Section 55(3) of the Criminal Procedure Code were filed by prosecutors in a total of 186 cases in 2024.

Q072 (2023): If the prosecutor becomes involved in a specific procedure, receives a complaint about court inactivity, or becomes aware of such inactivity through other means, they must either highlight the inactivity within the proceedings or request the president of the court to take action to resolve it.

Slovenia

Q072 (General Comment): In accordance with the Prosecution Policy adopted in 2017, cases in which a final court decision at first instance has not been adopted within 3 years of filing a written charge with the court, are monitored in particular.

Question 083

Austria

Q083 (2018): There are no specific targets given to the Judges, which are seen as a conflict with the Independence of Courts.

Q083 (2016): Provincial Administrative Courts: Maximum 150 cases a year per judge (average value).
Federal Finance Court:
No performance targets, which are seen in conflict with the independence. However based on a continuous transparent controlling the possibility of benchmarking exists. In addition regular dialogues with the judges regarding their performance are held.

Croatia

Q083 (2020): According to the Courts Act (Official Gazette No. 28/13, 33/15, 82/15, 67/18) , the Minister in charge for Justice, upon the proposal of the General Assembley of the Supreme Court of the Republic of Croatia, adopts the Framework criteria for the work of judges.

Czech Republic

Q083 (General Comment): Quantitative performance targets exist but they are not strictly binding. The Ministry of Justice in the Czech Republic uses "measures" (měřítka) as the sole numerical indicators for allocating judge and support staff positions across courts on an annual basis. Functioning similarly to case weights, these measures represent the notional number of cases that a judge or support staff member should handle in a year on a full-time basis; for example, in 2024, each district court judge is expected to manage 352 civil cases or 230 criminal cases annually. The measures are updated or confirmed each year by the systemisation commission, an informal body of representatives from regional, superior, and supreme court management, along with the Ministry of Justice. They are published in documents that accompany the Minister of Justice's annual allocation decision.
Universal across courts of the same level, these measures and historical case data guide the Ministry in distributing judge and staff positions among superior, regional, and district courts. Regional court presidents have the flexibility to adjust these allocations based on local conditions or specific court needs, while staffing for the Supreme Court and Supreme Administrative Court is managed through direct arrangements between their respective presidents and the Minister of Justice.
To improve the accuracy of these allocations, the Ministry of Justice is undertaking a project, supported by the European Commission’s Technical Support Instrument, to gather empirical data on the labour intensity of various tasks performed by judges and support staff. This project aims to strengthen the factual basis for determining the measures.
Additionally, court presidents continuously monitor the performance of judges and support staff to ensure cases are processed within reasonable timeframes, upholding individuals' right to have cases heard promptly. However, the Ministry of Justice does not regulate or oversee this managerial and disciplinary authority, which is independently exercised by court management.

Q083 (2018): Quantitative performance targets exist but they are not strictly binding.

Denmark

Q083 (General Comment): Judges are independent. Therefore measuring is done focusing on case-flows and economic indicators without identifying the individual judge.

Q083 (2022): The judges are independent. Therefore measuring is done focusing on case-flows and economic indicators.

Q083 (2018): There are no such targets from the side of Danish Court administration, but quantitative performances are used to re-allocate ressources so the court in most need of ressources in case of a vacant judge position also gets the vacant position.

Finland

Q083 (General Comment): A court can decide whether it sets quantitative performance targets for each judge. There are targets set for each judge in some courts.

Q083 (2016): It is up to each court to decide. In some courts there are targets set for each judge.

France

Q083 (2024): For civil and criminal courts the reply is "No". For administrative courts the reply is "Yes".

Q083 (2022): The positive reply concerns administrative courts.

Q083 (2016): Individual quantitative objectives are established only with regard to administrative judges by the respective court president.

Germany

Q083 (General Comment): There are no quantitative performance targets because this might interfere with judicial independence as defined by article 97 of the Basic Law for the Federal Republic of Germany ("Judges shall be independent and subject only to the law.").

Q083 (2024): Of the respondent federal states, all but one reported that there are no quantitative performance targets for judges.

Q083 (2023): Of the respondent federal states, all but one reported that there are no quantitative performance targets for judges.

Q083 (2022): Of the respondent 15 federal states, 14 reported that there are no quantitative performance targets for judges. One federal state has not yet replied.

Greece

Q083 (General Comment): The Head of each court is responsible for the assignment of the cases between judges of his/her competence. In this sense, he/she is aware of the quantitative performance of judges. The assigned cases have to be dealt with by the judges within the period of 8 (eight) months according to Law 4983/2022 (art. 99-104) and Law 2717/1999 art. 194 par.1.
Each administrative court sets up an internal service regulation (Article 19 of Law 4938/2022) which specifies, among other things, the number of cases assigned to each judge per month or year, taking into consideration the special circumstances of each court, the number of serving judges and the seriousness of the cases(General Commission of the State for ordinary administrative courts).

Q083 (2023): Each administrative court sets up an internal service regulation (Article 19 of Law 4938/2022) which specifies, among other things, the number of cases assigned to each judge per month or year, taking into consideration the special circumstances of each court, the number of serving judges and the seriousness of the cases(General Commission of the State for ordinary administrative courts).

Q083 (2022): Every administrative judge is charged each year with a specific number of cases to carry out, stipulated by an internal Regulation, according to a model adopted by the General Commission of the State.

Q083 (2020): Every administrative judge is charged each year with a specific number of cases to carry out, stipulated by an internal Regulation.

Q083 (2018): Every judge is charged each year with a specific number of cases to carry out, stipulated by an internal Regulation.

Q083 (2016): Every judge is charged each year with a specific number of cases to carry out, stipulated by an internal Regulation.

Hungary

Q083 (2024): There is no specified number of cases to resolve for each judge, but according to the act on the Legal Status and Remuneration of Judges and the regulation governing the administration of courts, the number of hearing days is mandatorily specified.

Q083 (2023): There is no specified number of cases to resolve for each judge, but according to the act on the Legal Status and Remuneration of Judges and the regulation governing the administration of courts, the number of hearing days is mandatorily specified.

Italy

Q083 (General Comment): Law n.71 of 17 June 2022 has recently modified article 2 of Legislative Decree n.109, 23 February 2006, regarding disciplinary responsibility of professional magistrates. The amendment has introduced specific disciplinary offences regarding the conduct of the magistrate who does not cooperate in reaching the goals laid in the 'Program for the management of civil and criminal proceedings' (in Italian 'Programma di Gestione'), which is disciplined by art37 of Decree-Law II. 98 of 6 of July 2011 and regularly approved by each Court.

Q083 (2020): Quantitative performance targets are set in terms of length and timeframe of proceedings. Judges who fail to meet certain
requirements may face disciplinary proceedings.

Q083 (2018): Quantitative performance targets are set in terms of length and timeframe of proceedings. Judges who fail to meet certain requirements may face disciplinary proceedings.

Q083 (2016): Quantitative performance targets are set in terms of length and timeframe of proceedings. Judges who fail to meet certain requirements may face disciplinary proceedings.

Malta

Q083 (General Comment): The administration of the case load is left in the hands of the individual judge and magistrate together with the Chief Justice who assigns the particular duties to each judge and magistrate.

Q083 (2016): The administration of the case load is left in the hands of the individual judge/ magistrate together with the Chief Justice who assigns the particular duties to each judge and magistrate.

Netherlands

Q083 (2016): There is a planning and control cycle (3 times per year) which involves financial/accounting evaluation but also visits ('bestuurlijke overleggen), there is once per year an accountant check of the annual report (per court and for total of 19 district courts, 5 general appeal courts and 2 specialised courts (Trade and Inductry Tribunal (CBb) and Central Appeals Tribunal (CRvB)), and once every 4 years there is a round of visitations.

Poland

Q083 (General Comment): In general there are not any quantitative performance targets defined for each judge but for certain cases the law imposes timeframe for performing specific action or handling specific matters. President of the court sets the performance target with using statistically calculated indicators of average performance that court and individual judge is expected to achieve.

Portugal

Q083 (General Comment): Taking into account the results obtained in the previous year and the strategic objectives formulated for the following year, the president of the court and the coordinating prosecutor, after hearing the judicial administrator, articulate, for the following year, proposals for objectives of a procedural nature (management or administrative) for the district and for the courts of extended territorial jurisdiction, as well as for the Public Prosecution Offices located there, which have to be ratified respectively by the Judicial High Council and the Attorney General's Office.
The procedural objectives of the district shall refer, in particular, to the number of completed cases and the time of their duration, taking into account, among other factors, the nature of the process or the value of the case, considering the human resources and the means related to the functioning of the district and based, namely, on the established procedural reference values.
The procedural objectives of the district may not impose, limit or condition the decisions to be rendered in specific cases, either on the merits of the matter, or on the option for the procedural form understood as more appropriate.
The procedural objectives of the district must be reflected in the objectives established annually for judicial officers and be considered in the respective assessment.
The procedural objectives of the district must be considered in the evaluation criteria of the magistrates, defined by the respective Councils.

Slovenia

Q083 (General Comment): Since 2016, the Criteria on the work abilities does not include standards for the minimal expected number of solved cases (however the number of resolved cases is still monitored).

Q083 (2018): Since 2016, the Criteria on the work abilities does not include standards for the minimal expected number of solved cases (however the number of resolved cases is still monitored).

Q083 (2016): Since 2016, the Criteria on the work abilities does not include standards for the minimal expected number of solved cases (however the number of resolved cases is still monitored).

Spain

Q083 (General Comment): According to Article 403 of the Organic Law of the Judiciary, "Variable remuneration for objectives shall be linked to the individual performance demonstrated by each judge or magistrate in the performance of his or her jurisdictional and professional functions."
The Agreement of November 29, 2018, of the Plenary of the General Council of the Judiciary, which approves Regulation 2/2018, establishes a complex system in which "individualization is done by establishing certain categories of Courts, taking into account the material content of their respective competence, and certain categories of cases, so that, based on this categorization, a value is obtained, representative of the average resolution time, which is assigned to the types of resolutions." Certain correction factors are then applied.

Q083 (2023): According to Article 403 of the Organic Law of the Judiciary, "Variable remuneration for objectives shall be linked to the individual performance demonstrated by each judge or magistrate in the performance of his or her jurisdictional and professional functions."
The Agreement of November 29, 2018, of the Plenary of the General Council of the Judiciary, which approves Regulation 2/2018, establishes a complex system in which "individualization is done by establishing certain categories of Courts, taking into account the material content of their respective competence, and certain categories of cases, so that, based on this categorization, a value is obtained, representative of the average resolution time, which is assigned to the types of resolutions." Certain correction factors are then applied.

Question 083-1

Austria

Q083-1 (General Comment): No specific targets are formulated in respect of judges.

Q083-1 (2016): Answer counts only for the administrative courts.
For the other courts, no performance targets, which are seen as a conflict with the independence of courts.

Croatia

Q083-1 (General Comment): According to the Courts Act, the Minister of Justice, upon the proposal of the General Session of the Supreme Court of the Republic of Croatia, adopts the Framework criteria for the workload of judges.

Denmark

Q083-1 (General Comment): Judges are independent. Therefore measuring is done focusing on case-flows and economic indicators.

Q083-1 (2018): NA as per answer 083.

Finland

Q083-1 (General Comment): The National Courts Administration negotiates annually with each court in order to set targets and objectives for the court for the next year. An allocation of permanent staff and possible additional temporary judges or other staff is decided upon these negotiations but within the state budget. Timeframe (length of proceedings) targets are also set. Possible issues and problems with developing the activities of the court are also discussed. Finally, the appropriation to cover the annual costs of the court operations is agreed. A minutes of the negotiation is written and it includes the targets, objectives and estimated workloads for the court for the next year. The chief justices of the courts can then apply this results-based management system in their respective courts as they see appropriate.

France

Q083-1 (2024): Civil and criminal courts, the reply is NAP. For administrative courts, it is the court president. No quantitative objective per judge is defined at the national level. The General Secretariat of the Council of State sets an overall objective per court, in consultation with the court president. Court presidents can set quantitative performance objectives per judge: number of cases per year, priority to the oldest cases.

Q083-1 (2023): No quantitative objective is defined per judge at the national level. For administrative courts, the General Secretariat of the Council of State, in consultation with the head of court, sets an overall objective for each court.
The heads of jurisdiction can set quantitative performance objectives per judge: number of cases per year, priority to the oldest cases.

Germany

Q083-1 (2024): One federal state reported, that quantitative performance targets can be defined based on the system used to determine staffing requirements of the judiciary.

Q083-1 (2023): One federal state reported, that quantitative performance targets can be defined based on the system used to determine staffing requirements of the judiciary.

Q083-1 (2020): There are no quantitative performance targets for each judge

Greece

Q083-1 (General Comment): Besides the heads of courts, there are also the plenary of the Supreme Courts.

Ireland

Q083-1 (2018): NAP

Q083-1 (2016): NAP

Latvia

Q083-1 (General Comment): According to the Law on Judicial Power, when adjudicating, judges are independent and are subject only to the law. Therefore, judges set targets by themselves. However, the President of the court monitors the workload of the judges in the court as a whole, assigning cases to another judge if necessary.

Q083-1 (2024): According to the Law on Judicial Power, when adjudicating, judges are independent and are subject only to the law. Therefore, judges set targets by themselves. However, the President of the court monitors the workload of the judges in the court as a whole, assigning cases to another judge if necessary.

Q083-1 (2023): According to the Law on Judicial Power, when adjudicating, judges are independent and are subject only to the law. Therefore, judges set targets by themselves. However, the President of the court monitors the workload of the judges in the court as a whole, assigning cases to another judge if necessary.

Luxembourg

Q083-1 (2018): NAP

Malta

Q083-1 (2018): NA

Netherlands

Q083-1 (2018): NAP

Q083-1 (2016): The planning and control cycle is done by The Council for the Judiciary, on a court level (not at individual judge level). Targets for each individual judge are not imposed by The Council for the Judiciary.

Poland

Q083-1 (General Comment): .

Q083-1 (2016): For certain cases the law imposes timeframe for performing specific action or handling specific matters. President of court sets the performance target with using statistically calculated indicators of average performance that court and individual judge is expected to achieve.

Romania

Q083-1 (2016): There are no formal standards for quality established for the whole Judiciary. However, informal standards are being used (such as training, quality of the reasoning, assessment of the activity of the judges, assessment of the good reputation of the judges etc.)

Slovenia

Q083-1 (General Comment): See Q114.

Question 083-1-1

Croatia

Q083-1-1 (2024): According to the Courts Act (Official Gazette No. 28/13, 33/15, 82/15, 67/18, 126/19, 130/20, 21/22, 60/22) , the president of the court where a judge performs judicial duties issues a decision each calendar year assessing whether the judge has fulfilled their duties based on prescribed criteria. If it is determined that the judge, without justified reason, did not meet the required number of decisions or performed duties improperly, disciplinary proceedings must be initiated in accordance with the State Judicial Council Act.
Disciplinary action against a court president is initiated by the president of the higher court. Sanctions for disciplinary offences may include a rebuke, salary reduction (up to one third for up to 12 months), or dismissal.
If justified reasons exist for underperformance, they must be explained and the decision forwarded to the higher court. Judges may object to such a decision within three days; the court president must respond within eight days. If the objection is rejected, the judge may appeal to the higher court, whose decision is final and not subject to further legal remedies.

Q083-1-1 (2023): According to the Courts Act (Official Gazette No. 28/13, 33/15, 82/15, 67/18, 126/19, 130/20, 21/22, 60/22) the president of the court in which the judge performs judicial duty determines by decision for the previous calendar year whether the judge has fulfilled his duties as a judge according to the prescribed criteria. If the president of the court determines that the judge, without justifiable reason, did not make the number of decisions determined by the Framework Criteria for the work of judges in a one-year period or that he performed his judicial duties improperly, he is obliged to initiate disciplinary proceedings against such a judge, in accordance with the State Judicial Council Act. Disciplinary proceedings against the president of the court are initiated by the president of the immediately higher court. According to the State Judicial Council Act (Official Gazette No. 116/10, 57/11, 130/11, 13/13, 28/13, 82/15, 67/18, 126/19, 80/22) disciplinary penalties may be imposed for committed disciplinary offences: rebuke, a fine of up to one third of the salary earned in the previous month in a period of one to three months, a fine of up to one third of the salary earned in the previous month in a period of four to six months, a fine of up to one third of the salary earned in the previous month in a period of seven to twelve months or dismissal from duty. If the president of the court determines that, due to justified reasons, the judge did not make the number of decisions determined by the Framework Criteria for the work of judges in a one-year period, he is obliged to state in the explanation of the decision what justified reasons are in question and submit the decision immediately to the president of the higher court. Against the decision of the president of the court, which determines whether the judge has fulfilled his duties as a judge, the judge can submit an objection to the president of the court within three days of receiving the decision. The president of the court is obliged to decide on the objection within eight days. The president of the court can reject the complaint or accept it and make a new decision. If the objection is rejected, the judge has the right to appeal to the president of the immediately higher court within eight days from the delivery of the decision on the objection. The president of the immediately higher court can make a decision confirming the decision of the president of the court or accept the appeal and make a new decision. Against this decision, the judge has no right to declare legal remedies.

Q083-1-1 (2022): According to the Courts Act (Official Gazette No. 28/13, 33/15, 82/15, 67/18, 126/19, 130/20, 21/22, 60/22) the president of the court in which the judge performs judicial duty determines by decision for the previous calendar year whether the judge has fulfilled his duties as a judge according to the prescribed criteria. If the president of the court determines that the judge, without justifiable reason, did not make the number of decisions determined by the Framework Criteria for the work of judges in a one-year period or that he performed his judicial duties improperly, he is obliged to initiate disciplinary proceedings against such a judge, in accordance with the State Judicial Council Act. Disciplinary proceedings against the president of the court are initiated by the president of the immediately higher court. According to the State Judicial Council Act (Official Gazette No. 116/10, 57/11, 130/11, 13/13, 28/13, 82/15, 67/18, 126/19, 80/22) disciplinary penalties may be imposed for committed disciplinary offences: rebuke, a fine of up to one third of the salary earned in the previous month in a period of one to three months, a fine of up to one third of the salary earned in the previous month in a period of four to six months, a fine of up to one third of the salary earned in the previous month in a period of seven to twelve months or dismissal from duty. If the president of the court determines that, due to justified reasons, the judge did not make the number of decisions determined by the Framework Criteria for the work of judges in a one-year period, he is obliged to state in the explanation of the decision what justified reasons are in question and submit the decision immediately to the president of the higher court.
Against the decision of the president of the court, which determines whether the judge has fulfilled his duties as a judge, the judge can submit an objection to the president of the court within three days of receiving the decision.
The president of the court is obliged to decide on the objection within eight days. The president of the court can reject the complaint or accept it and make a new decision.
If the objection is rejected, the judge has the right to appeal to the president of the immediately higher court within eight days from the delivery of the decision on the objection. The president of the immediately higher court can make a decision confirming the decision of the president of the court or accept the appeal and make a new decision. Against this decision, the judge has no right to declare legal remedies.

Denmark

Q083-1-1 (2023): The Danish judges have absolute independance.

Finland

Q083-1-1 (General Comment): See general comments to Q 83-1

France

Q083-1-1 (2023): The individual part of the administrative judges' function allowance (there is also a functional part that depends on the responsibilities, the level of experience and the constraints relating to the functions performed), which takes into account the results obtained and the way of serving, may be adjusted if the objectives, qualitative and in particular quantitative, are not met.
During the previous collection, all items had been checked. In reality, rather than disciplinary proceedings, proceedings for professional inadequacy would be initiated.
In civil and criminal justice, on the other hand, there are no defined targets.

Germany

Q083-1-1 (2024): One federal state selected "reflected in the individual assessment" and "warning by the court's president".

Q083-1-1 (2023): One federal state selected "reflected in the individual assessment" and "warning by the court's president".

Greece

Q083-1-1 (2024): "Other": Disciplinary punishment pronounced by the competent disciplinary body, that can reach the permanent termination.

Hungary

Q083-1-1 (2024): Without disciplinary procedure - Other: withdrawal of remote work
With disciplinary procedure - Other: discharge from executive office

Q083-1-1 (2023): According to the Act on the Legal Status and Remuneration of Judges -section 124 - disciplinary measures may be imposed against a judge for professional misconduct. Although it is theoretically possible for the above measures to be applied in the event of non-compliance with the quantitative requirement indicated in question 83, this does not occur in practice.

Italy

Q083-1-1 (2022): Disciplinary sanction as provided by the Legislative Decree no 109 of 23rd February 2006, regarding disciplinary responsibility of professional magistrates.

Question 083-2

Denmark

Q083-2 (General Comment): There is a productivity target for the prosecution as a whole, but not for each public prosecutor.

France

Q083-2 (2021): source DSJ

Germany

Q083-2 (2024): Of the respondent federal states, all but one reported that there are no quantitative performance targets for public prosecutors.

Q083-2 (2023): Of the respondent federal states, all but one reported that there are no quantitative performance targets for public prosecutors

Q083-2 (2022): Out of 15 respondent federal states, 14 reported that there are no quantitative performane targets for public prosecutors. One federal state has not yet replied.

Q083-2 (2021): The vast majority of the Länder selected "no", 2 of the Länder answered "yes".

Greece

Q083-2 (2022): There is, however, as far as possible an equal distribution of cases between them by the Head of the Service (Prosecution Service) and the obligation of the public prosecutor to process the cases assigned to him in the time frames provided for each case.

Hungary

Q083-2 (2022): Quantitative performance targets have not yet been set. The public prosecution services were in the process of installing a new specialized IT system (IIDR), which was originally planned to affect internal prosecution statistics too. However, it has not been introduced. The planned system is currently under revision, so it is not possible to provide information on how and when it will be introduced and whether quantitative performance targets will be set.

Q083-2 (2021): For the time being, no performance targets are in place, but the development of such targets is in progress.

Ireland

Q083-2 (2024): It should be noted that the answer is dependent on how the term “target” is defined. Allocation of files happens in some divisions but not all, and not all prosecutors are assigned a specific number of files per week. Additionally, targets can be influenced by external factors such as: the number of investigation files received, or the availability of court dates in order to process cases. The main reason why prosecutors are not assigned a set number of files is because the size and complexity of files can vary significantly. Therefore, our answer has to be nuanced given the type of system we operate in and this would explain discrepancies in answers.
So while there are no targets defined, there is an expectation of work completion and case management through action lists, etc which we report in our annual report and also to DPER (Department of Public Expenditure and Reform) as part of our budget/ performance metrics.

Q083-2 (2023): It should be noted that the answer is dependent on how the term “target” is defined. Allocation of files happens in some divisions but not all, and not all prosecutors are assigned a specific number of files per week. Additionally, targets can be influenced by external factors such as: the number of investigation files received, or the availability of court dates in order to process cases. The main reason why prosecutors are not assigned a set number of files is because the size and complexity of files can vary significantly. Therefore, our answer has to be nuanced given the type of system we operate in and this would explain discrepancies in answer

Q083-2 (2022): Allocation of files happens in some divisions but not all, and not all prosecutors are assigned a specific number of files per week. Additionally, targets can be influenced by external factors such as: the number of investigation files received, or the availability of court dates in order to process cases. The main reason why prosecutors are not assigned a set number of files is because the size and complexity of files can vary significantly.

Q083-2 (2021): Prosecutors in our directing division are allocated a specific number of files per week. Decisions must be issued within a designated time frame and this is monitored by our case management system

Q083-2 (2018): Work is demand led by number of files submitted by external investigating agencies

Italy

Q083-2 (General Comment): Law n.71 of 17 June 2022 has recently modified article 2 of Legislative Decree n.109, 23 February 2006, regarding disciplinary responsibility of professional magistrates. The amendment has introduced specific disciplinary offences regarding the conduct of the magistrate who does not cooperate in reaching the goals laid in the 'Program for the management of civil and criminal proceedings' (in Italian 'Programma di Gestione'), which is disciplined by art37 of Decree-Law II. 98 of 6 of July 2011 and regularly approved by each Court.

Latvia

Q083-2 (General Comment): The prosecutor provides a monthly report on the statistical indicators of his or her work. In addition, the statistical indicators of the individual work of the public prosecutor (statistical indicators for the monitoring of the investigation, prosecution, maintenance of the State prosecution and other functions of the public prosecutor) are also analysed during the process of assessing the professional activities of prosecutors (not less than once every five years).

Q083-2 (2024): During 2023 the number of processed (closed, brought to court and concluded by a penalty imposed/negotiated by the prosecutor) cases was assessed and monitored, but no standard was set for how many cases should be completed. The new system for evaluating the professional performance of prosecutors (effective as of 1st of January 2024) provides that the quantitative indicator of the work performed by the district-level prosecutor is evaluated every year in comparison to other prosecutors.

Q083-2 (2023): During 2023 the number of processed (closed, brought to court and concluded by a penalty imposed/negotiated by the prosecutor) cases was assessed and monitored, but no standard was set for how many cases should be completed. The new system for evaluating the professional performance of prosecutors (effective as of 1st January 2024) provides that the quantitative indicator of the work performed by the district-level prosecutor is evaluated every year.

Lithuania

Q083-2 (General Comment): According to Article 33 of the Law on Prosecution Service, evaluation of prosecutor's individual performance, qualification and suitability is carried out by the Attestation Commission. Performance of a prosecutor who has received a positive evaluation after his/her internship, is thereafter evaluated every five years during the regular evaluation of the service. The extraordinary evaluation can be carried out by decision of the Prosecutor General: at the request of the public prosecutor him/herself, if at least half a year has passed since his/her last evaluation; in the case the prosecutor is applying for a higher position, or to the same or an equivalent post after the expiry of the term of appointment; if three years have passed since the last evaluation of his/her service; if the prosecutor's performance has repeatedly been deficient, giving rise to reasonable doubts as to his/her suitability for the position in question.

Q083-2 (2018): The quantitative performance targets are defined for the Prosecutor General’s Office and 5 regional Prosecutor’s Offices, but not for individual public prosecutors.

Luxembourg

Q083-2 (2018): NAP

Netherlands

Q083-2 (General Comment): There is no national policy on targets for every prosecutor. An office could choose to set targets for their prosecutors (see next question), but these may vary across offices.

Q083-2 (2020): There is no national policy on targets for every prosecutor. An office (parket) could choose to set targets for their prosecutors (see next question), but this may vary across offices.

Portugal

Q083-2 (General Comment): Yes for some District Prosecution's Office and No at a national level. At national level, only reference values are fixed for the purpose of placing prosecutors. Also at a national level, the fact that a prosecutor has finished more proceedings than those that he/she started is a general criterion of evaluation and compliance with general objectives, in the qualitative individual assessment of the public prosecutors’ work.

Slovak Republic

Q083-2 (2024): Quantitative performance goals for the prosecutor are not set, but in general, the prosecutor's office sets goals, for example, with a plan of main tasks, and it is monitored. The General Prosecutor as well as the leading prosecutors are responsible for setting these goals, and disciplinary action may be taken if they are not met.

Q083-2 (2023): Quantitative performance goals for the prosecutor are not set, but in general, the prosecutor's office sets goals, for example, with a plan of main tasks, and it is monitored. The General Prosecutor as well as the leading prosecutors are responsible for setting these goals, and disciplinary action may be taken if they are not met.

Slovenia

Question 083-3

Austria

Q083-3 (2018): There are no specific targets given to public prosecutors.

Belgium

Q083-3 (2021): To underline the consistency between Q 83-2 and Q 83-3: these are not quantitative targets.

Croatia

Q083-3 (2022): According to the State Attorney Office Act (Official Gazette No. 67/18, 21/22) , the Minister in charge for Justice, with the prior opinion of Prosecutor General, adopts the Framework criteria for the work of public prosecutors (Deputy State Attorneys).

Q083-3 (2020): According to the State Attorney Office Act (Official Gazette No. 67/18) , the Minister in charge for Justice, upon the proposal of Prosecutor General, adopts the Framework criteria for the work of public prosecutors (Deputy State Attorneys).

Q083-3 (2018): According to the State Attorney's Act, the Minister of Justice, upon the proposal of Prosecutor General, adopts the Framework criteria for the work of public prosecutors.

Germany

Q083-3 (2024): One federal state reported, that quantitative performance targets can be defined based on the system used to determine staffing requirements of the judiciary.

Q083-3 (2023): One federal state reported, that quantitative performance targets can be defined based on the system used to determine staffing requirements of the judiciary.

Q083-3 (2021): There are no quantitative performance targets for each public prosecutor. The 2 Länder that have quatitative performance targets answered, that the prosecutor General is responsible for setting these targets.

Q083-3 (2020): There are no quantitative performance targets for each public prosecutor

Greece

Q083-3 (2022): The answer chosen is in accordance with the answers of the majority of the prosecutors ' offices.

Ireland

Q083-3 (2024): Unit Heads assign a number of files to each Prosecutor depending on ability or grade. The targets for the Office are ultimately greatly impacted by external factors like the amount of investigation files that are submitted to the office, the availability of court dates to process cases and the fact that the size and complexity of files varies. A Prosecutor's ability to progress their caseload is very much impacted by these factors so within this Office we don't usually reference "targets."

Q083-3 (2023): Unit Heads assign a number of files to each Prosecutor depending on ability or grade. The targets for the Office are ultimately greatly impacted by external factors like the amount of investigation files that are submitted to the office, the availability of court dates to process cases and the fact that the size and complexity of files varies. A Prosecutor's ability to progress their caseload is very much impacted by these factors so within this Office we don't usually reference "targets".

Q083-3 (2022): Unit Heads assign a number of files to each Prosecutor depending on ability or grade. This might not mean that "targets" are set. The targets for the Office are ultimately greatly impacted by external factors like the amount of investigation files that are submitted to the office, the availability of court dates to process cases and the fact that the size and complexity of files varies. A Prosecutor's ability to progress their caseload is very much impacted by these factors so within this Office we don't usually reference "targets".

Lithuania

Q083-3-1 (2024): no targets in the system

Malta

Q083-3-1 (2023): Performance targets do not warrant disciplinary action unless the reason why these were not reached constitutes a disciplinary offence. The AG carries out performance appraisals on the staff and if their targets are not met, then it will normally reflect in their performance appraisal.

Poland

Q083-3-1 (2024): *without disciplinary procedure:
- Warning by head of prosecution
In the event that the objectives of the criminal proceedings are not achieved or in the event that an obvious violation of the law is found in the conduct of the case, the superior public prosecutor shall, irrespective of his other powers, point out the misconduct to the public prosecutor who committed the misconduct, after requesting an explanation. The prosecutor to whom the misconduct has been pointed out may, within 7 days, submit a written objection to the superior prosecutor who pointed out the misconduct. If the public prosecutor does not agree with the infringement pointed out, he/she is entitled to appeal. If an objection is lodged, the superior public prosecutor who pointed out the misconduct shall either rescind the finding of misconduct or refer the case to the disciplinary court for consideration. The appeal procedure before the disciplinary court is then initiated.
- Temporary salary reduction
Without a disciplinary procedure, a salary reduction is not possible. A supervisor cannot decide on a pay cut alone.
- Reflected in the individual assessment The whistleblowing notice shall be reflected in the prosecutor's personnel file. A copy of the notice of reproof that has not been rescinded shall be attached to the prosecutor's personnel file.
- Other, please specify: _____
For minor disciplinary offences that do not justify the initiation of disciplinary proceedings, the public prosecutor in charge shall inflict on subordinate public prosecutors an orderly penalty of admonition.
A copy of the letter inflicted with an orderly penalty of admonishment shall be attached to the prosecutor's personal file. The public prosecutor to whom an admonishment by order penalty has been inflicted may, within 7 days from the date of service of the admonition, lodge an objection to the public prosecutor directly superior to the public prosecutor who inflicted the penalty.
*With disciplinary procedure:
-Warning by head of prosecution
With the application of the disciplinary procedure, the initial route is the same as described above. Except that once the appeal procedure is triggered, the course of action is as follows. If an objection is lodged, the superior prosecutor who pointed out the misconduct shall either rescind the pointing out of the misconduct or refer the case to the disciplinary court for consideration. The disciplinary court shall issue an order upholding the reproof of misconduct or revoking the reproof of misconduct and discontinuing the proceedings after hearing the disciplinary ombudsman and the public prosecutor to whom the misconduct was reproved, unless a hearing is not possible. The prosecutor to whom the misconduct has been pointed out is entitled to lodge a complaint against the decision refusing to consider the objection. The complaint shall be examined by the same disciplinary court in another equivalent composition.
- Temporary salary reduction
A prosecutor may be suspended for up to 6 months if the nature of the disciplinary offence makes it necessary to immediately remove him or her from the performance of duties. In the case of a valid authorisation to prosecute a public prosecutor, and also when a request for incapacitation has been submitted to the competent court, the disciplinary supervisor may suspend the public prosecutor from his/her duties until the proceedings are validly concluded. The decision on suspension may be appealed to the Disciplinary Court of the Prosecutor General. Where a public prosecutor has been suspended, the Disciplinary

Court at the Prosecutor General, on the motion of the disciplinary superior, may reduce the amount of the public prosecutor's salary up to 50% for the duration of the suspension. The decision on the reduction of remuneration may be appealed against.
- Reflected in the individual assessment The whistleblowing notice shall be reflected in the prosecutor's personnel file. A copy of the notice of reproof that has not been rescinded shall be attached to the prosecutor's personnel file.
- Other, please specify: _____
A disciplinary penalty may be imposed on a prosecutor following a disciplinary procedure. The disciplinary penalties are: 1) admonishment; 2) reprimand; 2a) a 5% - 50% reduction in basic salary for a period of six months to two years; 2b) a pecuniary penalty in the amount of one month's basic salary payable for the month preceding the final conviction plus the prosecutor's long-term service allowance, function allowance and special allowance; 3) removal from the position held; 4) transfer to another official position;
5) expulsion from the prosecution service. In the event of an appeal procedure against a warning, disciplinary proceedings shall be initiated. If an objection is lodged, the superior prosecutor: 1) repeals the disciplinary penalty of admonishment and notifies the prosecutor of the acceptance of the objection, or 2) overturns the disciplinary penalty of admonishment and refers the case to the disciplinary ombudsman for investigation, or 3) overturns the punishment of a caution and refers the case through the disciplinary ombudsman to the disciplinary court for examination. After the lapse of 3 years from the date on which the orderly penalty of admonishment becomes final, the Prosecutor General or the competent regional or district prosecutor shall order the removal of the copy of the letter of admonishment from the prosecutor's personal file, if during this period no misconduct in the efficiency of the pre-trial proceedings, the management of the prosecution or the exercise of supervision resulting in the drawing of attention, no misconduct was pointed out or no disciplinary offence was found to have been committed. In such a case, only the simultaneous. Removal from the prosecutor's personal file of copies of all such letters and judgments. At the request of the prosecutor, the removal may take place after one year. The decision of the disciplinary court may be appealed to the disciplinary court of the second instance.

Q083-3-1 (2023): *without disciplinary procedure:
- Warning by head of prosecution
In the event that the objectives of the criminal proceedings are not achieved or in the event that an obvious violation of the law is found in the conduct of the case, the superior public prosecutor shall, irrespective of his other powers, point out the misconduct to the public prosecutor who committed the misconduct, after requesting an explanation. If an objection is lodged, the superior prosecutor: 1) repeals the disciplinary penalty of admonishment and notifies the prosecutor of the acceptance of the objection, or 2) overturns the disciplinary penalty of admonishment and refers the case to the disciplinary ombudsman for investigation, or 3) overturns the punishment of a caution and refers the case through the disciplinary ombudsman to the disciplinary court for examination. After the lapse of 3 years from the date on which the orderly penalty of admonishment becomes final, the Prosecutor General or the competent regional or district prosecutor shall order the removal of the copy of the letter of admonishment from the prosecutor's personal file, if during this period no misconduct in the efficiency of the pre-trial proceedings, the management of the prosecution or the exercise of supervision resulting in the drawing of attention, no misconduct was pointed out or no disciplinary offence was found to have been committed. In such a case, only the simultaneous. Removal from the prosecutor's personal file of copies of all such letters and judgments. At the request of the prosecutor, the removal may take place after one year. The decision of the disciplinary court may be appealed to the disciplinary court of the second instance.

Question 120

Austria

Q120 (General Comment): In the Austrian judicial system we have diverse and multifaceted statistic products, which are an important basis for the management of justice. The statistics are regularly compiled by the Federal Computing Center and serve to control the deployment of personnel, but also for the supervision that is necessarily linked to the parties' right to a fair trial. The work of the public prosecutors is continuously and systematically reviewed on a quantitative level (i.e. number of completed cases, duration of proceedings). In this way, major deviations from the average can be identified. If a public prosecutor shows too many delays in proceedings or excessively long proceedings, this can lead to disciplinary proceedings or even a reduction in their job description. The assessment is carried out by the heads of the senior public prosecutors' offices. A qualitative assessment of each prosecutor’s work is carried out once for the second calendar year following their appointment to a specific position. The evaluation is repeated when they are appointed to a new position (for the second calendar year following that appointment). An assessment at a later time will be carried out, if either the head of the prosecutor’s office or the assessed prosecutor themselves have reason to believe that the result of the last assessment is no longer accurate. If the assessment finds the prosecutor’s work to be below average, the assessment is repeated for the next calendar year. The assessment is carried out by the personnel commission at the Senior Public Prosecutor’s Office, consisting of the Head of the Senior Public Prosecutor’s Office, the Head Prosecutor for the Public Prosecutor’s Office to which the assessed prosecutor belongs, one prosecutor appointed/chosen by the Union of Public Services and one prosecutor appointed/chosen by staff representatives.
The evaluation takes into account the prosecutor’s professional abilities, skills, knowledge, conduct and performance. The assessment can be relevant for the prosecutor’s career, as it will be taken into account in later application procedures. If the assessment finds the prosecutor’s work failing to meet the absolute minimum peformance standards necessary to fulfill their duties for two consecutive calendar years, the prosecutor will be dismissed.

If the assessment finds the prosecutor's work failing to meet the absolute minimum peformance standards necessary to fulfill their duties for two consecutive calendar years, the prosecutor will be dismissed.
This is not a change, the reply in the past year was not given correctly.

Belgium

Q120 (General Comment): Public prosecutors are assessed on the way in which they carry out their duties. Heads of divisions are also assessed on their management skills and staff management, as well as on initiatives taken to tackle the backlog of cases. The criteria on which this assessment is based are of 3 types:
1) legal knowledge, work efficiency and effectiveness, communication, decisiveness and professional ethics
2) collegiality and self-control
3) interest in continuous training, adaptability and open-mindedness, commitment.
The purpose of the assessment is to ensure quality control, but also to provide a form of coaching that contributes to the prosecutor's development and to anticipate difficulties or a possible negative mention.
Assessment also plays an essential role in consideration for a subsequent appointment or designation.
Competent authorities:
The assessment is carried out by an absolute majority of votes cast by the head of division and two prosecutors appointed by the general assembly or by the division assembly.
The assessment of the heads of divisions is carried out by the competent chamber of the assessment board, which is made up of two heads of divisions from the public prosecutor's office, two magistrates who are members of the Opinion and Investigation Commission of the High Council of the Judiciary, a magistrate of the Court of Audit and a human resources management specialist (see articles 259novies et seq. of the Judicial Code).

Bulgaria

Q120 (General Comment): Supreme Judicial Council: Criteria on which the assessment is based: the criteria are general (relevant to the activity of each judge, prosecutor, and investigator); specific (relevant only to the position held – judge, prosecutor, or investigator), and additional (relevant only to administrative heads and their deputies).
Authority competent to carry out the assessment: the assessment is accepted by the Prosecutor's College of the Supreme Judicial Council.
Purposes for which the evaluation results are used: when participating in a competition for promotion or transfer in position; when participating in a procedure for the selection of an administrative head; for appointment to the position of deputy of the administrative head; on promotion to a higher rank; on secondment; for participation in the composition of a Permanent Appraisals Commission to the Appellate Prosecutor's Offices; participation in a competition committee.
Prosecutor's Office of RB: Such a system exists. According to Art. 196 of the Judicial System Act the evaluation is carried out in advance, in order to acquire irreplaceability, periodic and extraordinary attestation of the magistrates, and the criteria for the same are defined in Art. 198 of the Judicial System Act: legal knowledge and skills; ability to analyze legally relevant facts; ability to optimally organize work; expediency and discipline; compliance with the rules of ethical conduct. Attestation also takes into account the following indicators: compliance with deadlines; number of confirmed and canceled acts and the reasons for this; the results of the inspections of the Inspectorate at the Supreme Judicial Council; the overall workload of the relevant judicial authority, as well as the workload of the assessed judge, prosecutor or investigator compared to other judges, prosecutors or investigators from the same judicial authority.

Croatia

Q120 (2024): State attorneys and deputy state attorneys are evaluated according to the following criteria:
1. achieved results in resolving cases based on the number of cases assigned to work based on the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county and municipal state attorneys' offices for the previous three-year period
2. quality of decisions and justified use of legal remedies
3. proper performance of state attorney duties - compliance with deadlines during the procedure
4. other activities of the state attorney and deputy state attorney
5. experience in performing state attorney duties
6. compliance with the Code of Ethics for State Attorneys and Deputy State Attorneys.
According to the above criteria, the state attorney and deputy state attorney can achieve a maximum of 150 points, whereby a maximum of 60 points can be achieved for the criteria stated in points 1 and 2, a maximum of 10 points for the criteria stated in points 3 and 4, and a maximum of five points for the criteria stated in points 5 and 6.
The grades for the performance of the duties of the State Attorney and Deputy State Attorney are:
1. excellent performance of the duties: 130 - 150 points
2. very successful performance of the duties: 110 - 129 points
3. successful performance of the duties: 90 - 109 points
4. satisfactory performance of the duties: 70 - 89 points
5. unsatisfactory performance of the duties: less than 70 points.
The Deputy State Attorney is evaluated by the State Attorney, and the State Attorney is evaluated by the immediately superior State Attorney.
The assessment must be reasoned. The state attorney and deputy state attorney who disagrees with the assessment have the right to file a complaint with the State Attorney Council.
The assessment of the performance of the duties of a state attorney is taken into account in the procedures for the promotion and permanent transfer of deputy state attorneys and in the procedure for the appointment of state attorneys.
To be appointed to the position of Deputy State Attorney in a higher state attorney's office, the Deputy State Attorney must be assessed at least with the grade "successfully performs his duties" in the last evaluation before appointment.

Q120 (2023): According to the State Attorney Office Act (Official Gazette, No. 67/18, 21/22), State Attorneys' and Deputy State Attorneys' performance is evaluated every three years according to the following criteria: achieved results in resolving cases (based on the number of cases assigned to work on the basis of the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county or municipal state attorney's offices for the previous three-year period), the quality of decisions and the justified use of legal remedies, proper performance of the state attorney's duty - observance of deadlines during the procedure, other activities of the State Attorney and the Deputy State Attorney, experience in performing the duty of state attorney and compliance of conduct with the Code of Ethics of State Attorneys and Deputy State Attorneys. The Framework criteria are adopted by the Minister in charge of judicial affairs, with the prior opinion of the Chief State Attorney of the Republic of Croatia.

Q120 (2022): According to the State Attorney Office Act (Official Gazette, No. 67/18, 21/22), State Attorneys' and Deputy State Attorneys' performance is evaluated every three years according to the following criteria: achieved results in resolving cases (based on the number of cases assigned to work on the basis of the Framework Criteria for the Work of Deputy State Attorneys and the average work results of county or municipal state attorney's offices for the previous three-year period), the quality of decisions and the justified use of legal remedies, proper performance of the state attorney's duty - observance of deadlines during the procedure, other activities of the State Attorney and the Deputy State Attorney, experience in performing the duty of state attorney and compliance of conduct with the Code of Ethics of State Attorneys and Deputy State Attorneys. The Framework criteria are adopted by the Minister in charge of judicial affairs, with the prior opinion of the Chief State Attorney of the Republic of Croatia.

Q120 (2024): The Head of Public Prosecutor's Office monitors e.g. the number of appeals, the number of returnig cases etc.

Q120 (2023): The Head of Public Prosecutor's Office monitors e.g. the number of appeals, the number of returnig cases etc.

Q120 (2022): The Head of Public Prosecutor's Office monitors e.g. the number of appeals, the number of returnig cases etc.

Denmark

Q120 (General Comment): Prosecutors are continuously evaluated by their immediate manager, i.a. at the annual employee development interviews, where the manager evaluates the employee's performance in the current position as well as the employee's development goals for the coming year.
In the first 6 months of employment prosecutors have a targeted onboarding program. This also includes feedback and evaluation of the individual prosecutor.
Furthermore prosecutors go through targeted basic training in the first three years of employment, which ends with an exam and assessment. They are also assigned a mentor, who is a professional sparring partner for the prosecutor and provides professional feedback on the prosecutor's performance and legal work.

Q120 (2024): The evaluation takes place continuously during the basic training and rotation period but is conducted for all prosecutors, including in connection with performance appraisals (MUS interviews), one-on-one meetings, and similar sessions.The topics may include the following: well-being, motivation, efficiency in task execution, holistic perspective etc.

Q120 (2023): Prosecutors are continuously evaluated by their immediate manager, i.a. at the annual employee development interviews, where the manager evaluates the employee's performance in the current position as well as the employee's development goals for the coming year.
In the first 6 months of employment prosecutors have a targeted onboarding program. This also includes feedback and evaluation of the individual prosecutor. Furthermore prosecutors go through targeted basic training in the first three years of employment, which ends with an exam and assessment. They are also assigned a mentor, who is a professional sparring partner for the prosecutor and provides professional feedback on the prosecutor's performance and legal work.

Q120 (2020): Public prosecutors go through intensive education for the first three years of them being recruited and this evaluation is structured centrally with HR at the Attorney Generals office. During that period they are individually being assessed through exams and through working with mentors. Thus they are continuously being assessed both centrally through exams as well as locally through the daily work that the mentor sees. Later in the career the assessment is not structured in such a way but all through their career the prosecutors are evaluated through their daily work and how they perform in court.

France

Q120 (2022): The assessment of public prosecutors provided for by statutory ordinance No. 58-1270 of 22 December 1958 aims to determine the professional value of the magistrate. It must reflect his/her legal and technical professional skills, his/her level of commitment, assess his/her abilities to exercise a specific function and identify training needs within his/her career path. The assessment is made by the Attorney general at the Court of appeal or the public prosecutor at the High Court of appeal for prosecutors in their jurisdiction. Considered as a moment for exchange, this evaluation should highlight both the skills that were mobilized by the prosecutor and areas where improvement could be made. It contributes to better situate his/her activity within the service organization and operation while specifying the missions related to his/her duties by highlighting his/her professional potential.

For prosecutors, the evaluation offers a privileged opportunity to take stock of their activities, consider developments in their professional practice and regularly position themselves relative to their career goals. For evaluators it should enable them detect each individual’s potential so as contribute towards efficient human resource management.

Germany

Q120 (2024): Of the respondent federal states, 13 reported that there is a quantitative evaluation of the public prosecutors' work and 14 reported that there is a qualitative evaluation.
The assessment is generally carried out by the direct superior and is based on different criteria such as specialised knowledge, expression, cooperation, leadership skills, negotiating skills, etc. The results are mostly used for decisions about promotions

Q120 (2023): Of the respondent federal states, 14 reported that there is a quantitative evaluation of the public prosecutors' work and 15 reported that there is a qualitative evaluation.
The assessment is generally carried out by the direct superior and is based on different criteria such as specialised knowledge, expression, cooperation, leadership skills, negotiating skills, etc. The results are mostly used for decisions about promotions.

Q120 (2022): Out of 15 respondent federal states, 12 reported that there is a quantitative evaluation of the public prosecutors' work and 12 reported that there is a qualitative evaluation (one federal state has not yet replied).
The assessment is generally carried out by the direct superior and is based on different criteria such as specialised knowledge, expression, cooperation, leadership skills, negotiating skills, etc. The results are mostly used for decisions about promotions.

Q120 (2021): The vast majority of the Länder answered "yes", 3 answered "no".

Greece

Q120 (General Comment): Annual inspection reports concerning prosecutors are prepared (Appeals Prosecutors or Deputy Prosecutors of the Supreme Court), and in the context of these reports, the judicial work of each prosecutor is evaluated and assessed as a whole, both in terms of the quality and legal correctness of the processing of the criminal files handled by each prosecutor, both in terms of their quantity in the inspected period of time, the legal and substantive correctness of provisions or acts issued by her/ him, her/his hard work, her/ his morals and her/his social representation. The purpose of the evaluation of prosecutors is to assess whether they should be promoted to the next level and to establish whether disciplinary offenses have been committed.
The criteria on which the evaluation is based, the authority responsible for the evaluation and the purposes for which the results of the evaluation are used are defined in the Code of the Organization of Courts and the Status of Judiciary (Law 4938/2022). Articles 93,100,101,102,103,104.

Q120 (2024): The criteria on which the evaluation is based, the authority responsible for the evaluation, and the purposes for which the results of the evaluation are used are defined in the Code of the Organization of Courts and the Status of the Judiciary (Law 4938/2022), specifically in Articles 93, 100, 101, 102, 103, and 104, with Articles 93, 100, and 102 as amended and currently in force.

Q120 (2023): The criteria on which the evaluation is based, who is the authority responsible for the evaluation and the purposes for which the results of the evaluation are used are defined in the Code of the Organization of Courts and the Status of Judiciary (Law 4938/2022). Articles 93,100,101,102,103,104.

Q120 (2022): The question was answered by the prosecutor's office of the Supreme Court.

Hungary

Q120 (2024): In accordance with Section 50 (1) of Act CLXIV of 2011 on the Status and Career Path of the Prosecutor General, Prosecutors and other Prosecution Employees, prosecutors, with the exception of the prosecutor general and the deputy prosecutor general, shall be assessed before the expiry of the fixed term of the first prosecution appointment (for the purpose of appointment for an indefinite period), while in the case of a first appointment for an indefinite term, before the expiry of a period of three years following the appointment, and thereafter every eight years, provided that they worked under the supervision of the assessor or his/her deputy for a minimum of one year during the assessment period. The assessment is the responsibility of the person exercising the employer's authority.
The purpose of assessment is to assess the quality of the prosecutor’s professional activities, to evaluate their skills, abilities and character traits with an impact thereon and to facilitate professional development. The assessment may only feature duly supported, factual findings.
Prosecutors do not need to be assessed during the six years preceding the completion of the applicable old-age pension age.
In addition to cases mentioned above, a prosecutor shall also be assessed if requested by the prosecutor, provided that two years have elapsed since the previous assessment, circumstances have emerged that indicate the prosecutor’s professional ineligibility or the necessity to alter the evaluation of the previous assessment.
In the event of an ineligible grade, upon the disclosure of the result of the assessment, the prosecutor shall be called upon to resign his/her office within thirty days. If despite the call the prosecutor does not resign his/her office, his/her prosecution service employment shall be terminated by exempting him/her from office. If a prosecutor on fixed-term service is assessed as ineligible before the expiry of the fixed term, the prosecutor's service relationship shall be terminated on the date of expiry of the fixed term.
In accordance with Sections 13/A-13/F of Instruction 4/2012. (I. 6.) of the Prosecutor General on specific questions regarding the status of employees of the Prosecution Service, a case file examination shall be carried out as a basis for the assessment which is due to follow with regard to prosecutors appointed to a prosecution office subordinated to the Office of the Prosecutor General prior to the time when the assessment is due. Such a case file examination shall not be carried out for senior head prosecutors. Case file examinations shall discover the examined prosecutor’s practice regarding the application of substantive and procedural law during at least a one-year period prior to the case file examination, or since the prosecutor’s latest assessment – or in absence of an assessment – since the time of his/her appointment. The case file examination and its evaluation shall be done by a prosecutor (hereinafter: examiner prosecutor) who works at the prosecution office directly superior to the prosecution office where the examined prosecutor is appointed to and who works in the same field of prosecutorial activity or expertise as the examined prosecutor. The examiner prosecutor shall be designated by the directly superior prosecution office, whereas at the Office of the Prosecutor General by the head of the structural unit that is competent regarding the examined prosecutor’s duties.
In the future, the workload calculation system may also be suitable for quantitatively measuring and monitoring the work of

prosecutors in the longer term, by performing calculations on an individual basis.

Q120 (2023): In accordance with Section 50 (1) of Act CLXIV of 2011 on the Status and Career Path of the Prosecutor General, Prosecutors and other Prosecution Employees, prosecutors, with the exception of the prosecutor general and the deputy prosecutor general, shall be assessed before the expiry of the fixed term of the first prosecution appointment, while in the case of a first appointment for an indefinite term, before the expiry of a period of three years following the appointment, and thereafter every eight years, provided that they worked under the supervision of the assessor or his/her deputy for a minimum of one year during the assessment period.
The purpose of assessment is to assess the quality of the prosecutor's professional activities, to evaluate their skills, abilities and character traits with an impact thereon and to facilitate professional development. The assessment may only feature duly supported, factual findings.
Prosecutors do not need to be assessed during the six years preceding the completion of the applicable old-age pension age.
In addition to cases mentioned above, a prosecutor shall also be assessed if requested by the prosecutor, provided that two years have elapsed since the previous assessment, circumstances have emerged that indicate the prosecutor's professional ineligibility or the necessity to alter the evaluation of the previous assessment.
In the event of an ineligible grade, upon the disclosure of the result of the assessment, the prosecutor shall be called upon to resign his/her office within thirty days. If despite the call the prosecutor does not resign his/her office, his/her prosecution service employment shall be terminated by exempting him/her from office. If a prosecutor on fixed-term service is assessed as ineligible before the expiry of the fixed term, the prosecutor's service relationship shall be terminated on the date of expiry of the fixed term.
In accordance with Sections 13/A-13/F of Instruction 4/2012. (I. 6.) of the Prosecutor General on specific questions regarding the status of employees of the Prosecution Service, a case file examination shall be carried out as a basis for the assessment which is due to follow with regard to prosecutors appointed to a prosecution office subordinated to the Office of the Prosecutor General prior to the time when the assessment is due. Such a case file examination shall not be carried out for senior head prosecutors. Case file examinations shall discover the examined prosecutor's practice regarding the application of substantive and procedural law during at least a one-year period prior to the case file examination, or since the prosecutor's latest assessment – or in absence of an assessment – since the time of his/her appointment. The case file examination and its evaluation shall be done by a prosecutor (hereinafter: examiner prosecutor) who works at the prosecution office directly superior to the prosecution office where the examined prosecutor is appointed to and who works in the same field of prosecutorial activity or expertise as the examined prosecutor. The examiner prosecutor shall be designated by the directly superior prosecution office, whereas at the Office of the Prosecutor General by the head of the structural unit that is competent regarding the examined prosecutor's duties.

Q120 (2022): The person exercising the employer's rights assesses a prosecutor's work every eight years. The purpose of assessment based on the examination of case files is to assess the quality of the prosecutor's professional activities, to evaluate his/her skills, abilities and character traits with an impact thereon and to facilitate professional development.
In accordance with Section 50 (1) of the Prosecution Employment Status Act, prosecutors, with the exception of the Prosecutor General and the Deputy Prosecutor General, shall be assessed before the expiry of the fixed term of the first prosecution appointment, while in the case of a first appointment for an indefinite term, before the expiry of a period of three years following the appointment, and thereafter every eight years, provided that they worked under the supervision of the assessor or his/her deputy for minimum one year during the assessment period. Prosecutors do not need to be assessed during the six years preceding the completion of the applicable old-age pension age. In addition to cases mentioned above, a prosecutor shall also be assessed if requested by the prosecutor, provided that two years have elapsed since the previous assessment, circumstances have emerged that indicate the prosecutor's professional ineligibility or the necessity to alter the evaluation of the previous assessment. The purpose of assessment is to assess the quality of the prosecutor's professional activities, to evaluate his/her skills, abilities and character traits with an impact thereon and to facilitate professional development. The assessment may only feature duly supported, factual findings.
In the event of an ineligible grade, upon the disclosure of the result of the assessment, the prosecutor shall be called upon to resign his/her office within thirty days. If despite the call the prosecutor does not resign his/her office, his/her prosecution service employment shall be terminated by exempting him/her from office. In accordance with Sections 13/A-13/F of Instruction 4/2012. (I. 6.) of the Prosecutor General on specific questions regarding the status of employees of the Prosecution Service, a case file examination shall be carried out as a basis for the assessment which is due to follow with regard to the prosecutor appointed to a prosecution office subordinated to the Office of the Prosecutor General prior to the time when the assessment is due. Such a case file examination shall not be carried out for senior head prosecutors. Case file examinations shall discover the examined prosecutor's practice regarding the application of substantive and procedural law during at least a one-year period prior to the case file examination, or since the prosecutor's latest assessment – or in absence of an assessment – since the time of his/her appointment at the most. The case file examination and its evaluation shall be done by a prosecutor (hereinafter: examiner prosecutor) who works at the prosecution office directly superior to the prosecution office where the examined prosecutor is appointed to and who works in the same field of prosecutorial activity or expertise as the examined prosecutor. The examiner prosecutor shall be designated by the directly superior prosecution office or at the Office of the Prosecutor General by the head of the organizational unit in the prosecution service that is competent in view of the examined prosecutor's duties.

Ireland

Q120 (2024): Performance Management Development System (PMDS) is the on-going management of performance and is a key enabler of current and future Civil Service reform. PMDS is designed to be a meaningful and useful support to all Staff and Managers in the management and improvement of individual performance.

Q120 (2023): A Prosecutor's performance is individually assessed through PMDS (Performance Management and Development System). PMDS assesses how a jobholder's work performance, career and development needs are managed. It links the management of individual performance to the objectives of the Office, as set out in the Strategy of Statement and Business Plan. PMDS seeks to strike a balance between the needs of the organisation and the development needs of those who work in it. It recognises the need for continual change and improvement and for the involvement of staff in bringing this about. Individual prosecutors are responsible for carrying out their own goal setting and assessment. The PMDS form is then reviewed and assessed by the prosecutor's manager.

Q120 (2022): A Prosecutor's performance is individually assessed through PMDS (Performance Management and Development System). Individual prosecutors are responsible for carrying out their own goal setting and assessment. The PMDS form is then reviewed and assessed by the prosecutor's manager.

Italy

Q120 (General Comment): The assessment procedure applies to both judges and public prosecutors. Every four years, the High Council for the Judiciary (CSM) conducts a professional appraisal based on the professional skills of judges/prosecutors. The professional status of both judges and prosecutors is organized into 7 different levels. Several criteria are taken into consideration: independence, impartiality, balance, professional capacity, work capacity, diligence and commitment The assessment is based on a number of acts and documents that describe all the professional aspects of the magistrate to be evaluated. The most significant are: •"self report" where the magistrate illustrates all the elements that he/she believes are necessary or useful to be considered for the purpose of his/her appraisal; •a random sample of acts and documents produced by the magistrate during the evaluation period;
•an "informative report" prepared by a superior of the magistrate;
•the statistics concerning activity of the magistrate: the number of provisions drafted, the processing times of the proceedings, the time for filing the documents (even in comparison with the other magistrates of the office); •work related publications, If any;
•reports from the lawyers' council, if any.

Latvia

Q120 (General Comment): Evaluation is carried out by the Attestation Commission of Prosecutors. During the evaluation of a public prosecutor the following indicators of the quality of performance of the functions are assessed: supervision, criminal prosecution, maintenance of state prosecution in court, as well as the protection of state and individual rights. An assessment of professional competences is also carried out. The results are generally used to evaluate professional performance and suitability for the position. In the case of a negative opinion, the Commission can determine specific tasks that must be performed to eliminate the deficiencies found in prosecutor’s professional activity or to improve his/her professional activity.

Q120 (2024): The purpose of evaluating professional performance of prosecutors is to promote the continuous professional development. The evaluation of the prosecutor's professional activity is carried out by the Attestation Commission of Prosecutors established by the Council of Prosecutor General at least once every five years. In cases where deficiencies are found in the prosecutor's professional activity, the assessment can be carried out any time before the term of five years. When evaluating the professional performance of the prosecutor, the Attestation Commission of Prosecutors analyses the quality of performance of the prosecutor's functions, the organization of individual work, the participation in activities improving qualification, the statistical indicators, as well as other criteria provided for in the Regulation on the Evaluation of Professional Performance of Prosecutors. Following the evaluation the Attestation Commission of Prosecutors gives a positive or negative opinion, in some cases specific tasks can be determined for the prosecutor to eliminate the deficiencies found in professional activity or to improve his professional performance. The opinion of the Attestation Commission of Prosecutors acquires legal force when it is approved by the Prosecutor General.

Q120 (2023): The purpose of evaluating the professional performance of the prosecutor is to promote the continuous professional development of the prosecutor during the performance of his/her duties. The evaluation of the prosecutor's professional activity is carried out by the Attestation Commission of Prosecutors established by the Council of Prosecutor General at least once every five years. In cases where deficiencies are found in the prosecutor's professional activity, the assessment of his/her professional performance can be (in certain cases must be) carried out any time before the term of 5 years. When evaluating the professional performance of the prosecutor, the Attestation Commission of Prosecutors analyses the quality of performance of the prosecutor's functions, the organization of individual work, participation in qualification raising events, statistical indicators of work, as well as other criteria provided for in the Regulation on the Evaluation of Professional Performance of Prosecutors. The Attestation Commission of Prosecutors gives a positive or negative opinion on the professional activity of the prosecutor, including, specific tasks can be determined for the prosecutor to be performed in order to eliminate the deficiencies found in his professional activity or to improve his professional performance. The opinion of the Attestation Commission of Prosecutors acquires legal force when it is approved by the Prosecutor General.

Lithuania

Q120 (2024): The service, qualifications of the prosecutors and their suitability for the position are assessed by the Prosecutors' Assessment Commission.
The Commission is composed of seven members (four prosecutors and three persons (non-prosecutors) of impeccable reputation, nominated by the President of the Republic, the Speaker of the Seimas, and the Prime Minister) for a period of three years.
The Commission assesses data on the procedural and non-procedural performance and professional qualities of the prosecutor, and, in the case of the evaluation of the chief prosecutor (or deputy), also on the administrative performance.

Q120 (General Comment): The public prosecution has a team Judicial Quality at the General Office that studies the quality of the criminal proceedings of the public prosecution. As part of these studies and assessments, a pool of prosecutors has been compiled, and they study the work of other public prosecutors. This is an assessment of an office, not of individual prosecutors. The results of these studies are used for quality enhancement trajectories. The studies are repeated periodically.

Q120 (2020): The public prosecution has a team Judical Quality at the General Office (Parket Generaal) that studies the quality of the criminal proceedings of the public prosecution. As part of these studies and assessments, a pool of prosecutors has been compiled, and they study the work of other public prosecutors. The results of these studies are used for quality enhancement trajectories. The studies are repeated periodically.

Portugal

Q120 (General Comment): The prosecutors are evaluated periodically in time lapses between 3 to 5 years. The evaluation is held by the Prosecutors Superior High Council and it evaluates the quality of the work held by all prosecutors. A higher ranked prosecutor does the evaluation and produces a report that is sanctioned by the Prosecutors Superior High Council.

Q120 (2024): The criteria are the following: capacity to exercise the profession, technical preparation and adaptation to the inspected service – article 11 of the evaluation regulations - https://www.ministeriopublico.pt/iframe/regulamento-de-inspecoes-do-ministerio-publico.
The authority competent for carrying out the assessment are the public prosecutors appointed by the Superior Council of the Public Prosecutor.
The assessment is used to: career progression and to check whether the prosecutor is able to perform duties in the court where he is placed.

Q120 (2023): The criteria are the following: capacity to exercise the profession, technical preparation and adaptation to the inspected service – article 11 of the evaluation regulations - https://www.ministeriopublico.pt/iframe/regulamento-de-inspecoes-do-ministerio-publico.
The authority competent for carrying out the assessment are the public prosecutors appointed by the Superior Council of the Public Prosecutor.
The assessment is used to: career progression and to check whether the prosecutor is able to perform duties in the court where he is placed.

Q120 (2024): Evaluation of a prosecutor pursuant to Section 31 of Act No. 154/2001 Coll.

Slovenia

Q120 (General Comment): On the proposal of the State Prosecutor General, State Prosecutorial Council adopts Criteria for the assessment of state prosecutors' performance. They define quality and quantity indicators. The quantitative criteria define expected time for the resolution of cases and for typical procedural acts. The performance of the evaluated prosecutor is compared to other prosecutors at his/her office concerning the number of assigned, resolved and unresolved cases, number of attendances at the court hearings, conviction rate, pronounced sanctions and number of logged appeals. Head of state prosecutor's office as competent authority for the matters od state prosecution administration can alert the public prosecutor to his duty to meet the targets.
Regular individual assessment of the public prosecutors’ work is carried out every three years. The assessment can also be carried out on demand of the State Prosecutorial Council, head of prosecutor’s office, Minister or the prosecutor himself. In first three years after the appointment for the state prosecutor the assessment is carried out every single year.

Public Prosecutor's Office Support Service, sdaomp@just.fgov.be

Bulgaria

Q120-1 (General Comment): Quantitative evaluation of the work of the prosecutors is carried out by applying the Rules for measuring the workload of the prosecutor's offices and the individual workload of each prosecutor and investigator, adopted by the Prosecution College/collegium of the SJC. It is possible to display the data according to the indicators provided for in the Rules in real time, both for the prosecutor's office as a whole, as well as for individual prosecutor's offices and for each specific prosecutor.
Quantitative data on the workload are taken into account in the appraisal procedure of a specific prosecutor, in the course of which an assessment of his work is carried out, both in terms of quantitative indicators and also regarding the quality of the performed activity according to the results achieved.
Prosecutors are assessed in accordance with Ordinance No. 3 of February 23, 2017 of the Supreme Judicial Council on the indicators and Methodology for Assessment and the Criteria for Reporting the Workload Degree of Prosecutors and Investigators and of Administrative Heads and Their Deputies (promulgated SG No. 21 /10.03.2017).
Attestation is carried out:
1. in advance - for a three-year period from the appointment to the position of prosecutor or investigator - when participating in a competition or when being offered a promotion;
2. to acquire irreplaceability - upon completion of 5 years of experience as a prosecutor or investigator;
3. periodically - for a 5-year period from the attestation of irreplaceability of a prosecutor and investigator, of an administrative head and of a deputy administrative head;
4. extraordinary - in the cases under Art. 197, para. 5 of the Judicial System Act.
Junior prosecutors and junior investigators are not assessed in advance, and a report on their work is prepared by the mentor in the second year of their appointment.

Croatia

Q120-1 (2024): The State Attorney and the Deputy State Attorney are evaluated every three years. If the Deputy State Attorney is a candidate in the procedure for appointment to a senior State Attorney's office or for State Attorney, the State Attorney will evaluate him/her on the basis of his/her previous work, even if three years have not passed since the date of appointment. This evaluation serves only for the purposes of the specific appointment procedure.

Cyprus

Q120-1 (2021): the assessment is carried out by the AG the Deputy AG and the head of Department as part of their annual evaluation

Czech Republic

Q120-1 (2018): The individual assessment of the public prosecutors' work take place at least once every two years.

Denmark

Q120-1 (General Comment): Prosecutors are continuously evaluated by their immediate manager, i.a. at the annual employee development interviews, where the manager evaluates the employee's performance in the current position as well as the employee's development goals for the coming year.
In the first 6 months of employment prosecutors have a targeted onboarding program. This also includes feedback and evaluation of the individual prosecutor.
Furthermore prosecutors go through targeted basic training in the first three years of employment, which ends with an exam and assessment. They are also assigned a mentor, who is a professional sparring partner for the prosecutor and provides professional feedback on the prosecutor's performance and legal work.

Q120-1 (2024): The evaluation takes place continuously during the basic training and rotation period but is conducted for all prosecutors, including in connection with performance appraisals (MUS interviews), one-on-one meetings, and similar sessions.The topics may include the following: well-being, motivation, efficiency in task execution, holistic perspective etc.

Q120-1 (2021): More frequent during the first three years of their career. Less frequent after that.

Q120-1 (2020): See response to 120: More frequent during the first three years of their career. Less frequent after that.

France

Q120-1 (2022): Article 12-1 of the ordinance of December 22, 1958 establishes the principle of evaluating the professional activity of each judge/prosecutor every two years. An evaluation must also be conducted when applying for promotion.

Q120-1 (2021): source DSJ

Germany

Q120-1 (2024): Assessment intervals vary among the federal states. Assments are generally more frequent at the beginning of the career (approx. every 6 to 9 months) and become less frequent over time (approx. every year to every 5 years). Additionally, occasion-related assessments may be performed in case of promotions or applications for new positions.

Q120-1 (2023): Assessment intervals vary among the federal states. Assments are generally more frequent at the beginning of the career (approx. every 6 to 9 months) and become less frequent over time (approx. every year to every 5 years). Additionally, occasion-related assessments may be performed in case of promotions or applications for new positions.

Greece

Q120-1 (2022): The question was answered by the prosecutor's office of the Supreme Court.

Hungary

Q120-1 (2021): Under Section 50 (1) of Act on Prosecutors, prosecutors shall be assessed on a regular basis, with the exception of the Prosecutor General and the Deputy Prosecutors General.
In case of the first appointment, which is for a definite term, the prosecutor shall be assessed by the end of that term. In case of appointment to prosecutor for an indefinite term, the prosecutor shall be assessed within 3 years following the appointment; then the assessment shall be carried out every 8 years.
Prosecutors are do not need to be assessed within the period of six years before reaching retirement age.
Besides the above, prosecutors shall be assessed if they request so, provided that at least 2 years have elapsed since the last assessment, or in the occurrence of any circumstance which suggests professional inadequacy, or which necessitates the amendment of the results of the last assessment. The assessment procedure involves examination of case files, as set out in Sections 13A to 13F of the Prosecutor General's Order No. 4/2012.

Q120-1 (2018): The evaluation system is defined by Articles 50-52 of the Act on the Legal Status of Prosecutors. The purpose is to assess the quality of the prosecutor's activities, his/her skills, abilities and character traits with an impact thereon and to facilitate professional development. Prosecutors, with the exception of the Prosecutor General and the Deputy Prosecutor General, are assessed before the expiry of the fixed term of the first appointment, while in the case of a first appointment for an indefinite term, before the expiry of a period of 3 years following the appointment, and thereafter every 8 years. Prosecutors need not be assessed during the 6 years preceding the completion of the applicable old-age pension age. A prosecutor shall also be assessed if: requested by the prosecutor; circumstances have emerged that indicate the prosecutor's professional ineligibility or the necessity to alter the evaluation of the previous assessment; in the extraordinary proceeding to be completed without delay, s/he fails to meet the deadline extended by the superior prosecutor. The assessment is the duty of the person exercising the employer's rights. The official work of prosecutors assigned to the Ministry is evaluated by the Minister responsible for justice in accordance with the rules applicable to government officials. As a result, prosecutors may be awarded the following grades: excellent, suitable for promotion; excellent and fully eligible; eligible; eligible, subsequent assessment required; ineligible. In the event of an ineligible grade, the prosecutor shall be called upon to resign his/her office within thirty days. If the prosecutor is awarded a grade "eligible, subsequent assessment required", the person exercising the employer's rights identifies the deficiencies and irregularities and states the main criteria of the desired changes which shall be reviewed prior to the next assessment (within 2 years). A prosecutor shall be awarded an ineligible grade upon the next assessment if he/she fails to obtain an eligible grade. S/he may request a court of law to quash any erroneous or untrue finding.

Ireland

Q120-1 (2021): Performance Management System

Q120-1 (2018): Prosecutors working in-house are required to participate in Public service wide Performance Management and Development System (PMDS).

Italy

Q120-1 (2023): Every four years

Q120-1 (2022): Every four years

Latvia

Q120-1 (General Comment): The assessment of the professional activities of prosecutors have been commenced and is operational from 1 January 2014, within which the professional activities of prosecutors are assessed on a regular basis (not less than once every five years).

Q120-1 (2024): In general, no less than once every five years, if all skills are assessed at an appropriate level. If deficiencies are found in the actions of the prosecutor and the measures taken have not brought positive results, then the assessment is carried out earlier. If the prosecutor's skills are assessed negatively, the evaluation must be carried out immediately. As from 2024, a new system of the evaluation of prosecutors is introduced, which also provides for annual evaluation. In accordance with this new system, starting from the reporting period of 2023, an annual evaluation of the activities of district-level prosecutors is carried out – the results of the activities of all district-level prosecutors in four main work areas are compared with each other:
– supervision of criminal cases under investigation,
– completion of the pre-trial investigation,
– maintenance of state prosecution in court,
– work in the field of non-criminal cases.
Each of the mentioned areas is evaluated according to the performance indicators, which are grouped into three categories – quantity, quality and compliance with the strategic goals of the Prosecution Office. As a result of the evaluation, prosecutors are divided into three groups – good efficiency, satisfactory efficiency (minor improvements necessary), unsatisfactory efficiency (significant improvements necessary). Regarding prosecutors that are evaluated as working satisfactorily, their direct managers set development goals for them for the current year. Regarding prosecutors that are evaluated as working unsatisfactory, the responsible structural unit of the Prosecutor General's Office creates a professional development program with performance improvement tasks for the current year. The execution of this program is controlled by the prosecutor's immediate supervisor and/or a higher-ranking prosecutor. For the period from 2023, in relation to chief prosecutors (organizational management) and higher-ranking prosecutors, a 360-degree performance and competence evaluation is carried out using survey questionnaires. The results of the survey are sent to the corresponding next level chief prosecutors and next higher-ranking prosecutors. Based on the survey results, they set professional development goals for their chief prosecutors and lower-ranking prosecutors for the current year.

Q120-1 (2023): In general, no less than once every five years, if all skills are assessed at an appropriate level. If deficiencies are found in the actions of the prosecutor and the measures taken have not brought positive results, then the assessment is carried out earlier. If the prosecutor's skills are assessed negatively, the evaluation must be carried out immediately.
As from 2024, a new system of professional activity of prosecutors is introduced, which also provides for annual evaluation. In accordance with this new system, starting from the reporting period of 2023, an annual evaluation of the activities of district-level prosecutors is carried out - the results of the activities of all district-level prosecutors in four main work areas are compared with each other:
– supervision of criminal cases under investigation,
– completion of the pre-trial investigation,
– maintenance of state prosecution in court,
– work in the field of non-criminal cases.
Each of the mentioned areas is evaluated according to the performance indicators, which are grouped into three categories - quantity, quality and compliance with the strategic goals of the Prosecution Office.
As a result of the evaluation, prosecutors are divided into three groups - good efficiency, satisfactory efficiency (minor improvements necessary), unsatisfactory efficiency (significant improvements necessary).
Regarding prosecutors working satisfactorily, their direct managers set development goals for them for the current year.
Regarding unsatisfactory working prosecutors, the responsible structural unit of the Prosecutor General's Office creates a professional development program with precise performance improvement tasks for the current year, the execution of which is controlled by the prosecutor's immediate supervisor and/or a higher-ranking prosecutor.
For the period from 2023, in relation to chief prosecutors (organizational management) and higher-ranking prosecutors, a 360-degree performance and competence evaluation is carried out using survey questionnaires.
The results of the survey are sent to the corresponding next level chief prosecutors and next higher-ranking prosecutors.
Based on the survey results, they set professional development goals for their chief prosecutors and lower-ranking prosecutors for the current year.

Q120-1 (2020): Not less than once every five years

Lithuania

Q120-1 (General Comment): According to Article 33 of the Law on Prosecution Service, evaluation of prosecutor's individual performance, qualification and suitability is carried out by the Attestation Commission. Performance of a prosecutor who has received a positive evaluation after his/her internship, is thereafter evaluated every five years during the regular evaluation of the service. The extraordinary evaluation can be carried out by decision of the Prosecutor General: at the request of the public prosecutor him/herself, if at least half a year has passed since his/her last evaluation; in the case the prosecutor is applying for a higher position, or to the same or an equivalent post after the expiry of the term of appointment; if three years have passed since the last evaluation of his/her service; if the prosecutor's performance has repeatedly been deficient, giving rise to reasonable doubts as to his/her suitability for the position in question.

Q120-1 (2024): The Commission carries out regular and extraordinary assessments of the service.
Regular service assessments are carried out:
1. at the end of the prosecutor's traineeship;
2. every five years.
An extraordinary service assessment may be carried out:
1. at the reasoned request of the prosecutor, if at least half a year has elapsed since the last assessment;
2. when, at the end of his/her term of office, the prosecutor seeks appointment to a higher, the same or an equivalent post, provided that three years have elapsed since the last service assessment;
3. in cases where it is established that the prosecutor's performance has repeatedly been deficient, giving rise to reasonable doubts as to his suitability for the post in question.

Q120-1 (2022): The Commission carries out regular and extraordinary assessments of the service.
Regular service assessments are carried out:
1. at the end of the prosecutor's traineeship;
2. every five years.
An extraordinary service assessment may be carried out:
1. at the reasoned request of the prosecutor, if at least half a year has elapsed since the last assessment;
2. when, at the end of his/her term of office, the prosecutor seeks appointment to a higher, the same or an equivalent post, provided that three years have elapsed since the last service assessment;
3. in cases where it is established that the prosecutor's performance has repeatedly been deficient, giving rise to reasonable doubts as to his suitability for the post in question.

Malta

Q120-1 (General Comment): It is up to the discretion of the Attorney General to conduct such an evaluation, but it must be carried out at least once annually..

Q120-1 (2022): It is up to the discretion of the Attorney General to carry out such evaluation but it has be carried out at least once annually.

Q120-1 (2021): The work of public prosecutors is constantly monitored by the Deputy AG and the AG herself. The monitoring is not scheduled at specific annual intervals but it is ingrained in the daily work processes in the Office.

Q120-1 (2020): The work of public prosecutors is constantly monitored by the Deputy AG and the AG herself. The monitoring is not scheduled at specific annual intervals but it is ingrained in the daily work processes in the Office.

Q120-1 (2018): Thework of public prosecutors is constantly monitored by the Deputy Attorney General (in charge of the criminal field) and the Attorney General. The monitoring is not scheduled at specific annual intervals, but is ongoing and ingrained in the daily work processes of the Office.

Netherlands

Q120-1 (General Comment): A regular cycle of individual assessments exists, based on certain competencies a public prosecutor should possess. The extent to which the public prosecutor possesses these competencies is assessed in performance and assessment reviews. Furthermore, each prosecutor has to obtain a certificate implying they are ‘fit for trial’, that they have the necessary skills to represent the public prosecution at trial.

Romania

Q120-1 (2024): Legislation on the statute of judges and prosecutors was replaced by Law no. 303/2022
Frequency: from to 2 to 5 years depending on the seniority; According to Article 88 of Law No 303/2022 - (1) Considering the seniority in the position of judge or prosecutor, the assessment shall be carried out as follows: a) every 2 years, for judges and prosecutors with a seniority of between one and five years; b) every 3 years, for judges and prosecutors with a seniority of between 5 and 10 years; c) every 4 years, for judges and prosecutors with a seniority of between 10 and 15 years; d) every 5 years, for judges and prosecutors with a seniority of more than 15 years. (2) Judges of the High Court of Cassation and Justice shall not be subject to evaluation. (3) Professional evaluation may also be carried out whenever requested by the judge or prosecutor

Q120-1 (2023): Legislation on the statute of judges and prosecutors was replaced by Law no. 303/2022

Q120-1 (2022): Legislation on the statute of judges and prosecutors was replaced by Law no. 303/2022

Q120-1 (2020): According to the provisions of art. 39 of the Law no. 303/2004, amended and republished in 2018, judges and prosecutors are being periodically evaluated under the observance of the professional and performance criteria. The evaluation shall envisage the quality of their activity, efficiency, integrity as well as the fulfillment of the obligation to take part in in-service professional training and on managerial activity for those judges and prosecutors in leadership positions. The periodical evaluation shall be first carried out by the end of the first 2 years of activity after the entering in profession and shall be continued every 3/4/5 years depending on the seniority in profession (5-10 years, 10-15 years, over 15 years of seniority).

Q120-1 (2018): similar to judges, see Q114, 114.1 and the additional comments

Slovak Republic

Q120-1 (2024): Evaluation of a prosecutor pursuant to Section 31 of Act No. 154/2001 Coll., which is conducted in connection with selection procedures, disciplinary proceedings, or at the prosecutor’s request in relation to the termination of the prosecutor’s service relationship.
The evaluation of a prosecutor is carried out by the head of the service office on the basis of documents prepared by the supervising prosecutor. In the case of a prosecutor who has been temporarily assigned to another prosecutor’s office for a period exceeding six months, the head of the service office shall also request supporting documents from the supervising prosecutor of the office to which the prosecutor has been temporarily assigned.
The evaluation of a prosecutor includes, in particular, an assessment of:
a) the prosecutor’s procedures and decision-making activities, focusing on the professional quality of decisions and the timeliness of proceedings;
b) the prosecutor’s knowledge of generally binding legal regulations, internal service regulations, and the results of professional development;
c) compliance with service discipline.

Slovenia

Q120-1 (General Comment): Regular individual assessment of the public prosecutors’ work is carried out every three years. The assessment can also be carried out on demand of the State Prosecutorial Council, head of prosecutor’s office, Minister or the prosecutor himself. In first three years after the appointment for the state prosecutor the assessment is carried out every single year.

Q120-1 (2024): Every year in the first three years of appointment, then every three years.

Q120-1 (2018): Every three years

Due to clarifications in the methodology, in 2020 the number of courts of different instances that operate in the same site are separately counted.

Malta: The Supreme Court is the 2nd instance and highest instance court in the country.

Spain: As general rule, the first instance courts - legal entities are unipersonal courts - one judge is considered one court.

Table 2.2a Number of first instance courts from 2014 to 2024 (general jurisdiction and specialised courts as legal entities and first instance courts as geographic locations) (Q42, Q43 and Q44)

States	Number of first instance courts - Legal entities																						Number of first instance courts - Geographic locations				
	Total number in 2024 (1) + (2)	General jurisdiction											Specialised courts

Due to clarifications in the methodology, in 2020 the number of courts of different instances that operate in the same site are separately counted.

