ANNEX

to the

Proposal for a COUNCIL IMPLEMENTING DECISION

amending Implementing Decision (EU) (ST 10160/21; ST 10160/21 ADD 1 REV 2) of 13 July 2021 on the approval of the assessment of the recovery and resilience plan for Italy

[SWD(2023) 392 final]
ANNEX

1. DESCRIPTION OF REFORMS AND INVESTMENTS

A. MISSION 1 COMPONENT 1:

Axis 1 - Digitalization of the Public Administration: Axis 1 of component M1C1 of the Italian recovery and resilience plan contains measures that aim to foster the digitalisation of the Italian public administration and includes seven investments and three reforms. Investments aim in particular at: (i) rationalising and consolidating existing digital infrastructures of the public administration; (ii) fostering the uptake of cloud computing, (iii) with particular attention to the harmonisation and interoperability of platforms and data services, the implementation of the ‘once-only principle’ and the accessibility of data through a catalogue of Application Programming Interfaces (APIs); (iv) improving the availability, efficiency and accessibility of all digital public services with the aim of increasing the level of adoption and users’ satisfaction, (v) strengthening Italy’s defences against the risks posed by cybercrime, (vi) fostering the digital transformation of large central administrations; (vii) tackling the digital divide by strengthening citizens’ digital skills. Reforms under this axis aim in particular at (i) streamlining and accelerating the procurement process for Information and Communication Technologies (ICT) solutions by the public administration; (ii) supporting the digital transformation of the public administration, and (iii) removing obstacles to the adoption of cloud by public administrations and streamlining data exchange processes between public administrations.

The investments and reforms under this component shall contribute to addressing the Country-Specific Recommendations addressed to Italy in 2020 and 2019 on the need to “improve the effectiveness of public administration, including by investing in the skills of public employees, by accelerating digitalisation, and by increasing the efficiency and quality of local public services” (Country-Specific Recommendation 3, 2019), and to “focus investment on the green and digital transition, in particular on […] reinforced digital infrastructure to ensure the provision of essential services” (Country-Specific Recommendation 3, 2020).

Axis 2 - Justice: The performance of the Italian justice system remains far from that of other Member States in terms of duration of proceedings, as outlined in the latest report of the European Commission on the efficiency of justice (CEPEJ). Axis 2 of component M1C1 of the recovery and resilience plan contains measures that aim to make the judicial system more efficient by reducing the length of proceedings and bringing Italy closer to the EU median. This component addresses the Country-specific recommendations addressed to Italy in 2020 and 2019 on reducing the length of civil trials and on improving the effectiveness of the fight against corruption (Country-specific recommendations 4, 2019 and 4, 2020). Furthermore, the digitisation of the justice system is also relevant for the digital transition.

Axis 3 – Public administration: Axis 3 of component M1C1 of the recovery and resilience plan contains measures that aim to reform the Italian public administration and improve administrative capacity. Italy ranks below EU-27 average both for government effectiveness and for trust in government. Italian public administration reforms were affected by a serious implementation gap of top-down reforms and the scarce recognition and diffusion of valuable bottom-up innovations. Administrative capacity is very low. Efforts to strengthen the strategic planning capacity, monitoring and evaluation mechanisms, and evidence-based policymaking
instruments should continue. The main objective of this component is to enhance the administrative capacity of the Italian public administrations at central and local levels, both in terms of human capital (selection, competences, and careers) and in terms of simplification of administrative procedures. This section presents the overarching structural human resources strategy, ranging from the selection processes to career paths. The reform includes also actions to simplify procedures. Investments in new digital toolkits and strengthened actions on lifelong learning are included in Component 1 of Mission 1. This component addresses the Country-specific recommendations addressed to Italy in 2020 and 2019 on improving the effectiveness of public administration (Country-specific recommendation 3, 2019 and Country-specific recommendation 4, 2020).

Axis 4 – Public procurement and payments by the administration: Axis 4 of component M1C1 of the recovery and resilience plan contains measures that aim to reform certain key aspects of the Italian public procurement legislative framework and to reduce late payments by public administrations at central, regional and local, as well as regional health authorities. The main objective of the reform is to simplify public procurement rules, increase legal certainty for businesses and accelerate the award of public contracts while maintaining procedural guarantees in terms of transparency and equal treatment. These reforms support therefore the timely realization of the infrastructures and projects financed by the Plan.

Axis 5 – Fiscal-structural reforms (Taxation and public expenditure): Axis 5 of component M1C1 of the recovery and resilience includes several reforms aimed at supporting the sustainability of Italy’s public finances (country-specific recommendation 1, 2019). On the revenue side, the reforms aim at improving the tax collection process, encouraging tax compliance and fight tax evasion, in order to reduce compliance costs for taxpayers and increase revenues for the general government, contributing to improving the sustainability of public finances. On the expenditure side, the reforms aim at improving the efficiency of public expenditure, both at the central level, by strengthening the existing framework for yearly spending reviews, and at the subnational level, by completing the reform of fiscal relations across different levels of government.

A.1. Description of the reforms and investments for non-repayable financial support

Axis 1- Digitalization of the Public Administration

Investment 1.1 - Digital infrastructure

The aim of this investment is to ensure that the systems, datasets and applications of the public administration are hosted in highly reliable data centers, with high quality standards for security, performance, scalability, European interoperability and energy efficiency. For this purpose, the investment envisages the creation of a state of the art, fully-redundant, national cloud-based hybrid infrastructure (called ‘Polo Strategico Nazionale’, PSN), the certification of secure and scalable public cloud alternatives and the migration of the datasets and applications of the public administration to a cloud environment.

The PSN infrastructure is expected to be operated by a technological provider selected through a European tender and to be designed in adherence with the data interoperability standards defined at European level accordingly with Gaia-X initiative to allow the free exchange of non-personal data between the various Member States by interconnecting their national cloud
models. Similar requirements are expected to be adopted in the pre-qualification of public cloud providers.

The migration of the datasets and applications of the public administration towards the PSN or towards secure certified public cloud providers is expected to depend on the requirements for performance, scalability and sensitivity of data defined by the different administrations, each of which is expected to retain its independence in the development of applications and the management of data.

**Investment 1.3 - Data and interoperability**

The objective of this investment is to ensure the full interoperability of key datasets and services across central and local public administrations.

The measure envisages the development of a National Digital Data Platform (“Piattaforma Digitale Nazionale Dati”) that shall guarantee the interoperability of datasets through a catalogue of Application Programming Interfaces (APIs) shared across central and local administrations (Investment 1.3.1). When built, this platform shall guarantee the interoperability of datasets through a catalogue of Application Programming Interfaces (APIs) shared across central and local administrations. The Platform shall be fully compliant with EU law.

In addition, the measure shall establish a “Single Digital Gateway” in compliance with EU Regulation 2018/1724), that shall be run to help central and public administrations restructure prioritized procedures and enable the fulfilment of the “once-only” principle (Investment 1.3.2).

**Investment 1.5 - Cybersecurity**

The objective of this investment is to strengthen Italy’s defences against the risks posed by cybercrime, notably through the implementation of a ‘National Perimeter for Cyber Security’ (PSNC), in line with the security requirements set out in the Directive (EU) 2016/1148 on security of network and information systems (NIS Directive), and by strengthening national cyber-defence capabilities of technical inspection and risk monitoring.

The measure envisages the development of a state-of-the-art, integrated system, tightly interconnecting different entities across the country and connecting internationally with partners and trusted technology providers. This is articulated on four pillars: (i) Strengthen front line capabilities towards the public and companies/entities to manage alerts and actual publicly recognized events; (ii) Build/strengthen the country’s inspection and audit capabilities of hardware and software used by subjects with essential functions to certify trustworthiness/pre-empt threats; (iii) Power up units of law enforcement and cyber units within the Police forces in charge of investigations of criminal activities; (iv) Strengthen significantly cyber asset and human resources in charge of national security and response to cyber threats.

**Investment 1.7 - Basic digital skills**

The aim of this investment is to reduce the share of current population at risk of digital exclusion by launching the ‘Digital civil service’ initiative, a network of young volunteers of
different backgrounds across Italy to provide individuals at risk of digital exclusion with facilitation and education services for the development and improvement of digital skills (Investment 1.7.1) and by strengthening the existing network of ‘Digital facilitation centers’ (Investment 1.7.2).

Digital facilitation centers are physical access points, usually located in libraries, schools, and social centers, which provide citizens with both in-person and online training regarding digital skills in order to effectively support their digital inclusion. The initiative capitalizes on existing successful experiences and aims at ensuring a widespread development of such centers at national level. While 600 centers are already active, their presence shall be further strengthened through dedicated training activities and new equipment, with the overarching goal to establish 2,400 new access points across Italy and to train over 2 000 000 citizens at risk of digital exclusion. Out of 3 000 centers, about 1 200 shall be concentrated in the South of Italy.

The ‘Digital civil service’ initiative is divided into three years and incrementally, it is intended to achieve the following results: (i) realization of three annual calls for digital civil service projects aimed at non-profit organizations registered in the national register of universal civil service organizations; (ii) capacity building of the non-profit organizations participating in the annual call for the digital civil service and launch of digital facilitation and digital education projects; (iii) training and field experience in digital civil service projects of about 8 300 volunteers; provision of 700 000 digital facilitation and/or digital education initiatives involving citizens developed by the digital civil service projects in which 8 300 volunteers shall work.

Reform 1.1 - ICT Procurement

The objective of this reform is to ensure that the public administration may procure Information and Communication Technologies (ICT) solutions in a more timely and more efficient way by streamlining and accelerating the procurement process for ICT services and assets.

The implementation of the reform shall consist in three lines of actions. First, a single database containing a white list of economic operators authorized to provide goods and services to public administrations shall be set-up and a dedicated technological infrastructure shall be introduced to allow the certification of suppliers. Second, a simplified approach (“fast track”) to streamline ICT purchases for PNRR projects shall be adopted. Third, a digital procurement service shall be set up, with the aim to (i) include only certified suppliers (economic operators may request at any time to be certified in line with art. 64 of Directive 2014/24/EU); (ii) allow to quickly identify suppliers meeting a specified need (e.g. through a configurator); (iii) provide an intuitive user experience for administrations (e.g. clear description of the services offered, comparative evaluation of suppliers). This overall setup shall build on the existing capabilities of CONSIP, the Italian state entity for procurement.

Reform 1.2 - Transformation Support

The objective of this reform is to support the digital transformation of all central and local public administrations through the set-up of a dedicated “Digital PA transformation office”. The transformation office shall consist in a temporary technology competent resource pool that shall orchestrate and support the migration effort and the centralized negotiation of “packages” of certified external support. In addition, the measure envisages the set up a company focused on software development & operations management to support the digital step-up of central
administrations. The transformation office shall in particular support public administration in the implementation of Investments 1.1 to 1.7 included under this component and shall also support the implementation of investments and reforms in digitalization of healthcare included in Mission 6.

Reform 1.3 - Cloud First and interoperability

The aim of this reform is to remove the obstacles to cloud adoption and streamline the bureaucracy that slows down the data exchange processes between public administrations by introducing a set of incentives and obligations aimed at facilitating the migration to cloud and removing procedural constraints to the broad adoption of digital services.

The reform shall entail three lines of action. First, as cloud solutions shall drive cost efficiency in spending in Information and communication technology (ICT), after a predefined “grace period” (e.g. three-years after the launch of the transformation), administrations that did not adhere to the cloud transformation shall see a restriction in their ICT spending budget.

Second, as part of the incentives for cloud migration, the current public accounting rules for expenses related to cloud services shall be revised. Given that the migration to the cloud currently involves a transfer of budgets from capital expenditures to operational expenditures, public accounting rules for expenses related to cloud services shall be revised in order to not disincentivize cloud migration for public administrations.

Third, norms related to data interoperability rules shall be revised, in compliance with the provisions on open data and processing of personal data and current procedures for data exchange between public administrations shall be simplified to streamline procedural aspects and speed up the implementation of interoperability between public administration databases. Furthermore, digital domicile shall be reviewed and integrated with the national resident registry (ANPR) to allow certain and secure digital correspondence between citizens and public administrations.

Axis 2 - Justice

Reform 1.4 - Civil justice

The objective of the reform is mainly focused on reducing the length of civil proceedings by identifying a wide range of actions to reduce the number of incoming cases in courts, by simplifying existing procedures, by reducing the backlogs and by increasing the productivity of courts. The reduction of number of incoming cases in courts shall be achieved through strengthening mediation, alternative dispute resolution and arbitration and reviewing the current system of quantification and recoverability of legal fees. The simplification shall be pursued by strengthening ‘filtering procedures’ at the appeal level, extending the cases where a single judge is competent to adjudicate, securing the actual implementation of binding timeframes for procedures. Higher productivity of courts shall be achieved through a monitoring system and incentives to accomplish standard performance across courts. The reform also aims to reduce the backlog in civil courts through the temporary hiring and targeted actions, including incentive schemes to reduce the number of pending cases.

Reform 1.5 - Criminal justice
The reform is mainly aimed at reducing the length of criminal proceedings by identifying a wide range of actions by simplifying existing procedures and by increasing the productivity of courts. The simplification is pursued extending the application of simplified procedures, broadening the use of digital technology, defining time limits for the duration of preliminary investigation, reviewing the notification system to make it more effective. Higher productivity of courts is achieved through a monitoring system and incentives to accomplish standard performance across courts.

**Reform 1.6 - Insolvency**

The reform is aimed at digitalising and enhance insolvency proceedings introducing early warning mechanisms prior to insolvency, the specialisation of courts and pre-courts institutions to manage all phases of insolvency proceedings more effectively including through training and specialisation for members of the judicial and administrative authorities.

**Reform 1.7 - Tax courts**

The aim of the reform is to make the enforcement of tax law more effective and to decrease the high amount of appeals at the Court of Cassation.

**Reform 1.8 - Digitalisation of the justice system**

The reform envisages mandatory electronic filing of all documents and full electronic workflow for civil proceedings. It also targets the digitalisation of the first instance criminal proceedings excluding preliminary hearings. Lastly, it aims to introduce a free, fully accessible and searchable database of civil law decisions according to the legislation.

**Investment 1.8 - Recruitment procedures for civil, criminal and administrative courts**

Investments are aimed at acting in the near term on organizational factors in order to allow the reforms under development to generate results more quickly, maximising synergies while achieving a transformational change through the extraordinary resources provided under the plan.

The organizational tool, named ‘office of the trial’, consists of the establishment (or where already existing the strengthening) of support teams for the magistrates (through temporary hiring), with the aim of reducing the backlog and the disposition time in Italy.

This measure aims to improve the quality of justice by supporting the magistrates in the normal activities of study, legal research, drafting of acts, organization of the files and thereby enabling the judges to focus on the more complex tasks.

The organizational tool, named ‘office of the trial’, consists of the establishment (or where already existing the strengthening) of support teams for the magistrates (through temporary hiring), with the aim of reducing the backlog and the disposition time in Italy.

The investments shall also include hiring of technical and administrative personnel supporting the implementation of RRP objectives. The staff of the office of the trial and the technical administrative personnel shall support administrative, civil, criminal Courts and territorial and central services of the Ministry of Justice responsible for the implementation of the RRP. The
contracts of the unit of personnel have a duration of 3 years that can be extended until 30 June 2026.

The investment also comprises training to support the digital transition in the justice system.

**Axis 3 – Public administration**

**Reform 1.9 - Public employment reform and simplification reform**

Public employment reforms are following a two-staggered approach. In the short-term, urgent measures are adopted to make best use of RRF funding regarding the governance of the plan and the immediate assistance to the public administrations, lacking administrative capacity. This strategy is flanked with organisation reforms and a human resources strategy aimed at a transformational change for the public administration as a whole. A comprehensive set of measures is identified within the definition of human resources strategic plans to: updating job profiles (also in view of the twin transition); reforming hiring procedures to be more targeted and effective; reforming the senior civil service to homogenise appointment procedures across the public administration; strengthening the link between life-long learning and rewarding mechanisms or specific career paths; defining or updating ethics principles of public administrations; strengthening the commitment to gender balance; and reform of horizontal and vertical mobility of staff. The reform includes urgent measures to simplify administrative procedures to the benefit of businesses and citizens, while also ensuring the smooth implementation of the RRF.

The simplification reform shall eliminate authorizations not justified by imperative reasons of general interest, together with the elimination of unnecessary obligations or those that do not use new technologies. In addition, it shall implement the adoption of silent consent mechanism, the introduction of simple communication, and the adoption of uniform regimes shared with Regions and municipalities.

The simplification reform includes the following elements: the interoperability of Business and Construction procedures (SUAP & SUE); the implementation of a common set of outcome-oriented performance indicators; and the definition of a set of Key Performance Indicators (KPIs) to steer organizational change in administrations. The publication of the first report on KPIs shall be followed by the publication of subsequent reports every six months.

A repository system for monitoring the implementation of the RRF shall be in place and operational by the time of the submission of the first payment request.

**Reform 1.9.1 - Reform for accelerating the implementation of cohesion policy**

The reform aims to accelerating the implementation and efficiency of cohesion policy in complementarity with the NRRP. It shall take into account the strategic plan of the single special economic zone.

The national legislation requires the opinion of the Unified Conference before its conversion into Law as provided for in the Legislative Decree n°281/1997.
In accordance with Article 9 of Regulation (EU) 2021/241, the reform may receive support from other Union Programmes and instruments provided that such support does not cover the same cost. The RRF does not cover any costs of the reform.

**Investment 1.9 - Provide technical assistance and strengthen capacity building for the implementation of the Italian recovery and resilience plan**

The investment consists of the temporary recruitment of a pool of experts to provide technical assistance to the administrations and strengthen administrative capacity, notably at local level, for the implementation of specific RRP projects, to be deployed on a need basis. This investment also includes the training programmes of public employees within the scope of the strengthening of capacity building.

**Axis 4 – Public procurement and payments by public administrations**

**Reform 1.10 - Reform of the public procurement legislative framework**

The first step of this reform consists in the adoption of a first set of urgent simplification measures with a Law-Decree by May 2021 to: simplify and digitalize the procedures of central purchasing bodies; register contracts in the anti-corruption database of the national anti-corruption authority (ANAC); set up dedicated offices in charge of public procurement procedures at Ministries, Regions and Metropolitan Cities; setting a target to reduce the timing between the publication and contract award and between the award of the contract and the completion of the infrastructure; and incentivize alternative dispute resolution mechanisms in the execution phase of the contracts. Before the end of 2021, the Single Coordination Body for public procurement policy shall have an adequate level of staffing and shall adopt a professionalization strategy providing trainings at different levels; the dynamic purchasing systems shall be made available, in line with Public Procurement Directives; and ANAC shall complete the exercise of qualification of contracting authorities.

The second step of this reform consists in a set of amendments to the Public Procurement Code to be implemented by the second quarter of 2023, with actions aimed at: reducing the fragmentation of contracting authorities; requiring the setting of an e-platform as a basic requirement to participate in the nationwide evaluation of procurement capacity; and empowering the national anti-corruption authority to review the qualification of contracting authorities. The scope of the reform shall be also to further simplify and digitalize the procedures of central purchasing bodies and define interoperability and interconnectivity requirements. The reform shall also reduce the restrictions to the possibility to subcontracting, currently contained the Public Procurement Code.

This reform also consists in making the national e-Procurement System operational by the end of 2023 and introduce targeted actions, including through the adoption of primary and/or secondary legislation, to further enhance the qualification and professionalisation of contracting authorities and increase competition (e.g. modifying the applicable rules on project financing).

**Reform 1.11 - Reduction of late payments by public administrations and health authorities**
The objective of the reform is to reduce late payments, and have zero delays in payments, from the public administration to businesses. The reform includes, as of 2024, the adoption of a structural package with actions both at central and local level, including entry into force of legislation.

This reform consists in ensuring that by 2025 (i) public administrations at central, regional and local level pay within 30 days and (ii) regional health authorities pay within 60 days. To ensure that the problem of late payments is structurally solved, this reform also consists in ensuring that in 2026, (i) public administrations at central, regional and local level continue paying within 30 days and (ii) regional health authorities continue paying within 60 days.

Axis 5 – Fiscal-structural reforms (Taxation and public expenditure)

Reform 1.12 - Reform of the tax administration

Several measures shall be adopted to encourage tax compliance and improve the effectiveness of the targeting of audits and controls, including: (i) the creation of the database and the dedicated IT infrastructure for the release of pre-populated VAT tax return; (ii) improving the quality of the database used for “compliance letters”, also with a view of reducing the incidence of false-positive, gradually increasing the number of communications sent out to taxpayers; (iii) reform of the current legislation in order to ensure effective administrative sanctions in case of refusal of private providers to accept electronic payments; (iv) completion of the process of data pseudonymization and analysis of big data, with a view to increase the effectiveness of the risk analysis underlying the selection process for audits. In order to implement these reforms and strengthen the operational capacity of the Revenue Agency, its staff shall be increased by 4113 units, in line with the Agency’s "Performance Plan 2021-2023". In addition, the government shall undertake a review of possible actions to reduce tax evasion from omitted invoicing in the most exposed sectors, including through targeted incentives to consumers, and will take effective actions based on the findings of the review, with an ambitious commitment to reduce propensity to evade.

Reform 1.13 - Reform of the spending review framework

The plan includes a reform of the spending review framework aimed at improving its effectiveness, including by strengthening the role of the Ministry of Finance and the ex-post evaluation process, and improving the practice of green and gender budgeting. The plan also includes the commitment to undertake, on the basis of the existing legal framework, yearly spending reviews over the 2023-2025 period, to achieve fiscal savings in order to support sustainable public finances and/or to finance growth-enhancing reforms of taxes or public expenditures.

Reform 1.14 - Reform of the subnational fiscal framework

The reform consists in the completion of the “Fiscal federalism” as provided for by the delegation law 42/2009, with the aim to improve the transparency of fiscal relations across the different levels of government, assign resources to subnational governments based on objective criteria and encourage spending efficiency at the subnational level. In particular, the reform shall define the relevant parameters and implement the fiscal federalism for regions with ordinary status, provinces and metropolitan cities.

Reform 1.15 - Reform of public accounting rules
The reform aims at closing the gap with European accounting standards by implementing a single accrual accounting system for the public sector. The reform shall lead to the completion of the conceptual framework as reference for the accrual accounting system according to the qualitative features defined by Eurostat, the set of accrual accounting standards and the multidimensional chart of accounts. The reform shall be complemented by the first round of training for the transition to the new accrual accounting system for representatives of 18,000 public entities.

**Investment 1.10 - Support to qualification and eProcurement**

This investment shall, within the framework of the Public Buyers Professionalization Strategy, set up a procurement support function dedicated to contracting authorities to fulfil the requirements of Annex II.4 of the Public Procurement Code and to support them in the eProcurement process, backing up the acquisition of digital skills and providing technical support in the adoption of the digitalization of public procurement, including the use of dynamic purchasing systems.
## A.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

The necessary legal acts shall include:
Implementing regulatory acts concerning in particular (i) the Agenzia per l'Italia digitale (AgID) regulation on Polo Strategico Nazionale (PSN) (provided for in art.33-septies of Law Decree 179/212) and (ii) AgID Guidelines on interoperability (provided for in articles 50 and 50 ter of the Codice dell'Amministrazione Digitale (CAD).
Amendments to art. 50 of the CAD:
(i) abolition of the obligation to enter into framework agreements for administrations accessing the national digital data platform;
(ii) clarifications on the issue of privacy: the transfer of data from one information system to another does not change the ownership of the data and processing, without prejudice to the responsibilities of the public administrations that receive and process the data as autonomous data controllers.
Amendments to Decreto del Presidente della Repubblica (DPR) 445/2000 regarding access to data:

verification has already been carried out.

for the PSNC & NIS Security measures.

The processes, logistics and operation arrangements shall be formalized into adequate documentation with specific focus on the operating processes, i.e. rules of engagement, auditing and reporting procedures.

The IT tools shall gather, manage and analyse the audit data and shall be developed and used by the Audit Unit.

Documentation reporting the completion of the development of the tools shall be provided.

</tr>
</tbody>
</table>

This Law shall establish all the precise criteria and principles for the systemic reform of the Public Procurement Code.

The law of delegation shall, at least, dictate the following principles and criteria to:

i. Reduce the fragmentation of contracting authorities (1) establishing the basic elements of the qualification system, (2) requiring the setting of an e-platform as a basic requirement to participate in the nationwide evaluation of procurement capacity (3) empowering the national anti-corruption authority (ANAC) to review the qualification of contracting authorities in terms of procurement capacity (types and volumes of purchases), (4) providing incentives to use existing professional central purchasing bodies.

ii. Simplify and digitalize the procedures of central purchasing bodies (“centrali di committenza”)

iii. Define how procedures shall be digitalized for all public contracts and concessions and define interoperability and interconnectivity requirements.

Reform 1.11: Reduction of late payments by public administrations and health authorities

Legislative and specific actions to reduce late payments at central/local levels

The following legislative and specific actions shall enter into force:
- guidelines clarifying the scope of commercial and non-commercial transactions in line with the Late Payments Directive;
- guidelines clarifying the scope of Article 4(6) of the Late Payments Directive in line with the latter;
- legislation to ensure that local and regional authorities receive funds to face their invoices on time from the central level;

A.3. Description of the reforms and investments for the loan

Investment 1.2 - Cloud enablement for local PA

The objective of this investment is to migrate the datasets and applications of a substantial part of the local public administration to a secure cloud infrastructure, allowing each administration the freedom to choose within a set of certified public cloud environments.

The measure also envisages a “migration as a service” support package to administrations which shall encompass: (i) the initial assessment, (ii) the procedural/administrative support needed to launch the effort, (iii) the negotiation of the necessary external support and (iv) the overall project management over the course of execution. A team supervised by the Ministry for Technological Innovation and Digital Transition (MITD) is expected to identify and certify a broad list of qualified providers and to negotiate a set of standard support packages tailored to the size of the administration and the services involved in the migration.

Investment 1.4 - Digital services and citizen experience

The objective of this investment is to develop an integrated and harmonized offering of state-of-the-art citizen-oriented digital services, ensure their wide-spread adoption thereof across both central and local administrations and enhance users’ experience.

The measure shall:

(i) enhance the experience of digital public services by defining reusable service delivery models ensuring full accessibility requirements (Investment 1.4.1 - Citizen experience - Improvement of the quality and the usability of digital public services);

(ii) improve the accessibility of digital public services (Investment 1.4.2 - Citizen inclusion: Accessibility improvement of digital public services);

(iii) foster the adoption of the digital application for payments between citizens and public administrations (PagoPa) and the adoption of the “IO” app as the key digital touchpoint between citizens and administration for a wide range of services (including notifications) in line with the “one stop shop” logic (Investment 1.4.3 - Adoption scale up of PagoPA platform services and the “IO” app);

(iv) foster the adoption of National Digital Identity platforms (Sistema Pubblico di Identità Digitale, SPID and Carta d’Identità Elettronica, CIE) and of the national registry (Anagrafe nazionale della popolazione residente, ANPR) (Investment 1.4.4 - Adoption scale up of the National Digital Identity platforms (SPID, CIE) and the national registry (ANPR));

(v) develop a single platform for notifications (Investment 1.4.5 - Digitization of public notices);

(vi) foster the adoption of Mobility as a Service (MaaS) paradigms in metropolitan cities to digitize local transport and provide users with an integrated mobility experience from trip planning to payments across multiple modes of transport (Investment 1.4.6 - Mobility as a Service for Italy, with this last measure being financed on the basis of non-repayable financial support).
Investment 1.6 - Digital transformation of large central administrations

The objective of this investment is to re-engineer and digitize a set of priority processes, activities and services within main Central Administrations to increase the efficiency of these administrations and simplify procedures. The Central Administrations concerned include: (i) the National Social Security Institute (INPS) and National Institute for Insurance against Accidents at work (INAIL), (ii) the Judicial system, (iii) the Ministry of Defence, (iv) the Ministry of Interior, (v) the Finance Police.

As regards the Ministry of Interior, the project envisages (i) the digitization of services for citizens and the re-engineering of the underlying internal processes; (ii) the development of internal applications and management systems to develop an internal centralized verification system of physical and digital identity and related attributes, allowing public officers (e.g., Police) to perform real-time remote verification of the personal documents and licenses (e.g. health card, driving license, etc.) owned by citizens and associated with CIE; (iii) personnel upskilling to strengthen digital capabilities (1.6.1 - Digitization of the Ministry of the Interior).