Belgium: Starting from 2020, a new methodology of presentation of data is used as to the distinction between 1st instance courts of general jurisdiction and 1st instance specialised courts

Greece: Following a judicial map reform, all magistrate courts were abolished. Accordingly, the number of first instance courts considerably decreased for 2024.

Italy: Before 2014 only courts financed by Ministry of justice were included

Latvia: Different presentation of number of specialised courts in 2015. In reality there is one administrative court with 5 court houses

Luxembourg: The methodology of presentation of data concerning 1st instance specialised courts was improved in 2020

Slovak Republic: Administrative courts, established under Act No. 151/2022 Coll. as part of the new court map effective 1 June 2023, are included in the count of specialised courts.

Spain: As general rule, the first instance courts - legal entities are unipersonal courts - one judge is considered one court.

Table 2.2b Number of first instance courts per 100 000 inhabitants from 2014 to 2024 (general jurisdiction and specialised courts as legal entities and first instance courts as geographic locations) (Q1, Q42, Q43 and Q44)

Due to clarifications in the methodology, in 2020 the number of courts of different instances that operate in the same site are separately counted.

Belgium: Starting from 2020, a new methodology of presentation of data is used as to the distinction between 1st instance courts of general jurisdiction and 1st instance specialised courts

Greece: Following a judicial map reform, all magistrate courts were abolished. Accordingly, the number of first instance courts considerably decreased for 2024.

Italy: Before 2014 only courts financed by Ministry of justice were included

Latvia: Different presentation of number of specialised courts in 2015. In reality there is one administrative court with 5 court houses

Luxembourg: The methodology of presentation of data concerning 1st instance specialised courts was improved in 2020

Slovak Republic: Administrative courts, established under Act No. 151/2022 Coll. as part of the new court map effective 1 June 2023, are included in the count of specialised courts.

Spain: As general rule, the first instance courts - legal entities are unipersonal courts - one judge is considered one court.

(1) Due to clarifications in the methodology, in 2020 the number of courts of different instances that operate in the same site are separately counted.

Croatia: in 2019, misdemeanor courts were merged into municipal courts.

Greece: Following a judicial map reform, all magistrate courts were abolished. Accordingly, the number of first instance courts considerably decreased for 2024.

Ireland: As of 2020, the methodology used to count the number of courts – geographic locations changed to fully align it with the CEPEJ definitions.

Indicator 2: The judicial organisation

Question 042.

Question 043.

Question 044.

Austria

Q042 (2024): In 2024 in Austria, the number of courts considered as legal entities is 150. Namely, there are 131 courts of general jurisdiction and 19 specialised courts. Among the 131 legal entities of general jurisdiction, 126 act at first instance, 4 at second instance and one at third instance. More precisely, the 113 District courts and the 13 Regional courts of general jurisdiction intervene as first instance courts. It is noteworthy that the 6 other regional and 1 district court that have specialised jurisdiction are not taken into consideration here, but are counted as specialised first instance courts (infra). It is to be mentioned that the peculiarity of the 20 Austrian Regional courts is that even though these are first instance courts, some of them are also competent in respect of appeals against District courts' decisions. The 4 Higher Regional Courts have appeal competence in respect of all civil and criminal cases. The Supreme court is the highest instance court in civil and criminal matters.

Q042 (2023): In 2023 in Austria, the number of courts considered as legal entities is 150. Namely, there are 131 courts of general
jurisdiction and 19 specialised courts. Among the 131 legal entities of general jurisdiction, 126 act at first instance, 4 at second instance and one at third instance. More precisely, the 113 District courts and the 13 Regional courts of general jurisdiction intervene as first instance courts. It is noteworthy that the 7 other regional courts that have specialised jurisdiction are not taken into consideration here, but are counted as specialised first instance courts (infra). It is to be mentioned that the peculiarity of the 20 Austrian Regional courts is that even though these are first instance courts, some of them are also competent in respect of appeals against District courts' decisions. The 4 Higher Regional Courts have appeal competence in respect of all civil and criminal cases.
The Supreme court is the highest instance court in civil and criminal matters.

Q042 (2022): In 2022 in Austria, the number of courts considered as legal entities is 152. Namely, there are 133 courts of general
jurisdiction and 19 specialised courts. Among the 133 legal entities of general jurisdiction, 128 act at first instance, 4 at second instance and one at third instance. More precisely, the 115 District courts and the 13 Regional courts of general jurisdiction intervene as first instance courts. It is noteworthy that the 7 other regional courts that have specialised jurisdiction are not taken into consideration here, but are counted as specialised first instance courts (infra). It is to be mentioned that the peculiarity of the 20 Austrian Regional courts is that even though these are first instance courts, some of them are also competent in respect of appeals against District courts' decisions. The 4 Higher Regional Courts have appeal competence in respect of all civil and criminal cases.
The Supreme court is the highest instance court in civil and criminal matters.

Q042 (2020): In 2020 in Austria, the number of courts considered as legal entities is 152. Namely, there are 133 courts of general jurisdiction and 19 specialised courts. Among the 133 legal entities of general jurisdiction, 128 act at first instance, 4 at second instance and one at third instance. More precisely, the 115 District courts and the 13 Regional courts of general jurisdiction intervene as first instance courts. It is noteworthy that the 7 other regional courts that have specialised jurisdiction are not taken into consideration here, but are counted as specialised first instance courts (infra). It is to be mentioned that the peculiarity of the 20 Austrian Regional courts is that even though these are first instance courts, some of them are also competent in respect of appeals against District courts' decisions. The 4 Higher Regional Courts have appeal competence in respect of all civil and criminal cases.
The Supreme court is the highest instance court in civil and criminal matters.

Q042 (2014): From January 1st 2013 to July 1st, 2014 a number of district courts merged. In 2014, there are 129 first instance district courts which is less than 132 (number communicated for 2013) but still not complying with the aim of 115.

Q043 (General Comment): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. six in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases, administrative cases) and two in Graz (civil cases, criminal cases); Since there are special courts for civil law cases in Vienna and Graz, which cannot be selected individually here, and because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2024): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. six in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases, administrative cases) and two in Graz (civil cases, criminal cases); Since there are special courts for civil law cases in Vienna and Graz, which cannot be selected individually here, and because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2023): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. six in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases, administrative cases) and two in Graz (civil cases, criminal cases); Since there are special courts for civil law cases in Vienna and Graz, which cannot be selected individually here, and because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2022): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. six in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases, administrative cases) and two in Graz (civil cases, criminal cases); Since there are special courts for civil law cases in Vienna and Graz, which cannot be selected individually here, and because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2021): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases) and two in Graz (civil cases, criminal cases); Because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts. One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2020): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases) and two in Graz (civil cases, criminal cases);
Because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2019): On principal every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialized, i.e. eight in Vienna (civil cases, criminal cases, commercial cases [2x], employment- and social welfare cases, administrative cases) and two in Graz (criminal cases, remaining cases). There is also a regional administrative court in every federal state (9 in total). Because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts equals nineteen.

Q043 (2018): On principal every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], employment- and social welfare cases) and two in Graz (criminal cases, remaining cases)

Q043 (2017): On principal every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], employment- and social welfare cases) and two in Graz (criminal cases, remaining cases)

Q043 (2016): On principal every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], employment- and social welfare cases) and two in Graz (criminal cases, remaining cases)

Q044 (2024): The discrepency is due to an error in calculation last year. This should also have been the correct numbers in last years' report. The Lower Austria Regional Administrative courts has "external offices" in parts of Lower Austria, and the Federal Administrative Court as well as the Federal Tax Court do have regional buildings in the Federal States as well. This was taken into account in 2022 data, where another mistake seems to have been included (the number should have been 162 and 168 in 2022. Afterwards we lost 2 district courts).
Q044 (2020): For this cycle, data on geographic locations is presented in respect of different locations for different instances, in compliance with the methodology developed in the Explanatory Note. The variation observed with previous cycles is only of a methodological nature.
Q044 (2016): It is planned to reduce the number of courts by 3 in 2018 (-1) and 2019 (-2)

Belgium

Q042 (General Comment): The reform of the Justices of the peace, involving a reduction in geographic locations, was consolidated by the law of 25th December 2017. The implementation of the reform took place between 2016 and 2019.

“1.1 First instance courts of general jurisdiction - legal entities”: 13 first-instance courts, 162 Justices of the peace and 15 police courts. As for the assize courts governed by Articles 114 et seq. of the Judicial Code, due to their specific nature, they are not considered legal entities within the meaning of the CEPEJ and are not included in the table. In principle, the assize court sits in the capital of the various provinces and in the administrative district of Brussels-Capital. Thus, it sits in Antwerp, Arlon, Bruges, Brussels, Ghent, Liège, Leuven, Mons, Namur, Nivelles, or Tongeren, depending on the circumstances (Article 115 of the Judicial Code). There are therefore 11 assize courts in Belgium.

“1.2 Second instance courts of general jurisdiction - legal entities” : there are five appellate courts ; however, it should be mentioned that the 13 first-instance courts also act as appellate courts with regard to decisions made by the justices of the peace.

Starting from 2022, both justices of the peace and police courts are included under courts of general jurisdiction. In previous cycles, they were categorized as specialized first-instance courts. The assize courts were taken into account from 2020 to 2023, but starting from 2024, due to their specific nature (they do not sit permanently) they are no longer included in the table as first instance courts of general jurisdiction.

Given that the Council of State (Conseil d'Etat) acts both at first instance level and on appeal, it has been accounted for under both columns Q43 but only once within the total of Q42.2.

Q042 (2024): Point “1.2 Second instance courts of general jurisdiction - legal entities”: only the five courts of appeal are listed here, even though the 13 first instance courts also have jurisdiction to hear appeals against decisions of justices of the peace. Point “2. Total number of specialised courts - legal entities”: labor courts are included under “specialized courts of second instance.” From 2024 onwards, due to their specific nature, the 11 assize courts that do not sit permanently are no longer included in the table as first instance courts of general jurisdiction.

Q042 (2023): Point “1.2 Second instance courts of general jurisdiction - legal entities”: only the 5 courts of appeal have been indicated here, but the 13 courts of first instance also have jurisdiction to hear appeals against decisions of the justices of the peace.
Point 2: Labour courts are included under ‘specialised courts of second instance’.
Q042 (2022): 1.2. Second instance courts of general jurisdiction – legal entities : only the 5 courts of appeal have been mentioned here, but the 13 first instance courts also have jurisdiction to hear appeals against decisions of the Justices of the peace.
Q042 (2021): 1.1 First instance courts of general jurisdiction: 13 first instance courts, 162 Justices of the peace, 11 Assize courts (one per province and two in Brussels) and 15 Police courts.
1.2 Second instance courts of general jurisdiction: 5 Courts of appeal (the 13 first instance courts that rule as appeal courts on the decisions of the Justices of the peace are taken into consideration only within line 1.1).
As for the previous evaluation round (2020 data), Justices of the peace and Police courts are counted as courts of general jurisdiction. Before 2020, they were categorized as specialized courts of first instance. As of 2020, the 11 Assize courts are also included in the data. Insofar as the Council of State (Conseil d'Etat) intervenes both in first instance and on appeal, it has been taken into account in both columns of Q43, but only once in the total of Q42.2.
It is worth mentioning that the Assize courts are not structural entities (they are not permanent); they are organised within the Courts of appeal. The Assize court is constituted whenever the Investigation Chamber of the respective Court of appeal (Chambre des mises en accusation) refers a case to that court - the Assize court.
All courts in Belgium (except the Court of cassation) are grouped into 49 legal entities (steering committees).

Q042 (2020): "1.1 First instance Courts of general jurisdiction: 13 first instance courts, 162 justices of the peace, 11 assize courts (one per province and two in Brussels) and 15 police courts. "Second instance Courts of general jurisdiction": 13 courts of first instance that rule as appeal courts on the decisions of the justices of the peace and 5 appeal courts.
Vertical consistency in the table is not ensured, as the 13 courts of first instance with dual jurisdiction (1 and 2 instances) have been counted only once in the totals.
For the current evaluation round (2020 data), justices of the peace and police courts are counted as general courts. In previous cycles, they were categorized as specialized courts of first instance. As of 2020, the 11 assize courts are also included in the data. Insofar as the Conseil d'Etat intervenes both in first instance and on appeal, it has been taken into account in both columns of Q43, but only once in the total of Q42.2."

Q042 (2017): The law of 25 December 2017 amended the number of cantons of justices of the peace from 187 to 162. The implementation of this reform will take place until 2019.
Q042 (2016): A reform of the justices of the peace is under way, leading to a reduction in the number of hearing locations.

Q042 (2014): Following a reform of the judicial map, the number of legal entities decreased: from 27 to 13 first instance courts, from 27 to 9 labour courts, from 27 to 9 commercial courts, and from 34 to 15 police courts.
Q043 (General Comment): « Higher instances": 5 labour courts + 1 Council of State (Conseil d'Etat) – administrative law litigation section = 6

Starting from 2020, justices of the peace and police courts are counted as courts of general jurisdiction. Administrative courts: Council of State, Aliens Litigation Council, Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege and Raad voor Verkiezingsbetwistingen.
Six courts of first instance have specialised enforcement divisions. The term ‘enforcement court’ is used, but in reality, this is a specialised chamber.

All the first instance courts (13) have a specialised family and youth section. The term ‘family court’ is used, but in reality, it is a specialised section.

Q043 (2024): "Specialised courts - higher instances" - 5 labour courts and the Council of State, administrative law litigation section (Conseil d'Etat)
Q043 (2023): Higher courts: 5 labour courts + 1 Council of State (Conseil d'Etat) - administrative litigation section.

Q043 (2021): In Belgium, the following courts do not exist - insolvency courts, family courts, juvenile courts, insurance and / or social welfare courts, rent and tenancies courts, enforcement of criminal sanctions courts, courts specialised in fight against terrorism or in internet related disputes. These case categories are within the competence of company courts (insolvency, insurances), first instance courts (family, juveniles, enforcement of sentences), labour courts (safety in work).
As for the previous evaluation round (2020 data), Justices of the peace and Police courts are counted as courts of general jurisdiction. Before 2020, they were categorized as specialized courts of first instance.

Q043 (2020):
For the current evaluation round (2020 data), justices of the peace and police courts are counted as general courts. In previous cycles, they were categorized as specialized courts of first instance.
Q043 (2019): Other: 162 justices of the peace and 15 police courts. Administrative courts: Council of State, Council for Aliens Litigation, de Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege en de Raad voor Verkiezingsbetwistingen (these courts are under the authority of the Minister for Home Affairs and the Flemish Regional Government, and not the Minister of Justice).
Six courts of first instance have specialized chambers for the application of sentences. The denomination 'court for the enforcement of sentences' is used, but in reality it is a specialized chamber.
All the courts of first instance (13) have a special family and youth section. The denomination 'family court' is used, but in reality it is a specialized section.

Q043 (2017): Others: justices of the peace and police courts. The law of 25 December 2017 amended the number of cantons of justices of the peace from 187 to 162 (162 justices of the peace and 15 police courts).
Administrative courts: Council of State, Aliens Litigation Council, Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege en de Raad voor Verkiezingsbetwistingen.
Five courts of first instance have specialized chambers for the enforcement of sentences. Despite the term used in their respect - "court for the enforcement of sentences", those are specialised chambers.
All courts of first instance (13) have a specialised family and youth section. The term "family court" is used, but these are also specialised sections.

Q043 (2016): Other: justices of the peace and police courts
Administrative courts: Council of State, Aliens Litigation Council, Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege en de Raad voor Verkiezingsbetwistingen.
Five courts of first instance have specialized chambers for the enforcement of sentences. The name "court for the enforcement of sentences" is used, but in reality it is a specialized chamber.
All courts of first instance (13) have a specialized family and youth section. The name "family court'" is used, but in reality it is a specialized section.

Q043 (2015): Other: justices of the peace and police courts
Administrative courts: the Council of State, the Council of the Litigation of Foreigners, Milieuhandhavingscollege, de Raad voor Vergunningsbetwistingen en de Raad voor Verkiezingsbetwistingen.

Q043 (2014): The other specialised courts are 15 police courts and 187 justices of peace. Family courts are a section within the 13 first instance courts. The administrative courts (the Council of State, the Alien Litigation Council, "(Vlaamse)Raad voor Vergunningsbetwistingen", "het (Vlaamse) Milieuhandhavingscollege") are not part of the judicial system administered by the Ministry of Justice. Following a reform of the judicial map, the number of labour, commercial and police courts was reduced.

Q044 (General Comment): Deduction made on the basis of the number of buildings in which the courts are housed: 225 buildings in which all our premises are housed. In Eupen, the first instance court groups together the first instance court, the labour court and the company court, giving a total of 8 labour courts and company courts (Law of 14 February 2014).

Q044 (2020): Deduction made on the basis of the number of buildings in which the courts are housed: 225 buildings in which all our premises are housed. In Eupen, the first instance courts combines the court of first instance, the labour court and the company court, which gives 8 for the labour and company courts (Law of 14 February 2014)

Q044 (2016): A reform of the justices of the peace is under way: 1. a reduction in the number of geographical settlements 2. expansion of their jurisdiction by increasing the amount of claims.
The reform of the cantons (justices of the peace) was launched in 2016 and resulted in the law of 25 December 2017 which formally amended or abolished the cantons. The amendments come into force over 1.5 years.

Q044 (2014):
According to 2014 data, a change in the number of seats of the justices of the peace is ongoing. Similarly, from 1 April 2014, the statutory number of courts has been decreased for commercial, labour and police first instance courts while keeping the existing geographical seats.

Bulgaria

Q042 (General Comment): There are the following courts in Bulgaria: District Courts- 113- The District Court is the main court of first instance. It has jurisdiction over all cases except those which are statutorily assigned to another court. It deals with civil, criminal and administrative-criminal cases. The decisions of the district courts are subject to appeal before the respective Regional court. Provincial/Regional Courts- 28- The Provincial Courts act as courts of first and second instance. As courts of first instance, they examine a precisely defined category of cases involving significant sums or substantial societal interest. When acting as a second (appellate) instance, they re-examine decisions taken by the district courts. Administrative Courts- 28, Courts of Appeals - 5, MilitaryCourts - 3 - The Military courts consider criminal cases of crimes committed by servicemen or officials of the Interior Ministry at first instance. Military Court of Appeal - 1 Supreme Court of Cassation - 1 Supreme Administrative Court - 1

Q042 (2024): 1.1 First instance courts of general jurisdiction - legal entities- district courts
1.2 Second instance courts of general jurisdiction - legal entities- regional and appellate courts
Regional courts are courts of first instance for a certain category of cases and courts of second instance for another category of cases. Here, they are included in the number of courts of second instance with general jurisdiction as the decisive indicator used being the number of incoming cases
1.3 Highest instance courts of general jurisdiction - legal entities- Supreme Court of Cassation
2 Total number of specialised courts - legal entities– Supreme Administrative Court, military appellate, administrative, military courts

Q042 (2023): Regional courts are courts of first instance for a certain category of cases and courts of second instance for another category of cases. In this case, they are included in the number of courts of second instance with general jurisdiction as the decisive indicator used being the number of incoming cases

Q042 (2022): Regional/ Provincial courts are courts of first instance for a certain category of cases and courts of second instance for another category of cases. In this case, they are included in the number of courts of second instance with general jurisdiction, the decisive indicator used is the number of incoming cases.

Q042 (2020): Judiciary System Act
Article 65
All courts are legal entities funded by the budget and shall be represented by the administrative head or another designated person. In the discharge of the functions of administrative head, orders, instructions and rules shall be issued in accordance with the statutory competence. The general assembly, the plenum of the Supreme Cassation Court and the Plenum of the Supreme Administrative Court shall be bodies of the respective court, which rule only in the cases specified in the law, give opinions, adopt rules and decisions by open ballot and a majority of more than half of the judges present.

Q042 (2019): There are the following courts in Bulgaria: District Courts- 113- The District Court is the main court of first instance. It has jurisdiction over all cases except those which are statutorily assigned to another court. It deals with civil, criminal and administrative-criminal cases. The decisions of the district courts are subject to appeal before the respective Regional court.
Provincial/Regional Courts- 28- The Provincial Courts act as courts of first and second instance. As courts of first instance, they examine a precisely defined category of cases involving significant sums or substantial societal interest. When acting as a second (appellate) instance, they re-examine decisions taken by the district courts.
Administrative Courts- 28
Specialized Criminal Court -1
Courts of Appeals - 5
Specialized Court of Appeal - 1
MilitaryCourts - 3 - The Military courts consider criminal cases of crimes committed by servicemen or officials of the Interior Ministry at first instance.
Military Court of Appeal - 1
Supreme Court of Cassation - 1
Supreme Administrative Court - 1

Q042 (2018): 42.1. District Court - 113
The District Court is the main court of first instance. It has jurisdiction over all cases except those which are statutorily assigned to another court. It deals with civil, criminal and administrative-criminal cases. The decisions of the district courts are subject to appeal before the respective Regional court.
Provincial/ regional courts- 28
The provincial courts act as courts of first and second instance. As courts of first instance, they examine a precisely defined category of cases involving significant sums or substantial societal interest. When acting as a second (appellate) instance, they re-examine decisions taken by the district courts.
Military first instance courts- 3
Military courts consider criminal cases of crimes committed by servicemen or officials of the Interior Ministry at first instance.

Q043 (General Comment): Administrative Courts- 28
Supreme Administrative Court - 1
MilitaryCourts - 3
Military Court of Appeal - 1
Q043 (2022): •Previous cycles the category “other specialised courts” encompasses the Specialized Criminal Court of Republic of Bulgaria and Specialized Criminal Court of Appeal. In the State Gazette, no. 32 of 26.04.2022, the Law on Amendments and Supplements to the Law on the Judiciary/ Judiciary System Act was promulgated, which closed the specialized court and prosecutor's office.
Q043 (2021): The category “other specialised courts” encompasses the Specialized Criminal Court of Republic of Bulgaria, established in 2011, situated in Sofia and treated as a Provincial/Regional Court. Its jurisdiction covers criminal cases of a general nature for crimes carried out throughout the Republic of Bulgaria. Its competence is determined on the basis of the subject of the case and not the quality of the perpetrator. The Criminal Procedure Code exhaustively enumerates cases within the competence of this Court, namely crimes committed by organized criminal groups, or on behalf of them and following their decision.
Q043 (2020): The category “other specialised courts” encompasses the Specialized Criminal Court of Republic of Bulgaria, established in 2011, situated in Sofia and treated as a Provincial/Regional Court. Its jurisdiction covers criminal cases of a general nature for crimes carried out throughout the Republic of Bulgaria. Its competence is determined on the basis of the subject of the case and not the quality of the perpetrator. The Criminal Procedure Code exhaustively enumerates cases within the competence of this Court, namely crimes committed by organized criminal groups, or on behalf of them and following their decision.
Q043 (2019): The cases under the jurisdiction of Specialized Criminal Court are specified in Art. 411a of the Penal Procedure Code
Q043 (2018): The category “other” encompasses the Specialized Criminal Court of Republic of Bulgaria (see the general comment).

Q043 (2017): Specialized Criminal Court

Q043 (2016): 'Other specialised 1st instance courts' - 1 Specialized Criminal Court.

Q044 (2024): 1/ First instance courts geographic locations (this includes 1st instance courts of general jurisdiction and first instance specialised courts) – administrative, military and district as the Sofia District Court is located in two premises;
2/ All the courts (geographic locations) (this includes 1st instance courts of general jurisdiction, first instance specialised courts, all second instance courts and courts of appeal and all Supreme Courts)– Supreme Court of Cassation, Supreme Administrative Court, military appellate courts, administrative courts, regional courts, military courts and district courts (Sofia District Court, Sofia City Court and Sofia Appellate Court are located each in two premises for a total of six)

Q044 (2023): The Sofia Appellate Court, Sofia City Court and Sofia District Court are housed in two court buildings each, where sessions are held

Q044 (2022): Sofia District Court has two buildings where hearings are held.

Q044 (2018): Proposals for amendments to the Code of Administrative Procedure and Code of Civil Procedure to change the jurisdiction of the district and administrative courts with a view to regulating their workload. A model for the optimization of the judicial map at the level of district courts will be developed in implementation of a project under the Operational Program "Good Governance" 2014-2020.

Q044 (2016): Proposals for amendments to the Administrative Procedure Code and the Code of Civil Procedure are intended to reform the jurisdiction of regional and administrative courts in order to regulate their workload. Within the implementation of a project under “Good governance” Operational Programme 2014-2020 a model for optimization of the judicial map on regional courts level will be developed.

Croatia

Q042 (General Comment): The reform of judicial map implemented in 2015 decreased the number of Misdemeanour Courts from 63 to 22. Therefore, in accordance with the Act on Territorial Jurisdiction and Seats of Courts (Official Gazette, No. 128/14) in force, there are currently 22 Misdemeanour Courts in function. On the 1st of January 2019. new Courts Areas and Seats Act came into force. From the organizational aspect, the most important organizational measure was the merging of misdemeanor courts into municipal courts, and few municipal courts were reopened after 2015. That is why we have now less first instance specialized courts than in 2018. and more courts of general jurisdiction (22 courts which were in 2018. plus 8 courts which were reopened after the new law came into force).

Q042 (2020): On the 1st of January 2019. new Courts Areas and Seats Act came into force.From the organizational aspect, the most important organizational measure was the merging of misdemeanor courts into municipal courts, and few municipal courts were reopened after 2015. That is why we have now less first instance specialized courts than in 2018. and more courts of general jurisdiction (22 courts which were in 2018. plus 8 courts which were reopened after the new law came into force).

Q042 (2019): On the 1st of January 2019. new Courts Areas and Seats Act came into force.From the organizational aspect, the most important organizational measure was the merging of misdemeanor courts into municipal courts, and few municipal courts were reopened after 2015. That is why we have now less first instance specialized courts than in 2018. and more courts of general jurisdiction (22 courts which were in 2018. plus 8 courts which were reopened after the new law came into force).

Q042 (2016): There was a reform of judicial map implemented in 2015 in which the number of Misdemeanour Courts has decreased from 63 to 22. Therefore, in accordance with the Act on Territorial Jurisdiction and Seats of Courts (Official Gazette, No. 128/14) in force, there are currently 22 Misdemeanour Courts in function.

Q042 (2014): In 2014, according to the Act on Territorial Jurisdiction and Seats of Courts, there are 67 first instance courts but the Municipal Court in Novi Zagreb is not in function while the Municipal Criminal Court in Zagreb is a specialized court counted in Q42.2. Accordingly, there are 65 actually functioning first instance courts of a general jurisdiction.

Q043 (General Comment): No comment.

Q043 (2022): will be explained later

Q043 (2020): In Croatian Judicial system there is a higher instances of 3 specialized courts: commercial, administrative and other (misdemeanour).

Q043 (2019): One criminal and two misdemeanour courts. After the reorganization of courts in 2019 we do not have 22 misdemeanor courts. Only two courts specialized only for misdemeanor cases were left in two largest cities (Zagreb and Split). Third specialized court is court in Zagreb specialized only for criminal cases.

Q043 (2018): Other specialised 1st instance courts are Misdemeanour courts and Municipal Criminal Court in Zagreb.

Q043 (2017): 23 other specialised 1st instance courts are 22 Misdemeanour courts and 1 Municipal Criminal Court in Zagreb

Q043 (2016): According to the Act on the Jurisdiction and Seats of Courts (Official Gazette 128/14) as of 1 April 2015 the number of municipal courts has been reduced, as of 1 July 2015 reduced the number of misdemeanour courts has been reduced and as of 1 April 2015 a new commercial court has been established.
Other specialised 1st instance courts are 22 Misdemeanour courts and a Municipal Criminal Court in Zagreb.

Q044 (2020): The reorganisation of judicial map that started in 2015 in which the number of municipal and misdemeanour courts as well as the number of municipal state attorneys' offices has been reduced continued in 2019 with the merger of municipal and misdemeanour courts into municipal courts.
The reasons for the merger were a significant decrease in the number of misdemeanour cases and overburdened municipal courts with civil cases. In the new judicial map, instead of 46 municipal and misdemeanour courts, there are now 34 municipal courts - all misdemeanour and municipal courts were merged in the same cities except in 2 largest cities, Zagreb and Split, in which specialised municipal courts for misdemeanour cases were retained, and due to geographical specificities and size of certain municipal courts they were separated and new municipal courts were established (10). Also, a new commercial court was established in Dubrovnik. The aim of this new judicial map with new courts in the network and increased jurisdiction of permanent services is to increase the efficiency of the courts, improve access to court services, ensure even distribution of the workload of judges, shorten the length of court proceedings, reduce the number of unresolved cases in municipal courts, and ensure optimisation and easier management of human resources in courts.

Q044 (2018): The reorganisation of judicial map that started in 2015 in which the number of municipal and misdemeanour courts as well as the number of municipal state attorneys' offices has been reduced continued in 2019 with the merger of municipal and misdemeanour courts into municipal courts.
The reasons for the merger were a significant decrease in the number of misdemeanour cases and overburdened municipal courts with civil cases. In the new judicial map, instead of 46 municipal and misdemeanour courts, there are now 34 municipal courts - all misdemeanour and municipal courts were merged in the same cities except in 2 largest cities, Zagreb and Split, in which specialised municipal courts for misdemeanour cases were retained, and due to geographical specificities and size of certain municipal courts they were separated and new municipal courts were established (10). Also, a new commercial court was established in Dubrovnik. The aim of this new judicial map with new courts in the network and increased jurisdiction of permanent services is to increase the efficiency of the courts, improve access to court services, ensure even distribution of the workload of judges, shorten the length of court proceedings, reduce the number of unresolved cases in municipal courts, and ensure optimisation and easier management of human resources in courts.

Q044 (2016): There is a new judicial reform in plan in which the misdemeanour courts will be merged with municipal courts (both 1st instance courts).

Q044 (2014): According to the new Act on Territories and Seats of Courts (Official Gazette 128/14), that entered into force on the 1st of April 2015, a further rationalization of the network of municipal (from 67 to 24) and misdemeanour courts (from 63 to 22) and the establishment of an additional commercial court (8 instead of 7) are to be carried out from 1st of April and 1st of July.
As well, the new Act introduces changes regarding the territorial jurisdiction with regard to dealing with appeals. In criminal cases, any county court can decide on appeals lodged against judgments, while only few county courts may decide on appeals in land, labor and family matters.

Cyprus

Q042 (2023): An appeal Court and a Supreme Constitutional Court were established.

Q042 (2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.

Q042 (2017): x

Q042 (2014): The number of courts changed in 2014. Instead one labour court in the district of Nicosia, there are 3 separate courts in different districts. This applies as well as for rent and tenancies court. One more family court was also established. The Assize court deals with serious criminal offences only.

Q043 (General Comment): "Other" first instance specialised court: the Administrative court for international protection.

Q043 (2024): Administrative Court of International Protection.
As of the 1st of July the Supreme court and the Supreme Constitutional court were established. the supreme court acts as the third and final instance in criminal and civil cases, whereas the supreme constitutional court acts as the third and final instance in Administrative Cases.

Q043 (2023): As of 1s of July 2023 a Supreme Constitutional Court and an Appeal Court were established.
The Supreme Constitutional Court has jurisdiction for the review of constitutionality of laws, but it also acts as the supreme administrative court. The Supreme Court decides, at third and last instance on civil or criminal cases on points of law.
The Court of Appeal will hear civil, criminal and revisional (administrative law) appeals.

Q043 (2022): Administrative Court for International Protection

Q043 (2021): other specialised courts are the Assize courts and the Administrative Court of International Protection.
In 2021 a law was enacted (law 55/21) providing for the establishment of a juvenile court in each district of the Republic.
Family, Labour and rent control courts have been established in one more district.

Q043 (2020): 5 Assize courts
1 Administrative court for international Protection
Q043 (2019): Other specialised 1st instance courts: 1 International Protection Administrative Court and 5 Assize Court. In 2019 the new administrative court for international protection was established to hear cases concerning asylum applications and international protection matters.
Q043 (2018): 5 Assize courts

Q043 (2017): Assize Courts

Q043 (2016): Assize Courts

Q043 (2015): In 2015, two new Assize courts and one administrative court were established and one Rent Control Tribunal was removed.
Q044 (2018): In 2019 a New administrative court of international protection has been established that will deal with asylum cases.
Q044 (2016): Bills are being drafted for the creation of a commercial court and a first instance asylum administrative court.

Q044 (2014): In the frame of the 2014 exercise, it has been pointed out that an Administrative court has been established in Cyprus and started functioning on the 7th of January 2016.

Czech Republic

Q042 (2024): 2. Supreme Administrative Court

Q042 (2023): 2. Supreme Administrative Court

Q042 (2022): 2. Supreme Administrative Court

Q042 (2021): 2. Supreme Administrative Court

Q042 (2020): 2. Supreme Administrative Court

Q042 (2017): There are no specialised first instance courts, but judges within individual courts are specialised (e.g. for family, labour and enforcement cases at district courts, and insolvency and administrative cases at regional courts as first instance courts).
Q042 (2016): There are no specialised first instance courts, but judges within individual courts are specialised (e.g. for family, labour and enforcement cases at district courts, and insolvency and administrative cases at regional courts as first instance courts).
Q043 (General Comment): There are no specialised first instance courts, but judges within individual courts are specialised (e.g. for family, labour and enforcement cases at district courts, and insolvency and administrative cases at regional courts as first instance courts).
Q044 (2024): 6 regional courts and 3 district courts have their branches in other cities.

Q044 (2023): 6 regional courts and 3 district courts have their branches in other cities.

Q044 (2022): 6 regional courts and 3 district courts have their branches in other cities.

Q044 (2021): 6 regional courts and 3 district courts have their branches in other cities.

Q044 (2020): 6 regional courts and 3 district courts have their branches in other cities.

Denmark

Q042 (General Comment): District courts are called 1st instance courts, the Land Registration court and the Maritime and Commercial Court are considered as first instance specialized courts. Second and third instance courts are the two High Courts and the Supreme Court.
Q042 (2024): The specialised courts include the Land Registration Court and the Maritime and Commercial Court.

Q042 (2023): The specialised courts include the Land Registration Court and the Maritime and Commercial Court.

Q042 (2021): Under "2" is Land Registration Court and Maritime and Commercial Court. In 4 is beside the 24 district courts 4 biting court houses.
Q042 (2019): Commercial and naval court
Land Registration court.
Q042 (2018): Data has not changed on this point.

Q042 (2017): District courts are called 1st instance courts, the Land Registration court and the Maritime and Commercial Court are considered as first instance specialized courts. Second and third instance courts are the two High Courts and the Supreme Court.
Q043 (General Comment): Re "Juvenile Courts" such courts do not exists. Juveniles are dealt with by district courts as any other case. There are taken special care though of juveniles in a Juvenile Board. The category “other” concerns the Land Registration Court that has been established in 2009. Family courts are administered as part of District courts. There is one military court but military courts are not part of the Danish Courts Administration.
There are only two specialised courts - the reason for checking out three specialised courts in this category is because the Commercial Court in Denmark, it is called Maritime and Commercial Court and it presents the peculiarity to also deal, to a great extent but not exclusively, with insolvency cases (bankruptcies etc.). Therefore it's the same court that specialises in both commercial court and insolvency.

Q043 (2024): The 'other' specialised court is The Land Registration Court.

Q043 (2023): The 'other' specialised court is The Land Registration Court.

Q043 (2022): Land Registration Court (see also general comments). The other specialized court is Maritime and Commercial Court. The latter do some degree deals with insolvency cases similar to district courts.
Q043 (2021): "Other specialised courts" is The Land Registration Court.

Q043 (2020): Land Registration Court (see also general comments). The other specialized court is Maritime and Commercial Court. The latter do some degree deals with insolvency cases similar to district courts.
Q043 (2019): Other specialised 1st instance court is the Land Registration Court. The Maritime and Commercial Court is a commercial court which ALSO deals with insolvency cases. Although it looks like there are two courts there is only one! As the district courts outside Greater Copenhagen deal with insolvency cases, and the Maritime and Commercial Court deals with insolvency cases inside Greater Copenhagen, but at the same time is a specialized commercial court, the Maritime and Commercial Court is marked as a specialized Commercial Court and insolvency court.

Q043 (2018): Military courts exist but they are not part of the Danish Courts Administration. The 24 district courts have always dealt with family cases. From 1 April 2019 family issues are a section of the court.
Q043 (2017): The category “other” concerns the Land Registration Court that has been established in 2009. As for the Commercial Court, in Denmark, it is called Maritime and Commercial Court and it presents the peculiarity to also deal, to a great extent but not exclusively, with insolvency cases (bankruptcies etc.). Accordingly, there is an overlap with the category “Insolvency courts”. Of course Military courts exist but they are not part of the Danish Courts Administration.

Q043 (2016): Land Registration Court.

Q044 (2024): Included in the 26 courts are the 24 districs courts as well as the Maritime and Commercial Court and the Land Registration Court. Inlcuded in the 29 courts are the two high courts and the Supreme Court.
Q044 (2023): Included in the 26 courts are the 24 districs courts as well as the Maritime and Commercial Court and the Land Registration Court. Inlcuded in the 29 courts are the two high courts and the Supreme Court.
Q044 (2022): Included in first instance courts are district courts, Land Registration Court and the Maritime and Commercial Court.
Q044 (2021): The 26 are all the 24 district courts plus the Maritime and Commercial Court and Land Registration Court. In the figure 29 is the two high courts and the Supreme Court included.
Q044 (2020): Included in first instance courts are district courts, Land Registration Court and the Maritime and Commercial Court.

Estonia

Q042 (General Comment): Estonia has 17 courthouses of county courts (first instance courts), 4 courthouses of administrative courts (first instance courts), 2 courthouses of appellate courts (second instance courts) and 1 courthouse of the Supreme Court (highest instance court), all together 24 courthouses. However, as some of the courts are situated in the same house (e.g Tallinn Administrative Court and Tallinn Circuit Court) and taking into account the fact that Pärnu County Court has a courthouse that is divided between two locations, there are 20 actual geographical locations of Estonian courts.

Q042 (2019): A small courthouse was adjoined with another small courthouse. The distance between them was less than 50 km.
Q042 (2016): A small courthouse was adjoined with another small courthouse. The distance between them was less than 50 km.

Q043 (General Comment): In Estonia, there are no specialized first instance courts, other than administrative courts. All the cases are dealt with by ordinary courts of first instance. The two administrative courts of first instance are situated in Tallinn and Tartu. Nevertheless, for guaranteeing wider access to justice, these two courts have several court buildings in other cities, namely in Pärnu and Jõhvi, where judges and their supporting legal staff work.

Q044 (General Comment): Estonia has 17 courthouses of county courts (first instance courts), 4 courthouses of administrative courts (first instance courts), 2 courthouses of appellate courts (second instance courts) and 1 courthouse of the Supreme Court (highest instance court), all together 24 courthouses. However, as some of the courts are situated in the same house (e.g Tallinn Administrative Court and Tallinn Circuit Court) and taking into account the fact that Pärnu County Court has a courthouse that is divided between two locations, there are 20 actual geographical locations of Estonian courts.

Q044 (2020): Tartu county court closed one courthouse, so now there's 20 geographic locations.

Q044 (2014): In the end of 2015 the Council for Administration of Courts devised the merger of two courthouses in Estonia that are situated very close to each other (20 km). Both houses will remain open but will have joint territorial jurisdiction and administration.

Finland

Q042 (General Comment): In Finland, there are 20 district courts with 36 offices, five courts of appeal, the Supreme Court, six administrative courts, the Supreme Administrative Court, the Market Court, the Labour Court and the Insurance Court. One of the administrative courts, the Labour Court and the Market Court are located in the same location. In total there are 36 courts in 52 geographic locations.

Q042 (2021): The number of district courts was reduced at the re-structuring on 1.1.2019

Q042 (2020): The number of district courts was reduced at the re-structuring on 1.1.2019.

Q042 (2019): The Court Network has been modified.

Q042 (2016): Some geographic locations of the District Courts have been shut down.

Q042 (2014): In 2014, in Finland there are 81 courts as geographic locations, namely 27 District Courts, 13 Branch offices of District Courts, 25 Auxiliary courtrooms of District Courts (23 till 2014), 3 specialized courts, 6 Administrative Courts (8 till 2014), 5 Courts of Appeal (6 till 2014), the Supreme Court and the Supreme Administrative Court.

Q043 (General Comment): In Finland, there are six regional administrative courts, the Market Court, the Labour Court and the Insurance Court.
Another specialised court is the High Court of Impeachment that hears charges against ministers (i.e. members of the Government), the Chancellor of Justice, the Parliamentary Ombudsman and members of the Supreme Court or the Supreme Administrative Court for unlawful conduct in office. In addition, the High Court of Impeachment deals with charges concerning the criminal liability of the President of the Republic. However, it is convened only when necessary.

Q043 (2016): In Finland there are 6 Administrative Courts, 1 Market Court, 1 Labour Court and 1 Insurance Court. Then there is the High Court of Impeachment that hears charges against Ministers (i.e.Members of the State Council), Chancellor of Justice, Parliamentary Ombudsman and Supreme Court Justices for unlawful conduct in office but it is convened only when necessary.

Q044 (2018): As of 1 January 2019, the district courts will be centralised by decreasing the number of the courts from 27 to 20. A court can have more than one office. The number of the district courts' offices will be reduced from 57 to 36 offices.
As of 1 September 2019, undisputed civil cases (for example debt collection, unpaid rents, other small debts and eviction cases) which are handled and decided in summary proceedings will be centralised from all 20 district courts to nine district courts.

Q044 (2016): In Finland is ongoing structural reform of the District Courts in which the number of the courts will be decreaced from 27 to 20. The main target is to merge smaller courts in to bigger units that would be more efficient and profitable and also maintain high quality. At the same time the geographichal locations of the District Courts will be decrased from 57 to 36. This means that in addition to the 7 administrational offices that will be shut down, 5 side offices and 13 separate locations for hearing will be closed. Instead the use of video conference, electronic services and other IT-solutions would be increased. Deadline for the new project is 31.12.2018 so that the reform would be in force in the beginning of the year 2019. The government's proposal has been given at January 2017. The handling of the proposal in the parliament is unfinished.

Q044 (2014): According to 2014 data, for the foreseeable future the next reform is the developing of the structure of the District Court network. The foreseen change is a reduction of the number of District Courts.

France

Q042 (2024): First instance courts of general jurisdiction = 164 district courts (tribunaux judiciaires) + 4 courts of first instance. Police courts (167), criminal courts (168), and assize courts (104) are not counted as separate legal entities.
Second instance courts of general jurisdiction = 36 courts of appeal + 1 Superior Court of Appeal of Saint-Pierre-et-Miquelon. Assize courts of appeal are not counted as separate legal entities (104).

Q042 (2021): 1.1 : 164 TJ + 4 TPI
1.2 : 30 Courts of appeal in mainland France + 6 Courts of appeal in overseas France + 1 Superior Court of Appeal in Saint Pierre and Miquelon = 37
1.3: the Court of Cassation
Source DSJ

Q042 (2020):
There are 168 first instance courts of general jurisdiction, 37 second instance courts of general jurisdiction, and 1 highest instance court of general jurisdiction in the French judicial system.

Q042 (2019): See the comment on specialised first instance courts in the frame of Q43.

Q042 (2018): With regard to the ordinary courts, the number indicated in the 2016 questionnaire includes the local courts that have been abolished since 1 July 2017 (Act No. 2011-1862 of 13 December 2011), their powers having been taken over by the courts of first instance in civil matters and by the police courts attached to the courts of first instance in criminal matters.
The number of 786 corresponded to: 164 TGI + 4 TPI + 307 TI + 311 jprox Since then, TIs have been removed from the category of ordinary courts of first instance since they constitute specialised courts of first instance. The number of 479 ordinary courts of first instance therefore corresponded to 164 TGI + 4 TPI + 311 TPROX. The figure of 168 is thus explained by the abolition of the 311 local courts since 1 July 2017, as indicated in the comments in the questionnaire.
Thus: 479 - 311 = 168 ordinary courts of first instance (164 TGI + 4 TPI).

Q043 (General Comment): With regard to the Enforcement of criminal sanctions courts: in matters of enforcement of sentences, the enforcement judge (JAP) is a court of first instance for the enforcement of sentences, being at the same time a decision-making, control and monitoring body. There is at least one JAP per department (article 712-2 of the CPP). The JAP is competent for adult convicts, and his/her field of intervention is the following: for measures to individualize custodial sentences, he or she has general jurisdiction (except for a few measures that fall under the special jurisdiction of the Court for the enforcement of sentences); for custodial sentences, when a specific text so provides; for the follow-up of security measures.
Established by the law of March 9, 2004, the Court for the enforcement of sentences (TAP) is a court of first instance, composed of three JAPs of first instance courts, appointed by order of the First President of the Appelate Court. In each Appelate Court, a TAP is established whose territorial jurisdiction extends to the jurisdiction of this court (articles 712-3 and D 49-2 of the CPP, article indicating the list of TAPs by Appelate court and the territorial jurisdiction). The seat of the TAP is in principle "that of the first instance court of the seat of the Appelate Court" (article D. 49-3 CPP).
The objective is to entrust the most complex and sensitive cases to a collegiality. Thus, the TAP has jurisdiction over: 1) by the effect of the law for those sentenced to the heaviest penalties: applications for parole and suspension of "medical" sentences for persons sentenced to imprisonment of more than 10 years and whose remaining sentence to be served exceeds 3 years; applications for an increase in the security period; placement under judicial supervision of dangerous persons...); 2) by decision of the JAP, in particular due to the complexity of the case or the personality of the convicted person (article 712-6 al 3 of the CPP), this referral to the collegiality may be made ex officio or at the request of the convicted person or the public prosecutor.
In terrorism matters, there is a derogation from ordinary law (articles 706-22-1 and D 49-75 to D49-81-5 of the Criminal Procedure Code). The Paris sentence enforcement courts specialising in terrorist matters (JAPAT, TAPAT and the sentence enforcement chamber) have: exclusive jurisdiction to monitor persons convicted by specialised terrorism courts pursuant to article 706-17 of the Criminal Procedure Code; concurrent jurisdiction with ordinary courts for the enforcement of sentences to monitor persons convicted of acts of terrorism and other offences falling within the scope of article 706-16 of the Criminal Procedure Code by ordinary courts.
source DACG.

Q043 (2024): Administrative justice (ordre administrative):
40 = 38 administrative courts (first instance) + 1 National Court of Asylum + 1 Commission for Parking Disputes; 10 = Council of State + 9 administrative courts of appeal.
Civil and criminal justice (ordre judiciaire):
Commercial courts = 134 commercial courts + 9 mixed commercial courts + 7 district courts with commercial competence.
Other specialised courts:
Courts of first instance: 1 court for paid parking disputes (Article R. 2133-120-20 of the General Code of Local Authorities), 1 court for navigation on the Rhine (Article L. 4261-2 of the Transport Code, Article D. 215-2 of the Judicial Organization Code), 1 court for navigation on the Moselle (Article L. 4262-2 of the Transport Code, Article D. 215-2 of the Judicial Organization Code), 7 enforcement courts (Article L. 218-8 of the Judicial Organization Code), 6 maritime courts (Decree No. 2015-261 of March 5, 2015 / Decree No. 2014-1581 of December 23, 2014); not counted as separate legal entities are the 11 land registry offices (Article D. 215-3 of the Code of Judicial Organization, Appendix Table XIII of the Code of Judicial Organization), and the 102 departmental criminal courts (Article 380-17 of the Code of Criminal Procedure).

Compared to previous years, rural courts have been moved from the “other” category to the “Rent and tenancies courts” category.

Higher instance courts: 1 appeal court for navigation on the Rhine (Article L. 313-1 of the COJ), 1 appeal court for navigation on the Moselle (Article L. 313-2 of the Code of Judicial Organization); for 2024, the National Court of Asylum (Article L. 131-1 of the CESEDA, counted among the administrative courts) is counted among the administrative courts.

Q043 (2023): 272 courts for rural leases + 1 court for navigation on the Rhine + 1 court of first instance for navigation on the Moselle + 6 maritime courts + 1 National court of asylum + 1 Court for disputes relating to paid parking.
Administrative courts: 38 administrative courts (first instance). There has been no reduction in the number of courts of first instance. Until now, we indicated 43 courts of first instance. This figure included:
- the National court of asylum
- the Court for disputes relating to paid parking
- 3 courts for the administrative courts of Guadeloupe, Saint-Martin and Saint-Barthelemy
- 2 courts for the administrative courts of Reunion and Mayotte - 2 courts for the administrative courts of New Caledonia and Wallis and Futuna
- but only one court for the administrative courts of Martinique and Saint-Pierre-et-Miquelon.

However, the following form a single legal entity (same head of court, same judges, same registry and same financial management):
- the administrative court of Guadeloupe, Saint-Martin and Saint-Barthelemy
- the administrative court of New Caledonia and Wallis and Futuna
- the administrative court of Martinique and Saint-Pierre-et-Miquelon.

On the other hand, although the administrative courts of Réunion and Mayotte have the same head of court and the same judges, they have separate registries and separate financial management: in our view, they therefore form two legal entities.
10 higher instances in administrative matters: Council of State + 9 administrative courts of appeal

Q043 (2022): 272 TPBR (tribunaux paritaires des baux ruraux), along with 1 Court for navigation on the Rhine, 1 Court for navigation on the Moselle, 6 maritime courts, the National court of Asylum and the Commission of litigation regarding paid parking.
Q043 (2021): Labour courts: 211 CPH (conseils de prud’hommes) + 5 labour courts = 216 courts. The CPH have jurisdiction, according to Article L. 1411-1 of the Labour Code, to hear individual disputes between employees or apprentices and their employers arising from the execution of an employment or apprenticeship contract. Commercial courts: 134 TCs, 9 TMCs, 2 TPIs with commercial jurisdiction, 7 TJs with commercial jurisdiction = 152 courts. Commercial courts are specialised courts with jurisdiction to hear disputes relating to commitments between traders, between credit institutions or between them, disputes relating to commercial companies and commercial acts by their form (Art. L. 721-1 et seq. of the Commercial Code). There are 134 commercial courts whose judges are exclusively “juges consulaires”. With regard to the judicial organisation in overseas France, there are 2 First instance courts with jurisdiction in commercial matters and 9 mixed commercial courts. In addition, 7 judicial courts have a commercial chamber in Alsace-Moselle. Concerning juvenile courts: 156 according to the key figures of Justice 2021 and 155 according to the judicial atlas of 2021.
“Other specialised courts”: the parity courts for rural leases (TPBR): 272 (according to the key figures for Justice 2021); the court for navigation on the Rhine (L 215-4 al.1 COJ) ; the court of first instance for navigation on the Moselle (L 215-4 al.2 COJ); 6 maritime courts (Bordeaux, Brest, Cayenne, Le Havre, Marseille Saint-Denis); the National court of asylum. Source DSJ and Council of State

Q043 (2020): Despite the provisional NA answer for the category " Courts for the execution of criminal sanctions ", the total is available, as it is a small number that will not significantly affect the total. On labor courts: 210 CPHs + 6 labor courts = 216 courts Industrial tribunals have jurisdiction, according to Article L. 1411-1 of the Labor Code, to hear individual disputes that arise between employees or apprentices and their employers during the execution of an employment or apprenticeship contract. There are 210 industrial tribunals and 6 labor courts in the French overseas territories. Same figure as in 2020
On commercial courts: 134 TCs, 9 TMCs, 2 TPIs with commercial jurisdiction, 7 TJs with commercial jurisdiction = 152 courts Commercial courts are specialized courts with jurisdiction to hear disputes relating to commitments between traders, between credit institutions or between them, disputes relating to commercial companies and commercial acts by their form (Art. L. 721-1 et seq. of the Commercial Code) On social jurisdictions:
-Since November 1, 2019, litigation concerning military disability pensions has been transferred to the jurisdiction of the administrative courts, doing away with the military disability pension courts and the regional military disability pension courts that rule on appeal.
- Since January 1, 2019, as a result of Law No. 2016-1547 of November 18, 2016 on the modernization of justice in the 21st century, social litigation, formerly divided between the social security courts (TASS), the courts of disability litigation (TCI) and the departmental social assistance commissions (CDAS), was merged and transferred to the "tribunaux de grande instance", ordinary courts of first instance, which became, as of January 1, 2020, by effect of law n° 2019-222 of March 23, 2019 on programming 2018-2022 and reform for the justice system, Judicial Courts. Consequently, these specialized jurisdictions have been abolished. On appeal, the litigation was only under the jurisdiction of the CNITAAT (extended until December 31, 2022; but now it is under the jurisdiction of specially designated courts of appeal, which allows for better accessibility to justice. There are 134 commercial courts whose judges are exclusively consular. With regard to the judicial organization in overseas France, there are 2 courts of first instance with jurisdiction in commercial matters and 9 mixed commercial courts. In addition, 7 judicial courts have a commercial chamber in Alsace-Moselle. In 2020 it was written 143 commercial courts because I think that only the TC and TMC were counted and not the TJ with commercial jurisdiction nor the TPI with commercial jurisdiction. About the other specialized courts :
The tribunaux paritaires des baux ruraux (TPBR) are autonomous (L. 491-1 of the Code rural et de la pêche maritime). The 2018-2022 programming and reform law for justice sets the seats and jurisdictions of the TPBRs no longer with reference to the seats of the former magistrate's courts but according to the seats of the judicial courts and their proximity chamber. On social jurisdictions:
-Since November 1, 2019, the litigation of military disability pensions has been transferred to the jurisdiction of the administrative courts, making the military disability pension courts and the regional military disability pension courts, which rule on appeal, disappear.
- Since January 1, 2019, as a result of law no. 2016-1547 of November 18, 2016 on the modernization of justice in the 21st century, social litigation, which was previously divided between the s

ocial security courts (TASS), the disability litigation courts (TCI) and the departmental social assistance commissions (CDAS), was merged and transferred to the "tribunaux de grande instance", courts of first instance under ordinary law, which became, as of January 1, 2020, the "Tribunaux Judiciaires" (Judicial Courts) under Law No. 2019-222 of March 23, 2019, on programming for 2018-2022 and reform of the justice system. Consequently, these specialized jurisdictions have been abolished. On appeal, the litigation was only under the jurisdiction of the CNITAAT (extended until December 31, 2022; but now it is under the jurisdiction of the specially designated courts of appeal, numbering 26 which allows better accessibility to justice. On military jurisdictions: -In peacetime: ordinary judicial jurisdictions
In times of war: territorial courts of the armed forces: exceptional jurisdictions:
-bankruptcy courts: depending on the nature of the litigants -Bankruptcy courts: depending on the nature of the litigants, either under the jurisdiction of the Judicial Court, the Commercial Court or the TPBR, - Family courts: the family court judges who work within the TJs are competent in this matter
-Rental/lease courts: depending on the nature of the lease, jurisdiction between TJ, TCommerce, TPBR
-Courts for the execution of penal sanctions: this is a dispute falling within the competence of the Judges and Courts for the application of penalties
-Courts dealing with terrorism: this is a specialization of the TJ, CA and JAP Paris
-Courts dealing with Internet litigation: nonexistent
So NAP in each of the boxes relating to these courts.
There are no specialized second instance Court for commercial or labor law. They are chambers within the CAs that will manage this litigation. Thus NAP Source Direction des services judiciaires
With regard to the category ""other specialized courts"": joint courts for rural leases: 275, including that of St Pierre et Miquelon;
court for navigation on the Rhine: 1 ;
maritime courts: 6; national court of asylum: 1;
Specialized courts include the CNDA (National Asylum Court) and the CCSP (Commission du contentieux du stationnement payant). Commentary on other specialized courts: the discrepancy can be explained on the one hand by the merger of the TI and TGI, which led to the disappearance of the TASS and TPBR. On the other hand, the TPEs were previously counted in the category of other specialized courts; they are now the subject of a separate question and are thus removed from the "other" field. With regard to courts for the enforcement of criminal sanctions: In matters of enforcement of sentences, the enforcement judge (JAP) is a first-level enforcement court that is at the same time a decision-making, control and monitoring body. There is at least one JAP per department (article 712-2 of the CPP). The JAP is competent for adult convicts, and his field of intervention is the following: For measures to individualize custodial sentences, he or she has general jurisdiction (except for a few measures that fall under the special jurisdiction of the court for the enforcement of sentences), For custodial sentences, when a specific text so provides,
For the follow-up of security measures. Established by the law of March 9, 2004, the Court for the Enforcement of Sentences (TAP) is a court of first instance, composed of three JAPs of the judicial courts, appointed by order of the First President of the second instance Court. In each second instance Court, a TAP is established whose territorial jurisdiction extends to the

Q043 (2019): Since 1 January 2019, social litigation, formerly divided between the social security courts (TASS), the incapacity courts (TCI) and the departmental social assistance commissions (CDAS), has been merged and transferred to the “tribunaux de grande instance” (first instance courts of general jurisdiction). As a result, these specialised courts have been abolished. As of 1 November 2019, litigation concerning military invalidity pensions will be transferred to the administrative courts, eliminating the military invalidity pension courts and the regional military invalidity pension courts which rule on appeal. These changes explain the variation in the number of courts compared to the previous year. The other specialised courts are: - joint courts for rural leases: 274; juvenile courts: 155; court for navigation on the Rhine: 1; maritime courts: 6; national asylum court: 1; court of first instance for navigation on the Moselle: 1.

Q043 (2018): The other specialized courts are: - joint courts for rural leases: 272 ;
- juvenile courts: 155; - military pension courts: 36;
- court for navigation on the Rhine: 1;
- Maritime courts: 6;
- national court of asylum: 1; - court of first instance for navigation on the Moselle: 1.
In the previous questionnaire, the Joint Rural Lease Courts (JRTs) were indicated, with the District Courts (TIs) within the "Rental Courts", the figure of 307 corresponding to the District Courts, since the seats and jurisdictions of the JRTs were linked to those of the TI. However, the TPBRs are, and have always been, autonomous courts. However, as decrees have been issued to remove some TPBRs, there is no longer a correlation between their number and that of IT. We have therefore indicated here in the "rental courts", only IT (289), and by including TPBRs in a separate item, which is legally more accurate. The total number of TPBRs is 274. On the insurance and social security courts: in the requested reference year, there are 26 disability courts, 115 social security courts (TASS) and 100 departmental social assistance commissions (CDAS). The differential of 100 corresponds to the addition of the 100 CDASs which are administrative courts.
The Paris Court, created on 14 May 2018, brought together all the services of the Regional Court, formerly dispersed over 5 sites, including Ile de la Cité, the Police Court and the 20 District Courts. The number of TIs had to be reduced by 19. In addition, the reform of the transfer of the police court under the 21st century Justice Act had the effect of removing 3 of them from the 307 TIs. The number of IT has therefore increased from 304 (307-3) to 285 district courts (304-19). We have added to these 285 TI the 4 TPIs because of their dual IT and TGI skills. Thus: 285 TI + 4 TPI = 289 TI in total.

Q043 (2017): The other specialized courts are:
- juvenile courts 155
- military pensions tribunals 36
- the court for navigation on the Rhine 1
- the court for navigation on the Moselle 1
- maritime trade courts 6
- national court of asylum 1

Q043 (2016): The other specialised courts are: 155 juvenile courts; 36 military pension courts; 1 court for navigation on the Rhine; 1 court for navigation on the Moselle; 6 maritime trade courts; 1 national asylum court.
As a matter of fact, the following reforms are on-going:
- The future Tribunal of Paris, whose establishment is scheduled for 14 May 2018, will unify all the services of the TGI (Tribunal de grande instance) currently dispersed over 5 sites, including “Ile de la Cité”, the police court and the first instance courts (tribunaux d’instance);
- Since 1 July 2017, the hearings of the Police Court, previously under the jurisdiction of the “tribunaux d’instance”, have been transferred to the TGI. The aim of this reform is to refocus the tribunaux d’instance on day-to-day civil justice and to centralise criminal litigation at the seat of the TGI.
- Since 1 July 2017, the 311 local courts have been abolished (Law No. 2011-1862 of 13 December 2011), their powers being taken over by the tribuanux d’instance in civil matters and by the police courts attached to the TGI in criminal matters.
- As of 1 January 2019, social litigation, currently divided between the Social Security Courts (TASS), the Disability Dispute Courts (TCI) and the Departmental Social Assistance Commissions (CDAS), will be unified and transferred to the TGI (first instance courts of general jurisdiction). These specialised courts will then be abolished.

Q043 (2015): Other specialised courts are:
Juvenile courts : 155
Military Pensions Courts: 36
Court for navigation on the Rhine: 1
Maritime Courts: 14
National Court of Asylum: 1
Court of First Instance for navigation on the Moselle: 1

Q043 (2014): The reduction of the number of specialised courts is primarily due to the suppression of 70 military pensions courts. The other specialised courts are: Children courts (155); Military pensions courts (36); the Rhine navigation court; commercial maritime courts (14); the National court for asylum right; the Court for the navigation on the Moselle. In contrast with 2010 and 2012 data, a part of the "other specialised courts" was distributed in the proposed categories, namely the agricultural land courts, the courts of rental cases, the Courts for enforcement of criminal sanctions and the courts of incapability litigation.The specialised interregional courts, competent to judge cases of organised crime were added.

Q044 (2024): The figures shown in the table relate to both, administrative courts and civil and criminal courts. For administrative courts:
54 courts of first instance - geographical locations
63 all courts - geographical locations Some courts of first instance have several premises where hearings are held:
- Administrative court of Guadeloupe, Saint Martin, and Saint Barthélemy: administrative court building in Guadeloupe, local court in Marigot (Saint Martin), and the converted Public Treasury room in Gustavia (Saint Barthélemy): 3
- Administrative court of Martinique and Saint-Pierre-et-Miquelon: court building in Martinique and the judicial court of Saint-Pierre-et-Miquelon: 2
- Administrative court of New Caledonia and Wallis and Futuna: court building in New Caledonia and court of first instance in Mata-Utu (Wallis and Futuna): 2
- National Court of Asylum: National Court of Asylum building, Administrative Court of Réunion, Administrative Court of Mayotte, Administrative Court of Martinique, Administrative Court of Guadeloupe, and Administrative Court of French Guiana (6).
When hearings are not held at the National Court of Asylum, mobile hearings or video hearings are held.
In addition, pursuant to Article 70 of Law No. 2024-42 of January 26, 2024, on immigration control and improved integration, five regional chambers of the National Court of Asylum were created on September 1, 2024, in Bordeaux, Lyon (two chambers: one geographical location), Nancy, and Toulouse.

Q044 (2023): This was not taken into account in the data provided in previous years, but some administrative courts of first instance have several premises where hearings are held:
- administrative court of Guadeloupe, Saint-Martin and Saint-Barthelemy: building of the administrative court in Guadeloupe, the local court in Marigot (Saint-Martin) and the room at the Treasury in Gustavia (Saint-Barthelemy): 3
- Martinique and Saint-Pierre-et-Miquelon administrative court: court building in Martinique and the Saint-Pierre-et-Miquelon judicial court: 2
- administrative court of New Caledonia and Wallis and Futuna: court building in New Caledonia and court of first instance in Mata-Utu (Wallis and Futuna): 2
- National court of asylum: National court of asylum building, Lyon administrative court of appeal, Nancy administrative court of appeal, Reunion administrative court, Mayotte administrative court, Martinique administrative court, Guadeloupe administrative court and French Guyana administrative court (8). When hearings are not held at the National court of asylum, mobile hearings or video hearings are held.

Q044 (2022): The data encompass both judicial orders: "ordre judiciaire" and "ordre administrative": 1) administrative courts at first instance (including common law jurisdictions at first instance and specialized jurisdictions at first instance): 32 in mainland France / 11 overseas territories; 2) all administrative courts (this figure includes common law courts at first instance, specialized courts at first instance, all second-instance courts and appellate courts, as well as all Supreme Courts): 42 in mainland France / 11 overseas territories.

Q044 (2021): 661: this figure takes into account all courts of first instance, excluding Courts of appeal (CA). Sites hosting only a Court of appeal have therefore been excluded from this count. Sites hosting both a CA and a court of first instance have been counted only once (hence the difference of 44: 37 CAs occupying 44 sites), 43 of which are for the administrative order.
715: this figure takes into account all courts, whether on appeal or at first instance. When a court of first instance and a Court of appeal are located on the same site, they have been counted separately, including 53 for the administrative order.

Q044 (2020): "With regard to the judiciary, there are 576 courts of first instance - geographic locations. This figure takes into account, by number of sites, all the courts of first instance, excluding the second instance court. Sites hosting exclusively a second instance court have therefore been excluded from this count. Sites hosting both a CA and a trial court were counted only once. There were 619 Courts geographic locations counted. This figure takes into account, by number of sites, all the jurisdictions whether they are appeal or first instance. Moreover, when a first instance court and a second instance court are located on the same site, they have been counted twice (hence the difference of 43 with the previous question: 37 CA which occupy 43 sites).
As regards the administrative order, there are 42 first instance courts for the administrative order and 53 all courts for the administrative order. "

Q044 (2016): A reform could take place within the framework of the bill on Justice programming presented in 2018. If no court site should be closed, the organization could be modified, particularly at the level of the courts of appeal, whose map is very different from those of the current administrative regions. There could also be only one first instance court per department.

Q044 (2014): As of 1 September 2014, the high courts (TGI) were resettled in the towns of Saint-Gaudens, Saumur and Tulle. Moreover, seconded chambers (geographic locations) were created on the same date in Guingamp and Marmande and on 1 January 2015 in Millau. A draft law to modernise the justice provides that the litigation of social security affairs and disability will be brought together before the TGI. Small offences ruled before the District Court will be transferred to TGI; similarly, compensation for personal injury will be entirely the responsibility of the TGI.

Germany

Q042 (General Comment): Even though the German legal system generally knows three instances (first instance, appeal on questions of fact and law, appeal on questions of law only), the different kinds of courts do not correspond directly to the stages of appeal. Local courts (Amtsgerichte) are first instance courts with the regional courts (Landgerichte) as next stage of appeal (exceptions apply in family matters). However, regional courts do not only serve as second instance courts but also deal with first instance cases. Whether a case is initially dealt with at a local or regional court depends (among other things) on the value at dispute (civil cases) or on the kind of the suspected offence (criminal cases). Similarly the higher regional courts may serve as second instance courts (for cases that were initially dealt with at regional courts or for cases in family matters) and as highest instance courts for cases that were initiated at the local courts (especially in criminal cases). In some specific cases, higher regional courts may also be courts of first instance.
The constitutional courts of the federal states and the Federal Constitutional Court (Bundesverfassungsgericht) are not part of the stages of appeal. Constitutional jurisdiction is also seen as separate from general and specialised jurisdiction. Constitutional courts review legislation with regard to constitutional provisions. The Federal Constitutional Court mainly assess alleged violations of base rights by public authorities. However, in order to have access to the constitutional courts, the regular path of legal proceedings must generally be exhausted.

Q042 (2024): 1.1 First instance courts include: 637 local courts, 115 regional courts
1.2 Second instance courts include: 24 higher regional courts and the bavarian highest regional court
1.3 Highest instance courts include: Federal Supreme Court
2. The total number of specialised courts includes administrative, labour, financial, and social courts as well as the Federal Patent Court.

Q042 (2023): 1.1 First instance courts include: 637 local courts, 115 regional courts
1.2 Second instance courts include: 24 higher regional courts and the bavarian highest regional court
1.3 Highest instance courts include: Federal Supreme Court
2. The total number of specialised courts includes administrative, labour, financial, and social courts as well as the Federal Patent Court.

Q042 (2022): 1.1 First instance courts include: 638 local courts, 115 regional courts
regional courts handle first as well as second instance cases. In 2022, regional courts registered 300 266 incoming first instance cases and 68 876 incoming second instance cases (civil and criminal matters). For further information see General Comment.
1.2 Second instance courts include: 24 higher regional courts
higher regional courts handle second and third instance cases as well as certain (few) first instance cases. Higher regional courts are the third and final instance with regard to criminal cases, that were originally initiated at the local courts. In 2022, higher regional courts recorded 72 201 incoming second instance cases (excluding family matters) and 4 761 incoming third/last instance cases. For further information see General Comment.
1.3 Highest instance courts include: Federal Surpreme Court
2. The total number of specialised courts includes administrative, labour, financial, and social courts as well as the Federal Patent Court.
Discrepancy in comparison to the 2022-2020 cycle:
regional courts were originally counted twice as first instance and second instance courts. Higher regional courts were counted as second instance courts. This was changed during the 2023-2021 cycle (EU-Scoreboard). The regional courts and higher regional courts are now placed according to the number of incoming cases as outlined in the explanatory note.
In previous cycles, the total number of specialised courts included 16 constitutional courts of the federal states as well as the Federal Constitutional Court. In the current cycle, these courts are no longer included as they are mostly seen as seperate from the ordninary justice system (for further information please refer to the general comment).

Q042 (2021): 1.1 First instance courts include: 638 Local Courts, 115 Regional Courts
Regional Courts handle first as well as second instance cases. In 2021, Regional Courts registered 344 128 incoming first instance cases and 75 400 incoming second instance cases (civil and criminal matters). For further information see General Comment.
1.2 Second instance courts include: 24 Higher Regional Courts
Higher Regional Courts handle second and third instance cases as well as certain (few) first instance cases. Higher Regional Courts are the third and final instance with regard to criminal cases, that were originally initiated at the Local Courts. In 2021, Higher Regional Courts recorded 102 029 incoming second instance cases and 5 089 incoming third/last instance cases. For further information see General Comment.
1.3 Highest instance courts include: Federal Surpreme Court
The total number of specialised courts includes 16 Constitutional Courts of the Länder.

Q042 (2020): 1.1 First instance courts include: 638 Local Courts, 115 Regional Courts
1.2 Second instance courts include: 115 Regional Courts, 24 Higher Regional Courts
1.3 Highest instance courts include: 24 Higher Regional Courts, Federal Surpreme Court
The vertical consistency is not fulfilled, since the 115 Regional Courts appear as "First instance courts" (1.1) as well as "Second instance courts" (1.2) and 24 Higher Regional Courts appear as "Second Instance Courts"(1.2) as well as "Highest Instance Courts" (1.3).
For further information please consult the General Comment.
The total number of specialised courts includes 16 Constitutional Courts of the Länder.

Q043 (General Comment): It is noteworthy that depending on the value at dispute, commercial cases are dealt with at local or regional courts, on application in a chamber established at the regional court for commercial cases. There are no separate commercial courts. Likewise, there are no independent rent and tenancies courts, enforcement courts or courts for insurance cases. Depending on the caseload, special panels of judges are established for this purpose at the local and regional Courts. Family cases are dealt with at first instance in special departments of the local courts (second instance: higher regional courts). The Federal Armed Forces do not have any military courts of their own; its members are generally subject to civil jurisdiction.The federal military disciplinary courts are first instance courts of administrative jurisdiction for disciplinary proceedings against members of the armed forces. The second and highest instance court for isciplinary proceedings against members of the armed forces is the Federal Administrative Court.
Juvenile courts do not exist as independent courts either. They are established at the local courts or regional courts, depending on the severity of the expected sentence and the type of offence. The juvenile courts may be composed of a single criminal judge sitting as youth judge or one or more judges together with lay youth assessors.

Q043 (2024): The category "administrative courts - first instance" inculdes 2 federal military disciplinary courts.
The category “other” covers:
18 finance courts (first instance)
Federal Patent Court and the Federal Finance Court (higher instances)

Q043 (2023): The category "administrative courts - first instance" inculdes 2 federal military disciplinary courts.
The category “other” covers:
18 finance courts (first instance)
Federal Patent Court and the Federal Finance Court (higher instances)

Q043 (2022): Comments - If “Other specialised courts”, please specify:
The category “other” covers:
18 finance courts (first instance)
Federal Patent Court and the Federal Finance Court (higher instances)
In previous cycles, other specialised courts included 16 constitutional courts of the federal states as well as the Federal Constitutional Court. In the current cycle, these courts are no longer included as they are mostly seen as seperate from the ordninary justice system (for further information please refer to the general comment).

Q043 (2021): The category “other” covers:
18 Finance Courts (first instance)
16 Constitutional Courts of the Länder, the Federal Constitutional Court, Federal Patent Court and the Federal Finance Court (higher instances)
With regard to the Constitutional Courts please see General Comment Q 42.

Q043 (2020): The category “other” covers:
18 Finance Courts (first instance)
16 Constitutional Courts of the Länder, the Federal Constitutional Court, Federal Patent Court, Federal Labour Court, Federal Administrative Court, Federal Social Court and the Federal Finance Court (higher instances)
With regard to the Constitutional Courts please see General Comment Q 42.

Q043 (2019): finance courts

Q043 (2018): Finance Courts

Q043 (2017): Finance courts

Q043 (2016): Other specialised 1st instance courts: Finance Courts

Q043 (2015): The data refer to the year 2014. At present, no more recent data are available.

Q043 (2014): In 2014, in comparison with 2012, the number of specialized first instance courts decreased of three labour courts in two Landers.

Q044 (General Comment): The figures in this section are taken from the statistic "Federal and State Courts" that does not distinguish between legal entities and geographic location of the courts. Generally, one legal entity equals one geographic location. Some courts have additional points of presence in other geographic locations. Since the exact number of geographic locations in comparison to legal entities is unknown, the figures from the statistic "Federal and State Courts" were used to answer this question as well.

Q044 (2018): The possibility of combining courts is being considered by individual Länder in order to reduce costs. The regional structures have proven effective.
On 5 November 2019, the Land Government of Schleswig-Holstein adopted a statutory instrument on the concentration of jurisdiction which combines existing concentrations of jurisdiction while adding further concentration provisions. The instrument will be promulgated at the end of the month.

Q044 (2016): The possibility of combining courts is being considered by individual Länder in order to reduce costs.

Greece

Q042 (2024): The consolidation of magistrates' and first instance courts resulted in the abolition of all magistrates'courts.The magistrates' court courthouses, which were located in the same places as the first instance courts have been closed down. Their facilities are now serving as additional installations for the relevant first instance courts.As regards the 50 magistrates' courts, these have been transformed into regional seats for the first instance courts, while the remaining have been closed. The basic principle of the new spatial restructuring of the courts is that each regional unit (former administrative "Prefecture") will have a central Court of First Instance, to which all the judges of this Prefecture (former Magistrates'' as well as First Instance Court Judges) will receive permanent positions. Exceptions are valid for border regions or island regions due to constitutional provisions (thus prefectures in Thrace, Northern Macedonia, Western Macedonia regions and Aegean islands, where the rule of one first instance court per administrative prefecture does not apply) .
The total number of the First Instance Courts in Greece before the adoption of Law 5108/2024 was 63. 56 of them are now First Instance Courts and 7 that are considered as "parallel" court seats to the (central) Courts - since there were previously some Prefectures where two or more First Instance Courts co-existed, providing full jurisdiction. Thus, delocalization and simplification of the first instance is achieved and, at the same time, better and more direct access to justice for citizens is provided. According to the new framework, lawyers and citizens can submit documents/claims either to the central or the regional/parallel courts (not independent judicial structures), since there is only one first Instance court in each administrative Prefecture, served by one or more premises.

Q042 (2020): In highest instance courts include the Supreme Court(Areios Pagos). In First instance courts of general jurisdiction are included in the number 259, 196 local and District Criminal Courts and 63 courts of first degree.

Q043 (General Comment): In Greece, there are no special courts for the fields of law described in the question 43, besides those already mentioned. The Greek Constitution is reluctant to provide in the Greek legal system special courts. Instead, within the Courts of First Instance and Courts of Appeal of large cities, we have special Chambers, where the task of adjudicating in special categories of law (e.g. family law, commercial law, etc.) is assigned. Judges entrusted with such duties have usually the correspondent specific studies. As far as other special courts are concerned, special provisions regulate the operation of courts for juveniles (specialized divisions within courts of general criminal jurisdiction), military, navy and air force courts.We clarify that the military,navy and air force courts are under the jurisdiction of the Ministry of National Defense. The Hellenic Court of Audit is a special administrative court. According to the Greek Constitution, administrative disputes are divided between the Council of State, the regular administrative courts, and the Court of Audit. The Court of Audit is staffed by graduates of the National School of Judicial Officers.

Q043 (2024): Court of Audit

Q043 (2023): The Court of Auditors is one of three supreme courts in Greece.

Q043 (2022): The Court of Auditors is one of three supreme courts in Greece.

Q043 (2021): There are no special courts for resolving Internet-related disputes.

Q043 (2020): Administrative courts include: in the first instance 30, in the second instance 9 and 1 Supreme Court(the Council of State).
Juvenile courts are subject to the Courts of First Instance, according to your instructions the choice changed from non-available to non applicable.
The military courts are under a different ministry, specifically the National Defense.
The higher instance other specialized courts is the Court of Auditors that is considered one of three supreme courts in Greece.

Q043 (2017): In Greece, there are no special courts for the fields of law described in the question 43, besides those already mentioned. The Greek Constitution is reluctant to provide in the Greek legal system special courts. Instead, within the Courts of First Instance and Courts of Appeal of large cities, we have special Chambers, where the task of adjudicating in special categories of law (e.g. family law, commercial law, etc.) is assigned. Judges entrusted with such duties have usually the correspondent specific studies. As far as other special courts are concerned, special provisions regulate the operation of courts for juveniles, military, navy and air force courts.

Q044 (2020): The total number of courts includes the Court of Auditors

Q044 (2014): According to 2014 data, the Law 1756/1988, article 2, as modified by the Law 4123/2013, provides for a reduction of the number of courts. Besides, the Law 1756/1988, article 4, as modified by the Law 4264/2014, provides for a change in the powers of courts.

Hungary

Q042 (General Comment): The Hungarian court system is as follows: Kúria (1) – the Hungarian Supreme Court - its jurisdiction in criminal, civil and administrative cases covers adjudication of extraordinary remedies and appeals, adopting uniformity decisions. It also decides if municipal decrees are in compliance with higher level legislation. Regional courts of appeal (5) – their jurisdiction in criminal and civil cases covers the adjudication of appeals received from the regional courts (third instance in criminal cases). Regional courts (20) – their jurisdiction in criminal, civil and administrative cases covers the adjudication of appeals received from district courts, administrative and labour courts, and procedure at first instance in certain criminal and civil cases. District courts (113) – their jurisdiction in criminal and civil cases covers the procedures at first instance. The number of judges in the largest district court is 357, whereas the smallest court operates with one judge. Out of the 113 district courts, the district courts in the seat of the regional courts have special competences in many cases.

Q042 (2020): The Hungarian court system is as follows: Kúria (1) – the Hungarian Supreme Court - its jurisdiction in criminal, civil and administrative cases covers adjudication of extraordinary remedies and appeals, adopting uniformity decisions. It also decides if municipal decrees are in compliance with higher level legislation. Regional courts of appeal (5) – their jurisdiction in criminal and civil cases covers the adjudication of appeals received from the regional courts (third instance in criminal cases). Regional courts (20) – their jurisdiction in criminal, civil and administrative cases covers the adjudication of appeals received from district courts, administrative and labour courts, and procedure at first instance in certain criminal and civil cases. District courts (113) – their jurisdiction in criminal and civil cases covers the procedures at first instance. Out of the 113 district courts, the district courts in the seat of the regional courts have special competences in many cases. Administrative and labour courts (20) were dismissed on the 31st of March 2020. From this date Regional Courts deal with labour cases on first instance while administrative cases are dealth with by eight Regional Court on a regional level.

Q042 (2019): 113 District Courts (first instance courts of general jurisdiction)
20 Administrative and Labour Courts (specialized first instance courts)
20 Regional Courts (second instance courts of general jurisdiction + first instance courts in cases of higher importance)
5 Regional Courts of Appeal (second instance courts in cases of higher importance)
1 Supreme Court ("Kúria" - special judicial review)
It has to be noted that Administrative and Labour Courts are merged into the regional courts on the 31st of March 2020. Since 1st of April 2020 every regional court deals with labour cases on first instance (second instance are the regional courts of appeal) and 8 regional courts have special administrative law department dealing with first instance cases (seconf instance is the Supreme Court).

Q042 (2018): Two new district courts were established (one in 2017 in the city of Szigetszentmiklós, another one in 2019 in the city of Érd).
113 District Courts (first instance courts of general jurisdiction)
20 Administrative and Labour Courts (specialized first instance courts)
20 Regional Courts (second instance courts of general jurisdiction + first instance courts in cases of higher importance)
5 Regional Courts of Appeal (second instance courts in cases of higher importance)
1 Supreme Court (special judicial review)

Q042 (2017): All courts include :
112 District Courts
20 Regional Courts
20 Administrative and Labour Courts
5 Regional Courts of Appeal
1 Supreme Court (Kúria)
The Hungarian court system is as follows: Kúria (1) – the Hungarian Supreme Court - its jurisdiction in criminal, civil and administrative cases covers adjudication of extraordinary remedies and appeals, adopting uniformity decisions. It also decides if municipal decrees are in compliance with higher level legislation. Regional courts of appeal (5) – their jurisdiction in criminal and civil cases covers the adjudication of appeals received from the regional courts (third instance in criminal cases). Regional courts (20) – their jurisdiction in criminal, civil and administrative cases covers the adjudication of appeals received from district courts, administrative and labour courts, and procedure at first instance in certain criminal and civil cases. District courts (112) – their jurisdiction in criminal and civil cases covers the procedures at first instance. The number of judges in the largest district court is 357, whereas the smallest court operates with one judge. Out of the 111 district courts, the district courts in the seat of the regional courts have special competences in many cases. Administrative and labour courts (20) – their jurisdiction covers procedures at first instance in individual and collective labour disputes and in administrative cases. First instance administrative and labour courts (20) started operating on 1 January 2013 as first instance specialized courts. Thus from this date the number of first instance courts of general jurisdiction is 112.

Q043 (General Comment): There are military departments at five Regional Courts and at one Regional Court of Appeal. Although they only deal with military related criminal cases, they are not considered as specialized courts as they are a part of the ordinary court system both in administrative and professional management.

Q043 (2023): Regional courts deal with labour cases on first instance. Administrative cases are dealt by eight regional court on a regional level.
Q043 (2020): “Administrative and labour courts (20) were dismissed on the 31st of March 2020. From this date Regional Courts deal with labour cases on first instance while administrative cases are dealt with by eight Regional Court on a regional level”.
Q044 (2018): According to proposed legislation an independent administrative court system may be established in the future.

Q044 (2016): Two new district courts will be established (one in 2017 in the city of Szigetszentmiklós, another one in 2019 in the city of Érd).
Q044 (2014): According to 2014 data, a new first instance (district) court will be established in the city of Érd on 01/01/2018.

Ireland

Q042 (General Comment): In Ireland, there are only three first instance courts (as legal entities) exercising general jurisdiction for the entire State (the High Court, the Circuit Court and the District Court). Each of those three courts has a single court president only, who exercises a nationwide remit for his/her court. The number of geographic locations reflects the physical location serving as seats or venues for the three jurisdictions.
Q042 (2024): For the purpose of this section, we have included each court only once, whether or not that court has both first and second instance jurisdiction.
First Instance courts of general jurisdiction – District Court, Circuit Court, High Court
Second Instance courts of general jurisdiction – Court of Appeal
Highest Instance courts of general jurisdiction – Supreme Court
Specialised Courts – Special Criminal Courts

Q042 (2023): For the purpose of this section, we have included each court only once, whether or not that court has both first and second instance jurisdiction.
First Instance courts of general jurisdiction – District Court, Circuit Court, High Court
Second Instance courts of general jurisdiction – Court of Appeal
Highest Instance courts of general jurisdiction – Supreme Court
Specialised Courts – Special Criminal Courts

Q042 (2016): The specialised courts referred to are the two Special Criminal Courts the jurisdiction of which generally relates to trial of terrorism- and organised crime-related offices.
The increase of one location over the figure provided for 2014 refers to the temporary relocation of the Dublin District Court's Drug Treatment Court in 2016.

Q043 (General Comment): The two specialised first instance courts listed above are Special Criminal Court No. 1 and Special Criminal Court No. 2. The latter was established in October 2015 and came into operation, sitting for the first time, in 2016. In previous cycles the category "other" (1) was referring to Special Criminal Court No. 1.
Other than distinctions between jurisdictional levels there is no specialisation - all judges within a court jurisdiction may be allocated to any category of case falling within the jurisdictional remit of the court concerned. Starting in 2013 a new cadre of specialist judges was created in the Circuit Court with specific jurisdiction in relation to certain types of personal insolvency remedy and certain pre-trial order making powers.
Ireland has a specialist regime for the trial of commercial proceedings in the form of the Commercial List of the High Court (known as the 'Commercial Court') but, as it is not a separate legal entity, being a list within and formally a part of the High Court, it is not included as a specialist court as such.
The Labour Court in Ireland is a tribunal rather than a court of law, which is why it is not included in the table of Q43. It cannot award costs; instead, it hears both sides of a case and issues non-binding recommendations. While these recommendations are expected to be given serious consideration, the responsibility for resolving disputes ultimately rests with the parties involved.

Q043 (2024): The Commercial Court cannot be defined as a recognised branch of the High Court but is rather a list of commercial cases heard by the High Court. The Labour Court is a tribunal rather than a court of law.
The Family Courts Act was signed into law in 2024 but has yet to commence. This Act provides for the establishment of a Family High Court, Family Circuit Court and Family District Court as divisions of the existing court jurisdictions and provides for the reallocation of jurisdiction in family law proceedings between the family law courts.

Q043 (2023): There are currently 2 Special Criminal Courts in Ireland who (in general) deal with crimes relating to terrorism and organised crime. While divisions of other courts deal with many of the matters set out in the table above, there are no specialised courts per se to deal with same.
Furthermore, while there are other tribunals or bodies outside of the court system which have powers to make determinations in some of the matters in the table (e.g., the Labour Court and Military Courts), these tribunals are not within the courts system.

Q043 (2022): There are currently 2 Special Criminal Courts in Ireland who (in general) deal with crimes relating to terrorism and organised crime. While divisions of other courts deal with many of the matters set out in the table above, there are no specialised courts per se to deal with same.
Furthermore, while there are other tribunals or bodies outside of the court system which have powers to make determinations in some of the matters in the table (e.g., the Labour Court and Military Courts). These tribunals are not within the courts system.

Q043 (2019): Legislation to provide for a Family Court has been proposed

Q044 (2024): This answer is based on the explanatory note wherein if there are two courts, e.g. District Court and Circuit Court sitting in one specific location, they are to be counted separately.
There are currently 90 District Court and 49 Circuit Court venues.
There are 2 High Court venues in Dublin and there were 11 provincial sittings of the High Court in 2024.
The Supreme Court, Special Criminal Court and Court of Appeal each have one venue.

Q044 (2023): This answer is based on the explanatory note wherein if there are two courts, e.g. District and Circuit courts sitting in one specific location, they are to be counted separately.
Q044 (2022): There has not been an increase in venues since 2020. This answer is based on the explanatory note wherein if there are two courts, e.g. District and Circuit courts sitting in one specific location, they are to be counted separately whereas previously they were counted together.
Q044 (2018): The Assisted Decision-Making (Capacity) Act 2015 will, when commenced, replace the existing wardship regime for persons with capacity issues and introduce new decision support arrangements for such persons. New jurisdiction will, in particular , be conferred on the Circuit Court in respect of such arrangements. The current situation is that while some parts of the 2015 Act are commenced, others remain to be commenced.

Q044 (2016): The Assisted Decision-Making (Capacity) Act 2015 will, when commenced, replace the existing wardship regime for persons with capacity issues and introduce new decision support arrangements for such persons. New jurisdiction will, in particular , be conferred on the Circuit Court in respect of such arrangements.
Q044 (2014): According to 2014 data, legislation is in preparation for the creation of specialised family courts within the High, Circuit and District Courts.

Italy

Q042 (2023): The decrease in the number of courts is due to the fact that some Offices of the Justice of Peace closed in 2023.

Q042 (2018): In 2012-2013 we went through a major reform of the judicial map. In particular, a great number of justice of peace offices (initially 846) were shut down. However, each Italian municipality had (and still has) the opportunity to preserve the office at their own expenses. For this reason, each year a series of Justice of Peace offices administered by the municipality might be re-opened or closed. 3 justice of peace offices closed between 2017 and 2018.

Q042 (2017): In 2012-2013 we went through a major reform of the judicial map. In particular, a great number of justice of peace offices (initially 846) were shut down. However, each Italian municipality had (and still has) the opportunity to preserve the office at their own expenses. For this reason, each year a series of Justice of Peace offices administered by the municipality might be re-opened or closed.

Q043 (General Comment): Since 2014 in Italy there are 22 Brand Commercial courts (Tribunali delle imprese) that are legal entities of their own and not just internal court divisions for organizational purpose (such as labour, family etc.).
Notably, in Italy, some specialised first-instance courts are not administered or financed by the Ministry of Justice. These include regional audit commissions, local tax commissions and military courts. As a result, these courts are not considered in responses regarding court budgets, cases, judges, or non-judge staff. Regional audit commissions are not even counted in the number of courts. Conversely, regional administrative courts (first-instance administrative courts) and the supreme administrative court, although they are also not administered or financed by the Ministry of Justice, are included in the counts. Since 2014, they have been considered in the totals for the number of courts and cases. Additionally, starting from 2018, they have been included in the counts for the number of judges, non-judge staff and in the courts budget.
Moreover, in Italy specific matters (such as labour, family etc.) are dealt by specific divisions within the same Court. There are also 26 divisions called DDA (Direzioni Distrettuali Antimafia) which deal specifically with mafia and organized crime.

Q043 (2023): The appeal of some specialized courts (e.g. commercial courts, juvenile courts) are dealt by the general jurisdiction appeal courts. Specific subject matters (e.g labour, insolvency, family, fight against terrorism and organised crime) are dealt by specific divisions within general jurisdiction courts. See general comment for details. The option “Other specialised courts” refers to tax courts.

Q043 (2022): The appeal of some specialized courts (e.g. commercial courts, juvenile courts) are dealt by the general jurisdiction appeal courts. Specific subject matters (e.g labour, insolvency, family, fight against terrorism and organised crime) are dealt by specific divisions within general jurisdiction courts. See general comment for details. The option “Other specialised courts” refers to tax courts.

Q043 (2021): The appeal of some specialized courts (e.g. commercial courts, juvenile courts) are dealt by the general jurisdiction appeal courts.
Specific subject matters (e.g labour, insolvency, family, fight against terrorism and organised crime) are dealt by specific divisions within general jurisdiction courts. See general comment for details.

Q043 (2020): Tax courts fall into the “Other” category.
The appeal of some specialized courts (e.g. commercial courts, juvenile courts) are dealt by the general jurisdiction appeal courts.
Specific subject matters (e.g labour, insolvency, family, fight against terrorism and organised crime) are dealt by specific divisions within general jurisdiction courts. See general comment for details.

Q043 (2019): The category “other” subsumes 29 Minor (or Juvenile) Courts and 103 Tax Courts

Q043 (2018): The category “other” category subsumes 29 Minor (or Juvenile) Courts and 103 Tax Courts.

Q043 (2017): Other: 29 Minor (or Juvenile) Courts + 103 provincial tax commissions

Q043 (2016): OTHER: 29 Minor (or Juvenile) Courts + 103 Local Tax Commissions

Q044 (2023): The decrease in the number of geographic locations is due to the fact that some Offices of the Justice of Peace closed in 2023.

Q044 (2016): Enhancing the specialization of judges / courts. In particular, the judiciary authorities are evaluating the introduction of specific courts for family and personal matters ("Berruti" reform). Increased competence of Business Courts. Establishment of specialized sections on matters such as immigration, international protection and free movement of citizens of the European Union.
Revision of the appeal system in order to reduce the appeal rate.

Latvia

Q042 (2024): Total number of specialised courts - legal entities - There is indicated one Administrative district Court, one Administrative Regional Court (appeal instance) and one Economic Court. There is a specialised court which cannot be listed as a court of any instance - the Constitutional Court, which within the jurisdiction specified in the Constitution of the Republic of Latvia and Constitutional Court Law shall adjudicate matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it by Constitutional Court Law.

Q042 (2023): 1.1. First instance courts of general jurisdiction - legal entities- comparing with 2022 data there is a small difference, because in 2023 Rezekne Court and Daugavpils Court were merged in one Latgale District Court.
2. Total number of specialised courts - legal entities - There are indicated 1 Administrative district Court, 1 Administrative Regional Court (appeal instance) and 1 Economic Court. There is a specialised court which cannot be listed as a court of any instance - the Constitutional Court, which within the jurisdiction specified in the Constitution of the Republic of Latvia and Constitutional Court Law shall adjudicate matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it by Constitutional Court Law.

Q042 (2022): "1.1 First instance courts of general jurisdiction - legal entities": in 2022, three courts were merged into one, creating the Riga City Court.
In Latvia, the two administrative courts and the Economic court are considered as courts of general jurisdiction, but according to the CEPEJ methodology, data are inserted in line 2 "Total number of specialized courts".
Q042 (2021): In the total number of specialised courts - legal entities are included 1 Administrative court, 1 Administrative Regional (appeal) Court and 1 Economic Court, what was created and started operates from 31.03.2021. in Latvia. From 01.08.2022. is created and operates Riga City Court, merging 3 courts in Riga city territory. The number of first instance courts of general jurisdiction is indicated as it was in 2021, not including Riga City Court as 1 court in Riga. In Latvia is also Constitutional court - which within the jurisdiction specified in the Constitution of the Republic of Latvia and in this Law, shall adjudicate matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it by this Law. The Constitutional court is not included in the total number of the courts.

Q042 (2020): In the total number of specialised courts - legal entities are included 1 Administrative court and 1 Administrative Regional (appeal) court. Starting from 31.03.2021. in Latvia is created and operates the Economic Court. The Economic Court is not included in the total number of specialized courts. In Latvia is also Constitutional court - which within the jurisdiction specified in the Constitution of the Republic of Latvia and in this Law, shall adjudicate matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it by this Law. The Constitutional court is not included in the total number of the courts.

Q042 (2019): Since the reform of March, 2018, the number of first instance courts has been reduced to 10 legal entities at first instance (9 general + 1 administrative). There are also 6 appelate courts and Supreme court. In 2019 was completed reform of Land Register Units, which are included in the composition of district (city) courts. The number of legal entities doesn't changes, but number of courts per geographic locations therefore differs.
The data regarding the geographic locations are indicated on 31.12.2019.

Q042 (2018): Since the reform of March, 2018, the number of first instance courts has been reduced to 10 legal entities at first instance (9 general + 1 administrative). There are also 6 appelate courts and Supreme court.
Q042 (2017): The number of first instance courts (legal entities) is indicated on 31.12.2017., in Latvia starting from 2015 till March, 2018 was a reform where court map was revised. The number of first instance courts (legal entities) starting from March, 2018 is 9. As regards the specialised court - there is only one specialised court the Adminsitrative court with 5 court houses.
Q042 (2016): There is only one specialised court the administrative court with 5 court houses

Q043 (General Comment): The Economic court, is specialized in commercial cases so it can be classified as a specialized court within the scope of this question. It is a first instance court.
The administrative court can be considered as a first and second instance specialized court (within the scope of this question). The Administrative District Court in Riga and the Administrative Regional Court are located in one building. As to the category “military courts”, the reply NA is justified by the fact that according to the Law on Judicial Power, judicial power in the Republic of Latvia is vested in district (city) courts, regional courts, the Supreme Court and the Constitutional Court, but in state of emergencies or during war – also military courts. The rest of the courts in Latvia are not established, and therefore in this case should be NAP.

Q043 (2024): There is an Economic Court, which is specialized in commercial cases, so it can be classified as a specialized court within the scope of this question; however, it is a first instance court. There is also a specialized court that cannot be listed as a court of any instance — the Constitutional Court, which adjudicates matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters within its jurisdiction.
The Administrative Court can be considered a specialized court of both first and second instance (within the scope of this question). As for the category “military courts,” the reply “NA” is justified by the fact that, according to the Law on Judicial Power, judicial power in the Republic of Latvia is vested in district (city) courts, regional courts, the Supreme Court, and the Constitutional Court; however, in a state of emergency or during wartime, it may also be exercised by military courts. The rest of the courts in Latvia are not established and, therefore, in this case, the appropriate response is “NAP.”

Q043 (2023): There is Economic court, which is specialized in commercial cases so it can be classified as a specialized court within the scope of this question, but it’s a first instance court.
There is a specialised court which cannot be listed as a court of any instance - the Constitutional Court, which adjudicates matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it.
Administrative court can be considered as a first and second instance specialized court (within the scope of this question). As to the category “military courts”, the reply NA is justified by the fact that according to the Law on Judicial Power, judicial power in the Republic of Latvia is vested in district (city) courts, regional courts, the Supreme Court and the Constitutional Court, but in state of emergencies or during war – also military courts. The rest of the courts in Latvia are not established, and therefore in this case should be NAP.

Q043 (2021): Military courts is established in state of emergency or during a war. On 1 July 2020, amendments to the Law on Judicial Power came into force, providing for the establishment of the Economic Court, which is competent for both certain types of civil and criminal cases. Accordingly, the Court is competent for specific commercial disputes and criminal cases, which cause significant damage to the business environment and economic development. The Economic Court is indicated as Commercial Court. As for Administrative court - first instance court is Administrative District Court and for higher instance is indicated Administrative Regional (appeal) instance Court.

Q043 (2020): Military courts is established in state of emergency or during a war. On 1 July 2020, amendments to the Law on Judicial Power came into force, providing for the establishment of the Economic Court, which is competent for both certain types of civil and criminal cases. Accordingly, the Court is competent for specific commercial disputes and criminal cases, which cause significant damage to the business environment and economic development. The Economic Court is not counted yet in the total number of specialized courts, because it will start its action on 31st March 2021. As for Administrative court - first instance court is Administrative District Court and for higher instance is indicated Administrative Regional (appeal) instance Court.

Q043 (2019): There is only Administrative court in Latvia. On July 1, 2020, amendments to the Law “On Judical Power” entered into force. The Amendments provides for the establishment of the Court of Economic Affairs. The Economic Court will take office on 1 January 2021.

Q043 (2018): There is only Administrative court in Latvia.

Q043 (2016): There is only one specialised court the administrative court with 5 court houses

Q044 (2021): All the courts (geographic locations) - Administrative District Court in Riga and Administrative Regional Court is located in one building, there is counted as 1 court per geographical location and indicated in the number of first instance courts. The same situation is in Vidzeme region - Vidzeme Regional Court Madona Court house and Vidzeme District Court is located in 1 building, there is counted as 1 court per geographical location and indicated in the number of first instance courts.

Q044 (2018): Reform was finished in March 2018. In its course first instance court count was reduced to 10 (9 first instance + 1 first instance Administrative court).
In year 2020/2021 there is a plan of creating a court for economical cases that would be a specialised 1st instance court.

Q044 (2016): Starting from 1 of February 2016, the reform has been introduced in Latgale (administrative region of Latvia). A number of district (city) courts in territory of Latgale regional court was decreased from six to two district (city) courts (Balvi District Court and Ludza District Court had been incorporated into Rezekne District Court; Kraslava district court and Preili District Court had been incorporated into Daugavpils District Court).
in 2016, Ministry of Justice make preparatory work to make court house reform in two district (city) court in the Rigas region. Accordingly, starting from 1 of February 2017, the City of Rīga Zemgale Urban District Court has been reorganized and conjoined with the City of Rīga Kurzeme District Court and changed the name of this court to City of Rīga Pārdaugavas Court.

Q044 (2014): In the frame of the 2014 evaluation, it has been stressed that the Judicial Council and the Cabinet of Ministers have initiated the gradual unification of the territory of operation of district (city) courts, through the implementation of the reform of the Riga court region. From March 2015, the Sigulda Court is attached to the Riga District Court, while the Riga City Central District Court was attached to the Riga City Vidzeme District Court.
The Judicial Council's decision of 8 June 2015 confirmed the restructuring plan concerning the Jurmala City Court. According to the plan, the latter must be attached to the Riga District Court from August 2015. The review of the judicial map is intended to increase the efficiency of the court system and the quality of the judicial activity, to reduce the processing times and to even out the judicial capacity. The reform is still going on.

Lithuania

Q042 (General Comment): 1.1. 11 district courts;
1.2. 5 regional courts (regional courts are appeal instance for judgments, decisions, rulings and orders of district courts as well as first instance courts adjudicating certain categories of cases; in this table regional courts are counted only as second instance courts of general jurisdiction) and the Court of Appeal of Lithuania;
2. 1 regional administrative court, which consists of five chambers, and the Supreme Administrative Court of Lithuania.
Regional courts as the first instance courts examine criminal cases in which persons are accused of having committed serious and very serious crimes, as well as cases in which the accused were the President of the Republic of Lithuania, members of the Seimas (Parliament) or Government, judges, judges or prosecutors of the Constitutional Court at the time of the commission of the criminal act.
Regional courts as the first instance deal with civil cases in which the amount of the claim is greater than 28,510 EUR(except for family legal relations cases due to the division of property), copyright cases, civil public tender legal relations cases, bankruptcy and restructuring cases, according to the statement of the bank's temporary administrator on reduction of the bank's share capital, cases in which one of the parties is a foreign state, according to lawsuits regarding the forced sale of shares, due to the investigation of the activity of a legal entity, and other cases.
Only the Vilnius Regional Court, with exclusive rights, in accordance with the laws in force, as a court of first instance hears cases regarding disputes provided for in the Patent Law of the Republic of Lithuania, regarding disputes provided for in the Trademark Law of the Republic of Lithuania, regarding adoption based on requests of foreign citizens

Q042 (2023): Regional courts are counted only as second instance.

Q042 (2022): according to 2021 answers, Regional courts are counted only as second instance.

Q042 (2021): Regional courts are counted only as second instance; general comment has been updated in view of the changed assignment of the regional courts to the second instance only.
Q042 (2020): 1.1. 12 district courts and 5 regional courts (the latter are adjudicating certain categories of cases as first instance courts);
1.2. 5 regional courts and the Court of Appeal of Lithuania;
2. 2 regional administrative courts and the Supreme Administrative Court of Lithuania.
Q042 (2018): Number of courts (as legal entities) in Lithuania decreased from 1st January 2018 according to the Law on Reorganization of Courts of the Republic of Lithuania (Law of 23rd Juin, 2016 No. XII-2474). Instead of 49 district courts (as legal entities) there are now 12 district courts (some of them have court houses), instead of 5 regional administrative courts there are now 2 of them (one has houses). The number of first instance courts of general jurisdiction (legal entities) in point 42.1 implies 5 regional courts (of general jurisdiction) which are first instance for criminal and civil cases assigned to its jurisdiction by law. These courts also are appeal instance for judgements, decisions, rulings and orders of district courts, so their number is also included in the number of all courts at point 42.3.

Q042 (2017): From January 1, 2018, there are 22 left (17 first instance courts, 2 first instance courts of special jurisdiction, 2 courts of appeal (1 of them is specialized court) and 1 court of cassation).
Q042 (2014): As regional courts of Lithuania function not only as courts of appeal, but also as courts of first instance, for 2014, the number of these courts is also included in the number of first instance courts of general jurisdiction. This was not the case in earlier years.
Q044 (General Comment): There are 59 1st instance courts locations: 11 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 1 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.
Q044 (2024): There are 59 1st instance courts locations: 11 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 1 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.

Q044 (2023): There are 59 1st instance courts locations: 12 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 2 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.
Q044 (2022): There are 59 1st instance courts locations: 12 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 2 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.
Q044 (2020): There are 59 1st instance courts locations: 12 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 2 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.
Q044 (2018): Analysis and discussion on the need and possibility to decrease the number of court houses are initiated.

Q044 (2016): From January 1, 2018, there shall be 12 district courts (instead of 49) and 2 regional administrative courts (instead of 5).

Luxembourg

Q042 (General Comment): 42.1.1: three justices of the peace and two district courts

42.1.2: one Court of Appeal 42.1.3: one Court of Cassation

42.2: Total specialized courts (all instances) In addition to the actual jurisdictions, the law of July 27, 1997 organizing the Constitutional Court established this court which is seized, as a preliminary ruling, when a question arises regarding the conformity of a law with the Constitution before a judicial or administrative jurisdiction.

It rules by way of judgment on laws' conformity with the Constitution, except for those approving treaties.

When one party raises an issue concerning a law's compliance with the Constitution before either judicial or administrative jurisdiction, that jurisdiction must refer it to The Constitutional Court unless it considers that making a decision on the raised issue is unnecessary for its judgment; that such question lacks any foundation; or that The Constitutional Court has already ruled on an identical matter.

If any jurisdiction deems there’s an issue about whether certain legislation complies with constitutional provisions and deciding upon this point is necessary for delivering its verdict then it should raise this matter ex officio after previously inviting parties to present their observations.

Parties are entitled to conclude and plead before the Constitutional Court through representation by a counsel listed in Category I annually compiled tables set up by bar councils’ orders."

The judgments of the Constitutional Court are published in the Official Journal of the Grand Duchy of Luxembourg within thirty days from their pronouncement." (Justice Portal : https://justice.public.lu/fr/organisation-justice/cour-constitutionnelle.html)

Q042 (2022): In addition to the regular courts, the Law of 27 July 1997 on the organization of the Constitutional Court, established this court, which is seized for a preliminary ruling when a question arises before a judicial or administrative jurisdiction concerning the conformity of a law with the Constitution. It rules by way of judgment on the conformity of laws with the Constitution, except those approving treaties.

When a party raises an issue regarding compliance of a law with the Constitution before a judicial or administrative jurisdiction, that jurisdiction is required to refer it to the Constitutional Court, unless it considers that deciding on such matter is not necessary for its judgment, that there are no grounds for such issue or that there has already been an decision by the Constitutional Court on an identical matter.

If any jurisdiction deems that an issue relating to compliance of a law with the Constitution arises and a decision on this point is necessary for its judgment, it must raise it ex officio after having previously invited the parties to present their observations.

The parties are entitled to conclude and plead before the Constitutional Court through a counsel registered in List I annually drawn up by the councils of bar associations.

Judgments from the Constitutional Court are published in the Official Gazette of Luxembourg within thirty days from their pronouncement. (Justice Portal: https://justice.public.lu/fr/organisation-justice/cour-constitutionnelle.html)

Q042 (2020): "In addition to the courts proper, the law of 27 July 1997 on the organization of the Constitutional Court established this court, which is seized, on a preliminary basis, when a question relating to the conformity of a law to the Constitution arises before a court of the judicial or administrative order. It rules, by means of a judgment, on the conformity of laws with the Constitution, with the exception of those concerning the approval of treaties.
When a party raises a question concerning the conformity of a law with the Constitution before a court of the judicial or administrative order, that court is obliged to refer the matter to the Constitutional Court, except when it considers that a decision on the question raised is not necessary to render its judgment, that the question is unfounded or that the Constitutional Court has already ruled on a question with the same object.
If a court considers that a question of conformity of a law with the Constitution arises and that a decision on this point is necessary to render its judgment, it must raise it of its own motion after first inviting the parties to present their observations.
The parties are admitted to conclude and plead before the Constitutional Court through the ministry of a lawyer registered in list I of the tables drawn up annually by the Bar Associations.
The judgments of the Constitutional Court are published in the Official Journal of the Grand Duchy of Luxembourg within thirty days of their delivery. (Portal of Justice: https://justice.public.lu/fr/organisation-justice/cour-constitutionnelle.html) "

Q042 (2017): 42.1: 3 justices of the peace and 2 district courts
42.2: Please note that the total of 043 is not identical to the total in 042, as most of the specialized courts are in fact specialized sections of a general court. E.g. the commercial courts (which also deal with insolvency cases) are specialized sections of the district court (tribunal d'arrondissement). Only the administrative, military and 1st instance social security courts are selfstanding.
Q042 (2016): 42.1: 3 justices of the peace and 2 district courts
42.2: Please note that the total of 043 is not identical to the total in 042, as most of the specialized courts are in fact specialized sections of a general court. E.g. the commercial courts (which also deal with insolvency cases) are specialized sections of the district court (tribunal d'arrondissement). Only the administrative, military and 1st instance social security courts are selfstanding.

Q043 (General Comment): Courts of general jurisdiction are organized into specialized sections. For example, the commercial courts (which also deal with insolvency cases) are specialized sections of the district court. Only the administrative, military and social security courts of first instance are autonomous.
Q043 (2020): Pour 2020, seules les entités juridiques ont été prises en considération dans le tableau.
Q043 (2017): Please note that the total of 043 is not identical to the total in 042, as most of the specialized courts are in fact specialized sections of a general court. E.g. the commercial courts (which also deal with insolvency cases) are specialized sections of the district court (tribunal d'arrondissement). Only the administrative, military and 1st instance social security courts are selfstanding.

Q043 (2016): Please note that the total of 043 is not identical to the total in 042, as most of the specialized courts are in fact specialized sections of a general court. E.g. the commercial courts (which also deal with insolvency cases) are specialized sections of the district court (tribunal d'arrondissement). Only the administrative, military and 1st instance social security courts are selfstanding.

Q043 (2014): Most of the areas mentioned in the question are within the competence of district courts (commercial cases, insolvency cases, family law cases and all criminal cases except for offenses that are under the jurisdiction of justices of peace) and justices of peace (labour law cases, rental cases). The indicated total is a purely statistical information which does not reflect the reality.

Malta

Q042 (2023): The courts identified at 1.1 are: Court of Magistrates, Civil Jurisdiction; Court of Magistrates, Criminal Jurisdiction, Criminal Jurisdiction; Criminal Court; Civil Court, First Hall. The courts identified for at 2 are: the Rent Regulation Board; the Rural Leases Control Board; the Administrative Review Tribunal; the Land Arbitration Board; the Court of Voluntary Jurisdiction; the Small Claims Tribunal; the Constitutional Court.
Q042 (2022): The 1st instance courts of general jurisdiction are:
- the Court of Magistrates, Civil Jurisdiction
- the Court of Magistrates, Criminal Jurisdiction
- the Civil Court, First Hall - the Criminal Court

The 2nd instance courts of general jurisdiction are:
- the Civil Court of Appeal, Inferior Jurisdiction
- the Civil Court of Appeal, Superior Jurisdiction
- the Criminal Court of Appeal, Inferior Jurisdiction
- the Criminal Court of Appeal, Superior Jurisdiction

In the Maltese judicial system, there are only 2 instances of courts, hence Q1.3 is marked as NAP.
The increase in the number of courts as legal entities reflects the addition of the criminal courts to the above data, namely:
- 1st Instance Courts: Court of Magistrates Criminal Jurisdiction and Criminal Court
- 2nd Instance Courts: Criminal Court of Appeal in its Inferior and Superior Jurisdiction

Q2: The increase by 1 in the number of specialised courts reflects the addition of the Constitutional Court (in line with 2021 data).

Q042 (2021): The total number of Specialised Courts has increased to 8 because of the addition of the Constitutional Court as a second instance specialised court.
Q042 (2020): The 1st instance courts of general jurisdiction are:
- the Court of Magistrates, Civil Jurisdiction (competency up to Euros 15,000)
- the Civil Court, First Hall (civil cases above Euros 15,000)

The 2nd instance courts of general jurisdiction are:
- the Civil Court of Appeal, Inferior Jurisdiction - the Civil Court of Appeal, Superior Jurisdiction

In the Maltese judicial system, there are only 2 instances of courts, hence Q1.3 is marked as NAP.
The increase in the number of courts as legal entities reflects the addition of the criminal courts to the above data, namely:
- 1st Instance Courts: Court of Magistrates Criminal Jurisdiction and Criminal Court
- 2nd Instance Courts: Criminal Court of Appeal in its Inferior and Superior Jurisdiction

Q042 (2018): In 2018, the Commercial Division was set up in order to hear cases filed under the Companies Act that include Insolvency cases. This new specialised first instance court is the reason behind the increase in the number of courts quoted at 42.2 above.
Q043 (General Comment): The number of specialised courts includes non-criminal, administrative and criminal courts established as legal entities in line with the CEPEJ methodology. The seven (7) specialised courts referred to in Q43 are the Rent Regulation Board, the Land Arbitration Board, the Rural Leases Control Board, the Small Claims Tribunal, the Court of Voluntary Jurisdiction, the Administrative Review Tribunal and the Juvenile Court. Other courts previously counted as specialised courts, such as the Family Court and the Commercial Court, are divisions of the Civil Court, First Hall, and as such are now being included with the 1st Instance Courts of General Jurisdiction. The higher instance 'Otehr specialised court' refers to the Constitutional Court.

Q043 (2022): The identified specialised courts listed under 'Other specialised courts' are:
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction
- the Constitutional Court (higher instance court)

The Juvenile Court is a specialised criminal court.

Q043 (2021): The first instance specialised courts are:
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction
- the Juvenile Court

Under the second instance specialised courts, we are including the Constitutional Court which is a court that deals exclusively with constitutional cases.

Q043 (2020): A number of courts that used to be previously identified as specialised courts, are not being categorised this time, given that they all make part of the First Hall, General Jurisdiction Court. These are:
- The Commercial Court (including insolvency cases)
- The Family Court

The identified specialised courts listed under 'Other specialised courts' are:
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction

The Juvenile Court is a specialised criminal court.

Q043 (2019): The courts referred to under 'Other specialised 1st Instance courts' include:
- The Civil Court, First Hall
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction

Q043 (2018): The courts referred to under 'Other specialised 1st Instance courts' include:
- The Civil Court, First Hall
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction

Q043 (2017): The other specialised 1st Instance courts include:
- the Civil Court, First Hall
- the Court of Voluntary Jurisdiction - the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal

Q043 (2016): The other specialised 1st Instance courts include:
- the Civil Court, First Hall
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal

Q044 (2022): The Juvenile Court that until the previous evaluation was in a separate geographical location, has since been relocated to the Courts of Justice in Valletta. Hence the change in the figure quoted.
Q044 (2021): The Juvenile Court is a first instance specialised court that is located outside of the main court building in Valletta. We are therefore reflecting this different geographic location in the updated figures in Q44.
Q044 (2016): Throughout 2017, work was carried out in order to introduce a commercial division within the Civil Court in order to facilitate cases filed under the Companies Act. The bill is currently undergoing the legislative process that would see it being enacted as law by the end of the year. The Commercial Division will become operative in 2018.

Netherlands

Q042 (General Comment): Second instance courts of general jurisdiction handle civil, criminal and tax cases.
There are two additional courts that do not seem to fit this categorization by instance, acting in the area of administrative law. Some administrative law cases (tax cases) are handled by first and second instance courts of general jurisdiction. Other administrative cases are handled by the Trade and Industry Appeals Tribunal, also known as the Administrative High Court for Trade and Industry (College van van Beroep voor het Bedrijfsleven). This is a specialized administrative court, which rules on disputes in the area of social-economic administrative law, and appeals for specific laws. The tribunal hears both first and second instance cases. Categorized as a specialized court.
The Central Appeals Tribunal (Centrale Raad van Beroep) is a court of appeal mainly active in legal areas pertaining to social security and civil service. In these areas, it is also the highest judicial authority. In some cases, it is the first and sole instance. This court does not exactly fit the distinction of the table above, but categorized as a specialized court.
The Administrative Jurisdiction Division of the Council of State is the highest administrative court with general jurisdiction in the Netherlands. It hears various types of appeals (e.g. members of the public / associations / commercial companies against governmental bodies, or between public authorities). This court does not exactly fit the distinction of the table above, but categorized as a specialized court. For more information, see https://www.rechtspraak.nl/English/Judicial-system-and-legislation/Pages/Special-Tribunals.aspx. Note that the Supreme Court (highest instance court of general jurisdiction) does not retry the case itself, but judges whether the judges at the first and second instance applied the law correctly in the judgment, and whether the procedure was correctly followed (cassation, potential quashing of judgment).
Since 2013 and following the implementation of the reform related to the reorganization of the judicial map, the number of district courts was reduced from 19 in 2010 to 11 in 2013 and 2014. Moreover, this reform resulted in the closure of sub-district court locations due to which the number of geographic locations decreased from 64 in 2010 to 40 in 2013 and 2014.

Q042 (2021): Second instance courts of general jurisdiction handle civil, criminal and tax cases.
There are two additional courts that do not seem to fit this categorization by instance, acting in the area of administrative law. Some administrative law cases (tax cases) are handled by first and second instance courts of general jurisdiction. Other administrative cases are handeled by the Trade and Industry Appeals Tribunal, also known as the Administrative High Court for Trade and Industry (College van van Beroep voor het Bedrijfsleven). This is a specialized administrative court, which rules on disputes in the area of social-economic administrative law, and appeals for specific laws. The tribunal hears both first and second instance cases. Categorized as a specialized court.
The Central Appeals Tribunal (Centrale Raad van Beroep) is a court of appeal mainly active in legal areas pertaining to social security and civil service. In these areas, it is also the highest judicial authority. In some cases, it is the first and sole instance. This court does not exactly fit the distinction of the table above, but categorized as a specialized court.
The Administrative Jurisdiction Division of the Council of State is the highest administrative court with general jurisdiction in the Netherlands. It hears various types of appeals (e.g. members of the public / associations / commercial companies against governmental bodies, or between public authorities). This court does not exactly fit the distinction of the table above, but categorized as a specialized court.
For more information, see https://www.rechtspraak.nl/English/Judicial-system-and-legislation/Pages/Special-Tribunals.aspx. Note that the Supreme Court (highest instance court of general jurisdiction) does not retry the case itself, but judges whether the judges at the first and second instance applied the law correctly in the judgment, and whether the procedure was correctly followed (cassation, potential quashing of judgment).

Q042 (2020): There are 11 first instance courts (Rechtbanken).
There are 4 second instance courts of general jurisdiction: 4 courts of appeal (Second instance, Gerechtshoven) that handle civil cases, criminal cases and tax cases.
There is 1 highest instance court of general jurisdiction, the Supreme Court (Hoge Raad), the highest instance court in The Netherlands.
There are three specialized courts (see comment Q43).

Q042 (2017): same as last year

Q043 (General Comment): See the comment under Q42 on the other special (not specialised) appeal tribunals as well.
The Trade and Industry Appeals Tribunal, also known as the Administrative High Court for Trade and Industry (College van van Beroep voor het Bedrijfsleven) is a specialized administrative court, which rules on disputes in the area of social-economic administrative law, and appeals for specific laws. The tribunal hears both first and second instance cases, but is categorized as a first instance court.
The Central Appeals Tribunal (Centrale Raad van Beroep) is a court of appeal mainly active in legal areas pertaining to social security and civil service. In these areas, it is also the highest judicial authority. In some cases, it is the first and sole instance.
The Administrative Jurisdiction Division of the Council of State is the highest administrative court with general jurisdiction in the Netherlands. It hears various types of appeals (e.g. members of the public / associations / commercial companies against governmental bodies, or between public authorities).
There is no separate military court, but there is a military chamber in one of the district courts.

Q043 (2021): See also comment at Q42 on the other special (not specialized) appeal tribunals.
Trade and Industry Appeals Tribunal, also known as the Administrative High Court for Trade and Industry (College van van Beroep voor het Bedrijfsleven). This is a specialized administrative court, which rules on disputes in the area of social-economic administrative law, and appeals for specific laws. The tribunal hears both first and second instance cases, but is categorized as a first instance court.
The Central Appeals Tribunal (Centrale Raad van Beroep) is a court of appeal mainly active in legal areas pertaining to social security and civil service. In these areas, it is also the highest judicial authority. In some cases, it is the first and sole instance.
The Administrative Jurisdiction Division of the Council of State is the highest administrative court with general jurisdiction in the Netherlands. It hears various types of appeals (e.g. members of the public / associations / commercial companies against governmental bodies, or between public authorities).

Q043 (2020): The specialized courts are:
Trade and Industry Appeals Tribunal: the administrative High Court for trade and industry. This tribunal is a specialized administrative court that rules on disputes in the area of social-economic administrative law. Categorized as administrative court.
The Central Appeals Tribunal is the highest judicial authority in areas of social security and civil service. Categorized as other.

Q043 (2017): same as last year

Q043 (2015): Currently the commercial court in the Netherlands is the specialized court CBb. Per January first 2017 starts the Netherlands Commercial Court (NCC).
Q044 (General Comment): First instance: the first instance courts, and the Trade and Industry Appeals Tribunal are included.
All courts: first instance, second and highest instance courts of general jurisdiction are included, as well as the Trade and Industry Appeals Tribunal, Central Appeals Tribunal and Administrative Jurisdiction Division of the Council of State.
First instance geographic locations:
-32 first instance geographic locations of general jurisdiction, with 4 locations only housing a Justice of the Peace. -1 Trade and Industry Appeals Tribunal. Counted separately, although located at the same location as a first instance court of general jurisdiction. It is not the same court, but a separate, specialized court (this change in counting occurred between 2020 and 2021). See Q43 for why this is counted as a first instance court.
See also a law that assigns 32 geographic locations, and the Trade and Industry Appeals Tribunal:
https://wetten.overheid.nl/BWBR0032316/2013-04-01
All courts geographic locations:
-33 first instance geographic locations (see above).
-6 second instance geographic locations of general jurisdiction, of which 4 are located at the same geographic location as a first instance court.
-1 Supreme Court, located at a separate location.
-1 Central Appeals Tribunal, located at the same geographic location as a first instance court. Counted separately as it is not the same court.
-1 Administrative Jurisdiction Division of the Council of State, located at a separate location.

Q044 (2021): First instance: the first instance courts, and the Trade and Industry Appeals Tribunal are included.
All courts: first instance, second and highest instance courts of general jurisdiction are included, as well as the Trade and Industry Appeals Tribunal, Central Appeals Tribunal and Administrative Jurisdiction Division of the Council of State.
First instance geo.locations:
-33 first instance geo.location of general jurisdiction, with 4 locations only housing a Justice of the Peace.
-1 Trade and Industry Appeals Tribunal. Counted separately, although located at the same location as a first instance court of general jurisdiction, as it is not the same court, but a separate, specialized court (different than previous evaluation). See Q43 for why this is counted as a first instance court.
All courts geo.locations:
-34 first instance geo.locations (see above).
-6 second instance geo.locations of general jurisdiction, of which 4 are located at the same geo.location as a first instance court.
-1 Supreme Court, located at a separate location.
-1 Central Appeals Tribunal, located at the same geo.location as a first instance court. Counted separately as it is not the same court.
-1 Administrative Jurisdiction Division of the Council of State, located at a separate location.

Q044 (2020): In one case (of 43), a first instance court of general jurisdiction, a specialized first instance court, and a court of appeal are housed at the same site (adding 2 sites according to the explanatory note).
In 3 cases, a first instance court of gen.jur. and a court of appeal are housed at the same site (adding 3 sites according to the explanatory note).
In 1 case, a f.i. court of gen.jur. and a specialized second instance court are housed at the same site (adding 1 site according to the explanatory note).
Finally, the Supreme Court, 1 specialized second instance court, and 2 appeal courts are housed at unique locations (adding 4 sites according to the explanatory note).

Q044 (2016): Possibility of closing subdistrict court facility?

Q044 (2014): According to 2014 data, the reforms regarding the merging of courts mentioned on the occasion of the 2012 evaluation have been implemented.

Poland

Q042 (General Comment): The Polish court structure is characterized by four levels of courts but only three instances. Basically, there are district courts which are first instance courts, regional courts which are first and second instance courts (regional courts within their jurisdiction have the majority of first-instance cases), and appellate courts which are second instance courts. The highest instance courts are the Supreme Court, the Supreme Administrative Court and the Constitutional Tribunal.
Q042 (2024): 1.1 first instance courts (district + regional courts), 1.2 second (appellate courts) , 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction.
Q042 (2023): 1.1 first instance courts (district courts), 1.2 second (regional + appellate courts) , 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction.
Q042 (2022): 1.1 first instance courts (district courts + regional courts);
1.2 second (appellate courts); 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction;

Q042 (2021): The table indicating the content of:
1.1 first instance courts (district + regional courts), 1.2 second (appellate courts) , 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction.
Q042 (2020): The table indicating the content of:
1.1 first instance courts (district + regional courts), 1.2 second (appellate courts) , 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction.
Q042 (2018): .

Q042 (2017): 42.1 First instance courts of general jurisdiction - common courts (318 regional courts, 45 district courts).
42.2 First instance specialised courts - 16 administrative courts, 9 military courts.
42.3 All the courts - the Supreme Court, common courts (318 regional courts, 45 district courts, 11 appeal courts), administrative courts (voivodship administrative courts (16), the Supreme Administrative Court), military courts (regional military courts (7), district military courts (2)).

Q042 (2016): 42.1 First instance courts of general jurisdiction - common courts (318 regional courts, 45 district courts).
42.2 First instance specialised courts - 16 administrative courts, 9 military courts.
42.3 All the courts - the Supreme Court, common courts (318 regional courts, 45 district courts, 11 appeal courts), administrative courts (16 voivodship administrative courts. the Supreme Administrative Court), militry courts (9 regional military courts, 2 district military courts). The differences between presented data and the data from 2014 edition is likely to be due to the restoration of District Courts, abolished and converted to divisions of larger units in 2013.
The difference in courts number between this (363) and previous evaluation cycle (287) is probably caused by a significant organizational reform of polish court system, which took place in 2013. Almost eighty small district courts were merged with larger entities. Since 2015 the reform has been reversing, which has resulted in an increase in the number of the courts.

Q043 (2020): There are 7 military courts of first instance and 2 military courts of higher instance in Poland.

Q043 (2019): It is noteworthy that the Land and Mortgage Courts which are within the structure of the common court system deal with specific topics, but they are departments.
Besides, the National Court Register and Pledge Registry Departments are business divisions.
The EU Trademark and Community Design Court (which existed in the XXII Division of the District Court in Warsaw)- functioned from 2004 until the creation of intellectual property courts, which took place on 1 July 2020. Cases in the field of intellectual property belong to the jurisdiction of selected District Courts (Article 47990 of the Code of Civil Procedure), while the District Court in Warsaw (XXII Division) has exclusive jurisdiction in matters of intellectual property concerning computer programs, inventions, utility models, topography of integrated circuits, plant varieties and company secrets of a technical nature.
The Court of Competition and Consumer Protection is a special department functioning within the District Court in Warsaw. In the current state of law, the scope of activity of the 17th Department of the Court of Competition and Consumer Protection includes the handling of the following cases in court proceedings of appeals and complaints against decisions and orders issued by the government: the President of the Office of Competition and Consumer Protection, the President of the Energy Regulatory Office, the President of the Railway Transport Office, the President of the Office of Electronic Communications.
When it comes to matters from lease or tenancy agreements - as long as these matters are of an economic nature, they are recognized by business departments, as are matters related to new technologies and the Internet space.

Q044 (2024): The number 426 represents the total number of courts of first instance of general jurisdiction and courts of first instance of specialised jurisdiction (319 district courts + 47 regional courts + 23 specialist courts of first instance = 426). The number 491 represents the total number of all courts, including all their seats in various locations (319 district courts + 47 regional courts of first instance + 47 regional courts of second instance + 11 courts of appeal + 26 specialised courts of first and second instance + 1 Supreme Court + 1 Supreme Administrative Court + 39 non-local courts = 491).

Q044 (2023): The figure of 496 indicated in 2023 is the sum of the common, administrative and military courts of first and second instance and the Supreme Court by geographic location (i.e.. including the subdivisions). To the number of courts of first instance by geographical location (item 44 in line 1 – all common, administrative, military courts of first instance with localised divisions: number of courts 434) was added the number of 62 courts:- regional courts:47, courts of appeal:11, military courts:2, Supreme Administrative Court:1, Supreme Court:1. Total: 434+62= 496.

Q044 (2022): The figure of 496 indicated in 2022 is the sum of the common, administrative and military courts of first and second instance and the Supreme Court by geographic location (i.e. including the subdivisions). To the number of courts of first instance by geographical location (item 44 in line 1 - all common, administrative, military courts of first instance with localised divisions: number of courts 434) was added
the number of 62 courts: - regional courts: 47; - courts of appeal: 11; - military courts: 2; - Supreme Administrative Court: 1; - Supreme Court: 1;
Total: 494 (434 + 62).

Q044 (2020): Regarding point 44, it should be noted that in the previous evaluation cycles (2016, 2017, 2018, 2019) the answer in terms of the number of all courts as geographical locations was 401, while in 2020 it is 494.
The figure of 494 indicated in 2020 is the sum of the common, administrative and military courts of first and second instance and the Supreme Court by geographic location (i.e. including the subdivisions). To the number of courts of first instance by geographical location (item 44 in line 1 - all common, administrative, military courts of first instance with localised divisions: number of courts 433) was added the number of 61 courts: - regional courts: 46; - courts of appeal: 11; - military courts: 2; - Supreme Administrative Court: 1; - Supreme Court: 1;
Total: 494 (433 + 61).
The discrepancy is due to the adoption of a different method of data presentation in 2020 (by geographical location). In compliance with the Explanatory note, the 2020 data show first-instance courts (line 1), and further all courts (line 2) together with all seats in different locations, which in the realities of the Polish legal system should be understood as a necessity to show the number of courts together with local divisions.

Q044 (2016): It is considered to reduce the number of district courts which are responsible for land and mortgage registers or abolishing external branches in district courts.

Portugal

Q042 (2020): 1.1 Courts of general jurisdiction and proximity divisions;
1.2. 2nd Instance Courts (Tribunal Relação de Lisboa, Coimbra, Porto, Évora e Guimarães).
1.3. Supreme Justice Court
Q042 (2019): Regarding Q 42.1 the decrease of the total number of first instance courts of general jurisdiction is accompanied by an increase of certain types of first instance courts (please consult answers provided to Q 43).
Regarding Q 42.2, the total corresponds to first instance specialised courts of judicial courts and administrative and tax courts. Under our Constitution, we have two set of courts: judicial courts, which have general jurisdiction in civil/commercial and criminal matters and encompass specialized courts, and administrative and tax courts, whose role is to settle disputes arising out of administrative and tax relations. These latter are specialised in this domain only.
In order to be rigourous and coherent with Q 43, we have included first instance administrative and tax courts. The total corresponds to 418 judicial courts + 17 administrative/tax courts.

Q042 (2018): These data correspond to the values given for the last scoreboard.
The differences registered result from the changes to the judicial organization (Law n. 40-A/2016, 22 December) in force since January 1, 2017.
42.1 the number of 1st instance courts with general jurisdiction decreased due to the increase of specialized courts. Accordingly, 20 courts that were closed in 2014 were re-enacted as proximity judgments, new family sections were created as well as new sections with generic jurisdiction.

Q042 (2017): The differences registered result from the changes to the judicial organization (Law n. 40-A/2016, 22 December) in force since January 1, 2017.
42.1 the number of 1st instance courts with general jurisdiction decreased due to the increase of specialized courts. Accordingly, 20 courts that were closed in 2014 were re-enacted as proximity judgments, new family sections were created as well as new sections with generic jurisdiction.

Q042 (2014): As a result of the new Judicial Organization Reform, the number of specialized first instance courts increased in 2014, while the enlargement of the court districts has been promoted. The reform melted the former judicial districts into 23 judicial districts, each containing two or more units, according to the demographic and economic reality of the respective geographic area. The difference between Q42.2 and Q43 is due to the inclusion of the 20 administrative courts in Q43. In Portugal, the administrative jurisdiction is autonomous, independent from the civil jurisdiction.

Q043 (General Comment): Q.43 -total:The number given under Q43.1.1 includes 17 first instance courts and 3 higher instance courts of administrative jurisdiction that are not included under Q.42.2. Administrative courts are part of another jurisdiction and under our law cannot be considered specialized courts.

Q043 (2024): We put the intelectual property court that was before under internet disputes in "other

Q043 (2020): «Commercial courts» deal with, inter alia, winding up of the company, insolvency and suspension and revocation of company resolutions.
«Internet related disputes»: only for Internet domain system (DNS) issues, which are under the jurisdiction of the Intelectual Property Court; for all other Internet related issues, general jurisdiction courts are competent. Internet related disputes were not included in the number of specialised courts for previous cycles.
«Other specialised courts": includes all other courts that are not listed in the categories above.
This category includes Civil Central Judicial Divisions, Criminal Central Judicial Divisions, Civil Local Proximity Judicial Divisions, Criminal Local Proximity Judicial Divisions, Petty Criminality Local; Proximity Judicial Divisions, Criminal Examination Judicial Divisions, Enforcement Judicial Divisions, Central Criminal Examination Court, Competition Court and Maritime Court.

Q043 (2019): This category includes Civil Central Judicial Divisions, Criminal Central Judicial Divisions, Civil Local Proximity Judicial Divisions, Criminal Local Proximity Judicial Divisions, Petty Criminality Local Proximity Judicial Divisions, Criminal Examination Judicial Divisions, Enforcement Judicial Divisions, Central Criminal Examination Court, Intelectual Property Court, Competition Court and Maritime Court.

Q043 (2018): Changes to the judicial organization (Law n. 40-A/2016, 22 December) are in force since January 1, 2017.

Q043 (2017): Changes to the judicial organization (Law n. 40-A/2016, 22 December) are in force since January 1, 2017.
Other specialised 1st instance courts include, among others: Criminal Instruction Courts, Maritime Courts; Intelectual Property and Competition Court; Enforcement Courts.
Law 31/2012, 14 August, put in force the Rent and tenancy section (Balcão Nacional do Arrendamento) that is functioning since 8
January 2013.

Q043 (2015): In 2013-2014, the Reform of the Portuguese Judicial system was implemented. One of the major goals of this reform was to set up specialised courts on a national level, which led to a significant increase of commercial courts compared to previous years.

The difference between Q42.2 and Q43 is due to the inclusion of the 20 administrative courts in Q43. In Portugal, the administrative jurisdiction is autonomous, independent from the civil jurisdiction and cannot be considered as specialised courts.

Other courts:
Other specialised 1st instance courts include: Criminal Instruction Courts, Maritime Courts; Intelectual Property and Competition Court; Enforcement Courts.
Law 31/2012, 14 August, put in force the Rent and tenancy section (Balcão Nacional do Arrendamento) that is functioning since 8 January 2013

Q043 (2014): In 2013-2014, the Reform of the Portuguese Judicial system was implemented. One of the major goals of this reform was to set up specialised courts on a national level, which led to a significant increase of commercial courts compared to previous years.

For 2014, the category "other" subsumes as in 2012 Criminal Instruction Courts, Maritime Courts, Intellectual Property and Competition Court and Enforcement Courts. Additionally, the Rent and tenancy section (Balcão Nacional do Arrendamento) has been established by law in August 2012 and is functioning since 8 January 2013.

Q044 (2024): We have included the Administrative Supreme Court as well as the 2nd instance administrative courts.

Q044 (2020): The difference between 2019 and 2020 is justified by the increase in new buildings.

Q044 (2018): Law n.º 19/2019, 19th February.
The recent amendments to the Law of the Organization of the Judiciary System are intended to ensure the reciprocal proximity of justice and citizens in two key segments: criminal jurisdiction and family and minors jurisdiction.
These new amendements aim to facilitate people's access to courts and combat the desertification of the interior regions of the country.

Q044 (2016): Law n.40-A/2016, 22 December and Decree-Law n. 86/2016, 27 December.
On the 1st of january 2017, 20 extinct districts were reopened, as well as 23 of the so-called proximity sections, in which judicial acts may now be concluded.

Romania

Q042 (General Comment): The number of „judecatorii" has decreased by one between 2019-2020 because the activity of Judecătoria Insuratei was suspended so it no longer appears in the statistics. 175 represent the first instance courts with general jurisdiction in this matter, even if tribunals, courts of appeal and the High Court may also judge first instance cases. Starting from 2020 the methodology of presentation of data changed and only "judecatorii" are counted as first instance courts of general jurisdiction, even if tribunals, courts of appeal and the High Court may also judge first instance cases

Q042 (2024): Law no. 304/2022 on the judicial organisation.

Q042 (2023): Law no. 304/2022 on the judicial organisation.

Q042 (2022): Law no. 304/2022 on the judicial organisation.
The number of „judecatorii" has decreased by one between 2019-2020 because the activity of Judecătoria Insuratei was suspended so it no longer appears in the statistics. 175 represent the first instance courts with general jurisdiction in this matter, even if tribunals, courts of appeal and the High Court may also judge first instance cases. Q043 (2023): Law no. 304/2022 on the judicial organisation.

Q043 (2022): Law no. 304/2022 on the judicial organisation.

Q043 (2020): Law no. 304/2004 on the judicial organisation.

Q044 (2024): It should be mentioned that some of the first instance specialised courts share the location with „judecatorii".

Q044 (2023): It should be mentioned that some of the first instance specialised courts share the location with „judecatorii".

Q044 (2022): It should be mentioned that some of the first instance specialised courts share the location with „judecatorii".

Q044 (2020): Law no. 304/2004 on the judicial organisation.
It should be mentioned that some of the first instance specialised courts share the location with „judecatorii".
Q044 (2014): According to 2014 data, a bill on closing 30 courts and 30 attached prosecution offices with low volume of work was initiated by the Ministry of Justice with the support of the Superior Council of Magistracy of Romania. The bill was rejected by the Parliament. The Superior Council of Magistracy seeks for alternative solutions for the reallocation of the resources.

Slovak Republic

Q042 (2024): There are 36 courts operating at first instance, including municpal and district courts. 8 regional courts operating at second instance.
1 Supreme Court. The 5 specialised courts are detailed in Q43.
Q042 (2023): There are 36 courts operating at first instance, including municpal and district courts. 8 regional courts operating at second instance.
1 Supreme Court. The 5 specialised courts are detailed in Q43.

Q042 (2022): The new Supreme Administravive Court - specialized court of higher instance was establish in 2021 and started its full work in 2022.
Q042 (2021): The changed answer in line 2 is due to the Supreme Administrative Court of the Slovak Republic, it was established from January 1, 2021 by Constitutional Act No. 422/2020.
Q042 (2020): The Constitutional Court is not included, since it was not included in previous cycles. Acoording to the explanatory note - "In some countries, other bodies can be referred to as courts. When they are not part of the regular judiciary system, they should not be considered here (e.g. courts of audits, constitutional courts when not dealing with individual cases but rather with questions of compliance with constitution and international law etc.)." In Slovak republic the Constitutional Court can deal with some rare individual cases.
Q042 (2019): The entire court system of the Slovak republic consists of 54 District Courts, 8 Regional Courts, The Specialized Criminal
Court and the Supreme Court of the Slovak republic.
Q042 (2018): The entire court system of the Slovak republic consists of 54 District Courts, 8 Regional Courts, The Specialised Criminal Court and
The Supreme Court of the Slovak republic
Q042 (2017): The court system of the Slovak republic consists of 54 District Courts, 8 Regional Courts, Specialised Criminal Court and Supreme Court of the Slovak republic
Q042 (2016): The court system of the Slovak republic consists of 54 District Courts, 8 Regional Courts, The Specialised Criminal Court and The Supreme Court of the Slovak republic
Q043 (General Comment): In the Slovak court system there are 8 Regional courts which are the courts with dual competence. The Regional courts are the courts of appeal with the general jurisdiction in the civil, commercial and the criminal cases. In the appellate procedure they decide the appeals lodged against the decisions of all 54 District courts within their local jurisdiction. At the same time the Regional courts have the jurisdiction as the courts of first instance in administrative matters. They act as the administrative courts.
The Specialized Criminal court is competent to judge the grave criminal matters enumerated in the § 14 of the Criminal procedure Code (e. g. premeditated murder, corruption, terrorism, organised crime, severe economic crimes, damaging the financial interests of the EU etc.). Highest instance courts are the Supreme Court, Supreme Administrative Court and the Constitutional Court.
Q043 (2021): The first instance administrative cases agenda is concentrated in eight regional courts, which also act as general courts of appeal. The question (43.) defines specialized courts as legal entities, so it cannot be understood that the administrative cases agenda is centralized on specialized courts as legal entities, but it is concentrated on 8 regional general courts. These 8 general regional courts are already legal entities included in Q42, line 1.2. Highest instance courts are the Supreme Court and the new Supreme Adminstrative Court.
Q043 (2020): The first instance administrative cases agenda is concentrated in eight regional courts, which also act as general courts of appeal. The question (43.) defines specialized courts as legal entities, so it cannot be understood that the administrative cases agenda is centralized on specialized courts as legal entities, but it is concentrated on 8 regional general courts. These 8 general regional courts are already legal entities included in Q42, line 1.2.

Q044 (2021): The Constitutional court is not included in Q44.
Q044 (2020): The Constitutional Court is not included in the 44 answer.
Q044 (2014): According to 2014 data, on 1st July 2016, the new Civil Litigious Procedure Code will enter into force. It introduces the so called “causal jurisdiction” of first instance courts. It means that certain types of civil claims will belong to the jurisdiction of only some of the first instance courts. This will apply e.g. for individual labour disputes, arbitration disputes, disputes arisen from bill of exchange etc.

Slovenia
Q042 (General Comment): First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
Second instance courts of general jurisdiction: 4 higher courts
Specialised courts: 3 labour courts (1st instance) + 1 labour and social court (1st instance) + 1 Administrative court (1st instance) + 1 Higher labour and social Court (2nd instance) = 6
Highest instance courts of general jurisdiction: The Supreme Court (also highest instance court for specialised courts)

Q042 (2018): First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
First instance specialised courts: 3 labour courts + 1 labour and social court + 1 Administrative court = 5
All courts: first instance courts of general jurisdiction (55, see Q42.1) + first instance specialised courts (4 labour courts + 1 social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of administrative court) + second instance courts and courts of appeal (4 higher courts of general jurisdiction + 1 higher labour and social court) + the Supreme court = 77.

Q042 (2017): First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
First instance specialised courts: 3 labour courts + 1 labour and social court + 1 Administrative court = 5
All courts: first instance courts of general jurisdiction (55, see Q42.1) + first instance specialised courts (4 labour courts + 1 social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of administrative court) + second instance courts and courts of appeal (4 higher courts of general jurisdiction + 1 higher labour and social court) + the Supreme court = 77.

Q042 (2016): First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
First instance specialised courts: 3 labour courts + 1 labour and social court + 1 Administrative court = 5
All courts: first instance courts of general jurisdiction (55, see Q42.1) + first instance specialised courts (4 labour courts + 1 social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of administrative court) + second instance courts and courts of appeal (4 higher courts of general jurisdiction + 1 higher labour and social court) + the Supreme court = 77.

Q042 (2015): legal entities:
First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
First instance specialised courts: 3 labour courts + 1 labour and social court + 1 administrative court = 5
geographic locations:
All the courts = 77
- first instance courts of general jurisdiction = 55 (Q42.1); additionally
- first instance specialised courts = 4 labour courts + 1 social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of administrative court = 16; additionally
- second instance courts and courts of appeal = 4 higher courts of general jurisdiction + 1 higher labour and social court = 5; and finally
- supreme court: the Supreme Court of the Republic of Slovenia = 1.

Q043 (General Comment): Although the given answer for 'labour courts' is 4 and 'insurance and/ or social welfare courts' at first instance is 1, the total number of these courts is 4, as one of the labour courts and the social court form a single legal entity – the Labour and social court in Ljubljana.
Concerning specialised courts – higher instances, although the given answer for 'labour courts' is 1 and 'insurance and/ or social welfare courts' is 1, the total number of these courts is 1, as they form a single legal entity – the Higher labour and social Court.

Q043 (2019): Please see general comment.

Q044 (General Comment): First instance courts: first instance courts of general jurisdiction (55, see Q42.1) + first instance specialised courts (4 labour courts and social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of the Administrative court) =70
All courts: In addition to above also 4 higher courts of general jurisdiction + 1 higher labour and social court + the Supreme court = 76.

Q044 (2018): A change in the organisation of first instance courts (judicial map), as well as first instance judges' position is being prepared by the Ministry of Justice - see Q208.

Q044 (2016): Ministry of Justice is preparing court network reform. Existent first instance court network is considered as inefficient and insufficient. The main goal of this reform is to set up a system, which could assure better quality and efficiency of adjudication, specialization of judges and even allocation of cases. Furthermore, reform still should assure proper access to the courts and financial efficiency. Ministry of Justice is also taking in consideration different system of the nomination of judges, nomination of Supreme Court judges and president of the Supreme Court. Existent nomination procedure of judges is too rigid and does not enable taking prompt actions when the post is vacant.

Q044 (2014): According to 2014 data, discussions about the reorganization of the structure of courts have been initiated. Following the CEPEJ Guidelines on the creation of judicial maps to support access to justice within a quality judicial system (CEPEJ(2013)7) the change should be gradual. The reduction in the number of courts regarding geographical locations is not foreseen, but reorganization in the powers of local courts that are organizational units of district courts might be needed. There are local courts that have only a few (3-5) judges, which is not rational in the sense of court management. Such local courts might start dealing only with certain kinds of cases, with other local courts in the same district dealing with other kinds of cases, having de facto specialized local courts.
Nevertheless, these changes are still in the initial debate phase, so no formal proposal can be presented yet.

Spain

Q042 (General Comment): In Spain, as general rule, the First Instance are unipersonal Courts: One Judge-courts. In Spain we have two types of specialization: Special Jurisdictions established by Organic Law (Violence against women, Commercial, for example), and the possibility for GCJ to determine that in some places, a general jurisdiction Court (Civil) is focused in some kind of cases.

Q042 (2023): In spain there is 1 Supreme Court with several Chambers. When attending the presentation of the report of 2024, we change this response to avoid missunderstandings.

Q043 (General Comment): The Arbitration Court was created by decision of the General Council of the Judiciary of 25 November 2010. The latter assigns exclusive jurisdiction over arbitration matters to the Court of First Instance No. 101 of Madrid. This measure seeks to foster the development of uniform criteria in court proceedings for the assistance and control of arbitration in Madrid.
In Spain, as general rule, the First Instance are unipersonal Courts: One Judge-courts. In Spain we have two types of specialization: Special Jurisdictions established by Organic Law (Violence against women, Commercial, for example), and the possibility for GCJ to determine that in some places, a general jurisdiction Court (Civil) is focused in some kind of cases.

Q043 (2024): Courts Labour specialised in enforcement; Courts on enforcement of Arbitration; Civil Registry; Courts on Penitentiary Surveillance; Courts for mortgage enforcement; Courts on capacity of persons; Criminal Courts of Violence against Women; other
There was an increase in the number of commercial courts.

Q043 (2023): Specialized Courts: Specialized Labor Enforcement Courts, Arbitration Enforcement Court, Penitentiary Surveillance Courts, Mortgage Enforcement Courts, Courts for Personal Capacity, Criminal Courts for Violence Against Women, other. The final number is lower than that of the previous year.

Q043 (2022): Courts Labour specialised in enforcement; Courts on enforcement of Arbitration; Civil Registry; Courts on Penitentiary Surveillance; Courts for mortgage enforcement; Courts on capacity of persons; Criminal Courts of Violence against Women; other

Q043 (2021): "Juzgados de lo Mercantil" are in Spain in charge of insovencies and commercial cases (both). So it cannot be separated commercial and insolvency.

Q043 (2020): Commercial courts - new units have been established.

Q043 (2019): Courts of violence against women 106
Foreclosure proceedings Courts: 3
Court of arbitration: 1
Civil capacity courts: 13
Criminal courts: 348
Criminal courts specialized in Violence against women, 31
Juvenile Courts: 82
Prison courts: 51
Civil Registries: 28

Q043 (2018): Between 2016 and 2018, more first instance courts have become specialized in family matters. Courts of violence against women: 106
Foreclosure proceedings Courts: 3
Court of arbitration: 1
Civil capacity courts: 12
Criminal courts: 341
Criminal courts specialized in Violence against women, 32
Juvenile Courts: 82
Prison courts: 51
Civil Registries: 28
Additionally (and they are not accounted) there are 26 military courts that are not part of the Judiciary but they are inspected by it)

Q043 (2017): -338 Criminal courts
-32 Criminal courts specialized in violence against women
-106 violence against women courts
-82 juvenile courts
-51 Prison courts
-3 foreclosure proceedings courts
-1 Arbitration court
-18 Civil Capacity courts
- 28 Civil register offices

Q043 (2016): - 335 Criminal courts
-30 Criminal courts specialized in violence against women
-106 violence against women courts
-83 juvenile courts
-51 Prison courts
-3 foreclosure proceedings courts
-1 Arbitration court
-18 Civil Capacity courts
- 28 Civil register courts

Q043 (2015): Other specialised courts include: 343 Penal courts; 23 Penal courts specialized in violence against women; 106 violence against women courts; 83 juvenile courts; 50 Prison courts; 3 foreclosure proceedings courts; 1 Arbitration court; 12 Civil Capacity courts and 28 Civil registry.

The Commercial Courts deal with insolvency issues.

Military Courts have not been accounted because they do not belong to the Judiciary (except the Supreme Court 5th room). There are other 26 Military Courts.

Q043 (2014): In 2014, the category “other” encompasses: 357 Penal courts; 23 Penal courts specialized in violence against women; 106 violence against women courts; 83 Juvenile courts; 50 Prison courts; 16 Courts for disabled people (capacity courts), 26 Civil Register Courts, 3 Foreclosure proceedings courts (mortgage courts); 1 Arbitration court. The Decanatos exclusive are not included in this exercise because these organs are not courts and have rather administrative nature.

Q044 (General Comment): One building usually houses different courts.

Q044 (2023): The latest data shows a slight decrease compared to previous figures. This could be attributed to the implementation of "Ciudades de la Justicia" (Justice Cities) in certain regions, like Andalusia. These "Justicie Cities" tend to group together in a single building, courthouses that were previously dispersed in several addresses.

Q044 (2018): The traditional structure of a Court includes a Judge (or Magistrate), a Judicial Counsellor, and several civil servants (the exact number depends on many circumstances). The New Judicial Office (Nueva Oficina Judicial)has been implemented in many territories and its development continues. The New Judicial Office (NOJ) has, as base, the called ‘Procedural Unit of Direct Support' (UPAD), a small office with personnel necessary for the strict aid of the work of the Judge. On the other hand, and for the uniform processing of repetitive tasks, the called Common Procedural Services have been created. The Judicial Counsellor is the Director of these services, and is responsible of processing the phase of the judicial file of a strictly procedural nature.

Q044 (2016): The traditional structure of a Court includes a Judge (or Magistrate), a Lawyer of the Administration of Justice, and several civil servants (the exact number depends on many circumstances). The New Judicial Office (Nueva Oficina Judicial) has been implemented in many territories and its development continues. The New Judicial Office (NOJ) has, as base, the called ‘Procedural Unit of Direct Support' (UPAD), a small office with personnel necessary for the strict aid of the work of the Judge. On the other hand, and for the uniform processing of repetitive tasks, the called Common Procedural Services have been created. The Lawyer of the Administration of Justice is the Director of these services, and is responsible of processing the phase of the judicial file of a strictly procedural nature.

Q044 (2014): On the occasion of the 2014 evaluation, the attention was drawn on the deployment in the entire country of the Judicial Office, the new model for organising courts of law and the creation of the Instance Courts (Tribunales de Instancia), a new model of collegial courts aimed at replacing local courts belonging to the same judicial district.

Indicator 2: The judicial organisation

Question 044.

Question 042

Austria

Q042 (2024): In 2024 in Austria, the number of courts considered as legal entities is 150. Namely, there are 131 courts of general jurisdiction and 19 specialised courts. Among the 131 legal entities of general jurisdiction, 126 act at first instance, 4 at second instance and one at third instance. More precisely, the 113 District courts and the 13 Regional courts of general jurisdiction intervene as first instance courts. It is noteworthy that the 6 other regional and 1 district court that have specialised jurisdiction are not taken into consideration here, but are counted as specialised first instance courts (infra). It is to be mentioned that the peculiarity of the 20 Austrian Regional courts is that even though these are first instance courts, some of them are also competent in respect of appeals against District courts' decisions. The 4 Higher Regional Courts have appeal competence in respect of all civil and criminal cases. The Supreme court is the highest instance court in civil and criminal matters.

Q042 (2023): In 2023 in Austria, the number of courts considered as legal entities is 150. Namely, there are 131 courts of general
jurisdiction and 19 specialised courts. Among the 131 legal entities of general jurisdiction, 126 act at first instance, 4 at second instance and one at third instance. More precisely, the 113 District courts and the 13 Regional courts of general jurisdiction intervene as first instance courts. It is noteworthy that the 7 other regional courts that have specialised jurisdiction are not taken into consideration here, but are counted as specialised first instance courts (infra). It is to be mentioned that the peculiarity of the 20 Austrian Regional courts is that even though these are first instance courts, some of them are also competent in respect of appeals against District courts' decisions. The 4 Higher Regional Courts have appeal competence in respect of all civil and criminal cases.
The Supreme court is the highest instance court in civil and criminal matters.

Q042 (2022): In 2022 in Austria, the number of courts considered as legal entities is 152. Namely, there are 133 courts of general
jurisdiction and 19 specialised courts. Among the 133 legal entities of general jurisdiction, 128 act at first instance, 4 at second instance and one at third instance. More precisely, the 115 District courts and the 13 Regional courts of general jurisdiction intervene as first instance courts. It is noteworthy that the 7 other regional courts that have specialised jurisdiction are not taken into consideration here, but are counted as specialised first instance courts (infra). It is to be mentioned that the peculiarity of the 20 Austrian Regional courts is that even though these are first instance courts, some of them are also competent in respect of appeals against District courts' decisions. The 4 Higher Regional Courts have appeal competence in respect of all civil and criminal cases.
The Supreme court is the highest instance court in civil and criminal matters.

Q042 (2020): In 2020 in Austria, the number of courts considered as legal entities is 152. Namely, there are 133 courts of general jurisdiction and 19 specialised courts. Among the 133 legal entities of general jurisdiction, 128 act at first instance, 4 at second instance and one at third instance. More precisely, the 115 District courts and the 13 Regional courts of general jurisdiction intervene as first instance courts. It is noteworthy that the 7 other regional courts that have specialised jurisdiction are not taken into consideration here, but are counted as specialised first instance courts (infra). It is to be mentioned that the peculiarity of the 20 Austrian Regional courts is that even though these are first instance courts, some of them are also competent in respect of appeals against District courts' decisions. The 4 Higher Regional Courts have appeal competence in respect of all civil and criminal cases.
The Supreme court is the highest instance court in civil and criminal matters.

Q042 (2014): From January 1st 2013 to July 1st, 2014 a number of district courts merged. In 2014, there are 129 first instance district courts which is less than 132 (number communicated for 2013) but still not complying with the aim of 115.

Belgium

Q042 (General Comment): The reform of the Justices of the peace, involving a reduction in geographic locations, was consolidated by the law of 25th December 2017. The implementation of the reform took place between 2016 and 2019.

"1.1 First instance courts of general jurisdiction - legal entities": 13 first-instance courts, 162 Justices of the peace and 15 police courts. As for the assize courts governed by Articles 114 et seq. of the Judicial Code, due to their specific nature, they are not considered legal entities within the meaning of the CEPEJ and are not included in the table. In principle, the assize court sits in the capital of the various provinces and in the administrative district of Brussels-Capital. Thus, it sits in Antwerp, Arlon, Bruges, Brussels, Ghent, Liège, Leuven, Mons, Namur, Nivelles, or Tongeren, depending on the circumstances (Article 115 of the Judicial Code). There are therefore 11 assize courts in Belgium.

"1.2 Second instance courts of general jurisdiction - legal entities" : there are five appellate courts ; however, it should be mentioned that the 13 first-instance courts also act as appellate courts with regard to decisions made by the justices of the peace.

Starting from 2022, both justices of the peace and police courts are included under courts of general jurisdiction. In previous cycles, they were categorized as specialized first-instance courts. The assize courts were taken into account from 2020 to 2023, but starting from 2024, due to their specific nature (they do not sit permanently) they are no longer included in the table as first instance courts of general jurisdiction.

Given that the Council of State (Conseil d'Etat) acts both at first instance level and on appeal, it has been accounted for under both columns Q43 but only once within the total of Q42.2.

Q042 (2024): Point "1.2 Second instance courts of general jurisdiction - legal entities": only the five courts of appeal are listed here, even though the 13 first instance courts also have jurisdiction to hear appeals against decisions of justices of the peace. Point "2. Total number of specialised courts - legal entities": labor courts are included under "specialized courts of second instance." From 2024 onwards, due to their specific nature, the 11 assize courts that do not sit permanently are no longer included in the table as first instance courts of general jurisdiction.

Q042 (2023): Point "1.2 Second instance courts of general jurisdiction - legal entities": only the 5 courts of appeal have been indicated here, but the 13 courts of first instance also have jurisdiction to hear appeals against decisions of the justices of the peace.
Point 2: Labour courts are included under 'specialised courts of second instance'.

Q042 (2022): 1.2. Second instance courts of general jurisdiction – legal entities : only the 5 courts of appeal have been mentioned here, but the 13 first instance courts also have jurisdiction to hear appeals against decisions of the Justices of the peace.

Q042 (2021): 1.1 First instance courts of general jurisdiction: 13 first instance courts, 162 Justices of the peace, 11 Assize courts (one per province and two in Brussels) and 15 Police courts.
1.2 Second instance courts of general jurisdiction: 5 Courts of appeal (the 13 first instance courts that rule as appeal courts on the decisions of the Justices of the peace are taken into consideration only within line 1.1).
As for the previous evaluation round (2020 data), Justices of the peace and Police courts are counted as courts of general jurisdiction. Before 2020, they were categorized as specialized courts of first instance. As of 2020, the 11 Assize courts are also included in the data. Insofar as the Council of State (Conseil d'Etat) intervenes both in first instance and on appeal, it has been taken into account in both columns of Q43, but only once in the total of Q42.2.
It is worth mentioning that the Assize courts are not structural entities (they are not permanent); they are organised within the Courts of appeal. The Assize court is constituted whenever the Investigation Chamber of the respective Court of appeal (Chambre des mises en accusation) refers a case to that court - the Assize court.
All courts in Belgium (except the Court of cassation) are grouped into 49 legal entities (steering committees).

Q042 (2020): "1.1 First instance Courts of general jurisdiction: 13 first instance courts, 162 justices of the peace, 11 assize courts (one per province and two in Brussels) and 15 police courts. "Second instance Courts of general jurisdiction": 13 courts of first instance that rule as appeal courts on the decisions of the justices of the peace and 5 appeal courts.
Vertical consistency in the table is not ensured, as the 13 courts of first instance with dual jurisdiction (1 and 2 instances) have been counted only once in the totals.
For the current evaluation round (2020 data), justices of the peace and police courts are counted as general courts. In previous cycles, they were categorized as specialized courts of first instance. As of 2020, the 11 assize courts are also included in the data. Insofar as the Conseil d'Etat intervenes both in first instance and on appeal, it has been taken into account in both columns of Q43, but only once in the total of Q42.2."

Q042 (2017): The law of 25 December 2017 amended the number of cantons of justices of the peace from 187 to 162. The implementation of this reform will take place until 2019.

Q042 (2016): A reform of the justices of the peace is under way, leading to a reduction in the number of hearing locations.

Q042 (2014): Following a reform of the judicial map, the number of legal entities decreased: from 27 to 13 first instance courts, from 27 to 9 labour courts, from 27 to 9 commercial courts, and from 34 to 15 police courts.

Bulgaria

Q042 (General Comment): There are the following courts in Bulgaria: District Courts- 113- The District Court is the main court of first instance. It has jurisdiction over all cases except those which are statutorily assigned to another court. It deals with civil, criminal and administrative-criminal cases. The decisions of the district courts are subject to appeal before the respective Regional court. Provincial/Regional Courts- 28- The Provincial Courts act as courts of first and second instance. As courts of first instance, they examine a precisely defined category of cases involving significant sums or substantial societal interest. When acting as a second (appellate) instance, they re-examine decisions taken by the district courts. Administrative Courts- 28, Courts of Appeals - 5, MilitaryCourts - 3 - The Military courts consider criminal cases of crimes committed by servicemen or officials of the Interior Ministry at first instance. Military Court of Appeal - 1 Supreme Court of Cassation - 1 Supreme Administrative Court - 1

Q042 (2024): 1.1 First instance courts of general jurisdiction - legal entities- district courts
1.2 Second instance courts of general jurisdiction - legal entities- regional and appellate courts
Regional courts are courts of first instance for a certain category of cases and courts of second instance for another category of cases. Here, they are included in the number of courts of second instance with general jurisdiction as the decisive indicator used being the number of incoming cases
1.3 Highest instance courts of general jurisdiction - legal entities- Supreme Court of Cassation
2 Total number of specialised courts - legal entities– Supreme Administrative Court, military appellate, administrative, military courts

Q042 (2023): Regional courts are courts of first instance for a certain category of cases and courts of second instance for another category of cases. In this case, they are included in the number of courts of second instance with general jurisdiction as the decisive indicator used being the number of incoming cases

Q042 (2022): Regional/ Provincial courts are courts of first instance for a certain category of cases and courts of second instance for another category of cases. In this case, they are included in the number of courts of second instance with general jurisdiction, the decisive indicator used is the number of incoming cases.

Q042 (2020): Judiciary System Act
Article 65
All courts are legal entities funded by the budget and shall be represented by the administrative head or another designated person. In the discharge of the functions of administrative head, orders, instructions and rules shall be issued in accordance with the statutory competence. The general assembly, the plenum of the Supreme Cassation Court and the Plenum of the Supreme Administrative Court shall be bodies of the respective court, which rule only in the cases specified in the law, give opinions, adopt rules and decisions by open ballot and a majority of more than half of the judges present.

Q042 (2019): There are the following courts in Bulgaria: District Courts- 113- The District Court is the main court of first instance. It has jurisdiction over all cases except those which are statutorily assigned to another court. It deals with civil, criminal and administrative-criminal cases. The decisions of the district courts are subject to appeal before the respective Regional court.
Provincial/Regional Courts- 28- The Provincial Courts act as courts of first and second instance. As courts of first instance, they examine a precisely defined category of cases involving significant sums or substantial societal interest. When acting as a second (appellate) instance, they re-examine decisions taken by the district courts.
Administrative Courts- 28
Specialized Criminal Court -1
Courts of Appeals - 5
Specialized Court of Appeal - 1
MilitaryCourts - 3 - The Military courts consider criminal cases of crimes committed by servicemen or officials of the Interior Ministry at first instance.
Military Court of Appeal - 1
Supreme Court of Cassation - 1
Supreme Administrative Court - 1

Q042 (2018): 42.1. District Court - 113
The District Court is the main court of first instance. It has jurisdiction over all cases except those which are statutorily assigned to another court. It deals with civil, criminal and administrative-criminal cases. The decisions of the district courts are subject to appeal before the respective Regional court.
Provincial/ regional courts- 28
The provincial courts act as courts of first and second instance. As courts of first instance, they examine a precisely defined category of cases involving significant sums or substantial societal interest. When acting as a second (appellate) instance, they re-examine decisions taken by the district courts.
Military first instance courts- 3
Military courts consider criminal cases of crimes committed by servicemen or officials of the Interior Ministry at first instance.

Croatia

Q042 (General Comment): The reform of judicial map implemented in 2015 decreased the number of Misdemeanour Courts from 63 to 22. Therefore, in accordance with the Act on Territorial Jurisdiction and Seats of Courts (Official Gazette, No. 128/14) in force, there are currently 22 Misdemeanour Courts in function. On the 1st of January 2019. new Courts Areas and Seats Act came into force. From the organizational aspect, the most important organizational measure was the merging of misdemeanor courts into municipal courts, and few municipal courts were reopened after 2015. That is why we have now less first instance specialized courts than in 2018. and more courts of general jurisdiction (22 courts which were in 2018. plus 8 courts which were reopened after the new law came into force).

Q042 (2020): On the 1st of January 2019. new Courts Areas and Seats Act came into force.From the organizational aspect, the most important organizational measure was the merging of misdemeanor courts into municipal courts, and few municipal courts were reopened after 2015. That is why we have now less first instance specialized courts than in 2018. and more courts of general jurisdiction (22 courts which were in 2018. plus 8 courts which were reopened after the new law came into force).

Q042 (2019): On the 1st of January 2019. new Courts Areas and Seats Act came into force.From the organizational aspect, the most important organizational measure was the merging of misdemeanor courts into municipal courts, and few municipal courts were reopened after 2015. That is why we have now less first instance specialized courts than in 2018. and more courts of general jurisdiction (22 courts which were in 2018. plus 8 courts which were reopened after the new law came into force).