As regards the Judicial system, the project foresees (i) the digitization of the last twenty years (01/01/2006 – 30/06/2026) of archives (7 750 000 Court records) related to civil proceedings of lower courts (Tribunali ordinari), the Courts of Appeal, and to the Supreme Court’s judicial files, Justices of the Peace of district capitals, Juvenile Offices, Criminal Sections of Courts and Courts of Appeal, and Public Prosecutors' Offices; (ii) the creation of a Data Lake (software layer) acting as a single point of access to the entire set of raw data produced by the judicial system. The information stored in the Data Lake shall be exploited by deploying artificial intelligence solutions to: (i) Anonymize civil and criminal sentences; (ii) Automate identification of victim-offender relationship in legal provisions; (iii) manage, analyse and organize previous case laws to facilitate consultation by civil judges and public prosecutors; (iv) perform advanced statistical analysis on the efficiency and effectiveness of the judicial system; (v) manage and monitor processing times of activities performed by judicial offices (Investments 1.6.2 - Digitization of the Ministry of Justice and 1.6.5 - Digitization of the Council of State, financed on the basis of non-repayable financial support).

As regards INPS and INAIL, the project encompasses a major review of their internal systems and procedures as well as the evolution of their digital touchpoints with residents, firms and other public administrations, in order to provide users with a seamless digital experience (1.6.3 - Digitization of National Social Security Institute (INPS) and National Institute for Insurance against Accidents at work (INAIL)).

As regards the Ministry of Defence, the project encompasses (i) the security enhancement of three fundamental sets of information (personnel, administrative documentation, internal and external communications) and (ii) the migration of all systems and applications to an open-source paradigm, compliant with the security policies defined by the reference regulatory framework (Investment 1.6.4 - Digitization of the Ministry of Defence).

As regards the Finance Police, the project aims notably at (i) reorganising databases; (ii) introducing Data Science within the operational and decision-making processes (Investment 1.6.6 - Digitization of the Finance Police, financed on the basis of non-repayable financial support).

</tbody>
</table>

The target is to achieve 82 (80%) re-engineered institutional processes and services in order to make them fully digitized. The involved areas of INAIL are: Insurance, Social and Health services, Prevention and safety work, Certifications and verifications. In particular, the expected target for each area is expressed above:

- Insurance: 26 (80%);
- Social and health services: 29 (80%);
- Prevention and safety work: 9 (80%);
- Certifications and verifications: 18 (80%).

The framework of the systems is the same: connecting data and documents coming from internal and external sources; the patterns of the systems are different according to the users (e.g. civil and criminal judges) and the objectives (e.g. statistics and judgment).
B. MISSION 1 COMPONENT 2:

Axis 1 - Digitalization, Innovation and Competitiveness of the Production System

Axis 1 of Mission 1 Component 2 of the Italian recovery and resilience plan concerns investments and reforms mainly aimed at (i) supporting the digital transition and the innovation of the production system through incentives to investments in technologies, research, development and innovation; (ii) deploying ultra-fast broadband and 5G networks to reduce the digital divide as well as satellite constellations and services; (iii) promoting the development of strategic value chains and supporting the competitiveness of companies, with a focus on SMEs.

Measures under this component aim to address gaps emerging from the Digital Economy and Society Index (DESI) 2020 as regards the digital transformation of businesses and the shortcomings in connectivity, with a view to strengthen the social and economic resilience of the country.

The investments and reforms under this component shall contribute to addressing the Country-Specific Recommendations addressed to Italy in 2020 and 2019 on the need to “strengthen distance learning and skills, including digital ones” (Country-Specific Recommendation 2, 2020), to “promote private investment to foster the economic recovery” (Country-Specific Recommendation 3, 2020), to “focus investment on the green and digital transition, in particular on […] reinforced digital infrastructure to ensure the provision of essential services” (Country-Specific Recommendation 3, 2020), to “foster upskilling, including by strengthening digital skills (Country-Specific Recommendation 2, 2019), to “focus investment-related economic policy on research and innovation, and the quality of infrastructure, considering also regional disparities” (Country-Specific Recommendation 3, 2019) and, to some extent, to “support non-bank access to finance for innovative and smaller firms” (Country-Specific Recommendation 5, 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

Axis 2 – Improving business environment and competition

The main objective of the axis 2 of Mission 1 Component 2 is to improve the business environment to facilitate entrepreneurship, and the framework conditions for competition to favour a more efficient allocation of resources and productivity gains. The main tool to reach these goals is the Annual Competition Law, to be adopted each year.

The investments and reforms under this component shall contribute to addressing the Country-Specific Recommendations addressed to Italy in 2019 on the need to “address restrictions to competition […]”, also through a new annual competition law” (Country-Specific Recommendation 3, 2019).

B.1. Description of the reforms and investments for non-repayable financial support

Axis 1 - Digitalization, Innovation and Competitiveness of the Production System
Investment 1: Transition 4.0

The objective of the measure is to support the digital transformation of businesses by incentivising private investment in assets and activities supporting digitalisation. The measure financed under the Italian recovery and resilience plan is part of a broader Transition 4.0 Plan, which includes other support measures financed at the national level to boost the digital transformation of businesses.

The measure consists of a tax credit scheme and covers expenses to be claimed in the tax returns presented in the period between 1 January 2021 and 31 December 2023 (30 November 2024 for firms whose tax year does not correspond to the calendar year). The measure also includes the definition of tax credit codes, which shall be identified by a resolution of the Revenues Agency to allow beneficiaries to use the tax credits with the F24 payment model.

The tax credits supported shall cover the following assets and activities:

1. capital goods, consisting of: (i) 4.0 (that is to say, technologically advanced) tangible capital goods, such as production machines whose operations is controlled by computerized systems or sensors/drives, machines and systems used for product or process control, and interactive systems; all of them to be characterized by digital features, such as automated integration and man-machine interface; (ii) 4.0 intangible capital goods such as 3D modelling, intra-factory communication systems, and artificial intelligence and machine learning software, systems, platforms and applications; (iii) standard intangible capital goods, such as software relating to business management. This covers tax credits presented in the tax returns between 1 January 2021 and 31 December 2023 (30 November 2024 for firms whose tax year does not correspond to the calendar year).

2. research, development and innovation activities, consisting of research and development, technological innovation, green and digital innovation, and design activities. This covers tax credits presented in the tax returns between 1 January 2022 and 31 December 2023 (30 November 2024 for firms whose tax year does not correspond to the calendar year).

3. training activities, carried out to acquire or consolidate the knowledge of relevant technologies, such as big data and data analysis, human machine interface, internet of things, digital integration of business processes, cybersecurity. This covers tax credits presented in the tax returns between 1 January 2022 and 31 December 2023 (30 November 2024 for firms whose tax year does not correspond to the calendar year).

The measure includes the establishment of a Scientific Committee including experts from the Ministry Economy and finance, the Ministry of Economic Development and the Bank of Italy to assess the economic impact of the scheme.

Reform 1: Reform of the Industrial Property System

The main objective of the reform is to adapt the industrial property system to modern challenges and ensure that the innovation potential effectively contributes to the country’s recovery and resilience. Specifically, it aims to pursue the following objectives: enhancing the industrial property protection system; encouraging industrial property use and dissemination, especially by SMEs; facilitating access to and sharing of intangible assets, while ensuring a fair return on investments; guaranteeing a more rigorous respect for industrial property; and strengthening Italy's role in European and international fora on industrial property.
The measure concerns the reform of the Italian industrial property code, covering at least the following areas: (i) review the regulatory framework to strengthen the protection of industrial property rights and simplify procedures, (ii) strengthen the support to companies and research institutions, (iii) enhance skills and competences development, (iv) facilitate knowledge transfer, and (v) strengthen innovative services promotion.

**Investment 6: Investment in the Industrial Property System**

The objective of the investment is to support the industrial property system and accompany its reform, as envisaged under Reform 1 of this component. The measure includes financial support for industrial property-related projects of companies and research bodies, such as patent-related measures (Brevetti+), Proof of Concept (POC) programs and the strengthening of technology transfer offices (TTOs).

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude research and development dedicated to the following list of activities: (i) activities related to fossil fuels, including downstream use\(^1\); (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks\(^2\); (iii) activities related to waste landfills, incinerators\(^3\) and mechanical biological treatment plants\(^4\); and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

**Axis 2 – Improving business environment and competition**

**Reform 2: Annual Competition Laws 2021, 2022, 2023 and 2024**

The Competition Law shall be adopted each year, increasing competitive procedures to award public service contracts for local public services (notably in waste and public transport), avoiding the unjustified prolongation of concessions in ports, highways, electric charging stations and hydropower to incumbent operators in many sectors, providing for the proper regulation of public services contracts, revising the rules on aggregation and applying the

---

\(^1\) Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

\(^2\) Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\(^3\) This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\(^4\) This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
general principle of proportionality in the length and proper compensation of public service contracts. The Competition Law will also increase incentives for Regions to tender their public services contracts for regional rail services. A clear separation between the functions of regulation/control and the management of the contracts shall also be introduced.

With regard to sector-specific measures, the annual Competition Laws shall include measures in the sectors of energy (electricity, gas and water), waste management and transport (ports, rail and highways), which shall complement the investments and reforms under Missions 2 and 3. Flanking measures to ensure the uptake of competition in electricity retail markets shall enter into force at the latest on 31st December 2022 The Annual Competition Law 2022 shall notably adopt the Electricity Network Development Plan and promote the deployment of 2nd generation smart electricity meters, which shall reach 33 million units throughout Italy at the 31st December 2025.

Moreover, the Laws shall improve the business environment at least through: (i) the alignment of merger control rules with EU law, (ii) the consolidation, digitalisation and professionalisation of market surveillance authorities and (iii) reduction the time of accreditation for providing information about employees, from seven to four days to reduce the number of days to set up a business.

**Reform 3: Rationalization and simplification of firms’ incentives.**

The reform shall consist in a systematic review of all national incentives for firms and the related instruments.

The reform shall be implemented in two steps:

1. Publication of a report carrying out an evaluation of incentives for firms. The report shall also develop concrete proposals to simplify and rationalize firms’ incentives.

2. Entry into force of the legislative acts implementing the Mandate-Law “Legge delega Incentivi”. The scope of the legislative acts shall be to streamline and rationalize firms’ incentives.

The reform includes the restructuring and further implementation of two key instruments managed by the Ministry for Enterprises and Made in Italy (MIMIT):

(a) the RNA (National registry of State aids) and,

(b) the incentivi.gov.it Platform, to cover the related data collection, monitoring and analysis activities costs.

Entry into force of all energy-related implementing measures and secondary legislation (if necessary) to:

i. Phase out regulated prices for micro-enterprises and households as from 1 January 2023.

ii. Adopt flanking measures to support the uptake of competition in electricity retail markets.

The flanking measures to ensure the uptake of competition in electricity retail markets shall provide at least the following:

- Auction the customer base to level the playing field for new entrants.
- Fix a ceiling as a maximum market share available to each supplier;
- Allow Italian consumers to ask their energy supplier to disclose their billing data to a third-party provider;
- Increase transparency on the electricity bill by giving consumers access to the sub-components of the “spesi per oneri di sistema”;
- Remove the requirement for suppliers to collect charges unrelated to the energy sector.

B.3. Description of the reforms and investments for the loan

Investment 2: Innovation and technology of microelectronics

The objective of the investment is to support the development of the strategic value chain of microelectronics by investing in Silicon Carbide substrates, which is a necessary input for the manufacturing of high-performance power devices. The investment shall be implemented in line with existing State aid rules and is expected to have positive effects on employment.

Investment 3: Fast internet connections (Ultra Broadband and 5G)

The objective of the investment is to complete the national ultra-fast and 5G telecommunications network throughout the national territory. This investment is expected to significantly contribute to the objectives of the digital transition and to reduce the digital divide in Italy.

The investment includes the award of concessions and encompasses five faster connection projects:

1. “Italia a 1 Giga”, which shall provide 1 Gigabit/s in download and 200 Mbit/s in upload connectivity in grey and black next generation access (NGA) market failure areas. These areas shall be defined after the completion of a mapping exercise;
2. “Italia 5G”, which shall provide 5G connections in market failure areas, that are areas where mobile networks have not been deployed; or only 3G networks are available and no 4G and/or 5G mobile networks are planned in the near future; or there is a demonstrated market failure;
3. “Connected schools”, which shall provide school buildings with 1 Gigabit/s broadband connectivity;
4. “Connected health care facilities”, which shall provide 1 Gigabit/s broadband connectivity to public health care facilities;
5. “Connected smaller islands”, which shall provide ultra-broadband connectivity to selected smaller islands lacking fiber links to the continent.

Investment 4: Satellite technology and space economy

The objective of the investment is to develop satellite connections in view of the digital and green transition and to contribute to the development of the space sector. The investment has also the aim to enable services such as secure communications and monitoring infrastructure for various sectors of the economy and, to this effect, it includes both upstream (launch services, production and operation of satellites and infrastructure) and downstream (generation of enabled products and services) activities.

The investment includes the award of tenders and encompasses four projects:

1. Satcom, which consists of activities for the development of dual-use technologies and systems to be used for the provision of highly secure innovative satellite communication services for governmental use.
2. Earth Observation (EO), which consists of (i) upstream activities: including specification, design, development of a constellation for remote sensing (Synthetic Aperture Radar (SAR), hyperspectral) and the procurement of launches focused on monitoring land, sea and atmosphere; (ii) downstream activities: the realization of the CyberItaly Project encompassing the creation of a digital replica of the country.
3. Space Factory, consisting of two sub-projects: (i) Space Factory 4.0: the specification, design and building of digital manufacturing, assembly and testing facilities for small satellites and the implementation of a cyber physical system of production and satellite digital twinning aimed at establishing a bidirectional link between the digital model and its physical counterpart; (ii) Access to Space: research, development and prototyping for the realization of green technologies for future generation of thrusters and launchers, including in-flight demonstration of selected technologies.
4. In-Orbit Economy, which consists of the implementation of a demonstrator for in orbit servicing technologies for in orbit interoperability; the increase of the national Space Surveillance and Tracking (SST) capacity including a network of ground-based sensors for the observation and tracking of space debris; design, development, commissioning of assets for the acquisition and management and provision of the data service in support of Space Traffic Management activities.

It is envisaged that the investment does not have military or defence objectives and implications.

**Investment 5: Industrial supply chain policies and internationalization**

The objective of the investment is to strengthen industrial supply chains, in particular by facilitating access to funding, and to promote the competitiveness of enterprises (notably SMEs), in particular by supporting their internationalisation and strengthening their resilience after the COVID-19 crisis.

The investment consists of two lines of intervention:

1. Refinancing of Fund 394/81 managed by SIMEST. It consists of the re-financing of an existing Fund currently managed by public agency SIMEST, providing for financial support to enterprises, notably SMEs, to support their internationalisation through various tools such as programs to access foreign markets and development of e-commerce.

2. Competitiveness and resilience of supply chains. It consists of financial support to enterprises, through the instrument of the Development Contract, for projects related to key strategic value chains, such as industrial development programs, environmental protection development programs, sustainable mobility and tourism activities.

The above interventions shall be conducted according to investment policies in line with the objectives of Regulation (EU) 2021/241, including in relation to the application of the principle of ‘Do no significant harm’, as further specified in the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the legal agreement between Italy and the entrusted entity or the financial intermediary in charge of the financial instrument and the subsequent investment policy of the financial instrument shall:

i. require the application of the Commission’s technical guidance on sustainability proofing for the InvestEU Fund; and

ii. exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities and assets related to waste landfills,

---

5 Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

6 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.
incinerators\(^7\) and mechanical biological treatment plants\(^8\); and (iv) activities and assets where the long-term disposal of waste may cause harm to the environment; and

iii. require the verification of legal compliance with the relevant EU and national environmental legislation of the projects by the entrusted entity or financial intermediary for all transactions, including those exempted from sustainability proofing.

**Investment 7. Support to the production system for the Ecological Transition, Net Zero Technologies, and competitiveness and resilience of strategic supply chains:**

This measure shall consist of two sub-investments.

**Sub-investment 1:**

This sub-investment shall consist of a public investment in a Facility, “Net Zero Technologies”, in order to incentivise private investment and improve access to finance in the fields of energy efficiency, renewable generation for auto-consumption, sustainable transformation of the production process.

The investment shall support:

i) the ecological transition of the national production system at various levels by supporting investments about the strengthening of production chains for devices relevant to the ecological transition (such as batteries, solar panels, wind turbines, heat pumps, electrolysers and devices for carbon capture and storage),

ii) the energy efficiency of production processes (also through the production for self-consumption of electricity from renewable sources, with the exclusion of biomass),

iii) the sustainability of production processes, also with a view to the circular economy and more efficient use of resources.

The Facility shall operate by providing non-repayable grants, subsidised loans, and interest subsidies directly to the private sector. On the basis of the RRF investment, the Facility aims at initially providing at least EUR 3 600 000 000 of financing.

The Facility shall be managed by Invitalia S.p.A. as the implementing partner. The Facility shall include the following financial instruments:

- Development Contract which shall support Net Zero Technologies projects larger than EUR 20 000 000 by providing grants, interest rate subsidies, and subsidised loans.

- Fund for the Industrial Transformation which shall support projects between EUR 3 000 000 and EUR 20 000 000, by providing grants, interest rate subsidies, and subsidised loans.

In order to implement the investment into the Facility, Italy and Invitalia S.p.A. shall sign an Implementing Agreement that shall include the following content:

1. Description of the decision-making process of the Facility: The final investment and award decisions of the Facility shall be taken by an investment committee or other relevant

---

\(^7\) This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\(^8\) This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
equivalent governing body and approved by a majority of votes from members who are independent from the government.

2. Key requirements of the associated investment policy, which shall include:
   a. The description of the financial products and eligible final beneficiaries.
   b. The requirement that all investments supported are economically viable.
   c. The requirement to comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the investment policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use\(^9\), (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks\(^10\), (iii) activities and assets related to waste landfills, incinerators\(^11\) and mechanical biological treatment plants\(^12\).
   d. The requirement that final beneficiaries of the Facility shall not receive support from other Union instruments to cover the same cost.

3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to reinvest any reflows according to the investment policy of the Facility.

4. Monitoring, audit, and control requirements, including:
   a. The description of the implementing partner’s monitoring system to report on the investment mobilized.
   b. The description of the implementing partner’s procedures that shall ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.
   c. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.
   d. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of the Invitalia S.p.A. These audits shall verify:
      i. that the control systems are effective, including the detection of fraud, corruption, and conflict of interests;

---

\(^9\) Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

\(^10\) Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\(^11\) This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\(^12\) This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
ii. compliance with the DSNH principle, the State Aid rules, the climate target requirements; and

iii. that the requirement that final beneficiaries of the Facility have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement are being respected.

5. Requirements for climate investments carried out by the implementing partner: at least EUR 1,787,500,000 of the RRF investment into the Facility shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation.¹³

Sub-investment 2:

This sub-investment shall consist of a public investment in a Facility, “Competitiveness and resilience of strategic supply chains”, in order to incentivise private investment and improve access to finance to strengthen industrial supply chains.

The investment shall support projects related to key strategic value chains, such as industrial development programs and environmental protection development programs.

The Facility shall operate by providing non-repayable grants, subsidised loans, and interest subsidies directly to the private sector. On the basis of the RRF investment, the Facility aims at activating at least EUR 700,000,000 of financing.

The Facility shall be managed by Invitalia S.p.A. as the implementing partner.

In order to implement the investment into the Facility, Italy and Invitalia shall sign an Implementing Agreement that shall include the following content:

1. Description of the decision-making process of the Facility: The final investment and award decisions of the Facility shall be taken by an investment committee or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government.

2. Key requirements of the associated investment policy, which shall include:

   i) The description of the financial product(s) and eligible final beneficiaries.

   ii) The requirement that all investments supported are economically viable.

   iii) The requirement to comply with the ‘Do no significant harm’ (DSNH) principle as set out in the DSNH Technical Guidance (2021/C58/01). In particular, the investment policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use, (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are

¹³ Final beneficiaries associated to specific projects shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution.

¹⁴ Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.
not lower than the relevant benchmarks, (iii) activities and assets related to waste landfills, incinerators and mechanical biological treatment plants.

iv) The requirement that final beneficiaries of the Facility shall not receive support from other Union instruments to cover the same cost.

3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to reinvest any reflows according to the investment policy of the Facility.

4. Monitoring, audit, and control requirements, including:

   a. The description of the implementing partner’s monitoring system to report on the investment mobilized.

   b. The description of the implementing partner’s procedures that shall ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.

   c. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.

   d. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of the Invitalia SPA. These audits shall verify:

      i. that the control systems are effective, including the detection of fraud, corruption, and conflict of interests;

      ii. compliance with the DNSH principle, the State Aid rules, the climate target requirements; and

      iii. that the requirement that final beneficiaries of the Facility have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement are being respected.

The implementation of the measure shall be completed by 31 August 2026.

---

15 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

16 This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

17 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

C. MISSION 1 COMPONENT 3: Tourist and Culture 4.0.

This component of the Italian recovery and resilience plan focuses on relaunching two sectors heavily hit by the Covid crisis: culture and tourism. The measures related to the culture sector aim at making cultural sites more accessible both digitally and physically, more energy efficient and safer with respect to natural disasters, at supporting the recovery of the cultural and creative sectors, including by supporting the attractiveness of small cultural sites and rural architecture as also to enhance territorial cohesion. Three sets of measures are envisaged: i) interventions to develop the cultural heritage for the next generation, including investment for the digital transition and to improve the energy efficiency of cultural sites, ii) culture-led regeneration of small historical sites, religious and rural heritage; iii) interventions for cultural and creative industries 4.0. Measures related to tourism aim at enhancing the competitiveness of the sector, including by reducing the fragmentation of the sector and enhancing the economies of scale, improving and upgrading the standards of the hospitality sector, encouraging digital innovation and the use of new technologies by operators, and support the green transition of the sector. In this respect, measures are envisaged to support firms, including SMEs, working in the tourism sector and tourist operators, including through investment in digital tools.

The investments and reforms under this component shall contribute addressing the Country-Specific Recommendations addressed to Italy, in particular on the need to “promote private investment to foster the economic recovery and focus investment on the green and digital transition” (Country Specific Recommendation 3, 2020). They also support social and territorial cohesion and the competitiveness of the Italian economy, while promoting the digitalisation and sustainability of the tourism sector.

C.1. Description of the reforms and investments for non-repayable financial support

Investment 1.1 Digital Strategy and Platforms of Culture Heritage

The measure includes actions to digitise the Italian cultural heritage, as to improve access to cultural resources and digital services.

The intervention shall create a new national digital infrastructure to collect, integrate and retain digital resources, making them available for public use through dedicated platforms. Interventions on “physical” heritage shall be accompanied by the digitisation of museums, archives, libraries and cultural sites, to enable citizens to explore new forms of benefitting from the cultural heritage.

Investment 1.2: Removal of physical and cognitive barriers in museums, libraries and archives to enable wider access and participation in culture

The measure aims at removing architectural, cultural and cognitive barriers in a number of Italian cultural institutions. Interventions shall be combined with training for administrative staff and cultural operators, promoting a culture of accessibility and developing expertise on legal aspects, reception, cultural mediation and promotion.

Investment 1.3: Improve energy efficiency, in cinema, theatres and museums

The measure shall improve the energy efficiency of buildings linked to the cultural and creative sector. They are often found in outdated, energy inefficient facilities that generate high
maintenance costs related to air-conditioning, lighting, communication and safety. The investment shall finance actions to improve the energy efficiency of Italian museums, cinemas and theatres (both public and private).

Reform 3.1: Adoption of minimum environmental criteria for cultural events

The aim of the reform is to improve the ecological footprint of cultural events (such as exhibitions, festivals, cultural events and musical events) by including social and environmental criteria in public procurement for cultural events funded, promoted or organised by the public authority.

Investment 3.3: Capacity building for culture operators to manage the digital and green transition

The overall objective of the investment is to support the recovery of the cultural and creative sectors. This consists of two interventions.

The first intervention (‘Supporting the recovery of cultural activities by encouraging innovation and the use of digital technology throughout the value chain’) aims to support cultural and creative operators to implement digital strategies and to increase their management capacities.

The second intervention (‘Promoting a green approach throughout the cultural and creative chain’) aims to encourage an environmentally sustainable approach throughout the chain, reducing the ecological footprint, promoting innovative and inclusive eco-design, including in the context of the circular economy, in order to steer the public towards more responsible environmental behaviour.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to

---

18 Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

19 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

20 This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

21 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

**Investment 4.1: Digital Tourism Hub**

The aim of the measure is to create a Digital Tourism Hub, accessible through a dedicated web platform, enabling the entire tourism ecosystem in order to enhance, integrate and promote its own offer. The investment shall finance a new digital infrastructure, and support enterprises with data analytics tools provided by the National Observatory of Tourism.

Finally, the measure shall also envisage the creation of a competence center to support acceleration programs.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation can be selected.

**Reform 4.1: Regulation ordering of the professions of tourist guides**

The investment in the Digital Tourism Hub is complemented by a reform to streamline the touristic guides regulations. The measure provides, with due regard for local regulation, a professional organisation for tourist guides and their area of origin. The systematic and uniform application of the reform would make it possible to regulate the fundamental principles of the profession and to standardize the levels of service provision throughout the national territory, with a positive effect on the market. The reform shall include training and further training in order to best support the offer.

---

22 Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

23 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

24 This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

25 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

C3. Description of the reforms and investments for the loan

Investment 2.1: Attractiveness of Small Historic Towns

This investment is integrated in the “Piano Nazionale Borghi”, a programme to support the economic/social development of disadvantaged areas based on the cultural regeneration of small towns and the revitalisation of tourism. The actions are structured around integrated cultural locally-based projects.

The measures shall focus on: i) restoring historical heritage, upgrading open public spaces (e.g. removing architectural barriers, improving urban furniture), creating small cultural services, including for tourism purposes; ii) creating and promoting new routes (e.g. thematic routes, historical routes) and guided tours shall be encouraged; iii) the introduction of financial support for cultural, creative, touristic, commercial, agri-food and artisanal activities, aimed at revitalising local economies by enhancing local products, knowledge and techniques.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation shall be selected.

Investment 2.2: Protection and enhancement of rural architecture and landscape

This investment shall stimulate a systematic process of upgrading historic rural buildings (private or third sector entities) and landscape protection.

Many rural buildings and agricultural structures have undergone a progressive process of abandonment, degradation and alterations which have undermined their distinctive characteristics and their relationship with their surroundings. By restoring the rural building stock, the measure shall improve the quality of the countryside’s landscape by returning to the community an underused building stock which is not accessible to the public.

Investment 2.3: Programs to enhance the identity of places: parks and historic gardens

---

26 Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

27 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

29 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
This investment aims at countering urban decline and restoring shared identities of places, creating new opportunities to revive local economies and mitigate the impact of the crisis and to enhance skills for the management and maintenance of historic parks and gardens.

The investment envisages a refurbishment of historic parks and gardens and puts in place extensive knowledge and rehabilitation of Italian historic parks and gardens with a view to their proper maintenance, management and public use. Resources shall be allocated for the regeneration of these sites and the training of local staff who may treat/preserve them over time.

Beyond the cultural and historical value, gardens and historic parks contribute to enhancing environmental values and play an important role in preserving conservation, oxygen generation, reduction of environmental pollution and noise, and microclimate regulation.

**Investment 2.4: Seismic safety of places of worship, restoration of FEC heritage and shelters for art works (Recovery Art)**

An anti-seismic preventive action plan shall be put in place in order to significantly reduce the risk on worship places and thus avoiding the potential restoration cost after disasters, as well as the permanent loss of many assets. The action plan has three lines of actions: the protection of places of worship against seismic risks; the restoration of the heritage of the Fund for places of worship (FEC) and the construction of warehouses as shelter for art works in case of catastrophic events.

The investment also envisages the creation of the National Functional Centre for the Protection of Cultural Assets from Human and Natural Risks (CEFURISC), allowing for a more synergistic use of existing technologies and environmental systems for monitoring, surveillance and management of cultural sites.

**Investment 4.2: Funds for the competitiveness of tourism enterprises**

The measure aims at supporting firms operating in the tourism sector. It includes a tax credit for works aimed at improving accommodation facilities, a guarantee fund to facilitate access to credit for firms in the sector (through a dedicated section of the SMEs Guarantee Fund), the activation of the EIB Thematic Fund for Tourism to support innovative investment in the sector, an equity fund (National Tourism Fund) for the redevelopment of properties with high tourist potential. An additional financial instrument (FRI - Fondo Rotativo), shall complement the abovementioned measures to support firms operating in the tourism sector. The above interventions shall be conducted according to investment policies in line with the objectives of Regulation (EU) 2021/241, including in relation to the application of the principle of ‘do no significant harm’, as further specified in the Technical guidance on the application of ‘do no significant harm’ under the Recovery and Resilience Facility Regulation (2021/C58/01).

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the legal agreement and the subsequent investment policy of the financial instruments shall

i. require the application of the Commission’s technical guidance on sustainability proofing for the InvestEU Fund; and

ii. exclude the following list of activities: (i) activities related to fossil fuels, including downstream use[^30]; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks[^31]; (iii) activities

[^30]: Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

[^31]: Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established
related to waste landfills, incinerators\textsuperscript{32} and mechanical biological treatment plants\textsuperscript{33}; and (iv) activities where the long-term disposal of waste may cause harm to the environment; and

iii. require the verification of legal compliance with the relevant EU and national environmental legislation of the projects by the entrusted entity or financial intermediary for all transactions, including those exempted from sustainability proofing.

**Investment 3.2: Development of the film industry (Cinecittà project)**

The objective of the investment is to enhance the competitiveness of the Italian film and audiovisual sector. The project aims to mitigate the social and economic impact of the crisis with the objective of enhancing economic growth, employment and competitiveness, including through action on training, with three lines of action.

- Line A: Construction of new studios and recovery of existing ones and annexes, including high-tech solutions.
- Line B: Innovative investment to enhance the production and training activities of Experimental Centre for Cinematography, including new tools for audiovisual production, internationalization, cultural and educational exchanges; developing infrastructure (virtual production live set) for professional and educational use through e-learning, digitization and modernization of the building and plant stock, in particular with a view to fostering the technological and environmental transformation; preservation and digitization of audiovisual heritage
- Line C: Strengthening professional skills and competences in the audiovisual sector, in 3 professional macro-areas: business/managerial; creative/artistic; technical workers.

**Investment 4.3: Caput Mundi Next Generation EU for touristic great events.**

The project shall increase the number of accessible tourist sites, create valid and qualified tourist and cultural alternatives with respect to the crowded central areas, as well as increase the use of digital technologies, enhance green areas and the sustainability of tourism. The investment envisages six lines of interventions:

1. “Roman Cultural Heritage for EU-Next Generation”, covering the regeneration and restoration of cultural and urban heritage and complexes of high historical-architectural value of the city of Rome;
2. “Jubilee paths” (from pagan to Christian Rome), targeted to the enhancement, safety, anti-seismic consolidation, restoration of places and buildings of historical interest and archaeological pathways;
3. #LaCittàCondivisa, covering the redevelopment of sites in peripheral areas;
4. #Mitingodiverde, covering interventions on parks, historical gardens, villas and fountains;
5. #Roma 4.0, covering the digitalization of cultural services and the development of apps for tourists;

for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\textsuperscript{32} This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{33} This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
6. #Amanotesa, aimed at increasing the supply of cultural offer to peripheries for social integration.

The Ministry of Culture decree shall allocate resources to municipalities for the attractiveness of Small Historic Towns.

The municipalities involved to enhance the attractiveness of small historic town refer to the 250 municipalities/villages that have transmitted to the Ministry of Culture the intervention programs.

The criteria for the selection of the 250 villages (Inv. 2.1) shall be shared by MiC, Regions, ANCI and Internal Areas which; preliminarily they shall identify the territorial areas eligible for (Inv2.1) due to the complementarities between the various programs. Following, the selection of the villages shall be made on the basis of a) territorial, economic and social criteria (statistical indicators) b) the capacity of the project to impact on tourist attractiveness and to increase cultural participation. The statistical indicators taken into consideration are: demographic size (municipalities with pop. < 5 000 inhab.) and trend; tourist flows, museum visitors; the consistency of the tourist offer (hotels and other hotels, B&Bs, rooms and rental accommodation); the demographic trend of the municipality; the degree of cultural participation of the population; the consistency of cultural, creative and

D. MISSION 2 COMPONENT 1: Circular economy, agri-food and green transition

This component of the Italian recovery and resilience plan covers investments and reforms in waste management, circular economy, support for agri-food value chains and green transition. These reforms and investments are complemented by reforms to increase competition in waste management and local public services in the “business environment” reform component and improve water consumption for agriculture. This component responds to the country-specific recommendations to focus investment in the green transition, including in the circular economy.

The investments and reforms under this component shall contribute addressing the country-specific recommendations addressed to Italy in 2020 and 2019 on the need to “focus investment on the green and digital transition, in particular on […] waste and water management” (CSR 3, 2020) and to “focus investment-related economic policy on […] and the quality of infrastructure, considering also regional disparities” (country-specific recommendation 3, 2019).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

D.1. Description of the reforms and investments for non-repayable financial support

Circular Economy

Reform 1.1 – National Strategy for Circular Economy

This reform consists in the adoption of a broad National Strategy for the Circular Economy covering a new digital waste traceability system, tax incentives to support recycling activities and the use of secondary raw materials, a revision of environmental taxation, the right to reuse and repair, the reform of the EPR (Extended Producer Responsibility) and Consortia system, support for existing regulatory tools (such as End of Waste legislation and Minimum Environmental Criteria under Green public procurement) and support to industrial symbiosis project. The reform of the EPR and Consortia system shall also address the need for a more efficient use of the environmental contribution to assure the application of transparent and non-discriminatory criteria. A specific supervisory body with the aim of monitoring the functioning and the effectiveness of the Consortia systems, under the presidency of Ministry of Ecological Transition (MITE) shall be created. The measure shall address all the Consortia (not only CONAI packaging system).

Reform 1.3 – Technical support for local authorities

This reform consists in technical support to local authorities by the government for the implementation of environmental EU and national regulation, the development of plans and projects regarding waste management and on tendering procedures. The support on tendering procedures shall ensure that concessions in waste management are granted in a transparent and non-discriminatory way increasing competitive processes to achieve better standards for public services. This reform supports therefore the implementation of the waste management reforms
proposed in the business environment reform component. Technical support shall also cover green public procurement.

**Investment 2.1 – Logistics plan for the agri-food, fishing and aquaculture, forestry, floriculture and plant nursery sectors**

This measure consists in the granting of support to tangible and intangible investments (such as storage facilities for agricultural raw materials, transformation and conservation of raw materials, digitalization of logistics and infrastructural interventions on food markets), investments in food transport and logistics to reduce the environmental and economic costs and innovation of production processes, precision farming and traceability (such as blockchain). The selection criteria shall be coherent with the needs assessment developed under the Common Agricultural Policy Strategic Plan by the Ministry of Agricultural, Food and Forestry Policies. The measure aims to encourage the reduction of emissions in the transportation and logistics phases in the agri-food sector, by means of electric vehicles and transport systems and boosting the digitalization of the sector and the utilisation of renewable energy.

**Investment 2.2 – Agri-solar Park**

This measure consists in the granting of support to investments on productive structures of the agricultural, livestock and agro-industrial sector, to remove and dispose of the existing roof and construction of a new insulated roof, to create automated ventilation and/or cooling systems and to install solar panels, intelligent management of flows and accumulators.

**Investment 2.3 – Innovation and mechanization in the agricultural and food sectors**

This measure consists in the granting of support to investments in tangible and intangible assets aimed at:
- agricultural innovation and mechanization, notably off-road machinery;
- innovation in the processes of transformation, storage and packaging of extra virgin olive oil.

Off-road machinery shall be zero-emission or run solely on bio-methane compliant with the criteria set out in Directive 2018/2001 (RED II Directive). Biofuel and biomethane gas and biofuel producers shall have to provide certificates (Proof of Sustainability) issued by independent evaluators, as provided for in Directive 2018/2001. The operator shall purchase guarantee of origin certificates commensurate to the expected fuel use.

**Investment 3.3 - Culture and awareness on environmental topics and challenges**

This investment consists in the design and production of digital content to raise awareness of environmental and climate challenges. The digital content shall consist in podcasts, school-video lessons, videos and articles. An online, subscription-free platform shall be created with the objective to become the most comprehensive “repository” of educational and recreational materials on environment-related topics. The production of digital content is expected to involve key influencers. Examples of topics covered through different channels may be: the rules of transition, energy mix and renewables role, climate change, the sustainability of the atmosphere and global temperatures, the hidden role of oceans, water reserves, individual and organizational ecological footprint, circular economy and new agriculture.
## D.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

D.3. **Description of the reforms and investments for the loan**

**Reform 1.2 – National Programme for Waste Management**

This reform consists in the adoption of a broad National Programme for Waste Management aiming the highest levels of preparation for reuse, recycling and recovery of waste, adapting the network of installations necessary for integrated waste management, minimizing final disposal as the ultimate and residual option, establishing monitoring systems, preventing the opening of new infringement procedures against Italy, tackling low collection of waste, discouraging landfilling and ensuring complementarity with regional waste programmes, enabling the achievement of European and national waste legislation objectives and tackling illegal waste dumping and open-air burning.

**Investment 1.1 – Implementation of new waste management plants and modernization of existing plants**

This investment consists in improving and mechanising of the separated waste collection network of municipalities, building new treatment/recycling plants for organic waste, multi-material, glass and paper packaging and innovative treatment/recycling plants addressing personal adsorbent disposal (PAD), wastewater sludge, leather waste and textile waste.

**Investment 1.2 – Circular economy: “flagship” projects**

This investment consists in supporting the improvement of separate collection network, including through digitalization of the processes and/or logistics, and treatment/recycle plants for the following sectors:

- Waste Electrical and Electronic Equipment (WEEE), including wind turbine blades and photovoltaic panels;
- Paper/paperboard industry;
- Plastic waste recycling (mechanical, chemical recycling, “Plastic Hubs”) including Marine Plastic Litter (MPL). In this area industrial symbiosis projects shall be encouraged in the form of “circular districts” in order to assure a complete reuse of plastic recycling by-products and produce high added value goods;
- Textile (“Textile Hubs”).

Furthermore a Global Monitoring System to face illegal dumping shall be developed using satellites, drones ad artificial intelligence (AI) technologies (for a further description of the overall intervention see **Investment 1.1-Implementation of an advanced and integrated monitoring and forecasting system** in Mission 2 Component 4). The Global Monitoring System, together with proposed measures on waste traceability shall support local control authorities and forces of order in preventing, controlling and tackling illegal dumping and organized crime activities in waste management.

**Investment 3.1 - Green islands**

This investment consists in financing and implementing projects in energy (such as renewables, grid and energy efficiency), water (such as desalination), transport (such as cycling paths, zero-emission buses and boats) and waste (such as separation of waste) in the 19 non-interconnected Small Islands. Biomethane shall comply with the criteria set out in Directive 2018/2001 (RED II Directive). Biofuel and biomethane gas and biofuel producers shall have to provide certificates (Proof of Sustainability) issued by independent evaluators, as provided for in Directive 2018/2001. The operator shall purchase guarantee of origin certificates commensurate to the expected fuel use. In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the
following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation shall be selected.

**Investment 3.2 - Green communities**

This investment consists in the support of rural and mountain territories, which intend to exploit in a balanced way their main resources (so-called “green communities”) through investments notably in following fields:

- the integrated and certified management of the agro-forestry heritage (“also through the exchange of credits deriving from the capture of carbon dioxide, the management of biodiversity and the certification of the wood supply chain”);
- the integrated and certified management of water resources;
- the production of energy from local renewable sources, such as micro hydroelectric plants, biomass, biogas, wind, cogeneration and biomethane;
- the development of sustainable tourism (“capable of enhancing local products”);
- the construction and sustainable management of the building stock and infrastructure of a modern mountain;
- energy efficiency and intelligent integration of plants and networks;
- the sustainable development of production activities (zero waste production);
- the integration of mobility services;
- the development of a sustainable farm model (“which is also energy independent through the production and use of energy from renewable sources in the electrical, thermal and transport sectors”).

- In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels,

---

34 Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

35 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

36 This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

37 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
including downstream use\(^\text{38}\); (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks\(^\text{39}\); (iii) activities related to waste landfills, incinerators\(^\text{40}\) and mechanical biological treatment plants\(^\text{41}\); and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation shall be selected.

**Investment 3.4 – Fondo Rotativo Contratti di Filiera (FCF) to support supply-chains contracts for the agri-food, fishing and aquaculture, forestry, floriculture and plant nursery sectors**

This measure shall consist of a public investment in a Facility, the Fondo Rotativo Contratti di Filiera (FCF), in order to incentivise private investment and improve access to finance in Italy’s the agri-food, fishing and aquaculture, forestry, floriculture and plant nursery sectors. The Facility shall operate by providing grants and subsidised loans directly through ISMEA (Istituto di Servizi per il Mercato Agricolo Alimentare). The amount of the Facility shall be EUR 2 billion, including the fees to be paid to ISMEA.

The Facility shall be managed by ISMEA as the implementing partner. The Fund shall include the following product lines:

- Support enterprises, groups of enterprises or agricultural producer associations as well as research and knowledge-dissemination organisations, in the agri-food, fishing and aquaculture, forestry, floriculture and plant nursery sectors by improving production processes by including a mix of activities amongst the following:
  - Improve the environmental sustainability of production processes with investments in tangible and intangible assets to substantially increase the efficiency in energy, water and resources consumption of the targeted production processes;
  - Investments in knowledge, training, research and innovation, technology transfer and development projects, which may also support the reorganisation of relations between the various actors in the supply chain, to enhance the sustainability of production processes;
  - Investments in the digitalisation of enterprises, including e-commerce and emerging technologies;
  - Installation of photovoltaic and solar panels

---

\(^{38}\) Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

\(^{39}\) Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\(^{40}\) This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\(^{41}\) This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
The objective of the measure is to reduce greenhouse gas emissions, food waste and the use of pesticides and antimicrobials, improving energy efficiency and increasing the production and use of renewable energy.

In order to implement the investment into the Facility, the Ministry and ISMEA shall sign an Implementing Agreement that shall include the following content:

1. Description of the decision-making process of the Facility: The final investment decision of the Fund shall be taken by an investment committee or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government.

2. Key requirements of the associated investment policy, which shall include:
   a. The description of the financial product(s) and eligible final beneficiaries.
   b. The requirement that all investments supported are economically viable.
   c. The requirement to comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the investment policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use, (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks, (iii) activities and assets related to waste landfills, incinerators and mechanical biological treatment plants.
   d. The requirement that final beneficiaries of the Fund shall not receive support from other Union instruments to cover the same cost.

3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to reinvest any reflows according to the investment policy of the Facility.

4. Monitoring, audit, and control requirements, including:
   a. The description of the implementing partner’s monitoring system to report on the investment mobilized.
   b. The description of the implementing partner’s procedures that shall ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.

---

42 Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

43 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

44 This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

45 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
c. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.

d. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of ISMEA. These audits shall verify i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) compliance with the DNSH principle, the State Aid rules, the climate and digital tagging requirements in accordance with Annex VI to the RRF Regulation and with Annex VII to the RRF Regulation; and iii) that the requirement that final beneficiaries of the Fund have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement and Funding Agreements are being respected.

5. Requirements for climate investments carried out by the implementing partner: at least EUR 924,000,000.00 of the RRF investment into the Fund shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation.46

The implementation of the measure shall be completed by transferring the total amount of resources to ISMEA for the Fund by 31 August 2026.

D.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

---

46 Final beneficiaries associated to specific projects shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution. For the purpose of the computation of the climate contribution, final beneficiaries from equity, quasi-equity, corporate bonds or equivalent instruments not targeted to specific projects shall provide a justification for the selected intervention field(s). The implementing partner shall also be required to provide to the Member State a semi-annual report on the implementation of each project/activity.

</tbody>
</table>
Overall, the climate contribution of the investment as per the methodology in Annex VI of the Regulation (EU) 2021/241 shall account for at least 37% of the total cost of the investment supported by the RRF.

The eligible interventions for funding are:
- energy efficiency interventions;
- development and/or upgrading of collective mobility services and infrastructures; buses and boats powered by electricity; shelters for public transport services; car sharing, bike sharing, scooter sharing;
- construction and/or adaptation of cycle routes, construction of sheltering areas;
- efficient separate collection with strengthening of collection systems;
- construction/modernisation of ecological islands with associated re-use centre;
- desalination systems;
- renewable energies plants for the electricity, including photovoltaic, wind offshore and marine renewable energy such as wave or tidal power;

E. MISSION 2 COMPONENT 2: Energy transition and sustainable mobility

This component of the Italian recovery and resilience plan covers investments and reforms in energy transition. It includes reforms to facilitate the permitting of projects of renewable energy sources. The component contains investments in renewables supply chain, hydrogen power, bio-methane facilities and smart grids. These reforms and investments are complemented by reforms to increase competition in the electricity market in the “business environment” reform component.

This component also covers investments and reforms in sustainable mobility. It includes reforms to facilitate the permitting of projects of sustainable mobility. The component contains investments to build cycling paths and metro/tram/bus rapid transit infrastructures and to procure zero-emission buses, rolling stock, firefighting and airport vehicles. These reforms and investments are complemented by reforms to remove regulated prices for electric charging and increase competition in charging point concessions, regional railways and local public transport in the “business environment” reform component.

The investments and reforms under this component shall contribute addressing the country-specific recommendations addressed to Italy in 2020 and 2019 on the need to “focus investment on the green and digital transition, in particular on […] clean and efficient production and use of energy […] sustainable public transport” (CSR 3, 2020) and to “focus investment-related economic policy on […] and the quality of infrastructure, considering also regional disparities” (country-specific recommendation 3, 2019).

The component supports the guidelines issued to Italy on the implementation of its National Energy and Climate Plan (SWD(2020) 911 final), that were inviting Italy to promoting, revamping and repowering existing renewable installations, in particular existing wind power plants and to explore innovative offshore energy across the Mediterranean.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

E.1. Description of the reforms and investments for non-repayable financial support

Reform 1 - Simplification of authorization procedures for renewable onshore and offshore plants and new legal framework to sustain the production from renewable sources and time and eligibility extension of the current support schemes

This reform consists in:

- The entry into force of a regulatory framework for installations of renewable energy sources and the repowering and revamping of existing plants;
- The entry into force of a regulatory framework defining criteria for the identification of the areas suitable and not suitable for the installation of renewable energy plants with a total power greater than 50 GW in accordance with the Italian National Energy-Climate Plan and with the objectives of the Green Deal; the regulatory framework is agreed between Regions and the other State Administrations concerned
- Completing the Renewable Energy Sources support mechanism also for additional non-mature technologies or technologies with high operating costs and extending the auction run period for the so called RES1 mechanism (also to reflect the slowdown caused by the period of health emergency), while maintaining the principles of competitive access;
- The entry into force of provisions promote investment in storage systems in the decree transposing Directive (EU) 2019/944 on common rules for the internal market in electricity.

Reform 2 - New legislation to promote renewable gas production and consumption

This reform consists in reinforcing support for clean bio-methane by adopting legislation to increase the scope of bio-methane projects eligible for support and extend the period of time for the availability of grants. The biomethane shall comply with criteria set out in Renewable Energy Directive 2018/2001/EU (REDII) in order to allow the measure to comply with Do-Not-Significant-Harm principle and with the relevant requirements of footnote 8 of Annex VI of the Regulation (EU) 2021/241.

Reform 3 - Administrative simplification and reduction of regulatory barriers to hydrogen deployment

This reform consists in the entry into force of a legislative framework to promote hydrogen as a renewable source of energy. This legislative framework shall contain:
- Technical safety regulations on production, transport, (technical and regulatory criteria for the introduction of hydrogen into the natural gas network), storage and use of hydrogen;
- A fast-track authorization procedure with a one stop shop procedure to obtain the authorisation to build and operate a small scale hydrogen production plant (for electrolyser facilities of less than 1-5 MW; the storage threshold shall be defined in the aforementioned technical safety regulations of hydrogen).
- Regulation of the participation of hydrogen production plants in network services. The Energy Regulator (ARERA) shall be tasked to issue a specific regulatory measure upon consultation of the stakeholders.
- A system of guarantees of origin for renewable hydrogen in order to give price signals to consumers.
- Procedures and/or criteria to define the selected refuelling areas along the motorways for the optimisation of the location of the refuelling stations to create H2 corridors for trucks, starting from the Northern Italian Regions as far as the Po Valley and logistic hubs and the main highways along the peninsula.
- The coordination of the 10-year Development plan of the national Transmission System Operator (TSO) with the plans of other European TSOs aimed at the development of common standards for hydrogen transport by means of existing gas pipelines or dedicated pipelines.

Reform 4 - Measures to promote hydrogen competitiveness

This reform consists in adopting tax measures to incentivise the production and/or utilisation of hydrogen, in line with EU rules about taxation, and transposing RED II Directive. This measure shall support hydrogen production based on electrolysis using renewable energy sources as defined in the Directive (EU) 2018/2001 (renewable Directive) or grid electricity.
Reform 5 - Smarter procedures for project evaluation in the local public transport systems sector with fixed installations and in the rapid mass transport sector

This reform consists in adopting a legislation assigning clearly responsibilities in the approval of local public transport projects and a simplification of the payment procedure.

Investment 4.1 - Investment in soft mobility (National Plan of Cycle Path)

This investment consists in building at least 565 km of cycling lanes in metropolitan areas and at least 746 km of tourist cycle paths. The metropolitan cycle paths shall be developed in at least 40 metropolitan areas or cities hosting universities. Cycle paths shall facilitate first-mile and last-mile commuting – connecting locations in metropolitan areas to nearby railway or metro nodes, or universities to nearby railway or metro nodes. The eligible tourist cycle paths are defined in Law no. 208 of 28 December 2015.

Investment 4.3 – Installation of charging infrastructures

This investment consists in supporting the development of:
- 7,500 fast public charging infrastructure points on freeways;
- 13,755 fast public charging infrastructure points on urban centers;
- 100 experimental charging stations connected to storage.

This investment is complemented by reforms on electric charging prices and concessions listed in the business environment reform component.

E.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

E.3. **Description of the reforms and investments for the loan**

**Investment 1.1 - Development of agri-voltaic systems**

This investment consists in grants and loans supporting investments for the construction of agri-voltaic systems and the installation of measuring instruments to monitor the underlying agricultural activity to assess the microclimate, water saving, recovery of soil fertility, resilience to climate change and agricultural productivity for the different types of crops.

**Investment 1.2 - Promotion of RES for energy communities and jointly acting renewables self-consumers**

This investment consists in support the installation of 1,730 MW of new power generation capacity for collective self-consumption configurations and renewable energy communities, in particular in Municipalities with populations below 5,000 inhabitants. The support is based on grants for the construction of renewable energy sources and production plants, coupled to energy storage systems.

**Investment 1.4 - Development of bio-methane, according to criteria for promoting the circular economy**

This investment consists in:

- Support for the construction of new plants for the production of bio-methane
- Reconvert and improving the efficiency of existing agricultural biogas plants (including Organic Fraction of Urban Solid Waste – OFUSW) towards the production of biomethane for transport, industry and heating. The biomethane shall comply with the criteria set out in Directive 2018/2001 (RED II Directive) in order to allow the measure to comply with Do-No-Significant-Harm principle and with the relevant requirements of footnote 8 of Annex VI of the Regulation (EU) 2021/241
- Replacing obsolete and low-efficiency mechanical vehicles with vehicles that run solely with biomethane compliant with the criteria set out in Directive 2018/2001 (RED II Directive). Biofuel and biomethane gas and biofuel producers shall have to provide certificates (Proof of Sustainability) issued by independent evaluators, as provided for in Directive 2018/2001. The operator shall purchase guarantee of origin certificates commensurate to the expected fuel use
- Diffusing ecological practices in the biogas production phase (sites of minimal soil processing, innovative low-emissivity systems for the distribution of digestate).

**Investment 2.1 - Strengthening smart grids**

This investment consists in the transformation of the distribution networks and their management, with interventions on both the electricity grid and its software components, to enable new energy scenarios where consumers and prosumers can also play a role.

**Investment 2.2 - Interventions to increase the resilience of the power grid**

This investment consists in interventions to improve the resilience of the electricity grid to extreme weather events (wind/falling trees, ice, heat waves, flood and hydrogeological risk), particularly on the distribution grid, and to reduce the probability of prolonged interruptions of electricity supplies and the negative social and economic consequences on the affected areas.

**Investment 3.1 - Production of Hydrogen in brownfield sites (Hydrogen Valleys)**
This investment consists in supporting the local production and use of green Hydrogen in industry, SME’s, and local transport, thus creating new Hydrogen Valleys, mainly located in the South of Italy, with local production from renewable energy sources and local use. The project has the objective of a re-use of abandoned industrial areas to testing units for hydrogen production from local RES plants located in the same industrial space and facilities or in neighbouring areas. This measure shall support hydrogen production based on electrolysis using renewable energy sources as defined in the Directive (EU) 2018/2001 (renewable Directive) or grid electricity.

**Investment 3.2 - Hydrogen Use in hard-to-abate industry**

This investment consists in supporting R&D&I on industrial processes to develop initiatives to use hydrogen in industrial sectors that use methane as an energy source for thermal energy (cement, paper mills, ceramic, glass industries, etc.). The fossil fuel sector such as oil refineries shall not be eligible. This measure shall support hydrogen production based on electrolysis using renewable energy sources as defined in the Directive (EU) 2018/2001 (renewable Directive) or grid electricity.

In order to ensure that the measure complies with the ‘Do no significant harm’ principle under the Recovery and Resilience Facility as set out in the DNSH Technical Guidance (2021/C58/01), the eligibility criteria in upcoming calls shall exclude activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks. Where the activity achieves projected greenhouse gas emissions that are not significantly lower, but still lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

**Investment 3.3 - Hydrogen testing for road transport**

This investment consists in creating at least 40 hydrogen-based refuelling stations located at motorway service areas, logistic warehouses and ports in accordance with the requirements of Directive 2014/94 on Alternative Fuels Infrastructure.

**Investment 3.4 - Hydrogen testing for railway mobility**

This investment consists in building at least ten refuelling stations for railway based on hydrogen along at least six railway lines. The hydrogen train refuelling stations shall be realised preferably near local renewable hydrogen production sites and/or motorway hydrogen refuelling stations.

**Investment 3.5 - Hydrogen Research and Development**

This investment consists in supporting hydrogen R&D activities in:

- Green and Clean Hydrogen production
- Innovative technologies for hydrogen storage, transport and transformation into derivates and e-fuels
- Fuel Cells for stationary and mobility application
- Integrated smart management systems to increase the resilience and reliability of intelligent hydrogen-based infrastructures

This measure shall support hydrogen production based on electrolysis using renewable energy sources as defined in the Directive (EU) 2018/2001 (renewable Directive) or grid electricity, or hydrogen activities that comply with the life-cycle GHG emissions savings requirement of 73.4% for hydrogen [resulting in life-cycle GHG emissions lower than 3tCO2e/th2] and 70% for hydrogen-based synthetic fuels relative to a fossil fuel comparator of 94g CO2e/MJ in analogy to the approach set out in Article 25(2) of and Annex V to Directive (EU) 2018/2001.
**Investment 4.2 - Development of Rapid Mass Transport systems (metro, streetcar, BRT)**

The objective of the measure is to increase rapid mass transport system ridership, favouring a modal shift from car transport to public transport.

This investment consists in:

- The construction of new lines and extension of existing lines of rapid mass transport systems for at least 231 km. The list of projects shall include at least 96 km of metro lanes or tramway, and at least 135 km of trolleybus or cableway.
- The upgrade of the infrastructure of rapid mass transport systems, including their digitalisation. These interventions include the upgrade of metro stations and of metro track infrastructure, signalling systems for railway or tramway, public transit depots.
- The purchase of zero-emission rolling stock for rapid mass transport systems.

Interventions included in this measure result from two distinct calls for expressions of interest (Macro groups):

  a) call “Avviso 1” (final term in 2020) – realization of at least 7 interventions in metropolitan areas\(^{49}\) including Rome, Genoa, Florence, Palermo, Bologna, Rimini;

The infrastructure eligible for both construction and upgrade shall be dedicated to zero-emission rolling stock (namely metro lanes, tramway lines, trolleybus lanes and/or cableway). The investment shall not involve the construction or upgrade of roads.

**Investment 4.4.1 - Strengthening of the regional public transport zero- emission bus fleet**

This investment consists in the procurement of at least 3 000 zero-emission low-floor buses and at least 1 000 charging stations for zero-and low-emission low-floor buses. Buses shall be equipped with digital features. Eligible buses are low-floor (that is, they belong to the M2 and M3 category of vehicles according to UNECE standards) and are either electric or hydrogen fuel cell.

**Investment 4.4.2 – Strengthening of the regional public transport railway fleet with zero emission trains and universal service**

This investment consists of the procurement and entry into service of at least 66 zero emission passengers’ trains\(^{50}\) (whereby a train is composed by at least one locomotive and includes passengers’ carriages) and additional 100 carriages for universal service. Overall, the investment shall provide at least a total of 523 units, out of which at least 66 shall be locomotives.

**Investment 4.4.3 – Renewal fleet for the National fire brigade command**

This investment consists in the procurement of 200 airport vehicles and 3 600 fire-fighting vehicles to replace the entire vehicle fleet of the National Fire Brigade and the realisation of 875 charging stations. Vehicles are zero-emission or run solely in bio-methane compliant with the sustainability and greenhouse gas emission savings criteria set out in Articles 29-31 and the rules on food and feed based biofuels set out in Article 26 of the Renewable Energy Directive 2018/2001/EU (REDII), and related implementing and delegated acts. The operators shall purchase guarantee of origin certificate commensurate to the expected fuel use.