Q042 (2016): There was a reform of judicial map implemented in 2015 in which the number of Misdemeanour Courts has decreased from 63 to 22. Therefore, in accordance with the Act on Territorial Jurisdiction and Seats of Courts (Official Gazette, No. 128/14) in force, there are currently 22 Misdemeanour Courts in function.

Q042 (2014): In 2014, according to the Act on Territorial Jurisdiction and Seats of Courts, there are 67 first instance courts but the Municipal Court in Novi Zagreb is not in function while the Municipal Criminal Court in Zagreb is a specialized court counted in Q42.2. Accordingly, there are 65 actually functioning first instance courts of a general jurisdiction.

Cyprus

Q042 (2023): An appeal Court and a Supreme Constitutional Court were established.

Q042 (2020): Cyprus has a two-tier system, therefore the Supreme Court is the second, highest and final instance court. The data for Supreme Court in this question are included in the highest instance courts, but the case flow data of the Supreme Court are included in the second instance cases - questions 97 and 98.

Q042 (2017): x

Q042 (2014): The number of courts changed in 2014. Instead one labour court in the district of Nicosia, there are 3 separate courts in different districts. This applies as well as for rent and tenancies court. One more family court was also established. The Assize court deals with serious criminal offences only.

Czech Republic

Q042 (2024): 2. Supreme Administrative Court

Q042 (2023): 2. Supreme Administrative Court

Q042 (2022): 2. Supreme Administrative Court

Q042 (2021): 2. Supreme Administrative Court

Q042 (2020): 2. Supreme Administrative Court

Q042 (2017): There are no specialised first instance courts, but judges within individual courts are specialised (e.g. for family, labour and enforcement cases at district courts, and insolvency and administrative cases at regional courts as first instance courts).

Q042 (2016): There are no specialised first instance courts, but judges within individual courts are specialised (e.g. for family, labour and enforcement cases at district courts, and insolvency and administrative cases at regional courts as first instance courts).

Denmark

Q042 (General Comment): District courts are called 1st instance courts, the Land Registration court and the Maritime and Commercial Court are considered as first instance specialized courts. Second and third instance courts are the two High Courts and the Supreme Court.

Q042 (2024): The specialised courts include the Land Registration Court and the Maritime and Commercial Court.

Q042 (2023): The specialised courts include the Land Registration Court and the Maritime and Commercial Court.

Q042 (2021): Under "2" is Land Registration Court and Maritime and Commercial Court. In 4 is beside the 24 district courts 4 biting court houses.

Q042 (2019): Commercial and naval court
Land Registration court.

Q042 (2018): Data has not changed on this point.

Q042 (2017): District courts are called 1st instance courts, the Land Registration court and the Maritime and Commercial Court are considered as first instance specialized courts. Second and third instance courts are the two High Courts and the Supreme Court.

Estonia

Q042 (General Comment): Estonia has 17 courthouses of county courts (first instance courts), 4 courthouses of administrative courts (first instance courts), 2 courthouses of appellate courts (second instance courts) and 1 courthouse of the Supreme Court (highest instance court), all together 24 courthouses. However, as some of the courts are situated in the same house (e.g Tallinn Administrative Court and Tallinn Circuit Court) and taking into account the fact that Pärnu County Court has a courthouse that is divided between two locations, there are 20 actual geographical locations of Estonian courts.

Q042 (2019): A small courthouse was adjoined with another small courthouse. The distance between them was less than 50 km.

Q042 (2016): A small courthouse was adjoined with another small courthouse. The distance between them was less than 50 km.

Finland

Q042 (General Comment): In Finland, there are 20 district courts with 36 offices, five courts of appeal, the Supreme Court, six administrative courts, the Supreme Administrative Court, the Market Court, the Labour Court and the Insurance Court. One of the administrative courts, the Labour Court and the Market Court are located in the same location. In total there are 36 courts in 52 geographic locations.

Q042 (2021): The number of district courts was reduced at the re-structuring on 1.1.2019

Q042 (2020): The number of district courts was reduced at the re-structuring on 1.1.2019.

Q042 (2019): The Court Network has been modified.

Q042 (2016): Some geographic locations of the District Courts have been shut down.

Q042 (2014): In 2014, in Finland there are 81 courts as geographic locations, namely 27 District Courts, 13 Branch offices of District Courts, 25 Auxiliary courtrooms of District Courts (23 till 2014), 3 specialized courts, 6 Administrative Courts (8 till 2014), 5 Courts of Appeal (6 till 2014), the Supreme Court and the Supreme Administrative Court.

France

Q042 (2024): First instance courts of general jurisdiction = 164 district courts (tribunaux judiciaires) + 4 courts of first instance. Police courts (167), criminal courts (168), and assize courts (104) are not counted as separate legal entities.
Second instance courts of general jurisdiction = 36 courts of appeal + 1 Superior Court of Appeal of Saint-Pierre-et-Miquelon. Assize courts of appeal are not counted as separate legal entities (104).

Q042 (2021): 1.1 : 164 TJ + 4 TPI
1.2 : 30 Courts of appeal in mainland France + 6 Courts of appeal in overseas France + 1 Superior Court of Appeal in Saint Pierre and Miquelon = 37
1.3: the Court of Cassation
Source DSJ

Q042 (2020):
There are 168 first instance courts of general jurisdiction, 37 second instance courts of general jurisdiction, and 1 highest instance court of general jurisdiction in the French judicial system.

Q042 (2019): See the comment on specialised first instance courts in the frame of Q43.

Q042 (2018): With regard to the ordinary courts, the number indicated in the 2016 questionnaire includes the local courts that have been abolished since 1 July 2017 (Act No. 2011-1862 of 13 December 2011), their powers having been taken over by the courts of first instance in civil matters and by the police courts attached to the courts of first instance in criminal matters.
The number of 786 corresponded to: 164 TGI + 4 TPI + 307 TI + 311 jprox Since then, TIs have been removed from the category of ordinary courts of first instance since they constitute specialised courts of first instance. The number of 479 ordinary courts of first instance therefore corresponded to 164 TGI + 4 TPI + 311 TPROX. The figure of 168 is thus explained by the abolition of the 311 local courts since 1 July 2017, as indicated in the comments in the questionnaire.
Thus: 479 - 311 = 168 ordinary courts of first instance (164 TGI + 4 TPI).

Germany

Q042 (General Comment): Even though the German legal system generally knows three instances (first instance, appeal on questions of fact and law, appeal on questions of law only), the different kinds of courts do not correspond directly to the stages of appeal. Local courts (Amtsgerichte) are first instance courts with the regional courts (Landgerichte) as next stage of appeal (exceptions apply in family matters). However, regional courts do not only serve as second instance courts but also deal with first instance cases. Whether a case is initially dealt with at a local or regional court depends (among other things) on the value at dispute (civil cases) or on the kind of the suspected offence (criminal cases). Similarly the higher regional courts may serve as second instance courts (for cases that were initially dealt with at regional courts or for cases in family matters) and as highest instance courts for cases that were initiated at the local courts (especially in criminal cases). In some specific cases, higher regional courts may also be courts of first instance.
The constitutional courts of the federal states and the Federal Constitutional Court (Bundesverfassungsgericht) are not part of the stages of appeal. Constitutional jurisdiction is also seen as separate from general and specialised jurisdiction. Constitutional courts review legislation with regard to constitutional provisions. The Federal Constitutional Court mainly assess alleged violations of base rights by public authorities. However, in order to have access to the constitutional courts, the regular path of legal proceedings must generally be exhausted.

Q042 (2024): 1.1 First instance courts include: 637 local courts, 115 regional courts
1.2 Second instance courts include: 24 higher regional courts and the bavarian highest regional court
1.3 Highest instance courts include: Federal Supreme Court
2. The total number of specialised courts includes administrative, labour, financial, and social courts as well as the Federal Patent Court.

Q042 (2023): 1.1 First instance courts include: 637 local courts, 115 regional courts
1.2 Second instance courts include: 24 higher regional courts and the bavarian highest regional court
1.3 Highest instance courts include: Federal Supreme Court
2. The total number of specialised courts includes administrative, labour, financial, and social courts as well as the Federal Patent Court.

Q042 (2022): 1.1 First instance courts include: 638 local courts, 115 regional courts
regional courts handle first as well as second instance cases. In 2022, regional courts registered 300 266 incoming first instance cases and 68 876 incoming second instance cases (civil and criminal matters). For further information see General Comment.
1.2 Second instance courts include: 24 higher regional courts
higher regional courts handle second and third instance cases as well as certain (few) first instance cases. Higher regional courts are the third and final instance with regard to criminal cases, that were originally initiated at the local courts. In 2022, higher regional courts recorded 72 201 incoming second instance cases (excluding family matters) and 4 761 incoming third/last instance cases. For further information see General Comment.
1.3 Highest instance courts include: Federal Surpreme Court
2. The total number of specialised courts includes administrative, labour, financial, and social courts as well as the Federal Patent Court.
Discrepancy in comparison to the 2022-2020 cycle:
regional courts were originally counted twice as first instance and second instance courts. Higher regional courts were counted as second instance courts. This was changed during the 2023-2021 cycle (EU-Scoreboard). The regional courts and higher regional courts are now placed according to the number of incoming cases as outlined in the explanatory note.
In previous cycles, the total number of specialised courts included 16 constitutional courts of the federal states as well as the Federal Constitutional Court. In the current cycle, these courts are no longer included as they are mostly seen as seperate from the ordninary justice system (for further information please refer to the general comment).

Q042 (2021): 1.1 First instance courts include: 638 Local Courts, 115 Regional Courts
Regional Courts handle first as well as second instance cases. In 2021, Regional Courts registered 344 128 incoming first instance cases and 75 400 incoming second instance cases (civil and criminal matters). For further information see General Comment.
1.2 Second instance courts include: 24 Higher Regional Courts
Higher Regional Courts handle second and third instance cases as well as certain (few) first instance cases. Higher Regional Courts are the third and final instance with regard to criminal cases, that were originally initiated at the Local Courts. In 2021, Higher Regional Courts recorded 102 029 incoming second instance cases and 5 089 incoming third/last instance cases. For further information see General Comment.
1.3 Highest instance courts include: Federal Surpreme Court
The total number of specialised courts includes 16 Constitutional Courts of the Länder.

Q042 (2020): 1.1 First instance courts include: 638 Local Courts, 115 Regional Courts
1.2 Second instance courts include: 115 Regional Courts, 24 Higher Regional Courts
1.3 Highest instance courts include: 24 Higher Regional Courts, Federal Surpreme Court
The vertical consistency is not fulfilled, since the 115 Regional Courts appear as "First instance courts" (1.1) as well as "Second instance courts" (1.2) and 24 Higher Regional Courts appear as "Second Instance Courts"(1.2) as well as "Highest Instance Courts" (1.3).
For further information please consult the General Comment.
The total number of specialised courts includes 16 Constitutional Courts of the Länder.

Greece

Q042 (2024): The consolidation of magistrates' and first instance courts resulted in the abolition of all magistrates'courts.The magistrates' court courthouses, which were located in the same places as the first instance courts have been closed down. Their facilities are now serving as additional installations for the relevant first instance courts.As regards the 50 magistrates' courts, these have been transformed into regional seats for the first instance courts, while the remaining have been closed. The basic principle of the new spatial restructuring of the courts is that each regional unit (former administrative "Prefecture") will have a central Court of First Instance, to which all the judges of this Prefecture (former Magistrates'' as well as First Instance Court Judges) will receive permanent positions. Exceptions are valid for border regions or island regions due to constitutional provisions (thus prefectures in Thrace, Northern Macedonia, Western Macedonia regions and Aegean islands, where the rule of one first instance court per administrative prefecture does not apply) .
The total number of the First Instance Courts in Greece before the adoption of Law 5108/2024 was 63. 56 of them are now First Instance Courts and 7 that are considered as "parallel" court seats to the (central) Courts - since there were previously some Prefectures where two or more First Instance Courts co-existed, providing full jurisdiction. Thus, delocalization and simplification of the first instance is achieved and, at the same time, better and more direct access to justice for citizens is provided. According to the new framework, lawyers and citizens can submit documents/claims either to the central or the regional/parallel courts (not independent judicial structures), since there is only one first Instance court in each administrative Prefecture, served by one or more premises.

Q042 (2020): In highest instance courts include the Supreme Court(Areios Pagos). In First instance courts of general jurisdiction are included in the number 259, 196 local and District Criminal Courts and 63 courts of first degree.

Hungary

Q042 (General Comment): The Hungarian court system is as follows: Kúria (1) – the Hungarian Supreme Court - its jurisdiction in criminal, civil and administrative cases covers adjudication of extraordinary remedies and appeals, adopting uniformity decisions. It also decides if municipal decrees are in compliance with higher level legislation. Regional courts of appeal (5) – their jurisdiction in criminal and civil cases covers the adjudication of appeals received from the regional courts (third instance in criminal cases). Regional courts (20) – their jurisdiction in criminal, civil and administrative cases covers the adjudication of appeals received from district courts, administrative and labour courts, and procedure at first instance in certain criminal and civil cases. District courts (113) – their jurisdiction in criminal and civil cases covers the procedures at first instance. The number of judges in the largest district court is 357, whereas the smallest court operates with one judge. Out of the 113 district courts, the district courts in the seat of the regional courts have special competences in many cases.

Q042 (2020): The Hungarian court system is as follows: Kúria (1) – the Hungarian Supreme Court - its jurisdiction in criminal, civil and administrative cases covers adjudication of extraordinary remedies and appeals, adopting uniformity decisions. It also decides if municipal decrees are in compliance with higher level legislation. Regional courts of appeal (5) – their jurisdiction in criminal and civil cases covers the adjudication of appeals received from the regional courts (third instance in criminal cases). Regional courts (20) – their jurisdiction in criminal, civil and administrative cases covers the adjudication of appeals received from district courts, administrative and labour courts, and procedure at first instance in certain criminal and civil cases. District courts (113) – their jurisdiction in criminal and civil cases covers the procedures at first instance. Out of the 113 district courts, the district courts in the seat of the regional courts have special competences in many cases. Administrative and labour courts (20) were dismissed on the 31st of March 2020. From this date Regional Courts deal with labour cases on first instance while administrative cases are dealth with by eight Regional Court on a regional level.

Q042 (2019): 113 District Courts (first instance courts of general jurisdiction)
20 Administrative and Labour Courts (specialized first instance courts)
20 Regional Courts (second instance courts of general jurisdiction + first instance courts in cases of higher importance)
5 Regional Courts of Appeal (second instance courts in cases of higher importance)
1 Supreme Court ("Kúria" - special judicial review)
It has to be noted that Administrative and Labour Courts are merged into the regional courts on the 31st of March 2020. Since 1st of April 2020 every regional court deals with labour cases on first instance (second instance are the regional courts of appeal) and 8 regional courts have special administrative law department dealing with first instance cases (seconf instance is the Supreme Court).

Q042 (2018): Two new district courts were established (one in 2017 in the city of Szigetszentmiklós, another one in 2019 in the city of Érd).
113 District Courts (first instance courts of general jurisdiction)
20 Administrative and Labour Courts (specialized first instance courts)
20 Regional Courts (second instance courts of general jurisdiction + first instance courts in cases of higher importance)
5 Regional Courts of Appeal (second instance courts in cases of higher importance)
1 Supreme Court (special judicial review)

Q042 (2017): All courts include :
112 District Courts
20 Regional Courts
20 Administrative and Labour Courts
5 Regional Courts of Appeal
1 Supreme Court (Kúria)
The Hungarian court system is as follows: Kúria (1) – the Hungarian Supreme Court - its jurisdiction in criminal, civil and administrative cases covers adjudication of extraordinary remedies and appeals, adopting uniformity decisions. It also decides if municipal decrees are in compliance with higher level legislation. Regional courts of appeal (5) – their jurisdiction in criminal and civil cases covers the adjudication of appeals received from the regional courts (third instance in criminal cases). Regional courts (20) – their jurisdiction in criminal, civil and administrative cases covers the adjudication of appeals received from district courts, administrative and labour courts, and procedure at first instance in certain criminal and civil cases. District courts (112) – their jurisdiction in criminal and civil cases covers the procedures at first instance. The number of judges in the largest district court is 357, whereas the smallest court operates with one judge. Out of the 111 district courts, the district courts in the seat of the regional courts have special competences in many cases. Administrative and labour courts (20) – their jurisdiction covers procedures at first instance in individual and collective labour disputes and in administrative cases. First instance administrative and labour courts (20) started operating on 1 January 2013 as first instance specialized courts. Thus from this date the number of first instance courts of general jurisdiction is 112.

Ireland

Q042 (General Comment): In Ireland, there are only three first instance courts (as legal entities) exercising general jurisdiction for the entire State (the High Court, the Circuit Court and the District Court). Each of those three courts has a single court president only, who exercises a nationwide remit for his/her court. The number of geographic locations reflects the physical location serving as seats or venues for the three jurisdictions.

Q042 (2024): For the purpose of this section, we have included each court only once, whether or not that court has both first and second instance jurisdiction.
First Instance courts of general jurisdiction – District Court, Circuit Court, High Court
Second Instance courts of general jurisdiction – Court of Appeal
Highest Instance courts of general jurisdiction – Supreme Court
Specialised Courts – Special Criminal Courts

Q042 (2023): For the purpose of this section, we have included each court only once, whether or not that court has both first and second instance jurisdiction.
First Instance courts of general jurisdiction – District Court, Circuit Court, High Court
Second Instance courts of general jurisdiction – Court of Appeal
Highest Instance courts of general jurisdiction – Supreme Court
Specialised Courts – Special Criminal Courts

Q042 (2016): The specialised courts referred to are the two Special Criminal Courts the jurisdiction of which generally relates to trial of terrorism- and organised crime-related offices.
The increase of one location over the figure provided for 2014 refers to the temporary relocation of the Dublin District Court's Drug Treatment Court in 2016.

Italy

Q042 (2023): The decrease in the number of courts is due to the fact that some Offices of the Justice of Peace closed in 2023.

Q042 (2018): In 2012-2013 we went through a major reform of the judicial map. In particular, a great number of justice of peace offices (initially 846) were shut down. However, each Italian municipality had (and still has) the opportunity to preserve the office at their own expenses. For this reason, each year a series of Justice of Peace offices administered by the municipality might be re-opened or closed. 3 justice of peace offices closed between 2017 and 2018.

Q042 (2017): In 2012-2013 we went through a major reform of the judicial map. In particular, a great number of justice of peace offices (initially 846) were shut down. However, each Italian municipality had (and still has) the opportunity to preserve the office at their own expenses. For this reason, each year a series of Justice of Peace offices administered by the municipality might be re-opened or closed.

Latvia

Q042 (2024): Total number of specialised courts - legal entities - There is indicated one Administrative district Court, one Administrative Regional Court (appeal instance) and one Economic Court. There is a specialised court which cannot be listed as a court of any instance - the Constitutional Court, which within the jurisdiction specified in the Constitution of the Republic of Latvia and Constitutional Court Law shall adjudicate matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it by Constitutional Court Law.

Q042 (2023): 1.1. First instance courts of general jurisdiction - legal entities- comparing with 2022 data there is a small difference, because in 2023 Rezekne Court and Daugavpils Court were merged in one Latgale District Court.
2. Total number of specialised courts - legal entities - There are indicated 1 Administrative district Court, 1 Administrative Regional Court (appeal instance) and 1 Economic Court. There is a specialised court which cannot be listed as a court of any instance - the Constitutional Court, which within the jurisdiction specified in the Constitution of the Republic of Latvia and Constitutional Court Law shall adjudicate matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it by Constitutional Court Law.

Q042 (2022): "1.1 First instance courts of general jurisdiction - legal entities": in 2022, three courts were merged into one, creating the Riga City Court.
In Latvia, the two administrative courts and the Economic court are considered as courts of general jurisdiction, but according to the CEPEJ methodology, data are inserted in line 2 "Total number of specialized courts".

Q042 (2021): In the total number of specialised courts - legal entities are included 1 Administrative court, 1 Administrative Regional (appeal) Court and 1 Economic Court, what was created and started operates from 31.03.2021. in Latvia. From 01.08.2022. is created and operates Riga City Court, merging 3 courts in Riga city territory. The number of first instance courts of general jurisdiction is indicated as it was in 2021, not including Riga City Court as 1 court in Riga. In Latvia is also Constitutional court - which within the jurisdiction specified in the Constitution of the Republic of Latvia and in this Law, shall adjudicate matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it by this Law. The Constitutional court is not included in the total number of the courts.

Q042 (2020): In the total number of specialised courts - legal entities are included 1 Administrative court and 1 Administrative Regional (appeal) court. Starting from 31.03.2021. in Latvia is created and operates the Economic Court. The Economic Court is not included in the total number of specialized courts. In Latvia is also Constitutional court - which within the jurisdiction specified in the Constitution of the Republic of Latvia and in this Law, shall adjudicate matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it by this Law. The Constitutional court is not included in the total number of the courts.

Q042 (2019): Since the reform of March, 2018, the number of first instance courts has been reduced to 10 legal entities at first instance (9 general + 1 administrative). There are also 6 appelate courts and Supreme court. In 2019 was completed reform of Land Register Units, which are included in the composition of district (city) courts. The number of legal entities doesn't changes, but number of courts per geographic locations therefore differs.
The data regarding the geographic locations are indicated on 31.12.2019.

Q042 (2018): Since the reform of March, 2018, the number of first instance courts has been reduced to 10 legal entities at first instance (9 general + 1 administrative). There are also 6 appelate courts and Supreme court.

Q042 (2017): The number of first instance courts (legal entities) is indicated on 31.12.2017., in Latvia starting from 2015 till March, 2018 was a reform where court map was revised. The number of first instance courts (legal entities) starting from March, 2018 is 9. As regards the specialised court - there is only one specialised court the Adminsitrative court with 5 court houses.

Q042 (2016): There is only one specialised court the administrative court with 5 court houses

Lithuania

Q042 (General Comment): 1.1. 11 district courts;
1.2. 5 regional courts (regional courts are appeal instance for judgments, decisions, rulings and orders of district courts as well as first instance courts adjudicating certain categories of cases; in this table regional courts are counted only as second instance courts of general jurisdiction) and the Court of Appeal of Lithuania;
2. 1 regional administrative court, which consists of five chambers, and the Supreme Administrative Court of Lithuania.
Regional courts as the first instance courts examine criminal cases in which persons are accused of having committed serious and very serious crimes, as well as cases in which the accused were the President of the Republic of Lithuania, members of the Seimas (Parliament) or Government, judges, judges or prosecutors of the Constitutional Court at the time of the commission of the criminal act.
Regional courts as the first instance deal with civil cases in which the amount of the claim is greater than 28,510 EUR(except for family legal relations cases due to the division of property), copyright cases, civil public tender legal relations cases, bankruptcy and restructuring cases, according to the statement of the bank's temporary administrator on reduction of the bank's share capital, cases in which one of the parties is a foreign state, according to lawsuits regarding the forced sale of shares, due to the investigation of the activity of a legal entity, and other cases.
Only the Vilnius Regional Court, with exclusive rights, in accordance with the laws in force, as a court of first instance hears cases regarding disputes provided for in the Patent Law of the Republic of Lithuania, regarding disputes provided for in the Trademark Law of the Republic of Lithuania, regarding adoption based on requests of foreign citizens

Q042 (2023): Regional courts are counted only as second instance.

Q042 (2022): according to 2021 answers, Regional courts are counted only as second instance.

Q042 (2021): Regional courts are counted only as second instance; general comment has been updated in view of the changed assignment of the regional courts to the second instance only.

Q042 (2020): 1.1. 12 district courts and 5 regional courts (the latter are adjudicating certain categories of cases as first instance courts);
1.2. 5 regional courts and the Court of Appeal of Lithuania;
2. 2 regional administrative courts and the Supreme Administrative Court of Lithuania.

Q042 (2018): Number of courts (as legal entities) in Lithuania decreased from 1st January 2018 according to the Law on Reorganization of Courts of the Republic of Lithuania (Law of 23rd Juin, 2016 No. XII-2474). Instead of 49 district courts (as legal entities) there are now 12 district courts (some of them have court houses), instead of 5 regional administrative courts there are now 2 of them (one has houses). The number of first instance courts of general jurisdiction (legal entities) in point 42.1 implies 5 regional courts (of general jurisdiction) which are first instance for criminal and civil cases assigned to its jurisdiction by law. These courts also are appeal instance for judgements, decisions, rulings and orders of district courts, so their number is also included in the number of all courts at point 42.3.

Q042 (2017): From January 1, 2018, there are 22 left (17 first instance courts, 2 first instance courts of special jurisdiction, 2 courts of appeal (1 of them is specialized court) and 1 court of cassation).

Q042 (2014): As regional courts of Lithuania function not only as courts of appeal, but also as courts of first instance, for 2014, the number of these courts is also included in the number of first instance courts of general jurisdiction. This was not the case in earlier years.

Luxembourg

Q042 (General Comment): 42.1.1: three justices of the peace and two district courts

42.1.2: one Court of Appeal 42.1.3: one Court of Cassation

42.2: Total specialized courts (all instances) In addition to the actual jurisdictions, the law of July 27, 1997 organizing the Constitutional Court established this court which is seized, as a preliminary ruling, when a question arises regarding the conformity of a law with the Constitution before a judicial or administrative jurisdiction.

It rules by way of judgment on laws' conformity with the Constitution, except for those approving treaties.

When one party raises an issue concerning a law's compliance with the Constitution before either judicial or administrative jurisdiction, that jurisdiction must refer it to The Constitutional Court unless it considers that making a decision on the raised issue is unnecessary for its judgment; that such question lacks any foundation; or that The Constitutional Court has already ruled on an identical matter.

If any jurisdiction deems there’s an issue about whether certain legislation complies with constitutional provisions and deciding upon this point is necessary for delivering its verdict then it should raise this matter ex officio after previously inviting parties to present their observations.

Parties are entitled to conclude and plead before the Constitutional Court through representation by a counsel listed in Category I annually compiled tables set up by bar councils’ orders."

The judgments of the Constitutional Court are published in the Official Journal of the Grand Duchy of Luxembourg within thirty days from their pronouncement." (Justice Portal : https://justice.public.lu/fr/organisation-justice/cour-constitutionnelle.html)

Q042 (2022): In addition to the regular courts, the Law of 27 July 1997 on the organization of the Constitutional Court, established this court, which is seized for a preliminary ruling when a question arises before a judicial or administrative jurisdiction concerning the conformity of a law with the Constitution. It rules by way of judgment on the conformity of laws with the Constitution, except those approving treaties.

When a party raises an issue regarding compliance of a law with the Constitution before a judicial or administrative jurisdiction, that jurisdiction is required to refer it to the Constitutional Court, unless it considers that deciding on such matter is not necessary for its judgment, that there are no grounds for such issue or that there has already been an decision by the Constitutional Court on an identical matter.

If any jurisdiction deems that an issue relating to compliance of a law with the Constitution arises and a decision on this point is necessary for its judgment, it must raise it ex officio after having previously invited the parties to present their observations.

The parties are entitled to conclude and plead before the Constitutional Court through a counsel registered in List I annually drawn up by the councils of bar associations.

Judgments from the Constitutional Court are published in the Official Gazette of Luxembourg within thirty days from their pronouncement. (Justice Portal: https://justice.public.lu/fr/organisation-justice/cour-constitutionnelle.html)

Q042 (2020): "In addition to the courts proper, the law of 27 July 1997 on the organization of the Constitutional Court established this court, which is seized, on a preliminary basis, when a question relating to the conformity of a law to the Constitution arises before a court of the judicial or administrative order. It rules, by means of a judgment, on the conformity of laws with the Constitution, with the exception of those concerning the approval of treaties.
When a party raises a question concerning the conformity of a law with the Constitution before a court of the judicial or administrative order, that court is obliged to refer the matter to the Constitutional Court, except when it considers that a decision on the question raised is not necessary to render its judgment, that the question is unfounded or that the Constitutional Court has already ruled on a question with the same object.
If a court considers that a question of conformity of a law with the Constitution arises and that a decision on this point is necessary to render its judgment, it must raise it of its own motion after first inviting the parties to present their observations.
The parties are admitted to conclude and plead before the Constitutional Court through the ministry of a lawyer registered in list I of the tables drawn up annually by the Bar Associations.
The judgments of the Constitutional Court are published in the Official Journal of the Grand Duchy of Luxembourg within thirty days of their delivery. (Portal of Justice: https://justice.public.lu/fr/organisation-justice/cour-constitutionnelle.html) "

Q042 (2017): 42.1: 3 justices of the peace and 2 district courts
42.2: Please note that the total of 043 is not identical to the total in 042, as most of the specialized courts are in fact specialized sections of a general court. E.g. the commercial courts (which also deal with insolvency cases) are specialized sections of the district court (tribunal d'arrondissement). Only the administrative, military and 1st instance social security courts are selfstanding.

Q042 (2016): 42.1: 3 justices of the peace and 2 district courts
42.2: Please note that the total of 043 is not identical to the total in 042, as most of the specialized courts are in fact specialized sections of a general court. E.g. the commercial courts (which also deal with insolvency cases) are specialized sections of the district court (tribunal d'arrondissement). Only the administrative, military and 1st instance social security courts are selfstanding.

Malta

Q042 (2023): The courts identified at 1.1 are: Court of Magistrates, Civil Jurisdiction; Court of Magistrates, Criminal Jurisdiction, Criminal Jurisdiction; Criminal Court; Civil Court, First Hall. The courts identified for at 2 are: the Rent Regulation Board; the Rural Leases Control Board; the Administrative Review Tribunal; the Land Arbitration Board; the Court of Voluntary Jurisdiction; the Small Claims Tribunal; the Constitutional Court.

Q042 (2022): The 1st instance courts of general jurisdiction are:
- the Court of Magistrates, Civil Jurisdiction
- the Court of Magistrates, Criminal Jurisdiction
- the Civil Court, First Hall - the Criminal Court

The 2nd instance courts of general jurisdiction are:
- the Civil Court of Appeal, Inferior Jurisdiction
- the Civil Court of Appeal, Superior Jurisdiction
- the Criminal Court of Appeal, Inferior Jurisdiction
- the Criminal Court of Appeal, Superior Jurisdiction

In the Maltese judicial system, there are only 2 instances of courts, hence Q1.3 is marked as NAP.
The increase in the number of courts as legal entities reflects the addition of the criminal courts to the above data, namely:
- 1st Instance Courts: Court of Magistrates Criminal Jurisdiction and Criminal Court
- 2nd Instance Courts: Criminal Court of Appeal in its Inferior and Superior Jurisdiction

Q2: The increase by 1 in the number of specialised courts reflects the addition of the Constitutional Court (in line with 2021 data).

Q042 (2021): The total number of Specialised Courts has increased to 8 because of the addition of the Constitutional Court as a second instance specialised court.

Q042 (2020): The 1st instance courts of general jurisdiction are:
- the Court of Magistrates, Civil Jurisdiction (competency up to Euros 15,000)
- the Civil Court, First Hall (civil cases above Euros 15,000)

The 2nd instance courts of general jurisdiction are:
- the Civil Court of Appeal, Inferior Jurisdiction - the Civil Court of Appeal, Superior Jurisdiction

In the Maltese judicial system, there are only 2 instances of courts, hence Q1.3 is marked as NAP.
The increase in the number of courts as legal entities reflects the addition of the criminal courts to the above data, namely:
- 1st Instance Courts: Court of Magistrates Criminal Jurisdiction and Criminal Court
- 2nd Instance Courts: Criminal Court of Appeal in its Inferior and Superior Jurisdiction

Q042 (2018): In 2018, the Commercial Division was set up in order to hear cases filed under the Companies Act that include Insolvency cases. This new specialised first instance court is the reason behind the increase in the number of courts quoted at 42.2 above.

Netherlands

Q042 (General Comment): Second instance courts of general jurisdiction handle civil, criminal and tax cases.
There are two additional courts that do not seem to fit this categorization by instance, acting in the area of administrative law. Some administrative law cases (tax cases) are handled by first and second instance courts of general jurisdiction. Other administrative cases are handled by the Trade and Industry Appeals Tribunal, also known as the Administrative High Court for Trade and Industry (College van van Beroep voor het Bedrijfsleven). This is a specialized administrative court, which rules on disputes in the area of social-economic administrative law, and appeals for specific laws. The tribunal hears both first and second instance cases. Categorized as a specialized court.
The Central Appeals Tribunal (Centrale Raad van Beroep) is a court of appeal mainly active in legal areas pertaining to social security and civil service. In these areas, it is also the highest judicial authority. In some cases, it is the first and sole instance. This court does not exactly fit the distinction of the table above, but categorized as a specialized court.
The Administrative Jurisdiction Division of the Council of State is the highest administrative court with general jurisdiction in the Netherlands. It hears various types of appeals (e.g. members of the public / associations / commercial companies against governmental bodies, or between public authorities). This court does not exactly fit the distinction of the table above, but categorized as a specialized court. For more information, see https://www.rechtspraak.nl/English/Judicial-system-and-legislation/Pages/Special-Tribunals.aspx. Note that the Supreme Court (highest instance court of general jurisdiction) does not retry the case itself, but judges whether the judges at the first and second instance applied the law correctly in the judgment, and whether the procedure was correctly followed (cassation, potential quashing of judgment).
Since 2013 and following the implementation of the reform related to the reorganization of the judicial map, the number of district courts was reduced from 19 in 2010 to 11 in 2013 and 2014. Moreover, this reform resulted in the closure of sub-district court locations due to which the number of geographic locations decreased from 64 in 2010 to 40 in 2013 and 2014.

Q042 (2021): Second instance courts of general jurisdiction handle civil, criminal and tax cases.
There are two additional courts that do not seem to fit this categorization by instance, acting in the area of administrative law. Some administrative law cases (tax cases) are handled by first and second instance courts of general jurisdiction. Other administrative cases are handeled by the Trade and Industry Appeals Tribunal, also known as the Administrative High Court for Trade and Industry (College van van Beroep voor het Bedrijfsleven). This is a specialized administrative court, which rules on disputes in the area of social-economic administrative law, and appeals for specific laws. The tribunal hears both first and second instance cases. Categorized as a specialized court.
The Central Appeals Tribunal (Centrale Raad van Beroep) is a court of appeal mainly active in legal areas pertaining to social security and civil service. In these areas, it is also the highest judicial authority. In some cases, it is the first and sole instance. This court does not exactly fit the distinction of the table above, but categorized as a specialized court.
The Administrative Jurisdiction Division of the Council of State is the highest administrative court with general jurisdiction in the Netherlands. It hears various types of appeals (e.g. members of the public / associations / commercial companies against governmental bodies, or between public authorities). This court does not exactly fit the distinction of the table above, but categorized as a specialized court.
For more information, see https://www.rechtspraak.nl/English/Judicial-system-and-legislation/Pages/Special-Tribunals.aspx. Note that the Supreme Court (highest instance court of general jurisdiction) does not retry the case itself, but judges whether the judges at the first and second instance applied the law correctly in the judgment, and whether the procedure was correctly followed (cassation, potential quashing of judgment).

Q042 (2020): There are 11 first instance courts (Rechtbanken).
There are 4 second instance courts of general jurisdiction: 4 courts of appeal (Second instance, Gerechtshoven) that handle civil cases, criminal cases and tax cases.
There is 1 highest instance court of general jurisdiction, the Supreme Court (Hoge Raad), the highest instance court in The Netherlands.
There are three specialized courts (see comment Q43).

Q042 (2017): same as last year

Poland

Q042 (General Comment): The Polish court structure is characterized by four levels of courts but only three instances. Basically, there are district courts which are first instance courts, regional courts which are first and second instance courts (regional courts within their jurisdiction have the majority of first-instance cases), and appellate courts which are second instance courts. The highest instance courts are the Supreme Court, the Supreme Administrative Court and the Constitutional Tribunal.

Q042 (2024): 1.1 first instance courts (district + regional courts), 1.2 second (appellate courts) , 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction.

Q042 (2023): 1.1 first instance courts (district courts), 1.2 second (regional + appellate courts) , 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction.

Q042 (2022): 1.1 first instance courts (district courts + regional courts);
1.2 second (appellate courts); 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction;

Q042 (2021): The table indicating the content of:
1.1 first instance courts (district + regional courts), 1.2 second (appellate courts) , 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction.

Q042 (2020): The table indicating the content of:
1.1 first instance courts (district + regional courts), 1.2 second (appellate courts) , 1.3 third instance courts (cassation of the judgment) (Supreme Court) of general jurisdiction.

Q042 (2018): .

Q042 (2017): 42.1 First instance courts of general jurisdiction - common courts (318 regional courts, 45 district courts).
42.2 First instance specialised courts - 16 administrative courts, 9 military courts.
42.3 All the courts - the Supreme Court, common courts (318 regional courts, 45 district courts, 11 appeal courts), administrative courts (voivodship administrative courts (16), the Supreme Administrative Court), military courts (regional military courts (7), district military courts (2)).

Q042 (2016): 42.1 First instance courts of general jurisdiction - common courts (318 regional courts, 45 district courts).
42.2 First instance specialised courts - 16 administrative courts, 9 military courts.
42.3 All the courts - the Supreme Court, common courts (318 regional courts, 45 district courts, 11 appeal courts), administrative courts (16 voivodship administrative courts. the Supreme Administrative Court), militry courts (9 regional military courts, 2 district military courts). The differences between presented data and the data from 2014 edition is likely to be due to the restoration of District Courts, abolished and converted to divisions of larger units in 2013.
The difference in courts number between this (363) and previous evaluation cycle (287) is probably caused by a significant organizational reform of polish court system, which took place in 2013. Almost eighty small district courts were merged with larger entities. Since 2015 the reform has been reversing, which has resulted in an increase in the number of the courts.

Portugal

Q042 (2020): 1.1 Courts of general jurisdiction and proximity divisions;
1.2. 2nd Instance Courts (Tribunal Relação de Lisboa, Coimbra, Porto, Évora e Guimarães).
1.3. Supreme Justice Court

Q042 (2019): Regarding Q 42.1 the decrease of the total number of first instance courts of general jurisdiction is accompanied by an increase of certain types of first instance courts (please consult answers provided to Q 43).
Regarding Q 42.2, the total corresponds to first instance specialised courts of judicial courts and administrative and tax courts. Under our Constitution, we have two set of courts: judicial courts, which have general jurisdiction in civil/commercial and criminal matters and encompass specialized courts, and administrative and tax courts, whose role is to settle disputes arising out of administrative and tax relations. These latter are specialised in this domain only.
In order to be rigourous and coherent with Q 43, we have included first instance administrative and tax courts. The total corresponds to 418 judicial courts + 17 administrative/tax courts.

Q042 (2018): These data correspond to the values given for the last scoreboard.
The differences registered result from the changes to the judicial organization (Law n. 40-A/2016, 22 December) in force since January 1, 2017.
42.1 the number of 1st instance courts with general jurisdiction decreased due to the increase of specialized courts.
Accordingly, 20 courts that were closed in 2014 were re-enacted as proximity judgments, new family sections were created as well as new sections with generic jurisdiction.

Q042 (2017): The differences registered result from the changes to the judicial organization (Law n. 40-A/2016, 22 December) in force since January 1, 2017.
42.1 the number of 1st instance courts with general jurisdiction decreased due to the increase of specialized courts.
Accordingly, 20 courts that were closed in 2014 were re-enacted as proximity judgments, new family sections were created as well as new sections with generic jurisdiction.

Q042 (2014): As a result of the new Judicial Organization Reform, the number of specialized first instance courts increased in 2014, while the enlargement of the court districts has been promoted. The reform melted the former judicial districts into 23 judicial districts, each containing two or more units, according to the demographic and economic reality of the respective geographic area. The difference between Q42.2 and Q43 is due to the inclusion of the 20 administrative courts in Q43. In Portugal, the administrative jurisdiction is autonomous, independent from the civil jurisdiction.

Romania

Q042 (General Comment): The number of „judecatorii" has decreased by one between 2019-2020 because the activity of Judecătoria Insuratei was suspended so it no longer appears in the statistics. 175 represent the first instance courts with general jurisdiction in this matter, even if tribunals, courts of appeal and the High Court may also judge first instance cases. Starting from 2020 the methodology of presentation of data changed and only "judecatorii" are counted as first instance courts of general jurisdiction, even if tribunals, courts of appeal and the High Court may also judge first instance cases

Q042 (2024): Law no. 304/2022 on the judicial organisation.

Q042 (2023): Law no. 304/2022 on the judicial organisation.

Q042 (2022): Law no. 304/2022 on the judicial organisation.

Q042 (2017): There are 176 first instance courts, 42 tribunals and 15 courts of appeals. All of the first instance courts deal with cases in first instance, but also the tribunals and the courts of appeal may have material or personal jurisdiction in first instance.

Q042 (2016): There are 176 first instance courts, 42 tribunals and 15 courts of appeals. All of the first instance courts deal with cases in first instance, but also the tribunals and the courts of appeal may have material or personal jurisdiction in first instance.

Slovak Republic

Q042 (2024): There are 36 courts operating at first instance, including municpal and district courts. 8 regional courts operating at second instance.
1 Supreme Court. The 5 specialised courts are detailed in Q43.

Q042 (2023): There are 36 courts operating at first instance, including municpal and district courts. 8 regional courts operating at second instance.
1 Supreme Court. The 5 specialised courts are detailed in Q43.

Q042 (2022): The new Supreme Administravive Court - specialized court of higher instance was establish in 2021 and started its full work in 2022.

Q042 (2021): The changed answer in line 2 is due to the Supreme Administrative Court of the Slovak Republic, it was established from January 1, 2021 by Constitutional Act No. 422/2020.

Q042 (2020): The Constitutional Court is not included, since it was not included in previous cycles. Acoording to the explanatory note - "In some countries, other bodies can be referred to as courts. When they are not part of the regular judiciary system, they should not be considered here (e.g. courts of audits, constitutional courts when not dealing with individual cases but rather with questions of compliance with constitution and international law etc.)." In Slovak republic the Constitutional Court can deal with some rare individual cases.

Q042 (2019): The entire court system of the Slovak republic consists of 54 District Courts, 8 Regional Courts, The Specialized Criminal
Court and the Supreme Court of the Slovak republic.

Q042 (2018): The entire court system of the Slovak republic consists of 54 District Courts, 8 Regional Courts, The Specialised Criminal Court and
The Supreme Court of the Slovak republic

Q042 (2017): The court system of the Slovak republic consists of 54 District Courts, 8 Regional Courts, Specialised Criminal Court and Supreme Court of the Slovak republic

Q042 (2016): The court system of the Slovak republic consists of 54 District Courts, 8 Regional Courts, The Specialised Criminal Court and The Supreme Court of the Slovak republic

Slovenia

Q042 (General Comment): First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
Second instance courts of general jurisdiction: 4 higher courts
Specialised courts: 3 labour courts (1st instance) + 1 labour and social court (1st instance) + 1 Administrative court (1st instance) + 1 Higher labour and social Court (2nd instance) = 6
Highest instance courts of general jurisdiction: The Supreme Court (also highest instance court for specialised courts)

Q042 (2018): First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
First instance specialised courts: 3 labour courts + 1 labour and social court + 1 Administrative court = 5
All courts: first instance courts of general jurisdiction (55, see Q42.1) + first instance specialised courts (4 labour courts + 1 social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of administrative court) + second instance courts and courts of appeal (4 higher courts of general jurisdiction + 1 higher labour and social court) + the Supreme court = 77.

Q042 (2017): First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
First instance specialised courts: 3 labour courts + 1 labour and social court + 1 Administrative court = 5
All courts: first instance courts of general jurisdiction (55, see Q42.1) + first instance specialised courts (4 labour courts + 1 social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of administrative court) + second instance courts and courts of appeal (4 higher courts of general jurisdiction + 1 higher labour and social court) + the Supreme court = 77.

Q042 (2016): First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
First instance specialised courts: 3 labour courts + 1 labour and social court + 1 Administrative court = 5
All courts: first instance courts of general jurisdiction (55, see Q42.1) + first instance specialised courts (4 labour courts + 1 social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of administrative court) + second instance courts and courts of appeal (4 higher courts of general jurisdiction + 1 higher labour and social court) + the Supreme court = 77.

Q042 (2015): legal entities:
First instance courts of general jurisdiction: 44 local courts + 11 district courts = 55
First instance specialised courts: 3 labour courts + 1 labour and social court + 1 administrative court = 5
geographic locations:
All the courts = 77
- first instance courts of general jurisdiction = 55 (Q42.1); additionally
- first instance specialised courts = 4 labour courts + 1 social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of administrative court = 16; additionally
- second instance courts and courts of appeal = 4 higher courts of general jurisdiction + 1 higher labour and social court = 5; and finally
- supreme court: the Supreme Court of the Republic of Slovenia = 1.

Spain

Q042 (General Comment): In Spain, as general rule, the First Instance are unipersonal Courts: One Judge-courts. In Spain we have two types of specialization: Special Jurisdictions established by Organic Law (Violence against women, Commercial, for example), and the possibility for GCJ to determine that in some places, a general jurisdiction Court (Civil) is focused in some kind of cases.

Q042 (2023): In spain there is 1 Supreme Court with several Chambers. When attending the presentation of the report of 2024, we change this response to avoid missunderstandings.

Question 043

Austria

Q043 (General Comment): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. six in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases, administrative cases) and two in Graz (civil cases, criminal cases); Since there are special courts for civil law cases in Vienna and Graz, which cannot be selected individually here, and because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2024): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. six in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases, administrative cases) and two in Graz (civil cases, criminal cases); Since there are special courts for civil law cases in Vienna and Graz, which cannot be selected individually here, and because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2023): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. six in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases, administrative cases) and two in Graz (civil cases, criminal cases); Since there are special courts for civil law cases in Vienna and Graz, which cannot be selected individually here, and because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2022): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. six in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases, administrative cases) and two in Graz (civil cases, criminal cases); Since there are special courts for civil law cases in Vienna and Graz, which cannot be selected individually here, and because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2021): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases) and two in Graz (civil cases, criminal cases); Because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts. One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2020): As a rule every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], labour and social welfare cases) and two in Graz (civil cases, criminal cases);
Because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts does not correspond to the total number of specialised courts.
One commercial court in Vienna, both courts (in Vienna and Graz) specialised on civil cases and both courts (in Vienna and Graz) specialised on the enforcement of criminal sanctions also act as second instance courts.

Q043 (2019): On principal every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialized, i.e. eight in Vienna (civil cases, criminal cases, commercial cases [2x], employment- and social welfare cases, administrative cases) and two in Graz (criminal cases, remaining cases). There is also a regional administrative court in every federal state (9 in total). Because of the Court for labour and social welfare cases in Vienna (Arbeits- und Sozialgericht Wien) the sum of the individual courts equals nineteen.

Q043 (2018): On principal every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], employment- and social welfare cases) and two in Graz (criminal cases, remaining cases)

Q043 (2017): On principal every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], employment- and social welfare cases) and two in Graz (criminal cases, remaining cases)

Q043 (2016): On principal every court has to deal with all judicial issues; in the biggest Austrian cities certain courts are specialised, i.e. five in Vienna (civil cases, criminal cases, commercial cases [2 x], employment- and social welfare cases) and two in Graz (criminal cases, remaining cases)

Belgium

Q043 (General Comment): « Higher instances": 5 labour courts + 1 Council of State (Conseil d'Etat) – administrative law litigation section = 6

Starting from 2020, justices of the peace and police courts are counted as courts of general jurisdiction. Administrative courts: Council of State, Aliens Litigation Council, Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege and Raad voor Verkiezingsbetwistingen.
Six courts of first instance have specialised enforcement divisions. The term ‘enforcement court’ is used, but in reality, this is a specialised chamber.

All the first instance courts (13) have a specialised family and youth section. The term ‘family court’ is used, but in reality, it is a specialised section.

Q043 (2024): "Specialised courts - higher instances" - 5 labour courts and the Council of State, administrative law litigation section (Conseil d'Etat)

Q043 (2023): Higher courts: 5 labour courts + 1 Council of State (Conseil d'Etat) - administrative litigation section.

Q043 (2021): In Belgium, the following courts do not exist - insolvency courts, family courts, juvenile courts, insurance and / or social welfare courts, rent and tenancies courts, enforcement of criminal sanctions courts, courts specialised in fight against terrorism or in internet related disputes. These case categories are within the competence of company courts (insolvency, insurances), first instance courts (family, juveniles, enforcement of sentences), labour courts (safety in work).
As for the previous evaluation round (2020 data), Justices of the peace and Police courts are counted as courts of general jurisdiction. Before 2020, they were categorized as specialized courts of first instance.

Q043 (2020):
For the current evaluation round (2020 data), justices of the peace and police courts are counted as general courts. In previous cycles, they were categorized as specialized courts of first instance.

Q043 (2019): Other: 162 justices of the peace and 15 police courts. Administrative courts: Council of State, Council for Aliens Litigation, de Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege en de Raad voor Verkiezingsbetwistingen (these courts are under the authority of the Minister for Home Affairs and the Flemish Regional Government, and not the Minister of Justice).
Six courts of first instance have specialized chambers for the application of sentences. The denomination 'court for the enforcement of sentences' is used, but in reality it is a specialized chamber.
All the courts of first instance (13) have a special family and youth section. The denomination 'family court' is used, but in reality it is a specialized section.

Q043 (2017): Others: justices of the peace and police courts. The law of 25 December 2017 amended the number of cantons of justices of the peace from 187 to 162 (162 justices of the peace and 15 police courts).
Administrative courts: Council of State, Aliens Litigation Council, Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege en de Raad voor Verkiezingsbetwistingen.
Five courts of first instance have specialized chambers for the enforcement of sentences. Despite the term used in their respect - "court for the enforcement of sentences", those are specialised chambers.
All courts of first instance (13) have a specialised family and youth section. The term "family court" is used, but these are also specialised sections.

Q043 (2016): Other: justices of the peace and police courts
Administrative courts: Council of State, Aliens Litigation Council, Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege en de Raad voor Verkiezingsbetwistingen.
Five courts of first instance have specialized chambers for the enforcement of sentences. The name "court for the enforcement of sentences" is used, but in reality it is a specialized chamber.
All courts of first instance (13) have a specialized family and youth section. The name "family court'" is used, but in reality it is a specialized section.

Q043 (2015): Other: justices of the peace and police courts
Administrative courts: the Council of State, the Council of the Litigation of Foreigners, Milieuhandhavingscollege, de Raad voor Vergunningsbetwistingen en de Raad voor Verkiezingsbetwistingen.

Q043 (2014): The other specialised courts are 15 police courts and 187 justices of peace. Family courts are a section within the 13 first instance courts. The administrative courts (the Council of State, the Alien Litigation Council, "(Vlaamse)Raad voor Vergunningsbetwistingen", "het (Vlaamse) Milieuhandhavingscollege") are not part of the judicial system administered by the Ministry of Justice. Following a reform of the judicial map, the number of labour, commercial and police courts was reduced.

Bulgaria

Q043 (General Comment): Administrative Courts- 28
Supreme Administrative Court - 1
MilitaryCourts - 3
Military Court of Appeal - 1

Q043 (2022): •Previous cycles the category “other specialised courts” encompasses the Specialized Criminal Court of Republic of Bulgaria and Specialized Criminal Court of Appeal. In the State Gazette, no. 32 of 26.04.2022, the Law on Amendments and Supplements to the Law on the Judiciary/ Judiciary System Act was promulgated, which closed the specialized court and prosecutor's office.

Q043 (2021): The category “other specialised courts” encompasses the Specialized Criminal Court of Republic of Bulgaria, established in 2011, situated in Sofia and treated as a Provincial/Regional Court. Its jurisdiction covers criminal cases of a general nature for crimes carried out throughout the Republic of Bulgaria. Its competence is determined on the basis of the subject of the case and not the quality of the perpetrator. The Criminal Procedure Code exhaustively enumerates cases within the competence of this Court, namely crimes committed by organized criminal groups, or on behalf of them and following their decision.

Q043 (2020): The category “other specialised courts” encompasses the Specialized Criminal Court of Republic of Bulgaria, established in 2011, situated in Sofia and treated as a Provincial/Regional Court. Its jurisdiction covers criminal cases of a general nature for crimes carried out throughout the Republic of Bulgaria. Its competence is determined on the basis of the subject of the case and not the quality of the perpetrator. The Criminal Procedure Code exhaustively enumerates cases within the competence of this Court, namely crimes committed by organized criminal groups, or on behalf of them and following their decision.

Q043 (2019): The cases under the jurisdiction of Specialized Criminal Court are specified in Art. 411a of the Penal Procedure Code

Q043 (2018): The category “other” encompasses the Specialized Criminal Court of Republic of Bulgaria (see the general comment).

Q043 (2017): Specialized Criminal Court

Q043 (2016): 'Other specialised 1st instance courts' - 1 Specialized Criminal Court.

Croatia

Q043 (General Comment): No comment.

Q043 (2022): will be explained later

Q043 (2020): In Croatian Judicial system there is a higher instances of 3 specialized courts: commercial, administrative and other (misdemeanour).

Q043 (2019): One criminal and two misdemeanour courts. After the reorganization of courts in 2019 we do not have 22 misdemeanor courts. Only two courts specialized only for misdemeanor cases were left in two largest cities (Zagreb and Split). Third specialized court is court in Zagreb specialized only for criminal cases.

Q043 (2018): Other specialised 1st instance courts are Misdemeanour courts and Municipal Criminal Court in Zagreb.

Q043 (2017): 23 other specialised 1st instance courts are 22 Misdemeanour courts and 1 Municipal Criminal Court in Zagreb

Q043 (2016): According to the Act on the Jurisdiction and Seats of Courts (Official Gazette 128/14) as of 1 April 2015 the number of municipal courts has been reduced, as of 1 July 2015 reduced the number of misdemeanour courts has been reduced and as of 1 April 2015 a new commercial court has been established.
Other specialised 1st instance courts are 22 Misdemeanour courts and a Municipal Criminal Court in Zagreb.

Cyprus

Q043 (General Comment): "Other" first instance specialised court: the Administrative court for international protection.

Q043 (2024): Administrative Court of International Protection.
As of the 1st of July the Supreme court and the Supreme Constitutional court were established. the supreme court acts as the third and final instance in criminal and civil cases, whereas the supreme constitutional court acts as the third and final instance in Administrative Cases.

Q043 (2023): As of 1s of July 2023 a Supreme Constitutional Court and an Appeal Court were established.
The Supreme Constitutional Court has jurisdiction for the review of constitutionality of laws, but it also acts as the supreme administrative court. The Supreme Court decides, at third and last instance on civil or criminal cases on points of law.
The Court of Appeal will hear civil, criminal and revisional (administrative law) appeals.

Q043 (2022): Administrative Court for International Protection

Q043 (2021): other specialised courts are the Assize courts and the Administrative Court of International Protection.
In 2021 a law was enacted (law 55/21) providing for the establishment of a juvenile court in each district of the Republic. Family, Labour and rent control courts have been established in one more district.

Q043 (2020): 5 Assize courts
1 Administrative court for international Protection

Q043 (2019): Other specialised 1st instance courts: 1 International Protection Administrative Court and 5 Assize Court. In 2019 the new administrative court for international protection was established to hear cases concerning asylum applications and international protection matters.

Q043 (2018): 5 Assize courts

Q043 (2017): Assize Courts

Q043 (2016): Assize Courts

Q043 (2015): In 2015, two new Assize courts and one administrative court were established and one Rent Control Tribunal was removed.

Czech Republic

Q043 (General Comment): There are no specialised first instance courts, but judges within individual courts are specialised (e.g. for family, labour and enforcement cases at district courts, and insolvency and administrative cases at regional courts as first instance courts).

Denmark

Q043 (General Comment): Re "Juvenile Courts" such courts do not exists. Juveniles are dealt with by district courts as any other case. There are taken special care though of juveniles in a Juvenile Board. The category “other” concerns the Land Registration Court that has been established in 2009. Family courts are administered as part of District courts. There is one military court but military courts are not part of the Danish Courts Administration.
There are only two specialised courts - the reason for checking out three specialised courts in this category is because the Commercial Court in Denmark, it is called Maritime and Commercial Court and it presents the peculiarity to also deal, to a great extent but not exclusively, with insolvency cases (bankruptcies etc.). Therefore it's the same court that specialises in both commercial court and insolvency.

Q043 (2024): The 'other' specialised court is The Land Registration Court.

Q043 (2023): The 'other' specialised court is The Land Registration Court.

Q043 (2022): Land Registration Court (see also general comments). The other specialized court is Maritime and Commercial Court. The latter do some degree deals with insolvency cases similar to district courts.

Q043 (2021): "Other specialised courts" is The Land Registration Court.

Q043 (2020): Land Registration Court (see also general comments). The other specialized court is Maritime and Commercial Court. The latter do some degree deals with insolvency cases similar to district courts.

Q043 (2019): Other specialised 1st instance court is the Land Registration Court. The Maritime and Commercial Court is a commercial court which ALSO deals with insolvency cases. Although it looks like there are two courts there is only one! As the district courts outside Greater Copenhagen deal with insolvency cases, and the Maritime and Commercial Court deals with insolvency cases inside Greater Copenhagen, but at the same time is a specialized commercial court, the Maritime and Commercial Court is marked as a specialized Commercial Court and insolvency court.

Q043 (2018): Military courts exist but they are not part of the Danish Courts Administration. The 24 district courts have always dealt with family cases. From 1 April 2019 family issues are a section of the court.

Q043 (2017): The category “other” concerns the Land Registration Court that has been established in 2009. As for the Commercial Court, in Denmark, it is called Maritime and Commercial Court and it presents the peculiarity to also deal, to a great extent but not exclusively, with insolvency cases (bankruptcies etc.). Accordingly, there is an overlap with the category “Insolvency courts”. Of course Military courts exist but they are not part of the Danish Courts Administration.

Q043 (2016): Land Registration Court.

Estonia

Q043 (General Comment): In Estonia, there are no specialized first instance courts, other than administrative courts. All the cases are dealt with by ordinary courts of first instance. The two administrative courts of first instance are situated in Tallinn and Tartu. Nevertheless, for guaranteeing wider access to justice, these two courts have several court buildings in other cities, namely in Pärnu and Jõhvi, where judges and their supporting legal staff work.

Finland

Q043 (General Comment): In Finland, there are six regional administrative courts, the Market Court, the Labour Court and the Insurance Court.
Another specialised court is the High Court of Impeachment that hears charges against ministers (i.e. members of the Government), the Chancellor of Justice, the Parliamentary Ombudsman and members of the Supreme Court or the Supreme Administrative Court for unlawful conduct in office. In addition, the High Court of Impeachment deals with charges concerning the criminal liability of the President of the Republic. However, it is convened only when necessary.

Q043 (2016): In Finland there are 6 Administrative Courts, 1 Market Court, 1 Labour Court and 1 Insurance Court. Then there is the High Court of Impeachment that hears charges against Ministers (i.e.Members of the State Council), Chancellor of Justice, Parliamentary Ombudsman and Supreme Court Justices for unlawful conduct in office but it is convened only when necessary.

France

Q043 (General Comment): With regard to the Enforcement of criminal sanctions courts: in matters of enforcement of sentences, the enforcement judge (JAP) is a court of first instance for the enforcement of sentences, being at the same time a decision-making, control and monitoring body. There is at least one JAP per department (article 712-2 of the CPP). The JAP is competent for adult convicts, and his/her field of intervention is the following: for measures to individualize custodial sentences, he or she has general jurisdiction (except for a few measures that fall under the special jurisdiction of the Court for the enforcement of sentences); for custodial sentences, when a specific text so provides; for the follow-up of security measures.
Established by the law of March 9, 2004, the Court for the enforcement of sentences (TAP) is a court of first instance, composed of three JAPs of first instance courts, appointed by order of the First President of the Appelate Court. In each Appelate Court, a TAP is established whose territorial jurisdiction extends to the jurisdiction of this court (articles 712-3 and D 49-2 of the CPP, article indicating the list of TAPs by Appelate court and the territorial jurisdiction). The seat of the TAP is in principle "that of the first instance court of the seat of the Appelate Court" (article D. 49-3 CPP).
The objective is to entrust the most complex and sensitive cases to a collegiality. Thus, the TAP has jurisdiction over: 1) by the effect of the law for those sentenced to the heaviest penalties: applications for parole and suspension of "medical" sentences for persons sentenced to imprisonment of more than 10 years and whose remaining sentence to be served exceeds 3 years; applications for an increase in the security period; placement under judicial supervision of dangerous persons...); 2) by decision of the JAP, in particular due to the complexity of the case or the personality of the convicted person (article 712-6 al 3 of the CPP), this referral to the collegiality may be made ex officio or at the request of the convicted person or the public prosecutor.
In terrorism matters, there is a derogation from ordinary law (articles 706-22-1 and D 49-75 to D49-81-5 of the Criminal Procedure Code). The Paris sentence enforcement courts specialising in terrorist matters (JAPAT, TAPAT and the sentence enforcement chamber) have: exclusive jurisdiction to monitor persons convicted by specialised terrorism courts pursuant to article 706-17 of the Criminal Procedure Code; concurrent jurisdiction with ordinary courts for the enforcement of sentences to monitor persons convicted of acts of terrorism and other offences falling within the scope of article 706-16 of the Criminal Procedure Code by ordinary courts.
source DACG.

Q043 (2024): Administrative justice (ordre administrative):
40 = 38 administrative courts (first instance) + 1 National Court of Asylum + 1 Commission for Parking Disputes; 10 = Council of State + 9 administrative courts of appeal.
Civil and criminal justice (ordre judiciaire):
Commercial courts = 134 commercial courts + 9 mixed commercial courts + 7 district courts with commercial competence.
Other specialised courts:
Courts of first instance: 1 court for paid parking disputes (Article R. 2133-120-20 of the General Code of Local Authorities), 1 court for navigation on the Rhine (Article L. 4261-2 of the Transport Code, Article D. 215-2 of the Judicial Organization Code), 1 court for navigation on the Moselle (Article L. 4262-2 of the Transport Code, Article D. 215-2 of the Judicial Organization Code), 7 enforcement courts (Article L. 218-8 of the Judicial Organization Code), 6 maritime courts (Decree No. 2015-261 of March 5, 2015 / Decree No. 2014-1581 of December 23, 2014); not counted as separate legal entities are the 11 land registry offices (Article D. 215-3 of the Code of Judicial Organization, Appendix Table XIII of the Code of Judicial Organization), and the 102 departmental criminal courts (Article 380-17 of the Code of Criminal Procedure).

Compared to previous years, rural courts have been moved from the “other” category to the “Rent and tenancies courts” category.

Higher instance courts: 1 appeal court for navigation on the Rhine (Article L. 313-1 of the COJ), 1 appeal court for navigation on the Moselle (Article L. 313-2 of the Code of Judicial Organization); for 2024, the National Court of Asylum (Article L. 131-1 of the CESEDA, counted among the administrative courts) is counted among the administrative courts.

Q043 (2023): 272 courts for rural leases + 1 court for navigation on the Rhine + 1 court of first instance for navigation on the Moselle + 6 maritime courts + 1 National court of asylum + 1 Court for disputes relating to paid parking.
Administrative courts: 38 administrative courts (first instance). There has been no reduction in the number of courts of first instance. Until now, we indicated 43 courts of first instance. This figure included:
- the National court of asylum
- the Court for disputes relating to paid parking
- 3 courts for the administrative courts of Guadeloupe, Saint-Martin and Saint-Barthelemy
- 2 courts for the administrative courts of Reunion and Mayotte - 2 courts for the administrative courts of New Caledonia and Wallis and Futuna
- but only one court for the administrative courts of Martinique and Saint-Pierre-et-Miquelon.

However, the following form a single legal entity (same head of court, same judges, same registry and same financial management):
- the administrative court of Guadeloupe, Saint-Martin and Saint-Barthelemy
- the administrative court of New Caledonia and Wallis and Futuna
- the administrative court of Martinique and Saint-Pierre-et-Miquelon.

On the other hand, although the administrative courts of Réunion and Mayotte have the same head of court and the same judges, they have separate registries and separate financial management: in our view, they therefore form two legal entities.
10 higher instances in administrative matters: Council of State + 9 administrative courts of appeal

Q043 (2022): 272 TPBR (tribunaux paritaires des baux ruraux), along with 1 Court for navigation on the Rhine, 1 Court for navigation on the Moselle, 6 maritime courts, the National court of Asylum and the Commission of litigation regarding paid parking.

Q043 (2021): Labour courts: 211 CPH (conseils de prud'hommes) + 5 labour courts = 216 courts. The CPH have jurisdiction, according to Article L. 1411-1 of the Labour Code, to hear individual disputes between employees or apprentices and their employers arising from the execution of an employment or apprenticeship contract. Commercial courts: 134 TCs, 9 TMCs, 2 TPIs with commercial jurisdiction, 7 TJs with commercial jurisdiction = 152 courts. Commercial courts are specialised courts with jurisdiction to hear disputes relating to commitments between traders, between credit institutions or between them, disputes relating to commercial companies and commercial acts by their form (Art. L. 721-1 et seq. of the Commercial Code). There are 134 commercial courts whose judges are exclusively "juges consulaires". With regard to the judicial organisation in overseas France, there are 2 First instance courts with jurisdiction in commercial matters and 9 mixed commercial courts. In addition, 7 judicial courts have a commercial chamber in Alsace-Moselle. Concerning juvenile courts: 156 according to the key figures of Justice 2021 and 155 according to the judicial atlas of 2021.
"Other specialised courts": the parity courts for rural leases (TPBR): 272 (according to the key figures for Justice 2021); the court for navigation on the Rhine (L 215-4 al.1 COJ) ; the court of first instance for navigation on the Moselle (L 215-4 al.2 COJ); 6 maritime courts (Bordeaux, Brest, Cayenne, Le Havre, Marseille Saint-Denis); the National court of asylum. Source DSJ and Council of State

Q043 (2020): Despite the provisional NA answer for the category " Courts for the execution of criminal sanctions ", the total is available, as it is a small number that will not significantly affect the total. On labor courts: 210 CPHs + 6 labor courts = 216 courts Industrial tribunals have jurisdiction, according to Article L. 1411-1 of the Labor Code, to hear individual disputes that arise between employees or apprentices and their employers during the execution of an employment or apprenticeship contract. There are 210 industrial tribunals and 6 labor courts in the French overseas territories. Same figure as in 2020
On commercial courts: 134 TCs, 9 TMCs, 2 TPIs with commercial jurisdiction, 7 TJs with commercial jurisdiction = 152 courts Commercial courts are specialized courts with jurisdiction to hear disputes relating to commitments between traders, between credit institutions or between them, disputes relating to commercial companies and commercial acts by their form (Art. L. 721-1 et seq. of the Commercial Code) On social jurisdictions:
-Since November 1, 2019, litigation concerning military disability pensions has been transferred to the jurisdiction of the administrative courts, doing away with the military disability pension courts and the regional military disability pension courts that rule on appeal.
- Since January 1, 2019, as a result of Law No. 2016-1547 of November 18, 2016 on the modernization of justice in the 21st century, social litigation, formerly divided between the social security courts (TASS), the courts of disability litigation (TCI) and the departmental social assistance commissions (CDAS), was merged and transferred to the "tribunaux de grande instance", ordinary courts of first instance, which became, as of January 1, 2020, by effect of law n° 2019-222 of March 23, 2019 on programming 2018-2022 and reform for the justice system, Judicial Courts. Consequently, these specialized jurisdictions have been abolished. On appeal, the litigation was only under the jurisdiction of the CNITAAT (extended until December 31, 2022; but now it is under the jurisdiction of specially designated courts of appeal, which allows for better accessibility to justice. There are 134 commercial courts whose judges are exclusively consular. With regard to the judicial organization in overseas France, there are 2 courts of first instance with jurisdiction in commercial matters and 9 mixed commercial courts. In addition, 7 judicial courts have a commercial chamber in Alsace-Moselle. In 2020 it was written 143 commercial courts because I think that only the TC and TMC were counted and not the TJ with commercial jurisdiction nor the TPI with commercial jurisdiction. About the other specialized courts :
The tribunaux paritaires des baux ruraux (TPBR) are autonomous (L. 491-1 of the Code rural et de la pêche maritime). The 2018-2022 programming and reform law for justice sets the seats and jurisdictions of the TPBRs no longer with reference to the seats of the former magistrate's courts but according to the seats of the judicial courts and their proximity chamber. On social jurisdictions:
-Since November 1, 2019, the litigation of military disability pensions has been transferred to the jurisdiction of the administrative courts, making the military disability pension courts and the regional military disability pension courts, which rule on appeal, disappear.
- Since January 1, 2019, as a result of law no. 2016-1547 of November 18, 2016 on the modernization of justice in the 21st century, social litigation, which was previously divided between the s

ocial security courts (TASS), the disability litigation courts (TCI) and the departmental social assistance commissions (CDAS), was merged and transferred to the "tribunaux de grande instance", courts of first instance under ordinary law, which became, as of January 1, 2020, the "Tribunaux Judiciaires" (Judicial Courts) under Law No. 2019-222 of March 23, 2019, on programming for 2018-2022 and reform of the justice system. Consequently, these specialized jurisdictions have been abolished. On appeal, the litigation was only under the jurisdiction of the CNITAAT (extended until December 31, 2022; but now it is under the jurisdiction of the specially designated courts of appeal, numbering 26 which allows better accessibility to justice. On military jurisdictions: -In peacetime: ordinary judicial jurisdictions
In times of war: territorial courts of the armed forces: exceptional jurisdictions:
-bankruptcy courts: depending on the nature of the litigants -Bankruptcy courts: depending on the nature of the litigants, either under the jurisdiction of the Judicial Court, the Commercial Court or the TPBR, - Family courts: the family court judges who work within the TJs are competent in this matter
-Rental/lease courts: depending on the nature of the lease, jurisdiction between TJ, TCommerce, TPBR
-Courts for the execution of penal sanctions: this is a dispute falling within the competence of the Judges and Courts for the application of penalties
-Courts dealing with terrorism: this is a specialization of the TJ, CA and JAP Paris
-Courts dealing with Internet litigation: nonexistent
So NAP in each of the boxes relating to these courts.
There are no specialized second instance Court for commercial or labor law. They are chambers within the CAs that will manage this litigation. Thus NAP Source Direction des services judiciaires
With regard to the category ""other specialized courts"": joint courts for rural leases: 275, including that of St Pierre et Miquelon;
court for navigation on the Rhine: 1 ;
maritime courts: 6; national court of asylum: 1;
Specialized courts include the CNDA (National Asylum Court) and the CCSP (Commission du contentieux du stationnement payant). Commentary on other specialized courts: the discrepancy can be explained on the one hand by the merger of the TI and TGI, which led to the disappearance of the TASS and TPBR. On the other hand, the TPEs were previously counted in the category of other specialized courts; they are now the subject of a separate question and are thus removed from the "other" field. With regard to courts for the enforcement of criminal sanctions: In matters of enforcement of sentences, the enforcement judge (JAP) is a first-level enforcement court that is at the same time a decision-making, control and monitoring body. There is at least one JAP per department (article 712-2 of the CPP). The JAP is competent for adult convicts, and his field of intervention is the following: For measures to individualize custodial sentences, he or she has general jurisdiction (except for a few measures that fall under the special jurisdiction of the court for the enforcement of sentences), For custodial sentences, when a specific text so provides,
For the follow-up of security measures. Established by the law of March 9, 2004, the Court for the Enforcement of Sentences (TAP) is a court of first instance, composed of three JAPs of the judicial courts, appointed by order of the First President of the second instance Court. In each second instance Court, a TAP is established whose territorial jurisdiction extends to the

Q043 (2019): Since 1 January 2019, social litigation, formerly divided between the social security courts (TASS), the incapacity courts (TCI) and the departmental social assistance commissions (CDAS), has been merged and transferred to the “tribunaux de grande instance” (first instance courts of general jurisdiction). As a result, these specialised courts have been abolished. As of 1 November 2019, litigation concerning military invalidity pensions will be transferred to the administrative courts, eliminating the military invalidity pension courts and the regional military invalidity pension courts which rule on appeal. These changes explain the variation in the number of courts compared to the previous year. The other specialised courts are: - joint courts for rural leases: 274; juvenile courts: 155; court for navigation on the Rhine: 1; maritime courts: 6; national asylum court: 1; court of first instance for navigation on the Moselle: 1.

Q043 (2018): The other specialized courts are: - joint courts for rural leases: 272 ;
- juvenile courts: 155; - military pension courts: 36;
- court for navigation on the Rhine: 1;
- Maritime courts: 6;
- national court of asylum: 1; - court of first instance for navigation on the Moselle: 1.
In the previous questionnaire, the Joint Rural Lease Courts (JRTs) were indicated, with the District Courts (TIs) within the "Rental Courts", the figure of 307 corresponding to the District Courts, since the seats and jurisdictions of the JRTs were linked to those of the TI. However, the TPBRs are, and have always been, autonomous courts. However, as decrees have been issued to remove some TPBRs, there is no longer a correlation between their number and that of IT. We have therefore indicated here in the "rental courts", only IT (289), and by including TPBRs in a separate item, which is legally more accurate. The total number of TPBRs is 274. On the insurance and social security courts: in the requested reference year, there are 26 disability courts, 115 social security courts (TASS) and 100 departmental social assistance commissions (CDAS). The differential of 100 corresponds to the addition of the 100 CDASs which are administrative courts.
The Paris Court, created on 14 May 2018, brought together all the services of the Regional Court, formerly dispersed over 5 sites, including Ile de la Cité, the Police Court and the 20 District Courts. The number of TIs had to be reduced by 19. In addition, the reform of the transfer of the police court under the 21st century Justice Act had the effect of removing 3 of them from the 307 TIs. The number of IT has therefore increased from 304 (307-3) to 285 district courts (304-19). We have added to these 285 TI the 4 TPIs because of their dual IT and TGI skills. Thus: 285 TI + 4 TPI = 289 TI in total.

Q043 (2017): The other specialized courts are:
- juvenile courts 155
- military pensions tribunals 36
- the court for navigation on the Rhine 1
- the court for navigation on the Moselle 1
- maritime trade courts 6
- national court of asylum 1

Q043 (2016): The other specialised courts are: 155 juvenile courts; 36 military pension courts; 1 court for navigation on the Rhine; 1 court for navigation on the Moselle; 6 maritime trade courts; 1 national asylum court.
As a matter of fact, the following reforms are on-going:
- The future Tribunal of Paris, whose establishment is scheduled for 14 May 2018, will unify all the services of the TGI (Tribunal de grande instance) currently dispersed over 5 sites, including “Ile de la Cité”, the police court and the first instance courts (tribunaux d’instance);
- Since 1 July 2017, the hearings of the Police Court, previously under the jurisdiction of the “tribunaux d’instance”, have been transferred to the TGI. The aim of this reform is to refocus the tribunaux d’instance on day-to-day civil justice and to centralise criminal litigation at the seat of the TGI.
- Since 1 July 2017, the 311 local courts have been abolished (Law No. 2011-1862 of 13 December 2011), their powers being taken over by the tribuanux d’instance in civil matters and by the police courts attached to the TGI in criminal matters.
- As of 1 January 2019, social litigation, currently divided between the Social Security Courts (TASS), the Disability Dispute Courts (TCI) and the Departmental Social Assistance Commissions (CDAS), will be unified and transferred to the TGI (first instance courts of general jurisdiction). These specialised courts will then be abolished.

Q043 (2015): Other specialised courts are:
Juvenile courts : 155
Military Pensions Courts: 36
Court for navigation on the Rhine: 1
Maritime Courts: 14
National Court of Asylum: 1
Court of First Instance for navigation on the Moselle: 1

Q043 (2014): The reduction of the number of specialised courts is primarily due to the suppression of 70 military pensions courts. The other specialised courts are: Children courts (155); Military pensions courts (36); the Rhine navigation court; commercial maritime courts (14); the National court for asylum right; the Court for the navigation on the Moselle. In contrast with 2010 and 2012 data, a part of the "other specialised courts" was distributed in the proposed categories, namely the agricultural land courts, the courts of rental cases, the Courts for enforcement of criminal sanctions and the courts of incapability litigation.The specialised interregional courts, competent to judge cases of organised crime were added.

Germany

Q043 (General Comment): It is noteworthy that depending on the value at dispute, commercial cases are dealt with at local or regional courts, on application in a chamber established at the regional court for commercial cases. There are no separate commercial courts. Likewise, there are no independent rent and tenancies courts, enforcement courts or courts for insurance cases. Depending on the caseload, special panels of judges are established for this purpose at the local and regional Courts. Family cases are dealt with at first instance in special departments of the local courts (second instance: higher regional courts). The Federal Armed Forces do not have any military courts of their own; its members are generally subject to civil jurisdiction.The federal military disciplinary courts are first instance courts of administrative jurisdiction for disciplinary proceedings against members of the armed forces. The second and highest instance court for isciplinary proceedings against members of the armed forces is the Federal Administrative Court.
Juvenile courts do not exist as independent courts either. They are established at the local courts or regional courts, depending on the severity of the expected sentence and the type of offence. The juvenile courts may be composed of a single criminal judge sitting as youth judge or one or more judges together with lay youth assessors.

Q043 (2024): The category "administrative courts - first instance" inculdes 2 federal military disciplinary courts.
The category “other” covers:
18 finance courts (first instance)
Federal Patent Court and the Federal Finance Court (higher instances)

Q043 (2023): The category "administrative courts - first instance" inculdes 2 federal military disciplinary courts.
The category “other” covers:
18 finance courts (first instance)
Federal Patent Court and the Federal Finance Court (higher instances)

Q043 (2022): Comments - If “Other specialised courts”, please specify:
The category “other” covers:
18 finance courts (first instance)
Federal Patent Court and the Federal Finance Court (higher instances)
In previous cycles, other specialised courts included 16 constitutional courts of the federal states as well as the Federal Constitutional Court. In the current cycle, these courts are no longer included as they are mostly seen as seperate from the ordninary justice system (for further information please refer to the general comment).

Q043 (2021): The category “other” covers:
18 Finance Courts (first instance)
16 Constitutional Courts of the Länder, the Federal Constitutional Court, Federal Patent Court and the Federal Finance Court (higher instances)
With regard to the Constitutional Courts please see General Comment Q 42.

Q043 (2020): The category “other” covers:
18 Finance Courts (first instance)
16 Constitutional Courts of the Länder, the Federal Constitutional Court, Federal Patent Court, Federal Labour Court, Federal Administrative Court, Federal Social Court and the Federal Finance Court (higher instances)
With regard to the Constitutional Courts please see General Comment Q 42.

Q043 (2019): finance courts

Q043 (2018): Finance Courts

Q043 (2017): Finance courts

Q043 (2016): Other specialised 1st instance courts: Finance Courts

Q043 (2015): The data refer to the year 2014. At present, no more recent data are available.

Q043 (2014): In 2014, in comparison with 2012, the number of specialized first instance courts decreased of three labour courts in two Landers.

Greece

Q043 (General Comment): In Greece, there are no special courts for the fields of law described in the question 43, besides those already mentioned. The Greek Constitution is reluctant to provide in the Greek legal system special courts. Instead, within the Courts of First Instance and Courts of Appeal of large cities, we have special Chambers, where the task of adjudicating in special categories of law (e.g. family law, commercial law, etc.) is assigned. Judges entrusted with such duties have usually the correspondent specific studies. As far as other special courts are concerned, special provisions regulate the operation of courts for juveniles (specialized divisions within courts of general criminal jurisdiction), military, navy and air force courts.We clarify that the military,navy and air force courts are under the jurisdiction of the Ministry of National Defense. The Hellenic Court of Audit is a special administrative court. According to the Greek Constitution, administrative disputes are divided between the Council of State, the regular administrative courts, and the Court of Audit. The Court of Audit is staffed by graduates of the National School of Judicial Officers.

Q043 (2024): Court of Audit

Q043 (2023): The Court of Auditors is one of three supreme courts in Greece.

Q043 (2022): The Court of Auditors is one of three supreme courts in Greece.

Q043 (2021): There are no special courts for resolving Internet-related disputes.

Q043 (2020): Administrative courts include: in the first instance 30, in the second instance 9 and 1 Supreme Court(the Council of State).
Juvenile courts are subject to the Courts of First Instance, according to your instructions the choice changed from non-available to non applicable.
The military courts are under a different ministry, specifically the National Defense.
The higher instance other specialized courts is the Court of Auditors that is considered one of three supreme courts in Greece.

Q043 (2017): In Greece, there are no special courts for the fields of law described in the question 43, besides those already mentioned. The Greek Constitution is reluctant to provide in the Greek legal system special courts. Instead, within the Courts of First Instance and Courts of Appeal of large cities, we have special Chambers, where the task of adjudicating in special categories of law (e.g. family law, commercial law, etc.) is assigned. Judges entrusted with such duties have usually the correspondent specific studies. As far as other special courts are concerned, special provisions regulate the operation of courts for juveniles, military, navy and air force courts.

Hungary

Q043 (General Comment): There are military departments at five Regional Courts and at one Regional Court of Appeal. Although they only deal with military related criminal cases, they are not considered as specialized courts as they are a part of the ordinary court system both in administrative and professional management.

Q043 (2023): Regional courts deal with labour cases on first instance. Administrative cases are dealt by eight regional court on a regional level.

Q043 (2020): “Administrative and labour courts (20) were dismissed on the 31st of March 2020. From this date Regional Courts deal with labour cases on first instance while administrative cases are dealt with by eight Regional Court on a regional level”.

Ireland

Q043 (General Comment): The two specialised first instance courts listed above are Special Criminal Court No. 1 and Special Criminal Court No. 2. The latter was established in October 2015 and came into operation, sitting for the first time, in 2016. In previous cycles the category "other" (1) was referring to Special Criminal Court No. 1.
Other than distinctions between jurisdictional levels there is no specialisation - all judges within a court jurisdiction may be allocated to any category of case falling within the jurisdictional remit of the court concerned. Starting in 2013 a new cadre of specialist judges was created in the Circuit Court with specific jurisdiction in relation to certain types of personal insolvency remedy and certain pre-trial order making powers.
Ireland has a specialist regime for the trial of commercial proceedings in the form of the Commercial List of the High Court (known as the 'Commercial Court') but, as it is not a separate legal entity, being a list within and formally a part of the High Court, it is not included as a specialist court as such.
The Labour Court in Ireland is a tribunal rather than a court of law, which is why it is not included in the table of Q43. It cannot award costs; instead, it hears both sides of a case and issues non-binding recommendations. While these recommendations are expected to be given serious consideration, the responsibility for resolving disputes ultimately rests with the parties involved.