---

\(^{49}\) Metropolitan areas are meant in this measure as “functional urban areas”, as defined in the European Commission-OECD database (Dijkstra, L., H. Poelman and P. Veneri (2019)).

\(^{50}\) In line with intervention field 72 bis of Annex VI to Regulation (EU) 2021/241, it also applies to bi-mode trains.
**Investment 5.1 – Development of an international, industrial and R&D leadership in renewables and batteries**

This measure shall consist of a public investment in a Facility, the “Renewables and batteries facility”, in order to incentivize private investments and improve access in finance to support the development of a value chain in renewables and batteries. The Facility shall operate by providing non-repayable grants, subsidised loans, and interest subsidies directly to the private sector. On the basis of the RRF investment, the Facility aims at initially providing at least 1 400 000 000 euros of financing.

The Facility shall be managed by Invitalia S.p.A. as the implementing partner. The Facility shall include the following product lines:

- The first one focuses on the manufacturing of batteries and shall increase the manufacturing production capacity of photovoltaic or wind technologies by at least 2.4 GW/year.
- The second one focuses on the manufacturing of photovoltaic or wind technologies and shall increase the manufacturing production capacity of batteries by at least 13 GW/year.

In order to implement the investment into the Facility, Italy and Invitalia shall sign an Implementing Agreement that shall include the following content:

1. **Description of the decision-making process of the Facility**: The final investment decision of the Facility shall be taken by an investment committee or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government.

2. **Key requirements of the associated investment policy**, which shall include:
   
   e. The description of the financial products and eligible final beneficiaries.
   
   f. The requirement that all investments supported are economically viable.
   
   g. The requirement to comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the investment policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use[^51], (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks[^52], (iii) activities and assets related to waste landfills, incinerators[^53] and mechanical biological treatment plants[^54].

---

[^51]: Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

[^52]: Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

[^53]: This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

[^54]: This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
h. The requirement that final beneficiaries of the Facility shall not receive support from other Union instruments to cover the same cost.

3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to reinvest any reflows according to the investment policy of the Facility.

4. Monitoring, audit, and control requirements, including:
   i. The description of the implementing partner’s monitoring system to report on the investment mobilized.
   j. The description of the implementing partner’s procedures that shall ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.
   k. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.
   l. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of the Invitalia SPA. These audits shall verify:
      i. that the control systems are effective, including the detection of fraud, corruption, and conflict of interests;
      ii. compliance with the DNSH principle, the State Aid rules, the climate target requirements;
      iii. that the requirement that final beneficiaries of the Facility have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement are being respected.

5. Requirements for climate investments carried out by the implementing partner: at least EUR 1 000 000 000 of the RRF investment into the Facility shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation.

The implementation of the measure shall be completed by 31 August 2026.

Investment 5.2 - Development of an international, industrial and R&D leadership in hydrogen

This investment consists in supporting projects for the development of a value chain in hydrogen in Italy that is fit also to participate in potential Important Projects of Common European Interest in Hydrogen.

Investment 5.3 – Development of an international, industrial and R&D leadership in electric buses

This investment consists in supporting about 45 projects that can promote the digital and green transformation of bus industry to product electric and connected buses. This investment is also expected to support investments on the renewal of the electric bus fleet (without covering hybrid buses).

55 Final beneficiaries associated to specific projects shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution. For the purpose of the computation of the climate contribution, final beneficiaries from equity, quasi-equity, corporate bonds or equivalent instruments not targeted to specific projects shall provide a justification for the selected intervention field(s). The implementing partner shall also be required to provide to the Member State a semi-annual report on the implementation of each project/activity.
Investment 5.4 – Support to start-ups and venture capital active in the ecological transition

This measure shall consist of a public investment in a Facility, the Green Transition Fund, in order to incentivize private investments, improve access to finance in Italy for start-ups involved in the green transition and develop the venture capital market in this sector. The Facility shall operate by providing equity or quasi equity support, directly or indirectly. In particular, in case of direct investments, the GTF shall operate by providing equity or quasi equity (like as convertible notes) support to start-ups; in case of indirect investments, the SGR shall operate by financing third party funds (–AIF – Alternative Investment Fund) which shall operate by providing equity or quasi equity, debt or quasi-debt instruments. The GTF shall invest in the following areas of intervention: renewables, circular economy, mobility, energy efficiency, waste management and energy storage.

On the basis of the RRF investment, the Facility aims at initially providing at least EUR 250 000 000 of financing.

The Facility shall be managed by CDP Venture Capital SGR as the implementing partner. GTF shall have a duration of 15 years, in order to match the duration of the invested third-party funds and shall invest in the following product lines:

- Equity or quasi equity support to green start-ups (direct manner);
- Equity, quasi equity support to venture capital equity/debt funds (indirect manner);
- Support in the form of equity or quasi equity financing to incubation/acceleration programs.

MIMIT and the SGR shall amend the current Implementing Agreement (“Accordo Finanziario”) and the GTF Rules, in order to include the following provisions:

1. Description of the decision-making process of the Facility: the final investment decision of the Facility shall be taken by a board of directors or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government.

2. Key requirements of the associated investment policy, which shall include:
   a. The description of the financial products and eligible final beneficiaries.
   b. The requirement that all investments supported are economically viable.
   c. The requirement to comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, in the case of general support to start-ups, the investment policy shall exclude companies with a substantial focus in the following sectors: (i) fossil fuel-based energy production and related activities; (ii) energy-intensive and/or high CO2-emitting industries; (iii) production of.

56 CDP Venture Capital SGR performs the management activities in compliance with the principles of independence and autonomy under AIFM Directive.
57 It is considered that a Final Beneficiary has a “substantial focus” on a sector or business activity if such sector or activity is identified as being an essential part of the business activity of the Final Beneficiary respectively in relation to the gross revenue, profit, or client base of the Final Beneficiary. The gross revenue generated from the restricted sector or activity shall, in any case, not exceed 50% of the gross revenue.
58 Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.
59 Including activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks. Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.
rental, or sale of polluting vehicles\(^{60}\); (iv) waste collection, waste treatment and disposal\(^{61}\), (v) processing of nuclear fuel, production of nuclear energy. Furthermore, the investment policy shall require compliance with the relevant EU and national environmental legislation of the final beneficiaries of the Facility.

d. The requirement that final beneficiaries of the Facility shall not receive support from other Union instruments to cover the same cost.

3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to reinvest any reflows according to the investment policy of the Facility.

4. Monitoring, audit, and control requirements, including:
   1. The description of the implementing partner’s monitoring system to report on the investment mobilized.
   2. The description of the implementing partner’s procedures that shall ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.
   3. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.
   4. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of the SGR. These audits shall verify i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) the compliance with the DNSH principle, the State Aid rules; and iii) that the requirement that final beneficiaries of the Facility have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement and Funding Agreements are being respected.

5. Requirements for selecting venture capital equity/debt funds: The Green Transition Fund shall select financial intermediaries in an open, transparent, and non-discriminatory manner, in line with the current practice – among other – by publishing all requirements and application forms on both the SGR and MIMIT websites. Controls for the absence of conflict of interests on financial intermediaries shall take place and be conducted ex-ante for all financial actors involved. The absence of conflict of interest always refers to the “final beneficiary” of the Facility.

6. Requirement to sign Funding Agreements: The GTF shall sign Funding Agreements with the financial intermediaries in line with key requirements that shall include all the requirements under which the GTF operates, including:
   1. The obligation of the financial intermediary to take its decisions in compliance mutatis mutandis with the decision making and investment policy requirements specified above, including related to respect of the DNSH principle.

\(^{60}\) Polluting vehicles are defined as non-zero-emission vehicles.

\(^{61}\) This exclusion does not apply to actions in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
2. The description of the monitoring and audit and control framework that the financial intermediary shall put in place, which *mutatis mutandis* shall be subject to all the monitoring, audit and control requirements specified above.

The implementation of the measure shall be completed by 31 August 2026.

</table>

At least 10 R&D projects carried out (one for each R&D dimension hereunder) and provided with a test certificate or publication.

Four lines of R&D activities shall be developed, with reference to:

a) Green and Clean Hydrogen production

b) Innovative technologies for hydrogen storage, transport and transformation into derivates and e-fuels

c) Fuel Cells for stationary and mobility application

d) Integrated smart management systems to increase the resilience and reliability of intelligent hydrogen-based infrastructures.

This measure shall support hydrogen production based on electrolysis using renewable energy sources as defined in the Directive (EU) 2018/2001 (renewable Directive) or grid electricity, or hydrogen activities that comply with the life-cycle GHG emissions.

F. MISSION 2 COMPONENT 3- Energy efficiency and requalification of buildings

Energy efficiency is the cornerstone of this component, which is organised across three main pillars.

- The first pillar is the introduction of a temporary incentive for energy and anti-seismic renovation of private real estate, through a tax deduction of the costs incurred for the interventions. The eligible interventions are those which increase the energy performance of the dwelling by at least by two categories of the Energy Certificate, achieving on average an improvement in energy consumption above 30%.
- The second pillar of this component is the improvement of the efficiency and safety of public schools and judicial citadels.
- The third pillar is aimed at stimulating construction and expansion of efficient district heating networks in urban areas.

In addition, there are a number of reforms to simplify and accelerate the implementation of projects aimed at improving the energy efficiency of buildings.

This component is expected to strongly contribute to the achievement of Italy’s climate and energy targets for 2030 as the civil sector is responsible for almost a half of total energy consumption in Italy. Most buildings were built before the adoption of the criteria for energy saving and the entry into force of the corresponding legislation, and so the needs in terms of energy efficiency and adaptation to seismic risks are significant.

This component addresses part of the 2020 country-specific recommendation 3 by which the Council recommended Italy to take action to ‘Focus investment on the green and digital transition, in particular on […] water management as well as reinforced digital infrastructure to ensure the provision of essential services’. It also addresses parts the 2019 country-specific recommendations 3 (‘Focus investment-related economic policy on the quality of infrastructure, taking into account regional disparities. […] and improve the effectiveness of public administration […] by accelerating digitalisation, and by increasing the efficiency and quality of local public services’).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

F.1. Description of the reforms and investments for non-repayable financial support

Investment 2.1: Strengthening of the Ecobonus for energy efficiency

The Superbonus measure finances the energy renovation of residential buildings, including social housing as specified in Article 119 of the so-called ‘Decreto Rilancio’ adopted to address the adverse economic and social effects of the pandemic. The goal is twofold: 1) to make a significant contribution to the achievement of the energy saving and emission reduction targets set by the Integrated National Plan for Energy and Climate of Italy (PNIEC) for 2030, and 2) to provide counter-cyclical support to the construction sector and to private demand to offset the effects of economic downturn.

The support is provided in the form of a tax deduction over five years. Until 16 February 2023, it is provided that the recipients, as an alternative to the instrument of tax deduction, may,
instead of the direct use of the deduction, choose to use financial instruments (so-called "credit transfer" and "invoice discount"), to address the problem of the high initial investment costs. These alternative instruments provide that the tax deduction accrued by the beneficiary is made for an equal amount in:

1. a contribution in the form of a discount on the prepayment price from the supplier (i.e. construction companies, designers, or more generally the general contractor) who discounts it directly on the invoice and recovered in the form of a tax credit reducing the cost of the initial investment;

2. a tax credit to be ceded to a financial institution, which shall pay upfront the necessary capital. This mechanism offsets the possible disincentive to making the renovation because of the high initial investment costs. The choice of the general contractor or the financial institution shall be left to the beneficiary.

Condominiums, single-family buildings, undivided housing cooperatives, non-profit organizations and voluntary associations, amateur sports associations and clubs and social housing may benefit from this tax incentive. To be eligible, the renovation must be classified as "deep renovation" (that is, a medium renovation according to Commission Recommendation (EU) 2019/786), thus entailing an improvement of at least two energy classes (corresponding on average to primary energy saving of 40%). The scope of eligible interventions covered by this measure is wide, including for instance driving interventions, towed interventions, thermal insulation of opaque surfaces, and interventions on air conditioning systems (condensing boilers; heat pumps; connection to efficient district heating networks under specific conditions; solar thermal; biomass boilers under specific conditions), PV systems with related storage systems or infrastructure for charging electric vehicles. Two ministerial decrees of 6 August 2020 have already defined the technical requirements of the interventions and the procedures to certify compliance with the specific maximum requirements and costs.

The Superbonus has already been active since 1 July 2020 and shall remain in force until 30 June 2022 (for social housing until 31 December 2022). Access to the benefit may be required for a further period of six months, in the case of works on condominiums or social housing, when at least 60% of the works has been carried out before the dates indicated above. To give more time to more complex interventions it is planned to extend the application of the measure for condominiums until December 31, 2022 and for social housing until June 30, 2023, regardless of the completion of at least 60% of the works.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the cost of installing gas-condensing boilers shall represent at most 20% of the overall renovation programme cost. In those cases where gas-condensing boilers are installed as the chosen replacement of existing inefficient gas, coal and oil-based boilers, they shall have an A performance. Additionally, the installation of natural-gas boilers shall be compliant with the conditions set up in the DNSH Technical Guidance (2021/C58/01).

Reform 1.1- Simplification and acceleration of procedures for energy efficiency interventions
This reform aims to simplify and accelerate the procedures for the implementation of interventions related to energy efficiency. It consists of four major actions:

- **Launching of the national portal for the energy efficiency of buildings:** The Portal shall support citizens and operators in managing energy efficiency projects and shall be an easy source for accessing information for decision-makers. It shall contain information on the energy performance of the national building stock, which is expected to help firms and citizens in their decisions of improving the energy performance of their property. A one-stop shop shall be set-up to provide assistance and all useful information to citizens and businesses relating to energy mapping of buildings, compliance with sector regulations, evaluation of the potential for efficiency and selection of priorities for action, including redevelopment plans in stages, the selection of the most appropriate promotional tools for the purpose, and the training of professional skills.

- **Strengthening of the activities of the information and training plan aimed at the civil sector** - The Information and Training Plan shall take into account the need to develop both specific initiatives aimed at filling the information gap of end users in the residential sector, and appropriate training activities on incentives and on the most effective interventions for companies that offer energy services, that carry out interventions and for condominium administrators. The Plan shall be developed taking into account the needs resulting from the Superbonus measure, in order to maximize its effectiveness and lay the foundations for a lasting culture of efficiency in construction.

- **Updating and strengthening of the National Fund for energy efficiency:** With the revision of the regulations for the establishment and management of the National Energy Efficiency Fund (Article 15 of Legislative Decree 102/2014, and Interministerial Decree of December 22, 2017) amendments shall enter into force to foster the enhancement and greater use of available resources.

- **Accelerating the implementation phase of projects financed by the Central Public Redevelopment Programme EPAC program:** A regulatory review shall be carried out aimed at promoting a more efficient management of resources specifically allocated to the Building Requalification Programme of the Central Public Administration (PREPAC).

F.3. Description of the reforms and investments for the loan

**Investment 1.1: Construction of new schools through building replacement**

This measure shall focus on the progressive replacement of part of the building stock of public schools with the aim of creating modern and sustainable structures.

The objectives of the interventions are the reduction of energy consumption, an increased seismic safety of buildings, and the development of green areas.

The plan is expected to target 166 school buildings, with a total of 400 thousand m².

**Investment 1.2- Construction of buildings, requalification and strengthening of real estate assets of the administration of justice**

This measure aims at the renovation and requalification of inadequate structures of the administration of justice.

The intervention focuses on the maintenance of existing assets, enabling protection, valorisation and restoration of the historical heritage that often characterises the administration’s offices the Italian justice system. In addition to energy efficiency, the programme also aims to ensuring the economic, environmental and social sustainability of interventions through the use of sustainable materials and the use of self-generated electricity from renewable sources. The interventions may also adapt the structures to reduce the seismic vulnerability of buildings.

The indicative list of municipalities where the interventions shall take place is the following: Bari, Bergamo, Bologna, Cagliari, Florence, Genoa, Latina, Messina, Milan, Monza, Naples, Palermo, Perugia, Reggio Calabria, Rome, Rome, Trani, Turin, Velletri and Venice.

The intervention shall not include natural gas boilers.

**Investment 3.1: Promotion of efficient district heating**

District heating plays an important role in the achievement of the environmental objectives of the heating and cooling sector, particularly in large urban areas where the problem is even more acute.

The measure shall develop efficient district heating, based on the distribution of heat generated from renewable sources, from waste heat or cogenerated in high-performance plants. The measure shall finance projects to be selected through a tender to be launched in 2022, relating to the construction of new networks or the extension of existing district heating networks. A subsequent tender may be launched in 2023. Priority shall be given to projects that guarantee the greatest savings in non-renewable primary energy.

Energy-environmental benefits equal to 20 ktoe of primary fossil energy per year and 40 kton CO2 of greenhouse gas emissions avoided in the non-ETS sectors each year are expected to be reached.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). In particular, the building of an efficient district heating system shall not use fossil fuels as a heat source but rely solely on heat generated from renewable sources, from waste heat or cogenerated in high-performance plants. The associated infrastructure for district heating shall follow the Directive 2012/27/EU of the European Parliament and of the Council.

the Recovery and Resilience Facility.
G. MISSION 2 COMPONENT 4- Territorial planning and water resources

The aim of this component of the Italian recovery and resilience plan is to address a number of long-lasting weaknesses related to the management of water resources and hydrogeological risks in Italy and to adopt a number of measures aimed at preserving biodiversity. This is to be achieved through a significant and balanced combination of reforms and investments in those various dimensions.

On the reforms side, the component proposes a set of measures aimed principally at improving the efficiency in the management of water resources by reducing the fragmentation of the sector, by establishing an adequate pricing policy and by setting a number of incentives to tackle the existing problems related to wastewater management. Reforms in this component also include a set of measures to simplify the design and implementation of projects related to water infrastructure and to the management and reduction of hydrological risks.

The investments associated to this component shall contribute to mitigate and better manage the hydrogeological risk in Italy, both from a prevention and adaptation perspective and shall aim to make the infrastructure related to water more resilient. In addition, they aim to significantly improve the management of water resources through better wastewater management and a significant reduction of water leakages, including in the agricultural sector. The investments shall strengthen the digitalisation of those sectors and shall make them more energy efficient and better adapted to climate change. This component also incorporates a set of measures aimed at preserving biodiversity and green areas in line with the EU 2030 “Biodiversity Strategy”.

This component addresses part of the 2020 country-specific recommendation 3 by which the Council of the European Union recommended Italy to take action to ‘Focus investment on the green and digital transition, in particular on […] water management as well as reinforced digital infrastructure to ensure the provision of essential services’. It also addresses parts the 2019 country-specific recommendation 3 (‘Focus investment-related economic policy on the quality of infrastructure, taking into account regional disparities. […] and improve the effectiveness of public administration […] by accelerating digitalisation, and by increasing the efficiency and quality of local public services’).

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

G.1. Description of the reforms and investments for non-repayable financial support

Reform 2.1- Simplification and acceleration of the procedures for implementing interventions against hydrogeological instability

The aim of this reform is to overcome the existing weaknesses in the governance of hydrogeological risks highlighted by the Italian Court of Auditors. It shall consist of simplifying and accelerating procedures for the implementation of projects in this area, including establishing maximum deadlines for each phase; prioritising interventions in line with the National Risk Assessment and with Article 6 of the Decision 1313/2013 EU and Risk Management Capability Assessment and the Do No Significant Harm principle; setting a plan to increase the administrative capacity of the entities responsible for the implementation of
these projects and reinforcing the coordination between the various levels of government involved, including by streamlining the information flows.

**Reform 2- Reform of the legal framework for a better management and a sustainable use of water**

This reform shall aim to address the long-lasting problems of the water sector in Italy, reflected in many ongoing infringement procedures for non-compliance with the Council Directive 91/271/EEC, in an excessive fragmentation of the sector and in the absence of adequate incentives and pricing policies. The measures envisaged are expected to significantly reduce the fragmentation of the sector by reducing the number of operators and encouraging economies of scale, setting incentives to reduce water leakages and the excessive consumption of water by the agricultural sector and establishing adequate pricing policies for a more sustainable consumption of water.

A set of Memoranda of Understanding (MoU) shall be signed with the regions Campania, Calabria, Molise and Sicilia to reduce fragmentation in the number of operators providing water services. The MoU shall set objectives in terms of setting Local Government Bodies, reducing the number of operators and achieving economies of scale with a view to setting single operators for at least each 40,000 inhabitants within the two years following the signature of those MoU.

**Reform 4.2 “Measures to ensure full managerial capacities for Integrated water services”**

This reform aims to address major problems in the management of water resources and make the system more efficient.

The system is expected to reduce the existing fragmentation in the number of operators, which currently hinders an efficient use of water resources in some parts of the country. The reform is also expected to set the right incentives for a better use of water resources in the agricultural sector, to introduce a system of penalties for the illegal extraction of water and to introduce a system of prices which reflects better and is more in line with the polluter-pays principle while avoiding the expansion of existing irrigation systems. The measures shall be adopted in cooperation with the regions where the management of water resources is more problematic at present.

**Investment 3.2- Digitization of national parks and marine protected areas**

This measure shall set standardised and digitised procedures for the modernisation, efficiency and effective functioning of protected areas in its various dimensions such as nature conservation, administrative simplification of procedures and services to visitors of national parks and marine protected areas. After the intervention the monitoring of natural resources is expected to have improved so as to take the necessary preventive and corrective measures when necessary for the protection of biodiversity. It is also expected to lead to better services and awareness about biodiversity to visitors of national parks and marine protected areas for a more sustainable tourism and responsible consumption of natural resources.

G.3. Description of the reforms and investments for the loan

Reform 3.1 Adoption of national programs on air pollution control

The reform aims to align national and regional legislation, and to introduce related measures for the reduction of emissions of air pollutants (in accordance with targets set by Directive 2016/2284 on national emission ceilings and altering climate gases).

Investment 1.1: Implementation of an advanced and integrated monitoring and forecast system

The investment shall develop a monitoring system to identify and predict risks as a result of climate change and inadequate spatial planning through the use of advanced technologies. These technologies shall allow remote control of large territorial bands setting the basis for the development of risk prevention plans, including the reinforcement of existing infrastructure, and the identification of illegal disposal of waste. The main instruments that shall be developed to achieve those objectives shall be the collection of spatial data using satellite observation systems, drones, remote sensors and integration of information systems; telecommunications networks with the most advanced security requirements; the set-up of central and regional control rooms, to have access to the information collected on the ground; and cyber security systems and services for protection against cyber-attacks. The interventions shall principally take place in the eight regions of the South.

Investment 2.1: Measures for flood and hydrogeological risk reduction

The Italian territory is characterised by a significant degree of hydrogeological instability, which has been exacerbated by the effects of climate change. This risk has a detrimental impact not only in the quality of life but also in the economic activity of the areas most exposed to this risk.

This measure is divided into two lines of action, with Protezione Civile and “Commissioner of Emergency for the reconstruction in the territories of Emilia Romagna, Tuscany, and Marche” affected by the May 2023 floods (Commissario per la ricostruzione nel territorio della regione Emilia Romagna, Toscana e Marche), as responsible Administration, respectively.

Regarding the first line of action, a broad and comprehensive set of interventions shall be undertaken to restore damaged public structures and infrastructures (type E interventions) and reduce residual risk strictly connected to the event and aimed primarily at protecting public and private safety (type D interventions).

The second line of action shall include interventions identified by the Commissioner of Emergency in particular the provinces of Ascoli Piceno, Bologna, Ferrara, Fermo, Firenze, Forlì-Cesena, Modena, Pesaro-Urbino, Ravenna, Reggio-Emilia, Rimini.

The interventions shall concern:

- Interventions to restore waterways and increase protection against floods. The interventions shall include as far as possible nature-based solutions. The interventions should also promote, to the extent possible, the adoption of sustainable soil and land management practices for supporting long term-resilience of soils, for stopping soil degradation and for mitigating the impacts of climate change;
- Rehabilitation interventions of the local and provincial road network. The interventions may include technical works to complementary infrastructures (including bridges) that have suffered damage and need to be repaired;
- Interventions to restore public buildings, including public houses and health centres.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the
measure and the mitigating steps set out in the recovery and resilience plan in accordance with the Do No Significant Harm Technical Guidance (2021/C58/01). The investment shall not foresee the installation or replacement of gas boilers, or the purchase of vehicles.

**Investment 3.1: Protection and enhancement of urban and peri-urban forests**

This measure aims to protect green areas and increase their number with the objective of both preserving and enhancing biodiversity and increasing the quality of life of the inhabitants of those areas. The actions shall concentrate on the 14 metropolitan cities of Italy, which are the most exposed to environmental problems like air pollution, loss of biodiversity or to the effects of climate change. Forest reproductive material (seeds or plants) shall be planted for those areas for at least 4 500 000 trees and shrubs (in 4 500 hectares) and at least 3.5 million trees shall be transplanted in their final destination.

The interventions shall follow the adoption of an urban forestation plan with the objectives of preserving and enhancing biodiversity in line with the European Biodiversity Strategy, reducing air pollution in metropolitan areas, bringing the number air quality infringement procedures down.

**Investment 3.3- Re-naturification of the Po area**

The Po Area is characterised by an excessive pollution of water, consumption of soil and excavations in the bed of river since 1970. All those problems have negatively affected some of its natural habitats and have increased hydrogeological risk.

This measure aims to reactivate natural processes and encourage the recovery of biodiversity. This would ensure the restoration of the river and a more efficient sustainable and efficient use of water resources.

**Investment 3.4: Remediation of orphan sites**

Industrial pollution has created many so-called ‘orphan sites’, which pose a risk significant for health, with severe implications for the quality of life of the populations concerned.

The aim of this intervention is to restore these lands reducing the environmental impact and promoting the circular economy. The project shall use the best available innovative investigation technologies to identify the real needs for remediation and enable the development of those areas, including for housing.

This measure shall first consist of the adoption of an Action Plan for the revitalisation of orphan sites to reduce land take and enhance urban regeneration. The Plan shall identify the orphan sites in all 21 regions and autonomous provinces and shall identify the specific interventions to be undertaken.

**Investment 3.5: Restoration and protection of seabed and marine habitats**

This measure includes large-scale actions for the restoration and protection of the seabed and the marine habitats, aimed at reversing the ongoing degradation of these ecosystems.

The specific actions to be implemented shall include the development of an adequate mapping of seafloor habitats and environmental monitoring. In order to ensure the adequate planning and implementation of large-scale restoration and protection measures, the national research and observation system for marine and coastal ecosystems shall be strengthened. In addition, marine observation platforms shall be enhanced to increase the technical-scientific capacity to monitor the marine environment, and in particular to assess the effectiveness of protection and management.
measures under the climate change scenario. Such investments shall then enable a systematic and comprehensive mapping of sensitive habitats in Italian marine waters, to implement environmental restoration and the designation of protected areas, in line with the 2013 EU Biodiversity Strategy and the Marine Strategy Framework Directive.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). By conducting research activities on marine ecosystems, the measure may involve the purchase of scientific equipment and/or ships. In particular, the newly constructed vessels will use the most advanced technologies available, ensuring to the maximum extent possible, pollution prevention and control.

Reform 4.1 Simplification of legislation and strengthening of governance for the implementation of investments in the water supply infrastructures

The current regulatory framework and the existing fragmentation in the management has a negative impact on the capacity for planning and implementing investments in water supply infrastructures.

The objective of this reform is to simplify and make more effective the legal framework and provide assistance when necessary to the implementing bodies with insufficient capacity to undertake and complete those investments within the timelines set originally.

The main measures planned to achieve those objectives are mainly through (i) the establishment of a central public financing instrument for investments in the water sector which unifies resources which are rather scattered at present; (ii) simplifying the procedures for reporting and monitoring of the investments financed, (iii) further involving of the Regulator in the planning of the investments to be undertaken and in possible revisions to the plan.

The Ministry of Infrastructure and Transport shall present the reform proposal relating to the water supply sector.