Q043 (2024): The Commercial Court cannot be defined as a recognised branch of the High Court but is rather a list of commercial cases heard by the High Court. The Labour Court is a tribunal rather than a court of law.
The Family Courts Act was signed into law in 2024 but has yet to commence. This Act provides for the establishment of a Family High Court, Family Circuit Court and Family District Court as divisions of the existing court jurisdictions and provides for the reallocation of jurisdiction in family law proceedings between the family law courts.

Q043 (2023): There are currently 2 Special Criminal Courts in Ireland who (in general) deal with crimes relating to terrorism and organised crime. While divisions of other courts deal with many of the matters set out in the table above, there are no specialised courts per se to deal with same.
Furthermore, while there are other tribunals or bodies outside of the court system which have powers to make determinations in some of the matters in the table (e.g., the Labour Court and Military Courts), these tribunals are not within the courts system.

Q043 (2022): There are currently 2 Special Criminal Courts in Ireland who (in general) deal with crimes relating to terrorism and organised crime. While divisions of other courts deal with many of the matters set out in the table above, there are no specialised courts per se to deal with same.
Furthermore, while there are other tribunals or bodies outside of the court system which have powers to make determinations in some of the matters in the table (e.g., the Labour Court and Military Courts). These tribunals are not within the courts system.

Q043 (2019): Legislation to provide for a Family Court has been proposed

Italy

Q043 (General Comment): Since 2014 in Italy there are 22 Brand Commercial courts (Tribunali delle imprese) that are legal entities of their own and not just internal court divisions for organizational purpose (such as labour, family etc.).
Notably, in Italy, some specialised first-instance courts are not administered or financed by the Ministry of Justice. These include regional audit commissions, local tax commissions and military courts. As a result, these courts are not considered in responses regarding court budgets, cases, judges, or non-judge staff. Regional audit commissions are not even counted in the number of courts. Conversely, regional administrative courts (first-instance administrative courts) and the supreme administrative court, although they are also not administered or financed by the Ministry of Justice, are included in the counts. Since 2014, they have been considered in the totals for the number of courts and cases. Additionally, starting from 2018, they have been included in the counts for the number of judges, non-judge staff and in the courts budget.
Moreover, in Italy specific matters (such as labour, family etc.) are dealt by specific divisions within the same Court. There are also 26 divisions called DDA (Direzioni Distrettuali Antimafia) which deal specifically with mafia and organized crime.

Q043 (2023): The appeal of some specialized courts (e.g. commercial courts, juvenile courts) are dealt by the general jurisdiction appeal courts. Specific subject matters (e.g labour, insolvency, family, fight against terrorism and organised crime) are dealt by specific divisions within general jurisdiction courts. See general comment for details. The option “Other specialised courts” refers to tax courts.

Q043 (2022): The appeal of some specialized courts (e.g. commercial courts, juvenile courts) are dealt by the general jurisdiction appeal courts. Specific subject matters (e.g labour, insolvency, family, fight against terrorism and organised crime) are dealt by specific divisions within general jurisdiction courts. See general comment for details. The option “Other specialised courts” refers to tax courts.

Q043 (2021): The appeal of some specialized courts (e.g. commercial courts, juvenile courts) are dealt by the general jurisdiction appeal courts.
Specific subject matters (e.g labour, insolvency, family, fight against terrorism and organised crime) are dealt by specific divisions within general jurisdiction courts. See general comment for details.

Q043 (2020): Tax courts fall into the “Other” category.
The appeal of some specialized courts (e.g. commercial courts, juvenile courts) are dealt by the general jurisdiction appeal courts.
Specific subject matters (e.g labour, insolvency, family, fight against terrorism and organised crime) are dealt by specific divisions within general jurisdiction courts. See general comment for details.

Q043 (2019): The category “other” subsumes 29 Minor (or Juvenile) Courts and 103 Tax Courts

Q043 (2018): The category “other” category subsumes 29 Minor (or Juvenile) Courts and 103 Tax Courts.

Q043 (2017): Other: 29 Minor (or Juvenile) Courts + 103 provincial tax commissions

Q043 (2016): OTHER: 29 Minor (or Juvenile) Courts + 103 Local Tax Commissions

Latvia

Q043 (General Comment): The Economic court, is specialized in commercial cases so it can be classified as a specialized court within the scope of this question. It is a first instance court.
The administrative court can be considered as a first and second instance specialized court (within the scope of this question). The Administrative District Court in Riga and the Administrative Regional Court are located in one building. As to the category “military courts”, the reply NA is justified by the fact that according to the Law on Judicial Power, judicial power in the Republic of Latvia is vested in district (city) courts, regional courts, the Supreme Court and the Constitutional Court, but in state of emergencies or during war – also military courts. The rest of the courts in Latvia are not established, and therefore in this case should be NAP.

Q043 (2024): There is an Economic Court, which is specialized in commercial cases, so it can be classified as a specialized court within the scope of this question; however, it is a first instance court. There is also a specialized court that cannot be listed as a court of any instance — the Constitutional Court, which adjudicates matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters within its jurisdiction.
The Administrative Court can be considered a specialized court of both first and second instance (within the scope of this question). As for the category “military courts,” the reply “NA” is justified by the fact that, according to the Law on Judicial Power, judicial power in the Republic of Latvia is vested in district (city) courts, regional courts, the Supreme Court, and the Constitutional Court; however, in a state of emergency or during wartime, it may also be exercised by military courts. The rest of the courts in Latvia are not established and, therefore, in this case, the appropriate response is “NAP.”

Q043 (2023): There is Economic court, which is specialized in commercial cases so it can be classified as a specialized court within the scope of this question, but it’s a first instance court.
There is a specialised court which cannot be listed as a court of any instance - the Constitutional Court, which adjudicates matters regarding the conformity of laws and other regulatory enactments with the Constitution, as well as other matters regarding which jurisdiction is conferred upon it.
Administrative court can be considered as a first and second instance specialized court (within the scope of this question). As to the category “military courts”, the reply NA is justified by the fact that according to the Law on Judicial Power, judicial power in the Republic of Latvia is vested in district (city) courts, regional courts, the Supreme Court and the Constitutional Court, but in state of emergencies or during war – also military courts. The rest of the courts in Latvia are not established, and therefore in this case should be NAP.

Q043 (2021): Military courts is established in state of emergency or during a war. On 1 July 2020, amendments to the Law on Judicial Power came into force, providing for the establishment of the Economic Court, which is competent for both certain types of civil and criminal cases. Accordingly, the Court is competent for specific commercial disputes and criminal cases, which cause significant damage to the business environment and economic development. The Economic Court is indicated as Commercial Court. As for Administrative court - first instance court is Administrative District Court and for higher instance is indicated Administrative Regional (appeal) instance Court.

Q043 (2020): Military courts is established in state of emergency or during a war. On 1 July 2020, amendments to the Law on Judicial Power came into force, providing for the establishment of the Economic Court, which is competent for both certain types of civil and criminal cases. Accordingly, the Court is competent for specific commercial disputes and criminal cases, which cause significant damage to the business environment and economic development. The Economic Court is not counted yet in the total number of specialized courts, because it will start its action on 31st March 2021. As for Administrative court - first instance court is Administrative District Court and for higher instance is indicated Administrative Regional (appeal) instance Court.

Q043 (2019): There is only Administrative court in Latvia. On July 1, 2020, amendments to the Law “On Judical Power” entered into force. The Amendments provides for the establishment of the Court of Economic Affairs. The Economic Court will take office on 1 January 2021.

Q043 (2018): There is only Administrative court in Latvia.

Q043 (2016): There is only one specialised court the administrative court with 5 court houses

Luxembourg

Q043 (General Comment): Courts of general jurisdiction are organized into specialized sections. For example, the commercial courts (which also deal with insolvency cases) are specialized sections of the district court. Only the administrative, military and social security courts of first instance are autonomous.

Q043 (2020): Pour 2020, seules les entités juridiques ont été prises en considération dans le tableau.

Q043 (2017): Please note that the total of 043 is not identical to the total in 042, as most of the specialized courts are in fact specialized sections of a general court. E.g. the commercial courts (which also deal with insolvency cases) are specialized sections of the district court (tribunal d'arrondissement). Only the administrative, military and 1st instance social security courts are selfstanding.

Q043 (2016): Please note that the total of 043 is not identical to the total in 042, as most of the specialized courts are in fact specialized sections of a general court. E.g. the commercial courts (which also deal with insolvency cases) are specialized sections of the district court (tribunal d'arrondissement). Only the administrative, military and 1st instance social security courts are selfstanding.

Q043 (2014): Most of the areas mentioned in the question are within the competence of district courts (commercial cases, insolvency cases, family law cases and all criminal cases except for offenses that are under the jurisdiction of justices of peace) and justices of peace (labour law cases, rental cases). The indicated total is a purely statistical information which does not reflect the reality.

Malta

Q043 (General Comment): The number of specialised courts includes non-criminal, administrative and criminal courts established as legal entities in line with the CEPEJ methodology. The seven (7) specialised courts referred to in Q43 are the Rent Regulation Board, the Land Arbitration Board, the Rural Leases Control Board, the Small Claims Tribunal, the Court of Voluntary Jurisdiction, the Administrative Review Tribunal and the Juvenile Court. Other courts previously counted as specialised courts, such as the Family Court and the Commercial Court, are divisions of the Civil Court, First Hall, and as such are now being included with the 1st Instance Courts of General Jurisdiction. The higher instance 'Otehr specialised court' refers to the Constitutional Court.

Q043 (2022): The identified specialised courts listed under 'Other specialised courts' are:
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction
- the Constitutional Court (higher instance court)

The Juvenile Court is a specialised criminal court.

Q043 (2021): The first instance specialised courts are:
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction
- the Juvenile Court

Under the second instance specialised courts, we are including the Constitutional Court which is a court that deals exclusively with constitutional cases.

Q043 (2020): A number of courts that used to be previously identified as specialised courts, are not being categorised this time, given that they all make part of the First Hall, General Jurisdiction Court. These are:
- The Commercial Court (including insolvency cases)
- The Family Court

The identified specialised courts listed under 'Other specialised courts' are:
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction

The Juvenile Court is a specialised criminal court.

Q043 (2019): The courts referred to under 'Other specialised 1st Instance courts' include:
- The Civil Court, First Hall
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction

Q043 (2018): The courts referred to under 'Other specialised 1st Instance courts' include:
- The Civil Court, First Hall
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal
- the Court of Voluntary Jurisdiction

Q043 (2017): The other specialised 1st Instance courts include:
- the Civil Court, First Hall
- the Court of Voluntary Jurisdiction - the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal

Q043 (2016): The other specialised 1st Instance courts include:
- the Civil Court, First Hall
- the Land Arbitration Board
- the Rural Leases Control Board
- the Small Claims Tribunal

Netherlands

Q043 (General Comment): See the comment under Q42 on the other special (not specialised) appeal tribunals as well.
The Trade and Industry Appeals Tribunal, also known as the Administrative High Court for Trade and Industry (College van van Beroep voor het Bedrijfsleven) is a specialized administrative court, which rules on disputes in the area of social-economic administrative law, and appeals for specific laws. The tribunal hears both first and second instance cases, but is categorized as a first instance court.
The Central Appeals Tribunal (Centrale Raad van Beroep) is a court of appeal mainly active in legal areas pertaining to social security and civil service. In these areas, it is also the highest judicial authority. In some cases, it is the first and sole instance.
The Administrative Jurisdiction Division of the Council of State is the highest administrative court with general jurisdiction in the Netherlands. It hears various types of appeals (e.g. members of the public / associations / commercial companies against governmental bodies, or between public authorities).
There is no separate military court, but there is a military chamber in one of the district courts.

Q043 (2021): See also comment at Q42 on the other special (not specialized) appeal tribunals.
Trade and Industry Appeals Tribunal, also known as the Administrative High Court for Trade and Industry (College van van Beroep voor het Bedrijfsleven). This is a specialized administrative court, which rules on disputes in the area of social-economic administrative law, and appeals for specific laws. The tribunal hears both first and second instance cases, but is categorized as a first instance court.
The Central Appeals Tribunal (Centrale Raad van Beroep) is a court of appeal mainly active in legal areas pertaining to social security and civil service. In these areas, it is also the highest judicial authority. In some cases, it is the first and sole instance.
The Administrative Jurisdiction Division of the Council of State is the highest administrative court with general jurisdiction in the Netherlands. It hears various types of appeals (e.g. members of the public / associations / commercial companies against governmental bodies, or between public authorities).

Q043 (2020): The specialized courts are:
Trade and Industry Appeals Tribunal: the administrative High Court for trade and industry. This tribunal is a specialized administrative court that rules on disputes in the area of social-economic administrative law. Categorized as administrative court.
The Central Appeals Tribunal is the highest judicial authority in areas of social security and civil service. Categorized as other.

Q043 (2017): same as last year

Q043 (2015): Currently the commercial court in the Netherlands is the specialized court CBb. Per January first 2017 starts the Netherlands Commercial Court (NCC).

Poland

Q043 (2020): There are 7 military courts of first instance and 2 military courts of higher instance in Poland.

Q043 (2019): It is noteworthy that the Land and Mortgage Courts which are within the structure of the common court system deal with specific topics, but they are departments.
Besides, the National Court Register and Pledge Registry Departments are business divisions.
The EU Trademark and Community Design Court (which existed in the XXII Division of the District Court in Warsaw)- functioned from 2004 until the creation of intellectual property courts, which took place on 1 July 2020. Cases in the field of intellectual property belong to the jurisdiction of selected District Courts (Article 47990 of the Code of Civil Procedure), while the District Court in Warsaw (XXII Division) has exclusive jurisdiction in matters of intellectual property concerning computer programs, inventions, utility models, topography of integrated circuits, plant varieties and company secrets of a technical nature.
The Court of Competition and Consumer Protection is a special department functioning within the District Court in Warsaw. In the current state of law, the scope of activity of the 17th Department of the Court of Competition and Consumer Protection includes the handling of the following cases in court proceedings of appeals and complaints against decisions and orders issued by the government: the President of the Office of Competition and Consumer Protection, the President of the Energy Regulatory Office, the President of the Railway Transport Office, the President of the Office of Electronic Communications.
When it comes to matters from lease or tenancy agreements - as long as these matters are of an economic nature, they are recognized by business departments, as are matters related to new technologies and the Internet space.

Portugal

Q043 (General Comment): Q.43 -total:The number given under Q43.1.1 includes 17 first instance courts and 3 higher instance courts of administrative jurisdiction that are not included under Q.42.2. Administrative courts are part of another jurisdiction and under our law cannot be considered specialized courts.

Q043 (2024): We put the intelectual property court that was before under internet disputes in "other

Q043 (2020): «Commercial courts» deal with, inter alia, winding up of the company, insolvency and suspension and revocation of company resolutions.
«Internet related disputes»: only for Internet domain system (DNS) issues, which are under the jurisdiction of the Intelectual Property Court; for all other Internet related issues, general jurisdiction courts are competent. Internet related disputes were not included in the number of specialised courts for previous cycles.
«Other specialised courts”: includes all other courts that are not listed in the categories above.
This category includes Civil Central Judicial Divisions, Criminal Central Judicial Divisions, Civil Local Proximity Judicial Divisions, Criminal Local Proximity Judicial Divisions, Petty Criminality Local; Proximity Judicial Divisions, Criminal Examination Judicial Divisions, Enforcement Judicial Divisions, Central Criminal Examination Court, Competition Court and Maritime Court.

Q043 (2019): This category includes Civil Central Judicial Divisions, Criminal Central Judicial Divisions, Civil Local Proximity Judicial Divisions, Criminal Local Proximity Judicial Divisions, Petty Criminality Local Proximity Judicial Divisions, Criminal Examination Judicial Divisions, Enforcement Judicial Divisions, Central Criminal Examination Court, Intelectual Property Court, Competition Court and Maritime Court.

Q043 (2018): Changes to the judicial organization (Law n. 40-A/2016, 22 December) are in force since January 1, 2017.

Q043 (2017): Changes to the judicial organization (Law n. 40-A/2016, 22 December) are in force since January 1, 2017. Other specialised 1st instance courts include, among others: Criminal Instruction Courts, Maritime Courts; Intelectual Property and Competition Court; Enforcement Courts.
Law 31/2012, 14 August, put in force the Rent and tenancy section (Balcão Nacional do Arrendamento) that is functioning since 8
January 2013.

Q043 (2015): In 2013-2014, the Reform of the Portuguese Judicial system was implemented. One of the major goals of this reform was to set up specialised courts on a national level, which led to a significant increase of commercial courts compared to previous years.

The difference between Q42.2 and Q43 is due to the inclusion of the 20 administrative courts in Q43. In Portugal, the administrative jurisdiction is autonomous, independent from the civil jurisdiction and cannot be considered as specialised courts.

Other courts:
Other specialised 1st instance courts include: Criminal Instruction Courts, Maritime Courts; Intelectual Property and Competition Court; Enforcement Courts.
Law 31/2012, 14 August, put in force the Rent and tenancy section (Balcão Nacional do Arrendamento) that is functioning since 8 January 2013

Q043 (2014): In 2013-2014, the Reform of the Portuguese Judicial system was implemented. One of the major goals of this reform was to set up specialised courts on a national level, which led to a significant increase of commercial courts compared to previous years.

For 2014, the category “other” subsumes as in 2012 Criminal Instruction Courts, Maritime Courts, Intellectual Property and Competition Court and Enforcement Courts. Additionally, the Rent and tenancy section (Balcão Nacional do Arrendamento) has been established by law in August 2012 and is functioning since 8 January 2013.

Romania

Q043 (2024): Law no. 304/2022 on the judicial organisation.

Q043 (2023): Law no. 304/2022 on the judicial organisation.

Q043 (2022): Law no. 304/2022 on the judicial organisation.

Q043 (2020): Law no. 304/2004 on the judicial organisation.

Slovak Republic

Q043 (General Comment): In the Slovak court system there are 8 Regional courts which are the courts with dual competence. The Regional courts are the courts of appeal with the general jurisdiction in the civil, commercial and the criminal cases. In the appellate procedure they decide the appeals lodged against the decisions of all 54 District courts within their local jurisdiction. At the same time the Regional courts have the jurisdiction as the courts of first instance in administrative matters. They act as the administrative courts.
The Specialized Criminal court is competent to judge the grave criminal matters enumerated in the § 14 of the Criminal procedure Code (e. g. premeditated murder, corruption, terrorism, organised crime, severe economic crimes, damaging the financial interests of the EU etc.). Highest instance courts are the Supreme Court, Supreme Administrative Court and the Constitutional Court.

Q043 (2021): The first instance administrative cases agenda is concentrated in eight regional courts, which also act as general courts of appeal. The question (43.) defines specialized courts as legal entities, so it cannot be understood that the administrative cases agenda is centralized on specialized courts as legal entities, but it is concentrated on 8 regional general courts. These 8 general regional courts are already legal entities included in Q42, line 1.2. Highest instance courts are the Supreme Court and the new Supreme Adminstrative Court.

Q043 (2020): The first instance administrative cases agenda is concentrated in eight regional courts, which also act as general courts of appeal. The question (43.) defines specialized courts as legal entities, so it cannot be understood that the administrative cases agenda is centralized on specialized courts as legal entities, but it is concentrated on 8 regional general courts. These 8 general regional courts are already legal entities included in Q42, line 1.2.

Slovenia

Q043 (General Comment): Although the given answer for 'labour courts' is 4 and 'insurance and/ or social welfare courts' at first instance is 1, the total number of these courts is 4, as one of the labour courts and the social court form a single legal entity – the Labour and social court in Ljubljana.
Concerning specialised courts – higher instances, although the given answer for 'labour courts' is 1 and 'insurance and/ or social welfare courts' is 1, the total number of these courts is 1, as they form a single legal entity – the Higher labour and social Court.

Q043 (2019): Please see general comment.

Spain

Q043 (General Comment): The Arbitration Court was created by decision of the General Council of the Judiciary of 25 November 2010. The latter assigns exclusive jurisdiction over arbitration matters to the Court of First Instance No. 101 of Madrid. This measure seeks to foster the development of uniform criteria in court proceedings for the assistance and control of arbitration in Madrid.
In Spain, as general rule, the First Instance are unipersonal Courts: One Judge-courts. In Spain we have two types of specialization: Special Jurisdictions established by Organic Law (Violence against women, Commercial, for example), and the possibility for GCJ to determine that in some places, a general jurisdiction Court (Civil) is focused in some kind of cases.

Q043 (2024): Courts Labour specialised in enforcement; Courts on enforcement of Arbitration; Civil Registry; Courts on Penitentiary Surveillance; Courts for mortgage enforcement; Courts on capacity of persons; Criminal Courts of Violence against Women; other
There was an increase in the number of commercial courts.

Q043 (2023): Specialized Courts: Specialized Labor Enforcement Courts, Arbitration Enforcement Court, Penitentiary Surveillance Courts, Mortgage Enforcement Courts, Courts for Personal Capacity, Criminal Courts for Violence Against Women, other. The final number is lower than that of the previous year.

Q043 (2022): Courts Labour specialised in enforcement; Courts on enforcement of Arbitration; Civil Registry; Courts on Penitentiary Surveillance; Courts for mortgage enforcement; Courts on capacity of persons; Criminal Courts of Violence against Women; other

Q043 (2021): "Juzgados de lo Mercantil" are in Spain in charge of insovencies and commercial cases (both). So it cannot be separated commercial and insolvency.

Q043 (2020): Commercial courts - new units have been established.

Q043 (2019): Courts of violence against women 106
Foreclosure proceedings Courts: 3
Court of arbitration: 1
Civil capacity courts: 13
Criminal courts: 348
Criminal courts specialized in Violence against women, 31
Juvenile Courts: 82
Prison courts: 51
Civil Registries: 28

Q043 (2018): Between 2016 and 2018, more first instance courts have become specialized in family matters. Courts of violence against women: 106
Foreclosure proceedings Courts: 3
Court of arbitration: 1
Civil capacity courts: 12
Criminal courts: 341
Criminal courts specialized in Violence against women, 32
Juvenile Courts: 82
Prison courts: 51
Civil Registries: 28
Additionally (and they are not accounted) there are 26 military courts that are not part of the Judiciary but they are inspected by it)

Q043 (2017): -338 Criminal courts
-32 Criminal courts specialized in violence against women
-106 violence against women courts
-82 juvenile courts
-51 Prison courts
-3 foreclosure proceedings courts
-1 Arbitration court
-18 Civil Capacity courts
- 28 Civil register offices

Q043 (2016): - 335 Criminal courts
-30 Criminal courts specialized in violence against women
-106 violence against women courts
-83 juvenile courts
-51 Prison courts
-3 foreclosure proceedings courts
-1 Arbitration court
-18 Civil Capacity courts
- 28 Civil register courts

Q043 (2015): Other specialised courts include: 343 Penal courts; 23 Penal courts specialized in violence against women; 106 violence against women courts; 83 juvenile courts; 50 Prison courts; 3 foreclosure proceedings courts; 1 Arbitration court; 12 Civil Capacity courts and 28 Civil registry.

The Commercial Courts deal with insolvency issues.

Military Courts have not been accounted because they do not belong to the Judiciary (except the Supreme Court 5th room). There are other 26 Military Courts.

Q043 (2014): In 2014, the category “other” encompasses: 357 Penal courts; 23 Penal courts specialized in violence against women; 106 violence against women courts; 83 Juvenile courts; 50 Prison courts; 16 Courts for disabled people (capacity courts), 26 Civil Register Courts, 3 Foreclosure proceedings courts (mortgage courts); 1 Arbitration court. The Decanatos exclusive are not included in this exercise because these organs are not courts and have rather administrative nature.

Question 044

Austria

Q044 (2024): The discrepency is due to an error in calculation last year. This should also have been the correct numbers in last years' report. The Lower Austria Regional Administrative courts has "external offices" in parts of Lower Austria, and the Federal Administrative Court as well as the Federal Tax Court do have regional buildings in the Federal States as well. This was taken into account in 2022 data, where another mistake seems to have been included (the number should have been 162 and 168 in 2022. Afterwards we lost 2 district courts).

Q044 (2020): For this cycle, data on geographic locations is presented in respect of different locations for different instances, in compliance with the methodology developed in the Explanatory Note. The variation observed with previous cycles is only of a methodological nature.

Q044 (2016): It is planned to reduce the number of courts by 3 in 2018 (-1) and 2019 (-2)

Belgium

Q044 (General Comment): Deduction made on the basis of the number of buildings in which the courts are housed: 225 buildings in which all our premises are housed. In Eupen, the first instance court groups together the first instance court, the labour court and the company court, giving a total of 8 labour courts and company courts (Law of 14 February 2014).

Q044 (2020): Deduction made on the basis of the number of buildings in which the courts are housed: 225 buildings in which all our premises are housed. In Eupen, the first instance courts combines the court of first instance, the labour court and the company court, which gives 8 for the labour and company courts (Law of 14 February 2014)

Q044 (2016): A reform of the justices of the peace is under way: 1. a reduction in the number of geographical settlements 2. expansion of their jurisdiction by increasing the amount of claims.
The reform of the cantons (justices of the peace) was launched in 2016 and resulted in the law of 25 December 2017 which formally amended or abolished the cantons. The amendments come into force over 1.5 years.

Q044 (2014):
According to 2014 data, a change in the number of seats of the justices of the peace is ongoing. Similarly, from 1 April 2014, the statutory number of courts has been decreased for commercial, labour and police first instance courts while keeping the existing geographical seats.

Bulgaria

Q044 (2024): 1/ First instance courts geographic locations (this includes 1st instance courts of general jurisdiction and first instance specialised courts) – administrative, military and district as the Sofia District Court is located in two premises;
2/ All the courts (geographic locations) (this includes 1st instance courts of general jurisdiction, first instance specialised courts, all second instance courts and courts of appeal and all Supreme Courts)– Supreme Court of Cassation, Supreme Administrative Court, military appellate courts, administrative courts, regional courts, military courts and district courts (Sofia District Court, Sofia City Court and Sofia Appellate Court are located each in two premises for a total of six)

Q044 (2023): The Sofia Appellate Court, Sofia City Court and Sofia District Court are housed in two court buildings each, where sessions are held

Q044 (2022): Sofia District Court has two buildings where hearings are held.

Q044 (2018): Proposals for amendments to the Code of Administrative Procedure and Code of Civil Procedure to change the jurisdiction of the district and administrative courts with a view to regulating their workload. A model for the optimization of the judicial map at the level of district courts will be developed in implementation of a project under the Operational Program "Good Governance" 2014-2020.

Q044 (2016): Proposals for amendments to the Administrative Procedure Code and the Code of Civil Procedure are intended to reform the jurisdiction of regional and administrative courts in order to regulate their workload. Within the implementation of a project under “Good governance” Operational Programme 2014-2020 a model for optimization of the judicial map on regional courts level will be developed.

Croatia

Q044 (2020): The reorganisation of judicial map that started in 2015 in which the number of municipal and misdemeanour courts as well as the number of municipal state attorneys’ offices has been reduced continued in 2019 with the merger of municipal and misdemeanour courts into municipal courts.
The reasons for the merger were a significant decrease in the number of misdemeanour cases and overburdened municipal courts with civil cases. In the new judicial map, instead of 46 municipal and misdemeanour courts, there are now 34 municipal courts - all misdemeanour and municipal courts were merged in the same cities except in 2 largest cities, Zagreb and Split, in which specialised municipal courts for misdemeanour cases were retained, and due to geographical specificities and size of certain municipal courts they were separated and new municipal courts were established (10). Also, a new commercial court was established in Dubrovnik. The aim of this new judicial map with new courts in the network and increased jurisdiction of permanent services is to increase the efficiency of the courts, improve access to court services, ensure even distribution of the workload of judges, shorten the length of court proceedings, reduce the number of unresolved cases in municipal courts, and ensure optimisation and easier management of human resources in courts.

Q044 (2018): The reorganisation of judicial map that started in 2015 in which the number of municipal and misdemeanour courts as well as the number of municipal state attorneys’ offices has been reduced continued in 2019 with the merger of municipal and misdemeanour courts into municipal courts.
The reasons for the merger were a significant decrease in the number of misdemeanour cases and overburdened municipal courts with civil cases. In the new judicial map, instead of 46 municipal and misdemeanour courts, there are now 34 municipal courts - all misdemeanour and municipal courts were merged in the same cities except in 2 largest cities, Zagreb and Split, in which specialised municipal courts for misdemeanour cases were retained, and due to geographical specificities and size of certain municipal courts they were separated and new municipal courts were established (10). Also, a new commercial court was established in Dubrovnik. The aim of this new judicial map with new courts in the network and increased jurisdiction of permanent services is to increase the efficiency of the courts, improve access to court services, ensure even distribution of the workload of judges, shorten the length of court proceedings, reduce the number of unresolved cases in municipal courts, and ensure optimisation and easier management of human resources in courts.

Q044 (2016): There is a new judicial reform in plan in which the misdemeanour courts will be merged with municipal courts (both 1st instance courts).

Q044 (2014): According to the new Act on Territories and Seats of Courts (Official Gazette 128/14), that entered into force on the 1st of April 2015, a further rationalization of the network of municipal (from 67 to 24) and misdemeanour courts (from 63 to 22) and the establishment of an additional commercial court (8 instead of 7) are to be carried out from 1st of April and 1st of July.
As well, the new Act introduces changes regarding the territorial jurisdiction with regard to dealing with appeals. In criminal cases, any county court can decide on appeals lodged against judgments, while only few county courts may decide on appeals in land, labor and family matters.

Cyprus

Q044 (2018): In 2019 a New administrative court of international protection has been established that will deal with asylum cases.

Q044 (2016): Bills are being drafted for the creation of a commercial court and a first instance asylum administrative court.

Q044 (2014): In the frame of the 2014 exercise, it has been pointed out that an Administrative court has been established in Cyprus and started functioning on the 7th of January 2016.

Czech Republic

Q044 (2024): 6 regional courts and 3 district courts have their branches in other cities.

Q044 (2023): 6 regional courts and 3 district courts have their branches in other cities.

Q044 (2022): 6 regional courts and 3 district courts have their branches in other cities.

Q044 (2021): 6 regional courts and 3 district courts have their branches in other cities.

Q044 (2020): 6 regional courts and 3 district courts have their branches in other cities.

Denmark

Q044 (2024): Included in the 26 courts are the 24 districs courts as well as the Maritime and Commercial Court and the Land Registration Court. Inlcuded in the 29 courts are the two high courts and the Supreme Court.

Q044 (2023): Included in the 26 courts are the 24 districs courts as well as the Maritime and Commercial Court and the Land Registration Court. Inlcuded in the 29 courts are the two high courts and the Supreme Court.

Q044 (2022): Included in first instance courts are district courts, Land Registration Court and the Maritime and Commercial Court.

Q044 (2021): The 26 are all the 24 district courts plus the Maritime and Commercial Court and Land Registration Court. In the figure 29 is the two high courts and the Supreme Court included.

Q044 (2020): Included in first instance courts are district courts, Land Registration Court and the Maritime and Commercial Court.

Estonia

Q044 (General Comment): Estonia has 17 courthouses of county courts (first instance courts), 4 courthouses of administrative courts (first instance courts), 2 courthouses of appellate courts (second instance courts) and 1 courthouse of the Supreme Court (highest instance court), all together 24 courthouses. However, as some of the courts are situated in the same house (e.g Tallinn Administrative Court and Tallinn Circuit Court) and taking into account the fact that Pärnu County Court has a courthouse that is divided between two locations, there are 20 actual geographical locations of Estonian courts.

Q044 (2020): Tartu county court closed one courthouse, so now there's 20 geographic locations.

Q044 (2014): In the end of 2015 the Council for Administration of Courts devised the merger of two courthouses in Estonia that are situated very close to each other (20 km). Both houses will remain open but will have joint territorial jurisdiction and administration.

Finland

Q044 (2018): As of 1 January 2019, the district courts will be centralised by decreasing the number of the courts from 27 to 20. A court can have more than one office. The number of the district courts' offices will be reduced from 57 to 36 offices.
As of 1 September 2019, undisputed civil cases (for example debt collection, unpaid rents, other small debts and eviction cases) which are handled and decided in summary proceedings will be centralised from all 20 district courts to nine district courts.

Q044 (2016): In Finland is ongoing structural reform of the District Courts in which the number of the courts will be decreaced from 27 to 20. The main target is to merge smaller courts in to bigger units that would be more efficient and profitable and also maintain high quality. At the same time the geographichal locations of the District Courts will be decrased from 57 to 36. This means that in addition to the 7 administrational offices that will be shut down, 5 side offices and 13 separate locations for hearing will be closed. Instead the use of video conference, electronic services and other IT-solutions would be increased. Deadline for the new project is 31.12.2018 so that the reform would be in force in the beginning of the year 2019. The government's proposal has been given at January 2017. The handling of the proposal in the parliament is unfinished.

Q044 (2014): According to 2014 data, for the foreseeable future the next reform is the developing of the structure of the District Court network. The foreseen change is a reduction of the number of District Courts.

France

Q044 (2024): The figures shown in the table relate to both, administrative courts and civil and criminal courts. For administrative courts:
54 courts of first instance - geographical locations
63 all courts - geographical locations Some courts of first instance have several premises where hearings are held:
- Administrative court of Guadeloupe, Saint Martin, and Saint Barthélemy: administrative court building in Guadeloupe, local court in Marigot (Saint Martin), and the converted Public Treasury room in Gustavia (Saint Barthélemy): 3
- Administrative court of Martinique and Saint-Pierre-et-Miquelon: court building in Martinique and the judicial court of Saint-Pierre-et-Miquelon: 2
- Administrative court of New Caledonia and Wallis and Futuna: court building in New Caledonia and court of first instance in Mata-Utu (Wallis and Futuna): 2
- National Court of Asylum: National Court of Asylum building, Administrative Court of Réunion, Administrative Court of Mayotte, Administrative Court of Martinique, Administrative Court of Guadeloupe, and Administrative Court of French Guiana (6).
When hearings are not held at the National Court of Asylum, mobile hearings or video hearings are held.
In addition, pursuant to Article 70 of Law No. 2024-42 of January 26, 2024, on immigration control and improved integration, five regional chambers of the National Court of Asylum were created on September 1, 2024, in Bordeaux, Lyon (two chambers: one geographical location), Nancy, and Toulouse.

Q044 (2023): This was not taken into account in the data provided in previous years, but some administrative courts of first instance have several premises where hearings are held:
- administrative court of Guadeloupe, Saint-Martin and Saint-Barthelemy: building of the administrative court in Guadeloupe, the local court in Marigot (Saint-Martin) and the room at the Treasury in Gustavia (Saint-Barthelemy): 3
- Martinique and Saint-Pierre-et-Miquelon administrative court: court building in Martinique and the Saint-Pierre-et-Miquelon judicial court: 2
- administrative court of New Caledonia and Wallis and Futuna: court building in New Caledonia and court of first instance in Mata-Utu (Wallis and Futuna): 2
- National court of asylum: National court of asylum building, Lyon administrative court of appeal, Nancy administrative court of appeal, Reunion administrative court, Mayotte administrative court, Martinique administrative court, Guadeloupe administrative court and French Guyana administrative court (8). When hearings are not held at the National court of asylum, mobile hearings or video hearings are held.

Q044 (2022): The data encompass both judicial orders: "ordre judiciaire" and "ordre administrative": 1) administrative courts at first instance (including common law jurisdictions at first instance and specialized jurisdictions at first instance): 32 in mainland France / 11 overseas territories; 2) all administrative courts (this figure includes common law courts at first instance, specialized courts at first instance, all second-instance courts and appellate courts, as well as all Supreme Courts): 42 in mainland France / 11 overseas territories.

Q044 (2021): 661: this figure takes into account all courts of first instance, excluding Courts of appeal (CA). Sites hosting only a Court of appeal have therefore been excluded from this count. Sites hosting both a CA and a court of first instance have been counted only once (hence the difference of 44: 37 CAs occupying 44 sites), 43 of which are for the administrative order.
715: this figure takes into account all courts, whether on appeal or at first instance. When a court of first instance and a Court of appeal are located on the same site, they have been counted separately, including 53 for the administrative order.

Q044 (2020): "With regard to the judiciary, there are 576 courts of first instance - geographic locations. This figure takes into account, by number of sites, all the courts of first instance, excluding the second instance court. Sites hosting exclusively a second instance court have therefore been excluded from this count. Sites hosting both a CA and a trial court were counted only once. There were 619 Courts geographic locations counted. This figure takes into account, by number of sites, all the jurisdictions whether they are appeal or first instance. Moreover, when a first instance court and a second instance court are located on the same site, they have been counted twice (hence the difference of 43 with the previous question: 37 CA which occupy 43 sites).
As regards the administrative order, there are 42 first instance courts for the administrative order and 53 all courts for the administrative order. "

Q044 (2016): A reform could take place within the framework of the bill on Justice programming presented in 2018. If no court site should be closed, the organization could be modified, particularly at the level of the courts of appeal, whose map is very different from those of the current administrative regions. There could also be only one first instance court per department.

Q044 (2014): As of 1 September 2014, the high courts (TGI) were resettled in the towns of Saint-Gaudens, Saumur and Tulle. Moreover, seconded chambers (geographic locations) were created on the same date in Guingamp and Marmande and on 1 January 2015 in Millau. A draft law to modernise the justice provides that the litigation of social security affairs and disability will be brought together before the TGI. Small offences ruled before the District Court will be transferred to TGI; similarly, compensation for personal injury will be entirely the responsibility of the TGI.

Germany

Q044 (General Comment): The figures in this section are taken from the statistic "Federal and State Courts" that does not distinguish between legal entities and geographic location of the courts. Generally, one legal entity equals one geographic location. Some courts have additional points of presence in other geographic locations. Since the exact number of geographic locations in comparison to legal entities is unknown, the figures from the statistic "Federal and State Courts" were used to answer this question as well.

Q044 (2018): The possibility of combining courts is being considered by individual Länder in order to reduce costs. The regional structures have proven effective.
On 5 November 2019, the Land Government of Schleswig-Holstein adopted a statutory instrument on the concentration of jurisdiction which combines existing concentrations of jurisdiction while adding further concentration provisions. The instrument will be promulgated at the end of the month.

Q044 (2016): The possibility of combining courts is being considered by individual Länder in order to reduce costs.

Greece

Q044 (2020): The total number of courts includes the Court of Auditors

Q044 (2014): According to 2014 data, the Law 1756/1988, article 2, as modified by the Law 4123/2013, provides for a reduction of the number of courts. Besides, the Law 1756/1988, article 4, as modified by the Law 4264/2014, provides for a change in the powers of courts.

Hungary

Q044 (2018): According to proposed legislation an independent administrative court system may be established in the future.

Q044 (2016): Two new district courts will be established (one in 2017 in the city of Szigetszentmiklós, another one in 2019 in the city of Érd).

Q044 (2014): According to 2014 data, a new first instance (district) court will be established in the city of Érd on 01/01/2018.

Ireland

Q044 (2024): This answer is based on the explanatory note wherein if there are two courts, e.g. District Court and Circuit Court sitting in one specific location, they are to be counted separately.
There are currently 90 District Court and 49 Circuit Court venues.
There are 2 High Court venues in Dublin and there were 11 provincial sittings of the High Court in 2024.
The Supreme Court, Special Criminal Court and Court of Appeal each have one venue.

Q044 (2023): This answer is based on the explanatory note wherein if there are two courts, e.g. District and Circuit courts sitting in one specific location, they are to be counted separately.

Q044 (2022): There has not been an increase in venues since 2020. This answer is based on the explanatory note wherein if there are two courts, e.g. District and Circuit courts sitting in one specific location, they are to be counted separately whereas previously they were counted together.

Q044 (2018): The Assisted Decision-Making (Capacity) Act 2015 will, when commenced, replace the existing wardship regime for persons with capacity issues and introduce new decision support arrangements for such persons. New jurisdiction will, in particular , be conferred on the Circuit Court in respect of such arrangements. The current situation is that while some parts of the 2015 Act are commenced, others remain to be commenced.

Q044 (2016): The Assisted Decision-Making (Capacity) Act 2015 will, when commenced, replace the existing wardship regime for persons with capacity issues and introduce new decision support arrangements for such persons. New jurisdiction will, in particular , be conferred on the Circuit Court in respect of such arrangements.

Q044 (2014): According to 2014 data, legislation is in preparation for the creation of specialised family courts within the High, Circuit and District Courts.

Italy

Q044 (2023): The decrease in the number of geographic locations is due to the fact that some Offices of the Justice of Peace closed in 2023.

Q044 (2016): Enhancing the specialization of judges / courts. In particular, the judiciary authorities are evaluating the introduction of specific courts for family and personal matters ("Berruti" reform). Increased competence of Business Courts. Establishment of specialized sections on matters such as immigration, international protection and free movement of citizens of the European Union.
Revision of the appeal system in order to reduce the appeal rate.

Latvia

Q044 (2021): All the courts (geographic locations) - Administrative District Court in Riga and Administrative Regional Court is located in one building, there is counted as 1 court per geographical location and indicated in the number of first instance courts. The same situation is in Vidzeme region - Vidzeme Regional Court Madona Court house and Vidzeme District Court is located in 1 building, there is counted as 1 court per geographical location and indicated in the number of first instance courts.

Q044 (2018): Reform was finished in March 2018. In its course first instance court count was reduced to 10 (9 first instance + 1 first instance Administrative court).
In year 2020/2021 there is a plan of creating a court for economical cases that would be a specialised 1st instance court.

Q044 (2016): Starting from 1 of February 2016, the reform has been introduced in Latgale (administrative region of Latvia). A number of district (city) courts in territory of Latgale regional court was decreased from six to two district (city) courts (Balvi District Court and Ludza District Court had been incorporated into Rezekne District Court; Kraslava district court and Preili District Court had been incorporated into Daugavpils District Court).
in 2016, Ministry of Justice make preparatory work to make court house reform in two district (city) court in the Rigas region. Accordingly, starting from 1 of February 2017, the City of Rīga Zemgale Urban District Court has been reorganized and conjoined with the City of Rīga Kurzeme District Court and changed the name of this court to City of Rīga Pārdaugavas Court.

Q044 (2014): In the frame of the 2014 evaluation, it has been stressed that the Judicial Council and the Cabinet of Ministers have initiated the gradual unification of the territory of operation of district (city) courts, through the implementation of the reform of the Riga court region. From March 2015, the Sigulda Court is attached to the Riga District Court, while the Riga City Central District Court was attached to the Riga City Vidzeme District Court.
The Judicial Council's decision of 8 June 2015 confirmed the restructuring plan concerning the Jurmala City Court. According to the plan, the latter must be attached to the Riga District Court from August 2015. The review of the judicial map is intended to increase the efficiency of the court system and the quality of the judicial activity, to reduce the processing times and to even out the judicial capacity. The reform is still going on.

Lithuania

Q044 (General Comment): There are 59 1st instance courts locations: 11 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 1 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.

Q044 (2024): There are 59 1st instance courts locations: 11 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 1 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.

Q044 (2023): There are 59 1st instance courts locations: 12 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 2 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.

Q044 (2022): There are 59 1st instance courts locations: 12 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 2 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.

Q044 (2020): There are 59 1st instance courts locations: 12 district courts (49 locations), 5 regional courts (5 locations) of general jurisdiction and 2 regional administrative courts (5 locations).
For all the courts 62 courts locations: The Supreme Court of Lithuania, the Court of Appeal of Lithuania, the Supreme Administrative Court of Lithuania and 59 1st instance courts locations.

Q044 (2018): Analysis and discussion on the need and possibility to decrease the number of court houses are initiated.

Q044 (2016): From January 1, 2018, there shall be 12 district courts (instead of 49) and 2 regional administrative courts (instead of 5).

Malta

Q044 (2022): The Juvenile Court that until the previous evaluation was in a separate geographical location, has since been relocated to the Courts of Justice in Valletta. Hence the change in the figure quoted.

Q044 (2021): The Juvenile Court is a first instance specialised court that is located outside of the main court building in Valletta. We are therefore reflecting this different geographic location in the updated figures in Q44.

Q044 (2016): Throughout 2017, work was carried out in order to introduce a commercial division within the Civil Court in order to facilitate cases filed under the Companies Act. The bill is currently undergoing the legislative process that would see it being enacted as law by the end of the year. The Commercial Division will become operative in 2018.

Netherlands

Q044 (General Comment): First instance: the first instance courts, and the Trade and Industry Appeals Tribunal are included.
All courts: first instance, second and highest instance courts of general jurisdiction are included, as well as the Trade and Industry Appeals Tribunal, Central Appeals Tribunal and Administrative Jurisdiction Division of the Council of State.
First instance geographic locations:
-32 first instance geographic locations of general jurisdiction, with 4 locations only housing a Justice of the Peace. -1 Trade and Industry Appeals Tribunal. Counted separately, although located at the same location as a first instance court of general jurisdiction. It is not the same court, but a separate, specialized court (this change in counting occurred between 2020 and 2021). See Q43 for why this is counted as a first instance court.
See also a law that assigns 32 geographic locations, and the Trade and Industry Appeals Tribunal:
https://wetten.overheid.nl/BWBR0032316/2013-04-01
All courts geographic locations:
-33 first instance geographic locations (see above).
-6 second instance geographic locations of general jurisdiction, of which 4 are located at the same geographic location as a first instance court.
-1 Supreme Court, located at a separate location.
-1 Central Appeals Tribunal, located at the same geographic location as a first instance court. Counted separately as it is not the same court.
-1 Administrative Jurisdiction Division of the Council of State, located at a separate location.

Q044 (2021): First instance: the first instance courts, and the Trade and Industry Appeals Tribunal are included.
All courts: first instance, second and highest instance courts of general jurisdiction are included, as well as the Trade and Industry Appeals Tribunal, Central Appeals Tribunal and Administrative Jurisdiction Division of the Council of State.
First instance geo.locations:
-33 first instance geo.location of general jurisdiction, with 4 locations only housing a Justice of the Peace.
-1 Trade and Industry Appeals Tribunal. Counted separately, although located at the same location as a first instance court of general jurisdiction, as it is not the same court, but a separate, specialized court (different than previous evaluation). See Q43 for why this is counted as a first instance court.
All courts geo.locations:
-34 first instance geo.locations (see above).
-6 second instance geo.locations of general jurisdiction, of which 4 are located at the same geo.location as a first instance court.
-1 Supreme Court, located at a separate location.
-1 Central Appeals Tribunal, located at the same geo.location as a first instance court. Counted separately as it is not the same court.
-1 Administrative Jurisdiction Division of the Council of State, located at a separate location.

Q044 (2020): In one case (of 43), a first instance court of general jurisdiction, a specialized first instance court, and a court of appeal are housed at the same site (adding 2 sites according to the explanatory note).
In 3 cases, a first instance court of gen.jur. and a court of appeal are housed at the same site (adding 3 sites according to the explanatory note).
In 1 case, a f.i. court of gen.jur. and a specialized second instance court are housed at the same site (adding 1 site according to the explanatory note).
Finally, the Supreme Court, 1 specialized second instance court, and 2 appeal courts are housed at unique locations (adding 4 sites according to the explanatory note).

Q044 (2016): Possibility of closing subdistrict court facility?

Q044 (2014): According to 2014 data, the reforms regarding the merging of courts mentioned on the occasion of the 2012 evaluation have been implemented.

Poland

Q044 (2024): The number 426 represents the total number of courts of first instance of general jurisdiction and courts of first instance of specialised jurisdiction (319 district courts + 47 regional courts + 23 specialist courts of first instance = 426). The number 491 represents the total number of all courts, including all their seats in various locations (319 district courts + 47 regional courts of first instance + 47 regional courts of second instance + 11 courts of appeal + 26 specialised courts of first and second instance + 1 Supreme Court + 1 Supreme Administrative Court + 39 non-local courts = 491).

Q044 (2023): The figure of 496 indicated in 2023 is the sum of the common, administrative and military courts of first and second instance and the Supreme Court by geographic location (i.e.. including the subdivisions). To the number of courts of first instance by geographical location (item 44 in line 1 – all common, administrative, military courts of first instance with localised divisions: number of courts 434) was added the number of 62 courts:- regional courts:47, courts of appeal:11, military courts:2, Supreme Administrative Court:1, Supreme Court:1. Total: 434+62= 496.

Q044 (2022): The figure of 496 indicated in 2022 is the sum of the common, administrative and military courts of first and second instance and the Supreme Court by geographic location (i.e. including the subdivisions). To the number of courts of first instance by geographical location (item 44 in line 1 - all common, administrative, military courts of first instance with localised divisions: number of courts 434) was added
the number of 62 courts: - regional courts: 47; - courts of appeal: 11; - military courts: 2; - Supreme Administrative Court: 1; - Supreme Court: 1;
Total: 494 (434 + 62).

Q044 (2020): Regarding point 44, it should be noted that in the previous evaluation cycles (2016, 2017, 2018, 2019) the answer in terms of the number of all courts as geographical locations was 401, while in 2020 it is 494.
The figure of 494 indicated in 2020 is the sum of the common, administrative and military courts of first and second instance and the Supreme Court by geographic location (i.e. including the subdivisions). To the number of courts of first instance by geographical location (item 44 in line 1 - all common, administrative, military courts of first instance with localised divisions: number of courts 433) was added the number of 61 courts: - regional courts: 46; - courts of appeal: 11; - military courts: 2; - Supreme Administrative Court: 1; - Supreme Court: 1;
Total: 494 (433 + 61).
The discrepancy is due to the adoption of a different method of data presentation in 2020 (by geographical location). In compliance with the Explanatory note, the 2020 data show first-instance courts (line 1), and further all courts (line 2) together with all seats in different locations, which in the realities of the Polish legal system should be understood as a necessity to show the number of courts together with local divisions.

Q044 (2016): It is considered to reduce the number of district courts which are responsible for land and mortgage registers or abolishing external branches in district courts.

Portugal

Q044 (2024): We have included the Administrative Supreme Court as well as the 2nd instance administrative courts.

Q044 (2020): The difference between 2019 and 2020 is justified by the increase in new buildings.

Q044 (2018): Law n.º 19/2019, 19th February.
The recent amendments to the Law of the Organization of the Judiciary System are intended to ensure the reciprocal proximity of justice and citizens in two key segments: criminal jurisdiction and family and minors jurisdiction.
These new amendements aim to facilitate people's access to courts and combat the desertification of the interior regions of the country.

Q044 (2016): Law n.40-A/2016, 22 December and Decree-Law n. 86/2016, 27 December.
On the 1st of january 2017, 20 extinct districts were reopened, as well as 23 of the so-called proximity sections, in which judicial acts may now be concluded.

Romania

Q044 (2024): It should be mentioned that some of the first instance specialised courts share the location with „judecatorii".

Q044 (2023): It should be mentioned that some of the first instance specialised courts share the location with „judecatorii".

Q044 (2022): It should be mentioned that some of the first instance specialised courts share the location with „judecatorii".

Q044 (2020): Law no. 304/2004 on the judicial organisation.
It should be mentioned that some of the first instance specialised courts share the location with „judecatorii".

Q044 (2014): According to 2014 data, a bill on closing 30 courts and 30 attached prosecution offices with low volume of work was initiated by the Ministry of Justice with the support of the Superior Council of Magistracy of Romania. The bill was rejected by the Parliament. The Superior Council of Magistracy seeks for alternative solutions for the reallocation of the resources.

Slovak Republic

Q044 (2021): The Constitutional court is not included in Q44.

Q044 (2020): The Constitutional Court is not included in the 44 answer.

Q044 (2014): According to 2014 data, on 1st July 2016, the new Civil Litigious Procedure Code will enter into force. It introduces the so called "causal jurisdiction" of first instance courts. It means that certain types of civil claims will belong to the jurisdiction of only some of the first instance courts. This will apply e.g. for individual labour disputes, arbitration disputes, disputes arisen from bill of exchange etc.

Slovenia

Q044 (General Comment): First instance courts: first instance courts of general jurisdiction (55, see Q42.1) + first instance specialised courts (4 labour courts and social court + 7 branch offices of labour and social courts + 1 administrative court + 3 branch offices of the Administrative court) =70
All courts: In addition to above also 4 higher courts of general jurisdiction + 1 higher labour and social court + the Supreme court = 76.

Q044 (2018): A change in the organisation of first instance courts (judicial map), as well as first instance judges' position is being prepared by the Ministry of Justice - see Q208.

Q044 (2016): Ministry of Justice is preparing court network reform. Existent first instance court network is considered as inefficient and insufficient. The main goal of this reform is to set up a system, which could assure better quality and efficiency of adjudication, specialization of judges and even allocation of cases. Furthermore, reform still should assure proper access to the courts and financial efficiency. Ministry of Justice is also taking in consideration different system of the nomination of judges, nomination of Supreme Court judges and president of the Supreme Court. Existent nomination procedure of judges is too rigid and does not enable taking prompt actions when the post is vacant.

Q044 (2014): According to 2014 data, discussions about the reorganization of the structure of courts have been initiated. Following the CEPEJ Guidelines on the creation of judicial maps to support access to justice within a quality judicial system (CEPEJ(2013)7) the change should be gradual. The reduction in the number of courts regarding geographical locations is not foreseen, but reorganization in the powers of local courts that are organizational units of district courts might be needed. There are local courts that have only a few (3-5) judges, which is not rational in the sense of court management. Such local courts might start dealing only with certain kinds of cases, with other local courts in the same district dealing with other kinds of cases, having de facto specialized local courts.
Nevertheless, these changes are still in the initial debate phase, so no formal proposal can be presented yet.

Spain

Q044 (General Comment): One building usually houses different courts.

Q044 (2023): The latest data shows a slight decrease compared to previous figures. This could be attributed to the implementation of "Ciudades de la Justicia" (Justice Cities) in certain regions, like Andalusia. These "Justicie Cities" tend to group together in a single building, courthouses that were previously dispersed in several addresses.

Q044 (2018): The traditional structure of a Court includes a Judge (or Magistrate), a Judicial Counsellor, and several civil servants (the exact number depends on many circumstances). The New Judicial Office (Nueva Oficina Judicial)has been implemented in many territories and its development continues. The New Judicial Office (NOJ) has, as base, the called ‘Procedural Unit of Direct Support' (UPAD), a small office with personnel necessary for the strict aid of the work of the Judge. On the other hand, and for the uniform processing of repetitive tasks, the called Common Procedural Services have been created. The Judicial Counsellor is the Director of these services, and is responsible of processing the phase of the judicial file of a strictly procedural nature.

Q044 (2016): The traditional structure of a Court includes a Judge (or Magistrate), a Lawyer of the Administration of Justice, and several civil servants (the exact number depends on many circumstances). The New Judicial Office (Nueva Oficina Judicial) has been implemented in many territories and its development continues. The New Judicial Office (NOJ) has, as base, the called ‘Procedural Unit of Direct Support' (UPAD), a small office with personnel necessary for the strict aid of the work of the Judge. On the other hand, and for the uniform processing of repetitive tasks, the called Common Procedural Services have been created. The Lawyer of the Administration of Justice is the Director of these services, and is responsible of processing the phase of the judicial file of a strictly procedural nature.

Q044 (2014): On the occasion of the 2014 evaluation, the attention was drawn on the deployment in the entire country of the Judicial Office, the new model for organising courts of law and the creation of the Instance Courts (Tribunales de Instancia), a new model of collegial courts aimed at replacing local courts belonging to the same judicial district.

Indicator 3: Performance of courts at all stages of the proceedings

1	Other than criminal cases - First instance cases by case categories and by case status
2	Evolution of first instance other than criminal cases
3	Clearance Rate and Disposition Time for first instance other than criminal cases
4	Variations of first instance other than criminal cases by case categories
5	Second instance other than criminal cases by case categories and by case status
6	Evolution of second instance other than criminal cases
7	Clearance rate and Disposition time for second instance other than criminal cases
8	Variations of second instance other than criminal cases by case categories
9	Supreme court other than criminal cases by case categories and by case status
10	Evolution of Supreme court other than criminal cases for total, civil and commercial litigious and administrative cases
11	Clearance rate and Disposition time for Supreme court other than criminal cases
12	Variations of Supreme court other than criminal cases by case categories
13	European Comission templates for first instance data on other than criminal instance cases
14	First instance criminal cases by case categories and by case status
15	Evolution of the first instance total of criminal cases, severe criminal cases and misdemeanour and / or minor criminal cases
16	Clearance rate and Disposition time for first instance criminal cases
17	Variations for first instance criminal cases
18	Second instance criminal cases by case categories and by case status
19	Evolution of the second instance total of criminal cases, severe criminal cases and misdemeanour and / or minor criminal cases
20	Clearance rate and Disposition time for second instance criminal cases
21	Variations for second instance criminal cases
22	Supreme courts, criminal cases by case categories and by case status
23	Supreme courts, Evolution of the absolute number of criminal cases
24	Clearance rate and Disposition time for Supreme court criminal cases
25	Supreme courts, Variations for criminal cases

Other than criminal cases - First instance cases by case categories and by case status

Latvia: The figures for 2014 do not include all types of non-litigious cases, since these case groups were not collected and published at that time. Consequently, the scope of the 2014 Latvian data is not fully comparable with the 2024 dataset, where all case groups are

Latvia: The figures for 2014 do not include all types of non-litigious cases, since these case groups were not collected and published at that time. Consequently, the scope of the 2014 Latvian data is not fully comparable with the 2024 dataset, where all case groups are

Greece: The variations are due to the judicial map reform in 2024 and the abolition of the Magistrates' Courts which cases that were not reported before, have been redistributed between first instance courts.

Luxembourg: The 2018 legislation on civil matters, including divorce, explains significant variations in case data between 2013 and 2023. The introduction of the Family Affairs Judge (JAF) on 1 November 2018, reclassified cases and simplified access to justice, increasing case volumes. Faster procedures also led to more frequent demands for modifications of decisions.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Malta has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established as a separate institution. It acts as second instance court in the administrative cases. It took over all the administrative law cases of the Supreme Court.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Netherlands: The number of resolved cases includes only cases finalised by a judge decision, while cases closed differently (e.g. withdrawn, discarded upon objection and alike) are not included

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Netherlands: The number of resolved cases includes only cases finalised by a judge decision, while cases closed differently (e.g. withdrawn, discarded upon objection and alike) are not included

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Netherlands: The number of resolved cases includes only cases finalised by a judge decision, while cases closed differently (e.g. withdrawn, discarded upon objection and alike) are not included

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Hungary: In 2021-2022, the Supreme Court handled administrative cases at second instance level. As of March 2022, second-instance jurisdiction returned to the Budapest-Capital Regional Court of Appeal and the Supreme Court for relevant cases only.

Malta: has a two tier system therefore the Supreme Court is the second, highest and final instance court. In the second instance courts, Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Poland: The Supreme Administrative Court is also the court of second instance and it is impossible for the Statistics Division to divide its cases statistics and identify the number of second instance cases on the one hand, and the number of third instance cases, on the other hand. The total number of administrative law cases dealt with by the Supreme Administrative Court is provided within the frame of Q97.

Slovak Republic: In 2021, the Supreme Administrative Court was established. As of 2023, cases handled by the Supreme Administrative Court are counted as highest-instance cases.

Greece: In 2017 new IT management systems were introduced for civil as well as administrative cases and some variations can be noticed.

Slovak Repuublic: Because of changes in the structure of the caseload data the number of cases is not comparable between different cycles.

$$* \, CEPEJ \; Calculated \; Disposition \; Time \; (days) = \frac{Number \; of \; pending \; cases \; at \; the \; end \; of \; a \; period}{Number \; of \; resolved \; cases \; in \; a \; period} \times 365$$

Ireland: CR and number of resolved cases show lower values because many cases discontinued or settled out of courts are not registered as resolved.

$$* \, CEPEJ \; Clearance \; Rate \; (\%) = \frac{Resolved \; cases \; in \; a \; period}{Incoming \; Cases \; in \; a \; period} \times 100$$

Austria: The total number of first instance criminal cases is higher than the sum of the subcategories because it also includes administrative criminal cases for which the distinction between severe and minor offences is not possible.

France: "Other criminal cases" encompass investigation procedures that are not included in the total because they are already considered in other two categories.

Ireland: The incoming criminal cases are generally counted by offence rather than by case.

Austria: The total number of first instance criminal cases is higher than the sum of the subcategories because it also includes administrative criminal cases for which the distinction between severe and minor offences is not possible.

France: "Other criminal cases" encompass investigation procedures that are not included in the total because they are already considered in other two categories.

Ireland: The resolved criminal cases are generally counted by penalty imposed rather than by case.

Austria: The total number of Second instance criminal cases is higher than the sum of the subcategories because it also includes administrative criminal cases for which the distinction between severe and minor offences is not possible.

Malta: Two-tier system, where the Supreme Court is the second, highest and final instance court. It was agreed to present the data for the Supreme Court in the second instance.

Austria: The total number of Second instance criminal cases is higher than the sum of the subcategories because it also includes administrative criminal cases for which the distinction between severe and minor offences is not possible.

Malta: Two-tier system, where the Supreme Court is the second, highest and final instance court. It was agreed to present the data for the Supreme Court in the second instance.

Indicator 3: The performance of courts at all stages of the proceedings

Comments provided by the national correspondents

organised by country

Question 091. First instance courts: number of other than criminal law cases.
Question 092. If courts deal with "civil (and commercial) non-litigious cases", please indicate the case categories included:

Question 093. Please indicate the case categories included in the category "other cases":
Question 094. First instance courts: number of criminal law cases.
Question 097. Second instance courts (appeal): Number of "other than criminal law" cases.
Question 098. Second instance courts (appeal): Number of criminal law cases.
Question 099. Highest instance courts (Supreme Court): Number of "other than criminal law" cases:
Question 100. Highest instance courts (Supreme Court): Number of criminal law cases.

Austria

Q091 (2024): 2.2. Registry cases (2.2.1+2.2.2+2.2.3) and 2.2.2 Non-litigious business registry cases: there is no known explanation for the reduction in cases. A connection to the Covid-19 pandemic is possible, but not certain. We just know that a lot of cases were resolved in 2023, but have no specific reason for this. It might be normal fluctuation.

Q091 (2023): Starting from 2022, "non-litigious family matters" are taken into consideration in the category "general civil non-litigious cases", while before they were communicated in "other".
Discrepancy (2.2.2.) is due to an above-average completion rate in 2023. The reason for this is unknown.
Q091 (2022): Starting from 2022, "non-litigious family matters" are taken into consideration in the category "general civil non-litigious cases", while before they were communicated in "other".
Q091 (2021): "Non litigious business registry cases": Sec. 3a para. 2 of the COVID-19 act concerning corporate law ("Gesellschaftsrechtliches COVID-19-Gesetz") allows corporations to file their annual accounts and other documents, that have to be published by law, not only within 9 but within 12 months from the account date (mostly: December 31st of a year). Usually, the duty to file these reports within 9 months leads to a high number of incoming files in September. 2020 and 2021 the special rules lead to such high incoming file numbers in December and thereby to an increase in pending cases at the end of the year.

Q091 (2020): "Non litigious business registry cases": Sec. 3a para. 2 of the COVID-19 act concerning corporate law ("Gesellschaftsrechtliches COVID-19-Gesetz") allows corporations to file their annual accounts and other documents, that have to be published by law, not only within 9 but within 12 months from the account date (mostly: December 31st of a year). Usually, the duty to file these reports within 9 months leads to a high number of incoming files in September. 2020 the special rules lead to such high incoming file numbers in December and thereby to an increase in pending cases at the end of the year.
"4. Other cases": The number of incoming and resolved cases surged due to an increase of "general civil proceedings, that are not allocated to other categories of cases" because the district administrative authorities (Bezirksverwaltungsbehörden) had to notify the district courts of every single person against which a quarantine measure (SARS-CoV-2) had been taken. In concerns of statistical data every such notification resulted in an incoming (and resolved) case.
Generally, no courts were closed during the lockdowns. During the first lockdown (middle of March until the end of April 2020) the number of incoming cases dropped significantly. Nearly all court hearings had to be postponed during the first lockdown. In total (all case types) in April 2020 there were 89.25 % less court hearings than in April 2019. In general litigious civil matters of first instance there were even 94.59 % less hearings. A comparison of the total number of court hearings held in the period of March 2019 to February 2020 on the one hand and of March 2020 to February 2021 on the other hand shows that there were 22.22 % less hearings since the first lockdown. The significant drop in incoming cases and held court hearings in April 2020 resulted in the opportunity to concentrate on finishing pending cases in which all hearings had already been held. The statistical data shows that the number of judgments pending more than 2 months since the final hearing declined considerably (1st of July 2020: -75 % compared to 1st of April 2020). Judges did always (even before the Covid-19 pandemic) have the opportunity to work from home. Many have made use of this option during the lockdowns. The Federal Ministry of Justice does not keep statistics on this matter (number of judges working from home) since judges are not obliged to record their working times or places.

Q091 (2019): There is a lack of horizontal consistency concerning the catgeory "general civil and commercial non-litigious cases". Figures provided by the statistical system were double checked in this respect and are correct.

Q091 (2017): Due to the absolut low numbers of pending cases on 1 Jan./31 Dec. high deviations in percentage are normal. Note to 2.1.1.: Because of an inaccuracy by analysing pending non-litigious business registry cases the count had to be corrected on 1st December 2017. Therefore the pending cases on 31.12.2016 do not comply with those of 01.01.2017.

Q091 (2016): Due to the low absolute numbers of pending cases on 1 Jan./31 Dec. high deviations in percentage are normal.

Q091 (2015): In the category litigious are counted all proceedings (in civil matters, labour and social security cases at first instance courts) which are marked as being litigious in the court register (f.e. from the second court hearing on).

Civil and commercial non-litigious cases include commence of bankruptcy proceedings, Bankruptcy proceedings, composition proceedings, non-litigious proceedings about rent, non profit cooperative association for housing, home ownership, proceedings about Lease of farm land, wardship cases in connection with administration of assets, custody and maintenance, uncontested payment orders, enforcement cases.

Category "other" includes Probate Proceedings, cases concerning the Administration of justice, Cancellation proceedings and proceedings in connection with [official] declaration of death
authentication of signatures, proceedings to render legal assistance in civil matters for other courts (also international ones), General civil proceedings, that are not allocated to other categories of cases, Some Non litigious family matters.

Q092 (2014): For the year 2014, this category has been extended to the enforcement cases.

Q094 (General Comment): We cannot differentiate between severe criminal cases and misdemeanours within the administrative cases. So while in administrative criminal law deprivation of liberty is hardly ever used, it is still possible to use it in a sentence. It is also an alternative way of a sentence in case the person is not able to pay the fine.
However, the administrative courts are apparently not able to separate their data according to the type of sentence they pass (even though prison sentences are so rare and one might think this is easy).

Q094 (2024): The distinction between misdemeanour criminal cases and severe criminal cases is possible only for criminal courts. However, the total number includes administrative criminal law cases as well, where distinction is not possible.

Q094 (2023): "The distinction between misdemeanour criminal cases and severe criminal cases is possible only for criminal courts. However, the total number includes administrative criminal law cases as well, where distinction is not possible."

Q094 (2021): The distinction between misdemeanour criminal cases and severe criminal cases is possible only for the ciminal courts. However the total number includes administrative criminal law cases as well, where distinction is not possible.

Q094 (2020): The distinction between misdemeanour criminal cases and severe criminal cases is possible only for the ciminal courts. However the total number includes administrative criminal law cases as well, where distinction is not possible.

Q094 (2018): The distinction between misdemeanour criminal cases and severe criminal cases is possible only for the criminal courts. However the total number includes administrative criminal law cases as well, where distinction is not possible.

Q094 (2016): Administrative criminal cases are included in misdemeanour and in total

Q097 (General Comment): From January 1st, 2014 there are 11 newly found courts for administrative law in Austria, namely 9 regional administrative courts, 1 Federal Administrative Court and 1 Federal Tax Court (all courts of first instances). Furthermore, there is also the Supreme Administrative Court (final instance). With regard to administrative law cases there is no second instance. The statistical evidence of the Federal Ministry of Justice of Austria does not distinguish between the types of second instance cases mentioned under 2.1., 2.2. and 2.3. Data regarding the general categories “litigious cases” (1.) and “non-litigious cases” (2.) is available.
The number of “Other cases” (4.) is included in the category “litigious cases” (1.).

Q097 (2022): Non litigious family matters in the second instance have always been represented within the category of "non-litigious cases".
Q097 (2021): “Civil and commercial litigious cases” – the number of incoming civil litigious cases slightly increased between 2020 and 2021. The number of resolved such cases increased but to a lesser extent than incoming cases. Accordingly, the number of pending civil litigious cases at the end of the year increased. There is no explicit explanation for these variations. It should be recalled that 2020 year was a particular year due to the pandemic. In 2021, the data are back at the level of 2019.

Q097 (2017): In the area of appeal cases concerning other than criminal law cases only the categories of general civil law, labour law and social law are gathered. The administrative cases are NAP in second instance since they are presented in first and final instance.
Q097 (2016): In the area of appeal cases concerning other than criminal law cases only the categories of general civil law, labour law and social law are gathered. The administrative cases are NAP in second instance since they are presented in first and final instance.
Q098 (2024): On the one hand, the table shows that there was a decline in the number of cases completed in 2022 and 2023 compared to previous years, although this only corresponded to a correspondingly lower number of cases in 2022. This ultimately resulted in the increase in the number of pending cases taken over in 2024.
In 2023, however, there was a significant decrease in the number of pending cases taken over compared to previous years. The sharp increase from 2023 to 2024 is therefore somewhat put into perspective when looking at the average of the previous years. By the end of 2024, the number of pending cases had returned to the level of previous years (2020 to 2022). Overall, therefore, there appears to be a fluctuation and not a sustained (negative) trend. We are not aware of any reasons for this fluctuation.

Q098 (2023): 2. Misdemeanour and / or minor criminal cases (Pending cases on 31 Dec. ref. year): One reason is that the number in the year before was comparatively not high. Also, the discrepancy is not that high when you look at the average in the last 6 years, which was about 685. The number of new cases however in 2023 was higher than 2022, still the number or resolved cases only sank a little. Otherwise we have no concrete reasons.
Q098 (2020): "Misdemeanour and / or minor criminal cases": compared to the previous 10 years the pending, incoming and resolved cases in this category in the year 2020 showed a slight decrease. There is no specific explanation for this circumstance.
Q098 (2016): There is significant discrepancy in the number of incomming and resolved misdemeanour cases because the administrative criminal cases of second instance are included in third instance.
Q099 (2024): Administrative Law Cases: The number of 3187 pending administrative cases on 1 January ref. year corresponds to 3026 procedures adopted from previous years and 161 procedures completed in previous years and reopened in the reference year.

Q099 (2023): Administrative Law Cases: The number of 3185 pending administrative cases on 1 January ref. year corresponds to 2985 procedures adopted from previous years and 200 procedures completed in previous years and reopened in the reference year.
1. Civil (and commercial) litigious cases: The numbers are lower because more cases have been closed (obviously), other reasons as to why more cases have been able to get closed in 2023 are not known to the competent department.

Q099 (2022): Administrative Law Cases: The number of 3547 pending administrative cases on 1 January ref. year corresponds to 3392 procedures adopted from previous years and 155 procedures completed in previous years and reopened in the reference year.
Q099 (2021): Discrepancy between number of pending administrative law cases on 31 December 2020 and number for pending administrative cases on 1 January 2021: 3043 procedures adopted from previous years and 139 procedures completed in previous years and reopend in the reference year. "Administrative law cases": The COVID-19 pandemic posed significant and new challenges to international and government institutions worldwide, including the Supreme Administrative Court. Social distancing necessary to combat the pandemic required profound changes in the service of the Supreme Administrative Court to guarantee its functioning. In addition to internal organisational measures such as the possibility of remote work and new electronic communication tools, changes to the legal framework were necessary to enable the passing of resolutions via circular letter without physical contact between the members of the judicial body. These legal changes became effective in the course of 2020 and 2021. The continuing high level of new cases in asylum and aliens law is due to the numerous applications for international protection filed in Austria from 2015 onwards. The increase in staff at both the Federal Office for Immigration and Asylum and the Federal Administrative Court has led to an increase in the number of cases dealt with by these authorities and thus also in the number of cases brought before the Supreme Administrative Court, which has now been at a relatively high level for several years.

Q099 (2020): Discrepancy between number of pending administrative cases on 31 December 2019 and number fo pending administrative cases on 1 January 2020: the number of 3 064 pending administrative cases on 1 January 2020 corresponds to 2762 procedures adopted from previous years and 302 procedures completed in previous years and reopend in the reference year.
Pending administrative law cases older than 2 years: the observed increase is a consequence of the high number of cases in the field of asylum and aliens.
Q099 (2019): The reason for the increased number of incoming administrative cases and accordingly the increase in the number of pending administrative cases is related to the high number of cases in the field of asylum and aliens law characterizing the period 2016 - 2019.
Q099 (2018): The reasons for this increase of the incoming administrative cases is related to the high number of cases in the field of asylum and aliens law.
Q099 (2017): To 3.:
Because of the model of business cases installed at the Supreme Administrative Court pending cases at the begin of a reporting year have to be analysed by calculation. Incoming cases are substracted from the sum of resolved cases and of pending cases at the end of the reporting year. New applications within the same case cause a reopening of the concerned cases. Thus the number of pending cases changes. Therefore a completly consistent image of figures of pending cases from the end of previous year and those from the begin of the current year is not feasible.

Q099 (2016): The big variation is due to the fact that this cycle the administrative cases were included.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.
Q100 (2024): The total figure includes data on administrative criminal cases before the Supreme Administrative Court.
The change in the number of pending administrative offence proceedings that are more than two years old compared to the previous year can be explained by the positive decline in lengthy proceedings.

Q100 (2023): The total figure includes data on administrative criminal cases before the Supreme Administrative Court.
1. Severe criminal cases: Same answer as in Q 99. The amount is lower, because less cases have been pending and therefore small changes have more impact relatively.

Q100 (2022): The total figure includes data on administrative criminal cases before the Supreme Administrative Court.

Q100 (2021): The total figure includes data on administrative criminal cases before the Supreme Administrative Court.

Q100 (2020): The total figure includes data on administrative criminal cases before the Supreme Administrative Court.

Q100 (2016): The big variation is due to the fact that this cycle the administrative cases were included.
The administrative courts were established January 1st 2014. After their establishment the data of the administrative courts is introduced this cycle for the first time.

Belgium

Q091 (2024): Q 91 “1. Civil (and commercial) litigation cases" - the discrepancy between the number of cases pending on January 1, 2024 and the number of cases pending on December 31, 2023, is due to a data cleanup operation: some cases had been temporarily excluded from the statistics pending verification by the clerks of the courts concerned.
Data for “youth” cases are only partially available, with only the number of incoming cases available (1 443 in 2024). As a result, “youth” civil litigation is not included in the table. Labor courts: data on “collective debt settlement” cases are not available for 2024 due to their migration to a new ICT program (JustRestart). As a result, they are not included in the table.
Concerning administrative cases (= sum of the figures for the Council of State, Aliens Litigation Council, and the Flemish administrative courts -Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege and Raad voor Verkiezingsbetwistingen): it should be noted that the last figure 1 330 (Cases pending for more than 2 years) only concerns the Council of State.
For the Council of State, the figures are as follows: 4 725; 2 549; 2 461; 4 774 and 1 330; for the Aliens Litigation Council: 13 935; 23 159 (a ruling may close several cases, hence the lack of complete horizontal consistency); 19 579; 17 509 and NA (for the last column).

Q091 (2023): For category 2 (non-litigious matters): there was a sharp increase in the number of cases filed electronically in 2023. This increase is linked to legislative changes (Act of 23 March 2019 introducing the new Code of Companies and Associations and containing various provisions’; effective from 1 May 2019; requiring amendment of the bylaws of ASBLs. Companies began complying with this requirement from September 2023, as the deadline was 1 January 2024. A large number of requests for amendments are currently being processed by the registry, as not all companies have yet finalised the necessary changes.
For administrative cases (= sum of the figures for the Council of State, the Aliens Litigation Council and the Flemish administrative courts - Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege and Raad voor Verkiezingsbetwistingen): it should be noted that the last figure 1 546 (see last column ‘Cases pending for more than 2...’) only concerns the Council of State. Thus, for the Council of State (Conseil d'Etat), the figures are as follows: 4 521; 2 499; 2 049; 4 662 and 1 546; for the Aliens Litigation Council (Conseil du Contentieux des Etrangers): 9 584; 20 892 (one judgment may close several cases); 16 539; 13 935 and NA (for the last column). For administrative cases, the increase concerns cases brought before the Aliens Litigation Council (not those brought before the Council of State). This is due to an influx of applications before this court for the year 2023.

Q091 (2022): As concerns administrative matters, the total number of cases includes figures for the Council of State, the Alien Litigation Council and the Flemish administrative courts Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege and Raad voor Verkiezingsbetwistingen. However, the figure of 1392 (in the last column 'Pending cases older than 2 years from the date the case came to the first instance court') only concerns the Council of State. Thus data can be broken down as follows: for the Council of State: 4 425 (pending at the beginning of 2022); 2 214 (incoming); 1 996 (resolved); 4 523 (pending at the end of 2022) and 1 392 (pending for more than 2 years); for the Alien Litigation Council : 9 273 (pending at the beginning of 2022);16 456 (incoming; a judgment may close different cases hence there is a lack of horizontal conistency);16 139 (resolved); 9 584 (pending at the end of 2022) and NA.

Q091 (2021): Administrative law cases are those of the Council of State, the Aliens Litigation Council and the Flemish administrative courts Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege and Raad voor Verkiezingsbetwistingen. However, the figure 1 428 (in the last column “Pending cases older than 2 years from the date the case came to the first instance court”) concerns the sole Council of State. Thus, with regard to the Councul of State, the figures are the following: 4 936; 2 191; 2 208; 4 420 and 1 428; with regard to the Aliens Litigation Council: 14 415; 14 124 (one judgment can close several cases which may result in a lack of horizontal consistency); 19 256; 9 273 and NA.
Juvenile cases are not counted in the category “other cases”. In fact, this case type includes both civil and criminal litigation.

Q091 (2020):
"The health crisis has impacted the numbers.
*Justice of the Peace: no pending cases (start + end). The way justice of the peace cases are counted has been adapted and unlike previous cycles, all dockets have also been taken into account for 2020. *Civil courts of first instance: no pending cases (start + end). The same counting method was applied as last year. Omissions as well as so-called "dormant cases" are counted in the closed cases. *Corporate courts: same counting method as last year. Only cases registered in the corporate court computer application, called TCKH, are counted in these figures. There are also corporate court cases that are only recorded in the RegSol computer application (since mid-2017) in bankruptcy proceedings, for example, between the receiver and the bankruptcy judge. Cases only registered in RegSol are not counted in these figures, which induces an underestimation. Commercial investigations (chambers of distressed companies) are not taken into account as the figures are unreliable due to the very disparate registration methods in the different company courts. No pending cases.
*As far as administrative cases are concerned, the total number of cases includes the figures for the Council of State, the Aliens Litigation Council and the Flemish administrative courts Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege and Raad voor Verkiezingsbetwistingen. However, the figure of 1489 (in the last column ""Cases pending for more than 2 years from the date on which the case is brought before the courts of first instance") concerns only the Council of State. Thus, - for the Council of State, the figures are: 4,564; 2,119; 2,019; 4,936 and 1,489; for the Conseil du Contentieux des Etrangers: 16,009; 14,238 (a judgment can close different cases hence the absence of complete horizontal logic); 15,769; 14,451 and NA.
"

Q091 (2019): Regarding the category "4. other cases" which refers to "protection cases", the statistical service does not have figures for 2019, following discussions on the counting rules between the courts. However, we kept the total for “other than criminal” cases since protection cases represent more or less 10,000 cases, or 1% of the total. Their actual number will not change the total figure significantly.
"Administrative cases pending at the end of the year": the lack of horizontal consistency is due to the fact that the number of judgments does not necessarily correspond to the number of closed cases. For example, a judgement that closes two cases is recorded as one stop

Q091 (2018): Civil and commercial cases include cases of justices of the peace, courts of first instance, civil, family and youth sections, labour courts and company courts (known as "commercial courts")
Civil and family courts: no data for pending cases. New rules for counting and recording cases mean that the statistics are not comparable to previous years. In particular, cases where there is a permanent referral are now counted as a case.
Concerning juvenile courts: no data for completed or pending cases due to the lack of uniform practice and low registration of completed cases.
Concerning registry cases: these are immediate acts, which is why the number of incoming cases is equal to the number of resolved cases. Administrative affairs: Council of State, Aliens Litigation Council, Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege en de Raad voor Verkiezingsbetwistingen.

Q091 (2017): The difference with the 2016 data is due to the lack of data on justices of the peace cases. In respect of justices of the peace, from July 2017 to June 2018, a deployment of new codes was carried out at the national level. The support service of the College of Courts and Tribunals is currently in the process of defining accounting rules for justices of the peace. For this reason, no figures were issued in 2018 pertaining to 2017 data.
Civil data are not included or only partially included for 5 courts; Youth courts: no data from Brussels (Dutch-speaking); no data for resolved cases and pending cases; No data for civil cases from police courts; Commercial courts: no data for pending cases + new counting rules for resolved cases. For this reason, comparison with previous data is made difficult; not all activities carried out in commercial courts are reflected in the statistics provided. Indeed, the following services are not covered: commercial investigation service, business continuity law, bankruptcy and dissolutions/liquidations.