Investment 4.1 Primary water infrastructure for the security of water supply

The aim of this measure is to ensure the security of water supply for important urban areas and large irrigated areas, to increase safety and resilience of the network, and to improve the transport capacity of water. The measures shall cover the entire national territory, with a particular focus on larger installations in the South of the country.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the Do No Significant Harm Technical Guidance (2021/C58/01). In particular, for each sub-investment, full compliance with the requirements of EU law, including the Water Framework Directive, shall be ensured before, during and after the commencement of the construction works. Further, sub-measures are, where applicable, subject to an Environmental Impact Assessment (EIA) pursuant to Directive 2011/92/EU, as well as relevant assessments in the context of Directive 2000/60/EC and Directive 92/43/EEC, including the implementation of required mitigation measures. The measure shall not include the construction of new dams, but only the improvement of existing dams; the impacts of the planned interventions on existing works take into account the scenarios where the concerned river remains in its natural state as modified at the time of the construction of the work. All planned sub-interventions, including those relating to existing dams, must comply with the environmental authorization process required by national and Union law.
Investment 4.2. Reduction of losses in water distribution networks, including digitization and monitoring of networks

The fragmented and inefficient management of water resources has led to significant leakages of water, with average losses above 40% and over 50% in the South of the country. The objective of this project is to significantly reduce losses in drinking water by upgrading and modernising water distribution networks through advanced control systems that allow monitoring the main nodes and the most sensitive points of the network.

Investment 4.3. Investments in the resilience of the irrigation agrosystem for better management of water resources

The aim of this measure is to increase efficiency of irrigation systems through the development of innovative and digitalised infrastructure for a more sustainable agricultural sector as well as better adapted to climate change. The investment shall mostly consist of the conversion of irrigation systems towards higher efficiency systems; the adaptation of distribution networks in order to reduce losses; the installation of technologies for an efficient use of water resources, such as meters and remote control. Water metering enabling measurement of water shall be put in place as part of the supported investment.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the Do No Significant Harm Technical Guidance (2021/C58/01). In particular, for each sub-investment, full compliance with the requirements of EU law, including the Water Framework Directive, shall be ensured before, during and after the commencement of the construction works. Further, projects, when applicable according to national law, are subject to an Environmental Impact Assessment (EIA) pursuant to Directive 2011/92/EU, as well as relevant assessments in the context of Directive 2000/60/EC and Directive 92/43/EEC, including the implementation of required mitigation measures.

Investment 4.4. Sewerage and purification

The water systems present major weaknesses as regards sewerage and purification systems, which is reflected in a high number of infringement procedures for non-compliance with Union law of many agglomerations in the country.

The objective of this measure is to undertake investments which make the purification of wastewater discharged into marine and inland waters more effective and, where possible, transform purification plants into “green factories” for the reuse of purified wastewater for irrigation and industrial purposes. These investments are expected contribute to reducing the number of agglomerations with weak sewerage and purification systems.

- Irrigation investment should aim at making existing irrigation more efficient, even if the concerned water body is in good status.  

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the Do No Significant Harm Technical Guidance (2021/C58/01). In particular, for each subinvestment, full compliance with the requirements of EU law, including the Water Framework Directive, shall be ensured before, during and after the commencement of the construction works.  

Further, interventions, when applicable according to national law, shall be subject to an Environmental Impact Assessment (EIA) pursuant to Directive 2011/92/EU, as well as relevant assessments in the context of Directive 2000/60/EC and Directive 92/43/EEC, including the implementation of required mitigation measures.

H. MISSION 3 COMPONENT 1: Sustainable transport infrastructure

H.1. Description of the reforms and investments for non-repayable financial support

N/A

H.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

N/A
H.3. **Description of the reforms and investments for the loan**

The investments in this component support the deployment of railway infrastructure (high-speed, freight, regional railways, European Railways Traffic Management System). They are accompanied by reforms to accelerate railway infrastructure investments and to improve the quality of road infrastructure. The business environment reform component contains a measure creating additional incentives for Regions to tender out their regional railway public service contracts. This component contains measures to develop the use of hydrogen in railways.

This component support addressing the 2019 country-specific recommendation 3 urging Italy to ‘Focus investment-related economic policy on […] the quality of infrastructure taking into account regional disparities’ and the 2020 country-specific recommendation 3 on ‘Front-load mature public investment projects’ and to ‘Focus investment on the green and digital transition, in particular on clean and efficient production and use of energy, research and innovation, sustainable public transport, waste and water management as well as reinforced digital infrastructure to ensure the provision of essential services’.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

**Reform 1.1 - Acceleration of the approval process of the Contract between the Ministry of Infrastructure and Transport (MIT) and the railway infrastructure manager Rete Ferroviaria Italiana**

This reform consists in removing the requirement that Parliamentary Commissions express an opinion on the list of investments of the Contratti di Programma (CdP) of the railway infrastructure manager Rete Ferroviaria Italiana. The Parliamentary Commissions shall express an opinion on the strategic programme of investments.

**Reform 1.2 - Acceleration of the authorization process of projects**

This reform consists in adopting legislation allowing to anticipate the indication of the place of works at the time of the “Economic Technical Feasibility Project” (PFTE), instead of waiting for the definitive project design phase. Additional authorizations, which cannot be acquired on the PFTE, would be obtained in subsequent project design phases, without convening the “Conferenza dei Servizi”, as an exception to Law no. 241/1990. These changes shall reduce the authorisation time of projects from 11 to 6 months.

**Investment 1.1 - High-speed railway connections to the South for passengers and freight**

This investment consists in the construction of 119 km of high-speed railway infrastructure for passengers and freight in the lines Napoli-Bari, Salerno-Reggio and Palermo-Catania.

The assessment and authorisation of each relevant project or/ investment shall respect all the rules and procedures set in Articles 6.3 and 6.4 of the EU Directive 92/43/CEE and follow the national guidelines for Impact Assessment published in the Official Gazzette of the Italian Republic N°303 of 28 December 2019.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the
measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

**Investment 1.2 - High-speed lines in the North connecting to rest of Europe**

This investment consists in the construction of 165 km of high-speed railway infrastructure passengers and freight in the lines Brescia-Verona-Vicenza-Padova, Liguria-Alpi. The assessment and authorisation of each relevant project/investment shall respect all the rules and procedures set in Articles 6.3 and 6.4 of the EU Directive 92/43/EEC and follow the national guidelines for Impact Assessment published in the Official Gazzette of the Italian Republic N°303 of 28 December 2019.

It is expected that this measure does not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01) and the milestones and targets to be fulfilled by Italy.

For the segment Rho-Parabiago will be conditional on a positive Environmental Impact Assessment that has fully and substantively complied with the legal criteria, fully incorporating any result and condition from the Environmental Impact Assessment, if required to achieve compliance with the DNSH Technical Guidance (2021/C58/01). The EIA is published and completed in accordance with Directive 2011/92/EU, as well as relevant assessments in the context of Directive 2000/60/EC, and Directive 92/43/EEC, including the implementation of required mitigation measures. Any measures identified in the framework of the EIA as necessary to ensure compliance with the DNSH Technical Guidance (2021/C58/01) shall be integrated into the project and complied with at the stages of construction, operation and decommissioning of the infrastructure.

**Investment 1.3 - Diagonal connections**

This investment consists in the construction of 27 km of high-speed railways for both passengers and freight in the lines Orte-Falconara e Taranto -Metaponto-Potenza-Battipaglia. The assessment and authorisation of each relevant project/investment shall respect all the rules and procedures set in Articles 6.3 and 6.4 of the EU Directive 92/43/EEC and follow the national guidelines for Impact Assessment published in the Official Gazzette of the Italian Republic N°303 of 28 December 2019.

**Investment 1.4 - European Rail Transport Management System (ERTMS)**

This investment consists in equipping 2,785 km of rail lines with the European Rail Transport Management System (ERTMS) in line with the ERTMS European Deployment Plan.

**Investment 1.5 - Strengthening metropolitan nodes and key national links**

This investment consists in upgrading at least 1,280 km of railway line sections built on 12 metropolitan cities nodes and the key national links (Liguria-Alps, Bologna-Venice-Trieste/Udine, Bologna-Milano, Bologna-Verona-Brennero, Central and North Tyrrhenian link, Adriatic-Ionian link, Urban nodes and regional lines; Freight Terminals). The assessment and authorisation of each relevant project or investment shall respect all the rules and procedures set in Articles 6.3 and 6.4 of the EU Directive 92/43/CEE and follow the national guidelines for Impact Assessment published in the Official Gazzette of the Italian Republic N°303 of 28 December 2019.

**Investment 1.6 - Strengthening regional lines - Upgrading of regional railways (management RFI)**

This investment consists in upgrading of 646 km of regional lines whose ownership has been transferred to *Rete Ferroviaria Italiana (RFI)* or shall be gradually transferred to the latter. The
assessment and authorisation of each relevant project or investment shall respect all the rules and procedures set in Articles 6.3 and 6.4 of the EU Directive 92/43/CEE and follow the national guidelines for Impact Assessment published in the Official Gazzette of the Italian Republic N°303 of 28 December 2019.

Interventions are planned in the following lines:

- Piedmont: upgrading and modernisation of the Torino Cerese-Canavesana: improving the regularity of traffic flows;
- Friuli Venezia Giulia: FUC railway: infrastructural and technological works on the Udine-Cividale line: improvement of the regularity of traffic flows;
- Umbria: Umbrian Central Railway (FCU): infrastructural and technological interventions;
- Campania (EAV): Strengthening and modernisation of the Cancellino-Benevento line: improvement of safety standards for railway operations;
- Puglia: Bari-Bitritto line: infrastructural upgrading: compliance with technical/regulatory standards of the National Railway Infrastructure; Ferrovie del Sud Est (FSE): infrastructural upgrading of the Bari-Taranto line: the intervention shall allow the adaptation to the performance standards of RFI and to the technical specifications of interoperability; FSE: Completion of SCMT/ERTMS equipment on the network: improvement of traffic performance, optimisation of capacity, improvement of safety standards; FSE: Realisation of intermodal Hubs and upgrading of 20 stations: the intervention aims at improving the accessibility of the stations and creating areas for exchanges rail-bus, rail-private car and rail-bike;
- Calabria: Rosarno-S. Ferdinando line: upgrading of the equipment of the Rosarno and San Ferdinando lines for connection to Gioia Tauro.

**Investment 1.7 - Upgrading, electrification and resilience of railways South**

This investment consists in upgrading, electrification and resilience of 650 km of railways in the South. The contracts of this investment shall cover among others the airport link of Olbia, the port link of Augusta, the doubling of the Decimomannu-Villamassargia line, the upgrade of the Potenza – Foggia link, the intermodal link of Brindisi. The assessment and authorisation of each relevant project or investment shall respect all the rules and procedures set in Articles 6.3 and 6.4 of the EU Directive 92/43/CEE and follow the national guidelines for Impact Assessment published in the Official Gazzette of the Italian Republic N°303 of 28 December 2019.

**Investment 1.8 - Upgrading railway stations (Rete Ferroviaria Italiana (RFI) management; in South)**

This investment consists in upgrading 38 railway stations and making them accessible in line with Commission Regulation 1300/2014 and EU railway safety regulations. The assessment and authorisation of each relevant project or investment shall respect all the rules and procedures set in Articles 6.3 and 6.4 of the EU Directive 92/43/CEE and follow the national guidelines for Impact Assessment published in the Official Gazzette of the Italian Republic N°303 of 28 December 2019.

**Investment 1.9 – Inter-regional connections**

This investment consists in speeding up interventions of 221km of the following lines:

- Milano – Genova
- Palermo – Catania (linea storica)
- Battipaglia-Potenza
- Orte – Falconara.
The investment aims at increasing the performance of the current infrastructures via interventions that could include:

- modifications to the stations’ footprint plans (PRG – Piano Regolatore Generale);
- ERTMS;
- configuration and/or modification of traffic control system such as ACC (Apparato Centrale Computerizzato) and ACCM (Apparato Centrale a Calcolatore Multistazione);
- other improvements of physical infrastructures that might include railway bed, equipment and other interventions related to infrastructures.

Reform 2.1 - Adoption of “Guidelines for the classification and management of risks, the evaluation of security and the monitoring of existing bridges”

This reform consists in adopting guidelines for the classification and management of risks, the evaluation of security and the monitoring of existing bridges. The adoption of "Guidelines", which shall allow the application of common standards and methodologies on the entire national road network.

Reform 2.2 - Transfer the property of the bridges and viaducts from the lower level ranking roads to the higher ranking ones

This reform consists in the transfer of the ownership of the bridges, viaducts and overpasses from the lower type roads to the higher type roads (motorways and main suburban roads) allowing an increase in the overall safety of the road network, as the bridges, viaducts and overpasses shall be maintained by ANAS and/or the motorway concessionaires, who have better planning and maintenance capacities than the individual municipalities or provinces.

I. MISSION 3 COMPONENT 2- Intermodality and integrated logistics

The objective of this component of the Italian recovery and resilience plan is to make Italian ports more efficient and competitive, more energy efficient and better integrated to the logistic chain. It also aims to digitalise the air traffic management system.

For that purpose, it includes on one hand important reforms to simplify processes, to update the port planning and to make concessions in Italian ports more competitive. On the other some investments designed to ensure intermodality with the broad lines of European communication developing links with ocean and inter-Mediterranean trafficking, increasing dynamism and the competitiveness of the Italian port system, also with a view to reducing greenhouse emissions. The investments linked to this component are expected to substantially increase passenger and freight volumes in Italian ports with a positive effect on the stimulating economic activities in the respective areas and on the national economy as a whole.

On the other hand, this component relates to the digitalisation of logistics systems, including airport systems. It is expected to make these sectors more competitive by using innovative technological solutions to make the system more efficient and also to reduce their environmental impact.

This component addresses the 2019 country-specific recommendation 3 urging Italy to ‘Focus investment-related economic policy on the quality of infrastructure’ and the 2020 country-specific recommendation 3 recommending to ‘Focus investment on the green and digital transition, in particular on clean and efficient production and use of energy, research and innovation, sustainable public transport, waste and water management as well as reinforced digital infrastructure to ensure the provision of essential services’.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01).

I.1. Description of the reforms and investments for non-repayable financial support

Reform 1.1- Simplification of procedures for the strategic planning process

This measure envisages the update of port planning to ensure a strategic vision of the Italian ports system. The reform shall regulate as a minimum the (i) the development objectives of the port system authorities; (ii) the areas identified and outlined intended for strictly port and rear-port functions, (iii) the last-mile infrastructural connections of road and rail with ports, (iv) the criteria followed in identifying the contents of the planning and (v) it shall make an unambiguous identification of the guidelines, the rules and the procedures for the preparation of the port regulatory plans.

Reform 1.2- Competitive award of concessions in Italian ports

The aim of this measure is to define conditions relating to the duration of the concession, the supervisory and control powers of the granting authorities, the renewal procedures, the transfer of the facilities to the new concessionaire at the end of the concession and the identification of the minimum limits of the fees charged to the concessionaires.

Reform 1.3- Simplification of authorisations for procedures of authorisation of cold ironing in Italian ports
This measure is expected to simplify and reduce the authorization procedure concerning construction of the National Electricity Transmission Network plants to power the distribution systems for the supply of electricity to ships (cold ironing).

The Ministry of Infrastructure and Transport shall make a proposal to streamline the authorization process. In particular, it shall be proposed to have the cold ironing projects evaluated by the territorial offices that report to the Ministry of Economic Development, which could, in a shorter time, study the projects and consequently authorize them. Moreover, in terms of regulatory intervention shall be envisaged to identify a single authorization process for projects involving a voltage higher than 132 kV and the rest, in order to exploit the process synergies.

Reform 2.1: Implementation of a Single Customs Window (“Sportello Unico Doganale”)

The objective is to create a dedicated portal for the Single Control Desk, which shall enable interoperability with national databases and coordination of control activities by customs.

Investment 2.1: Digitalisation of the logistic chain

This investment is expected to increase the competitiveness of the national logistics through the creation of an interoperable digital system between public and private actors for freight and logistics, which shall simplify procedures, processes and controls by focusing on the de-materialisation of documents and the exchange of data and information.

Investment 2.2: Digitalization of air traffic management

This investment aims at the digital upgrade of the sector that shall cover both the development of new tools for the digitisation of aeronautical information and the implementation of unmanned aircraft platforms and services.

The projects shall cover the development and connectivity of the Unmanned Traffic Management System (UTMS), the digitalisation of aeronautical information and the definition of a new maintenance model.

Investment 2.3: Cold ironing

This investment consists in the realization of a network for the supply of electricity in the port area (docks) and the related connection infrastructure to the national transmission grid. In line with the Alternative Fuels Infrastructure Regulation, the on-shore power supply shall allow recharging of electric vessels as well.

I.3. **Description of the reforms and investments for the loan**

**Investment 1.1: Green ports: renewable energy and energy efficiency interventions at ports**

The main objective of this measure is to achieve is CO2 emissions reduction and an improvement of air quality in port cities through interventions aimed at energy efficiency and promoting the use of renewable energy in ports. The goal is to contribute to the reduction of CO2 total annual emissions in the involved port area. The projects are to be selected from those that the individual Port System Authorities have indicated in their Port Systems Environmental Energy Planning Documents (DEASP). The "Green Ports" program is also expected to achieve a significant reduction of other combustion pollutants, which are the main cause of deterioration in air quality in port cities. This investment includes the purchase of zero-emission vehicles and service boats or the transformation of fossil fuel vehicles and service boats into zero-emission ones.

**Reform 2.2: Establishment of a National Digital Logistics Platform in order to introduce the digitalization of freight and/or passenger services**

The aim of the reform is to make the Port Community Systems of individual Port System Authorities interoperable with the National Digital Logistics Platform.

I.4. **Milestones, targets, indicators, and timetable for monitoring and implementation for the loan**

MISSION 4 COMPONENT 1: Strengthening the provision of education services: from nurseries to universities

This component of the Italian recovery and resilience plan includes four intervention areas: i) Quality improvement and quantitative expansion of education and training services – from kindergartens to university; ii) Reform of the teaching profession, particularly concerning recruitment and training processes, with the scope of increasing teaching staff’s skills and addressing territorial mismatching; iii) Upskilling and upgrading of infrastructure to enhance digital, science, technology, engineering and mathematics (STEM) and multilingualism teaching while improving school buildings’ security and energy efficiency; iv) Reform of degree groups, enabling degrees and Ph.D programmes with the aim to boost applied research and extending the number of Ph.D scholarships.

Measures under this component aim at addressing the weaknesses of the Italian education, training and research system with the goal of improving educational outcome and employability of Italian students.

The investments and reforms under this component shall contribute addressing the country specific recommendations addressed to Italy in 2020 and 2019 on the need to “support women’s participation in the labour market through a comprehensive strategy, including through access to quality childcare” (country specific recommendation 2, 2019), to “improve educational outcomes, also through adequate and targeted investment, and foster upskilling, including by strengthening digital skills” (country specific recommendation 2, 2019), to “foster research and innovation” (country specific recommendation 3, 2019), to “strengthen distance learning and skills, including digital ones” (country specific recommendation 2, 2020) and to “focus investment on research and innovation” (country specific recommendation 3, 2020).

J.1. Description of the reforms and investments for non-repayable financial support

Investment 1.1: Plan for nurseries and preschools and early childhood education and care services

The investment plan for the 0-6 age group is aimed at increasing the supply of childcare facilities by building, renovating and ensuring the safety of nurseries and preschools, to ensure an increase in the educational offer and the available slots for the 0-6 age group, and thus improve teaching quality. The measure is expected to encourage women’s participation in the labour market and support caregivers in reconciling family and professional life.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant

62 Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.
benchmarks\textsuperscript{63}; (iii) activities related to waste landfills, incinerators\textsuperscript{64} and mechanical biological treatment plants\textsuperscript{65}; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation shall be selected.

**Investment 1.2: Plan for the extension of full-time**

The purpose of the measure is to finance the extension of school time in order to increase the educational offer of schools and make them open to the territory beyond school hours. The measure envisages the construction or renovation of canteen spaces for at least 1,000 structures to allow for the extension of school time. Extended schooling hours are expected to have a positive impact on the fight against early school leaving.

**Investment 1.3: School Sports Infrastructure Enhancement Plan**

The measure aims at strengthening sport infrastructure and encouraging sport activities. Reinforcing sporting activity is expected to combat early school leaving, enhance social inclusion and reinforce personal aptitudes.

The investment shall upgrade sports facilities and gyms attached to schools to ensure an increase in the educational offer and promote an increase in school time. In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use\textsuperscript{66}; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks\textsuperscript{67}; (iii)

\textsuperscript{63} Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\textsuperscript{64} This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{65} This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{66} Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

\textsuperscript{67} Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.
activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation shall be selected.

**Investment 1.4: Extraordinary intervention aimed at the reduction of territorial gaps in I and II cycles of secondary school and at tackling school drop-out**

The measure aims at guaranteeing adequate basic skills to students, also through the development of a single national portal for online training. Particular attention shall be paid to schools that have experienced greater difficulties in terms of performance by customizing interventions on students’ needs – where there shall be a support intervention by the school manager with external tutors as well as, in the most critical cases, the availability of at least one additional staff unit per subject (Italian, Mathematics and English) and for a minimum of two years. The investment shall promote the implementation of mentoring activities for at least 820,000 young people at risk of early school leaving and young people who have already dropped out. It envisages the use of an online platform for mentoring and training activities.

The intervention is expected to promote gender equality and to contribute overcoming inequalities, including territorial gaps, in access to education.

**Reform 1.1: Reform of Technical and Professional Institutes**

The reform aims to align the curricula of technical and professional institutes with competences needed by the Italian production system, including at local level. In particular, the reform shall make technical and vocational education consistent with Industry 4.0 and embracing digital innovation.

**Reform 1.2: Reform of the tertiary vocational training (ITS)**

The reform aims at strengthening the tertiary vocational training system by simplifying ITS governance in order to increase the number of institutes and enrolments with a view to the local territory.

The reform is expected to bridge the mismatch between labour supply and demand.

**Investment 1.5: Development of the tertiary vocational training system (ITS)**

The measure complements the Reform 1.2 – Reform of the tertiary vocational training – to strengthen the education offer of Vocational Training Institutes (ITS). It contributes to increasing the educational offer of the vocational training institutes and to increase the participation of enterprises in the educational processes for a better connection with the

---

This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

69 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
entrepreneurs' network. The measure is also expected to reduce youth unemployment by addressing skill mismatches between labour demand and supply.

The investment shall increase the number of students enrolled in ITS courses and strengthen laboratory structures (introducing innovative technologies 4.0) while investing on the skills of teachers. The activation of a national digital platform that allows students to know the job offers for those who obtain a professional qualification is envisaged.

**Reform 1.3: Reorganisation of the school system**

The objective of the reform is twofold:

1) Adjustment of the number of pupils per class.

   The number of teaching staff shall be set at the same level as in the 2020/2021 school year, in view of the population decline and in order to reduce the number of pupils per class and gradually improve the ratio between the number of pupils and the number of teachers on common positions. The implementation of the intervention shall not increment the number of buildings available. The initiative shall give personalised attention to individual pupils, particularly to the most vulnerable and certainly pupils with disabilities. The improvement of the pupil/teacher ratio is expected to benefit teaching quality and the availability of resources for school buildings.

2) Reviewing the rules on the size of school buildings.

   The regional school population shall be adopted as the "effective parameter" for identifying the educational institutions with a headmaster and a headmistress, rather than the population of the individual school, as provided for by current legislation.

**Reform 1.4: Reform of the “Orientation” system**

The reform aims at introducing orientation modules (at least 30 hours per year) for the fourth and fifth classes of upper secondary school. The main objective is to support students in taking an informed choice between continuing their studies or further vocational training (ITS), prior to their integration into the labour market. The reform also envisages the creation of a digital orientation platform, related to the tertiary educational offer of Universities and Vocational Training Institutes (ITS).

**Investment 1.6: Active orientation in school-university transition**

The measure aims to facilitate and encourage the transition from upper secondary school to university and to reduce the number of university dropouts, thus helping to increase the number of graduates. The investment is expected to raise success indicators (school attendance, improving learning levels, number of students admitted to the next academic year, etc.) and to reduce gender gaps, both in terms of employment and participation in higher education in all fields.

This initiative envisages the provision of courses to all students in upper secondary school to support them in the choice of tertiary education, facilitating a better fit between preparation and vocational track, and helping students getting oriented in the school-university transition. Lectures shall be delivered by higher education professors and delivered to students in upper secondary school. Sustainability shall be achieved by extending training to high-school
professors such that, following this three-year program, orientation shall be available with the internal staff of high schools.

**Investment 1.7: Scholarships for University access**

The objective of the measure is to ensure equal access to education, by easing access to tertiary education for students in socio-economic difficulties and with a relatively high opportunity cost of advanced studies against an early transition on the labour market. In particular, this shall be achieved through an increase in the number of scholarships provided to university students under the RRF support.

This measure is complemented by React-EU which is expected to fund 13 000 scholarships for university access for the year 2023 in Southern Regions.

**Reform 1.5: University Degree groups reforms**

The reform envisages the update of university curricula, reducing the existing rigid boundaries which severely limit the possibility of creating cross-disciplinary paths. The reform is also expected to expand the possibility to implement vocational training programs by introducing innovative job-oriented degree classes.

**Reform 1.6: Enabling University Degree Reform**

The reform envisages the simplification of the procedure for accessing professions which require the enrolment on professional orders through a dedicated professional exam. The measure shall contribute to harmonize each degree’s final national examination with the corresponding professional order exam, thereby providing general and clear rules and substitution.

**Reform 2.1: Teachers’ recruitment**

The reform aims to establish a new model for recruiting teachers, linked to a rethink of their initial training and throughout their careers. This measure has the strategic objective of bringing about a significant improvement in the quality of the Italian education system. In particular, the reform shall simplify the current public competition procedures. The measures shall introduce higher requirements for access the teaching professions, a more effective mobility framework for teachers, limiting excessive mobility, and a clear link between career progression and performance evaluation and continuous professional development.

**Reform 2.2: Tertiary advanced school and compulsory training for school managers, teachers, administrative and technical staff**

The reform aims at building a quality training system for school staff for the continuous professional and career development. It envisages the establishment of a qualified body in charge of releasing guidelines in line with European standards and of the selection and coordination of training initiatives, possibly linking them to career progressions, as provided for in the recruitment reform – the Reform 2.1: Teachers’ recruitment, included in the plan.

**Investment 2.1: Integrated digital teaching and training on the digital transformation for school staff**

The measure aims at the creation of a permanent system for the development of digital didactics as well as digital and teaching skills of the school staff. The intervention envisages:
- the creation of a system for the continuous training of teachers and school staff for the digital transition;
- The adoption of a national reference framework for integrated digital teaching, in order to promote the adoption of digital competence curricula in all schools.

The line of action envisions the training of approximately 650,000 teachers and school staff, the creation of approximately 20,000 training courses over the five-year and the establishment of local training centres. All of the more than 8,000 educational institutions in Italy shall be involved in the training projects.

**Investment 3.1: New skills and new languages**

The intervention aims at integrating into all levels schools curricula activities, methodologies and contents designed to strengthen STEM, digital and innovation skills. The measure focuses on female students and envisages a full interdisciplinary approach. The intervention aims at guaranteeing equal opportunities and gender equality in terms of methodological approach and STEM orientation activities.

The measure is expected to strengthen multilanguage skills in students and teachers through the widening of consulting and information programs on Erasmus+ with the support of the Erasmus+ National Institute for Documentation, Innovation and Educational Research (INDIRE) and its ambassadors’ network.

A digital system shall also be developed to monitor language skills at the national level with the support of respective certifier entities.

**Investment 3.2: School 4.0: innovative schools, wiring, new classrooms and workshops**

The measure aims at updating school facilities into adaptable, flexible and digital learning environments, with technologically advanced workshops and a work-based learning process. This measure shall accelerate the digital transition of the Italian school system with four initiatives:

- Transformation of around 100,000 traditional classes into connected learning environments, with the introduction of related educational devices
- Creation of workshops for digital professions in the second cycle
- Digitalization of school administrations
- Interior wiring cabling of approximately 40,000 school buildings and related devices

**Investment 3.3: School building security and structural rehabilitation plan**

The main objective of the measure is to contribute to climate recovery by enhancing school buildings’ safety and energy consumption. In particular, the measure shall contribute to the improvement of energy classes and leading to lower consumption and CO2 emissions as well as to increase structural safety of buildings. Particular attention shall be paid to the most disadvantaged areas with the aim of tackling and eliminating economic and social imbalances. The investment shall not include the procurement of natural gas boilers.

**Investment 3.4: Teaching and advanced university skills**

The measure aims to qualify and innovate university programs (including Ph.D programs), through three strategic objectives: digitization; “culture of innovation”; internationalization.
In details, the following sub-measures shall be implemented:

- Up to 500 PhD students shall be enrolled in 3 years (100+200+200) in programmes devoted to digital and environmental transitions.
- Establishment of three Digital Education Hubs (DEH) to improve the capacity of the higher education system to offer digital education to students and university workers;
- Strengthening higher education schools;
- Implementation of ten transnational educational initiatives — TNE — in cooperation with the Ministry of Foreign Affairs and International Cooperation;
- Internationalisation activities of artistic and musical higher education institutions (AFAM) by supporting 15 internationalisation projects of AFAM institutions to promote their role abroad in the preservation and promotion of Italian culture.