Q091 (2016): Administrative cases: Council of State, Aliens Litigation Council, Raad voor Vergunningsbetwistingen, het Milieuhandhavingscollege en de Raad voor Verkiezingsbetwistingen.
The sharp decrease in administrative cases is due to immigration cases. There are 5 administrative courts, two of which are at federal (national) level: the State Council and the Aliens Litigation Council. It is within the latter that there has been a decrease in the number of cases. Immigration and asylum cases are handled by the Conseil du Contentieux des Etrangers. The Aliens Litigation Council is an independent administrative court, which deals with cases "in the first instance", i.e. full substantive litigation or "in cassation", i.e. a decision "in annulment" or "suspension". The Council may be seized with appeals against decisions of the "Commissariat général aux Réfugiés et aux Apatrides", against decisions of the "Office des Etrangers" and against all other individual decisions taken pursuant to the Act of 15 December 1980 on access to the territory, residence, establishment and removal of aliens (Aliens Act).
Please also note that figures for juvenile courts as well as figures for civil cases treated by the police courts are not included in this cycle. These figure present very small number from the total number of cases.

Q091 (2015): The pending cases of commercial courts, first instance (civil, youth, family) and justice of the peace are not included.
Included in pending cases are: labor courts, police courts, courts of appeal.
Q091 (2014): With regard to non-litigious business registry cases, the central register of notices of seizure, delegation, transfer, collective debt settlement and loan is managed by the National Chamber of Bailiffs. Administrative cases are handled by the State Council (except for cassationrulings), the Alien Litigation Council and the Flemish regional administrative colleges, "Raad voor verkiezingsbetwistingen, Raad voor milieuhandhaving by Raad voor vergunningenbetwistingen".

Q094 (2024): It should be mentioned that cases dealt with by juvenile courts - “protectional (non-civil) cases” - are not included in the table. Due to technical reasons, only data on incoming such cases are currently available (10 178).
Cases heard by the investigation judge (Chambre du conseil) are not included in the table in order to avoid double counting the same criminal cases.

Q094 (2023): It should be noted that data on cases of the juvenile court are not included in the table. Due to technical reasons only figures for incoming cases (10 078) are currently available.
Point 3 “Other criminal cases”: there were 7 580 cases pending before the Investigation Court (Chambre du Conseil) on 1 January 2023; 17 191 incoming cases; 16 031 resolved cases; 8 740 cases pending at 31/12; 2 286 cases pending for more than 2 years. These figures are not included in the table, so as not to count the same cases twice.

Q094 (2022): Also to be noted: 9 398 for cases related to juvenile protection (only the category 'incoming cases' is available), not accounted for in the table. Point 3: Other criminal cases: the figure of 15 309 corresponds to cases before the Council Chamber (this figure is not included in the total of incoming criminal cases because data on resolved cases are not available). The figures for pending and resolved criminal cases are not available.

Q094 (2021): "Severe criminal cases": all cases that are dealt with by first instance criminal courts; "Minor criminal cases": all cases that are dealt with by the Police courts. Protectional cases - youth: 9 227 incoming cases in matters of youth protection. For this case category the number of resolved cases is not available for 2021. These are protectional cases dealt with by the juvenile court (in respect of parents, situations of concern, extremely urgent situations of concern, facts classified as offences).

Q094 (2020): "The health crisis has had an impact on the numbers.
"
Q094 (2016): Severe: all cases that are dealt with at first instance by the criminal courts of first instance; Minors: all cases that are dealt with by the police court
Three sites could not provide statistics for severe cases.
Q094 (2014): Offences handled by the police court (although this court can pronounce prison sentences) are considered as minor offences.
Q097 (General Comment): Number of second instance cases: cases brought before appelate courts, labour courts and cases on appeal against decisions of justices of the peace and police courts (civil cases).
Q097 (2022): Appellate court (Civil Matters): Cases pending as of 01/01/2022 = 28525; cases pending as of 31/12/2022 = 27375; Cases pending for more than 2 years from the date on which the case is brought before the courts at second instance = 11578. Labor court: cases pending as of 01/01/2022 = 5461; cases pending as of 31/12//2022 = 5294; Cases pending for more than two years from the date on which the case is brought before the second instance courts = 1416. Source: datawarehouse (data extraction date: August,1st,2023).
Q097 (2021): Court of appeal (civil matters): Pending cases on 1/01/2021 = 29 320 ; Pending cases on 31/12/2021 = 28 507 ; Pending cases older than 2 years from the date the case came to the second instance court = 12 133. Bron: datawarehouse (date of data extraction: 01/07/2022).
Q097 (2020): *Cases in the second instance courts , labor courts and cases on appeal against decisions of justices of the peace and police courts (civil matters), at the trial level.
*Court of second instance (civil matters): Cases pending as of 1/01/2020 = 30668; Cases pending as of 12/31/2020 = 29300; Cases pending for more than 2 years from the date the case is brought to the 2nd instance courts = 12391. *Labor Court: Cases pending as of 1/01/2020 = 6033; Cases pending as of 12/31/2020 = 5841; Cases pending for more than 2 years from the date the case is brought to the 2nd instance courts = 1730. Source: datawarehouse (data extraction date: 06/16/2021)
*Civil litigation cases: for 2020, there is a decrease in the number of new cases and an even greater decrease in the number of completed cases due to the pandemic that has affected the operation of the courts

Q097 (2018): Number of cases before courts of appeal, labour courts and cases of appeal against decisions of justices of the peace and police courts, at the first instance level.
Court of Appeal (civil matters): pending cases at 1/01/2018 = 33,018; pending cases at 31/12/2018 = 32,321; pending cases for more than 2 years from the date in which the case is brought before the courts of second instance = 13,507. Labour Court: pending cases at 1/01/2018 = 6236; pending cases at 31/12/2018 = 6201; pending cases for more than 2 years from the date in which the case is brought before the courts of second instance = 1535. Bron: datawarehouse (extraction 1/09/2019)
no data on pending appeals against decisions of the justices of the peace and police courts at the first instance level.
In administrative matters, there is no second instance. The Council of State is the only supreme court.

Q097 (2017): Number of cases before courts of appeal, labour courts and appeals against decisions of justices of the peace and police courts at the first instance level.
Courts of Appeal: Justice in numbers
Q097 (2016): Number of cases before courts of appeal, labour courts and cases of appeals against decisions of justices of the peace and police courts, at first instance.
Q098 (General Comment): “Severe criminal cases”: cases appealed to the Court of Appeal (criminal matters).
“Minor criminal cases”: appeals against decisions of Police courts brought before first instance criminal courts (the latter act as second instance courts in respect of Police courts’ first instance cases).

Youth protection cases: included under “minor criminal cases”.
“Other criminal cases”: since the last cycle, this category includes cases dealt with by the investigation judges (Chambre de mise en accusation). The latter is involved in the judicial investigation oversight, supervises pre-trial detention in particular, and decides on referral to the trial judge.

Q098 (2024): 2024 data on “youth cases” are as follows: 361; 1 585; 1 601; 345; 135; they are included in the table under ”minor criminal cases”.
“Other criminal cases”: cases dealt with by the investigation judges (Chambre de mise en accusation) are not included in the table to avoid double counting the same criminal cases (2024 data: pending on 1 Jan.: 2 718, incoming: 12 813, resolved: 12 497, pending on 31 Dec.: 3 034, pending for more than 2 years: 1 269). Source: data warehouse (date of data extraction: 06/25/2025
There is no specific explanation for the significant increase in the number of minor criminal cases pending for more than two years.

Q098 (2023): Youth cases: pending on 1 January 2023: 363; incoming cases: 1 578; resolved cases: 1 583; pending cases on 31 December 2023: 358; pending cases older than 2 years: 130.
“Other criminal cases”: data of the Investigation Court (Chambre de mise en accusation): pending on 1 January 2023: 2515; incoming cases: 12462; resolved cases: 12259, pending on 31 December 2023: 2718; pending cases for more than 2 years: 1149. Source: datawarehouse (data extraction date: 14/07/2024). These figures are not included in the table, so as not to count the same cases twice (consistency with Q 94).
There is no particular explanation for the significant increase in the number of minor criminal cases pending for more than two years.

Q098 (2022): Court of Appeal (criminal matters): Totals: Pending cases on 1/01/2022 = 6610; pending cases on 31/12/2022 = 6677; Cases pending for more than 2 years from the date when the case is brought before the courts of second instance = 1436. Severe criminal cases (involving criminal and social offences): Pending cases on 1/01/2022 = 6304; pending cases on 31/12 /2022 = 6311; Cases pending for more than two years from the date when the case is brought before the courts of second instance = 1307. Cases related to juvenile protection: Pending cases on 1/01/2022 = 306 ;pending on 31/12/2022 = 366 ;Cases pending for more than 2 years from the date when the case is brought before the courts of second instance = 129. Source: datawarehouse(data extraction date :l/l8 /20l22). Other criminal cases = data concerning the Chamber of indictments (pre-trial stage).

Q098 (2021): Protectional cases - youth: these cases have been included in point 2 "Minor criminal cases". Here are the figures: pending cases on 1/01/2021 = 337; pending cases on 31/12/2021 = 306; Pending cases older than 2 years from the date the case came to the second instance court = 124. Bron: data warehouse (data extraction date: 01/07/2022).
The category “3. Other criminal cases” corresponds to the cases dealt with by the Investigation Chamber (Chambre des mises en accusation).

Q098 (2020): "Second instance Courts (Criminal Matters): * Totals: Cases pending as of 1/01/2020 = 9434; Cases pending as of 12/31/2020 = 9317; Cases pending for more than 2 years from the date the case is brought to the 2nd instance courts = 2616. * Serious offenses (involves correctional and indictment division cases): Cases pending as of 1/01/2020 = 9095; Cases pending as of 12/31/2020 = 8981; Cases pending for more than 2 years from the date the case is brought to the 2nd instance courts = 2499.
* Minor offences: youth cases are included in the figures shown in the table (1,374 new cases and 1,377 completed cases respectively). Also noteworthy are the youth cases: Cases pending on 1/01/2020 = 339; Cases pending on 31/12/2020 = 336; Cases pending for more than 2 years from the date the case is brought to the 2nd instance courts = 117.
Source: datawarehouse (data extraction date: 16/06/2021)
*For 2020, there is a decrease in the number of new cases and in the number of completed cases due to the pandemic that affected court operations."

Q098 (2016): The category "Severe criminal cases" concerns appeals to the courts of appeal against the judgements of the courts of first instance ruling in criminal matters. The category "Misdemeanour and / or minor criminal cases" refers to appeals to the courts of first instance against decisions of police courts in criminal matters.

Q099 (General Comment): The category of “administrative law cases” includes certain civil and social cases before the Court of Cassation, all tax cases before the Court of Cassation, and cassation cases before the Council of State.

Q099 (2024): The same methodology as in the last cycle is followed concerning the category of “administrative law cases,” which includes certain civil and social cases before the Court of Cassation, all tax cases before the Court of Cassation, and cassation cases before the Council of State. Concerning resolved administrative cases, for the Council of State the total of 505 resolved cases includes final judgments and orders of non-admission (342 + 163). There is no particular explanation regarding the observed variations in the number of cases.

Q099 (2023): Same methodology as last cycle.
Of the cases completed under “3. Administrative cases” (total 729 = 305 + 424), as far as the Council of State is concerned, it should be pointed out that the figure of 424 includes final judgments and non-admission orders (224 + 200).
No particular factor should be noted in the increase in administrative cases pending for more than 2 years.

Q099 (2022): The category "2.3 Other non-litigious cases" contains cases G (applications for legal assistance) brought before/dealt with by the Court of Cassation.
The category "4. Other cases" contains cases D (disciplinary matters) brought before/dealt with by the Court of Cassation.
For “administrative cases”, a new methodology has been adapted to comply with CEPEJ's definition for “an administrative case” (i.e., disputes between citizens and any public authority at local, regional or national level). Under previous cycles only cases dealt with by the Council of State were counted under point ”3.Administrative cases". For 2022, the category "3. Administrative cases" includes: 1) cases dealt with by the Council of State; 2) administrative cases dealt with by the Court of Cassation, namely a part of the C cases (civil cases): a considerable proportion of S cases - social affairs and all F cases - tax cases.
The number of resolved administrative cases before the Council of State (total 763 = 353 + 410) includes final judgments and orders refusing leave to appeal (189+221).

Q099 (2021): “Civil (and commercial) litigious cases”: in 2021, the Court of cassation managed to adopt a higher number of final decisions compared to 2020 (973 final decisions in 2021 compared to 853 in 2020). This is largely due to a series of 72 similar cases in which final decisions were delivered in 2021, as well as to the endeavours to increase the number of final decisions in tax matters (+30 final decisions compared to 2020). The number of incoming civil (and commercial) litigious cases in 2021 is more or less comparable to the one in 2020. In the long term, an upward general trend is to be noticed. However, more specific evolutions have been observed within this case category: in 2021, compared to 2020, the number of incoming civil cases (including commercial and administrative cases), as well as the number of incoming social cases has slightly decreased, while the number of incoming tax cases has increased. The latter is increasing from year to year.
The category “2.3 Other non-litigious cases” encompasses cases related to requests for judicial assistance introduced before and dealt with by the Court of cassation in 2021.
The category “4. Other cases”, concerns disciplinary cases brought before and resolved by the Court of cassation in 2021. Incoming disciplinary cases, as well as resolved disciplinary cases are higher in 2021 compared to 2020 (+ 15 incoming cases; + 11 final judgments). Given that the Court processes a small number of disciplinary cases each year, it is not possible to draw relevant conclusions based on the observed variations.
“3. Administrative law cases”: data communicated by the State Council; in respect of the number of resolved cases, there were 170 final decisions and 255 non-admission orders.

Q099 (2020): In the category '1. contentious civil (and commercial) cases' are included the C, F and S cases (civil; fiscal and social cases) that were filed/processed before the Court of Cassation in 2020.
The category '4. other cases' contains the D cases (disciplinary cases) filed before/processed by the Court of Cassation.
It should be noted that the Court of Cassation is also competent to decide on applications for legal aid. The category 3 ""administrative cases"" was provided by the highest adminsitartive Court.
(source Cour de Cassation)
With regard to the category ""administrative cases"" (Council of State), for completed cases: it should be noted that the figure of 479 covers 177 final judgments and 302 orders of non-admission. (source Council of State). It should be noted that the lack of horizontal coherence is due to the fact that the number of judgments does not necessarily correspond to the number of closed cases. For example, a judgment that closes two cases is recorded as a single judgment.
In 2020, the number of new administrative cases increased compared to 2019. However, due to the exceptional situation caused by COVID, the State Council could not keep up with the flow of cases and even though the number of completed cases increased compared to 2019, the number of pending cases at the end of 2020 increased. "

Q099 (2019): Civil, social and fiscal affairs at the supreme Court. A dministrative cases are the cases 'in cassation' at the Council of State.
Q099 (2018): Civil, social and tax cases at the Court of Cassation
Administrative affairs = cases "in cassation" at the Council of State
Q099 (2017): civil and commercial cases: cases in roles C, S and F at the Court of Cassation
administrative cases: cases before the Council of State "in cassation": Out= 221 judgments and 214 non-admission orders

Q099 (2016): Civil, social and fiscal cases at the Court of Cassation
Administrative cases ="cassation" cases in the State Council
The decrease in administrative cases is due to a reduction in referrals to the Council of State for this type of case.

Q099 (2014): 2014: The civil and commercial cases include cases of roles C (private and public law), F (tax law) and S (employment law) of the Court of cassation.
Administrative cases fall within the decisions of the Council of State in cassation.
Q100 (General Comment): The total corresponds to criminal law cases (P register) of the Court of Cassation.
Source: Hof van Cassatie van België - Cour de cassation de Belgique - Kassationshof von Belgien
Justitiepaleis - Poelaertplein 1 - 1000 Brussel
Palais de Justice – Place Poelaert 1 – 1000 Brussels
Q100 (2021): Remarks on the evolution of criminal cases:
While the number of incoming criminal cases brought before the Court of Cassation each year remained relatively stable between 2016 and 2020, this number increased sharply in 2021, with 345 additional units compared to 2020. This is an increase of 25.50% in one year. At present, it is not clear whether this increase is a one-off and attributable to rather occasional circumstances or whether it is the harbinger of a period of significant growth in the number of criminal cases. It goes without saying that this sudden development will have to be monitored closely in the years to come.
Of necessity, the Court of Cassation has succeeded in significantly increasing the number of final judgments handed down in criminal cases in 2021 compared to 2020 (+237 units). This is an increase of 17.27%. However, these efforts could not prevent the criminal caseload at the end of 2021 from increasing for the first time in years, especially with 89 units compared to the criminal caseload at the end of 2020.

Q100 (2016): Cases on the 'p' list of the Court of Cassation
the downward trend in the input of criminal cases is due to the tightening of access conditions: stricter time limits, obligation to serve notice of appeal, compulsory intervention by a lawyer trained in the cassation technique, abolition of immediate appeal against interlocutory judgments, abolition of the Court of Cassation's review of pre-trial detention, except for the first confirmation of the arrest warrant. To all this it must be added the introduction of a rapid and non-adversarial procedure allowing appeals that are not substantiated or manifestly inadmissible or unfounded to be refused.

Bulgaria

Q091 (General Comment): Proceedings related to registration in the Business and Land Registers (items 2.2.1 and item 2.2.2.) are heard by the Registry Agency at the Ministry of Justice, therefore the answers submitted for item 2.2. are NAP, as they refer to data on cases and/or proceedings that are not heard by the Bulgarian court system and, respectively, are not collected by the Supreme Judicial Council. The SJC also does not collect information on registration of associations and foundations, since according to the Non-profit Legal Persons Act, they are carried out in a register maintained by the Registry Agency and, respectively, RA is competent to provide data on them.
"Civil (and commercial) non-litigious cases" include only data available at the Supreme Judicial Council on the number of cases heard at first instance in district courts, initiated upon an application for issuing an order for the execution of a monetary obligation under Art. 410 and Art. 417 of the Civil Procedure Code – the so-called Order for payment cases and cases for divorce by mutual consent.

Q091 (2020): As it is impossible to distinguish between litigious and non-litigious cases for the present, for 2020 the following data is available as to the sum of all civil and commercial litigious and non-litigious cases: pending at the beginning 85 460; incoming 282 768, resolved 285 461 and pending at the end of the year 82 767. It is noteworthy that since 2020, the Unified Court Information System (UIS) has been gradually introduced in all courts, developed within the project “Creating a Model for Optimizing the Court Card of Bulgarian Courts and Prosecutor's Offices and Developing a Unified Court Information System” with the financial support of Operational Program "Good Governance" 2014-2020. Depending on the functionalities of the system, it is possible to collect information on the next cycle according to the indicators in question 91.

Q091 (2018): The observed increase in the number of incoming administrative law cases and accordingly in the number of pending administrative law cases at the end of 2018, is a consequence of an increase characterizing the period 2016-2017. As explained in the comment accompanying 2017 data, there is no specific reason for the increase in the number of incoming administrative law cases between 2016 and 2017. During this period there was an increase in the number of cases before the administrative courts (mainly claims under the Administrative Procedure Code, Management of Resources from the European Structural and Investment Funds Act, Tax and Social Insurance Procedure Code, Competition Protection Act, etc.).

Q091 (2017): 02/11/2018 7:17:04 AM There is no specific reason for the increase in the number of incoming administrative law cases between 2016 and 2017. During this period there was an increase in the number of cases before the administrative courts (mainly claims under the Administrative Procedure Code, Management of Resources from the European Structural and Investment Funds Act, Tax and Social Insurance Procedure Code, Competition Protection Act, etc.).

Q091 (2014): The number of all civil cases (litigious and non-litigious) considered as an overall category could be obtained by extracting from the total the number of administrative cases (67 513 pending cases on 1 January 2014; 294 657 incoming cases; 300 799 resolved cases; 61 371 pending cases on 31 December 2014.

Q093 (General Comment): .

Q094 (General Comment): For most of the crimes, the Bulgarian Criminal Code provides for a deprivation of liberty, which makes the distinction hard to be made. The offences could be divided into two categories: common offences and offences subject to private prosecution. For the common offences, the search of responsibility is subordinated to the common regime (there is a public interest concerned or public interest and personal goods). Such are the crimes against individuals (homicide, grievous or intermediate bodily harm, rape, fornication and etc.), crimes against the property (the list is not exhaustive). As to the offences subject to private prosecution, the criminal proceedings are initiated upon a complaint by the affected person (personal interests of the affected person, and usually the affected person and the perpetrator are close relatives). Those offences have a lower degree of public danger and affect less the rights of the concerned person. Such offences are the minor bodily injury, the insult, the slander and etc.
"Total criminal cases" includes all criminal cases - criminal cases of a general nature, criminal cases of a private nature, cases of exemption from criminal liability with the imposition of an administrative penalty in accordance with Art. 78a of the Criminal Code, private criminal cases, interrogation and administrative-criminal cases heard by the first instance courts.

Q094 (2022): "Total criminal cases" includes all criminal cases - criminal cases of a general nature, criminal cases of a private nature, cases of exemption from criminal liability with the imposition of an administrative penalty in accordance with Art. 78a of the Criminal Code, private criminal cases, interrogation and administrative-criminal cases heard by the first instance courts.

Q094 (2020): It should be noticed that since 2020, the Unified Court Information System (UIS) has been gradually introduced in all courts, developed within the project “Creating a Model for Optimizing the Court Card of Bulgarian Courts and Prosecutor's Offices and Developing a Unified Court Information System” with the financial support of Operational Program "Good Governance" 2014-2020.
Depending on the functionalities of the system, it may be possible to collect information on the next cycle according to the indicators mentioned in question 94.

Q097 (General Comment): In Bulgaria registry cases are not resolved by the courts. They are under the competence of the Registry agency where is the property register, the commercial register and register of non-profit legal entities, the BULSTAD register and the Register of the Property Relations between spouses.

Q097 (2024): "Administrative law cases": the amount of pending appeal cases (3157) at the end of the year is the sum of the pending cases of all 28 administrative courts in the Republic of Bulgaria. The data show that the highest ratio of pending cases to the cases subject to consideration, as well as the ratio of pending cases at the end of the year to the total number of pending cases from the courts, are demonstrated by Administrative Court-Haskovo with 37% and 6% respectively, Administrative Court-Lovech (34% and 4%), Administrative Court-Ruse (32% and 5%), Administrative Court-Blagoevgrad (25% and 7%). After reviewing the data from these courts in the annual reports for 2024 that are publicly available on their websites, it was found that their pendency is due to the fact that for the large part of the appeal cases, the proceedings have been suspended to wait for the CJEU decision on a preliminary ruling and because most of the cases were submitted in the last quarter of 2024 that led to the objective impossibility of concluding them by the end of the year. The situation should be construed against the background of data on the number of incoming cases and the number of administrative judges (Q46-2), as well as the extremely accessible administrative justice in Bulgaria.

Q097 (2021): As it is impossible to distinguish between litigious and non-litigious cases for the present, for 2021 the following data is available as to the sum of all civil and commercial litigious and non-litigious cases: pending at the beginning 16 469; incoming 41 774, resolved 41 391 and pending at the end of the year 16 852.
Q097 (2020): “Total”: the decreases in the number of pending cases is due to growth in civil and commercial cases in 2019 which continued in 2020, but at a slower pace. As it is impossible to distinguish between litigious and non-litigious cases for the present, for 2020 the following data is available as to the sum of all civil and commercial litigious and non-litigious cases: pending at the beginning 13 612; incoming 43 927, resolved 41 070 and pending at the end of the year 16 469.

Q097 (2019): See General comments

Q097 (2018): NA

Q097 (2016): There is no particular explanation for the downward trend observed between 2014 and 2016 in respect of the number of pending cases on 1 January for the categories "total" and "administrative law cases". All the data provided is correct.
Q098 (2022): "Total criminal cases" include all criminal cases ofsecond instance - criminal cases of a general nature and criminal cases of a private nature (common offences and offences subject to private prosecution), cases of release from penal responsibility with imposing of administrative punishment in accordance with Art. 78a of the Criminal Code, private criminal cases, interrogations, and administrative-criminal cases.

Q098 (2020): The specified sum does not include proceedings for which no penalties are imposed (pre-trial proceedings, enforcement proceedings). These proceedings are within the competence of other bodies in the Republic of Bulgaria.

Q098 (2018): NA

Q099 (General Comment): The data on the supreme courts are provided by the Supreme Court of Cassation and the Supreme Administrative Court on the basis of the information extracted from the case management systems implemented in these courts. The software of the Supreme Court of Cassation for extraction of statistical data is made according to a methodology developed in the Supreme Court of Cassation, as the codes for the respective type of cases are formed by a working group of judges in the Supreme Court of Cassation. This software, which allows the SCC to extract the statistics needed to answer Question 99, is different from the product used for other courts.
Since 2020, the Unified Court Information System (UIS) has been gradually introduced in all courts, developed within the project “Creating a Model for Optimizing the Court Card of Bulgarian Courts and Prosecutor's Offices and Developing a Unified Court Information System” with the financial support of Operational Program "Good Governance" 2014-2020.

Q099 (2024): The significant decrease in administrative cases pending for more than two years is due to the upward trend in cases resolved by the Supreme Administrative Court, which we have observed since 2022.

Q099 (2023): "Civil litigious cases pending for more than 2 years": the observed increase of more than 20% is due to: an increase in the number of interpretative cases, necessitating the suspension of court proceedings pending interpretative decisions; suspension of court proceedings due to preliminary ruling requests to the CJEU; suspension of court proceedings pending CJEU rulings; sending a case to a lower instance and delayed proceedings there; - the factual and legal complexity of the cases.
The increase in the number of administrative cases pending for more than 2 years by 38% between 2022 and 2023 (from 101 to 139) is because all of these 38 cases are suspended until the Supreme Court pronounces interpretative decisions.

Q099 (2022): "Civil litigious cases" - the reasons for the higher number of pending cases at the beginning of 2022 compared to 2021 are twofold: the large increase in case filings in 2021 and the critical staffing of the court, leading to a high backlog at the end of 2021. 1. The number of pending cases on 1 January 2022 is 845 more than on 1 January 2021, as the number of cases filed in 2021 is 1105 more than in 2020. As a result of the amendments to the Civil Procedure Law, access to cassation appeals has been expanded from the beginning of 2020 in cases related to consumer disputes, which in turn determined the increase in the number of cassation cases in the Civil Division and the Commercial Division. 2. In 2021 the Court is not sufficiently staffed due to the delay in the competitions for the appointment of judges in the Supreme Court of Cassation, as well as due to the retirement of judges in 2021 - 3 judges in the Civil Division and 1 judge in the Commercial Division.
"Administrative cases"/SAC/:Regarding the increase in the number of pending cases at the end of the reporting period (2022) and the higher number of cases initiated, compared to the number of cases completed, is explained, on the one hand, by the unevenness of the initiated cases by matter in the different divisions of the SAC, and, on the other hand - by the complexity and volume of the cases handled by some divisions (e.g. tax, customs, cases under the Management of Resources from the European Funds under Shared Management Act , public procurement, elections, etc.); the need for in-depth knowledge of European law, including requests for preliminary rulings to the Court of Justice of the European Union (CJEU). The problem with the pending cases till issuance of interpretative decisions or rulings of CJEU continues to be relevant, as all such cases are suspended and that respectively results in delays in their consideration and further strains the schedule. In particular, an analysis of the factually and legally complex tax cases shows that the one-month time limit for court decisions is not optimal. The complexity of this type of cases and the need for direct application of Community law suggest another reasonable time-limit for the panel to issue its ruling. Furthermore, it should be stressed that in parallel with the judicial activity during the year under review, General meetings of First and Second Chambers of the SAC on interpretative cases for unification of the case law were held on a monthly basis. Joint meetings of the SCC and the SAC on joint interpretative cases were also conducted regularly. On the other hand, the decrease in the number of initiated cases during the reporting period is also due to undertaken legislative changes concerning jurisdiction. Last but not the least, in 2022, there was still a high incidence of COVID-19 among the judges and staff of the SAC, which further led to delay in the administration of justice of the court.

Q099 (2021): There are also some other non-litigious cases that are not included in the data. However, their number is insignificant.
Concerning the category "Civil and commercial litigious cases": the reasons for the difference between 2020 and 2021 are twofold: the large increase in caseloads in 2021 and the critical staffing of the Supreme court of cassation. 1. There are 836 pending cases as of December 31, 2021 more compared to those at the end of 2020, as the cases received in 2021 were 1105 more than those who entered in 2020. As a result of the amendments to the Civil Procedure Law, access to cassation appeals was expanded from the beginning of 2020 in cases related to consumer disputes, which in turn caused an increase in the number of cassation cases in the Civil College/Chamber and the Commercial College/Chamber. 2. The court in 2021 is not sufficiently staffed due to delays in the competitions for the appointment of judges in the Supreme Court, as well as due to the retirement of judges in 2021 - in the Civil College/Chamber - 3 judges, and in the Commercial College/Chamber - 1 judge.

Q099 (2020): The number of pending administrative cases decreased meaningfully because of reorganization of work in the Supreme Administrative Court (SAC). By issuing an internal order The Chairman/President of the SAC increased the workload of each judge to achieve these results.
The difference of two cases in the horizontal calculation/consistensy (indicated by the SCC 3863 cases instead of 3865-Pending cases on 31 Dec. ref. year) is due to two cases found in 2020, which were completed in the SCC in a previous period (before 2020), but were not correctly filled in then with all the details needed by the software to report the cases as completed. The adjustment was made in 2020, which actually reduces the number of cases for consideration by two, and the number of completed cases does not increase because the cases were completed in a previous period - before 2020.

Q099 (2019): There are some non-litigious cases that are not included in the data but their number is insignificant.

Q099 (2018): There are also some other non-litigious cases that are not included in the data. However their number is insignificant.
The number of pending administrative cases older than 2 years decreased meaningfully because of reorganization of work in the Supreme Administrative Court (SAC). By issuing an internal order The Chairman/President of the SAC increased the workload of each judge to achieve these results.

Q099 (2017): The answer for 2. Non litigious cases (2.1+2.2+2.3) is NAP for previous cycles as well.

Q099 (2016): The increase in the number of pending administrative law cases (in the beginning and at the end of the year) is explained by the fact that data has been provided by different sources for 2014 and 2016.

Q100 (General Comment): The software of the Supreme Court of Cassation for extracting statistics is different from the product used for other courts. The division of criminal cases according to the criteria set out in Question 100 was made on the basis of the definitions of the CEPEJ.
In the category “other criminal cases” are included: cases with charges on corpus delicti which doesn’t have independently application; cases on Chapter XXXIII Criminal Procedure Code (re-opening of criminal cases); private cassation proceedings (change of local jurisdiction, jurisdiction disputes, proceedings on returning of cassation claim/protest etc.); procedures regarding execution of judicial acts that are entered into force; proceedings regarding administration and/or movement of cases etc.

Q100 (2024): 1. In the category “Other criminal cases” are included: cases with charges on corpus delicti which doesn’t have independently application; cases on Chapter XXXIII Criminal Procedure Code (re-opening of criminal cases); private cassation proceedings (change of local jurisdiction, jurisdiction disputes, proceedings on returning of cassation claim/protest etc.); procedures regarding execution of judicial acts that are entered into force; proceedings regarding administration and/or movement of cases etc.
2. In comparison the data from 2024 with those from 2023 it is ascertain that there is more than 20% difference in seven of the indicators which are marked at the chart with a comment.
With indicator “Pending cases on 1 January for the referent year – Misdemeanour and/or minor criminal cases” it is marked the highest increase as a percentage (72.22%). The numbers in this indicator are small, respectively also the difference as an absolute amount is small, but it recalculates in a big percentage difference. In the particular case this difference is due to slightly increase number during 2023 of the incoming cases qualified as ”Misdemeanour and/or minor criminal cases” representing the natural dynamic of the incomings during the years.
With indicator “Pending cases on 1 January for the referent year – Other criminal cases” there is difference of 10 cases but because of the low level of this indicator it recalculates in a big percentage difference (27.78%).
The same circumstance is valid regarding the indicator “Incoming cases – Misdemeanour and/or minor criminal cases” – a slightly decrease of number of the incoming cases from this type during the referent year converts in difference of -23.40%.
The rest four indicators, where there is difference more than 20%, refers to the pending cases for all types to 31.12.2024 – “Pending cases on 31 December of the referent year – Severe criminal cases” (-36.41%), “Pending cases on 31 December of the referent year – Misdemeanour and/or minor criminal cases” (-38.71%), “Pending cases on 31 December of the referent year – Other criminal cases” (-45.65%) and “Pending cases on 31 December of the referent year – Total of criminal cases” (-38.10%). The differences are due to, on one hand of the slightly decrease of the incoming of all types of cases and on the other hand, of the increase number of the magistrates at the Criminal College at the Supreme Court of Cassation that to 31.12.2023 is 28, and to 31.12.2024 is 30, which increased the number of decided cases of all categories.

Q100 (2023): 1. In the category “Other criminal cases” are included: cases with charges on corpus delicti which doesn’t have independently application; cases on Chapter XXXIII Criminal Procedure Code (re-opening of criminal cases); private cassation proceedings (change of local jurisdiction, jurisdiction disputes, proceedings on returning of cassation claim/protest etc.); procedures regarding execution of judicial acts that are entered into force; proceedings regarding administration and/or movement of cases etc.
2. A comparison of the 2023 data with the 2022 data reveals a greater than 20% difference for seven of the indicators noted in the table with comments. For four of the seven indicators ("Pending Cases on January 1 – Misdemeanour and/or Minor Criminal Cases," "Incoming Cases – Misdemeanour and/or Minor Criminal Cases", "Pending Cases on December 31 – Misdemeanour and/or Minor Criminal Cases" and "Pending Cases on December 31 – Other Criminal Cases"), the obvious reason is that the numbers in all indicators are small, accordingly the differences are small in absolute value, and do not reflect a significant change in the performance of the Criminal Division of the Supreme Court of Cassation, but translate into a large percentage difference. For example, in the indicator "Pending Cases on December 31 – Misdemeanour and/or Minor Criminal Cases" a difference of 13 counts translates into a 72.22% difference.
There is also a significant difference in the indicators "Incoming cases – Other criminal cases" and "Resolved cases – Other criminal cases" in absolute value. It is due to the 15.87% increase in the total number of the filings in the Criminal Division in 2023 compared to 2022. This increase is greatest in cases for crimes classified as "Other" – 24.85%, which, in turn, leads to an increase in the number of cases decided in this category.
The increase in the number of cases filed for crimes classified as "Other" is due to the natural dynamics of the filings over the years, which is unpredictable within a narrow range. In the indicator "Pending cases older than 2 years from the date the case came to the Supreme Court" a large increase is reported – by 125%, but since the numbers are small (4 counts for 2022 and 9 counts for 2023), the reasons for this increase are not systematic, but rather related to the specifics of the each one of the cases. In 4 of the cases, judgments were rendered in early 2024, 1 case was suspended due to the illness of the defendant, and 2 cases could not proceed due to failure to receive information from a country in South America regarding the death of the defendant. The specific circumstances set out above indicate that the lengthy pendency of a substantial proportion of the cases referred to in this indicator is due to objective reasons.

Q100 (2022): 1. In the category “Other criminal cases” are included: cases with charges on corpus delicti which doesn’t have independently application; cases on Chapter XXXIII Criminal Procedure Code (re-opening of criminal cases); private cassation proceedings (change of local jurisdiction, jurisdiction disputes, proceedings on returning of cassation claim/protest etc.); procedures regarding execution of judicial acts that are entered into force; proceedings regarding administration and/or movement of cases etc.
2. A comparison of the 2022 data with the 2021 data reveals a greater than 20% difference for five of the indicators noted in the table with comments. For four of the five indicators, the obvious reason is that the numbers for all indicators are small, so the differences are small in absolute value and do not reflect a significant change in the performance of the Criminal Division of the Supreme Court of Cassation, but are recalculated into a large percentage difference.
For example in one indicator – "Pending cases older than 2 years from the date the case came to the Supreme Court", a difference of 1 case is converted into a 20% difference. Only the indicator – "Incoming cases – Severe criminal cases" has a significant difference in absolute value. It is due to the reduction by 10% in the total number of admissions to the Criminal Division of the Supreme Court of Cassation in 2022 compared to 2021. This decrease is entirely in severe criminal cases – 23.15%, while in cases for minor crimes and in other cases the number almost does not change and even increases slightly (by 5.88% and 4.96%, respectively). The decrease is due to the natural dynamics of admissions over the years, which is unpredictable within a narrow range.

Q100 (2021): Explanation related to all differences reported under item 2 "Misdemeanors and/or minor criminal cases" (31.8%, 22.73%, -20.69%) and item 3 "Other criminal cases" (-45 % and 54.55%.):the reasons for the differences in percentages for the above types of cases compared to 2020 are mathematical. The figures for all the listed indicators for the reference years 2020 and 2021 are small, respectively, and the differences are small as an absolute value and do not reflect a significant change in the work on criminal cases in the Supreme Court of Cassation, but are recalculated in a large percentage difference. A more detailed mathematical explanation is obtained if each of these indicators is calculated, what percentage it represents in relation to the total number of cases for examination for the corresponding year, received by the Criminal Board of the Supreme Court. In 2020, there were 1 328 cases for consideration, while in 2021 - 1 407 cases. Taking into account the total number of cases for consideration in 2020 and 2021, the difference for which an explanation is due varies in absolute value from 0.76% to -1.79%. It is too small to be an indication of a significant change in the work of the Supreme Court of Cassation in criminal cases.

Q100 (2018): The “Other cases” group are: cases where the punishment for a committed crime depends on the punishment for other crime, that is established in the main text of the Criminal Code – it could be an offence of more severe or lightly punishment; cases on procedures related to the main case; cases on claims for re-establishment of criminal case; cases on jurisdiction disputes; cases on interpretation of a judicial act; cases on rehabilitation; cases that were instituted on a private appeal, etc. Some cases which were previously counted in misdemeanour/minor are now indicated under “other” which explains the decrease in the number of misdemeanour/minor criminal cases in respect of all categories – pending, incoming and resolved cases.

Q100 (2016): Comment on question 100
Till 2015 only the Supreme Court of Cassation was hearing the requests for resumption of criminal cases. In 2015 the Criminal Procedure Code was amended with the Law For Amendment and Supplementation of Criminal Procedure Code /SG, 42/2015/. According to the amendment the request for resumption of the criminal case grounded on art. 422, par. 1, p. 5 of the Criminal Procedure Code shall be heard by the respective court of appeal, when the judgments under art. 419 of the Criminal Procedure Code were decreed by a regional or district court, except of the new verdicts.
As a result of the legislative amendment, a significant part of the requests under Chapter Thirty-three of Criminal Procedure Code are heard by the courts of appeal in the state.
The above led to reduction in the number of cases related to the resumption of criminal cases heard by the Supreme Court of Cassation. This is also the reason for the presence of more than 20% deviation from the total number of criminal cases heard by the Supreme Court of Cassation during 2016 than those from previous years.

Q100 (2014): In the annual report of the Supreme Court of Cassation in 2012 (criminal division) the cases pending at the end of the reporting period were 260. In the report for 2013 the pending cases at the beginning of the period were 602 and the pending cases at the end of the reporting period were 671. Under Table 1 of the report for 2012, there is a note that the pending cases which are not included in the number of adjourned and private proceedings were filed in December 2012 at the registry of the Supreme Court of Cassation and are scheduled for consideration in January and February 2013. As a result, the total number of pending cases in 2014 appears much higher than in 2012.

Croatia

Q091 (2024): The Statistical Review of Court Operations for 2024 has also been updated to reflect the revised number of 36,411 in section 2.2.1, "Non-litigious land registry cases - Pending cases on January 1st of the reference year."
Although the number of cases in 2024 was roughly the same as the previous year, the courts' efficiency improved, as evidenced by the higher number of cases resolved and, as a result, a smaller number of unresolved cases at the end of 2024 (unlike in 2023, when courts were unable to process cases fully due to the strike of public and civil servants).
During 2023, the courts were unable to process the incoming caseload in its entirety, leading to an increase in the number of pending cases at the end of 2023 and continuing into 2024. This trend has persisted throughout 2024. For Pending cases older than 2 years from the date the case came to the first instance court - In the course of case resolution activities, a greater number of cases older than two years were addressed, resulting in a reduction of 77 unresolved cases of this category compared to 2023.
3. Administrative law cases - During 2023, the courts were unable to process the incoming caseload in its entirety, leading to an increase in the number of pending cases at the end of 2023 and continuing into 2024. This trend has persisted throughout 2024. For Pending cases older than 2 years from the date the case came to the first instance court - In the course of case resolution activities, a greater number of cases older than two years were addressed, resulting in a reduction of 77 unresolved cases of this category compared to 2023.
With regard to land registry cases — which account for nearly half of the total inflow of court cases in the Republic of Croatia — it is particularly important to emphasize the scope and volume of these data. The data are obtained exclusively through the Joint Information System of Land Registers and Cadastre (ZIS). The reliability and consistency of data concerning the work of 109 land registry departments largely depend on the timeliness and completeness of updates within the system itself. It is therefore likely that horizontal inconsistencies primarily arise for this reason.
Discrepancies in comparison with data from the previous year can be further explained by the extraordinary circumstances that affected court operations during 2023. Owing to the strike of court clerks and judges, there was a temporary suspension in the receipt and processing of cases, which resulted in a decline in activity. In 2024, following the resumption of regular operations, an increase was recorded both in the number of incoming and resolved cases, which is also reflected in the overall indicators. This increase should therefore not be interpreted solely as a result of structural changes in court operations, but also as compensation for the reduced level of activity in the previous period.

Q091 (2023): According to the comment of the previous period: „In 2022, the number of incoming Civil (and commercial) litigious cases dropped because of the unique situation from the previous cycle of a significant number of incoming collective labour cases from the public sector workers (more than 60.000 incoming cases). As a result of the characteristics of the previous period and, civil servants and employees' strike in 2023. the decrease is documented in the following categories: Pending cases on January 1 ref. year - 1. Civil (and commercial) litigious cases decreased by 20.92% and and Resolved cases decreased by 22.79%.
Q91.3 - The increase in incoming cases is due to the cases brought against the City of Zagreb in response to the cancellation of one of the social programs. We believe that this increase is extraordinary in this period.

Q091 (2022): In 2022, the number of incoming Civil (and commercial) litigious cases dropped because of the unique situation from the previous cycle of a significant number of incoming collective labour cases from the public sector workers (more than 60.000 incoming cases). Since they were resolved in 2022, this has led also to a significant increase in the number of resolved cases.
Regarding General civil (and commercial) non-litigious cases, as this includes enforcement cases which have had legislative changes during 2021, a new type of case has been recorded in courts by the end of 2021, which now seems to be a permanent increase in both incoming cases and resolved cases (up from an average of 40.000 cases received and resolved every year prior to 2021 to about 60.000 cases in 2021 and 90.000 cases in 2022. These are all cases of small value that are very quick to resolve.
For non-litigious registry cases, there is a slightly bigger horizontal inconsistency due to additional corrections from the sides of courts after the official published data.

Q091 (2021): Between 2020 and 2021, there was an increase of incoming civil and commercial cases caused by the receipt of a large number of civil cases, namely lawsuits in labor disputes due to payment based on rights arising from the collective agreement, which occurred in the first quarter of 2021 and continued, to a somewhat lesser extent, throughout the rest of the year. Also there was an increase of the number of incoming enforcement cases that courts received during the last quarter of 2021, which was caused by a change of legislative framework in September 2021.

Q091 (2020): Regarding your comment about decreased number of incoming cases (except business registry cases) shown in this table: Due to the pandemic caused by COVID-19, in 2020., court proceedings for limited period in 2020 were submitted under specific conditions and measures, which contributed to decreased number of incoming cases, as well as court hearings especially in litigious cases.
Regarding the number of incoming non-litigious business registry cases - New article added by the Act on Amendments to the Court Register Act (Official Gazette No. 40/19) which came into force at the end of 2019., stipulated the obligation of companies to submit a request for entry of at least one e-mail address to the courts managing business registry. This was the reason for temporarily increased number of requests (cases), which were all resolved by the end of January 31, 2021.

Q091 (2019): In 2019 new amendments to the Personal Bankruptcy Law came into force. That caused significant income of other than criminal cases to the municipal courts. There was an increase in the number of land registry incoming cases too. The increased number of incoming land registry cases is caused by intensified economic activities and activities on the real property market. With the same number of employees working on these cases, pending cases increased at the end of the year. Additionally, a large number of citizens started civil lawsuits against banks regarding loans in Swiss currency. These factors combined led to the increase of pending cases at the end of the year as well. The decrease in the number of civil and commercial non litigious cases is due to enforcement cases: courts solved a significant amount of these cases during 2018, while the number of incoming cases decreased as well. For that reason, at the end of 2018 /beginning of 2019 there are fewer cases than at the end of 2017/ beginning of 2018.
As regards "administrative cases", administrative courts resolved more cases during 2018. That decreased the pending stock of the cases at the end of 2018/beginning of 2019.

Q091 (2018): Decrease of the number of incoming cases (34%) in category 2.1. in comparison to previous cycle is due to the significant decrease of enforcement cases which are calculated in this category. Majority of enforcement cases are aimed at debtor’s monetary assets based on trustworthy documents – i.e. documents that make the existence of debt highly plausible (such as regular utility bills, telecom operators’ invoices, credit card invoices, unpaid installments of bank loans, etc.). Those cases were removed from jurisdiction of courts to public notaries already in 2012., and since then there is year after year decrease of enforcement cases in municipal courts - enforcement based on other types of enforcement titles (other than trustworthy document), as well as enforcement against real property.

Q091 (2017): The cases relative to the Personal Bankruptcy Act which came into force on 1st January 2016 are handled by the 1st instance Municipal Courts. The data about these cases was not available in the moment of completing the questionnaire for the Evaluation (CEPEJ study for EU Scoreboard) (data 2016) but the data is now available within the ICMS system for the year 2017 and they are incorporated in the category 1. Civil (and commercial) litigious cases (including litigious enforcement cases and if possible without administrative law cases, see category 3). There were 268 pending Personal Bankruptcy cases on January 1st 2017, 377 incoming cases in 2017, 281 cases resolved in 2017 and 365 pending cases on 31st December 2017.
"Registry cases": In this category there is more than 20% increase of pending cases at the beginning of reference year in comparison to the beginning 2016. The reason are land registry cases. As stated in the previous cycle, the reason for the increased number of pending land registry cases is the significant income of these cases during 2016 and the difficulty for courts to cope with this income in same amount as in 2015. This all reflects on data for 2017.
The reason for the decrease in the number of pending administrative cases at the end of the 2017 is laying in the fact that administrative courts received almost 18% less cases than in 2016. Although judges resolved less cases than in previous year, in relation to the income, it was enough to decrease the number of pending cases at the end of 2017 for more than 20%.

Q091 (2016): More land registry cases has been received in 2016 than in 2014 so the total number of registry cases has increased as well.
During the two-year period (through 2014 and 2015), administrative courts accumulated unresolved cases - they solved significantly less than they received, which led to 15024 pending cases at the beginning of 2016. By the end of 2015, a total of 5 judges were transferred to administrative courts from other legal branches, which resulted in better results in 2016 (more resolved cases).
Q091 (2015): In 2015 the reorganization of the judicial system in the Republic of Croatia, which is partly related to the reorganization of the second instance proceedings, has been carried out. Consequently, in the county courts there has been a harmonization of case registers and case codes (litigious, non-litigious and other) in a way that in 2015 courts carried out the alignment and correction of the indication of certain types of second-instance civil cases. For this reason, in 2015 the correction of the category of cases according to the new methodology of monitoring has been carried out.

The total of all categories is aligned with the continuity of previous cycle (horizontal consistency), whereas the individual categories in the column “Pending cases on Jan. 1 2015” are presented under the new revised indication of the types of cases. For example, some cases that have been categorized in previous cycles under category 'Other', the courts have categorized according to the certain types of dispute which was possible after new case registers were open (e.g. Enforcement – Security by lien on the basis of an agreement of the parties).

Q091 (2014): In 2014, a new methodology of monitoring unresolved land registry cases was introduced, in a way that regular land registry cases (i.e. registration, note, caution) are not being monitored anymore and are not presented in the total. Other land registry cases (i.e. objections, appeals, specific corrections,etc.) are still being monitored. The overall number of enforcement cases is subsumed in the category “general civil and commercial non-litigious cases”. The Municipal Civil Court undertook the harmonization of data due to data migration. After the new standardization of the audit, the Supreme Court has started to be less up-to-date since the number of received cases is far beyond the number of cases which may be resolved (priority is given to urgent and old cases).

Q092 (General Comment): The category “civil (and commercial) non-litigious cases” encompasses all non-litigious cases that are not stated in the different categories.
Q092 (2014): For 2013 and 2014, the provided examples concern only question 92: exercise of the parental care; meeting and spending time with parent; obtaining the capacity to exercise rights of minor that became parent; decision with whom the child will be living; issuing of the permit for entering into marriage before age of majority; deprivation/returning of capacity to exercise rights; deprivation/returning /prolongation of parental care; deprivation of parents’ right to live with the child and raise the child; content of court will; security of evidence; setting-up/derogation of necessary passage; setting-up of court deposit, opening of a safe; verification of a contract on life-long support; amortization of documents; trust of a child with behavioural disorder; the recognition of foreign court decisions; declaring a missing person dead; co-ownership dissolution; meetings and spending time with grandmother, grandfather, sister, brother, half-sister, step-brother; land borders; regulation of relations between co-owners; restraining a child; providing legal aid; conclusion of court settlement; inheritance statement; proof of death; regulation of co-ownership relationships; boundaries and necessary passage; determination of extramarital union; other- family non-litigious proceedings; storage of the testament; providing international legal assistance; verification; other –the rest of non-litigious proceedings; international child abduction; other - proclamation of the deceased and proof of death; the appointment of members of the companies body; the appointment of auditors, temporary/interim administrator; the safeguard of evidence; the establishment of a court deposit; opening of the safe deposit box; registry cases; previous measures; forcible establishment of lien; temporary measure; temporary and previous measures, recognition of arbitration decisions; recognition of a foreign court decision; cases entering in the scope of Article 4 point 2 of the Companies Act; court insurance by the transfer of ownership and rights.

Q093 (2014): In 2013 and 2014 the reply NAP in respect of the category “other” is due to the fact that a bankruptcy registry has not been established in the Republic of Croatia.
Q094 (2024): Due to the strike of court clerks and judges, there was a disruption in the receipt and resolution of cases, which resulted in a temporary decline in activity. In 2024, with the resumption of regular operations, an increase was recorded both in the number of incoming and resolved cases, which is also reflected in the overall indicators. This increase therefore does not indicate structural changes in court operations, but rather compensation for the reduced level of activity in the previous period.

Q094 (2023): Horizontal inconsistency corresponds to 2.62% of corrections to the "e-spis" system during a year.

Q094 (2022): The data for 2022 in “Other criminal cases” include only the execution of sanctions (imprisonment), investigation actions of a judge and cases connected to procedural matters. In this cycle, the number of other criminal cases decreased because we aligned our methodology with CEPEJ reporting and excluded some of the case types which in previous cycles were included. This is due to the fact that data for misdemeanour cases came from a separate case management system in the previous cycles (prior to 2020), and it was not possible to exclude those cases which do not fit any of the above categories.

Q094 (2021): In category "Other cases" are included (from last cycle) cases related to criminal matters in first instance: execution of sanctions (imprisonment), investigation actions of a judge, cases connected to procedural matters (e.g. panel of judges decision about detention, about prolongation of detention, about confirmation or dismissal of indictment, etc.)

Q094 (2020): In category "Other cases" are included (from last cycle) cases related to criminal matters in first instance: execution of sanctions (imprisonment), investigation actions of a judge, cases connected to procedural matters (e.g. panel of judges decision about detention, about prolongation of detention, about confirmation or dismissal of indictment, etc.)
Regarding decreased number of resolved minor criminal cases: Due to the pandemic caused by COVID-19, in 2020., court proceedings for limited period in 2020 were submitted under specific conditions and measures, which contributed to decreased number of court hearings, also in minor criminal cases.
Regarding horizontal inconsistency: For most of the categories, the full horizontal inconsistency can not be ensured, due to some adjustments and changes in the Case Management System used by courts.

Q094 (2018): In category "Other cases" are included (from this cycle) cases related to criminal matters in first instance: execution of sanctions (imprisonment), investigation actions of a judge, cases connected to procedural matters (e.g. panel of judges decision about detention, about prolongation of detention, about confirmation or dismissal of indictment, etc.)

Q094 (2016): Starting from 1 June 2013, when the Act on Amendments to the Misdemeanours Act (OG 39/2013) entered into force, the inflow of first-instance misdemeanour cases displayed in this table continuously and significantly had been reduced. The number of resolved cases reduced as well, but due to a significant decrease in inflows, the number of unresolved cases reduced by the end of the period. This reflected also on High Misdemeanours Court, whose data is shown in this table.

Q094 (2014): The new Criminal Procedure Act entered into force in September 2011, introducing the investigation conducted by the State Attorney Offices (instead of court investigation), as well as new and wider opportunities for negotiating settlements. Besides, the decrease of the total number of misdemeanour cases at all levels was the main goal of adopting the Act on the Amendments of the Misdemeanour Act in 2013. The definition of misdemeanour act was changed, the principle of opportunity as well as the simplification of the procedure were introduced, more active role was given to the plaintiff etc. The Register of Unpaid Fines was established. There is no more suspension of the proceedings because of the statute of limitations.

Q097 (2024): Some data from this table for 2023 were not reported as they were unavailable at the time of questionnaire completion due to technical issues in the information system. The corrected data for 2023 were submitted together with the 2024 figures.
Regarding the number of unresolved cases older than two years, discrepancies exist because data for 2023 were not available.
Concerning non-litigious land registry cases, as previously mentioned, the 2023 strike and reduced court productivity resulted in increased backlogs, reflected in the higher number of unresolved cases at the end of 2023 and the beginning of 2024.
Although first-instance courts resolved more cases in 2023, this led to an increase in pending cases at the appellate level. Since courts were unable to process the incoming caseload, the overall number of pending cases increased.
A similar situation applies to non-litigious business registry cases.

Q097 (2023): The result of a three-month strike is a 71.55% increase in the total number of non-criminal law cases (1+2+3+4) - Pending cases older than two years from the date the case was filed in second instance court. The County Courts had the biggest increase in second-instance civil litigation (the High Commercial Court decreased such cases from 155 to 101, while the County Courts increased them from 1,092 to 1,991 cases).
2.2.1. Non-litigious Land Registry cases - the 2023 civil servants strike resulted in a decreased number of resolved cases and increased number of pending cases on 31 December.

Q097 (2022): Regarding second instance „General civil (and commercial) non-litigious cases", starting with early 2022, all the cases have been classified as „appeal on sentence" type of cases, instead of „enforcement cases", „family law cases", „labour law cases" or any other case type available in the court management system database, as it was in the previous cycles. Because of that, we are unable to differentiate between second instance litigious cases and second instance non-litigious cases (or any of the other types of cases for that matter). For „Other non-litigious cases", the reason for no available data is the same as regarding "General non-litigious cases", as those types of cases that would have been in the category of „Other non-litigious cases" according to the classification by the courts in the previous years, are also categorised as a generic „appeal case". As regards registry cases, there is no specific reason for the decrease in the number of resolved cases, as the number of incoming cases is roughly the same as last year (around 1.700 incoming cases). Regarding administrative cases, there is no specific reason for the decrease in the number of resolved cases, as the number of incoming cases is roughly the same as last year (around 5.500 incoming cases).

Q097 (2019): Due to legal changes, the High Administrative Court of RoC started to receive more cases from 2016. With the same amount of judges, they did not manage to cope well with this income of case, therefore pending cases increased.

Q097 (2018): In category 1. Civil (and commercial) litigious cases there has been a decrease in the number of pending cases at the beginning of the period, received cases, resolved cases and also pending cases at the end of the year. This seems to be the trend for several years now. Although these courts are resolving less cases than in previous period, due to the reduced income, pending cases are still significantly decreased. Reduced number of received civil litigious and commercial cases on second instance do not have reason in for example law changes. Simply because less cases are resolved at first instance, less appeals are lodged to the second instance.
The increased number of pending administrative law cases at the beginning and at the end of the year as well as received cases is due to the extended jurisdiction of the High administrative court following law changes. The latter led to an increased inflow of cases and difficulty for the High administrative court to cope successfully with the income of second instance cases, especially since the number of judges remain the same as before law changes. This comment was provided also for last cycle. The rest of the categories which have increase or decrease in pending cases is just an effect of the incoming or resolved cases.

Q097 (2017): The increased number of pending administrative law cases at the beginning and at the end of the year is due to the extended jurisdiction of the High administrative court following law changes. The latter led to an increased inflow of cases and difficulty for the High administrative court to cope successfully with the income of second instance cases. This comment in more details was provided also for last cycle.
In this category there is more than 20% increase of pending cases at the beginning of reference year in comparison to the beginning 2016. The reason are land registry cases. Reason for increased number of pending land registry cases is decreased number of resolved cases in relation to the number of incoming cases (87%) during previous year (2016.) which affected results for 2017. In 2017, second instance courts also resolved less than received land registry cases.
The reason for the decreased number of pending business registry cases at the beginning of 2017 in comparison to the beginning of 2016 is the number of resolved cases in relation to the number of incoming cases (104%) during 2016. The lower number of received cases and Clearance rate of 106% lead to the decrease of the number of pending business registry cases at the end of 2017. The reason for the decreased number of pending "other non-litigious cases" at the beginning of 2017 in comparison to the beginning of 2016 is the significant number of resolved cases in relation to the number of incoming cases (185%!!) during 2016. Regarding the increased number of incoming cases of this type, there are in absolute numbers very few cases (154) and although there is an increase of more than 20% in comparison to previous year, we think that there is no significant explanation for this, which would affect the trends in following cycles. As for the decrease in the number of resolved "other non-litigious cases", there is no significant explanation for this, but we think that it will not influence the trend in future cycles.
The reason for the decrease of pending civil and commercial litigious cases older than 2 years in second instance courts lays in the fact that in 2017 second instance county courts and the High Commercial Court resolved significant amount of cases in relation to received cases (122%) with special focus on older cases. This led to a decrease of more than 17% of all pending cases and more than 30% of pending cases older than 2 years.
The reason for the decrease of pending non-litigious cases older than 2 years in second instance courts lays in the fact that in 2017 second instance county courts and the High Commercial Court resolved more cases than received (103%) with special focus on older cases. This led to decrease of more than 7% of all pending cases and more than 30% of pending cases older than 2 years (of which they have few in the beginning).The reason for the decrease of pending "general civil and commercial non-litigious cases" older than 2 years in second instance courts lays in the fact that in 2017 second instance county courts and the High Commercial Court resolved more cases than received (103%) with special focus on older cases. This led to decrease of more than 7% of al pending cases and more than 30% of pending cases older than 2 years (of which they have few in the beginning).The reason of the increase of pending registry cases older than 2 years in this category is entirely due to the increase of the number of pending land registry cases older than two years. The reason is already explained - the increase of pending cases in total is due to th

e difficulty of second instance courts to cope with the income of these cases. Finally, in respect of administrative law cases, due to the decrease of number of pending cases of this type in total, there is also decrease for 8 cases of pending cases older than 2 years (as stated before, we do not think that this is significant change taking into consideration absolute numbers and type of cases).
Q097 (2016): Second instance land registry cases, due to introducing separate case registers for certain type of cases on second instance courts,are now traceable as such in case management system. They have been taken out from Other non-litigious cases, where they were presented in previous cycles. The number of administrative cases, both in incoming and pending cases at the end of period is increasing. This is due to the law changes, which have extend jurisdiction of this court and consequently increase income of cases and unresolved cases at the end of period.

Q097 (2014): It is noteworthy that in 2012 and 2013, the ICMS could not recognize and divide cases into litigious or non-litigious. In 2014, the ICMS was improved as Croatia introduced updated and a very detailed code table, in order to extract more detailed case types from the system. Therefore, now the distinction between all cases in litigious and non-litigious cases as well as other types of cases can be made very accurately. This change of methodology of categorisation affected the difference between pending cases on 31 December 2013 and pending cases on 1 January 2014 which will disappear in the next cycle.

Q098 (General Comment): Due to the peculiarity of the Croatian legal system explained within the frame of question 94, the category “severe criminal cases” subsumes criminal cases under the jurisdiction of the 2nd instance county courts, while the category “misdemeanours and/or minor criminal cases” encompasses cases under the jurisdiction of the 2nd instance misdemeanour courts and the High Misdemeanour Court. Croatian legislation distinguishes misdemeanours and criminal offences. Misdemeanour Act prescribes that misdemeanours and misdemeanour legal sanctions can be proscribed solely for those behaviours that violate or threaten public order, social discipline and social values guaranteed and protected by the Constitution of the Republic of Croatia, international law and the laws whose protection is not possible without misdemeanour legal sanction, and their protection is not achieved with criminal coercion. The above shows that misdemeanours are certain behaviours that deserve sanction, but which by its severity and consequences do not deserve criminal liability.
Since the Criminal code does not strictly classify the categories of severe and minor criminal offences, we are not able to classify as misdemeanour/minor all offences for which it is not possible to pronounce a sentence of deprivation of liberty, and classify as severe offences all offences punishable by a deprivation of liberty
According to this, in the category “severe criminal cases” there are criminal cases under the jurisdiction of the 2nd instance county courts, while in the category “misdemeanours and/or minor criminal cases” there are cases under the jurisdiction of the 2nd instance misdemeanour courts and High Misdemeanour Court.

Q098 (2023): The increase in the number of criminal law cases in second instance courts (appeal) is due to the County Courts not resolving more cases than they received in either 2022 or 2023. This has resulted in an increase in the number of pending cases, with a clearance rate of 91% in 2022 and 89% in 2023. The strike has resulted in an increase in pending cases that have been in the second instance court for more than two years.

Q098 (2021): In category "Other cases" are included cases of execution of imprisonment sanctions on county courts in second instance.
Q098 (2018): Starting from 1 June 2013, when the Act on Amendments to the Misdemeanors Act (OG 39/2013) entered into force, the inflow of first-instance misdemeanor cases had been reduced up to the point where there was no more justification for keeping specialized courts for these types of cases. This led also to continuous decrease of second instance misdemeanor cases, which is also the case in this reporting cycle.
Category "Other cases" - category introduced in this cycle: in case of Croatia, cases calculated here are cases of execution of imprisonment sanctions on county courts in second instance.

Q098 (2016): Starting from 1 June 2013, when the Act on Amendments to the Misdemeanours Act (OG 39/2013) entered into force, the inflow of first-instance misdemeanour cases displayed in this table continuously and significantly had been reduced. The number of resolved cases reduced as well, but due to a significant decrease in inflows, the number of unresolved cases reduced by the end of the period.
Q098 (2014): According to 2014 data and pursuant to the Act on the Amendments of Misdemeanour Act which entered into force in 2013 (OG 39/13), possession of drugs for personal usage is no longer a criminal act but a misdemeanour act. That provision enabled disburdening of the county courts. Furthermore, municipal courts became competent for criminal act of unauthorized production and trafficking of drugs (which was previously in the jurisdiction of county courts and made a share of 40-50% of all cases dealt with by the county courts).
Q099 (2024): Considering that the Supreme Court has achieved very positive results in recent years (resolution rates ranging from 115% to 150%), the positive trend continued in 2024. Consequently, the number of unresolved cases has decreased. The incoming caseload in 2024 increased compared to 2023, as the inflow was reduced in 2023 due to the strike. Thus, in terms of incoming cases, the Supreme Court returned to the average levels observed over the past three years.

Q099 (2023): For several years, the Supreme Court has seen a decrease in the number of pending cases at the beginning and end of the year, as well as a decrease in the number of Pending cases older than 2 years from the date the case came to the Supreme Court.
Q099 (2017): Regarding the answers in this question, cases dealt with by the Supreme Court of the Republic of Croatia, as the highest instance court in the RoC, have been presented. We are unable to show separately the required categories. The Supreme Court of the RoC is in the process of preparing the implementation of the ICMS, which will in future enable the expression of cases by types. Source for this data is published data by the Supreme Court of the RoC for year 2017 on their website.
Q099 (2016): Due to a large influx of revision proceedings and a slower solving of cases in 2014 and 2015, at the beginning of 2016 the number of pending cases continues to increase. However in 2016 the Supreme Court of the Republic od Croatia significantly resolved more cases than in previous cycle and the number of pending cases had decreased compared with 2015 althought not when compared with 2014.
Q099 (2015): In the table 99. cases dealt by the Supreme Court of the Republic of Croatia, as the highest most instance court, have been presented. We are unable to show separately the required categories. The Supreme Court is in the process of preparing the implementation of the ICMS, which will in future enable the expression of cases by types.

Q099 (2014): After the new standardization of the audit, the Supreme Court has started to be less up-to-date since the number of received cases is far beyond the number of cases which the existing judges and advisors at the Supreme Court may solve. In resolving the cases at the Supreme Court, advantage is given to urgent cases (determined by laws) and to old cases.

Q100 (2024): Due to the Supreme Court's consistently high productivity, there was a notable reduction in the number of unresolved cases during 2023, which continued further into 2024.
Q100 (2022): The Supreme Court of the Republic of Croatia distinguishes only if the case is civil or criminal, but does not classify case types in specific categories beyond that classification. The main classification in the Case management system is based on the instance of the procedure in the sense that there are some instances when the Supreme Court acts as a second instance appelate court. When the criminal procedure is regarding a very serious criminal offense (charges for which the jail sentence is more than 10 years), the County courts act as a first instance court, and all appeals are decided upon by the Supreme Court as a second instance court. In that sense, the classification of cases of the Supreme Court in the Case management system distinguishes only those cases which are from the position of the second instance or from the position of the third instance court. Since the recently established High Criminal Court of the Republic of Croatia has overtaken the role of the appelate court for the County courts in aforementioned instances, the Supreme Court has retained only the competency of a third instance court in criminal cases, but the cases are still distinguished in the same classification as before.

Q100 (2021): There has been a decrease of incoming criminal law cases between 2020 and 2021 following the establishment of the High Criminal Court on 1st of January 2021, which took over part of the previous Supreme Court's jurisdiction.

Q100 (2018): The table shows cases under the jurisdiction of the Supreme Court of the epublic of Croatia, as the highest judicial authority in the Republic of Croatia.
Q100 (2016): The table shows cases under the jurisdiction of the Supreme Court of the Republic of Croatia, as the highest judicial authority in the Republic of Croatia. We are not able to present the data separately for "Severe criminal cases" and "Misdemeanour and/or minor criminal cases" due to the fact that the implementation of the Integrated Case Management System at the Supreme Court of the Republic of Croatia is underway. It will enable the track record of the cases by type.
The significant decrease of the number of pending cases at the beggining of 2016 in the Supreme Court is due to the fact that since beginning of 2014 this court continuously solves more cases than it receives and also because in 2015 there was a further reduction in inflow of cases.

Q100 (2014): For 2014, the table shows cases under the jurisdiction of the Supreme Court, as the highest judicial authority in the Republic of Croatia. Data on "severe criminal cases" and "misdemeanour and/or minor criminal cases" could not be presented separately due to the fact that the implementation of the Integrated Case Management System at the Supreme Court of the Republic of Croatia is underway. It will enable the track record of the cases by type.
When comparing 2012, 2013 and 2014 data, it can be noticed a trend of decrease of the total number of incoming criminal cases, which is a result of legislative amendments, suspension of extraordinary legal remedy (request for extraordinary mitigation of penalty), as well as the decrease of the number of cases in which the decision about an appeal to investigative imprisonment needs to be decided on.

Cyprus

Q091 (General Comment): The reason for not having data for the subcategories of cases is that there was no electronic filing system that would enable us to have statistical data on different types of cases.

Q091 (2024): 1. Total of other than criminal cases:
There was an increase of cases filled before the new civil procedures rules were entered into force in September 2023. Pre-action protocols, set by the new rules, essentially refer to several rules and procedures that need to be followed by the parties before any action in Court and encourage a sufficient negotiation between the parties in order to achieve an out of court settlement which reduced the number of cases filed. This has led to many insurance cases being settled.
A new law was enacted establishing an out-of-court, fast-track procedure for the sale (foreclosure) of mortgaged immovable property
3. Administrative cases: Incoming cases decrease: this was due to the rejection of asylum to economic immigrants. Every appeal that is filed is formally registered and proceeds to trial, the only preliminary checks that are conducted, concern administrative details such as the applicant's name/address and so on. The observed 22% decrease in incoming cases is likely linked to external factors, such as a reduction in the number of new asylum applications or a slower rate of decisions, made by the Cyprus Asylum Service, which directly affects the number of appeals submitted to the Court
Resolved cases decrease: the court now has to go into the subject matter of the case. Since 2023 the profile and nationality of filed cases have shifted significantly. The Court's backlog has transitioned from being primarily composed of applicants from South and Southeast Asia, to a predominance of cases from Sub-Saharan Africa. Previously decision making was comparatively faster, as many of the appeals from Asian applicants involved largely unfounded or purely financial claims. The newer composition however, tends to have more complex and substantive cases, as is evident by the increased rate in positive decisions, requiring a deeper examination. While this has led to longer processing times, the overall backlog has remained relatively stable, after an initial increase, owing to a concurrent reduction in the overall numbers of appeals filed.

Q091 (2023): The courts have jurisdiction to deal with non litigious cases, however we do not have data on the number of such cases
Q091 (2022): The total number of resolved cases has increased as there was an increase in the number of judges. Administrative law cases include the cases filled at the Administrative court of international protection.

Q091 (2021): In the administrative cases, the applications for international protection are included and there was an increase in these applications in 2021, as a result of more asylum seekers coming into Cyprus. From 1 January 2021, the Review authority for refugees was abolished.
Q091 (2020): In the previous cycle a big number of cases were tried together. This is the reason why number of resolved cases in 2020 might appear lower than in 2019.
Reducing delays in the disposition time is part of the reform process. The difference in the pending cases in administrative cases compared with previous year is that in this figure we included the cases filed before the Administrative court of international protection which was set up.

Q091 (2019): In the previous campaigns the number of cases filled and resolved was increased as a result of a big number of cases filed together (in one bundle) and tried together.
Q091 (2018): The increase in the number of resolved cases is a consequence of the cases tried together. For number of administrative cases, it should be taken into account that cases were consolidated and that 2724 consolidated cases were withdrawn.
Q091 (2017): The variation concerning incoming (total) and resolved (total and administrative) cases (decrease) is due to the fact that, in 2016, cases were filed and tried in a bundle but each was considered separately for statistical purposes. Put differently, cases were joined together and therefore there was an increase in the number of resolved cases. Accordingly, we can observe a decrease in the number of resolved cases between 2016 and 2017.

Q091 (2015): Variations: The increase in the number of pending cases between 2010 and 2015 is a result of the bail in Cyprus a lot of administrative cases had been filed against that decision.
The reason for the decrease in the number of resolved cases is that the bail in cases had been consolidated and was tried jointly after 31st of December 2014.

Q091 (2014): The increase in the number of pending cases is a result of the bail in Cyprus; a lot of administrative cases had been filed against that decision. The reason for the decrease in the number of resolved cases is that the bail in cases had been consolidated and was tried jointly after 31st of December 2014.

Q093 (General Comment): In Cyprus the number of cases presented in Q91 includes military court cases, rent tribunal cases, labour court cases and admiralty cases.
Q094 (General Comment): The reason for not having data for the subcategories of cases is that there was no electronic filing system that would enable us to have statistical data on different types of cases.
Q094 (2024): other criminal cases include cases before the military court.
Q094 (2018): There were fewer criminal cases in 2018.

Q094 (2014): As a result of the bail in, the total number of first instance criminal pending cases on 1 January 2014 increased with 27% between 2012 and 2014.
Q097 (General Comment): As of the 1st of July 2023 the Supreme Court and the Supreme Constitutional Court were re - established. Also an Appeal Court was also created. Appeals filed after 2018 were transferred to the Appeal Court. Civil and Criminal appeals filed between 2013-2017 remained at the Supreme Court whereas administrative appeals are brought before the Supreme Constitutional Court.
Q097 (2024): The reference date for the previous cycle was 1st of July 2023 when the Court of Appeal was established, which explains the variatons not necessarily reflecting a real surge in caseload or efficiency.
Q097 (2021): Increase in resolved cases: cases tried together.

Q097 (2020): Reducing delays in the disposition time is part of the reform process. In administrative cases in 2019 a big number of cases were tried together. The cases that had the same subject matter were filed individually but were consolidated and tried together but for statistical purposes they were calculated separately. This is the reason why number of resolved cases in 2020 might appear lower than in 2019. The difference in the pending cases in administrative cases compared with previous year is that in this figure we included the cases filed before the Administrative court of international protection which was set up.
The reason we do not have statistical data on subcategories of cases is that the electronic filing system was not introduced that would enable to have statistical data on such cases.

Q097 (2019): The Administrative law cases include the cases from the administrative court which was established in 2018.

Q097 (2017): appeals filed against decisions of the administrative courts which was established in 2016 should be included in the pending cases on 1.1.2017 as Other cases include family court appeals
Variation between 2016 and 2017 in administrative cases (incoming and resolved): this icludes appeals filed against decisions of the administrative court
Q097 (2016): The Supreme Court is the appeal court.

Q098 (General Comment): As of the 1st of July 2023 the Supreme Court and the Supreme Constitutional Court were re - established. Also an Appeal Court was also created. Appeals filed after 2018 were transferred to the Appeal Court. Civil and Criminal appeals filed between 2013-2017 remained at the Supreme Court whereas administrative appeals are brought before the Supreme Constitutional Court.
Q098 (2024): The reference date for the previous cycle was 1st of July 2023 when the Court of Appeal was established, which explains the variatons not necessarily reflecting a real surge in caseload or efficiency.
Q098 (2023): On July 2023 an Appeal Court was established and any appeals filed after 2018 are tried by the Appeal court whereas any cases filed between 2013 -2017 (backlog) are dealt by the Supreme Court. The Supreme court acts no as a third tier last instance court only for legal issues.
Q098 (2020): with regard to criminal appeals less were filed.

Q098 (2016): There was an increase in the cases pending between 2014 and 2016. With regard to the increase of number of cases resolved this was due to the creation of the administrative court and therefore the Supreme court did no longer had to deal with first instance administrative cases.
Q099 (General Comment): On 1st of July 2023 an Appeal Court was established therefore a third tier system was created. The re established Supreme Court and Supreme Constitutional Court are now the the highest Courts. It is possible for a non litigious case to be brought before the Supreme Court however this is very rare.
Following a reference from the Court of Appeal, the Supreme Court adjudicates on appeals against decisions of first instance civil and criminal courts, including courts of specialised jurisdiction, on points of utmost public interest or of general public importance or on the consistency of law on conflicting or contrasting decisions of the Court of Appeal.
With the leave of the Court, the Supreme Court decides, at third and last instance, on applications filed, by the Attorney-General or by a party, provided that civil or criminal appeal proceedings on points of law preceded in the court below.
The Supreme constitutional Court deals with references of the President of the Republic on the constitutionality of Law. It also hears cases involving constitutional issues and acts as a third and last tier in administrative matters.

Q099 (2024): Civil and commercial litigious cases: The variations could be explained by the following:
- New jurisdictions were exercised by the supreme courts
- More cases were tried - the reference date for the previous cycle was 1st of July when the SC and the SCC were established
Administrative cases: in April 2024 250 administrative cases and 10 cases on cases of administrative court of international protection were transferred to the Supreme Constitutional Court and they were considered as pending at the start of the year.

Q099 (2023): The numbers in the table represent the cases pending on the 1st of July.

Q099 (2018): Cyprus only has a two tier system. The Court of Appeal is also the Supreme Court, therefore the relevant data could be found in the section on second instance cases.

Q099 (2016): The supreme court is the appeal court

Q100 (General Comment): .

Q100 (2023): The supreme court has jurisdiction to hear criminal cases at a third level. There were no incoming or pending cases on the 1st of July 2023.
Q100 (2020): The Supreme Court is also the appeal court

Q100 (2018): Cyprus only has a two tier system. The Court of Appeal is also the Supreme Court, therefore the relevant data could be found in the section on second instance cases.
Q100 (2016): The supreme court is the appeal court

Czech Republic

Q091 (General Comment): For years 2010, 2012 and 2013, business register cases, administrative cases and insolvency registry cases which are decided by the regional courts (second instance courts) acting as first instance courts, were included in the table concerning the case-load of second instance courts (question 97). On the contrary, since 2014, administrative cases, business registry cases and insolvency cases (and also some litigious cases) which are still decided by the second instance courts acting as first instance courts, are subsumed within the table of question 91 (which was already the case for the 2008 exercise). Methodology has been changed in year 2015 – more case types have been included, which led to the big increment in the number of cases. There are no further changes expected.

Q091 (2024): There was a methodology change in 2023 and insolvency cases had been moved to category litigous cases. Also change was made for pending insolvency cases. It now only involves cases before the court decision about insolvency.
2.2. Registry cases (2.2.1+2.2.2+2.2.3) - Business registry cases are very quickly resolved and there is quite a variance between years. The number of cases is probably affected by many factors – new laws, economic situation and much more. This is also reflected in the number of pending cases.
2.3. Other non-litigious cases - All – It is relatively minor and “not very important” case type. The number of cases is quite small. It follows that there is big variance in the data between years.

Q091 (2023): There was a methodology change in 2023 and insolvency cases had been moved to category litigous cases. Also change was made for pending insolvency cases. It now only involves cases before the court decision about insolvency.
2.2. Registry cases and 2.2.2 Non-litigious business registry cases - Bussiness registry cases are very quickly resolved and there is quite a variance between years. The number of cases is probably affected by many factors – new laws, economic situation and much more.
2.3. Other non-litigious cases (pending cases on 31 Dec. ref. year) - it is relatively minor and “not very important” case type. The number of cases is quite small. It follows that there is big variance in the data between years.

Q091 (2022): Pending cases on 31 Dec. ref. year: In general, the number pending cases in Czech republic is decreasing, which can be seen in the table.
Administrative law cases: There is a significant and steady decrease in law administrative cases in last years. Thanks to the decreasing number of incoming cases and thanks to the increasing of the number of judges, the pending cases are rapidly decreasing.
Q091 (2021): Business registry cases are very quickly resolved and there is quite a variance between years. The number of cases is probably affected by many factors – new laws, economic situation and much more. This is also reflected in the number of pending cases.
2.3 Other non-litigious cases - It is relatively minor and “not very important” case type. The number of cases is quite small. It follows that there is big variance in the data between years.
Q091 (2020): The registry cases are very quickly resolved and the numbers can vary between years significantly. In 2019, courts managed to resolve more cases than was the number of incoming cases, which led to decrease in pending cases. The same explanation applies to “other non-litigious cases”. The number of cases is quite small. It follows that there is big variance in the data between years. Furthermore, during 2019 courts managed to resolve significantly more cases than in 2018, no special reasons were reported other than a fact that number of cases is relatively small and the cases are not complex. This also resulted in further redaction of the number of cases at the end of 2019. In 2020, the courts again managed to resolve more cases than was the numer of incoming cases for both registry cases and other non-litigious cases.
Bussiness registry cases are very quickly resolved and there is quite a variance between years. The number of cases is probably affected by many factors – new laws, economic situation and much more.
Other cases: The number of incoming cases has grown, probably due to changes in insolvency legislation.

Q091 (2019): The registry cases are very quickly resolved and the numbers can vary between years significantly. Last year, courts managed to resolve more cases than was the number of incoming cases, which led to decrease in pending cases at 1 January of the reference year. For Other non-litigious cases the same reasons apply for the number of cases at the beginning of the year. Furthermore, during 2019 courts managed to resolve significantly more cases than last year, no special reasons were reported other than a fact that number of cases is relatively small and the cases are not hard. This also resulted in further redaction of the number of cases at the end of the reference year. For incoming Other cases, there was a legislative change in insolvency law that is probably a reason for the significant grow in the number of incoming cases.

Q091 (2018): Methodology has been changed in 2.1 and 2. (civil and commercial non-litigious cases) in year 2015 – more case types have been included, which led to the big increment in the number of cases.
Q091 (2017): Methodology has been changed in 2.1 and 2. (civil and commercial non-litigious cases) in year 2015 – more case types have been included, which led to the big increment in the number of cases. Generally the number of incoming cases is decreasing, more use of ADR.
In the previous year the number of resolved cases greatly exceeded the number of incoming cases for other non-litigious cases, which led to huge drop in pending cases and discrepancy appeared.
Non-litigious business registry cases are very easy to resolve and the variance between years in the number of cases (incoming, resolved and pending) is quite big in general. Thus the annual change could easily be (and is) greater than 25 %.
Courts have problems with resolving administrative cases. It follows that number of incoming cases was last year much bigger than number of incoming cases. Thus number of pending cases increased greatly cases and discrepancy appeared.
As to Other cases, insolvency cases are reported. This is relatively new and very specific agenda, which usually takes 5 years to resolve. There was an increase in case fillings five years ago, which resulted in growth in the number of resolved cases nowadays. On the other hand, for various reasons (including legislative changes) the number of incoming cases is decreasing.

Q091 (2016): Methodology has been changed in 2.1 and 2. (civil and commercial non-litigious cases) in year 2015 – more case types have been included, which led to the big increment in the number of cases. Generally the number of incoming cases is decreasing, more use of ADR.
Q091 (2015): Methodology has been changed in 2.1 in year 2015 – more case types have been included, which led to the big increment in the number of cases.

Civil and commercial non-litigious cases include: 2.1 - uncontested payment orders, cases of the upbringing and maintenance of a minor, declaration of admissibility of taking or keeping of a person in a medical (health care) institution, declaration of the death of a person, inheritance proceedings, judicial deposit cases

Category "other includes: insolvency cases and incidence disputes

Q091 (2014): For 2014, business register cases, administrative cases, insolvency registry cases and also some litigious cases which are decided by the regional courts (second instance courts) acting as first instance courts are subsumed within the table of question 91.

For 2014 the category “other” encompasses insolvency cases.

In 2014, the high increase of insolvency cases is due to numerous cases of personal bankruptcies as well as to an unfavourable economic situation.

Q092 (2014): For all of the four exercises (2010, 2012, 2013 and 2014) the category of civil and commercial non-litigious cases encompasses cases of upbringing and maintenance of a minor. In 2014, it subsumes also declarations of admissibility of taking or keeping a person in a medical (health care) institution and declarations of death of persons.

Q093 (General Comment): For 2010 and 2012 the category “other” subsumes electronic payment orders and probate proceedings, while for 2013, it encompasses only electronic payment orders. By contrast, for 2014, its content covers insolvency cases. Since 2015 category "other cases" includes insolvency cases and incidence disputes.

Q094 (General Comment): We are not able distinguish between serious offences and minor offences. Thus only total number of cases is reported. There are no cases that could be reported in "Other cases".
Q094 (2018): We are not able distinguish between serious offences and minor offences. Thus only total number of cases is reported. There are no cases that could be reported in "Other cases"
Q094 (2014): Severe criminal cases are crimes in respect of which the law provides for a minimum term of imprisonment of 5 years. They are decided by regional courts acting in first instance. Minor criminal cases are tried by district courts in first instance, regional courts being the appellate courts in such matters.
Q097 (General Comment): It is noteworthy that the methodology of presentation of data has been changed since the 2014 exercise. Since 2014, administrative cases, business registry cases and insolvency cases (and also some litigious cases) which are still decided by the second instance courts acting as first instance courts, are subsumed within the table of question 91 (which was already the case for the 2008 exercise).

Q097 (2022): Other cases are insolvency and incidency cases.

Q097 (2020): In general, number of incoming cases is decreasing and it follows that the numbers of pending cases and resolved are decreasing as well (the situation is getting better). This may result in some big yearly changes and discrepancies.
Civil (and commercial) litigious cases: In general, number of incoming cases is decreasing (mostly because number of first instance cases is decreasing too) and it follows that the number of pending cases is decreasing as well (the situation is getting better). This may result in some big yearly changes and discrepancies.
Other cases: The variations are the result of changes in first instance agenda. This category includes insolvency cases and there were numerous legislative changes in last years. Also, it must be noted that the number of pending cases is relatively small, thus the variance is bigger.

Q097 (2019): In "Other cases" category, insolvency cases are reported.
In general, number of incoming cases is decreasing and it follows that the numbers of pending cases and resolved are decreasing as well (the situation is getting better). This may result in some big yearly changes and discrepancies.

Q097 (2018): In "Other cases" category, insolvency cases are reported.
In general, number of incoming cases is decreasing and it follows that the numbers of pending cases and resolved are decreasing as well (the situation is getting better). This may result in some big yearly changes and discrepancies.

Q097 (2017): In "Other cases" category, insolvency cases are reported. In this year the number of resolved insolvency cases greatly exceeded the number of incoming insolvency cases, which led to huge drop in pending cases at the end of the year and discrepancy appeared. The changes are connected to changes in first instance insolvency agenda.

Q097 (2016): Increase in the number of "other cases" in 2015 and 2016 is due to the change of methodology applied to these data.
Q097 (2015): Increases in the number of "other cases" are due to the change of methodology applied to the 2015 data.

Q097 (2014): In 2014, the high increase of insolvency cases is due to numerous cases of personal bankruptcies as well as to an unfavourable economic situation.
Q098 (General Comment): We are not able distinguish between serious offences and minor offences. Thus only total number of cases is reported. There are no cases that could be reported in "Other cases".
The data provided involves appeals and complaints (corrective measure against a resolution). Instead of "Pending cases older than 2 years from the date the case came to the second instance court" "Pending cases older than 1 year from the date the case came to the second instance court" are provided.
Q098 (2021): The number of pending cases older than 2 years is very low in second instance and thus it follows that there is a big variance in the data between years.
Q099 (General Comment): 4. Other cases: change in methodology in 2023 (to comply with the CEPEJ methodology), namely insolvency cases (and incidency cases) were moved to 1. Civil (and commercial) litigious cases.

Q099 (2023): 2. Non litigious cases (2.1+2.2+2.3) and 2.1. General civil (and commercial) non-litigious cases - the number of cases is relatively small. And small number of cases means higher variance and thus the discrepancies can easily appear.
4. Other cases - Change in methodolgy, namely insolvency cases (and incidency cases) were moved to 1. Civil (and commercial) litigious cases.

Q099 (2022): Administrative cases: The Supreme court is overburdened and has trouble resolving its cases thus the number of pending cases grow quite quickly. It is connected to growth in the number of administrative first-instance cases in previous years and growing tendency to file an appeal to the Supreme Administrative Court.
Other cases: Includes insolvency cases. The changes are the result of changes in second-instance agenda.

Q099 (2021): Other cases: This category includes appeals in last (third) instance of insolvency cases and incidence disputes.

Q099 (2020): Civil (and commercial) litigious cases: After several years of steady growth in the incoming cases, the incoming cases started to decrease in 2018. This is mainly due to legislative changes and drop in first and second-instance agenda in previous years. Thanks to this decrease the Supreme court was able to resolve part of its backlog and thus pending cases significantly decreased.
Civil (and commercial) non litigious cases: The variations should be put into perspective due to small absolute values.
Administrative cases: The Supreme court is overburdened and encounter difficulties to resolve its cases thus the number of pending cases grow quite quickly. It is connected to grow in number of administrative first-instance cases and growing tendency to fill an appeal to Supreme Administrative Court.
Other cases: This category includes appeals in last (third) instance of insolvency cases and incidence disputes. The changes are the result of changes in second-instance agenda. Also, it must be noted that the number of pending cases is relatively small, thus the variance is bigger.

Q099 (2019): Court was overburdened last year (there was much higher number of incoming cases than it managed to resolve), so there is a big increase in the number of pending Administrative cases.
Q099 (2018): The category “other” includes appeals in last (third) instance of insolvency cases and incidence disputes.

Q099 (2017): The category “other” includes appeals in last (third) instance of insolvency cases and incidence disputes. This whole agenda is relatively new (since 2008) and it takes quite a long time to resolve a case (several years). Since the agenda is new, it took several years before the number of first-instance incoming cases stopped growing and reach somehow stable level. Of course, the number of appeals (second instance) and incoming case second instance cases started to grow as well, but later. For simplicity, it can be said that Supreme Court deals with appeals in final (third instance). It follows that the number of final instance cases in this agenda also started to grow and again, later than the number of incoming cases in second instance. Thus the number of incoming cases in this agenda (insolvency cases and incidence disputes) is currently growing. The court seems to be struggling to deal with this growth in number of incoming cases, yet it is difficult to understand the reasons behind it, as the growth does not seem to be very high in absolute numbers.

Q099 (2016): In 2016 the administrative cases were added and for that reason all numbers show variation. Previously the number of administrative cases on this instance was NA.

Q100 (General Comment): We are not able distinguish between serious offences and minor offences. Thus only total number of cases is reported. There are no cases that could be reported in "Other cases"
Q100 (2020): Total of criminal cases: The variations should be put into perspective due to small absolute values.

Q100 (2018): We are not able distinguish between serious offences and minor offences. Thus only total number of cases is reported. There are no cases that could be reported in "Other cases"

Denmark

Q091 (General Comment): As concerns "non-litigious business registry cases", it is important to note that pending cases always may vary a lot as it is a residual figure when pending prior to the period, received and resolved cases are counted. Furthermore, the reason for the discrepancy is that we do not have pending figures from the Maritime and Commercial High Court. Administrative courts do not exist in Denmark, and administrative cases are initially dealt outside courts by court-like bodies, like appeal boards, committees, or councils. The number of “administrative law cases” which are litigious and go to courts is encompassed in the number of “civil and commercial litigious cases”.
With regard to "non litigious land registry cases", it should be pointed out that due to the high amount of incoming and resolved cases, the residual figure of pending cases prior and after the period may vary.
Administrative law cases:
1. What is included in “administrative law cases” and what is the distinguishment between litigious and non-litigious administrative law cases; and what are non-litigious administrative case in Denmark. It is challenging to provide a clear answer for Denmark. Due to the way data is collected within the Danish Court Administration, it is unfortunately not possible to distinguish between the specific types of cases included under administrative law cases. The courts indicate whether a case is of an administrative nature, however, administrative cases occur across almost all categories within civil cases. Consequently, it is difficult to state unequivocally which types of cases they most appropriately belong to. 2. The approximate number of administrative law cases that are litigious and go to court, and their part of the overall “civil litigious cases
In the period from 2023-2025 the number of civil cases in Denmark was 181.064, and out of those, 10.947 was of administrative nature. Furthermore, approximately 6 percent of all civil cases over the past three years have been classified as administrative law cases. Cases concerning forced removal often fall within the scope of administrative law, however, such cases represent only about 2 percent of the total civil caseload. The two other categories with a notable share of administrative law cases are “general civil cases” and cases under “the simplified procedure”. Both of these categories are quite extensive in terms of volume as well as broad in their classification, meaning that administrative law cases constitute only a relatively small proportion within them. 3. The composition of the bodies such as appeal boards and committees Denmark has a well-developed system of specialized complaints boards that serve as administrative appeal bodies for decisions made by public authorities. These boards, such as Ankestyrelsen and the Consumer Complaints Board, provide citizens with accessible and cost-effective avenues to challenge administrative decisions. Denmark has over 80 complaints boards and committees across various sectors. They generally consist of a chairperson – often a judge or legal expert – and a mix of legally trained members and specialists relevant to the board’s area. Membership terms are typically four years. The exact composition varies by board: for example, the Consumer Complaints Board includes a chair (judge), vice-chairs, and representatives of consumer and business interests, while the Patient Complaints Board combines judges and health professionals. Appointments are usually made by ministries or local authorities, often based on nominations from relevant organizations.

Q091 (2024): 2. Non litigious cases (2.1+2.2+2.3) + 2.1. General civil (and commercial) non-litigious cases (Pending cases on 31 Dec. ref. year): The lower number of registry cases is due to changes in the activity of mortgage bonds etc., which among other things depends on the number of housing transactions and restructuring of mortgage loans.
2.2.1. Non litigious land registry cases: we no longer register the pending cases for land registry as the system has been digitalized which means the processing time has decreased to an extent where it does not make sense to register.
4. Other cases: Notary services are increasing substantially with the advent of advance care directives in Denmark
Administrative law cases: changed from NAP to NA since Denmark does have administrative cases in courts, but they cannot be counted exactly.

Q091 (2023): The lower number of registry cases is due to changes in the activity of mortgage bonds etc., which among other things depends on the number of housing transactions and restructuring of mortgage loans.
Regarding 2.2.1 – we no longer register the pending cases for land registry as the system has been digitalized which means the processing time has decreased to an extent where it does not make sense to register.

Q091 (2022): The number of administrative litigious cases that go to courts in 2022 are estimated at 2600 which is 5,5% of the total number of incoming civil and commercial litigious cases in Denmark. They can not be easily separated from the other civil and commercial cases.
In 2022 there was still an aftermath of the unusual situation of the Covid-19 related to the periods with clos-ing down the society, including the courts. It has created more pending cases as the prosecution continued to forward new cases to the courts that could not deal with it. Land registration is the major source of in-coming cases with very large figures. It fluctuates a lot depending on interest rates, loan rescheduling etc.
2.1. General civil (and commercial) non-litigious cases: The courts have successfully reduced the number of pending cases.
As concerns "2.2.2. Non-litigious business registry cases", it is important that because of new regula-tions/laws, it is possible to start a new company with no prior capital. This causes many more companies and many more closures in some categories and also affect number of pending cases, like for non-litigious business registry cases.

Q091 (2020): 2020 was an unusual year because of the Covid-19 related close down of society, including close down of courts. It created more pending cases as the prosecution continued to forward new cases to the courts that could not deal with it. Land registration is the major source of incoming cases. It fluctuates a lot depending on interest rates, loan rescheduling etc.
2.1. General civil (and commercial) non-litigious cases: The courts have successfully reduced the number of pending cases. As concerns "2.2.2. Non-litigious business registry cases", it is important that because of new regulations/laws, it is possible to start a new company with no prior capital. This causes many more companies and many more closures in some categories and also affect number of pending cases, like for non-litigious business registry cases. The courts received many extra backlogged cased from the Danish Commerce and Companies Agency reenforced closure of companies that were still backlogged in the early 2020. The courts were closed for 3 weeks except for vital cases and government assistant to companies helped them and reduced bankruptcies and closures of companies that would normally have happened.

Q091 (2019): Variation in land registration (loans etc) as market and interest rates always vary from year to year.
For non-litigious business registry cases: Received markedly fewer enforced cases re enforced closure in 2019 than in 2018; Solved many extra insolvency cases in the beginning of year 2019 received in late autumn / winter 2018; pending cases on 31 December - It is important to understand the figure, that we succeeded to include pending cases from the Maritime and Commercial court.

Q091 (2018): As concerns "non-litigious business registry cases", it is important that because of new regulations/laws, it is possible to start a new company with no prior capital. This causes many more companies and many more closures in some categories and also affect number of pending cases, like for non-litigious business registry cases. Besides from that it is important to note that pending cases always may vary a lot as it is a residual figure when pending prior to the period, received and resolved cases are counted. Furthermore, the reason for the discrepancy is that we do not have pending figures from the Maritime and Commercial High Court. The number of “administrative law cases” which are litigious is encompassed in the number of “civil and commercial litigious cases”.
With regard to "non litigious land registry cases", it should be pointed out that due to the high amount of incoming and resolved cases, the residual figure of pending cases prior and after the period may vary.

Q091 (2017): The figures provided in respect of this question are not fully consistent. The Maritime and Commercial Court only measures incoming and resolved insolvency cases but not pending cases. Accordingly, when the data on processed/resolved cases from this court are included, there will always be a small inconsistency. Therefore, vertical and horizontal figures are not totally consistent.
Concerning the category "land registry cases", the number of pending cases on 1 January 2017 is a residual figure from received, finalized and pending cases ultimo the year; it may deviate from pending cases ultimo 2016, but it is a residual figure. The number of pending cases on 31 December 2017 is an actual figure. Concerning the category "registry cases", it is specified that the Maritime and Commercial Court does not publish pending cases which results in a discrepancy.

Q091 (2016): As concerns "non-litigious business registry cases", it is important that because of new regulations/laws, it is possible to start a new company with no prior capital. This causes many more companies and many more closures in some categories and also affect number of pending cases, like for non-litigious business registry cases. Besides from that it is important to note that pending cases always may vary a lot as it is a residual figure when pending prior to the period, received and resolved cases are counted. The number of “administrative law cases” which are litigious is encompassed in the number of “civil and commercial litigious cases”.
With regard to "non litigious land registry cases", it should be pointed out that due to the high amount of incoming and resolved cases, the residual figure of pending cases prior and after the period may vary.

Q091 (2014): Due to an improved business situation, courts at all levels receive fewer cases, i.e. civil cases, enforcement cases, forced sales, insolvency cases; pending cases are also reduced thereby. Non-litigious business registry cases follow the overall tendency.
Q092 (General Comment): Paternity, adoption, guardianship and others in the same category; cases under inquisitorial procedures.
Q093 (General Comment): Estate after a deceased person, notary, insolvency cases not included under 2.2.2. above.

Q094 (General Comment): Danish Court Administration has not worked out a statistics on pending cases older than 2 years. When we categorize cases as "severe", it does not mean that privation of liberty is the end result, but based on the category chosen by the court to deal with the case could include severe cases. Minor cases are typically fines that will never have as a result of privation of liberty. Probably there are too many cases under the category "severe" then, but that is the figures we have.

Q094 (2024): There is a general incongruence in data due to faulty 2023 data, where second instance cases were mistakenly included.
Pending cases on 31 Dec. ref. year (Total, 1 and 2) +1. Severe criminal cases (incoming):The substantial difference between incoming and resolved cases is partly due to the prosecution services being short-staffed and accruing case piles over the course of 2024, and partly due to the courts undertaking special efforts to reduce case piles.
The decrease in incoming severe criminal cases in 2024 can be attributed to the police and prosecution services having accrued a substantial case load surplus. They are not currently staffed to be attend court dates to the degree that is needed, and so a bottleneck effect has caused the number of cases being submitted to the courts to plummet. A three-year agreement to grant funding to the police and prosecution services is currently (as of fall 2025) in negotiations at state-level, after which the number of cases is expected to rise to previous levels.
Another, lesser factor of the drop in case numbers is the change to Danish procedural law implemented in 2024, where the threshold for whenever a case demanded lay judges was increased. The Danish Court Administration define severe criminal cases by whether lay judges are assigned or not. Fewer cases with lay judges equal fewer severe criminal cases in our data model.

Q094 (2023): The higher number of cases in 2023 is due to the comparison of 2021, where there was lower activity due to COVID-19. Compared with data from 2022 the pending cases from 1/1/2023 appears higher. This is mainly due to late registration, where more pending cases can appear in the current extraction compared to when the CEPEJ data from 2022 was extracted. It's also partly due to a new method of calculation with more accurate data than previously. The number of pending cases from 1/1/2023 is the same as the number of pending cases from 31/12/2022 in our database. The Danish Courts are currently in the process of transitioning to a new registration system for criminal case types and certain non-litigious case types, so a period of adjustment was to be expected

Q094 (2022): In 2022 the courts are still dealing with a high number of pending cases in the aftermath of the situation with covid-19.
Q094 (2021): 2020 was an unusual year because of the Covid-19 pandemic, related close down of society, including close down of courts. It created more pending cases as the prosecution continued to forward new cases to the courts that could not deal with it.
Q094 (2020): 2020 was an unusual year because of the Covid-19 related close down of society, including close down of courts. It created more pending cases as the prosecution continued to forward new cases to the courts that could not deal with it.
Q094 (2018): Our statistics on criminal cases does not have data on pending cases older than 2 years. We can not differentiate pending cases according to age. When we categorize cases as "severe", it does not mean that privation of liberty is the end result, but based on the category chosen by the court to deal with the case could include severe cases. Minor cases are typically fines that will never have as a result of privation of liberty. Probably there are too many cases under the category "severe" then, but that is the figures we have.
Q094 (2016): Our statistics on criminal cases does not have data on pending cases older than 2 years. We can not differentiate pending cases according to age.
The reason pending cases per 31 December 2016 has decreased is that the courts have resolved more cases than incoming cases.
Q094 (2014): For the period 2010-2014, district courts have been able to resolve more cases than the number of incoming cases, especially concerning minor criminal cases (traffic offences etc.) which have been given a higher priority. In 2012, district courts received more minor criminal cases due to a new procedure according to which the police sent cases where citizens haven’t paid their fines to courts. This was changed again in the end of 2012 where warnings were sent out first and the number of minor cases dropped therefore markedly in 2013. In 2014 the number of received minor criminal cases has gone up again following a decision of the police to step up on issuing fines for traffic offences. Besides, city courts resolved more cases through the plea guilty procedure.

Q097 (General Comment): It is noteworthy that all appellate cases are considered as “litigious cases” which explains the reply NAP for all the other categories, as well as the fact that the total coincides with the number of civil and commercial litigious cases. The number of “administrative law cases” which are litigious is encompassed in the number of “civil and commercial litigious cases”.
Another important remark concerns cases that are not first instance cases before the two High Courts and which are included in question 97. Cases that begin as first instance at one of the two High Courts are not included in the figures in table 97.
Administrative law cases: 1. What is included in “administrative law cases” and what is the distinguishment between litigious and non-litigious administrative law cases; and what are non-litigious administrative case in Denmark. It is challenging to provide a clear answer for Denmark. Due to the way data is collected within the Danish Court Administration, it is unfortunately not possible to distinguish between the specific types of cases included under administrative law cases. The courts indicate whether a case is of an administrative nature, however, administrative cases occur across almost all categories within civil cases. Consequently, it is difficult to state unequivocally which types of cases they most appropriately belong to. 2. The approximate number of administrative law cases that are litigious and go to court, and their part of the overall “civil litigious cases
In the period from 2023-2025 the number of civil cases in Denmark was 181.064, and out of those, 10.947 was of administrative nature. Furthermore, approximately 6 percent of all civil cases over the past three years have been classified as administrative law cases. Cases concerning forced removal often fall within the scope of administrative law, however, such cases represent only about 2 percent of the total civil caseload. The two other categories with a notable share of administrative law cases are “general civil cases” and cases under “the simplified procedure”. Both of these categories are quite extensive in terms of volume as well as broad in their classification, meaning that administrative law cases constitute only a relatively small proportion within them. 3. The composition of the bodies such as appeal boards and committees Denmark has a well-developed system of specialized complaints boards that serve as administrative appeal bodies for decisions made by public authorities. These boards, such as Ankestyrelsen and the Consumer Complaints Board, provide citizens with accessible and cost-effective avenues to challenge administrative decisions. Denmark has over 80 complaints boards and committees across various sectors. They generally consist of a chairperson – often a judge or legal expert – and a mix of legally trained members and specialists relevant to the board’s area. Membership terms are typically four years. The exact composition varies by board: for example, the Consumer Complaints Board includes a chair (judge), vice-chairs, and representatives of consumer and business interests, while the Patient Complaints Board combines judges and health professionals. Appointments are usually made by ministries or local authorities, often based on nominations from relevant organizations.

Q097 (2024): Administrative law cases: changed from NAP to NA since Denmark does have administrative cases in courts, but they cannot be counted exactly.
Q097 (2016): Pending cases may vary a lot depending on the ratio of resolved cases compared to incoming cases. We can observe a decrease of about 30 % of pending cases ultimo the 2016. This is due to this "residual" nature of pending cases. The decrease in the pending cases between 2014 and 2016 is because in both calendar years 2015 and 2016 the number of resolved cases exceed the number of incoming cases.
Q097 (2014): In the ambit of the 2014 exercise, it has been emphasized that due to an improved business situation, courts on all levels receive fewer cases, i.e. civil cases, enforcement cases, forced sales, insolvency cases. Generally speaking, pending cases are also reduced thereby.
Q098 (General Comment): All criminal cases at 2nd instance are considered severe as they would otherwise not become 2nd instance criminal cases. We can not differentiate pending cases depending on their age. There might be cases though that would not fulfil the criteria of a severe case. About one third of the cases may be smaller or bigger issues from the cases in the district courts that are appealed to one of the two High Courts before proceeding at the district courts and then finally settled in the district court. It is not possible to see if it's an issue from a severe case in the district or a case that is not severe. Then the whole case may afterward be appealed to one of the two High Courts when the district courts have come to a final judgment. The lower number of cases in 2023 is due to a large increase in case processing time for the second instance courts. The increase contrasts with the first instance courts as well as the highest instance courts where the case processing time has also increased, but to a much lesser extent.

Q098 (2024): All criminal cases at the second instance courts are considered severe.

Q098 (2023): All criminal cases at the second instance courts are considered severe.
The lower number of cases is due to a large increase in case processing time for the second instance courts. The increase contrasts with the first instance courts as well as the highest instance courts where the case processing time has also increased, but to a much lesser extent.
Q098 (2022): All criminal cases at 2nd instance are considered severe as they would otherwise not become 2nd instance criminal cases. Due to periods of lock downs because of the situation with covid-19, the courts have still a lot of pending cases.

Q098 (2020): 2020 was an unusual year because of the Covid-19 related close down of society, including close down of courts. It created more pending cases as the prosecution continued to forward new cases to the courts that could not deal with it.
Q098 (2016): All criminal cases at 2nd instance are considered severe as they would otherwise not become 2nd instance criminal cases. We can not differentiate pending cases after how old they are.
Q099 (General Comment): The number of incoming cases corresponds only to the number of admissible cases (excluding cases declared inadmissible which number is not available)
Administrative law cases: 1. What is included in “administrative law cases” and what is the distinguishment between litigious and non-litigious administrative law cases; and what are non-litigious administrative case in Denmark. It is challenging to provide a clear answer for Denmark. Due to the way data is collected within the Danish Court Administration, it is unfortunately not possible to distinguish between the specific types of cases included under administrative law cases. The courts indicate whether a case is of an administrative nature, however, administrative cases occur across almost all categories within civil cases. Consequently, it is difficult to state unequivocally which types of cases they most appropriately belong to. 2. The approximate number of administrative law cases that are litigious and go to court, and their part of the overall “civil litigious cases
In the period from 2023-2025 the number of civil cases in Denmark was 181.064, and out of those, 10.947 was of administrative nature. Furthermore, approximately 6 percent of all civil cases over the past three years have been classified as administrative law cases. Cases concerning forced removal often fall within the scope of administrative law, however, such cases represent only about 2 percent of the total civil caseload. The two other categories with a notable share of administrative law cases are “general civil cases” and cases under “the simplified procedure”. Both of these categories are quite extensive in terms of volume as well as broad in their classification, meaning that administrative law cases constitute only a relatively small proportion within them. 3. The composition of the bodies such as appeal boards and committees Denmark has a well-developed system of specialized complaints boards that serve as administrative appeal bodies for decisions made by public authorities. These boards, such as Ankestyrelsen and the Consumer Complaints Board, provide citizens with accessible and cost-effective avenues to challenge administrative decisions. Denmark has over 80 complaints boards and committees across various sectors. They generally consist of a chairperson – often a judge or legal expert – and a mix of legally trained members and specialists relevant to the board’s area. Membership terms are typically four years. The exact composition varies by board: for example, the Consumer Complaints Board includes a chair (judge), vice-chairs, and representatives of consumer and business interests, while the Patient Complaints Board combines judges and health professionals. Appointments are usually made by ministries or local authorities, often based on nominations from relevant organizations.

Q099 (2024): The nature of Supreme Court cases means that case flow numbers may vary drastically year to year.
Total of other than criminal law cases (1+2+3+4) + 1. Civil (and commercial) litigious cases: Faulty reporting on 2023 data. The 2023 was updated on 24/11/2025 by the CEPEJ Secretariate.
Supreme Court has experienced a substantial rise in civil appeals the last few years
Administrative law cases: changed from NAP to NA since Denmark does have administrative cases in courts, but they cannot be counted exactly.

Q099 (2023): The higher number of cases in 2023 is due to the comparison of 2021, where there was lower activity due to COVID-19. Furthermore, we have filtered a certain type of case from the data. The original number of 615 was due to the right for civilians to file a case online, which one citizen has done close to 400 times in 2023. The court is obliged to count and consider every case, however this has affected the data in a misleading way regarding incoming cases. The current figures are from the official statistics from 2023, where the misleading cases are also filtered out for a more fair picture of the number of actual cases in 2023.
The number of cases can be found in our key data from 2023 on our website www.domstol.dk
Q099 (2021): There is no special reason explaining the increase in the number of incoming cases. It should be recalled that 2020 was a special year because of the lockdown. The Supreme court depends on the two High Courts to receive cases and they send a few more cases to the Supreme court in a year without lockdown compared with 2020.

Q099 (2019): resolved and incoming cases have not markedly changed. So it is pending cases that varies. But pending cases are residual numbers and will typically vary from year to year.
Q099 (2018): In the Danish context, non-litigious cases do not make sense. Pending cases may vary as it is residual in nature and is depending on the number of incoming and resolved cases and the ratio between those two.
it is also important, when we talk discrepancy, that there is a year between previous and present year (2016 - 2018). 2017 is missing, so data - in particular pending cases - may vary.

Q099 (2017): Pending cases primo and ultimo 2017 for the Supreme Court is found based on pending cases ultimo 2016, received cases in 2017 and resolved cases in 2017. Put differently, pending cases are now generated based on pending ultimo 2016 and cases in 2017.

Q099 (2016): In the Danish context, non-litigious cases do not make sense. Pending cases may vary as it is residual in nature and is depending on the number of incoming and resolved cases and the ratio between those two.

Q099 (2015): The number of incoming cases ("other than criminal cases") dropped between 2010 and 2015. Since the instance reform in 2007, the Supreme Court is now almost only a third instance court (instead of being partly a second instance court and partly a third instance court). Indeed, first instance pending cases at the two High Courts in 2007 have gradually already been appealed or finalised.
Q099 (2014): In the frame of the 2014 exercise, the attention was drawn on the fact that the number of incoming and resolved cases before the Supreme Court was still falling, since the reform of 1st January 2007. Before 2007, many cases started in one of the two High Courts and could be appealed directly to the Supreme Court as second instance. Since 2007, almost all cases start at the lowest level and consequently, much fewer cases are appealed to the Supreme Court. This effect of still fewer cases appealed to the Supreme Court following the reform could still be seen from 2012 to 2014.

Q100 (General Comment): The higher number of cases in 2023 is due to the comparison of 2021, where there was lower activity due to COVID-19.
Q100 (2024): All criminal cases at the highest instance court are considered severe. The nature of Supreme Court cases means that case flow numbers may vary drastically year to year.
Q100 (2023): The higher number of cases in 2023 is due to the comparison of 2021, where there was lower activity due to COVID-19.
Q100 (2018): Data are from the yearly report 2018 from the Supreme Court,
http://www.hoejesteret.dk/hoejesteret/embedsregnskab/Documents/Årsberetning2018.pdf

Q100 (2016): Based on the data the Danish Court Administration got, it is not possible to show pending criminal cases.

Q100 (2014): For 2014, the number of pending criminal cases was not available.
The number of received criminal cases has fallen all the years since 2010, except from 2014 where it went up with 7 cases and the same number of criminal cases were received as in 2012. It is worth mentioning that the Danish Court Administration differentiates between cases that are fully appealed and cases in respect of which a specific point is appealed (i.e. should the person being charged stay in custody while the case is on-going). The number of cases fully appealed has varied between 27 and 14 over the period 2010-2012-2013-2014 (in 2013 and 2014 there were 14 received cases). Completed “full cases” have varied between 32 and 12 cases (in 2014 there were 12 completed criminal cases). The rest of the cases were related to specific questions.
Therefore, and due to the instance reform as well, the Supreme Court has over the years dealt with fewer and fewer cases.

Estonia

Q091 (General Comment): Some horizontal inconsistencies and inconsistencies with previous year are due to the fact that data are always taken from the live database.
Q091 (2024): The workload of judges handling civil cases has increased.

Q091 (2023): no comment provided

Q091 (2022): No comment could be provided on the variations in the caseflow between 2020 and 2022.

Q091 (2021): The increased number of administrative law cases pending at the end of 2021 is due to COVID-19 related cases that have taken more time to be solved.
Concerning general civil and commercial non litigious cases, it should be mentioned that during the second Covid-19 year, courts processed cases that they were not able to process during the first Covid-19 year.
Q091 (2020): MoJ
In 2020, there have been difficulties with filling the vacancies of judge positions in the biggest county court (judges going on maternity leave or retirement), which may have resulted in an increase in pending cases older than 2 years in general.

Q091 (2019): Some horizontal inconsistencies and inconsistencies with previous year are due to the fact that data are always taken from the live database.
Q091 (2018): The variations in total and in the non litigious cases are due to the number of entrepreneurs that has grown every year, so the number of incoming case is also increasing. Furthermore, the number of real estate transactions has increased and the market is active.The number pending cases end of 2017 is different because the numbers are taken later and the data has been corrected.

Q091 (2017): There are not any particular reasons to explain variations in the number of non-litigious business registry cases, causing variations in respect of the category "registry cases" and "non-litigious cases". As regards item 2.1 “general civil and commercial non-litigious cases”, there is an important discrepancy between the number of pending cases on 31 December 2016 and the number of pending cases on 1 January 2017. The reason is related to the time the numbers have been taken out of the system (see general comment). The fifth column “pending cases older than 2 years”, includes cases that are suspended (part 9 of our Code of Civil Procedure, https://www.riigiteataja.ee/en/eli/506022018001/consolide). The proceedings may be suspended for example if the one of the parties dies or fells seriously ill; or if in order to solve the dispute the court needs a resolution of an another case.

Q091 (2016): The decrease in the number of incoming administrative court cases is due to the decrease in the number of inmate complaints. The variations in total and in the non litigious cases are due to increase of incoming business and land registry cases.
Q091 (2014): The increase in the number of incoming administrative law cases is due to a rise of complaints of prisoners.
As to the decrease in the total of pending other than criminal law cases on 1 January 2014, the performance indicators of courts have justified supplementary budget resources. Agreements between the Ministry of Justice and courts are expected concerning the efforts that need to be undertaken in court to clear the backlog and accelerate proceedings. For 2014, non-litigious enforcement cases are included in the category “general civil (and commercial) non-litigious cases”.

Q094 (General Comment): Some horizontal inconsistencies and inconsistencies with previous year are due to the fact that data are always taken from the live database.
Q094 (2020): Other criminal cases: for example different enforcement and pretrial cases. The pandemic has affected the courts activity in criminal matters in general. The criminal procedure law was not as flexible when judges had to work online. The complete revision of the criminal procedure law is ongoing and will come into force next year.

Q094 (2018): Increase of incoming misdemeanor and minor criminal cases.

Q094 (2016): Misdemeanour cases can be joined and solved together in court. Cases that can lead to deprivation of liberty of less to five years are still included under severe criminal cases.
Because the distinction between severe and minor criminal cases is not the same with the CEPEJ, data for subcategories can be found below : Severe criminal cases : Pending cases on 1 Jan. ref. year : 803
Incoming cases : 7628
Resolved cases : 7463
Pending cases on 31 Dec. ref. year: 824
Pending cases older than 2 years from the date the case came to the first instance court : 23
Misdemeanour and / or minor criminal cases :
Pending cases on 1 Jan. ref. year : 1835
Incoming cases : 10032
Resolved cases : 10628
Pending cases on 31 Dec. ref. year: 891
Pending cases older than 2 years from the date the case came to the first instance court : 3

Q094 (2014): The variations observed over the years 2010, 2012 and 2014 are most likely due to the fact that the Ministry of Justice and the biggest court in Estonia (Harju County court) had an agreement setting the target for eliminating backlogs.

Q097 (General Comment): Some horizontal inconsistencies and inconsistencies with previous year are due to the fact that data are always taken from the live database.
Q097 (2024): Overall workload has risen, but output has fallen.

Q097 (2022): "Administrative law cases": there are problems that have been dealt with but no results can be observed yet. Above all there were many vacancies in civil departments and that has had an effect in administrative too.

Q097 (2021): In 2021, a general increase in the case load of circuit courts is observed.

Q097 (2019): Some horizontal inconsistencies and inconsistencies with previous year are due to the fact that data are always taken from the live database.
Q097 (2015): In respect of the civil and commercial non-litigious cases, the increase from 2013 in the number of pending cases resulted from the implementation of an efficiency-raising project in 2013 in Harju County Court. Accordingly, the efficiency of the latter increased significantly in civil cases. Owing to the fact that this court is the largest 1st instance court dealing with 1/3 of all of the cases in Estonia, it had an impact on the case-flow of the second instance courts (only 2 appeal courts competent in civil, criminal and administrative matters).
As to the administrative cases, it is noteworthy that as there are only 2 appeal courts in Estonia competent in civil, criminal and administrative matters, every change in the number of 2nd instance judges influences the statistics of the Courts of appeal. Between 2010 and 2012 there were a few vacant administrative judges’ positions in one of the appeal courts which had an impact on the number of pending cases

Q097 (2014): On the occasion of the 2014 exercise, it has been emphasized that there has been an ongoing reform concerning the court budgets and judicial performance indicators. Agreements have to be adopted on the occasion of the budget negotiations between the Ministry of Justice and the courts concerning the efforts that need to be undertaken in court to clear the backlog and accelerate proceedings.
As to the increase of the total of pending other than criminal cases (beginning and end of the year), the reason is that 1st instance courts started the project of clearing backlogs and accelerating proceeding earlier. As a result, the number of incoming cases in 2nd instance courts increased in 2013 and resulted also in an increase of the number of pending cases by the end of the year 2013.
For 2014, non-litigious enforcement cases are included in the category “general civil (and commercial) non-litigious cases”.

Q098 (General Comment): Some horizontal inconsistencies and inconsistencies with previous year are due to the fact that data are always taken from the live database. Other criminal cases: The enforcement and pretrial cases do not exist in the second instance.
Q098 (2024): The number of criminal cases has increased

Q098 (2023): Other cases are matters of preliminary proceedings and enforcement proceedings.

Q098 (2022): In recent years, there has been a (wide-ranging) generational change among judges in Estonia, which has led to a temporary drop in performance. especially in the district courts.
Q098 (2020): The pandemic has affected the courts activity in criminal matters in general. The criminal procedure law was not as flexible when judges had to work online. The complete revision of the criminal procedure law is ongoing and will come into force next year.
Q098 (2016): Discrepancies are due to the numbers being quite small. Number of incoming cases depends on the crimes being committed and the number of resolved cases depends on.
Because the distinction between severe and minor criminal cases is not the same with the CEPEJ, data for subcategories can be found below :
Severe criminal cases : Pending cases on 1 Jan. ref. year : 71
Incoming cases : 745
Resolved cases : 762
Pending cases on 31 Dec. ref. year: 54
Pending cases older than 2 years from the date the case came to the first instance court : 0
Misdemeanour and / or minor criminal cases :
Pending cases on 1 Jan. ref. year : 9
Incoming cases : 208
Resolved cases : 214
Pending cases on 31 Dec. ref. year: 3
Pending cases older than 2 years from the date the case came to the first instance court : 0

Q098 (2014): The variations observed over the years 2010, 2012 and 2014 are most likely due to the fact that the Ministry of Justice and the biggest court in Estonia (Harju County court) had an agreement setting the target for eliminating backlogs.

Q099 (General Comment): It is noteworthy that the discrepancies that can be observed between the number of pending cases indicated for December of one year and the number of pending cases communicated for January of the next year, are due to the fact that the statistic system is alive and courts are entitled to modify and up-date data at any time.
Moreover, differences in the horizontal consistency may be explained by the fact that during the proceedings some cases are joined and some are disjoined.

Q099 (2024): Total of other than criminal law cases (1+2+3+4) Pending cases on 1 Jan. ref. year - The query was made at a different time, which explains the smaller number.
3. Administrative law cases - Overall increase in workload
Q099 (2016): The number of pending cases has increased because the number of cases where the Supreme Court has decided to open proceedings in the Supreme Court has increased.
Q100 (General Comment): The Supreme Court is the court of cassation, therefore only those cases are heard which have been given leave to appeal (i.e. that have been declared admissible for proceedings in the Supreme Court). The data presented shows the number of cases which have been actually heard by the Supreme Court and not the number of appeals. The Supreme Court is not required to give reasons in its ruling on the admissibility of the appeals.

Q100 (2024): Total of criminal law cases (1+2+3) and 1. Severe criminal cases Pending cases on 31 Dec. ref. year - Overall increase in workload
Q100 (2023): The Supreme court data only includes severe criminal cases.

Q100 (2021): The Supreme Court did not provide a specific explanation with regard to the decrease in the number of resolved criminal cases, but if we look the overall reasons, they are Covid-19 related.

Q100 (2020): The pandemic has affected the courts activity in criminal matters in general. The criminal procedure law was not as flexible when judges had to work online. the complete revision of the criminal procedure law is ongoing and will come into force next year.
Q100 (2016): Numbers are quite small. No special reason for discrepancies. Because the distinction between severe and minor criminal cases is not the same with the CEPEJ, data for subcategories can be found below :
Severe criminal cases : Pending cases on 1 Jan. ref. year : 18
Incoming cases : 82
Resolved cases : 73
Pending cases on 31 Dec. ref. year: 27
Pending cases older than 2 years from the date the case came to the first instance court : NA
Misdemeanour and / or minor criminal cases :
Pending cases on 1 Jan. ref. year : 6
Incoming cases : 26
Resolved cases : 29
Pending cases on 31 Dec. ref. year: 3
Pending cases older than 2 years from the date the case came to the first instance court : NA

Q100 (2014): The variations observed in 2014 are not of importance, since the numbers are small.

Finland

Q091 (General Comment): The pending cases older than two years are not collected in Finland. The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced number of cases in 1 Jan will differ.

Q091 (2024): These explanations apply to questions 91, 97 ja 99 together. There may be several reasons for the increase of the case amounts. Firstly, in the last round, the reports had been taken on the 31 of December and now they have been taken in August. There can be significant changes in a half a year. At this stage, it is no longer possible to provide the data from 31 of December. Secondly, there has been an increase on the first instance case amounts. One explanation is the growth of summary civil cases.

Q091 (2021): Comments The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on 12.1.2022 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously announced number of cases on 31 December and the now announced number of cases in 1 Jan will differ. The number mentioned in category 3 includes cases dealt by the administrative courts, the Market Court and the Insurance Court.

Q091 (2020): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on 12.1.2021 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced number of cases in 1 Jan will differ. Currently the calculation is further complicated by the partial implementation of the new cases managements systems, AIPA (for general courts) and HAIPA (for administrative and special courts). The number mentioned in category 3 includes cases dealt by the administrative courts, the Market Court and the Insurance Court.

Q091 (2019): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on 22.1.2020 and reflects the situation on that day. The data available is:
1)Incoming cases 2)Resolved cases
3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced number of cases in 1 Jan will differ. Currently the calculation is further complicated by the partial implementation of the new cases managements systems, AIPA (for general courts) and HAIPA (for administrative and special courts). The number mentioned in category 3 includes cases dealt by the administrative courts, the Market Court and the Insurance
Court.
The number of administrative cases increased dramatically in 2016 due to the asylum crisis. Accordingly, more judges were hired to deal with cases and make the procedure more effective. The limits in which cases have to be handled have also been shortened in order to reduce the number of pending cases. To tackle this crisis, a legislative reform decentralized the asylum cases from one administrative court (Helsinki) to three other administrative courts as well.
As to “civil and commercial litigious cases”, we can notice a very high Clearance Rate for 2016 due to the fact that in 2016 the number
of incoming civil cases decreased and courts were able to deal with pending cases. Accordingly, the number of pending cases decreased between 2016 and 2019.
“General civil and commercial non-litigious cases”: the number of pending cases at the end of 2019 increased slightly between 2018 and 2019. In this respect, it should be noticed that the partial switch to the new case management system AIPA (as for example divorce cases are already processed in this system) can be the explanation as some initial challenges in the reporting tool has been noted recently.

Q091 (2018): The number mentioned in category 3 includes cases dealt by the administrative courts, the Market Court and the Insurance Court.
The number of administrative cases increased dramatically in 2016 due to the asylum crisis. Accordingly, more judges were hired to deal with cases and make the procedure more effective. The limits in which cases have to be handled have also been shortened in order to reduce the number of pending cases. To tackle this crisis, a legislative reform decentralized the asylum cases from one administrative court (Helsinki) to three other administrative courts as well.
As to “civil and commercial litigious cases”, we can notice a very high Clearance Rate for 2016 due to the fact that in 2016 the number of incoming civil cases decreased and courts were able to deal with pending cases. Accordingly, the number of pending cases decreased between 2016 and 2018.

Q091 (2017): 1. Civil (and commercial) litigious cases: in 2016 the number of incoming civil cases decreased and courts were able to deal with pending cases; accordingly, the number of pending civil litigious cases at the beginning of 2017 has decreased. 2.2.1 From the beginning of the year 2010 Land register cases were transferred to National Land Survey of Finland.
3. Administrative law cases: On appeal, the administrative court reviews the legality of the decision of the authority. The number mentioned in category 3 includes cases dealt with by Administrative Courts, Market Court and Insurance Court.
It is worth mentioning that in 2016 the number of administrative cases increased dramatically due to the asylum crisis. As a result, the number of pending administrative cases at the beginning of 2017 increased considerably. Against this background, Finland had adopted different measures to face the asylum crisis (e.g. decentralisation of the competence in respect of asylum cases from one administrative court (Helsinki) to three other administrative courts). Accordingly, the number of incoming administrative cases for 2017 decreased (28%).

Q091 (2016): In 2016 the number of incoming civil cases decreased and courts were able to deal with pending cases. The number of administrative cases increased dramatically due to the asylum crisis. Accordingly, more judges were hired to deal with cases and make the procedure more effective. The limits in which cases have to be handled have also been shortened in order to reduce the number of pending cases. To tackle this crisis, a legislative reform decentralized the asylum cases from one administrative court (Helsinki) to three other administrative courts as well. For that reason, statistics show variations as concerns the number of pending administrative law cases in 2016. The number of pending administrative law cases on 1.1.2016 was 20 4775, but due to the decentralization around 5000 cases were transferred from Helsinki to these other courts. In the statistics, these cases do not appear as pending anymore. It is not possible to say how many of them have been resolved, but they are included in the number of resolved administrative law cases.

Q091 (2014): Non-litigious enforcement cases are subsumed in the category “general civil (and commercial) non-litigious cases”. The enforcement is of the competence of the enforcement authorities, not of this of courts. Cases mentioned here are appeals in execution proceedings before district courts.

Q092 (General Comment): The number includes cases dealt in the summary proceedings, divorce cases and petitions. Summary civil cases are undisputed civil cases that are decided by a district court in summary procedure, in other words in the written procedure. Such cases include undisputed debt collection cases, such as cases concerning unpaid rents, consumer credits and phone and electricity bills, as well as undisputed cases concerning evictions, restoration of possession or a disrupted circumstance. Summary proceedings can be initiated at a district court with an application for a summons that contains less information than what is required for other civil proceedings. The prerequisite for using the less detailed application for a summons is that the plaintiff, i.e. the creditor, has stated that to his or her knowledge the matter is not under dispute.
Enforcement cases: The enforcement authorities have the competence to decide on enforcement cases, not the courts. Cases mentioned here are appeals of enforcement measures to the district courts.
Requests for a change of name are handled in the Digital and Population Data Services Agency, not in the courts.

Q093 (General Comment): The land courts deal with disputes and appeals arising from surveying operations. The most common case types are the divisions, parcellings and encumbrances referred to in the Surveying Act, as well as the procedures under the Expropriation Act and the Private Roads Act. The procedure is very similar to the civil procedure in a district court. Land court cases are dealt with by the District Courts of South Savo, East Uusimaa, Kanta-Häme, Lapland, Oulu, Ostrobothnia, North Savo, and Southwest Finland. The land court, which acts as a separate department of the district court, has a district judge specialising in these matters as chairperson and a land court engineer and two lay members in the main proceedings. The decisions of a land court can be appealed against to the Supreme Court.
All matters concerning insolvency are classified as matters of petition, which means that they require court involvement. These matters are therefore not categorised as civil cases, i.e. dispositive matters between the parties. But, these matters can of course turn out to be litigious in the sense that there are conflicting opinions about the outcome, and the court must decide upon these after a more or less regular trial proceeding. Not all cases become litigious and the court may rule on insolvency/bankruptcy when the legal merits are met. In Finland we tend to define these as two-or-more-party disputes that may be concluded in agreement of the parties (dispositive) and the court is bound by the agreement. The indispositive cases are characterised by the “official principle” which means that only the court can decide the outcome after proceedings are initiated. The indispositive cases also tend to have different rules regarding the costs of the trial than regular civil cases. As a special court, the task of the labour court is to process and resolve disputes concerning collective agreements, as well as disputes based on the laws on collective agreements and collective agreements, defined in more detail in the law on proceedings in the labour court. Most of the time, the question is about the correct content or interpretation of the said agreements, or violations of agreements or labour and collective agreement laws and the resulting sanctions. In addition, the labour court, as an appellate court, resolves appeals against the decisions of the board for confirmation of the general bindingness of the collective agreement and appeals against the decisions issued by the labour council in certain exemption cases. The Labor Court is the only competent court in the above-mentioned matters. Its judgments cannot be appealed but are final and immediately enforceable. Note: The labour court therefore does not deal with all labor law disputes. Disputes arising from the employment contract between the employer and the employee are dealt with in the relevant district court, the decision of which, under certain conditions, has the right of appeal to the Court of Appeal and the Supreme Court.

Q094 (General Comment): The cases are not statistically catecorised in severe criminal cases and misdemeanour and / or minor cases in Finland.
The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on january 2023 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced number of cases in 1 Jan will differ.

Q094 (2024): The growth of cases is linked to a large so-called Vastaamo criminal case which has an exceptionally large group of plaintiffs.
Q094 (2023): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced number of cases in 1 Jan will differ.

Q094 (2021): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on 20.1.2022 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously announced number of cases on 31 December and the now announced number of cases in 1 Jan will differ. This year we have included military court cases and co-er-cive mea-sures which were previously not included in this number.

Q094 (2020): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly
changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on
12.1.2021 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced
number of cases in 1 Jan will differ. Currently the calculation is further complicated by the partial implementation of the new cases
managements systems, AIPA (for general courts) and HAIPA (for administrative and special courts).

Q094 (2018): There is no particular explanation regarding the decreased clearance rate of criminal cases.

Q097 (General Comment): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced number of cases in 1 Jan will differ.

Q097 (2024): See comment to Q91.
The trend of a growth of summary civil cases that is seen already at the first instance courts also reaches the second instance courts.

Q097 (2022): In previous years, military court cases of the second instance have been erroneously registered under Other civil cases, so in this statistical year, the before mentioned cases have been registered as criminal cases. Similarly, this question has previously included cases that have come in for consideration in the second instance courts as first instance cases. Since the first instance cases previously had their own procedure, from which it was not easy to determine whether the case concerned criminal or civil case, they were therefore registered in the group "Other cases". In this statistical year, it has been possible to find out whether they belong to criminal or civil cases and thus have been taken into account to the statistics according to the breakdown. In addition, "Other cases" have included cases related to releasing a prisoner serving a life sentence, which are also no longer counted in this group, because these are processed as separate applications and are not civil or criminal matters.

Q097 (2021): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on 20.1.2022 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously announced number of cases on 31 December and the now announced number of cases in 1 Jan will differ. Other cases are: Cases dealt in Court of Appeal as first instance, military court cases, and cases related to releasing a prisoner serving a life sentence [pitkäaikaisvankien vapauttamismenettelyasiat].

Q097 (2020): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly
changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on
12.1.2021 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced
number of cases in 1 Jan will differ. Currently the calculation is further complicated by the partial implementation of the new cases
managements systems, AIPA (for general courts) and HAIPA (for administrative and special courts).

Q097 (2019): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on 22.1.2020 and reflects the situation on that day. The data available is:
1)Incoming cases 2)Resolved cases
3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced number of cases in 1 Jan will differ. Currently the calculation is further complicated by the partial implementation of the new cases managements systems, AIPA (for general courts).

Q097 (2018): In 2017, the number of incoming cases has decreased for example due to some procedural changes and the courts have been
able to resolve more pending cases. Accordingly, the number of pending cases at the beginning of 2018 has decreased.

Q097 (2017): In 2016, the number of incoming cases has decreased (for example due to some procedural changes) and the courts have been able to resolve more pending cases. Accordingly, the number of pending cases at the beginning of 2017 has decreased.
Q097 (2016): The number of incoming cases has decreased (for example due to some procedural changes) and the courts have been able to resolve more pending cases.
Q098 (General Comment): The cases are not statistically catecorised in severe criminal cases and misdemeanour and / or minor cases in Finland.
Q098 (2021): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on 20.1.2022 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously announced number of cases on 31 December and the now announced number of cases in 1 Jan will differ.

Q098 (2020): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly
changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on
12.1.2021 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available
data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced
number of cases in 1 Jan will differ. Currently the calculation is further complicated by the partial implementation of the new cases
managements systems, AIPA (for general courts) and HAIPA (for administrative and special courts).

Q099 (General Comment): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced number of cases in 1 Jan will differ.

Q099 (2024): Other cases include information on insurance matters, land rights matters, application matters, and pardon matters.
The Supreme Court received a smaller amount of cases but still solved a similar amount of cases which lead to the decrease of pending cases.
Q099 (2022): Administrative law cases: In the Supreme Administrative Court, there has been exceptionally high number of cases concerning international protection since 2017 and now as the number of incoming cases of this case category has decreased, the numbers have settled. This also corresponds to the decrease in the number of resolved cases, because the synergistic benefits of large number of cases with common features have decreased and the extra personnel resources reserved for clearing the backlog have been given up. Other factors that could have influenced the development are the increased court fees starting from 2016, as well as the change in the role of the Supreme Administrative Court in 2020, when the leave to appeal system became the main rule in appeals (previously it was an exception that was widely applied to different groups of cases from the possibility of direct appeal).

Q099 (2021): The number of incoming administrative cases has been on the decline for the last years.
Variations observed in respect of "civil and commercial litigious cases" are due to yearly fluctuations.

Q099 (2020): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly
changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on
12.1.2021 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously announced number of cases on 31 December and the now announced
number of cases in 1 Jan will differ.

Q099 (2019): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on 22.1.2020 and reflects the situation on that day. The data available is:
1)Incoming cases 2)Resolved cases
3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously annouced number of cases on 31 December and the now announced number of cases in 1 Jan will differ. Currently the calculation is further complicated by the partial implementation of the new cases managements systems, AIPA (for general courts) and HAIPA (for administrative and special courts).

Q099 (2018): The total of incoming other than criminal cases decreased slightly in 2018 compared to 2017. The number of administrative law cases decreased slighty in 2018 but is still high. The general increase is mostly a consequence of the asylum crisis and the fact that cases from the administrative courts have reached the highest instance in 2017 and 2018.

Q099 (2017): The total of incoming other than criminal cases increased for the period 2016-2017. This increase is mostly due to the increase in the number of administrative law cases as a consequence of the asylum crisis and the fact that cases from the administrative courts have reached the highest instance in 2017 (which was not the case in 2016).

Q099 (2016): Courts were able to resolve more cases because the number of incoming cases decreased. The Supreme Administrative court got more resourses and personnel due to the asylum crisis, but cases from the administrative courts have still not reached the highest instance.
Q099 (2014): In respect of the variations observed between 2012 and 2014 data, it is noteworthy that the statistics system has changed. Data is not received any more from the Central Statistical Office of Finland. Instead, the Ministry of Justice receives information directly from processing systems. This method of compilation of statistics does not quite support answering the question, as the information is run periodically and not daily. As a result, some discrepancies occur. As the system does not provide the numbers for 1 January 2014, it is necessary to calculate them separately from the correct data obtained on a later date.
Q100 (2021): Variations observed in respect of criminal cases are due to yearly fluctuations.
Q100 (2020): The case management systems from which the data is collected are not static reporting tool but a dynamic and constantly
changing system. So the exact number depends on the day the data is taken from the system. Part of the data here is collected on
12.1.2021 and reflects the situation on that day. The data available is: 1)Incoming cases 2)Resolved cases 3)Cases pending on the data collection date. The number of pending cases as of 1 January has been calculated based on the available data. Because of the dynamic nature of the system, the previously announced number of cases on 31 December and the now announced
number of cases in 1 Jan will differ.

France

Q091 (General Comment): Non-litigious cases relating to the commercial register are handled by the registry of the Commercial Court. These registries are charges and their activities do not fall within the remit of the Ministry of Justice.

Q091 (2024): Civil justice: following a change in methodology for calculating the case stock, the number of pending cases as of January 1, 2024 differs from the number of pending cases as of December 31, 2023 (provided in the 2024 questionnaire, based on an estimate). The data provided last year was based on estimates. We now have, from an annual survey, the total stock of the first instance court. We then categorised this stock (litigious cases, non-litigious cases, and other cases), based on the distribution observed for resolved cases.
The data provided this year is based on input from the courts' software, which allows us to categorise these cases accurately according to their different types.
However, this change in methodology results in a significant downward revision of the "other cases" stock and a significant upward revision of the "civil litigious cases" stock (the assumption we had based our estimate on was incorrect).
Following the 2021 divorce reform, and to avoid a break in the series, an estimate is used for 2024 (for litigious civil cases and non-litigious civil cases) based on 2019 data.
Due to the lack of data reporting, the stock of "civil and commercial litigious cases" at the beginning and end of the year does not include cases related to political electoral disputes. These cases represent 0.2% of the resolved cases in 2024.
Due to the lack of data reporting, the stock of "non-litigious civil cases" at the beginning and end of the year does not include prior attempts at conciliation. These cases represent 0.1% of the resolved cases in 2024.
Due to the lack of data reporting, the stock of "other cases" at the beginning and end of the year does not include cases (excluding consumer law) before the local court and wage garnishments. These cases represent 2.1% of the resolved cases in 2024 (respectively 0.4% and 1.7%).
For administrative courts:
Since 2024, cases from the National asylum court (Cour nationale du droit d'asile) are included in the number of first-instance administrative cases. The raw data for the CNDA is as follows:
•Pending cases on 1 Jan. = 26 132
•Incoming cases = 56 497
•Resolved cases = 61 593
•Pending cases on 31 Dec. = 22 194
•Pending cases for more than 2 years = 199
The 2024 data do not include those from the Paid parking court (Tribunal du stationnement payant). For your information, the raw data for these cases is:
•Pending cases on 1 Jan. = 224,637
•Incoming cases = 202 111
•Resolved cases = 146 267
•Pending cases on 31 Dec. = 281 392
•Pending cases for more than 2 years = 165 469
The data regarding pending cases before the Paid parking court excludes cases categorized as "automatic withdrawal of action". If, after the deadline given to the claimant to regularise their application, no regularisation occurs, the case is not processed and is rejected without a decision (inadmissibility due to incomplete documentation).

Q091 (2023): Source(s) for SSER data: exploitation of the General Civil Register, of the survey related to Administrative Activities and Statement 4 of the former "tribunaux d'instance", and the survey Annual Civilian Indicators.
Note: Following the 2021 divorce reform, and in order to avoid a break in series, an estimate is used for 2023 (civil litigious cases and civil non-litigious cases);
Due to the lack of data reporting, the stocks of "civil and commercial litigious cases" at the beginning and end of the year do not include cases relating to political electoral disputes. In 2023, these cases represent 0% of resolved cases;
Due to the lack of data reporting, the stocks of "civil non-litigious cases" at the beginning and end of the year do not include prior attempts at conciliation. In 2023, these cases represent 0.1% of resolved cases;
Due to the lack of data reporting, the stocks of "other cases" at the beginning and end of the year do not include applications (out of the scope of the Consumer Code) before the local court and seizures of earnings. In 2023, these cases represent 2.2% of resolved cases (0.4% and 1.8% respectively);
Due to the use of different sources to calculate pending, incoming and resolved cases, and the lack of data reporting explained above, the number of pending cases at the end of the year does not correspond to the result of (pending cases at the beginning of the year + incoming cases) – resolved cases (horizontal consistency).
The stock of non-litigious cases as of 1 January 2023 has been revised compared to the stock as of 31 December 2022 (provided in the previous evaluation cycle).
Civil litigious cases: general litigious cases before ordinary courts, local courts and courts for rural leases, family cases, cases relating to sales, agricultural work accidents, proceedings relating to companies in difficulty (safeguard, receivership and judicial liquidation) before the "tribunal judiciaire" and the commercial court, cases of "juges aux orders", the liberty and detention judge (detention of foreigners and compulsory hospitalization) and the social division of the "tribunal judiciaire", ordinary procedures before the labour tribunal, litigious cases before the commercial court, cases relating to the protection of adults, cases relating to political electoral disputes.

Q091 (2022): Source: Ministry of Justice/SG/SEM/SDSE, General Civil Registry; Council of State.
Following a change in methodology, the "civil (and commercial) litigious cases" now include: general litigation cases before the judicial tribunal, local court and "tribunaux paritaires des beaux ruraux", family matters, sales-related cases, agricultural work accidents cases, proceedings related to companies in difficulty (safeguarding, reorganization and judicial liquidation) before the judicial tribunal and commercial court , judge's orders matters, liberty and detention judge matters (detention of foreigners and involuntary hospitalization), as well as social division proceedings before the judicial tribunal; ordinary procedures before the labor courts; litigious cases before commercial courts; protection of adults' cases as well as political electoral disputes.

Following the 2021 divorce reform in order to avoid any disruption in series continuity, an estimate is used for 2022 (civil litigious and non-litigious cases).

Due to lack of data, the number of pending cases at the beginning and the end of 2022 related to political electoral disputes is not included in the number of pending civil litigious cases. These represent 0.6% of the resolved case-load in 2022. The same applies to attempts at conciliation. These represent 0.6%of completed case load in 2022. Due to the lack of data, the number of pending "other cases" at the beginning and end of the refernce year do not include applications (excluding the Consumer Code) before the local court and seizures on remuneration. In 2022, these cases accounted for 8.3% of resolved cases (1.7% and 6.6% respectively). The lack of data on pending cases for the enumerated case types explains the lack of horizontal consistency in the table.

Q091 (2021): Source SDSE
Source Council of State
Q091 (2020): Comments on volumes.
Completed cases are down more than new cases, both civil/2019 and felonies/2018 (contravention are surprisingly up / 2018). The health crisis and containment may have played on TAs (completed cases) (reducing the ability of courts to process cases) but also on NAs (new cases) (fewer misdemeanors committed, fewer cases brought to court). Prior to this, a major lawyers' strike and a transport strike had mainly affected the TAs.
Commentary provided by the highest adminsitrative Court concerning the administrative order: the measures derogating from the ordinary law of contentious administrative procedure adopted to respond to the situation arising from the health crisis caused by the Covid-19 epidemic were provided for by order no. 2020-305 of March 25, 2020, then by order no. 2020-1402 of November 18, 2020, and decree no. 2020-1406 of the same day. I - Concerning the rules relating to the organization or holding of hearings 1°) Use of audiovisual or any other means of electronic communication
The two orders of March 25 and November 18, 2020 provided for the possibility of using an audiovisual means of telecommunication for the holding of hearings or any other means of electronic communication.
When this device was used, it was used, in almost all the jurisdictions that had recourse to it, for less than 10% of the cases judged in collegiality during the same period.
The most common configuration used was that in which one or more members of the panel were at a distance and the president, the other members of the panel, and the parties and their counsel were in the courtroom (approximately 75% of the courts that used videoconferencing chose this configuration and 53% of them used it for less than 10% of the cases tried by the panel). Very few courts have used video-conferencing with remote parties. The reasons for which the courts have used video-conferencing are linked to the constraints linked to the health crisis, in particular the difficulties encountered by lawyers to travel, especially in overseas territories, and the isolation imposed on certain people (judges or lawyers) declared to be in contact or recognized as fragile.
As regards single judges, the courts have made a very measured application of the provisions allowing the use of an audiovisual means of telecommunication, since only 6 administrative courts out of 35 have indicated that they have used it. The administrative courts indicated that they had used videoconferencing, as a single judge, for the processing of emergency proceedings in matters concerning foreigners, particularly in cases where the foreigner was in administrative detention. Finally, 15 administrative courts indicated that they held summary proceedings by videoconference. For almost all of these courts, the summary proceedings judge was in the courtroom and the parties were at a distance, and less than 10% of summary proceedings cases were judged in this configuration. Travel difficulties were the main reasons why the courts of first instance held summary proceedings by videoconference. The texts applicable during the state of health emergency allowed the use of any means of electronic communication, other than videoconferencing, in case of impossibility to use it. Only a few TAs used this procedure and for less than 10% of the cases in the courts that used it.
Generally speaking, the courts have made a very measured application of the provisions of the orders allowing hearings to be held by videoconference and this use was justified by the constraints and difficulties linked to the hea

lth crisis. 2°) The provisions allowing to limit the number of persons attending the hearing were applied by a large number of courts and in a frequent manner. On the other hand, the provisions allowing the president of the court to decide that the hearing will be held without the presence of the public have been used very little. 3°) The dispensation of the public rapporteur's conclusions has been used very little by the courts. This dispensation was applied because of the vulnerable state of the public rapporteur or to limit the length of the hearings (in these cases the dispensation was granted for cases that did not present any difficulty).
4°) The orders of March and November 2020 allowed the interim relief judge to rule without a hearing, in addition to the cases provided for in article L. 522-3 of the Code of Administrative Justice.
Many courts have indicated that they have dispensed with a hearing. The dispensation of a hearing was most frequently applied in the case of summary proceedings for suspension. In the case of interim relief, this dispensation was applied in a more measured way.
Finally, summary proceedings other than suspension and liberty have been exempted from a hearing in many jurisdictions.
5°) The possibility for the administrative courts of appeal to rule by order without a hearing on applications for a stay of execution was little applied, since only 3 CAA indicated that they had applied it.
6°) In matters of DALO-Injunction, the possibility of ruling by order was used by 12 courts and, for almost all of these courts, for more than 60% of the cases judged during the same period.
II - The courts made very little use of the derogation provisions relating to the composition of the trial panels. In fact, no court made use of the possibility of completing a panel of judges with the participation of an honorary magistrate from another court. Only one administrative court requested the participation of a judge from another court (one judge came to assist for a period of three months).
III - The provisions allowing heads of court to appoint advisers to rule by order under the conditions set out in article R. 222-13 of the CJA were hardly used: only two administrative courts applied them. One head of court had appointed one or more advisers but no order was made by this magistrate or these magistrates. Another head of court indicated that the designated magistrate(s) signed more than 200 orders. In total, it appears that the measures provided for have been used very differently depending on the measure taken into account. Video hearings and the new rules for summary proceedings have opened up possibilities, with provisions that can be seen as having been the medium for experimentation. "

Q091 (2019): Administrative law cases pending for more than 2 years: in contrast with previous cycle, 2019 data are expressed in net figures, excluding serial cases presenting the same legal issue for trial.
Q091 (2018): With regard to the reduction of the number of non-contentious cases, this corresponds both to the impossibility of including data relating to adults under protection in 2018, due to a technical problem, and to the abolition of the approval of over-indebtedness plans by the judge of the Court of First Instance, the proceedings before which are processed by the Over-indebtedness Commission, as from 1 January 2018. Act No. 2016-1547 of 18 November 2016 on the modernization of 21st century justice, known as the "Justice 21 Act" and the Act of 9 December 2016, abolished judicial approval of the measures recommended by the over-indebtedness commission. As a reminder, divorces by mutual consent no longer fall within the competence of the family court.
Q091 (2016): The important increase in the number of pending non-litigious cases is due to the increased number of requests for ending unions - 60% (especially in 2016) and the increased number of pending cases before execution judges within the TGI in respect of a third party (without significant increase in the number of incoming cases, but a regular increase, namely for the last two years in the number of cases under consideration).

Q091 (2014): In civil litigation, cases relating to the activity of the liberty and custody judge amount to 98 300 cases in 2014 and have increased by 6.8% compared to 2013. These cases have significantly increased in 2012 (+ 65.5%), due to the law No. 2011-803 of July 2011 on the rights and protection of persons under psychiatric care. The reform systematised the control of psychiatric hospitalisations without the consent of the liberty and custody judge.

Q092 (General Comment): Other non-litigious civil cases include the following: divorce by mutual consent, legal separation, change of matrimonial regime, applications relating to parental authority, adoption, medically assisted procreation, incapacity of a minor, inheritance, compensation for violation of privacy, change of name, civil status, nationality, the operation of a group and the discipline of notaries and ministerial officers.
Q092 (2014): In 2014, the category civil cases (and commercial) non-litigious are also included in non-litigious cases relating to enforcement.
Q094 (2024): Source(s): SSER, frame-survey of prosecution services and Cassiopée statistical file (serious offenses: crimes and felonies); Minos statistical file (minor offenses = infractions, excluding the catgeory C5).
Q094 (2023): Source(s): SSER, survey of public prosecutors and Cassiopée statistical file (serious offences: crimes and offences); Cassiopée statistical file (minor offences = fines, with the exception of 5th class offences).
In order to be able to distinguish, as requested, the cases that have gone through the investigation (arrived and completed), the volumes indicated in the category "Other criminal cases" are already contained in the 2 previous categories. The total is therefore not equal to the sum of the 3 volumes but to the sum of lines 1 and 2.

Q094 (2022): Source: Ministry of Justice/SG/SEM/SDSE, Cassiopeia statistical file.

With regard to "pending cases", it is not possible to provide this information as the data on the pending cases before police courts ('Minor Offences') are not available.

Furthermore, the line 'Total number' does not correspond to 1+2+3 but rather to 1+2. Indeed, in accordance with the request from CEPEJ, cases falling under the Investigating Judge have been classified under '3. Other Criminal Cases'. These are provided for indicative purposes only and should not be added to the other two categories so as to avoid duplication (which may fall within either minor or major offences depending on how each case proceeds).

Q094 (2021): source SDSE

Q094 (2020):
"Comments on volumes.
Closed cases are down more than incoming cases cases, both civil/2019 and felonies/2018 (contravention are surprisingly up / 2018).
The health crisis and containment may have played on TAs (completed cases) (reducing the ability of courts to process cases) but also on NAs (new cases) (fewer misdemeanors committed, fewer cases brought to court). Prior to this, a major lawyers' strike and transportation strike had mostly affected TAs.

Q097 (General Comment): Civil litigious cases: general litigation cases before the Court of appeal and civil cases from the special minors' chamber (educational assistance).
Special minors' chamber: these are educational assistance cases, handled in the first instance by the juvenile court judge and on appeal by the special minors' chamber. Although this chamber predominantly deals with criminal cases, these are indeed civil cases.
Civil non-litigious cases: non-litigious cases before the courts of appeal, such as divorces and separations by mutual consent, approvals of agreements to change the matrimonial regime, civil status matters (declaratory judgments, corrections and annulments of civil status records, and changes to gender records), adoption requests (both simple and full), and succession matters (vacant or unclaimed successions, sealing of assets, and disputes regarding the sealing process), as well as cases concerning the incapacity of minors (opening of guardianship, appeals against decisions of guardianship bodies, emancipation, authorization of an act or appointment of an ad hoc administrator in legal administration, control of an act in high-risk situations), preventive procedures for companies in difficulty (conciliation procedures and ad hoc mandate), preliminary conciliation attempts before the civil court and the local court, and procedures for amicable settlements in agricultural matters, SCI, and associations.
Other cases: Summary proceedings, requests, and special procedures before the Court of appeal, and the civil party in expropriation cases.
Summary proceedings (référé): these are emergency procedures that allow the judge, while respecting the principle of adversarial proceedings, to issue temporary but swift measures aimed at preserving the applicant’s rights (urgent measures without dispute, conservatory or restoration measures even if contested, pre-litigation expertise, or an uncontested provision payment).
The summary procedure takes place before the trial and does not provide a final resolution of the dispute; the defendant is summoned, and the decision rendered is only provisional.
Requests: this refers to a method of initiating legal proceedings, used for disputes where the claim amount does not exceed €5,000 or for disputes specified by law (e.g., guardianship cases, etc.).
Special procedure: these are specific procedures before the Court of appeal, mainly involving appeals on decisions related to the detention of foreigners and involuntary hospitalisation (86% of decisions in 2024), disputes regarding the amount and collection of lawyer's fees (8%), and claims for compensation due to provisional detention (2%).

Q097 (2023): Source(s) SSER: exploitation of the General Civil Directory
Civil litigious cases: general litigation cases before the Court of Appeal and civil cases of the Special Chamber for Minors (educational assistance).
Special Chamber for Minors: these are cases of educational assistance, dealt with in the first instance by the juvenile judge and on appeal by the Special Chamber for Minors. Although the majority of cases within the competence of this chamber are criminal cases, educational assistance cases are civil cases.
Civil non-litigious cases: non-litigious cases before the courts of appeal, i.e., divorces and legal separations by mutual consent, homologation of agreements for the change of matrimonial regime, cases relating to civil status (declaratory judgment, rectification and annulment of a civil status certificate and modification of the designation of sex), adoption applications (simple and plenary) and inheritance (vacant or unclaimed succession, sealing and contestation of seals) as well as cases of incapacity of a minor (opening of a guardianship, appeal against a decision of a guardianship body, emancipation, authorisation of an act or appointment of an ad hoc administrator in the context of a legal administration, control of an act in high-risk situations), preventive procedures for companies in difficulty (conciliation procedure and ad hoc mandate), prior attempts at conciliation before the first instance court and the local court and amicable settlement procedures in agricultural, SCI and association matters.
Other cases: summary proceedings, petitions, special proceedings before the Court of Appeal and civil parties to expropriations.
Interim measures (“référé”): these are emergency procedures allowing the judge, in respect of the adversarial debate, to order provisional but rapid measures aimed at preserving the rights of the plaintiff (urgent measure without dispute, precautionary or restoration measure even if disputed, expert opinion before litigation on the merits, payment of a provisional payment that is not seriously contestable). The summary proceedings take place before any trial on the merits and do not definitively settle the dispute, the defendant is summoned, and the decision rendered is only provisional in nature;
Applications (“requêtes”): this is a method of referral to the courts, which can be used for disputes for which the amount of the request does not exceed €5000 or for disputes specified by law (e.g. guardianship, etc.);
Special procedures: These are special procedures before the Court of Appeal, mainly appeals against decisions of the liberty and detention judge in matters of detention of foreigners and forced hospitalization (85% of decisions in 2023), disputes concerning the amount and recovery of lawyers' fees (8%) and claims for compensation for pre-trial detention (2%).

Q097 (2022): Sources: Ministry of Justice/SG/SEM/SDSE, General Civil Directory; Council of State.

Following a change in methodology, "litigious civil (and commercial) cases" now include: general litigation cases before the court of appeal and civil cases from the special chamber for minors (educational assistance).

As a result of a change in methodology, "non-litigious civil cases" correspond to non-litigious matters before the courts of appeal, namely: divorces and separations by mutual consent, approvals of agreements regarding changes in matrimonial regimes, matters relating to civil status (declaratory judgment, rectification and annulment of an act related to civil status, and modification of gender designation), adoption requests (simple and full), successions (vacant or unclaimed succession, affixing seals and contestation related to seals), as well as matters concerning minor's incapacity (initiation of guardianship proceedings, appeals against decisions made by guardianship authorities, emancipation, authorization for an act or appointment of an ad hoc administrator within the framework of legal administration, control over an act under risky circumstances), preventive procedures for companies facing difficulties, (conciliation procedure and ad hoc mandate), preliminary conciliation attempts before judicial tribunals and local courts, amicable settlement procedures in agricultural matters, non-trading property company and associations.

Following a change in methodology,"other cases" now encompass: interim measures ("référés"), petitions and specific procedures before the court of appeal as well as claims arising from expropriation. Below is a description of these types of proceedings: 1) Interim Measures ("Référés"): These are procedural steps that allow judges to order swift provisional measures aimed at preserving the rights of applicants (urgent measures without dispute; conservatory or restorative measure even if contested). Although these decisions are rendered without confrontation between parties they nonetheless pertain to disputes involving plaintiffs vs defendants. 2) Special Chamber for Minors: this involves educational assistance cases handled initially by juvenile judges with appeals being heard by this specialized chamber. While predominantly dealing with criminal cases this pertains specifically to civil issues. 3) Specific Procedures: these involve particular procedures before the court of appeal primarily consisting of challenges against rulings made by the "jujes des libertés et de la détention" on detention orders pertaining to foreigners' retention and forced hospitalization (83% -2022); disputes regarding lawyers’ fees amount and recovery (9%) ; petitions seeking compensation due to pretrial detention (2%). The lack of horizontal consistency in the table stems from missing data reports for certain specific categories of cases (see comment of Q91).

Q097 (2021): Source Council of State and SDSE
Administrative law cases: regarding the ageing of the stock, the output of the Administrative Courts of Appeal (CAA) fell sharply in 2020 (-10%) because of the COVID-19. When the situation returned to normal, the CAAs gave priority to foreigners' litigation, which accounts for almost 50% of their entries, and the stock therefore aged mechanically.

Q097 (2020): "The health crisis and containment may have played on TAs (completed cases) (by reducing the ability of courts to process cases) but also on NAs (new cases) (fewer offenses committed, fewer cases brought to trial). Prior to this, a major lawyers' strike and a transport strike had mainly affected the TAs.
Commentary provided by the highest administrative Court : As a reminder, the measures derogating from the ordinary law of contentious administrative procedure adopted to respond to the situation arising from the health crisis caused by the Covid-19 epidemic were provided for by Ordinance no. 2020-305 of March 25, 2020, and then by Ordinance no. 2020-1402 of November 18, 2020, and Decree no. 2020-1406 of the same day. I - Concerning the rules relating to the organization or holding of hearings 1°) Use of audiovisual or any other means of electronic communication
The two orders of March 25 and November 18, 2020 provided for the possibility of using an audiovisual means of telecommunication for the holding of hearings or any other means of electronic communication.
When this device was used, it was used, in almost all the jurisdictions that had recourse to it, for less than 10% of the cases judged in collegiality during the same period.
The most common configuration used was that in which one or more members of the panel were at a distance and the president, the other members of the panel, and the parties and their counsel were in the courtroom (approximately 75% of the courts that used videoconferencing chose this configuration, and 53% of them used it for less than 10% of the cases heard by the panel). Very few courts have used video-conferencing with remote parties. The reasons for which the courts have used video-conferencing are linked to the constraints linked to the health crisis, in particular the difficulties encountered by lawyers to travel, especially in overseas territories, and the isolation imposed on certain people (judges or lawyers) declared to be in contact or recognized as fragile.
In the case of single-judge hearings, the courts have made a very measured application of the provisions allowing the use of an audiovisual means of telecommunication, since only 6 administrative courts out of 35 have indicated that they have used it. The administrative courts indicated that they had used videoconferencing, as a single judge, for the processing of emergency proceedings in matters concerning foreigners, particularly in cases where the foreigner was in administrative detention. Finally, 15 administrative courts indicated that they held summary proceedings by videoconference. For almost all of these courts, the summary proceedings judge was in the courtroom and the parties were at a distance, and less than 10% of summary proceedings cases were judged in this configuration. The texts applicable during the state of health emergency allowed the use of any means of electronic communication, other than videoconferencing, in case of impossibility to use it. Only a few TAs used this procedure and for less than 10% of the cases in the courts that used it.
Generally speaking, the courts have made a very measured application of the provisions of the orders allowing hearings to be held by videoconference and this use was justified by the constraints and difficulties linked to the health crisis. 2°) The provisions allowing to limit the number of persons attending the hearing were applied by a large number of courts and in

a frequent manner. On the other hand, the provisions allowing the president of the court to decide that the hearing will be held without the presence of the public have been used very little. 3°) The dispensation of the public rapporteur's conclusions has been used very little by the courts. This dispensation was applied because of the vulnerable state of the public rapporteur or to limit the length of the hearings (in these cases the dispensation was granted for cases that did not present any difficulty).
4°) The orders of March and November 2020 allowed the interim relief judge to rule without a hearing, in addition to the cases provided for in article L. 522-3 of the Code of Administrative Justice.
Many courts have indicated that they have dispensed with a hearing. The dispensation of a hearing was most frequently applied in the case of summary proceedings for suspension. In the case of interim relief, this dispensation was applied in a more measured way. Finally, many jurisdictions did not hold a hearing for summary proceedings other than suspension and liberty.
5°) The possibility for the administrative courts of appeal to rule by order without a hearing on applications for a stay of execution was little used, since only 3 CAA indicated that they had used it.
6°) In matters of DALO-Injunction, the possibility of ruling by order was used by 12 courts and, for almost all of these courts, for more than 60% of the cases judged during the same period.
II - The courts made very little use of the derogation provisions relating to the composition of the trial panels. In fact, no court made use of the possibility of completing a panel of judges with the participation of an honorary magistrate from another court. Only one administrative court requested the participation of a judge from another court (one judge came to assist for a period of three months).
III - The provisions allowing heads of court to appoint advisers to rule by order under the conditions set out in article R. 222-13 of the CJA were hardly used: only two administrative courts applied them. One head of court had appointed one or more advisers but no order was made by this magistrate or these magistrates. Another head of court indicated that the designated magistrate(s) signed more than 200 orders. In total, it appears that the measures provided for have been used very differently depending on the measure taken into account. Video hearings and the new rules for summary proceedings have opened up possibilities, with provisions that can be seen as having been the medium for experimentation. "

Q097 (2017): As regards administrative law cases, the Council of State report indicates that it is a coincidence to have the same number for incoming and resolved cases.
Q098 (General Comment): Cases are not categorised by type of offenses but by court chamber (criminal, investigation, sentence enforcement), which prevents us from providing the number of criminal cases by type of offense.
In terms of horizontal consistency, discrepancies may be noted due to difficulties in recording cases as a result of the change in digital criminal applications within the appeal courts. This is a transitional situation due to an improvement in digital tools.

Q098 (2024): Source(s): SSER, frame-survey of prosecution services. Differences between the number of pending cases on 31 Dec. 2023 and the number of pending cases on 1 Jan. 2024 may be observed due to the difficulties in recording cases resulting from the change of criminal applications within the courts of appeal.
Q098 (2023): Source(s): SSER, Public Prosecutor's Executives Survey.
Q098 (2022): Please note that for the year 2022, data regarding the criminal appeals chambers are not available. Consequently, it is not possible to provide the total volume of criminal cases at second instance. Furthermore, cases are not categorized by type of offense but by chamber (criminal, investigative, enforcement).
Q098 (2021): Source SDSE
Q098 (2020): "The health crisis and containment may have played on TAs (completed cases) (by reducing the ability of courts to process cases) but also on NAs (new cases) (fewer offenses committed, fewer cases brought to trial). Prior to this, a major lawyers' strike and transportation strike had mostly affected TAs.
"
Q099 (General Comment): In non-litigious civil matters, an appeal to the Court of Cassation is possible, yet the statistics provided by the Court do not allow for their specific identification. Consequently, these non-litigious civil cases are grouped together with litigious civil cases.
Q099 (2024): "Other cases": QPC, requests for opinions, and other applications filed as the main matter.
"Civil litigious cases pending for more than 2 years": the numbers are small and affect the percentage changes. For administrative justice, the discrepancies noted between the number of pending cases on Dec. 31, 2023, and Jan. 1, 2024, are explained by updates to the Council of State's databases.
Q099 (2022): The category 'other' encompasses additional requests, such as advisory requests, priority questions of constitutionality, and petitions concerning the appointment of experts or mediators.