**Reform 4.1: Ph.D. Programmes Reform**

The reform aims at updating the regulation on Ph.D. programmes, simplifying the procedures for the involvement of companies, research centres, in Ph.D. programmes, and strengthening applied research. The proposed reform has integrations with all the investments related to Ph.D. programmes in the target domain “Education and research”.

**Investment 4.1: Extension in number and career opportunities of PhDs (Research-oriented, Public Administration and Cultural Heritage)**

The measure aims at increasing the stock of human capital dedicated to research-oriented activities, to public administration and cultural heritage. The investment envisages the creation of 1,200 additional general PhD fellowships programmes granted per year (over three years), 1,000 additional PhD fellowships programmes on public administration are granted per year (over three years), and at least 200 new PhD fellowships programmes on cultural heritage are granted per year (over three years).

J.3. Description of the reforms and investments for the loan

Reform 1.7: Reform of student housing regulation and investment in student housing

The reform has the objective of encouraging private and public entities to set up student accommodation facilities, with the Ministry of University and Research contributing for a portion of the renting revenues for the first three years of operation of the structures. The aim is to increase available places for out-of-school students by 2026.

The envisaged investment aims to add 60,000 sleeping accommodations, thus significantly reducing Italy’s gap with the EU average regarding the share of students provided with housing facilities. It aims at ensuring widespread access to housing facilities so that a reasonable number of students can afford advanced education in their preferred field and location regardless of their socio-economic background. For this purpose, 30% of the new places shall be reserved to students in socio-economic difficulties as defined by the so-called organizations for “Diritto allo Studio” (right to study organizations).

The rental fee for university students shall be set, at least, at a 15% lower rate than local market prices.

The investment shall not include the procurement of natural gas boilers.

Accommodations already used for student housing purposes before the launch of the relative call for projects cannot be accounted for the targets. To reach the final target of beds created, calls for projects shall be launched between 2021 and 2025.

J.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

<td>Provision in the law indicating the entry into force of the legislation.</td>
<td>N/A</td>
<td>N/A</td>
<td>N/A</td>
</tr>
</tbody>
</table>

The revised legislation shall: Amend the current rules for student housing (law 338/2000 and the Legislative Decree 68/2012) in order to:

1. Fostering the restructuring and renovation of structures instead of new green-field buildings (with a greater percentage of cofounding, currently at 50%), with the highest environmental standard to be ensured by the presented projects;

2. Simplify, also thanks to the digitalization, the presentation and selection of projects and, therefore, the implementation timing;

3. Provide by law for a derogation from the criteria set out in Law no. 338/2000 with regard to the percentage of co-financing that can be Granted.

A reform will be implemented, by introducing in the Italian regulatory framework for student housing financing the following major changes:

1. Opening up the participation to the funding also to private investors (according to the scheme described in the implementation), also allowing public-private partnerships where the university will make use of the available funding to

<td>Support the financial equilibrium in real-estate investments for student housing; 2. Ensuring the long-term sustainability of the private investments by guaranteeing a change in the taxation scheme from the one applied for hotel services to the one applied for social housing, by constraining the use of the new accommodations for student housing purposes during the Academic Year, but allowing the use of the structures when they are not needed for student hospitality. This will, in turn, help the supply of a new range of accommodation at affordable rents; 3. Conditioning the funding as well as additional tax allowances (e.g. the equal treatment with the social housing) on the use of the new accommodations for student housing during the overall investment horizon and the compliance with the agreed upper bound in the rents charged to students even beyond the expiration of special funding schemes that may contribute to trigger the investment by the private operators; 4. Redefining the standards for student accommodations, by redetermining the law requirements regarding the common space per student available in the buildings in exchange for better equipped (single) rooms.</td>

The compliance with the agreed upper bound in the rents charged to students even beyond the expiration of special funding schemes that may contribute to trigger the investment by the private operators; (4). Redefining the standards for student accommodations, by redetermining the law requirements regarding the common space per student available in the buildings in exchange for better equipped (single) rooms.
K. MISSION 4 COMPONENT 2: From research to business

This component of the Italian recovery and resilience plan aims to support investment in research and innovation, to promote innovation and technology diffusion, to strengthen skills, and supporting the transition to a knowledge-based economy. It provides support to the public research system, researcher’s skills and mobility as well as public-private cooperation at national and EU level. It is built on three main pillars: (i) Improved science base; (ii) Strong business-science links (knowledge and technology transfers; (iii) Support for business innovation (notably SMEs, start-ups).

The investments and reforms under this component shall contribute addressing the country-specific recommendations addressed to Italy in 2020 and 2019 on the need to “focus investment-related economic policy on research and innovation, and the quality of infrastructure” (country-specific recommendation 3, 2019), to “promote private investment to foster the economic recovery” (country-specific recommendation 3, 2020), to “focus investment on the green and digital transition, particularly on research and innovation” (country-specific recommendation 3, 2020).

K.1. Description of the reforms and investments for non-repayable financial support

Investment 1.2: Funding projects presented by young researchers

The aim of the investment is to provide new opportunities for young researchers in order to retain them in Italy. The measure shall support research activities of at least 850 young researchers, along the lines of programmes such as the European Research Council (ERC) and Marie Skłodowska-Curie Individual Fellowships (MSCA-IF), Seal of Excellence and Post Doctoral International Researchers, in order to enable them to gain an initial experience of research responsibility. Part of the contribution assigned to the ERC researchers shall be earmarked to the recruitment of at least one non-tenure-track researcher.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to non-projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions
the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation are eligible to be selected.

**Investment 2.2: Partnerships in research and innovation – Horizon Europe**

The objective of the measure is to support research, development and innovation projects, identified with specific calls for participation in European Partnerships under Horizon Europe. These transnational research initiatives may be an important driver for the development of R & I on strategic issues for the recovery of the Italian economy. In particular, support shall focus on the following partnerships: i) High Performance Computing, ii) Key digital technologies, iii) Clean energy transition; iv) Blue Oceans — A climate neutral, sustainable and productive blue economy; v) Innovative SMEs;

The measure, implemented by the MiSE – Ministry of Economic Development, shall allow for continuity of initiatives implemented through the Sustainable Growth Fund (SFS), enabling synergies between levels of government and different financial sources.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities and assets related to waste landfills, incinerators and mechanical biological treatment plants. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation can be selected.

**Investment 3.3: Introduction of innovative doctorates that respond to the needs of innovation by enterprises and promote the hiring of researchers by companies**

The objective of the measure is to enhance high-profile skills, particularly in Key Enabling Technologies areas, through:

---

74 Except for (a) projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

75 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

76 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

77 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
• The establishment of dedicated doctoral programmes, with input and involvement of businesses;
• Incentives for firms to recruit researchers.

Specifically, the measure, implemented by the MUR – Ministry of University and Research, provides for the award of a total of 6000 doctoral grants in 3 years, with private co-financing and incentives for companies for the recruitment of researchers.

Reform 1.1: Implementation of R & I support measures to promote simplification and mobility

The reform shall be implemented by the Ministry of University and Research (MUR) and the Ministry of Economic Development (MiSE) through the creation of an inter-ministerial steering board and the issuing of two ministerial decrees: i) to increase and support mobility (through incentives) of high-profile individuals (such as: researchers and managers) between universities, research infrastructures and companies, and ii) to simplify the management of research funds, iii) reform career path of researchers to increase their focus on research activities. The reform shall move to a more systemic approach to R&D activities, going beyond the current logic of reallocating resources by favouring a sharing approach and shall focus on simplifying red tape in the management of funds dedicated to public-private research activities, generating a significant impact through avoiding dispersion and fragmentation of priorities, also supported by the first component of the Mission. Public research bodies (EPR) shall play a key role both as possible project leaders for Partnerships, National Campaigns and Territorial Ecosystems, and as potential participants in calls for proposals on the PNR Fund and the Infrastructure Fund.

K.3. Description of the reforms and investments for the loan

Investment 1.1: Research Projects of Significant National Interest (PRIN)

The measure shall consist of financing research projects of major national interest (PRIN). The projects shall have a duration of at least two years, and require the collaboration of research units belonging to universities and research bodies. Funded projects shall be selected by the Ministry of University and Research on the basis of the quality of the scientific profile of those responsible, as well as the originality, methodological appropriateness, impact and feasibility of the research project. This type of activity shall stimulate the development of research-led initiatives towards frontier research and a stronger interaction between universities and research institutions.

The investment is expected to finance, until 2026, 5,350 projects.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation are eligible to be selected.

Investment 1.3: Partnerships extended to universities, research centres, companies and funding of basic research projects

When compared to other European peer countries, the low patents and spin-offs production of Italian research and university system appear particularly critical. This is due to some structural challenges, such as the dominant role of small and medium-sized enterprises in the national economy, the large regional disparities in terms of income and productivity and the low ability of universities to connect with firms.

The investment aims at financing at least 14 major basic research programmes carried out by widespread networks of public and private subjects. The investment is aligned with one of the PNR objectives of promoting positive changes by leveraging fundamental research. Dedicated stakeholder

---

\[78\] Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

\[79\] Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\[80\] This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\[81\] This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\[82\] OECD, Skills Studies on “Supporting Entrepreneurship and Innovation in Higher Education in Italy”
engagement processes shall be conducted for each programme to engage citizens as well as facilitating technology and knowledge transfer to territories, companies and public administrations.

The investment is expected to strengthen national technology chains and promote their participation in strategic European and global value chains. Possible examples are the following: sustainable mobility (sustainable batteries, materials, logistics, etc.), alternative energies, superconductors, climate change monitoring and prevention, circular economy in the fashion industry, industrial symbiosis, eco-design and design for sustainability, waste management, recycling and upcycling, biodiversity, green production processes, self-driving vehicles, vaccines, bioreactors, new raw materials, water management and water resource conservation cultural heritage. Each programme is expected to promote aggregation of small and medium-sized enterprises around large private players and public research centres, and to encourage collaborative and complementary research activities. R&D projects shall include investments both in human capital and basic research development for universities, research centres and enterprises.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for programmes shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use\(^{83}\); (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks\(^{84}\); (iii) activities related to waste landfills, incinerators\(^{85}\) and mechanical biological treatment plants\(^{86}\); and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation are eligible to be selected.

**Investment 1.4: Strengthening research structures and supporting the creation of “national R&D leaders” on some Key Enabling Technologies**

This measure aims at funding the creation of at least five national research centres, selected through competitive procedures, able to achieve a critical threshold of research and innovation capacity through collaboration of universities, research centres and enterprises. The selection shall be made on the basis of competitive calls, in which national consortia led by a coordinating leader may participate, also taking into account the previous mapping exercise.

Key elements of each National Centre shall be a) the creation and renewal of relevant research facilities b) the involvement of private actors in the implementation and implementation of research projects c) support to start-ups and spin off generation. The selection should be carried out by means

\(^{83}\) Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

\(^{84}\) Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\(^{85}\) This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\(^{86}\) This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
of dedicated calls, the first of which shall be launched by the beginning of 2022. The choice between
the proposals to participate in the calls shall be made in a manner similar to that adopted by the
European Innovation Council.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance
(2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects
shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream
use\(^87\); (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse
gas emissions that are not lower than the relevant benchmarks\(^88\); (iii) activities related to waste
landfills, incinerators\(^89\) and mechanical biological treatment plants\(^90\); and (iv) activities where
the long-term disposal of waste may cause harm to the environment. The terms of reference shall
additionally require that only activities that comply with relevant EU and national environmental
legislation are eligible to be selected.

**Investment 1.5: Establishing and strengthening of "innovation ecosystems for sustainability",
building "territorial leaders of R&D".**

The measure, implemented by the MUR, shall finance by 2026 at least 10 ‘territorial samples of R &
I’ (existing or new), which shall be selected on the basis of specific competitive procedures, with a
focus on the capacity to promote social sustainability projects. Each project must have the following
elements:(a) innovative training activities carried out in synergy by universities and businesses and
aimed at reducing the mismatch between skills required by businesses and skills provided by
universities, as well as industrial doctorates;(b) research activities and/or research infrastructures
carried out jointly by universities and enterprises, in particular SMEs, operating on the territory;(c)
support for start-ups;(d) involvement of local communities on innovation and sustainability issues.

The projects to be financed shall be selected on the basis of the following criteria: i) scientific and
technical quality and its consistency with territorial orientation; ii) the effective ability to stimulate
the innovative capacities of enterprises, in particular SMEs; iii) the ability to generate national and
international relations with major research institutions and leading companies; (iv) effective capacity
to involve local communities.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance
(2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects
shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream

---

\(^{87}\) Except projects under this measure in power and/or heat generation, as well as related transmission and distribution
infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’

\(^{88}\) Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the
relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established
for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission

\(^{89}\) This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable
hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy
efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such
actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the
lifetime of the plants; for which evidence is provided at plant level.

\(^{90}\) This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where
the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations
of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure
do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for
which evidence is provided at plant level.
use\textsuperscript{91}; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks\textsuperscript{92}; (iii) activities related to waste landfills, incinerators\textsuperscript{93} and mechanical biological treatment plants\textsuperscript{94}; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation are eligible to be selected.

Investment 2.1: Important Project of Common European Interest (IPCEI)

The objective of the measure is to supplement the current IPCEI fund, referred to in Article 1 (232) of the 2020 Budget Law, with additional resources.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use\textsuperscript{95}; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks\textsuperscript{96}; (iii) activities related to waste landfills, incinerators\textsuperscript{97} and mechanical biological treatment plants\textsuperscript{98}; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation are eligible to be selected.

\textsuperscript{91} Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

\textsuperscript{92} Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\textsuperscript{93} This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{94} This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{95} Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

\textsuperscript{96} Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\textsuperscript{97} This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{98} This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
Investment 2.3: Strengthening and sectorial/territorial extension of technology transfer centres by industry segments

The objective of the measure, implemented by the MiMIT - Ministry of Enterprises and Made in Italy, is to support, including through a process of reorganisation and rationalisation, a network of fifty centres (Competence Centres, European Digital Innovation Hub, Seal of Excellence, Testing and Experimentation Facility, National Digital Innovation Centres) responsible for project development, the provision of advanced technological services to companies and innovative and qualifying technology transfer services. The aim of the process of simplifying and rationalising the centres sought by the measure is to increase advanced technological services for companies by focusing on cutting-edge manufacturing technologies and specialisations.

The services provided by the centres shall include: i) digital assessment, ii) test-before-invest, iii) training; iv) access to finance; iv) financial and operating support to the development of innovation projects (Technology Readiness Level (TRL) more than 5); vi) technological brokerage; and vii) awareness raising at local level.

The EDIH and TEF may receive funding from other EU funds, including the Digital Europe programme, for carrying out their activities.

The investment consists of two lines of interventions:

Under the first line, the RRF finances 35 centres exclusively, without any support from other EU sources.

Under the second line, the RRF finances a part of 13 European Digital Innovation Hubs (EDIH) and two Testing and Experimentation Facilities (TEF), with the other share of the cost coming from the Digital Europe Programme. In particular, the operation of 13 EDIH and two TEF financed by RRF and the Digital Europe Programme shall be structured into work packages. The RRF support shall not concern work packages for which EDIH and TEF receive support under the Digital Europe Programme.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities related to waste.

---

99 A work package is a component of the project work breakdown such as, for example: test before invest, skills and training, project management and coordination. It represents a group of project work described in activities and tasks. Work packages shall present a clear, logical link to the project objectives and to the other work packages. Each work package shall constitute a sub-part of the project, a step leading to the achievement of the project's overall goals.

100 Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

101 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.
landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation can be selected.

**Investment 3.1: Fund for construction of an integrated system of research and innovation infrastructures**

The fund aims to facilitate osmosis between scientific knowledge generated in high-quality research infrastructures and the economic sector, fostering innovation. To this end, the measure, implemented by the MUR - Ministry of University and Research, supports the creation of research and innovation infrastructures linking industry and academia. The Construction and Research Infrastructure Fund shall support the creation or strengthening, on a competitive basis, of research infrastructures of European relevance and dedicated innovation infrastructures, promoting the combination of public and private investments.

In particular, the measure shall finance at least 30 infrastructure projects (existing or newly financed) with a research manager for each infrastructure.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation are eligible to be selected.

---

102 This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

103 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

104 Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

105 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

106 This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

107 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
**Investment 3.2: Financing start-ups, Digital Transition Fund**

This measure shall consist of a public investment in a Facility, the Digital Transition Fund, in order to incentivize private investments, improve access to finance in Italy’s digital start-ups ecosystem and to develop the venture capital market in this sector. The Facility shall operate by providing equity or quasi equity support, directly or indirectly. In particular, in case of direct investments, the DTF shall operate by providing equity or quasi equity (like as convertible notes) support to start-ups; in case of indirect investments, the SGR shall operate by financing third party funds (AIF – Alternative Investment Fund) which shall operate by providing equity or quasi equity, debt or quasi-debt instruments. On the basis of the RRF investment, the Facility aims at initially providing at least EUR 400,000,000 of financing.

The Facility shall be managed by CDP Venture Capital SGR as the implementing partner. DTF shall have a duration of 15 years, in order to match the duration of the third-party funds, and shall invest in the following product lines:

- Equity or quasi equity support to digital start-ups (direct manner);
- Equity or quasi equity support to venture capital/private equity funds (indirect manner);
- Support in the form of equity, quasi equity financing to incubation/acceleration programs.

MIMIT and the SGR shall amend the actual Implementing Agreement (“Accordo Finanziario”) and the DTF Rules, in order to include the following provisions:

1. **Description of the decision-making process of the Facility:** The final investment decision of the Facility shall be taken by a board of directors or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government\(^{108}\).

2. **Key requirements of the associated investment policy,** which shall include:
   a. The description of the financial products and eligible final beneficiaries.
   b. The requirement that all investments supported are economically viable.
   c. The requirement to comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, in the case of general support to start-ups, the investment policy shall exclude companies with a substantial focus\(^{109}\) in the following sectors: (i) fossil fuel-based energy production and related activities\(^{110}\); (ii) energy-intensive and/or high CO2-emitting industries\(^{111}\); (iii) production,

---

\(^{108}\) CDP Venture Capital SGR performs the management activities in compliance with the principles of independence and autonomy under AIFM Directive.

\(^{109}\) It is considered that a Final Beneficiary has a “substantial focus” on a sector or business activity if such sector or activity is identified as being an essential part of the business activity of the Final Beneficiary respectively in relation to the gross revenue, profit, or client base of the Final Beneficiary. The gross revenue generated from the restricted sector or activity shall, in any case, not exceed 50% of the gross revenue.

\(^{110}\) Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

\(^{111}\) Including activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks. Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.
rental, or sale of polluting vehicles\textsuperscript{112}; (iv) waste collection, waste treatment and disposal\textsuperscript{113}, (v) processing of nuclear fuel, production of nuclear energy. Furthermore, the investment policy shall require compliance with the relevant EU and national environmental legislation of the final beneficiaries of the Facility.

d. The requirement that final beneficiaries of the Facility shall not receive support from other Union instruments to cover the same cost.

3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to reinvest any reflows according to the investment policy of the Facility.

4. Monitoring, audit, and control requirements, including:
   
   1. The description of the implementing partner’s monitoring system to report on the investment mobilized.
   
   2. The description of the implementing partner’s procedures that shall ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.
   
   3. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.
   
   4. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of the SGR. These audits shall verify i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) the compliance with the DNSH principle, the State Aid rules, and iii) that the requirement that final beneficiaries of the Facility have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement and Funding Agreements are being respected.

5. Requirements for selecting venture capital equity/debt funds: The Digital Transition Fund shall select financial intermediaries in an open, transparent, and non-discriminatory manner, in line with the current practice – among other - by publishing all requirements and application forms on both the SGR and MIMIT websites. Controls for the absence of conflict of interests on financial intermediaries shall take place and be conducted \textit{ex-ante} for all financial actors involved. The absence of conflict of interest always refers to the “final beneficiary” of the Facility.

6. Requirement to sign Funding Agreements: The Digital Transition Fund shall sign Funding Agreements with the financial intermediaries in line with key requirements that shall include all the requirements under which the DTF operates, including:

   3. The obligation of the financial intermediary to take its decisions in compliance \textit{mutatis mutandis} with the decision making and investment policy requirements specified above, including related to respect of the DNSH principle.

   4. The description of the monitoring and audit and control framework that the financial intermediary shall put in place, which \textit{mutatis mutandis} shall be subject to all the monitoring, audit and control requirements specified above.

\textsuperscript{112} Polluting vehicles are defined as non-zero-emission vehicles.

\textsuperscript{113} This exclusion does not apply to actions in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
The implementation of the measure shall be completed by 31 August 2026.

**Description of each milestone and target**

The elements that shall be included in Financial Instrument's investment policy/strategy are:

- Investment targets (fund size, number of operations, amounts to be supported over time differentiated by beneficiary such as SMEs and mid-caps/large companies)
- Scope and eligible beneficiaries
- Eligible financial intermediaries and selection process
- Type of support provided (such as guarantees, loans, equity and quasi-equity)
- Targeted risk/returns for each type of investor
- Risk policy and AML policy
- Governance (partners, fund managers, Board, Investment Committee, role and responsibilities)
- Diversification and concentration limits
- Equity policy including exit strategy for equity investments
- DNSH and sustainability proofing policy and exclusion list

The call for projects to be financed as innovation ecosystems. The selection procedure shall require a DNSH evaluation, and, where applicable, a Strategic Environmental Assessment (SEA) in case the project is expected to produce a consistent impact on the territory.

- Lending policy for debt investment, including required guarantees and collateral
- Timeline for fund raising and for implementation

Italy shall transfer EUR 400 000 000 to CDP Venture Capital for the Facility.

The satisfactory fulfilment of the target shall also require an amendment of the implementing agreement between Italy and CDP Venture Capital SGR and the Facility bylaws, in line with the conditions set out in the Council Implementing Decision.

Cassa Depositi e Prestiti Venture Capital shall have entered into legal financing agreements with start-ups, incubation/acceleration programs or venture capital funds for an amount necessary to use 100% of the RRF investment (EUR 400 mln) into the Facility (including the average maximum cap of 13% of management fees and costs of DTF over the lifecycle of the fund and also including ex ante conditionalities for subsequent investment rounds, with the exception of carried interested, performance fees and all cost and management fees related to third party funds.)

The investment shall be split in the following two line of interventions:
- Direct investment.

Commitments under this measure concluded before the entry into force of the amendments to the implementing agreement investment policy and in compliance with the agreement under milestone M4C2-20 previous investment policy shall also be counted towards the achievement of the target.

From the date of entry into force of the Council Implementing Decision, new commitments shall start to follow the new investment policy according to the new Council Implementing Decision.
L. MISSION 5 COMPONENT 1: Employment policy

The measures under this component of the Italian recovery and resilience plan introduce a comprehensive and integrated reform of active labour market policies (ALMPs) and vocational training. Strengthening ALMPs and improving the capacity building of public employment services (PES), including their integration with education and training providers and private operators, are expected to increase services’ efficacy. In addition, the measures of this component aim at reducing social vulnerabilities to shocks, in particular by tackling undeclared work in all its forms and sectors by setting more effective sanctions along with stronger incentives to work legally. Furthermore, this component promotes gender equality (equal pay) through the gender equality certification system. It also invests in young people by increasing the quantity and quality of training programmes, for instance, through the participation to the Universal Civil Service programme.

The implementation of these measures is expected to contribute addressing the challenges covered by the 2020 country-specific recommendation 2 on labour market urging Italy to “Mitigate the employment impact of the crisis, including through […] active support to employment”, the 2020 country-specific recommendation 2 to “support skills (…) including digital ones”, the 2019 country-specific recommendation 2 to “step up efforts to tackle undeclared work, ensure that active labour market and social policies (…) reach out notably to young people and vulnerable groups. Support women’s participation to the labour market”, and the 2019 country-specific recommendation 2 to “foster up-skilling, including by strengthening digital skills”.

L.1. Description of the reforms and investments for non-repayable financial support

Reform 1 - The Active Labour Market Policies (ALMPs) and Vocational Training

The objective of this reform is to promote a more efficient active labour market system by providing specific employment services and personalised labour market activation plans. The creation of a National Programme for the Guaranteed Employability of Workers (GOL) shall enable the provision of tailored made services to the unemployed, thus strengthening their activation paths. The GOL programme shall be accompanied by the National Plan for New Skills and the definition of national essential levels of vocational training measures. The VET system in Italy shall be enhanced by promoting a territorial network of education, training and employment services, as well as by developing an inclusive lifelong learning system and innovative upskilling and reskilling pathways.

Investment 1 - Strengthening Public Employment Services (PES)

The objective of this investment is to allow an effective delivery of employment and training services. This measure includes infrastructural investments, the development of regional labour market Observatories, the development of interoperability between regional and national information systems, the design and implementation of training interventions to update the skills of job counsellors. The measure also envisaged the design and implementation of contents and communication channels of the services offered.

Reform 2 - National Plan tackling undeclared work

The objective of this measure is to improve the quality of work and workers’ conditions. This measure includes actions aimed at preventing and tackling undeclared work, labour
exploitation (Caporalato), and other forms of irregular work. The Reform includes: (I) introducing direct and indirect measures to transform undeclared into declared work by ensuring that benefits of operating in the declared economy outweigh the costs of working in the undeclared economy; (II) strengthening the inspection capacity of the National Labour Inspectorate; (III) improving the production, collection and timely distribution of granular data on undeclared work; (IV) supporting the process of transformation of undeclared work into regular work, supporting the adoption of deterrence measures and incentives for regular work; (V) carrying out communication campaigns, information and awareness-raising activities; (V) strengthening the governance system to fight undeclared work at national and local level.

**Investment 2 - Gender Equality Certification System**

The objective of this measure is to ensure greater participation of women in the labour market and reducing the gender pay gap. This investment includes the implementation and enforcement of the national gender equality certification system to promote transparency in the labour market as well as in business processes and, in the medium to long term, contributing to improving women's working conditions in terms of quality, remuneration and empowerment.

**Investment 3 - Strengthening the dual System**

The objective of this measure is to support young people and adults without secondary education accessing employment opportunities by increasing the number of people participating in formal education and vocational education and training through the dual system, including apprenticeship. This investment shall contribute to make the education and training systems more synergic with the labour market, as well as boosting the employability of young people through the acquisition of new competences, in line with the digital and green transition, with on-the-job learning. It shall contribute to: (I) modernise the education and training system by favouring the creation of on-the-job learning and strengthening the dialogue with enterprises; (II) strengthen financial allocation to offer training in marginalised areas; (III) create a robust and inclusive governance that shall include economic and social partners.

**Investment 4 - Strengthening of the Universal Civil Service**

The objective of this measure is to strengthen the universal civil service, increase the number of young people involved in non-formal learning and improve their knowledge and skills. This investment includes measures to raise awareness on the importance of active citizenship, promote youth employability and social cohesion with particular attention to the green and digital transition.

L.3. Description of the reforms and investments for the loan

Investment 5 - Creation of women’s enterprises

The objective of this measure is to contribute to increasing the level of participation of women into the labour market and, in particular, to support women’s participation in business activities. The investment shall support the creation of women’s enterprises. The main objectives of the measure are: (I) systematising and redesigning current supporting measures to support female entrepreneurship to increase their effectiveness; (II) supporting the implementation of innovative business projects already established and operating; (III) supporting the start-up of women's entrepreneurial activities through mentoring, technical-managerial support, measures for work-life balance, etc; (IV) creating - through targeted communication actions - a favourable cultural climate for women’s entrepreneurship.

|                   | Investment 5 - Creation of women's enterprises | Target | Enterprises as defined in the relevant investment policy have received financial support | N/A | Number | 0 | 2,400 | Q2 | 2026 | Financial support has been disbursed to at least 2,400 enterprises as defined in the relevant investment policy. The implementation of the support to female entrepreneurship is undertaken through instruments already active (NITO-ON, Smart & Start) and the new fund established by the Budget Law for 2021.
M. MISSION 5 COMPONENT 2: Social infrastructures, families, communities and third sector

The planned reforms and investments included in this component aim at strengthening resilience by supporting the integration and inclusion of the most vulnerable, along individual, family and social dimensions. This component provides a national strategy for the active inclusion of vulnerable population groups. The objectives of this component are: (I) strengthening the role for integrated social services to support families, minors and adolescents, to support parenting skills and protect vulnerable families as well as persons with disabilities, including through the enhancement of social infrastructures involving the third sector; (II) improving the autonomy of people with disabilities, by providing community and home-based social and health services and removing barriers to accessing housing and job opportunities; (III) improving the inclusion of people in extreme marginalization and housing deprivation (e.g. homeless people) through a wider offer of temporary accommodation assistance facilities and services, personalized paths towards autonomy and personal resilience; (IV) strengthening the availability of more affordable public and private housing and urban and territorial regeneration; (V) developing the resilience capacity of the most vulnerable through the dissemination of the culture of sport and the setup of sports infrastructures through the creation of urban parks where sports activities may be combined with entertainment activities for the benefit of the communities.

The implementation of these measures is expected to contribute addressing the challenges covered by the 2019 country-specific recommendations 2 on social policy urging Italy to “ensure that [...] social policies are effectively integrated and reach out notably to young people and vulnerable groups” and by the 2020 country-specific recommendations 2 to “provide adequate (…) access to social protection”.

M.1. Description of the reforms and investments for non-repayable financial support

Reform 1 - Framework Law for Disability

The main objective of the reform is to modify the legislation on disabilities and promote the de-institutionalization (i.e., transfer from public or private institutions to their families or into community-based homes) and autonomy of people with disabilities. This shall entail (I) strengthening the offer of social services, (II) simplifying access to social and health services, (III) reforms of disability assessments, (IV) promoting independent living projects, (V) promoting the work of teams of experts that may support people with disabilities with multidimensional needs.

Reform 2 – Reform for non-self-sufficient elderly persons

The objective of this measure is to reform social services and improving the living conditions of non-self-sufficient elderly people. This reform shall include: (I) simplifying older people’s access to services through the creation of single points of social and health access, (II) identifying ways of recognizing non-self-sufficiency based on the need for assistance, (III) providing a multidimensional assessment, (IV) defining individualized projects that promote de-institutionalization. This reform is anticipated by specific interventions envisaged by the Plan, included both in the health mission (M6), with reference to projects that strengthen local health services and home care, and in this component, with specific reference to the investment 1, intervention II aimed at the de-institutionalisation.
Investment 1 - Supporting vulnerable people and preventing institutionalization

The objective of this measure is to support vulnerable people and prevent institutionalisation. This investment shall include the following interventions: (I) supporting parenting skills and preventing vulnerability of families and children; (II) supporting an autonomous life and de-institutionalisation for elderly people; (II) reinforcing home social services to guarantee early supported discharge and prevent hospitalization; (III) strengthening social services and preventing burnout among social workers.

Investment 2 - Autonomy patterns for people with disabilities

The objective of this measure is to increase the autonomy of people with disabilities. The scope of the investment is to accelerate the process of de-institutionalization by providing community and home-based social and health services in order to improve the autonomy of people with disabilities. The measure shall promote access to housing and job opportunities, including new possibilities offered by information technology.

Investment 3 - Housing First and Post Stations

The objective of this measure is to protect and support the inclusion of marginalised people through housing first and post stations. The introduction of the ‘housing first’ approach means that municipalities shall make flats available for single individuals, small groups or families up to 24 months. In addition to this, customised projects shall be activated for each single person/family in order to implement personal growth development programmes and to help them achieve a higher degree of autonomy, also by providing them with training and with other services aimed at improving their employability level. On the other hand, the implementation of ‘post stations’ means the creation of service and inclusion centre for homeless people. Such centres shall offer, besides a limited night reception, important amenities such as health services, catering, post distribution, cultural mediation, counselling, job orientation, legal consulting, and goods distribution among others.

<td>The Framework Law, which consists of a delegation law, shall strengthen the autonomy of people with disabilities, according to the principles of UNCRPD and European Strategy 2021-2030 for the rights of persons with disabilities, which shall as a minimum include: (i) the comprehensive definition and enhancement of the offer of social services for disabled people together with the promotion of de-institutionalisation and independent living, (ii) the simplification of procedures for access to health and social services, and (iii) the review of procedures for assessing the condition of disability, towards a multidimensional evaluation of the condition of every person. People with disabilities are those defined according to the principles of the UN CRPD, by the Law n. 104/1992. In Italy the assessment process is under competence of the Regions and the person is evaluated by the Local Health Services or by the National Institute of Social Welfare. The law shall be proposed by the Minister for the Disabilities for the approval by the Council of Ministers, according to the set road map. The adoption of the Framework Law shall be followed up by the reorganization of local social services, the definition of quality standards and by providing ICT platform to enhance and make more efficient the services.</td>

M.3. Description of the reforms and investments for the loan

Investment 4 - Investments in projects of urban regeneration, aimed at reducing situations of marginalization and social degradation

The objective of this measure is to provide municipalities with grants for investments in urban regeneration, to reduce marginalization and social degradation as well as to improve the social and environmental context of urban centres, in full respect of the Do–no-significant Harm principle. The measure aims at supporting the reuse and re-functionalization of public areas and existing public building structures for purposes of public interest, and at improving the urban landscape through renovation of public buildings, with particular attention to the development of social, cultural, educational and didactic services, including sporting activities.

The measure shall not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). It includes gas-condensing boilers, which shall not be eligible for the interventions under this measure.

Investment 5 – Urban Integration Plans (general projects and Overcoming illegal settlements to fight labour exploitation in agriculture)

The objective of this measure is to regenerate, revitalise and enhance large degraded urban areas, with particular attention to the creation of new services for the person and the requalification of accessibility and inter-modal infrastructures, allowing the transformation of vulnerable territories into smart and sustainable cities. This investment includes two interventions: (I) support to general projects to deliver and implement urban integrated plans, such as maintenance and reuse of public areas and buildings, regeneration and valorisation of under-used or unused urban areas, etc. (II) specific projects to overcome illegal settlements in agriculture. Local administrations shall be supported in the creation of action plans to overcome illegal settlements and provide decent housing solutions for workers in the agricultural sector. Furthermore, under this investment a thematic Fund (Fund of Funds) shall be created, in collaboration with the EIB, targeting the support of private intervention in urban regeneration initiatives. This fund shall be used to support the climate and digital transition of urban areas.

The measure shall not do significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measure and the mitigating steps set out in the recovery and resilience plan in accordance with the DNSH Technical Guidance (2021/C58/01). It includes gas-condensing boilers, which shall not be eligible for the interventions under this measure.

Investment 6 - Innovative Plan for Housing Quality

The objective of this measure is to build new public housing accommodations and redevelop degraded areas, mainly focusing on green innovation and sustainability. The investment shall provide support to: (I) redevelop, reorganize and increase the offer for public housing; (II) regenerate areas, spaces and public and private properties; (III) improve the accessibility and safety of urban areas and the provision of services; (IV) develop participatory and innovative management models to support social and urban welfare.

Investment 7 – Sport and Social Inclusion
The objective of this measure is to regenerate urban areas focusing on sport facilities, in order to promote social inclusion and integration, especially in the most deprived areas of Italy. The funded projects shall support: (I) construction and regeneration of sports facilities, located in disadvantaged areas of the country including metropolitan suburbs; (II) the distribution of sports equipment for the disadvantaged areas; (III) the completion and adaptation of existing sports facilities such as: (for examples: functional recovery, restructuring, extraordinary maintenance, removal of architectural barriers, and energy efficiency).

Notification of all public contracts awarded to at least 300 municipalities of more than 15 000 inhabitants for investments in urban regeneration to reduce situations of marginalisation and social degradation, with projects in line with the RRF objectives including the DNSH principle.

The grants are awarded to municipalities of more than 15 000 inhabitants which are not the provincial capitals, the provincial capital municipalities or the metropolitan city headquarters.

Projects of urban regeneration shall consist of at least one of the following interventions:

1. Reuse and re-functionalization of public areas and existing public building structures for purposes of public interest, including the demolition of abusive works carried out by private individuals in the absence or total discrepancy from the building permit and the arrangement of the relevant areas;
2. Improvement of the quality of the urban landscape and of the social and environmental fabric, including through building renovation of public buildings, with particular reference to the development of social and cultural, educational and didactic services;

N. MISSION 5 COMPONENT 3: Special interventions for territorial cohesion

This component of the recovery and resilience plan includes two intervention areas: i) Plan for the resilience of internal, peripheral and mountain areas; ii) Projects for the development of the South, including investments to tackle educational poverty, to consolidate rural pharmacies as local health services, the enhancement of assets confiscated from organised crime and infrastructural investment in Special Economic Zones. These measures aim at tackling the territorial divide in three domains: demographics and services; skill development; investment.

The investments and the reforms under this component shall contribute addressing the country specific recommendations addressed to Italy in 2019 and 2020 on the need to “Focus investment-related economic policy on research and innovation, and the quality of infrastructure, taking into account regional disparities” (country specific recommendation 2019.3); “improve educational outcomes” (country specific recommendation 2019.2); “Strengthen the resilience and capacity of the health system […]” (country specific recommendation 2020.1); “ensure adequate […] and access to social protection” (country specific recommendation 2020.2).

N.1. Description of the reforms and investments for non-repayable financial support

Investment 1. Inner Areas – 1. Enhancement of community social services and infrastructures

The intervention aims at tackling the issues of social exclusion and marginalisation, by intensifying the provision of services through the increase of funds for public services delivered by the local authorities (the delivery mechanism consists in providing grants to the municipalities). Financed projects may concern: home care services for the elderly; community nurses and midwives; strengthening of small hospitals (those without first aid) or some basic services (i.e. radiology, cardiology, gynaecology) and outpatient centres; infrastructures for helicopter rescue; strengthening centres for the disabled; counselling centres, cultural services, sports services and migrant reception. The intervention shall envisage either the creation of new services and infrastructures or the improvement of existing ones through an increase in the number of recipients or in the quality of supply.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use\textsuperscript{114}; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant

\textsuperscript{114} Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).
benchmarks\textsuperscript{115}; (iii) activities related to waste landfills, incinerators\textsuperscript{116} and mechanical biological treatment plants\textsuperscript{117}; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

**Investment 2: Territorial Proximity health facilities**

The intervention aims at consolidating rural pharmacies as local health services (Rural pharmacies are defined on the basis of L. 27 March 1968, n. 221. This measure, shall give immediate support to rural pharmacies that during the Covid-19 emergency, have been a fundamental point of reference for the local population. By consolidating their role in providing health facilities, pharmacies can keep being a central element of community life, bringing healthcare as close as possible to citizens. In detail, these pharmacies are expected to strengthen their role by: (i) taking part in the integrated home assistance service; (ii) providing second-level services, in accordance with diagnostic-therapeutic paths envisaged for specific pathologies; (iii) dispensing drugs that the patient is now forced to collect in the hospital; (iv) monitoring the patient with the Electronic Health Record and the Pharmaceutical Dossier.

**Investment 3: Structured socio-educational interventions to combat educational poverty in the South supporting the Third Sector**

The measure aims at fostering the third sector in Southern regions (Abruzzo, Basilicata, Campania, Calabria, Molise, Puglia, Sardinia and Sicily) and at supplying socio-educational services to minors in connection with the provisions of the Partnership Agreement for the 2021-2027 programming period of European cohesion policies.

The socio-educational interventions to combat educational poverty and support the Third sector is expected to take place in one of the following areas:

- Interventions for children aged zero to six aimed at strengthening the conditions of access to nursery and kindergarten services and at supporting parenthood;
- Interventions for children aged five to ten aimed at guaranteeing effective educational opportunities and early prevention of school dropout, bullying and other phenomena of distress;

\textsuperscript{115} Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\textsuperscript{116} This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{117} This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
- Interventions for children aged 11-17, which aim at improving education supply and preventing the phenomenon of early school leaving.

The interventions shall ensure the following key elements of the tender:

- Public notices shall account at least for EUR 50 000 000 each
- The third sector entities projects shall last at least one year and up to two years.

The actions shall take place in the regions of Abruzzo, Basilicata, Campania, Calabria, Molise, Puglia, Sardegna and Sicilia.
N.3. **Description of the reforms and investments for the loan**

**Reform 1: Simplification of the procedures and strengthening of the Commissioner in the Special Economic Zones**

The reform shall contribute to the simplification of the governance system and streamline the implementation time of interventions in the Special Economic Zones. The reform shall establish the Digital One Stop Shop for the Special Economic Zones and strengthening of the Commissarial Role.

**Investment 4: Infrastructural investments for the Special Economic Zones (SEZ)**

The scope of these investments is to ensure the effectiveness of the reform introducing SEZs, by avoiding further economic development delay in Southern areas with already a productive base.

The projects included under the measure shall foster competitiveness and economic development in the SEZs through primary urbanization works – as defined by the Italian legislation and the connection of these areas to the road and railway networks. The interventions have the objective of incentivizing companies and firms to locate their productive activities to SEZs areas. The infrastructural investments are expected to be related to last-mile connections with ports or industrial areas; digital logistics, urbanizations or energy efficiency works; strengthening the resilience of ports.

In order to ensure that the measure complies with the ‘Do no significant harm’ Technical Guidance (2021/C58/01), the eligibility criteria contained in terms of reference for upcoming calls for projects shall exclude the following list of activities: (i) activities related to fossil fuels, including downstream use; (ii) activities under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks; (iii) activities related to waste landfills, incinerators and mechanical biological treatment plants; and (iv) activities where the long-term disposal of waste may cause harm to the environment. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

---

118 Except projects under this measure in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01).

119 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks an explanation of the reasons why this is not possible should be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

120 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

121 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

MISSION 6 COMPONENT 1: Proximity networks, facilities and telemedicine for territorial healthcare assistance

The objective of this component is to strengthen the Italian National Health Service (NHS) by inter alia enhancing the protection against environmental and climate-change related health risks and better responding to the communities’ needs regarding local care and assistance. Local healthcare assistance is fragmented and subject to regional disparities that result in different levels of healthcare provisions and health outcomes across regions. The provision of integrated home care services is considered to be low, and the different healthcare and social service providers are considered to be only weakly integrated. Moreover, the capacity of the Italian National Health Service (NHS) to address health risks related to environmental exposure and climate change has been tested by several environmental crisis and emergencies that highlighted the challenges due to a lack of sufficient prevention actions. The objective of this component of the Italian recovery and resilience plan is to strengthen the Italian National Health Service (NHS) by inter alia enhancing the protection against environmental and climate-change related health risks and better responding to the communities’ needs regarding local care and assistance.

The investments and reforms of this component shall contribute addressing the country-specific recommendations addressed to Italy in 2019 and 2020 on the need to “focus investment-related economic policy on research and innovation, and the quality of infrastructure, taking into account regional disparities (country-specific recommendation 3, 2019), “strengthen the resilience and capacity of the health system, in the areas of health workers, critical medical products and infrastructure” (country-specific recommendation 1, 2020) and to “focus investment on the green and digital transition, in particular on […] reinforced digital infrastructure to ensure the provision of essential services” (country-specific recommendation 3, 2020).

O.1. Description of the reforms and investments for non-repayable financial support

N/A

O.2. Milestones, targets, indicators, and timetable for monitoring and implementation for non-repayable financial support

N/A
O.3. Description of the reforms and investments for the loan

Reform 1: Definition of a new organisational model for Territorial healthcare assistance network.

The reform constitutes a preparatory element for the investments of the component. It shall establish a new model of territorial healthcare assistance and create a new institutional structure of Health-Environment-Climate prevention. This shall be achieved through:

1. Establishment of a new organisational model for the territorial healthcare assistance network through the definition of a regulatory framework which identifies structural, technological and organisational standards.

2. Definition of a new institutional structure of Health-Environment-Climate prevention, following an integrated approach ("One Health") and a holistic vision ("Planetary Health").

Investment 1.1: Community Health Houses to improve territorial health assistance.

The investment project consists in the establishment and operationalisation of at least 1 038 Community Health Houses, through the activation, development and aggregation of primary care services and implementing (energy efficient) assistance delivery centres for an integrated response to care needs.

Investment 1.2: Home as the first place of care and telemedicine

The investment consists in the large-scale adoption of telemedicine solutions and supporting healthcare innovation, through the following measures:

1. Home care as first point of assistance (Investment 1.2.1) - The goal is to increase the number of people treated in home care to 10% of the population over 65 through investment in hardware and increased service provision.

2. Territorial Coordination Centres (Investment 1.2.2) - The planned investment concerns the establishment of at least 480 Territorial Coordination Centres ("Centrali Operative Territoriali") that are intended to link and coordinate various territorial, social-health and hospital services, as well as the emergency-urgency network. The Territorial Coordination Centres are expected to ensure the remote control of the devices provided to patients, support the exchange of information between health professionals, and constitute a reference point for caregivers and patient needs.

3. Telemedicine to better support patients with chronic diseases (Investment 1.2.3) - The investment aims to (1) finance projects that enable remote doctor-patient interactions, in particular diagnostics and monitoring, (2) create a national platform for screening telemedicine projects (linked to Mission 6 Component 2 Investment 1.3) and (3) finance ad hoc research initiatives on digital health and care technologies.

Additional interventions with a link to home care are listed under Mission 5, Component 2, in particular reforms 1 and 2 and investments 1 and 2

Investment 1.3: Strengthening Intermediate Healthcare and its facilities (Community Hospitals)
The investment shall create at least 307 community hospitals, i.e., healthcare facilities for patients who, following an episode of minor acuity or the relapse of chronic pathologies, require low-intensity and short-term clinical interventions.

P. MISSION 6 COMPONENT 2: Innovation, research and digitalisation of national healthcare service

This component of the Italian recovery and resilience plan aims at ensuring the necessary enabling conditions for greater resilience of the national healthcare service through: (i) replacement of obsolete healthcare technologies in hospitals; (ii) the development of a significant structural improvement in the safety of hospital buildings; (iii) the improvement of the health information systems and digital tools; (iv) the promotion and strengthening of the scientific research sector; (v) the enhancement of human resources.

The investments and reforms under this component shall contribute addressing the country-specific recommendations addressed to Italy in 2020 and 2019 on the need to “strengthen the resilience and capacity of the health system in the areas of health workers, critical medical products and infrastructure” (country-specific recommendation 1, 2020), to “focus investment on the green and digital transition, in particular on […] reinforced digital infrastructure to ensure the provision of essential services” (country-specific recommendation 3, 2020), and to “focus investment-related economic policy on research and innovation, and the quality of infrastructure, considering also regional disparities” (country-specific recommendation 3, 2019).

P.1. Description of the reforms and investments for non-repayable financial support

Reform 1: Revise and update the current legal framework of the Scientific Institutes for Hospitalisation and Care (IRCCS)

The reform aims to reorganize the network of Scientific Institutes for Hospitalisation and Care (IRCCS) to (i) improve the quality of the national health system (NHS), (ii) improving the relationship between Health and Research and (iii) revisiting the legal regime of the IRCCS and the research policies within the competence of the Italian Ministry of Health.

The reform shall improve the governance of the public IRCCSs by (i) enhancing the strategic management, (ii) better defining the powers and areas of competence and (iii) comprehensively define the rules on the status of the Scientific Director of the public IRCCSs and of research staff.

Lastly, a specific sub-measure differentiating IRCCSs on the basis of their activity (single-specialist or generalist), creating an integrated network of IRCCSs and facilitating the exchange of expertise between the IRCCSs themselves and the other structures of the Italian NHS.

Investment 2.1: Strengthening and enhancement of the NHS biomedical research

This investment consists in strengthening the biomedical research system through two lines of intervention: (a) financing of Proof of Concept (PoC) projects supporting the development of technologies with a low degree of technological maturity, as well as fostering the transfer of technology towards the industry (b) funding of research programs / projects in the field of rare diseases and rare cancers and other diseases with a high impact on health.

P.3. Description of the reforms and investments for the loan

Investment 1.1: Digital update of hospitals’ technological equipment

This investment consists in the improvement of the digitalization of healthcare in order to enhance staff productivity, improve the quality of processes, ensuring patient safety and high-quality service delivery. The investment has three lines of intervention:

1. Modernisation of large healthcare equipment by substituting obsolete models with technological advanced ones. Substituted equipment will be disposed of or reallocated to other National Health Service sites.
2. Informatization of the processes of hospitals with a first and second level Emergency Department (“Dipartimenti Emergenza e Accettazione”, DEA).
3. Increase in the number of beds in intensive and semi-intensive care units in National Health Service hospitals.

Investment 1.2: Toward a safe and sustainable hospital

This investment consists in aligning hospitals to the anti-seismic regulations. To this end two different lines of investment are foreseen:

1. Seismic upgrading and improvement interventions of hospital facilities identified from the survey of the needs expressed by the regions.
2. Multi-year intervention aimed at renovating and modernising the physical and technological framework of the public health real estate.

Investment 1.3: Strengthening of the technological infrastructure and of the tools for data collection, data processing, data analysis and simulation

This investment consists in significantly improving the technological infrastructure that underpins care delivery, healthcare analytics and predictive capacity of the Italian NHS. The investment is composed of two different projects:

1. Empower the infrastructure and usage of the existing Electronic Health Records (EHR). This shall be achieved by making it a fully digital-native data environment, thus homogeneous, consistent, and portable across the national territory. The EHR shall perform three core functions: first it shall empower healthcare professionals by allowing them to count on the same source of clinical information detailing the entire medical history of a patient; second, it shall become the access point of citizens and patients to the fundamental services provided by the National and Regional healthcare systems; third, healthcare administrations shall be empowered to use the clinical data to perform health analytics and improve healthcare delivery.
2. Strengthen the infrastructure and the technological and analytics instruments of the Ministry of Health to monitor the Essential Levels of Assistance (LEA, i.e. the services guaranteed by the NHS nationwide) and plan healthcare assistance and services in line with population needs and evolution on demographic, innovation and epidemiology trends. This key and primary objective of the Italian Ministry of Health is accomplished through the achievement of the following and integrating 4 sub-objectives: (i) strengthening of the infrastructure of the Italian Ministry of Health, integrating EHR clinical data with New Health Information System (NSIS) clinical, administrative and costs data and with the other information and data related to health in One-Health approach to monitor the “LEA” and ensure health
surveillance and vigilance activities; (ii) enhancement of the collection, processing and
generation of NSIS data by local level, reengineering and standardizing the data generation
regional and local process, in order to improve the NSIS tool for the measurement of quality,
efficiency and appropriateness of the NHS; (iii) development of advanced analysis tools to
assess complex phenomena and scenario prediction to improve the central capacity to plan
healthcare service and detect emerging diseases; (iv) creation of a national platform where
supply and demand of telemedicine services from the accredited providers may meet.

Investment 2.2: Development of technical-professional, digital and managerial skills of
professionals in the healthcare system

This investment consists in increasing scholarships for the specific course in general medicine;
launching a training plan on safety in terms of hospital infections for all NHS staff; activating
a training path for personnel with top roles within NHS bodies in managerial and digital skills
and financing specialized medical training contracts.

Q. MISSION 7: REPowerEU

The REPowerEU chapter aims at strengthening distribution transmission and distribution networks, including those related to gas; accelerating renewable energy production, reducing energy demand, increasing energy efficiency and creating the skills in the public and private sectors for the green transition; promoting renewable energy and hydrogen value chains through measures facilitating access to credit and tax credits.

The component addresses the country-specific recommendations addressed to Italy in 2022 and 2023. Notably, it aims to accelerate the deployment of additional renewable energy capacity by investing in major electricity interconnections projects (namely, two interconnectors connecting Sardinia and Sicily to the mainland, and three interconnectors between Austria, Slovenia and Italy), upgrading the national transmission grid and streamlining permitting procedures. It contributes to increasing the capacity for internal gas transmission to overcome bottlenecks, diversify energy imports and strengthen the security of supply. It promotes sustainable mobility by reducing environmentally harmful subsidies and strengthening the railway fleet. It helps reducing the reliance on fossil fuels by electrifying the consumption of households and increasing the resilience of the network. It contributes to increasing energy efficiency in the residential and corporate sectors, including through targeted incentive schemes and financial instruments. Finally, it includes reforms and investments to improve the provision and acquisition of the skills needed for the green transition – both in the private and in the public sectors.

Nine projects have a cross-border dimension. Three of them have a direct cross-border impact: 1) an investment aimed at increasing existing electricity interconnections’ nominal capacity between Italy, Austria and Slovenia; 2) an investment contributing to the construction of an electric interconnection between Sardinia, Corsica and Tuscany; 3) an investment in a compressor station that shall increase gas export towards Central Europe. Other projects indirectly benefit cross-border Member states by addressing internal energy transmission and distribution bottlenecks and increasing the efficiency and resilience of the grid.

It is expected that no measure in this component does significant harm to environmental objectives within the meaning of Article 17 of Regulation (EU) 2020/852, taking into account the description of the measures and the mitigating steps set out in the recovery and resilience plan in accordance with the ‘Do no significant harm’ Technical Guidance (C(2023) 6454 final), whereas the principle of “do no significant harm” does not apply to investment 11 - Adriatic Line Phase 1 (Sulmona compressor station and Sestino-Minerbio gas pipeline) and investment 12 - Cross-border gas export infrastructure, in accordance with Article 21c(6) pf Regulation (EU) 2021/241.

Q.1. Description of the reforms and investments for non-repayable financial support

Reform 1. Streamlining permitting procedures for renewable energy at central and local level

The objective of this reform is to consolidate and streamline the existing legislation and provisions regulating the deployment of renewable energy sources.

The reform shall consist in the adoption and entry into force of a single primary legislative act (also known as Testo Único) collecting, compiling and consolidating all norms regulating the deployment of renewables, and superseding all relevant past legislation. The legislative act shall also set out principles for streamlining and harmonising permitting procedures for renewable energy sources at the subnational level.
The *Testo Unico* shall have the following key priorities:

1) Identifying “renewables acceleration areas” in line with the revised Renewable Energy Directive. Such areas shall be identified also in coherence with maritime spatial plans to accelerate the deployment of offshore wind.

2) Setting out principles for streamlining and harmonizing subnational permitting procedures for renewable energy sources. In particular, the *Testo Unico* shall set out “ceiling rules” – that is, regions cannot implement stricter permitting rules than those set out in national legislation.

3) Ensuring the establishment and operationalisation of a single-entry digital platform for obtaining all authorizations at national and regional level needed to install and deploy renewable energy sources. In particular, the *Testo Unico* shall ensure that the platform is built around the “once-and-only” principle, according to which applicants shall be required to supply the same information or documents to public institutions only once.

**Reform 2. Reduction of Environmental Harmful Subsidies**

The objective of this reform is to lead to a reduction of the Environmentally Harmful Subsidies (EHS), based on the annual Catalogue of Environmentally Harmful Subsidies published by MASE.

**Reform 3. Reduction of the costs of connection to the gas network of biomethane**

The objective of the reform is to facilitate the inclusion of biomethane into the energy system and energy market and to create new sustainable biomethane production capacity in line with Directive (EU) 2018/2001 (Renewable Directive) and its delegated acts. The goal is to favour the flexibility and efficiency of the natural gas network by facilitating a conversion to biomethane. Increase flexibility and efficiency is expected to contribute to the decarbonization of the energy system and to energy independence.

The implementation of the reform shall (1) reduce the connection costs of sustainable biomethane production plants, and (2) encourage investments targeting exclusively the uptake of sustainable biomethane in natural gas networks. The reform shall favour: i) greater integration between transmission and distribution networks; ii) the introduction of mechanisms for sharing the costs of investments in grid connection. These mechanisms shall shift costs from the producer of biomethane to the entire community benefiting from sustainable biomethane.

**Reform 4. Mitigation of financial risk associated with renewable PPAs (Power Purchase Agreements)**

The objective of the reform is to establish a system of guarantees mitigating the financial risk associated with renewable Power Purchase Agreements with a duration of at least three years.

The reform shall:

i) require for each operator to guarantee partial coverage of the countervalue of the Power Purchase Agreements by means of guarantee instruments provided on the electricity market;

ii) introduce measures to mitigate the risk of default, including requirements and constraints on the bidder and regulatory sanctions in the event of the producer’s default;
iii) identify an institutional entity to take on the role of seller/buyer of last resort, who would take over from the failing counterpart and ensure the fulfilment of the obligations assumed vis-à-vis the performing counterpart.

Reform 5. Plan for new Skills – Transitions

The objective of the reform is to update the regulatory framework of training and operationalise the tools to combat skills mismatch. The reform shall update the New Skills Plan adopted by Decree of 14 December 2021 and published in Gazzetta Ufficiale n.307 of 28 December 2021. The goal is to strengthen mechanisms linking the planning of training courses with the needs of the labour market, with the specific aim of better accompanying the green and digital transition, via the engagement of relevant actors in dedicated Pacts for Skills. The objective of the reform shall strengthen the role of the private sector in training and improve the recognition of skills, including the ones acquired on-the-job and via short training modules. The pilot projects under Investment [10] precede the reform and their outcomes shall be taken into account in the design and implementation of the reform.

The training supported by this reform shall not be related to: (i) activities and assets related to fossil fuels, including downstream use\textsuperscript{122}, (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks\textsuperscript{123}, (iii) activities and assets related to waste landfills, incinerators\textsuperscript{124} and mechanical biological treatment plants\textsuperscript{125}. The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may be selected.