Source: Council of State / Court of Cassation
Q099 (2021): source SDSE and Council of State

Q099 (2020): "The health crisis and containment may have played on TAs (completed cases) (by reducing the ability of courts to process cases) but also on NAs (new cases) (fewer offenses committed, fewer cases brought to trial). Prior to this, a major lawyers' strike and a transport strike had mainly affected the TAs.
Commentary provided by the Conseil d'Etat: As a reminder, the measures derogating from the ordinary law of contentious administrative procedure adopted to respond to the situation arising from the health crisis caused by the Covid-19 epidemic were provided for by Ordinance no. 2020-305 of March 25, 2020, and then by Ordinance no. 2020-1402 of November 18, 2020, and Decree no. 2020-1406 of the same day. I - Concerning the rules relating to the organization or holding of hearings 1°) Use of audiovisual or any other means of electronic communication
The two orders of March 25 and November 18, 2020 provided for the possibility of using an audiovisual means of telecommunication for the holding of hearings or any other means of electronic communication.
When this device was used, it was used, in almost all the jurisdictions that had recourse to it, for less than 10% of the cases judged in collegiality during the same period.
The most common configuration used was that in which one or more members of the panel were at a distance and the president, the other members of the panel, and the parties and their counsel were in the courtroom (approximately 75% of the courts that used videoconferencing chose this configuration, and 53% of them used it for less than 10% of the cases heard by the panel). Very few courts have used video-conferencing with remote parties. The reasons for which the courts have used video-conferencing are linked to the constraints linked to the health crisis, in particular the difficulties encountered by lawyers to travel, especially in overseas territories, and the isolation imposed on certain people (judges or lawyers) declared to be in contact or recognized as fragile.
In the case of single-judge hearings, the courts have made a very measured application of the provisions allowing the use of an audiovisual means of telecommunication, since only 6 administrative courts out of 35 have indicated that they have used it. The administrative courts indicated that they had used videoconferencing, as a single judge, for the processing of emergency proceedings in matters concerning foreigners, particularly in cases where the foreigner was in administrative detention. Finally, 15 administrative courts indicated that they held summary proceedings by videoconference. For almost all of these courts, the summary proceedings judge was in the courtroom and the parties were at a distance, and less than 10% of summary proceedings cases were judged in this configuration. Travel difficulties were the main reasons why the courts of first instance held summary proceedings by videoconference. The texts applicable during the state of health emergency allowed the use of any means of electronic communication, other than videoconferencing, in case of impossibility to use it. Only a few TAs used this procedure and for less than 10% of the cases in the courts that used it.
Generally speaking, the courts have made a very measured application of the provisions of the orders allowing hearings to be held by videoconference and this use was justified by the constraints and difficulties linked to the health crisis. 2°) The provisions allowing to limit the number of persons attending the hearing were applied by a large number of courts and in a frequent man

ner. On the other hand, the provisions allowing the president of the court to decide that the hearing will be held without the presence of the public have been used very little. 3°) The dispensation of the public rapporteur's conclusions has been used very little by the courts. This dispensation was applied because of the vulnerable state of the public rapporteur or to limit the length of the hearings (in these cases the dispensation was granted for cases that did not present any difficulty).
4°) The orders of March and November 2020 allowed the interim relief judge to rule without a hearing, in addition to the cases provided for in article L. 522-3 of the Code of Administrative Justice.
Many courts have indicated that they have dispensed with a hearing. The dispensation of a hearing was most frequently applied in the case of summary proceedings for suspension. In the case of interim relief, this dispensation was applied in a more measured way.
Finally, many jurisdictions did not hold a hearing for summary proceedings other than suspension and liberty.
5°) The possibility for the administrative courts of appeal to rule by order without a hearing on applications for a stay of execution was little used, since only 3 CAA indicated that they had used it.
6°) In matters of DALO-Injunction, the possibility of ruling by order was used by 12 courts and, for almost all of these courts, for more than 60% of the cases judged during the same period.
II - The courts made very little use of the derogation provisions relating to the composition of the trial panels. In fact, no court made use of the possibility of completing a panel of judges with the participation of an honorary magistrate from another court. Only one administrative court requested the participation of a judge from another court (one judge came to assist for a period of three months).
III - The provisions allowing heads of court to appoint advisers to rule by order under the conditions set out in article R. 222-13 of the CJA were hardly used: only two administrative courts applied them. One head of court had appointed one or more advisers but no order was made by this magistrate or these magistrates. Another head of court indicated that the designated magistrate(s) signed more than 200 orders. In total, it appears that the measures provided for have been used very differently depending on the measure taken into account. Video hearings and the new rules for summary proceedings have opened up possibilities, with provisions that can be seen as having been the medium for experimentation. "

Q099 (2014): 2014: The statistics of the Court of Cassation are not based on the same information system as the ones of courts of first instance and appeal courts. If discontinued cases of the category non-litigious cases may be subject to an appeal, it is not possible to identify them, they are included in the figure given for civil litigious cases. Thus, the total figure is the one retained.

Q100 (General Comment): The total number of resolved cases corresponds to judgments of cassation, cassation without referral and dismissal of the appeal. The other judgments handed down by the criminal chamber of the Court of Cassation are not counted. It is not possible to distinguish the litigation of the Court of Cassation by type of offence. The item "severe criminal cases" includes all appeals before the Court of cassation. It should be noted that the appeals mainly concern crimes and offences. The share of minor criminal cases is residual. The data are taken from the annual activity report of the Court of Cassation.

Q100 (2024):
“Severe criminal cases / Minor criminal cases”: in the absence of statistical means to distinguish between appeals in cases that may or may not result in a prison sentence, appeals concerning the activity of the police court, which deals with petty offenses, have been classified under the category of minor offenses;
“Other criminal cases”: QPC, requests for opinions, and other petitions filed as main actions.
“Total number of criminal cases”: this number includes all criminal cases submitted to the Court of cassation.

Q100 (2023): No other data are available

Q100 (2022): The statistical system does not allow for distinguishing between appeals related to severe and minor offenses. The number of pending cases includes the enforcement litigation which was not taken into consideration for the previous years (2020 and 2021). The category "other criminal cases" encompasses requests for opinions, priority questions of constitutionality, and principal petitions.
Source: Court of Cassation.

Q100 (2021): Source SDSE

Q100 (2020): The health crisis and the lockdown may have had an impact on TAs (completed cases) (by reducing the capacity of courts to process cases) but also on NAs (new cases) (fewer offenses committed, fewer cases brought to court). Prior to this, a major lawyers' strike and a transport strike had mainly influenced TAs.

Germany

Q091 (General Comment): General information on the statistics used as sources for answering the questions in this section:
Once per year, the Federal Statistical Office compiles and publishes the statistics of the civil, criminal, administrative, finance, social, family and labour courts. Nationwide uniform ordinances define the scope and rules of data collection for these statistics. The courts collect the data and submit it to the statistical offices of the federal states, who check and edit the data and send it to the Federal Statistical Office. In simplified terms, the ordinances provide two different kinds of data collection sheets: The "procedural surveys" that collect data on the specifics of the proceedings happening at a court and the "monthly surveys" that track the caseload of a court. With regard to the caseload count, the monthly surveys distinguish between "caseload of proceedings covered by the procedural surveys" and "other caseload". For the cases from the first category (proceedings covered by the procedural surveys), the monthly surveys collect the number of cases pending at the beginning and at the end of a month as well as the number of received and resolved cases. For the "other caseload", the monthly surveys only count the number of received cases.
2.1 General civil (and commercial) non-litigious cases: The figure represents the number of non-litigious enforcement cases. In the monthly survey for the statistics of the civil courts, these cases fall into the category of "other caseload". This is the reason why only the number of incoming cases is available.
2.2.1. Non litigious land registry cases: The figure represents the number of incoming requests with regard to entries, change of entries or deletion of entries in the land registry. This data is not part of the statistics of the civil courts but was taken from the statistics on the workload of the Local Courts in matters of non-contentious jurisdiction (according to the Act on Proceedings in Family Matters and in Matters of Non-contentious Jurisdiction - FamFG). The number of pending and resolved land registry cases is not collected within the framework of this statistic.
Pending cases older than 2 years from the date the case came to the first instance court:
With regard to the statistics of the civil, criminal, administrative, finance, social, family and labour courts, a statistical record of the day a case came to the court only exists for the cases covered by the procedural surveys. Courts submit the data from the procedural surveys to the statistical offices after the case has been concluded for the respective court and at the respective instance. This means that the duration of a proceeding is unknown for pending cases. The monthly surveys count the number of pending cases at the beginning and at the end of a month, but do not collect any information on the date the pending cases came to the court. The statistics compiled by the Federal Statistical Office include information on the percentage of cases that were resolved within certain time frames but no numbers on how many proceedings took longer than two years. The statistic on the workload of the Local Courts in matters of non-contentious jurisdiction does not collect any data regarding the date a case first came to court.
Horizontal inconsistencies in the table:
The inconsistencies with regard to the pending cases at the end of the year also occur in the statistics published by the Federal Statistical Office. The reason for this is, that courts submit count corrections for the monthly surveys at the end of the year.

Q091 (2024): "Non-litigious civil cases" represent non-litigious enforcement cases.
"Non-litigious business registry cases" represent - the number of registrations in the business registry (Handelsregister) at the end of the previous year
- the number of new registrations during the reference year
- the number of deleted registrations during the reference year
- the number of registrations at the end of the reference year
"Administrative law cases" include cases at the administrative, social and finance courts
"Other cases" include family cases at the local courts and cases at the labour courts (family matters are not assigned to the category civil cases, because they are subject to a different procedural law).
Horizontal inconsistencies in the table:
The inconsistencies with regard to the pending cases at the end of the year also occur in the statistics published by the Federal Statistical Office. The reason for this is, that courts submit count corrections for the monthly surveys at the end of the year.

Q091 (2023): "Non-litigious civil cases" represent non-litigious enforcement cases.
"Non-litigious business registry cases" represent - the number of registrations in the business registry (Handelsregister) at the end of the previous year
- the number of new registrations during the reference year
- the number of deleted registrations during the reference year
- the number of registrations at the end of the reference year
"Administrative law cases" include cases at the administrative, social and finance courts
"Other cases" include family cases at the local courts and cases at the labour courts (family matters are not assigned to the category civil cases, because they are subject to a different procedural law).
Land registry and business registry cases: One federal state could not yet submit numbers for 2023. The federal state's 2022 data was used to calculate the total.

Q091 (2022): "Non-litigous civil cases" represent non-litigous enforcement cases.
"Non-litigious business registry cases" represent - the number of registrations in the business registry (Handelsregister) at the end of the previous year
- the number of new registrations during the reference year
- the number of deleted registrations during the reference year
- the number of registrations at the end of the reference year
"Administrative law cases" include cases at the administrative, social and finance courts
"Other cases" include family cases at the local courts and cases at the labour courts (family matters are not assigned to the category civil cases, because they are subject to a different procedural law). Discrepancies in comparison with the 2020 cycle: There has been a general decrease in incoming and resolved litigous civil cases als well as non-litigous civil cases (enforcement cases). No specific reason could be identified for this development.
Regarding pending "other cases", additional data on pending guardianship cases at the family courts has become available. Until 2021, only the number of incoming and resolved guardianship cases was available. These figures were included in the total of incoming and resolved "other cases" in previous years. The number of pending cases at 1 Jan. and 31 Dec did not include guardianship cases, because their their number was unknown. This year for the first time, pending guardianship cases were inculded in other cases pending on 1. Jan and 31. Dec. They amount to 118 751 pending cases on 1 Jan and 128 580 pending cases on 31 Dec.

Q091 (2021): 2.2.2: data represents - the number of registrations in the business registry (Handelsregister) at the end of the previous year
- the number of new registrations during the reference year
- the number of deleted registrations during the reference year
- the number of registrations at the end of the reference year
"other cases" include: family and labour law cases

Q091 (2020): There is no special reason explaining the slight decrease in the number of incoming administrative law cases.

Q091 (2019): The horizontal consistency in the table is not ensured because the data are continuously checked.

Q091 (2018): The high number of administrative pending cases on January 1st and December 31st is a result from the numerous unresolved cases in 2017 due to the rise of asylum seekers since 2015.
Cases of guardianship law in 2018 are not included in the "other cases " category, because changeover of data collections by the Lander.

Q091 (2017): Source: Federal Statistical Office (DESTATIS)
No. 4 - Other cases: Cases of guardianship law in 2017 are not included, because changeover of data collections by the Länder.

Q091 (2016): Source: Federal Statistical Office (DESTATIS)

Q091 (2015): For civil and commercial litigious and administrative cases, the updated data is solely based on the statistics on the administration of justice published by the Federal Statistical Office for 2015. As for the category “other”, it refers to the most recent available data at the closing date of the CEPEJ data collection and encompasses information provided by the 16 Länder on the basis of the query lodged with the judicial administrations of the Länder. However, some of the Länder were unable to provide complete data regarding this category. Accordingly, the information for this category remains incomplete. The category "other" refers to: local court family cases; guardianship and curator cases at the family court; custodianship cases; curator cases at the custodianship court; proceedings regarding judgments and orders at the labour court.

Q091 (2014): For civil and commercial litigious and administrative cases, the updated data is solely based on the statistics on the administration of justice published by the Federal Statistical Office for 2014. As for the category “other”, it refers to the most recent available data at the closing date of the CEPEJ data collection and encompasses information provided by the 16 Länder on the basis of the query lodged with the judicial administrations of the Länder. However, some of the Länder were unable to provide complete data regarding this category. Accordingly, the information for this category is incomplete and is not comparable. The category "other" includes: local court family cases; guardianship and curator cases at the family court; custodianship cases; curator cases at the custodianship court; proceedings regarding judgments and orders at the labour court.

Q093 (2014): For the 2013 and 2014 exercises, the category “other” includes: Local Court family cases; guardianship and curator cases at the family court; custodianship cases; curator cases at the custodianship court; proceedings regarding judgments and orders at the labour court.

Q094 (General Comment): General information on the statistics used as sources for answering the questions in this section: please refer to the general comment Q 91
The category “severe criminal cases” includes criminal proceedings in accordance with the Criminal Code and ancillary criminal laws. The category “misdemeanour and/or minor criminal cases” subsumes regulatory fine proceedings before criminal courts.
“Other cases” include:
-proceedings concerning suspension of execution of the remainder of a sentence of life imprisonment or concerning suspension of execution of placement in a psychiatric hospital or in preventive detention - determinate custodial sentences - proceedings under sections 109, 110, 138 of the Prison Act (Strafvollzugsgesetz, StVollzG) - proceedings under Part IV of the Act on International Legal Assistance in Criminal Matters (Gesetz über die internationale Rechtshilfe in Strafsachen, IRG) and section 71 (4) of Part II - supervision of conduct
-complaints about costs/fees - complaints against search/seizure orders - complaints in economic cases and tax cases
-complaints in matters concerning detention - cases in matters falling within the Regulatory Offences Act (Ordnungswidrigkeitengesetz, OWiG) registered in the complaints register - other complaints - subsequent or reserved preventive detention
-proceedings regarding the order of subsequent or reserved preventive detention - proceedings regarding the suspension of execution of a sentence where the court has reserved the order of preventive detention, in the cases covered by section 462a (2), third sentence, of the Code of Criminal Procedure (Strafprozessordnung, StPO)
-proceedings before the judicial service court
-proceedings regarding health professionals, tax consultants, agents in tax matters, patent lawyers or architects
-other disciplinary proceedings - proceedings regarding legal remedies in matters of enforcement of youth custody, youth detention and remand detention
Only the number of incoming cases is available for "other criminal cases", because with regard to data collection through the "monthly surveys" these cases fall into the category “other caseload” (please refer to general comment Q91);
Pending cases older than 2 years from the date the case came to the first instance court: please refer to the general comment Q 91;
Horizontal inconsistencies: Please refer to the general comment Q 91

Q094 (2024): “Severe criminal cases” include criminal proceedings according to the Criminal Code and ancillary criminal laws. The category “misdemeanour and/or minor criminal cases” includes regulatory fine proceedings before criminal courts.
“Other criminal cases” include: - proceedings at the penal execution chambers (concerning suspension of execution of the remainder of a sentence of life imprisonment or concerning suspension of execution of placement in a psychiatric hospital or in preventive detention, determinate custodial sentences, proceedings under sections 109, 110, 138 of the Prison Act (Strafvollzugsgesetz, StVollzG), proceedings under Part IV of the Act on International Legal Assistance in Criminal Matters (Gesetz über die internationale Rechtshilfe in Strafsachen, IRG) and section 71 (4) of Part II)
- proceedings regarding supervision of conduct
- complaints about costs/fees - complaints against search/seizure orders - complaints in economic cases and tax cases
- complaints in matters concerning detention - cases in matters falling within the Regulatory Offences Act (Ordnungswidrigkeitengesetz, OWiG) registered in the complaints register - other complaints - subsequent or reserved preventive detention
- proceedings regarding the order of subsequent or reserved preventive detention - proceedings regarding the suspension of execution of a sentence where the court has reserved the order of preventive detention, in the cases covered by section 462a (2), third sentence, of the Code of Criminal Procedure (Strafprozessordnung, StPO)
- proceedings before the judicial service court
- proceedings regarding health professionals, tax consultants, agents in tax matters, patent lawyers or architects
- other disciplinary proceedings - proceedings regarding legal remedies in matters of enforcement of youth custody, youth detention and remand detention With regard to "other criminal cases", only the number of incoming cases is recorded (exception: proceedings concerning supervision of conduct).

Q094 (2023): “Severe criminal cases” include criminal proceedings according to the Criminal Code and ancillary criminal laws. The category “misdemeanour and/or minor criminal cases” includes regulatory fine proceedings before criminal courts. “Other criminal cases” include: - proceedings at the penal execution chambers (concerning suspension of execution of the remainder of a sentence of life imprisonment or concerning suspension of execution of placement in a psychiatric hospital or in preventive detention, determinate custodial sentences, proceedings under sections 109, 110, 138 of the Prison Act (Strafvollzugsgesetz, StVollzG), proceedings under Part IV of the Act on International Legal Assistance in Criminal Matters (Gesetz über die internationale Rechtshilfe in Strafsachen, IRG) and section 71 (4) of Part II)
- proceedings regarding supervision of conduct
- complaints about costs/fees - complaints against search/seizure orders - complaints in economic cases and tax cases
- complaints in matters concerning detention - cases in matters falling within the Regulatory Offences Act (Ordnungswidrigkeitengesetz, OWiG) registered in the complaints register - other complaints - subsequent or reserved preventive detention
- proceedings regarding the order of subsequent or reserved preventive detention - proceedings regarding the suspension of execution of a sentence where the court has reserved the order of preventive detention, in the cases covered by section 462a (2), third sentence, of the Code of Criminal Procedure (Strafprozessordnung, StPO)
- proceedings before the judicial service court
- proceedings regarding health professionals, tax consultants, agents in tax matters, patent lawyers or architects
- other disciplinary proceedings - proceedings regarding legal remedies in matters of enforcement of youth custody, youth detention and remand detention With regard to "other criminal cases", only the number of incoming cases is recorded (exception: proceedings concerning supervision of conduct).

Q094 (2022): “Severe criminal cases” include criminal proceedings according to the Criminal Code and ancillary criminal laws. The category “misdemeanour and/or minor criminal cases” includes regulatory fine proceedings before criminal courts. “Other criminal cases” include: - proceedings at the penal execution chambers (concerning suspension of execution of the remainder of a sentence of life imprisonment or concerning suspension of execution of placement in a psychiatric hospital or in preventive detention, determinate custodial sentences, proceedings under sections 109, 110, 138 of the Prison Act (Strafvollzugsgesetz, StVollzG), proceedings under Part IV of the Act on International Legal Assistance in Criminal Matters (Gesetz über die internationale Rechtshilfe in Strafsachen, IRG) and section 71 (4) of Part II)
- proceedings regarding supervision of conduct

- other disciplinary proceedings - proceedings regarding legal remedies in matters of enforcement of youth custody, youth detention and remand detention With regard to "other criminal cases", only the number of incoming cases is recorded (exception: proceedings concerning supervision of conduct).

Q094 (2021): The category “misdemeanour and/or minor criminal cases” subsumes regulatory fine proceedings before criminal courts.
“Other criminal cases” include:
- proceedings at the penal execution chambers (concerning suspension of execution of the remainder of a sentence of life imprisonment or concerning suspension of execution of placement in a psychiatric hospital or in preventive detention, determinate custodial sentences, proceedings under sections 109, 110, 138 of the Prison Act (Strafvollzugsgesetz, StVollzG), proceedings under Part IV of the Act on International Legal Assistance in Criminal Matters (Gesetz über die internationale Rechtshilfe in Strafsachen, IRG) and section 71 (4) of Part II)
- proceedings regarding supervision of conduct
- complaints about costs/fees - complaints against search/seizure orders - complaints in economic cases and tax cases
- complaints in matters concerning detention - cases in matters falling within the Regulatory Offences Act (Ordnungswidrigkeitengesetz, OWiG) registered in the complaints register - other complaints - subsequent or reserved preventive detention
- proceedings regarding the order of subsequent or reserved preventive detention - proceedings regarding the suspension of execution of a sentence where the court has reserved the order of preventive detention, in the cases covered by section 462a (2), third sentence, of the Code of Criminal Procedure (Strafprozessordnung, StPO)
- proceedings before the judicial service court
- proceedings regarding health professionals, tax consultants, agents in tax matters, patent lawyers or architects
- other disciplinary proceedings - proceedings regarding legal remedies in matters of enforcement of youth custody, youth detention and remand detention
With regard to "other criminal cases", only the number of incoming cases is recorded (exception: proceedings concerning supervision of conduct).

Q094 (2018): As only the number of resolved “other cases” is available, these will not be included in the total.

Q094 (2014): The information provided in the frame of the 2014 evaluation refers to 2013 data (the 2014 data is not available).

Q097 (General Comment): General information on the statistics used as sources for answering the questions in this section: please refer to the general comment Q 91
Horizonal inconsistencies:
The inconsistencies with regard to the pending cases at the end of the year also occur in the statistics published by the Federal Statistical Office. The reason for this is, that courts submit count corrections for the monthly surveys at the end of the year.

Q097 (2024): Civil (and commercial) litigious cases include second instance civil cases at the regional courts and higher regional courts.
"Administrative law cases" include cases at the higher administrative courts and regional social courts.
"Other cases" include cases at the regional labour courts and second instance family matters at the higher regional courts.

Q097 (2023): Civil (and commercial) litigious cases include second instance civil cases at the regional courts and higher regional courts.
The number of incoming cases has decreased significantly compared to 2022 and is now back to the level of before 2019. The increased number of incoming cases in 2019 till 2022 was most likely a result of the flood of lawsuits brought against car manufacturers in connection with the "diesel emission scandal".
"Administrative law cases" include cases at the higher administrative courts and regional social courts.
"Other cases" include cases at the regional labour courts and second instance family matters at the higher regional courts.
"Other cases" - discrepancy between pending cases on 31st Dec. 2022 and 1st Jan. 2023:
A high discrepancy orrurs with regard to second instance labour law cases. The reason for this is that one federal state's data on pending second instance labour law cases is missing in the official statistic.

Q097 (2022): Civil (and commercial) litigious cases include second instance civil cases at the regional courts and higher regional courts. There was a rise in pending cases (1. January and 31 December) compared to the 2020 cycle as well as a decrease in resolved cases. This is most likely a result of the flood of lawsuits brought against car manufracturers in connection with the "diesel emission scandal". For example, the higher regional court of Stuttgart, where a large car manufracturer has its main offices, has seen a rise in pending cases (1 January) of more than 100% compared to 2020.
"Administrative law cases" include cases at the higher administrative courts and regional social courts.
"Other cases" include cases at the regional labour courts and second instance family matters at the higher regional courts.

Q097 (2021): "Other": family cases at Higher Regional Courts, appeal and complaint proceedings at Regional Labour Courts Pending civil and commercial litigious cases on 31 Dec: The discrepancy stems from a rise in pending cases at the Higher Regional Courts (approx. 33% compared to 2020). While the number of pending cases at the Higher Regional Courts has risen in all Länder, the discrepancy is especially high in Baden-Württemberg (rise of approx. 88%). The reason for this is most likely the flood of lawsuits brought against car manufracturers in connection with the "diesel emission scandal". The Higher Regional Court of Stuttgart, where a large manufracturer has its main offices, has seen a rise in pending cases of more than 100% compared to 2020.

Q097 (2020): family cases at Higher Regional Courts, appeal and complaint proceedings at Regional Labour Courts

Q097 (2019): The horizontal consistency in the table is not ensured because the data are continuously checked.

Q097 (2015): A substancial number of the Länder was unable to provide information, meaning that any amount cited would not be meaningful in substantive terms.

Q097 (2014): The 2014 data are the same as those that have been provided in 2013. No update was available.

Q098 (General Comment): General information on the statistics used as sources for answering the questions in this section: please refer to the general comment Q 91
Horizonal inconsistencies:
The inconsistencies with regard to the pending cases at the end of the year also occur in the statistics published by the Federal Statistical Office. The reason for this is, that courts submit count corrections for the monthly surveys at the end of the year.

Q098 (2024): “Severe criminal cases” include criminal proceedings according to the Criminal Code and ancillary criminal laws. The category “misdemeanour and/or minor criminal cases” includes regulatory fine proceedings before criminal courts. "Other" includes complaints in regulatory fining proceedings at the Higher Regional Courts (according to Section 80 of the Act on Regulatory Offences), objections in regulatory fining proceedings according to the Competition Act With regard to these cases, only the number of incoming cases is recorded.

Q098 (2023): “Severe criminal cases” include criminal proceedings according to the Criminal Code and ancillary criminal laws. The category “misdemeanour and/or minor criminal cases” includes regulatory fine proceedings before criminal courts. "Other" includes complaints in regulatory fining proceedings at the Higher Regional Courts (according to Section 80 of the Act on Regulatory Offences), objections in regulatory fining proceedings according to the Competition Act With regard to these cases, only the number of incoming cases is recorded.

Q098 (2022): “Severe criminal cases” include criminal proceedings according to the Criminal Code and ancillary criminal laws. The category “misdemeanour and/or minor criminal cases” includes regulatory fine proceedings before criminal courts. "Other" includes complaints in regulatory fining proceedings at the Higher Regional Courts (according to Section 80 of the Act on Regulatory Offences), objections in regulatory fining proceedings according to the Competition Act With regard to these cases, only the number of incoming cases is recorded. Discrepancies in comparison with the last cycle:
The decrease in resolved severe criminal cases can mostly be attributed to second instance cases at the regional courts. No special reason could be identified for this development.
The decrease in pending minor criminal cases on 1 January is caused by the fact, the number of pending cases on 1 January 2020 higher than usual. No specific reason could be identified for this deviation or for the deviation of "other than criminal cases".

Q098 (2021): "Other": complaints in regulatory fining proceedings at the Higher Regional Courts (according to Section 80 of the Act on Regulatory Offences), objections in regulatory fining proceedings according to the Competition Act
With regard to these cases, only the number of incoming cases is recorded. Pending minor criminal cases on 1 Jan: The number of incoming cases was lower in 2020 than in 2019 and the number of resolved cases higher, resulting in a lower number of pending cases at the end of 2020. A reason for this development could not be identified.

Q098 (2020): complaints in regulatory fining proceedings at the Higher Regional Courts (according to Section 80 of the Act on Regulatory Offences), objections in regulatory fining proceedings according to the Competition Act

Q098 (2016): The category “severe criminal cases" (line 2) includes criminal proceedings in accordance with the Criminal Code (Strafgesetzbuch, StGB) and ancillary criminal laws. The category “minor criminal cases” (line 3) includes regulatory fine proceedings before the criminal courts.

Q098 (2014): According to 2014 data, the category “severe criminal cases” included criminal proceedings in accordance with the Criminal Code and ancillary criminal laws. The category “misdemeanour and/or minor criminal cases” subsumed regulatory fine proceedings before criminal courts.
The information provided in the frame of the 2014 evaluation refers to 2013 data (the 2014 data is not available).

Q099 (General Comment): The annual statistic of the Federal Court of Justice does not differentiate between litigious and non-litigious cases.

Q099 (2024): The annual statistic of the Federal Court of Justice does not differentiate between litigious and non-litigious cases. The caseflow of all litigious and non-litigious other than criminal cases (including family matters) at the Federal Court of Justice 2024 was as follows: 6455 cases pending on 1 Jan.; 4761 incoming cases; 5867 resolved cases; 5304 cases pending on 31 Dec.
The total of other than criminal law cases is the total of administrative law cases (no. 3), other cases (no. 4) and the cases at the Federal Court of Justice mentioned above.
Administrative law cases include cases at the Federal Administrative Court, Federal Social Court and Federal Finance Court
Other Cases represent labour law cases at the Federal Labour Court.
Discrepancy of pending cases on 31 Dec compared to 2023: The dicrepancy is due to the fact that there were more resolved than incoming cases. The annual report of the Federal Labour Court does not mention any specific reason for this development.

Q099 (2023): The annual statistic of the Federal Court of Justice does not differentiate between litigious and non-litigious cases. The case-flow of all litigious and non-litigious other than criminal cases (including family matters) at the Federal Court of Justice 2023 was as follows:
5886 cases pending on 1 Jan.; 5897 incoming cases; 5328 resolved cases; 6455 cases pending on 31 Dec.
The total of other than criminal law cases is the total of administrative law cases (no. 3), other cases (no. 4) and the cases at the Federal Court of Justice mentioned above.
Administrative law cases include cases at the Federal Administrative Court, Federal Social Court and Federal Finance Court
Other Cases represent labour law cases at the Federal Labour Court.

Q099 (2022): The annual statistic of the Federal Court of Justice does not differentiate between litigious and non-litigious cases. The case-flow of all litigious and non-litigious other than criminal cases (including family matters) at the Federal Court of Justice 2022 was as follows:
5275 cases pending on 1 Jan.; 6624 incoming cases; 6013 resolved cases; 5886 cases pending on 31 Dec.
The total of other than criminal law cases is the total of administrative law cases (no. 3), other cases (no. 4) and the cases at the Federal Court of Justice mentioned above.
Adminstrative law cases include cases at the Federal Administrative Court, Federal Social Court and Federal Finance Court
Discrepancy of "other cases":
Other Cases represent labour law cases at the Federal Labour Court. The annual report of the Federal Labour Cort does not provide an explanation for the general decrease in cases.

Q099 (2021): The statistics of the Federal Court of Justice do not differentiate between litigious and non-litigious cases. The data given under Nr. 1 represents all appeal cases in civil matters at the Federal Court of Justice (including family matters).
"Other Cases": Data represents labour law cases at the Federal Labour Court.
The annual report of the Federal Labour Court doesn't provide an explanation for the decrease in incoming cases and resolved cases. According to press reports, the decrease in incoming cases might be due to the good economic situation prior to the pandemic (less dismissal cases). The decrease in resolved cases might be due to a rising number of cases, in which an involvement of the European Court of Justice is necessary.

Q099 (2015): The data provided date from 2014. At present, no data are available for 2015.
It is not possible to distinguish between litigious civil cases, respectively commercial cases, and those that are non-litigious. Accordingly, number 1 of the answer to question 99 includes all appeals on points of law brought in the civil matters before the Federal Court of Justice (Senates for civil matters including family law matters). However, the number of proceedings dealt with and concluded by litigious rulings in 2014 amounts to 600.

Q099 (2014): The 2014 data are the same as those that have been provided in 2013. No update was available.

Q100 (General Comment): In alignment with the categorisation of cases in questions 94 and 98, “severe criminal cases” include criminal proceedings according to the Criminal Code and ancillary criminal laws. The category “misdemeanour and/or minor criminal cases” includes regulatory fine proceedings before criminal courts. In the annual statistic of the Federal Court of Justice, criminal proceedings according to criminal laws and regulatory fine proceedings are not reported separately.

Q100 (2024): The annual statistic of the Federal Court of Justice does not differentiate between "severe criminal cases" and "minor criminal cases". The total number of cases represents the number of appeals, including referrals and regulatory offences pursuant to the Act on Regulatory Offences (OWiG) as well as regulatory offences pursuant to the Act Against Restraints of Competition (GWB) and the Energy Act (EnBW) before the criminal panels of the Federal Court of Justice (including antitrust panel).
Q100 (2023): The annual statistic of the Federal Court of Justice does not differentiate between "severe criminal cases" and "minor criminal cases". The total number of cases represents the number of appeals, including referrals and regulatory offences pursuant to the Act on Regulatory Offences (OWiG) as well as regulatory offences pursuant to the Act Against Restraints of Competition (GWB) and the Energy Act (EnBW) before the criminal panels of the Federal Court of Justice (including antitrust panel).
Q100 (2022): The annual statistic of the Federal Court of Justice does not differentiate between "severe criminal cases" and "minor criminal cases". The total number of cases represents the number of appeals, including referrals and regulatory offences pursuant to the Act on Regulatory Offences (OWiG) as well as regulatory offences pursuant to the Act Against Restraints of Competition (GWB) and the Energy Act (EnBW) before the criminal panels of the Federal Court of Justice (including antitrust panel).
Q100 (2021): It is not possible to differentiate between "severe criminal cases" and "minor criminal cases" (NA). The total number of cases represents the number of appeals, including referrals and regulatory offences pursuant to the Act on Regulatory Offences (OWiG) as well as regulatory offences pursuant to the Act Against Restraints of Competition (GWB) and the Energy Act (EnBW) before the criminal panels (including antitrust panel).
There were more incoming cases in 2021 than 2020 and also more pending cases at the beginning of the year 2021 than 2020. As a result, the number of pending criminal cases on 31 December 2021 increased. No special reason could be identified for this development. The annual report of the Federal Court of Justice doesn't provide any information on this matter.

Q100 (2020): It is not possible to differentiate between "severe criminal cases" and "minor criminal cases" (NA). The total number of cases means the number of appeals on points of law, including referrals and regulatory offences pursuant to the Act on Regulatory Offences (OWiG) as well as regulatory offences pursuant to the Act Against Restraints of Competition (GWB) and the Energy Act (EnBW) before the criminal panels (including antitrust panel).

Q100 (2018): It is not possible to differentiate between "severe criminal cases" and "minor criminal cases" (NA). The total number of cases means the number of appeals on points of law, including referrals and regulatory offences pursuant to the Act on Regulatory Offences (OWiG) as well as regulatory offences pursuant to the Act Against Restraints of Competition (GWB) and the Energy Act (EnBW) before the criminal panels (including antitrust panel).

Q100 (2016): It is not possible to differentiate between "severe criminal cases" and "minor criminal cases" (NA). The total number of cases means the number of appeals on points of law, including referrals and regulatory offences pursuant to the Act on Regulatory Offences (OWiG) as well as regulatory offences pursuant to the Act Against Restraints of Competition (GWB) and the Energy Act (EnBW) before the criminal panels (including antitrust panel).

Q100 (2014): The 2014 data reflects an overview of the case workflow processed by the Senates for Criminal Matters of the Federal Court of Justice (statistics for the year 2014). For 2014, it was not possible to distinguish between categories of “severe criminal cases” and “minor criminal cases”. The total number of criminal proceedings concerns appeals on points of law, including matters submitted to the Federal Court of Justice for its review of the principle of the matter and misdemeanour cases pursuant to the Act on Regulatory Offences. It also includes misdemeanours pursuant to the Act on Restraints of Competition that are pending before the Senates for Criminal Matters of the Federal Court of Justice (including the Senate for Anti-Trust Matters).
It is noteworthy that as there were only very few “minor criminal cases” in the previous cycles, the figures remain comparable for the last three evaluations.

Greece

Q091 (2024): Independent Department of Collection and Processing of Judicial Statistical Data (JustStat).
pending cases at the beginning of the period show a significant increase compared to 2023. This is due to the implementation of Law 5108/2024 on the consolidation of first instance jurisdiction. According to the aforementioned law, as of September 16, 2024, the Magistrates' Courts were abolished, but their caseload (incoming and pending cases) was transferred to the respective Courts of First Instance with which the former Magistrates' Courts were merged. As an example, we mention the case of the Athens Court of First Instance, the largest court in Greece in terms of case load, where in the third quarter of 2024, before the Law 5108/2024 was implemented, 18,956 civil law cases were filed, while in the fourth quarter of 2024, when the aforementioned law was implemented, the number of cases filed rose to 36,278 (a percentage change of 91%).

Q091 (2023): Other cases:This increase compared to 2022 is obviously due to the normalisation of the functioning of the courts following the lifting of the restrictive measures imposed due to Covid19, which restricted the functioning of the civil courts in particular.
"Civil litigious cases pending for more than two years": During the Covid-19 pandemic period, which was declared by the WHO on 11/03/2020, the prevention and management measures for the virus were implemented in Greece on 11 March. These measures also affected the functioning of the courts and civil courts, as most cases, especially civil cases, were suspended. The measures were fully implemented on 15 March 2022, when the functioning of the courts gradually started to normalise. During this period, judicial officers were given the opportunity and time to process cases that had been backlogged during the previous period. This resulted in a reduction in the number of pending cases in civil and criminal courts, which is reflected in the statistics for the year 2023.

Q091 (2022): The data has been provided by the office for the collection and processing of judicial statistics.
It is worth highlighting that comparisons with previous data/cycles are not relevant. Indeed, since last year, measures have been taken to improve the system for collecting statistical data, such as the training of staff and the creation of an instructional manual guide with definitions and instructions. These measures were intended to help collecting more reliable data from both small and large courts and prosecution services and eliminate the standard errors in judicial statistics. As our methodology is developing, discrepancies in data can be observed. Besides, as regards “Other cases”, it should be mentioned that some types of cases that were previously included in this category, are now distributed in the other case-categories in the table.

Q091 (2021): The data has been collected from the 63/63 First Instance courts of Greece.

Q091 (2020): The courts from March 2020 due to Covid 2019 operated under special conditions and dealt with priority mainly criminal cases, this is the reason for the differentiation of pending cases of civil and administrative nature.
Civil cases are answered NA, because not all courts could provide the data.

Q091 (2019): The Council of State did not provide the Ministry of Justice with data regarding the Administrative law cases

Q091 (2018): -

Q091 (2017): The divergence between 31.12.2016 and 1.1.2017 regarding the Civil and Commercial cases (First column of this year's data) is mainly due to the recent operation of the NEW system (integrated Civil and Criminal Court case management system -OSDDY PP) in the Court of First Instance of Pireaus (1587 more cases on 1.1.2017 than those on 31.12.2016). In 2017, the number of “incoming” and “resolved” civil and commercial litigious cases at first instance courts increased due to the fact that in 2017 the function of the courts was not affected by the strike of lawyers, which took place in 2016. The horizontal consistency of the table is not ensured with regard to civil and commercial litigious cases because in 2017 some of the courts which do not yet have an automated system had to make minor adjustments in the statistical data provided to the MoJ. Concerning administrative law cases, any deviations from the 2016 figures, regarding the number of cases on 31.12.2016 and of 1.1.2017 (240650) are due to a number of factors that the General Commission of the State is trying to track down and gradually eliminate. A slight deviation has been noticed for the 2017 data of the administrative first instance courts of Athens and Piraeus, which is due to the data migration to a new information technology (IT) system called "Integrated Court Management System for the Administrative Justice (OSDDY-DD)". This deviation that has already been taken into account by the Central Organizational Committee for the due implementation of OSDDY-DD, is expected to lapse gradually within the next years. Furthermore, deviations have also emerged from the new way of collecting statistical data that the central Organizational Committee is trying to establish in order to ensure the uniform input of data by each court and from recent verifications of relevant numerical data that were subsequently sent by the courts. Finally, discrepancies are also due to errors of the information system itself, for which an effort is being made to identify and inform about, the contractor of the system. The deviation regarding the Number of resolved cases of 2017 from 2016 is due to the fact that in 2017 the function of the courts was not affected by the strike of the lawyers, which took place in 2016. Regarding the new integrated court management system, for administrative cases it has been implemented at all court levels since autumn 2016 and for civil and commercial cases and more especially in the Court of First Instance of Piraeus, the integrated court management system was gradually implemented from March 2016 resulting to an accurate calculation of pending cases of 1/1/2017.

Q091 (2016): Any deviations from the 2015 figures are due to a new way of collecting statistics. In fact, in 2016, a working group was set up to update and simplify the content of the statistical data requested by the judicial services of the country. The working group created tables followed by detailed instructions and training in relation to the requested information. According to the instructions given to the courts, some procedures they handle, in those which there is no participation of a judge, are not included in the data collected. In addition, in 2016 a long-term abstention by the lawyers of the country took place, resulting in reduction in the number of cases (especially civil and commercial litigious cases).
The number 79.872 of resolved administrative law cases does not include joint cases, i.e. decisions that refer to more than one case. Furthermore, for the 2016 data of the administrative First Instance Courts of Athens and Piraeus a slight deviation has been noted which is due to the data migration to a new information technology (IT) system called “Integrated Court Management System for Administrative Justice (OSDDY-DD)”. This deviation that has already been taken into account by the Central Organizational Committee for the due implementation of OSDDY – DD is expected to lapse gradually within the next years.
As concerns the category "civil and commercial litigious cases" - incoming and resolved - in 2016 a long-term abstention by the lawyers of the country took place, resulting in reduction of numbers regarding the cases.

Q091 (2014): The significant increase in the number of pending cases on 1 January for the total of “other than criminal law cases” is due to lawyers’ abstention in the years 2013 and 2014.
Q093 (General Comment): Obviously, when we refer to appeals, we do not include their discussion before the court, but their filing as a civil remedy, which in the case of the Greek procedural system is filed, and in some cases even discussed in the courts of first instance.
Payment orders are included in "other" because there is only one field "other cases" on the JastSTat platform where the cases listed in table 93 are entered collectively. In the future we will try to transfer the payment orders to category 2.1 in the new JastStat platform.

Q094 (General Comment): The category "other criminal cases" includes cases relating to pre-trial matters, imposition of criminal sanctions, commutation of sentences, granting of suspension, community service.
Q094 (2024): Independent Department of Collection and Processing of Judicial Statistical Data (JustStat).
The observed fluctuations in criminal cases can be partly explained by the legislative reforms introduced by Law 5090/2024, which amended the Greek Criminal Code and the Code of Criminal Procedure. These reforms included the reinstatement of public prosecution for selected misdemeanors, the strengthening of the prosecution of domestic violence and organized crime. These changes may have affected the classification, volume, and speed of processing of criminal cases, resulting in deviations that are considered expected and explainable. Additional factors affecting statistics are: • transitional provisions: some changes were implemented gradually until July 1, 2024; • reclassification of offenses: changes in the classification of acts as misdemeanors or felonies; • revision of competences: transfer of competences from prosecutors to judicial councils for certain acts.

Q094 (2023): The data are provided by the Office for the collection and processing of judicial statistics.
The variations in the numbers should be construed in the light of the pandemic contexte. In the year 2022, courts were, even for part of the year, under a restricted regime due to the measures implemented in Greece to contain the Covid-19 pandemic. This gave the judges the opportunity, alongside new cases, to deal with cases that had already been heard. At the same time, however, due to the courts not being fully operational, the number of cases to be pending increased at the end of 2022, which were transferred for adjudication in 2023, when the courts were fully operational and consequently the flow of judgments was limited.
Moreover, it should be considered that there were 3 consecutive elections in Greece in 2023, which resulted in the suspension of the courts for about 3 months in total.
Obviously this increase is due to the full normalization of the operation of the courts after the lifting of the restrictions on their operation that had been put in place to deal with the Covid 19 pandemic, which came into full effect in 2022 (note that the judicial year in Greece runs from September to July, usually)

Q094 (2022): It is worth highlighting that comparisons with previous data/cycles are not relevant. Indeed, since last year, measures have been taken to improve the system for collecting statistical data. The content of the categories of criminal cases in the table are the same as for the previous evaluation cycle, but the services now monitor and record these cases better so discrepancies in data can be observed. This is especially the case for the Misdemeanour and / or minor criminal cases.

Q094 (2021): The courts’ function in cooperation with the prosecution's offices. For example, postponed cases get to the prosecutor offices and then to the courts, in repeat 2-3 times, during the period (year). The definition of the pending cases included postponed cases or the cases the trial date has been setting out of the refence year or hasn’t been determined during the year. The data has been collected from 63 out of 63 First instance courts in Greece.

Q094 (2020): To give a brief overview of the national criminal procedure, criminal cases are filed for admission in the Public Prosecutor's Office, where they are further investigated. If a prosecution is initiated, the cases are discussed in court. The Court of First Instance or the Court of Appeal discusses and issues a judgment on each case brought before the court. The decision can then either postpone the case (whereby the case is forwarded to the competent Prosecutor's Office for further processing), or convict/ acquit the defendants. When the case is forwarded to the competent Prosecutor's Office (after a postponement), it is uncertain if and when it will go back to the court for discussion. Criminal cases cannot be tracked down throughout the different stages of the criminal procedure at present. With the Integrated Civil and Criminal Court Case Management System (OSDDY-PP)- Phase A', which was completed in March 2019 for 41 courts of the State, an integrated information system is implemented, which includes individual applications (subsystems) to support the operational functioning of the units of all levels of the courts involved in the flow of every case (criminal and civil), allowing the extraction of the relevant data.

Q094 (2018): To give a brief overview of the national criminal procedure, criminal cases are filed for admission in the Public Prosecutor's Office, where they are further investigated. If a prosecution is initiated, the cases are discussed in court. The Court of First Instance or the Court of Appeal discusses and issues a judgment on each case brought before the court. The decision can then either postpone the case (whereby the case is forwarded to the competent Prosecutor's Office for further processing), or convict/ acquit the defendants. When the case is forwarded to the competent Prosecutor's Office (after a postponement), it is uncertain if and when it will go back to the court for discussion. Criminal cases cannot be tracked down throughout the different stages of the criminal procedure at present. With the Integrated Civil and Criminal Court Case Management System (OSDDY-PP)- Phase A', which was completed in March 2019 for 41 courts of the State, an integrated information system is implemented, which includes individual applications (subsystems) to support the operational functioning of the units of all levels of the courts involved in the flow of every case (criminal and civil), allowing the extraction of the relevant data.

Q094 (2016): Filling in the requested information regarding the criminal procedure is not possible at the moment. To give a brief overview of the national criminal procedure, criminal cases are filed for admission in the Public Prosecutor's Office, where they are further investigated. If a prosecution is initiated, the cases are discussed in court. The Court of First Instance or the Court of Appeal discusses and issues a judgment on each case brought before the court. The decision can then either postpone the case (whereby the case is forwarded to the competent Prosecutor's Office for further processing), or convict/ acquit the defendants. When the case is forwarded to the competent Prosecutor's Office (after a postponement), it is uncertain if and when it will go back to the court for discussion. Criminal cases cannot be tracked down throughout the different stages of the criminal procedure at present. With the Integrated Civil and Criminal Court Case Management System (OSDDY-PP)- Phase A', which is expected to be completed by November 2018, an integrated information system will be implemented, which will include individual applications (subsystems) to support the operational functioning of the units of all levels of the courts involved in the flow of every case (criminal and civil), allowing the extraction of the relevant data. For 2016 the available data regarding the criminal procedure are as follows: Courts of First Instance: Criminal Cases Discussed: 473.457, Convictions/Acquittals: 206.311, Postponements: 262.433, Courts of Appeal: Criminal Cases Discussed: 59.643, Convictions/Acquittals: 24.995, Postponements: 33.601

Q097 (2024): Independent Department for the Collection and Processing of Judicial Statistical Data (JustStat).
Concerning the increased number of incoming and especially resolved civil litigious cases at the appeal level, it should be noted that he implementation of the new judicial map in Greece (Law 5134/2024) introduced structural changes that affected the distribution and classification of civil cases, as jurisdictional adjustments led to the transfer of certain case types to lower courts.

Q097 (2023): The data are provided by the Office for the collection and processing of judicial statistics.
"Civil litigious cases": in 2022 and because of the partial closure of the courts, cases were arriving for a second-degree trial but not being heard. Cases not heard in 2022 were postponed to 2023. We believe that this, combined with the simultaneous full operation of the courts, resulted in a reduction in the percentage of cases ultimately resolved in the appellate courts and a concomitant increase in Disposition Time.
Concerning the decrease in the number of civil litigious cases pending for more than 2 years, it should be recalled that during the Covid-19 pandemic period, which was declared by the WHO on 11/03/2020, the prevention and management measures for the virus were implemented in Greece on 11 March. These measures also affected the functioning of the courts and civil courts, as most cases, especially civil cases, were suspended. The measures were fully implemented on 15 March 2022, when the functioning of the courts gradually started to normalise. During this period, judicial officers were given the opportunity and time to process cases that had been backlogged during the previous period. This resulted in a reduction in the number of pending cases in civil and criminal courts, which is reflected in the statistics for the year 2023.

Q097 (2022): The data has been provided by the office for the collection and processing of judicial statistics.
It is worth highlighting that comparisons with previous data/cycles are not relevant. Indeed, since last year, measures have been taken to improve the system for collecting statistical data, such as the training of staff and the creation of an instructional manual guide with definitions and instructions. These measures were intended to help collecting more reliable data from both small and large courts and prosecution services and eliminate the standard errors in judicial statistics. As our methodology is developing, discrepancies in data can be observed. Besides, as regards “Other cases”, it should be mentioned that some types of cases that were previously included in this category, are now distributed in the other case-categories in the table.

Q097 (2021): The data are from the Statistical Service of the Ministry of Justice.
The data has been collected from the 19 out of 19 Courts of Appeal in Greece.
Business registry cases do not belong anymore to the case of the courts, there is new department of a different Ministry.

Q097 (2020): Due to the pandemic, pending cases have accumulated in the courts of first instance, with the result that the courts of second instance have fewer cases to handle.
The data given for questions 97 and 98 are collected from all second instance courts. However, many fields are answered NA as only few data were collected from the second instance Courts.

Q097 (2019): The Council of State did not provide the Ministry of Justice with data regarding the Administrative law cases

Q097 (2017): Concerning Civil and Commercial litigious cases but also administrative law cases, the numbers are different from those provided in the 2016 questionnaire due to the recent operation of the OSDDY-PP and OSDDY-DD Integrated Management Systems (please see the comments provided for Q91).
Variations in the number of resolved cases are explained by the fact that in 2017 the function of the courts was not affected by the strike of the lawyers, which took place in 2016.

Q097 (2016): Any deviations from the 2015 figures are due to a new way of collecting statistics. In fact, in 2016, a working group was set up to update and simplify the content of the statistical data requested by the judicial services of the country. The working group created tables followed by detailed instructions and training in relation to the requested information. According to the instructions given to the courts, some procedures they handle, in those which there is no participation of a judge, are not included in the data collected. In addition, in 2016 a long-term abstention by the lawyers of the country took place, resulting in reduction of numbers regarding the cases.

Q098 (2024): Independent Department for the Collection and Processing of Judicial Statistical Data (JustStat)

Q098 (2023): The data are provided by the Office for the collection and processing of judicial statistics.
The observed variations in the figures should be construed in the light of the pandemic context. In the year 2022, courts were, even for part of the year, under a restricted regime due to the measures implemented in Greece to contain the Covid-19 pandemic. This gave the judges the opportunity, alongside new cases, to deal with cases that had already been heard. At the same time, however, due to the courts not being fully operational, the number of cases to be pending increased at the end of 2022, which were transferred for adjudication in 2023, when the courts were fully operational and consequently the flow of judgments was limited. Moreover, it should be considered that there were 3 consecutive elections in Greece in 2023, which resulted in the suspension of the courts for about 3 months in total.

Q098 (2022): The data has been provided by the office for the collection and processing of judicial statistics.
It is worth highlighting that comparisons with previous data/cycles are not relevant. Indeed, since last year, measures have been taken to improve the system for collecting statistical data. The content of the categories of criminal cases in the table are the same as for the previous evaluation cycle, but the services now monitor and record these cases better so discrepancies in data can be observed. This is especially the case for the Misdemeanour and / or minor criminal cases.

Q098 (2021): The data are from the Statistical Service of the Ministry of Justice. The courts function in cooperation with the prosecutions offices. For example, postponed cases get to the prosecutor offices and then to the courts, in repeat 2-3 times, during the period (year). The definition of the pending cases included postponed cases or the cases for which the trial date has been setting out of the refence year or hasn’t been determined during the year. The data has been collected from 19 out of 19 Courts of Appeal in Greece.

Q098 (2020): Due to the pandemic, pending cases have accumulated in the courts of first instance, with the result that the courts of second instance have fewer cases to handle.
The data given for questions 97 and 98 are collected from all second instance courts. However, many fields are answered NA as only few data were collected from the second instance Courts.

Q098 (2018): To give a brief overview of the national criminal procedure, criminal cases are filed for admission in the Public Prosecutor's Office, where they are further investigated. If a prosecution is initiated, the cases are discussed in court. The Court of First Instance or the Court of Appeal discusses and issues a judgment on each case brought before the court. The decision can then either postpone the case (whereby the case is forwarded to the competent Prosecutor's Office for further processing), or convict/ acquit the defendants. When the case is forwarded to the competent Prosecutor's Office (after a postponement), it is uncertain if and when it will go back to the court for discussion. Criminal cases cannot be tracked down throughout the different stages of the criminal procedure at present. With the Integrated Civil and Criminal Court Case Management System (OSDDY-PP)- Phase A', which was completed in March 2019 for 41 courts of the State, an integrated information system is implemented, which includes individual applications (subsystems) to support the operational functioning of the units of all levels of the courts involved in the flow of every case (criminal and civil), allowing the extraction of the relevant data.

Q098 (2016): Filling in the requested information regarding the criminal procedure is not possible at the moment. To give a brief overview of the national criminal procedure, criminal cases are filed for admission in the Public Prosecutor's Office, where they are further investigated. If a prosecution is initiated, the cases are discussed in court. The Court of First Instance or the Court of Appeal discusses and issues a judgment on each case brought before the court. The decision can then either postpone the case (whereby the case is forwarded to the competent Prosecutor's Office for further processing), or convict/ acquit the defendants. When the case is forwarded to the competent Prosecutor's Office (after a postponement), it is uncertain if and when it will go back to the court for discussion. Criminal cases cannot be tracked down throughout the different stages of the criminal procedure at present. With the Integrated Civil and Criminal Court Case Management System (OSDDY-PP)- Phase A', which is expected to be completed by November 2018, an integrated information system will be implemented, which will include individual applications (subsystems) to support the operational functioning of the units of all levels of the courts involved in the flow of every case (criminal and civil), allowing the extraction of the relevant data. For 2016 the available data regarding the criminal procedure are as follows: Courts of First Instance: Criminal Cases Discussed: 473.457, Convictions/Acquittals: 206.311, Postponements: 262.433, Courts of Appeal: Criminal Cases Discussed: 59.643, Convictions/Acquittals: 24.995, Postponements: 33.601

Q099 (General Comment): After relevant communication with the IT department of the Supreme Court, it was clarified to us that "Due to changes in the OSDYPP of the Supreme Court, it is no longer possible to calculate Pending cases older than 2 years.
Q099 (2024): Independent Department for the Collection and Processing of Judicial Statistical Data (JustStat)
Starting from 2024, cases dealt with by the Court of Audit are also included within the category "administrative law cases" together with cases dealt with by the Council of State.
Q099 (2023): For the reference year (2023) the data on the total of non-criminal cases dealt with by the Supreme court :2 728 pending at the beginning of 2023, 2 399 incoming, 1 915 resolved and 3 212 pending at the end of 2023,103 pending older than 2 years from the date the case came to the Supreme Court.
Q099 (2022): It is worth highlighting that comparisons with previous data/cycles are not relevant. Indeed, since last year, measures have been taken to improve the system for collecting statistical data, such as the training of staff and the creation of an instructional manual guide with definitions and instructions. These measures were intended to help collecting more reliable data from both small and large courts and prosecution services and eliminate the standard errors in judicial statistics. As our methodology is developing, discrepancies in data can be observed. Besides, as regards "Other cases", it should be mentioned that some types of cases that were previously included in this category, are now distributed in the other case-categories in the table.
Q099 (2021): The fact is that Supreme Court couldn't split the number of civil cases on each category provided in the table. The correct numbers for Categories 1+2 are the following: 2300 pending cases on 1 Jan. ref. year, 2 644 incoming cases, 2 262 resolved cases and 2 682 Pending cases on 31 Dec. ref. year.

Q099 (2020): No data were collected from Supreme Courts regarding incoming and resolved cases. Therefore, we were unable to provide the relevant evaluable data.
Q099 (2018): "the discrepancy between the number of the resolved cases of 2017 and of 2018 for administrative law cases is due to the combination of the following factors:
-in 2018 a number of difficult cases, that had to do with the system of social insurance, was about to be completed
-lawyers become familiar with the filters regarding the cassation and its strict prerequisites, which lead to less rejections of cases as inadmissible and subsequently to a higher number of cases being discussed as far as their real facts are concerned.
-for the abovementioned reason the fast procedure provided for by the relevant code of procedure is not so often implemented
-there are still vacant places of councellors of state, i.e. of the highest rank."

Q099 (2017): "Administrative law cases": the number of incoming cases decreased in mainly two sections of the Council of State (i.e. section b for tax issues (-239 cases) and section d for general issues (-692)).

Q099 (2016): Previous data concerning the total did not include administrative law cases.

Q100 (General Comment): After relevant communication with the IT department of the Supreme Court, it was clarified to us that "Due to changes in the OSDYPP of the Supreme Court, it is no longer possible to calculate Pending cases older than 2 years.

Q100 (2024): Independent Department for the Collection and Processing of Judicial Statistical Data (JustStat)

Q100 (2022): It is worth highlighting that comparisons with previous data/cycles are not relevant. Indeed, since last year, measures have been taken to improve the system for collecting statistical data. The content of the categories of criminal cases in the table are the same as for the previous evaluation cycle, but the services now monitor and record these cases better so discrepancies in data can be observed. This is especially the case for the Misdemeanour and / or minor criminal cases.

Q100 (2021): There are no Other criminal cases at the level of the Supreme Court, these proceedings appear only at First instance and Appeals courts and prosecutors' offices, therefore category 3. should be NAP.

Q100 (2020): There were no data collected for this question.

Q100 (2016): With regard to the category "pending cases on 1 January 2016", the abnormality of the figures is due to the fact that the postponed cases because of the abstention of the lawyers in 2015 were not considered as pending to the backlog of the court.
In 2016 a long-term abstention by the lawyers of the country took place, resulting in reduction of the number of resolved criminal law cases. Accordingly, the number of pending criminal law cases increased.

Hungary

Q091 (2024): Discrepancy explanation:
2.2. The reason for the change is the modification of the data specified in point 2.2.2.
2.2.2. The number of cases that remained pending at the beginning of the year was summarized, amounting to 20,159 cases in 2024 and 26,634 cases in 2023.
3. The percentage difference can be explained by the low numerical value based on the data compared to the previous year. (57 cases)
4. Labour cases as well as insolvency cases were consolidated. The number of pending cases at the beginning of the year was 46.83% higher in 2024 (26,813 cases) compared to the previous year (18,261 cases).

Q091 (2023): Discrepancy explanation regarding point "4. Other cases":
Due to emergency measures in 2020/2021, certain involuntary cancellation procedures were suspended by law, leading to a decline in their numbers. With the resumption of these procedures in 2022 – since they were mostly continued as insolvency cases - the number of incoming procedures has significantly increased.

Q091 (2021): The number of incoming cases decreased in general and the situation was the same for administrative cases. As the number of incoming cases decreased and the courts were able to finish more cases than the number of the "new" cases, the backlog was reduced.

Q091 (2020): The pandemic situation had a huge effect on the case flow of the courts on every level of the court system. Special regulations were adopted by the legislator to promote videoconferencing and the courts were "closed between the 16th of March and the 31th of March (during this period no procedural events could be performed at the courts). Although the courts carried out their main activities, many cases were prolonged e.g. because the parties were not able to attend the hearings. Regarding administrative cases the re-organization of administrative jurisdiction also could have an effect on the case-flow.

Q091 (2018): One of the reasons of the decreasing number of incoming cases is the new civil procedural code coming into force on the 1st of January 2018. This resulted that many of those parties (especially those who were represented by lawyer) who had the chance to do so, filed their petition before the end of 2017 under the scope of the old and well-known procedural code. Regarding the discrepancy between 2017 and 2018 in the number of registry cases, it is due to the fact that for the first time in 2018, the number of non-litigious business registry cases is available.

Q091 (2017): Regarding the categories "2.1 general civil (and commercial) non-litigious cases", and "4. other cases" the number of pending cases on 1st of January differ from the closing number of the previous year because of data collection problems at certain regional courts.
In the category "registry cases" the higher number of incoming and resolved cases in 2016 was the result of a large number of involuntary dissolution cases. As the courts finished these cases and backlog cases from previous years the number of resolved cases in 2016 was higher than incoming cases in contrast with 2017.

Q091 (2016): In category "4. other cases" there is a difference between the number of pending cases on 31 December 2015 and the number of pending cases on 1 January 2016. The cause of this difference is the change of the IT system and the cleansing of the database.
2.1 General civil and commercial non-litigious cases: there was a change in the statistical methodology at the largest regional court that caused a difference in the figures pertaining to pending cases on 1 January 2016.
2.2.3. “other registry cases” include registration of civil societies.
The increase in the number of general civil (commercial) non litigious cases pending on 1 January 2016 is due to the change in the statistical methodology at the largest regional court that caused a difference in the figures.
The number of incoming “other registry cases” increased between 2014 and 2016 because of the increasing number of registry cases of civil societies. Accordingly, the number of resolved “other registry cases” increased also for the same period. With regard to the category “other non-litigious cases”, the increased numbers characterizing the period 2014-2016 are the consequence of the increasing number of court mediation cases and non-litigious labour cases.

Q091 (2015): There is a difference between the number of pending cases on 31 December 2014 and the number of pending cases on 1 January 2015. The cause of this difference is the change of the calculation method at some regional courts.

The category “civil and commercial non-litigious cases” includes all cases that are not concluded through the rules of the civil procedure, but through a more or less simplified procedure. Thus, there is a very wide range of related categories set forth by the Civil Procedure Code or other acts. For example, a reference was made to: exclusion of a judge; preliminary verification; issuance of a restraining order and review of that; declaration of dead; declaration of missing; revision of the medical care of mentally disordered patients, deposit at the court; company registration procedures; registration of associations, foundations etc.

The category “other registry cases” include registration of civil societies.

The category “other non-litigious cases” include court mediation and non-litigious labour cases.

The category "other" include Insolvency cases and labour cases.

Q091 (2014): In 2014, in contrast with the 2013 evaluation, some registration cases as well as non-litigious enforcement cases were also included within the category “civil and commercial non-litigious cases”. The item “other registry cases” includes registration of civil societies. The item “other non-litigious cases” includes court mediation and non-litigious labour cases. Before 2013, non-litigious administrative law cases were counted as “non-litigious civil and commercial cases”. Since 2013, non-litigious and litigious administrative law cases are provided together. The increased number of investigations conducted by administrative authorities (e.g. tax authorities) resulted in an increased number of reviews against these decisions.

Q094 (General Comment): Criminal offences are severe or minor crimes. Severe crimes (bűntett) are committed intentionally and are punishable with at least two years of imprisonment. All other criminal offences are minor crimes (vétség). Crimes that are not committed intentionally are always considered as minor crimes, despite the possible punishment.
Misdemeanours (szabálysértés) are not considered as criminal offences, but are unlawful acts that are endangering the society. The authorities intervening in their respect are the police, the district office, or the National Tax and Customs Office. Their decisions can be reviewed by the relevant section of the respective district court upon request of the accused person. Generally, the court rules without oral hearings, based upon the available documents. However, it can set a hearing if it finds it necessary or if the person charged by a misdemeanor requests it. The judgment is a final and enforceable decision.
It is noteworthy that the Hungarian law identifies also the category of civil offences encompassing offences mainly against public administration. However some criminal offenses, such as property crimes involving objects of small value (under 50000 HUF), are classified in this category as well. Civil offences fall under the jurisdiction of various administrative agencies, local governments or traffic police, but not the courts.
Concerning the methodology of presentation of data, as according to the Hungarian Criminal Code not only severe crimes (bűntett), but also almost every minor crime (vétség) are punishable with imprisonment, both categories were included into the category “severe criminal cases”. Thus misdemeanors (szabálysértés) were included into the category “minor criminal cases”.

Q094 (2024): Discrepancy explanation:
Total: The difference is due to the change explained in the subpoints, which has affected the overall result as well.
1. At the end of 2023, there were 1,322 cases pending for more than two years, which increased by 30.79% to 1,729 cases by the end of 2024.
2. With regard to misdemeanour cases, at the end of 2024 there were 27,600 pending cases, which is 28.66% more compared to the previous year.

Q094 (2022): As misdemeanour cases have very strict deadlines, the number of resolved cases strongly correlates with the number of incoming cases. The decrease of incoming cases may be a result of the end of the pandemic as misdemeanours in connection with it "disappeared" as well.
Q094 (2021): New types of misdemeanours were introduced into the legal system in accordance with the measures taken against the COVID-19 pandemic. As the number of incoming cases increased the number of resolved cases increased as well.

Q094 (2018): Criminal offences are severe or minor crimes. Severe crimes are commited intenitionally and are punishable with at least two years of imprisonment. All other criminal offences are minor crimes.
Misdemanours are not considered as criminal offences, but are unlawful acts that are endangering the society.

Q094 (2014): The increase in the number of incoming misdemeanour cases in 2012 and 2014 is the consequence of an amendment of the relevant legislation. This increase resulted also in higher numbers of resolved and pending cases.

Q097 (2024): Other cases: insolvency cases, labour cases.
Discrepancy explanation:
Total: The difference is due to the change explained in the subpoints, which has affected the overall result as well.
1. The percentage difference can be explained by the low numerical value (at the end of 2023 5 cases, at the end of 2024 7 cases).
2.2. (2.2.2. and 2.2.3.), 2.3., 3., 4. We have verified the data, and they correspond to our records.
3. Administrative law cases pending for more than 2 years - There is currently no such case within the court system; therefore, the number is 0.

Q097 (2023): Discrepancy explanation regarding point "2.2. Registry cases" and "2.2.2. Non-litigious business registry":
The change in the data described in point 2.2.2. can also be explained with the same reasons mentioned in question 091 point 4., which also affects the data in point 2.2.
Discrepancy explanation regarding point "3. Administrative law cases":
In administrative law cases the 2022 data exclusively included regional court cases, which had concluded by the end of 2022. Due to jurisdictional changes, the current data displays regional court of appeal cases.

Q097 (2021): As of 1 April 2020, a significant change was introduced concerning the competence of the Administrative Chamber. As a result of this change, all legal remedies sought for in administrative disputes were decided by the Curia after 1 April 2020. Other cases: second instance labour cases and those second instance insolvency cases that are not included in category 2.1.
Q097 (2020): The pandemic situation had a huge effect on the case flow of the courts on every level of the court system. Special regulations were adopted by the legislator to promote videoconferencing and the courts were "closed between the 16th of March and the 31th of March (during this period no procedural events could be performed at the courts). Although the courts carried out their main activities, many cases were prolonged e.g. because the parties were not able to attend the hearings. Regarding administrative cases the re-organization of administrative jurisdiction also could have an effect on the case-flow.

Q097 (2019): No specific reason was pointed out in respect of decreases observed for the period 2018 - 2019 with regard to "4. other cases".
Q097 (2017): With regard to variations observed in the numbers of “registry cases” and “other registry cases”, it is noteworthy that the content of these categories is the same for the last four cycles. As the legislation on civil societies was amended in 2014 this resulted in an increased number of registry cases, but since then the number of incoming cases is decreasing.

Q097 (2016): With regard to the pending cases, it is noteworthy specifying that the decrease of the “backlog” of the courts is an overall trend in the Hungarian judiciary.
As for the other variations observed within the frame of question 97, the “raw” figures in most of the categories can be considered as relatively low figures (e.g. some hundreds in the whole country), so even a not so huge increase or decrease result in a large percentage change.

Q097 (2014): In 2014, in contrast with the 2013 evaluation, some registration cases were also included within the category “civil and commercial non-litigious cases”. The item “other registry cases” includes registration of civil societies. The item “other non-litigious cases” includes court mediation and non-litigious labour cases.
The category “other” encompasses insolvency cases and labour cases.

Q098 (2024): Discrepancy explanation:
Total: The difference is due to the change explained in the subpoints, which has affected the overall result as well.
1. The percentage difference can be explained by the low numerical value. At the end of 2024, there were 6 cases, while a year earlier there were 4 cases.
2. The percentage difference can be explained by the low numerical value. At the beginning of 2024, there were 13 pending cases, which is 38.1% fewer compared to 2023 (21 cases)

Q098 (2021): As it was mentioned at the first instance, the introduction of new types of misdemeanours resulted in a higher number of incoming cases. As a result of the increase of incoming cases the number of resolved cases was also higher.

Q098 (2014): The increases over the period 2010-2014 regarding misdemeanour and/or minor criminal cases, is due to the constant increase of incoming and resolved first instance cases starting from 2010, which led to the increase in the number of second instance incoming cases.
Q099 (2024): Other cases: insolvency cases, labour cases
Discrepancy explanation concerning point 1. (civil litigious cases) and 2. (non-litigious cases):
The reason for the discrepancy between the data in the report and the data submitted in the previous year is not caused by a change in the legal environment, but rather the caseload in 2024, over which the Supreme Court has no influence.
Discrepancy explanation concerning point 3. (administrative law cases):
The differences indicated under Point 3 are explained solely by the changing nature and variability of the number of cases received. Unlike in previous years, there were no changes in legislation that would have affected the aforementioned data.

Q099 (2023): Discrepancy explanation concerning point 1. (civil litigious cases) and 2. (non-litigious cases)
The discrepancies reported by the CEPEJ in the context of the questionnaire for the EU Justice Scoreboard can be explained as follows.
Firstly, it should be noted that the procedural rules affecting the caseload have not changed in 2023, and consequently the explanation for the 2022 divergencies remains valid. (The decrease in the number of the so-called general civil litigious and non-litigious cases is due to several reasons. The most significant of these is the year-on-year decrease in the number of legal actions filed under the new Code of Civil Procedure, which entered into force on 1 January 2018. This is due, among others, to the increased role of diversionary procedures in the resolution of private disputes, such as mediation and the tripling of the threshold below which a property claim can be enforced by means of the issuing of a payment order by a notary public, i.e. in the framework of an out-of-court non-litigious procedure.)
This leads to the further conclusion that the decline in the number of new cases on a national level has led to an acceleration of case completions at all court levels, with the result that the number of completed cases is higher than that of newly received cases. The inevitable consequence of the foregoing is the trend of a fall in the number of cases pending at the end of the year. This explains why the number of 877 civil (and commercial) court proceedings pending on 1 January 2022 fell to 653 at the end of the same year, the latter figure being the starting number on 1 January 2023. (In the year 2022, the Curia received 1 846 new cases and completed 2 070 cases.) The same trend continued in the year 2023. (In 2023, the Curia received 1 772 new cases and completed 1 872 cases, as a result of which the number of pending cases decreased to 553 by the end of that year.)
Secondly, the vast majority of the cases under point 2.1, which make up the bulk of the data on non litigious proceedings [93 percent (359:385)], are cases concerning the designation of a court, typically referred to the Curia for the exclusion of a court. In this group of cases, the caseload is completely unpredictable and may, in some cases, be significantly different from the reference period due to the large number of proceedings initiated by a litigant.
For cases under point 2.2 and within subpoints 2.2.2, 2.2.3 and likewise for cases under 2.3, the caseload is extremely low (the Curia cannot even hear a case under subpoint 2.2.1) due to the rules of jurisdiction applicable to the Curia as the country's supreme judicial forum. The cases falling under the above categories represent – in respect of the newly received cases – only 10 percent (39:385) of all non-litigious cases. Given the small number of cases received, the minimal numerical discrepancy entails a relatively large percentage difference. In reality, therefore, there is no significant change in the caseload behind the relatively large percentage difference. In concrete terms, this means that in 2023 there were only 13 fewer cases in these case groups compared to the previous year. When assessing these figures, it should be noted that less than 2 percent of the 2 170 cases (Source: Curia Yearbook 2023) dealt with by the Civil Chamber of the Curia, not counting the 147 labour cases also dealt with by the Civil Chamber, are cases under points 2.2 and 2.3.
Discrepancy explanation concerning point 3. (administrative law cases):
The scoreboard, based on 2023 data, showed that the

number of cases pending, received and terminated on 1 January 2023 and the number of cases pending on 31 December 2023 decreased compared to the data provided in the previous year. The reason is that, in 2022, the performance of the adjudicative function of the Curia and its activity in the field of creating uniformed case law was affected by a legislative change. In 2021, the Curia was given competence to hear appeals, as a court of second instance, in administrative disputes, making the Curia a general court of second instance with jurisdiction over administrative cases throughout Hungary. In addition, the Curia also continued to act as a court of cassation. By the Autumn of 2021, the Curia had become the most overloaded court in the country. With the aim of reducing the Curia's caseload, the Parliament enacted Act no. CXXXIV of 2021, which provided that the regional appellate courts should be included in the second instance adjudication of administrative cases. As a result of the legislative change, effective from 1 March 2022, the Regional Appellate Court of Budapest, which has an Administrative Chamber, is to act as a general court of second instance in administrative cases. As the Curia has not transferred any of its pending administrative cases, the reduction of its caseload has been carried out gradually, in a so-called ascending order. The reduction of the caseload due to the legislative change was first shown in the data for 2023.

Q099 (2022): The justification for the changes is related to the fact that in the year 2021, the Curia's remedial powers – due to a law amendment effective from April 1, 2020 – extended to the second instance adjudication of legal disputes in public administrative cases, thus the Curia became the general court of second instance with nationwide jurisdiction in administrative matters. In addition, the Curia continued to operate as a review court, if the conditions for review as specified in the Act on Administrative Procedures were fulfilled in the given case. By the autumn of 2021, the Curia faced the highest workload throughout the country.
To stop the above trend, which has become critical, the legislator adopted Act CXXXIV of 2021 in which the legislator provided for that the level of regional courts of appeal should be involved in the second instance adjudication of administrative case. As a result of the amendment, effective as of 1 March 2022, the levels of judicial forums hearing administrative cases have changed. High courts having an administrative chamber will be general courts of first instance in administrative matters. The Curia has original jurisdiction in exceptional cases set out by law. Regional courts of appeal having an administrative chamber will be general courts of second instance. Thus, the abovementioned Act has provided for that it falls within the responsibilities of regional courts of appeal to hear cases at the ordinary appeal stage, and it has also provided for exclusive geographical jurisdiction, which means that the Act has reinstituted the second instance (appellate) jurisdiction of Budapest Capital Regional Court of Appeal in administrative matters.
The decrease in the number of the so-called general civil litigious and non-litigious cases can be traced back to several reasons. The most significant of these is that under the scope of the new Civil Procedure Code, which entered into force on January 1, 2018, the number of lawsuits is decreasing every year. Among other things, this is related to the fact that litigation diversion procedures, such as mediation, play a greater role than before in the settlement of private law disputes, and the value limit below which a property claim can be enforced with a payment order before a notary, i.e., in an out-of-court, non-litigation procedure, has tripled. As a result of all this, the timeliness indicators of the lower courts have improved continuously in recent years, which means that the number of protracted, more difficult decisions that can be challenged before the Curia as the highest court is decreasing.
The number of completions is basically determined by the volume of cases received, and although they show a decrease compared to the previous year, they significantly exceed the number of cases received, even though the number of judges handling such cases has decreased due to retirement.
We do not consider it justified to examine the reduction in the number of received and completed cases in so-called general civil (and commercial) non-litigious cases by itself. In relation to the case groups indicated for the so-called general civil (and commercial) non-litigious cases, the number of cases received and completed changes continuously every year, which make up a fraction of all cases received by the Curia. Comparing the 2022 data with the 2020 data, it can be seen that in the indicated case group, fewer such cases were received in 2020 than in the current year, so the number of civil non-litigious cases received in 2021 was different from the average. Taking into accou

nt the general rules of statistics, the highlighting of some data may result in inadequate conclusions.
Our data collection methodology has not changed from the previous cycles. It is therefore recommended that we keep the data as it is, otherwise, the data provided will not be comparable with those of previous years.

Q099 (2021): Other cases: insolvency cases, review procedures in labour cases, uniformity complaints
Administrative Chamber
As of 1 April 2020, a significant change was introduced concerning the competence of the Administrative Chamber. As a result of this change, all legal remedies sought for in administrative disputes were decided by the Curia after 1 April 2020. This caused a significant increase in the caseload which was substantially higher than any number of incoming cases in the previous years, regarding the year 2021 as a whole. The change in the competences had an impact for the whole year 2021, due to which administrative legal remedy cases accounted for almost half of the total number of incoming cases at the Curia. Because of the change, the number of administrative judges was increased, and the increased judicial staff managed to resolve the surplus in a timely manner.
Civil Chamber
In comparison to 2020 data, the increase in the number of incoming civil and commercial litigious (line 1) can be explained by the fact that the incoming appeal (second instance) cases were higher by almost 40%. Regarding the appeal cases, the Curia experienced a temporary fallback in 2020; however, as the pandemic situation got better, lower courts could resolve more cases. So, the increase experienced in 2021 is explained by the low base value in 2020, as well as by the improvement in the COVID-19 pandemic situation.
The increase in the number of incoming general civil non-litigious cases (line 2.2.1) can be explained by the increase of cases initiated for the designation of the competent court to two and a half times. Despite the fact that the Civil Division of the Civil Chamber had resolved two times more cases than in the previous year, still there was a significant number of 'designation cases' remained pending.
2.1. Civil and commercial non-litigious cases referred to the Curia through an appeal or a petition for review, cases concerning recusal of judges, cases concerning the designation of the competent court, cases concerning an objection filed because of allegedly excessive duration of the proceedings.
2.2. This is an aggregate of the numbers reported under lines 2.2.1, 2.2.2, and 2.2.3.
2.2.2. Business registry cases referred to the Curia through an appeal or a petition for review.
2.2.3. Review proceedings concerning the registry of civil organizations and other non-profit organizations.
2.3. Review proceedings initiated in non-litigious labour cases, as well as non-litigious proceedings related to labour litigation, initiated for the designation of the competent court.

Q099 (2020): The pandemic situation had a huge effect on the case flow of the courts on every level of the court system. Special regulations were adopted by the legislator to promote videoconferencing and the courts were "closed between the 16th of March and the 31th of March (during this period no procedural events could be performed at the courts). Although the courts carried out their main activities, many cases were prolonged e.g. because the parties were not able to attend the hearings. Regarding administrative cases the re-organization of administrative jurisdiction also could have an effect on the case-flow.

Q099 (2017): The number of incoming cases decreased in most of the observed categories at the Supreme Court. This also resulted in a decrease in the number of resolved cases thus the number of pending cases increased.

Q099 (2016): Generally, the increase in the number of incoming cases at the Kúria (Hungarian Supreme Court) for 2016 is the result of the increasing use of extraordinary remedies by the parties. As the number of incoming cases increased, it resulted in an increase in the other categories as well.
Q099 (2014): In 2014, in contrast with the 2013 evaluation, some registration cases were also included within the category "civil and commercial non-litigious cases". The item "other registry cases" includes registration of civil societies. The item "other non-litigious cases" includes court mediation and non-litigious labour cases.
The category "other" encompasses insolvency cases and labour cases.
On the occasion of the 2014 exercise, it has been stressed that one of the main aims of the judicial reform of January 1, 2012 was that the President of the Supreme Court (Kúria) and the Supreme Court itself should focus more on the quality of judicial work. As the President of the Supreme Court was released from the burden of the central administration of the court system, the Kúria was able to reduce its backlog as well as to focus more on the consistency of the national jurisdiction.

Q100 (2021): In case of severe criminal cases, the fallback of the clearance rate can be explained on one hand by the pandemic situation; on the other hand, by the fact that in years 2020 and 2021, almost 50% of the judges of the Criminal Chamber retired. The vacant judicial positions were already filled. The increase in the number of motions for review can be explained by an increased activity of defendants and their defence counsels. Any objective reason for that increased activity cannot be established.

Ireland

Q091 (General Comment): Historically, the number of pending civil cases has not been recorded in caseload data, as many cases initiated before the Irish courts either settle out of court or are not proceeded with by the plaintiff/applicant without there being any procedural requirement that the parties inform the court of either a settlement or an intention not to proceed with the case. Civil (and commercial) non-litigious cases include proceedings not resolved inter partes, such as undefended pecuniary claims, deed poll applications, probate (grants of representation), wardship proceedings, registrations of enduring powers of attorney, appointment of care representatives, unopposed personal and corporate insolvency proceedings, liquor licencing applications and marriage notice exemption applications.
Administrative law cases are included in the number of Civil (and commercial) litigious cases.

Q091 (2024): Ireland does not have a separate category for Administrative Law cases. As such, administrative cases are included in the figure for Civil (and Commercial) litigious cases.
Q091 (2023): Ireland does not have a separate category for Administrative Law cases. As such, administrative cases are included in the figure for Civil (and Commercial) litigious cases.
Q091 (2022): The COVID pandemic had an effect on the courts' ability to deal with incoming business in 2020 especially, which explains the discrepancies with number of court cases in 2022.

Q091 (2021): As the Courts Service is not in a position to confirm to increase or decrease, we can note the following: There was a decrease in over 2,500 in personal injuries cases, recovery of debt cases overall decreased by about 1,500 cases and small claims decreased by 40 percent to 2,134, licensing was down 18 percent to 10,764. We can say it is very likely that ongoing covid restrictions contributed to this in licensing.
Q091 (2020): Reduction in non-litigious cases due to COVID-19 pandemic. During the most restrictive lockdowns, only essential proceedings could be dealt with, but as guidance allowed, case volume increased. Urgent and essential cases continued to be heard throughout. This included domestic violence and criminal proceedings. All written judgments were delivered electronically and published on the Courts Service website, courts.ie.
Attendance at Court offices was by appointment only to ensure that footfall could be safely managed.

Q091 (2017): We are not in a position to offer further comment on the figure for resolved Civil (and commercial) litigious cases. We are not in a position to offer further comment on variations in the number of incoming and resolved "other" cases.

Q091 (2016): The decrease in the number of incoming and resolved "other cases" observed for the period 2014 - 2016 is due to a sharp reduction on taxations of legal costs since 2014.
Q091 (2015): Category "other" includes: Taxation of bills of costs.
Q091 (2014): A substantial number of cases which have been completed (through settlement or non-pursuit of the case by the plaintiff without notice to the court) are not recorded and counted as completed. Consequently, the clearance rate appearing from the case flow data provided is considered to understate significantly the actual case clearance rate.

Q092 (2014): Starting 2014 the category: "Appointment of care representatives" was added to the "Civil (and commercial) non-litigious cases"
Q093 (2014): From 2014, the range of 'Other cases' has been revised to incorporate the category 'certificates of taxation of legal costs issued'. This can explain the fact that different elements have been included in the category 'other' in 2013 and 2014.