Investment 1. Scaled-up measure: Strengthening smart grids

The objective of this investment is to scale up Investment 2.1 (Strengthening smart grids) in Mission 2 Component 2. The scale-up investment shall consist in interventions on medium and low voltage grid portions, thus electrifying the energy consumption of at least 230 000 more inhabitants than is already envisaged in the existing measure. The existing investment and the scaled-up part together shall electrify the consumption of at least 1 730 000 inhabitants.

\textsuperscript{122} Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

\textsuperscript{123} Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\textsuperscript{124} This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{125} This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
Investment 2. Scale-up measure: Interventions to increase the resilience of power grid

This investment scales up Investment 2.2 in Mission 2 Component 2. The scaled-up investment shall consist in interventions to improve the resilience of at least 648 km of power grid more than what already envisaged by the existing measure. The same conditions already foreseen by the existing measure apply. The existing investment and the scale-up investment together shall improve the resilience of at least 4 648 km.

Investment 3. Scale-up measure: Production of Hydrogen in brownfield sites (Hydrogen Valleys)

This investment is a scale-up version of Investment 3.1 in Mission 2 Component 2 of the recovery and resilience plan of Italy. The scale-up investment consists in completing 2 more projects to produce hydrogen in abandoned industrial areas than what already envisaged by the existing measure. The existing investment and the scale-up investment together shall support the completion of at least 12 projects.

The measure shall only support renewable hydrogen production based on electrolysis in line with the Directive (EU) 2018/2001 (Renewable Directive) and its delegated acts. All other conditions already foreseen by the existing measure apply.

Investment 4. Tyrrhenian link

The objective of this investment is to extend the electricity transmission infrastructure to enable the collection of capacity from renewable energy sources in the South of Italy and its integration in the national transmission grid.

This investment supports the construction of the “Tyrrhenian link”, and in particular of the “East interconnection line” between Sicily and Campania. The investment finances the installation of 514 km of the point-to-point direct current (HVDC) submarine cables between Eboli and Caracoli. The investment shall be completed by 31 August 2026.

Investment 5. SA.CO.I.3

The objective of this investment is to modernise the electricity transmission infrastructure connecting Sardinia to the rest of Italy, via Corsica, to enable the collection of capacity from renewable energy sources in Sardinia, and its integration in the national transmission grid.

This objective of the investment is to support the construction of the “Sardinian-Corsica-Italy 3” interconnection project. It consists in completing the construction of the shells of the conversion stations in Codrongianos, Sardinia, and in Suvereto, Tuscany. “Shells” are the external infrastructure of the compressor stations and do not include machines or other equipment that shall be installed therein after the completion of this investment. The investment shall be completed by 31 August 2026.

Investment 6. Cross-border electricity interconnection projects between Italy and neighbouring countries

The objective of this investment is to extend and modernise the electricity transmission infrastructure between Italy, Austria and Slovenia. In particular, the investment shall consist in completing the following cross-border interconnectors:

- “Somplago (Italy)-Würmlach (Austria), increasing existing interconnectors’ nominal capacity by 300 MW;
At completion of works for the Zaule-Dekani and Redipuglia-Vrtojba interconnectors, the cumulative nominal capacity of the interconnectors between Italy and Slovenia shall be increased by 250MW.

The investment shall cover only the completion of the part of the interconnector on the Italian side by 31 August 2026. At completion of works, the infrastructure shall be ready to enter in operation upon completion and operationalisation of the rest of the infrastructure on Austria’s and Slovenia’s side.

In order to avert the risk of overcompensation, by 31 August 2026 Italy shall provide the Commission with a report. The report shall demonstrate that exemptions from energy market rules granted to the three interconnectors are still justified. It shall moreover assess whether appropriate safeguards are put in place to ensure that the conditions of Article 63(1) of the Electricity Regulation (EU) 2019/943 are still met. The assessment shall consider the extent to which the relevant EU and public funds have an impact on the conditions relating to the riskiness of the projects.

**Investment 7. Smart National Transmission Grid**

The objective of the investment is to digitalise the National Transmission Grid (NTG) and improving the management and control system managed by the Transmission System Operator. The investment shall focus on both the transmission grid and its software components and shall facilitate the integration of consumers and prosumers in the energy market, accelerate the uptake of renewables and increase the resilience of the grid.

The investment shall include the following:

- installation of secure protocol 104 in at least 250 electric stations. Upon installation, and in synergy with the Information and Communication Technology (ICT) architecture, all data shall flow through the central management and control system.
- Installation of 5G equipment or ICT architecture in at least 40 electrical stations.
- Installation of industrial IoT monitoring system on at least 1,500 electricity pylons to collect data that can be processed in the management system.

The equipment installed through this investment shall, where needed, meet the energy related requirements set in accordance with Directive 2009/125/EC for servers and data storage, or computers and computer servers or electronic displays. The investment shall demonstrate best efforts to implement the relevant practices, such as IT equipment and services listed as "expected practices" in the most recent version of the European Code of Conduct on Data Centre Energy Efficiency, or in CEN-CENELEC document CLC TR50600-99-1 "Data centre facilities and infrastructures - Part 99-1: Recommended practices for energy management".

**Investment 8. Sustainable, circular and secure supply of Critical Raw Materials**

The objective of this investment is to support the recovery and recycling of critical raw materials, and thereby the value chains in critical raw materials and technologies linked to the green transition.

The investment has four main lines of actions:
1) Ecodesign: the goal of this line of intervention is to understand the Critical Raw Material (CRM) needs and the potential of eco-design to reduce the demand for critical raw materials, favouring a circular approach of industrial supply chains linked to the energy transition.

The expected output of this line of activity shall be a report analysing the future needs for critical raw materials. The report shall assess the potential of eco-design to reduce the demand for and favour the recyclability of critical raw materials.

2) R&D projects focusing on eco-design and the improvement of the collection, logistics and recycling of waste electrical and electronic equipment - including wind turbine blades and photovoltaic panels. The projects shall focus on the following 3 lines of research, development and innovation:

i) New or enhanced technologies, information systems and business methods for the recovery, recycling and treatment of waste of critical and strategic Raw Materials;

ii) Integration of ecodesign in the manufacturing of complex products and systems and in the market and consumption processes;

iii) Optimization of the collection and sorting of urban waste and sorting to ensure a consistent and high-quality supply of CRMs for urban mining operations.

3) Urban Mining: the objective of this line of intervention is to estimate the potential of urban mining activities and of already existing waste from ceased mining activities.

The expected output for this line of activity shall be a public database (geographic information system) allowing for the geolocalisation and visualisation of distributions of recyclable resources or materials dispersed across urban environments (urban mines) as well as existing waste in abandoned mines.

4) The establishment or equipment of Technological hub for Urban Mining and Eco-design. The hub is a network of laboratories that shall favour interaction between private companies and research institutions to improve the recovery and recycling from supply chain of end-of-life complex products and raw materials with low End-of-Life Recycling Input Rate (Eol-RIR) linked to the green transition (including Lithium, Neodymium and Silicon metal).

The expected outcome for this line of activity shall be the equipment of these laboratories.

**Investment 9. Scale-up measure: provide technical assistance and strengthen capacity building for the implementation of the Italian recovery and resilience plan**

This investment scales up Investment 1.9 in Mission 1 Component 1 of the recovery and resilience plan of Italy.

This measure scales up the existing investment by complementing the existing training program provided on the learning platform [www.syllabus.gov.it](http://www.syllabus.gov.it) with training modules preparing local civil servants to the green transition.

The training modules shall address at least the following topics: authorization processes for plants from renewable sources; promotion of renewable energy communities; support and organization of energy savings of the public administration; green e-procurement in energy and products with a lower environmental impact; procurement for the energy efficiency of...
buildings; public administration leadership in energy efficiency and sustainable behaviour, on
the energy front: best practices and dissemination of the culture of sustainability; models for
the promotion of sustainable mobility for energy saving.

**Investment 10. Pilot projects on skills “Crescere Green”**

The objective of this investment is to develop green skills on a supra-regional scale, with the
involvement of businesses and the private sector, and with a sectoral focus.

Short training interventions shall focus on the professional skills most required by the green
transition in the labour market. The professions affected shall be identified through the Pacts
for Skills under “Reform 5: Plan for new skills – Transitions”. The recipients shall be identified
among the participants of the National Programme for the Guaranteed Employability of
Workers (GOL) (under “Mission 5: Component 1 – Reform 1”) who, after an assessment
process, shall follow a pathway with a dedicated training component. The investment also aims
to increase the capacity of administrations, institutions and partners involved in the planning
of training activities.

The training supported by this investment shall not be related to:

1. activities and assets related to fossil fuels, including downstream use\(^{126}\),
2. activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than
   the relevant benchmarks\(^{127}\),
3. activities and assets related to waste landfills, incinerators\(^{128}\) and mechanical biological treatment plants\(^{129}\).

The terms of reference shall additionally require that only activities that comply with relevant EU and national environmental legislation may
be selected.

**Investment 11. Scale-up: Strengthening of the regional public transport railway fleet with
zero emission trains and universal service**

This investment consists of the procurement and entry into service of at least 69 zero emission
passengers’ trains (whereby a train is composed by at least one locomotive and includes
passengers’ carriages) and additional 30 carriages for universal service. Overall, the investment

---

126 Except for (a) assets and activities in power and/or heat generation, as well as related transmission and
distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do
no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which
the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free
operation.

127 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than
the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks
established for free allocation for activities falling within the scope of the Emissions Trading System, as set out

128 This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-
recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of
increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration
ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing
capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

129 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants,
where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling
operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions
under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the
lifetime of the plants; for which evidence is provided at plant level.
shall provide at least a total of 342 units, out of which at least 69 shall be locomotives. Only electric or hydrogen fuel cell shall be eligible. Bi-modal trains shall not be eligible.

**Investment 12: Grant Scheme for the development of an international, industrial and R&D leadership in electric buses**

This measure shall consist of a public investment in a Grant Scheme “Development of an international, industrial and R&D leadership in electric buses” in order to incentivise private investment and improve access to finance in Italy to support investments in the supply chain of the manufacturing of zero-emission electric bus fleets. The Scheme shall operate by providing grants directly to the private sector. On the basis of the RRF investment, the Scheme aims at initially providing at least EUR 100 000 000 of grants.

The Scheme shall be managed by Invitalia S.p.A. as the implementing partner. The Scheme shall include the following product line:

- Grants to companies in the zero-emission electric bus manufacturing supply chain. Hybrid buses shall not be eligible for support.

In order to implement the investment into the Scheme, Italy and Invitalia S.p.A. shall sign an Implementing Agreement that shall include the following content:

1. Description of the decision-making process of the Scheme: The final award decision of the Scheme shall be taken by an investment committee or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government.

2. Key requirements of the associated grant policy, which shall include:
   a. The description of the grants provided and eligible final beneficiaries.
   b. The requirement that all investments supported are economically viable.
   c. The requirement to comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the grant policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use\(^{130}\), (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the

\(^{130}\) Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation
relevant benchmarks\textsuperscript{131}, (iii) activities and assets related to waste landfills, incinerators\textsuperscript{132} and mechanical biological treatment plants\textsuperscript{133}.

d. The requirement that final beneficiaries of the Scheme shall not receive support from other Union instruments to cover the same cost.

3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to use any unused proceeds of the scheme, including beyond 2026, for the same policy purposes.

4. Monitoring, audit, and control requirements, including:
   a. The description of the implementing partner’s monitoring system to report on the grants mobilized.
   b. The description of the implementing partner’s procedures that shall ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.
   c. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before awarding a grant to an operation.
   d. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of Invitalia S.p.A. These audits shall verify i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) compliance with the DNSH principle, the State Aid rules, the climate requirements; and iii) that the requirement that final beneficiaries of the Scheme have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement and Grant Agreement are being respected.

5. Requirements for climate investments carried out by the implementing partner: at least EUR 100 000 000 of the RRF investment into the Scheme shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation.\textsuperscript{134}

The implementation of the measure shall be completed by 31 August 2026.

\textsuperscript{131} Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

\textsuperscript{132} This exclusion does not apply to actions under this measure in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{133} This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.

\textsuperscript{134} Final beneficiaries shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution. The implementing partner shall also be required to provide to the Member State a semi-annual report on the implementation of each project/activity.

Q.3. Description of the reforms and investments for the loan

Investment 13. Adriatic Line Phase 1 (Sulmona compressor station and Sestino-Minerbio gas pipeline)

The objective of this investment is to improve energy infrastructure and facilities to meet immediate security of supply needs for gas, including liquified natural gas, notably to enable diversification of supply in the interest of the Union as a whole.

The objective of the investment is to support the construction of a compressor station in Sulmona and a gas pipeline connecting the nodes of Sestino and Minerbio, as part of the Adriatic Line. The newly built infrastructure is expected to increase the capacity of transporting gas by 14 mcm/d.

Italy shall identify the Status of Site-Specific Conservation Objectives (SSCOs) and, if necessary, revise accordingly the environmental impact assessments (Valutazione Incidenza Ambientale) by the start of the work in the concerned areas.

The Sulmona compressor station and the Sestino-Minerbio gas pipeline shall be built by 31 August 2026.

Investment 14. Cross-border gas export infrastructure

The objective of this investment is to improve energy infrastructure and facilities to meet immediate security of supply needs for gas, including liquified natural gas, notably to enable diversification of supply in the interest of the Union as a whole.

This investment consists in upgrading the existing gas infrastructure allowing for the export of natural gas via the Tarvisio exit point. In particular, the investment consists in the construction of a new electric compression unit in the Poggio Renatico compressor station. The newly built infrastructure is expected to increase the capacity of exporting gas via the Tarvisio Exit Point by 8 bcm/y.

The compression unit in the Poggio Renatico compressor station shall be built by 31 August 2026.

Investment 15. Transizione 5.0

This measure supports the energy transition of production processes towards an energy efficient, sustainable and renewable-based model of production. As a result, the measure should lead to 0.4 Mtoe of energy savings in final energy consumption in the period 2024-2026.

Companies shall be granted with a tax credit commensurate with the expenses incurred between 1 January 2024 and 31 December 2025 if they invest in:

a) digital assets (4.0 tangible capital goods, 4.0 intangible capital goods\textsuperscript{135})

b) assets necessary for self-production and self-consumption from renewable sources (with the exclusion of biomass)

c) training staff in skills for the green transition.

The tax benefit shall be commensurate, according to at least three incremental thresholds, to the reduction in final energy consumption (of at least 3%) or to the achieved energy savings in

\textsuperscript{135} In particular, the scheme refers to annexes A and B of law 11 December 2016, n. 232.
the targeted processes (of at least 5% compared to the previous consumptions for such processes) linked to investments made in the assets referred to in point a)\textsuperscript{136}.

Therefore, the intensity of the tax benefit shall increase in levels according to the certified energy efficiency improvements and achieved energy savings.

To be eligible, the project shall be certified by an independent evaluator certifying that, ex-ante, the innovation project respects the eligibility criteria related to the reduction of total energy consumption. In addition, an ex-post certification shall certify the actual realization of the investments in accordance with the provisions of the ex-ante certification.

At least EUR 4 032 000 000 of the investment shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation.\textsuperscript{137}

The measure consists of a tax credit scheme and covers expenses to be claimed in the period between 1 January 2025 and 31 August 2026.

1\% of the total budget shall be allocated to developing an IT platform to: i) manage the certifications presented by the beneficiaries; ii) facilitate the assessment, the exchange and the management of the data used for analysis; and iii) to the monitoring and control activities.

In addition, the measure shall expand the scope of the scientific committee established in milestone M1C2-1 (Transizione 4.0) in order to develop by 31 August 2026 a report assessing the effectiveness of the NRRP investments under the competence of the Ministry for Enterprises and Made in Italy (MIMIT) and the possible synergies with other EU funding sources in sectors strategic for the EU and national competitiveness and autonomy.

**Investment 16. Support to SMEs for self-production from renewable energy sources**

This measure shall consist of a public investment in a Grant Scheme the “Support to SMEs for self-production from renewable energy sources” in order to incentivise private investment and improve access to finance in Italy’s self-production of energy from renewable sources (RES).

The Scheme aims to support micro, small and medium-sized enterprises (SMEs) in the implementation of investment programs aimed at the self-production of energy from renewable sources.

The scheme shall operate by providing grants directly to the private sector. On the basis of the RRF investment, the Scheme aims at initially providing at least EUR 320 000 000 of grants.

The Scheme shall be managed by Invitalia SpA as the implementing partner. The Scheme shall include the following product lines:

- non-repayable contributions - on average equal to around 50\% of the total investment
- for the purchase of systems and related digital technologies, which allow the direct production of energy from renewable sources for immediate self-consumption or through accumulation/storage systems.

In order to implement the investment into the Scheme, Italy and Invitalia SpA shall sign an Implementing Agreement that shall include the following content:

1. Description of the decision-making process of the Scheme: The final investment decision of the Scheme shall be taken by an investment committee or other relevant equivalent

\textsuperscript{136} For newly established companies the energy savings should be measured in relation to the annual average consumption of a company with similar characteristics (size) operating in the same sector (ATECO code).
governing body and approved by a majority of votes from members who are independent from the government.

2. Key requirements of the associated investment policy, which shall include:
   a) The description of the type of support provided and eligible final beneficiaries.
   b) The requirement that all investments supported are economically viable.
   c) The requirement to comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, in the case of general support to corporates, the investment policy shall exclude companies with a substantial focus  in the following sectors: (i) fossil fuel-based energy production and related activities; (ii) energy-intensive and/or high CO2-emitting industries; (iii) production, rental, or sale of polluting vehicles; (iv) waste collection, waste treatment and disposal, (v) processing of nuclear fuel, production of nuclear energy. Furthermore, the investment policy shall require compliance with the relevant EU and national environmental legislation of the final beneficiaries of the Scheme.
   d) The requirement that final beneficiaries of the Scheme shall not receive support from other Union instruments to cover the same cost.

3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to invest any unused proceeds of the scheme, including beyond 2026, for the same policy purposes.

4. Monitoring, audit, and control requirements, including:
   i) The description of the implementing partner’s monitoring system to report on the investment mobilized.
   ii) The description of the implementing partner’s procedures that shall ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.

---

138 It is considered that a Final Beneficiary has a “substantial focus” on a sector or business activity if such sector or activity is identified as being an essential part of the business activity of the Final Beneficiary respectively in relation to the gross revenue, profit, or client base of the Final Beneficiary. The gross revenue generated from the restricted sector or activity shall, in any case, not exceed 50% of the gross revenue.

139 Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

140 Including activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks. Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

141 Polluting vehicles are defined as non-zero-emission vehicles.

142 This exclusion does not apply to actions in plants exclusively dedicated to treating non-recyclable hazardous waste, and to existing plants, where the actions under this measure are for the purpose of increasing energy efficiency, capturing exhaust gases for storage or use or recovering materials from incineration ashes, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
iii) The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.

iv) The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of Invitalia SpA. These audits shall verify i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) compliance with the DNSH principle, the State Aid rules, the climate target requirements; and iii) that the requirement that final beneficiaries of the Scheme have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement are being respected.

5. Requirements for climate investments carried out by the implementing partner: EUR 320 000 000 of the RRF investment into the Facility shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation.143

The implementation of the measure shall be completed by 31 August 2026.

**Investment 17. Financial instrument for energy renovations of public and social housing, and low-income and vulnerable households**

The objective of the measure is to support renovation for low-income and vulnerable households and alleviate energy poverty. This measure shall consist of a public investment in a Facility, the “Financial instrument to alleviate energy poverty”, in order to incentivise private investment and improve access to finance energy renovations in social and public housing achieving a minimum 30% energy efficiency improvement.

The Facility shall be managed by the Implementing Partner. This may be Cassa Depositi e Prestiti or the European Investment Bank. Cassa Depositi e Prestiti and the European Investment Bank may also act together implementing partners. The implementing partner shall be clarified in the further specifications of the operational arrangements. The Facility shall operate by providing grants and/or subsidised loans to Energy Service Companies for the energy efficiency renovation of housing units.

On the basis of the RRF investment, the Facility aims at initially providing at least EUR 1 381 000 000 of financial support.

The Facility shall include the following product lines:

- **Public housing:**

This product line shall provide financial support in the form of grants, interest rate subsidies, subsidised loans, market loans to Energy Service Companies (ESCOs) for the energy renovation of public housing.

- **Social Housing:**

This product line shall provide financial support in the form grants, interest rate subsidies, subsidised loans, market loans to Energy Service Companies (ESCOs) for the energy renovation of social housing.

---

143 Final beneficiaries associated to specific projects shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution.
• **Energy renovations in low-income households in multi-apartment buildings:**

This product line shall provide financial support in the form of grants, interest rate subsidies, subsidised loans, market loans to Energy Service Companies (ESCOs) for energy renovations in low-income and vulnerable households in multi-apartment buildings.

Two-third of the facility shall be dedicated to energy renovations of public housing and social housing; one-third shall be dedicated to energy renovations in low-income households in multi-apartment buildings.

In order to implement the investment into the Facility, Italy and the Implementing Partner shall sign an Implementing Agreement that shall include the following content:

1. Description of the decision-making process of the Facility: The final investment decision of the Facility shall be taken by an investment committee or other relevant equivalent governing body and approved by a majority of votes from members who are independent from the government.

2. Key requirements of the associated investment policy, which shall include:
   - a. The description of the financial product(s) and eligible final beneficiaries.\(^{144}\)
   - b. The requirement that all investments supported are economically viable.
   - c. The requirement to comply with the ‘Do no significant harm’ (DNSH) principle as set out in the DNSH Technical Guidance (2021/C58/01). In particular, the investment policy shall exclude the following list of activities and assets from eligibility: (i) activities and assets related to fossil fuels, including downstream use, (ii) activities and assets under the EU Emission Trading System (ETS) achieving projected greenhouse gas emissions that are not lower than the relevant benchmarks, (iii) activities and assets related to waste landfills, incinerators and mechanical biological treatment plants.\(^{148}\)
   - d. The requirement that final beneficiaries of the Facility shall not receive support from other Union instruments to cover the same cost.

---

144 Final beneficiaries associated to specific projects shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution.

145 Except for (a) assets and activities in power and/or heat generation, as well as related transmission and distribution infrastructure, using natural gas, that are compliant with the conditions set out in Annex III of the ‘Do no significant harm’ Technical Guidance (2021/C58/01) and (b) activities and assets under point (ii) for which the use of fossil fuels is temporary and technically unavoidable for the timely transition towards a fossil fuel free operation.

146 Where the activity supported achieves projected greenhouse gas emissions that are not significantly lower than the relevant benchmarks, an explanation of the reasons why this is not possible shall be provided. Benchmarks established for free allocation for activities falling within the scope of the Emissions Trading System, as set out in the Commission Implementing Regulation (EU) 2021/447.

148 This exclusion does not apply to actions under this measure in existing mechanical biological treatment plants, where the actions under this measure are for the purpose of increasing energy efficiency or retrofitting to recycling operations of separated waste to compost bio-waste and anaerobic digestion of bio-waste, provided such actions under this measure do not result in an increase of the plants’ waste processing capacity or in an extension of the lifetime of the plants; for which evidence is provided at plant level.
3. The amount covered by the Implementing Agreement, the fee structure for the Implementing Partner and the requirement to reinvest any reflows according to the investment policy of the Facility unless they are used to service loan repayments of the Recovery and Resilience Facility.

4. Monitoring, audit, and control requirements, including:
   a. The description of the implementing partner’s monitoring system to report on the investment mobilized.
   b. The description of the implementing partner’s procedures that shall ensure the prevention, detection and correction of fraud, corruption, and conflicts of interests.
   c. The obligation to verify the eligibility of every operation in accordance with the requirements laid out in the Implementing Agreement before committing to finance an operation.
   d. The obligation of carrying out risk-based ex-post audits in accordance with an audit plan of the Cassa Depositi e Prestiti and/or the European Investment Bank. These audits shall verify i) that the control systems are effective, including the detection of fraud, corruption, and conflict of interests; ii) compliance with the DNSH principle, the State Aid rules, the climate and target requirements; and iii) that the requirement that final beneficiaries of the Facility have not received support from other Union instruments to cover the same cost is respected. The audits shall also verify the legality of the transactions and that the conditions of the applicable Implementing Agreement are being respected.

Requirements for climate investments carried out by the implementing partner: EUR 1 381 000 000 of the RRF investment into the Facility shall contribute to the climate change objectives in accordance with Annex VI to the RRF Regulation 149.

149 Final beneficiaries associated to specific projects shall be required to provide a justification of the selected intervention field for each project supported, together with a description of the project, for the purpose of the computation of the climate contribution.
### Q.4. Milestones, targets, indicators, and timetable for monitoring and implementation for the loan

SECTION 3: ADDITIONAL ARRANGEMENTS

1. Arrangements for monitoring and implementation of the recovery and resilience plan

The monitoring and implementation of the recovery and resilience plan of Italy shall take place in accordance with the following arrangements.

As provided under Decree-Law No. 77 of 31 May 2021 as amended by Decree-Law No. 13 of 24 February 2023, a number of coordinating structures are created for the monitoring and implementation of the plan. These include in particular: (i) a high-level steering committee (“cabina di regia”) established at the Presidency of the Council of Ministers, with the main task to steer and coordinate the implementation of the plan; (ii) a mission structure established at the Presidency of the Council of Ministers, at least for the duration of the plan, empowered to act as a central coordination structure for the implementation and monitoring of the plan; (iii) a technical structure at the Ministry of Economy and Finance, performing the operational monitoring of the implementation of plan, the control of the regularity of procedures and expenses and the reporting, and the technical and operational support to the implementation phase. The mission structure at the Presidency of the Council of Ministers acts as a single point of contact at national level for the European Commission. The Ministry of Economy and Finance ensures the evaluation of the results of the plan. Social partners and other stakeholders participate to dedicated meetings of “cabina di regia” to ensure their involvement in the implementation of the plan. Moreover, coordination structures are identified at the level of each central administration responsible for measures included in the plan, tasked with the management, monitoring, reporting and control on the relevant interventions, including in relation to the supervision of implementation and progress towards the achievement of milestones and targets. Finally, enforcement mechanisms in case of implementation issues, including through the activation of substitution powers vis-à-vis the administrations responsible for the measures of the plan, are envisaged with the aim to guarantee a timely and effective delivery of projects and ex-ante mechanisms for the resolution of conflicts are put in place.

In order to strengthen administrative capacity for the monitoring and implementation, the recruitment of temporary personnel is envisaged, including in relation to central administrations responsible for plan’s interventions and the Ministry of Economy and Finance (including concerning the central coordinating structure and the State Accounting Department), as provided under Decree Law of 9 June 2021, n. 80, as well as in relation to administrations of the South of Italy, which are expected to reinforce human capital involved in the planning and spending of EU funds, as provided in particular under Law n. 178 of 2020. In addition, resources are allocated to the mission structure established at the Presidency of the Council of Ministers to ensure its effective functioning, as provided under Decree-Law No. 13 of 24 February 2023. Finally, technical and operational support to central and local administrations is envisaged in the implementation of projects, including through the use of public capital companies, a pool of experts for technical assistance, and the possibility to resort to external expertise. These actions shall be accompanied by the implementation of measures to cut red tape and simplify administrative procedures, as provided for under Decree Law No. 77 of 31 May 2021 and Decree-Law No. 13 of 24 February 2023.

The arrangements also provide for the use of an integrated IT system (“ReGiS”). The existing audit service Inspectorate General for Financial Relations with the European Union (IGRUE),
within the Ministry of Economy and Finance, is tasked with the coordination of the audit systems and conducting the controls with the support of the State Territorial Accounts Office (RTS). Enhanced arrangements with Guardia di Finanza and relevant independent authorities such as the national anti-corruption agency ANAC shall remain in place, thus reinforcing the role that the Italian legal system already attributes to these authorities in relation to the protection of public finances, including those from the EU.

2. **Arrangements for providing full access by the Commission to the underlying data**

In order to provide full access to the Commission to the underlying relevant data, Italy shall have in place the following arrangements.

The Ministry of Economy and Finance acts as a technical structure for monitoring, including on progress on milestones and targets, and, where appropriate, implementing control and audit activities, and for providing reporting and requests for payments. It coordinates the reporting of milestones and targets, relevant indicators, but also qualitative financial information and other data, such as on final recipients. The data encoding is taking place at the level of the central administrations responsible for the plan’s measures, which shall report the required data to the Ministry of Economy and Finance. In accordance with Article 24(2) of Regulation (EU) 2021/241, upon completion of the relevant agreed milestones and targets in Section 2.1 of this Annex, Italy shall submit to the Commission a duly justified request for payment of the financial contribution and, where relevant, of the loan. Italy shall ensure that, upon request, the Commission has full access to the underlying relevant data that supports the due justification of the request for payment, both for the assessment of the request for payment in accordance with Article 24(3) of Regulation (EU) 2021/241 and for audit and control purposes.
